His son, Tom, aptly described his father's approach to his profession as, "his practice of medicine embodied unselfish service to all who needed him."

The many friends who mourn Dr. Quarton today will also have to recall his gentle sense of humor and his love of sport and companionship. He knew the importance of maintaining balance between work and relaxation. He made time to enjoy golf and fishing and frequently visited his vacation home in Shupac, MI, where he was known as the chief of police. He was a member of several social and fraternal organizations. One of his favorites in fact, the POETS, will be with him today to say a final farewell to one of their finest.

I ask my colleagues to join me in this tribute to one who has added a great deal to so many lives. We are now suffering from our loss but must be thankful that we knew him.

THE FEDERAL WITNESS SECURITY PROGRAM

HON. ALFRED A. (AL) McCANDLESS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. McCANDLESS. Mr. Speaker, today I have joined my colleagues Congressmen BOB WISE and STEVE SCHIFF in introducing a bill to increase the arsenal for our country's war on drugs. We are sponsoring legislation to enhance the prosecution of international drug traffickers through use of the Federal Witness Security Program.

The Federal Witness Security Program [Witsec] was created to assist the Government in successfully prosecuting high-ranking members of national crime syndicates. It allows prosecutors to offer threatened witnesses a new identity and relocation to a secure community in exchange for vital testimony. The program's success has been overwhelming. Yet increased international narcotics prosecutions have pointed to the need for certain program changes.

Today, almost 80 percent of all Witsec cases are related to narcotics prosecutions. These prosecutions often require the use of foreign national witnesses. As a successful former prosecutor pointed out:

When you are talking about defendants who are operating cocaine rings from Peru, Bolivia or Colombia * * * most of them run their rings from their foreign jurisdictions. A great deal of the conversations and activities which have to be testified about take place in foreign jurisdictions, which means that your witnesses are going to come from those same jurisdictions.

Prosecutors, however, have encountered difficulties in bringing foreign national witnesses and their families into the Witsec Program. Under current immigration procedure, a foreign national may enter the United States as a nonimmigrant as a parolee, visitor, or temporary or permanent employee of a U.S. subsidiary of a foreign company. Foreign nationals who are authorized to enter the Witsec Program are usually paroled into the country and must appear annually to extend their nonimmigrant status. Most are unable to qualify for permanent residency under existing immigration law and are therefore left to immigration limbo, relying on timely annual status reviews to keep them in the United States and away from the certain death of deportation.

Widespread awareness of the hardships and uncertainty caused by this inflexibility have made obtaining vital foreign testimony more difficult as potential witnesses shy away from the program. Consequently, Congressmen WISE, SCHIFF, and I have introduced today's bill to provide the Attorney General with the authority to offer permanent resident alien status to up to 100 vital witnesses and their families per year.

I am proud to be a sponsor of this important legislation, and look forward to its early enactment into law.

CAPTIVE NATIONS WEEK

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. NOWAK. Mr. Speaker, recently, proclamations were adopted by Mayor James Griffin of Buffalo, NY, and Dennis Gorski, the county executive of Erie County, NY, declaring the week of July 15–21 as Captive Nations Week.

Captive Nations Week serves to remind us that while the yoke of communism has been lifted from the backs of many peoples around the world there are still many groups who are oppressed.

While communism has disintegrated in many countries, such as East Germany, and Poland, popular uprisings in Estonia, Lithuania, and China clearly demonstrate that there are still people in the world who yearn to be free from oppressive governments. While these people struggle for the freedom which we in this country take for granted, it is especially important for all Americans to note the sacrifice being made.

In 1959, 31 years ago, the U.S. Congress passed a resolution which recognized the threat that expansionist communism posed to the free world and called for the halt of that expansion as well as the acknowledgment of the rightful claim to independence of those nationals that fell into the Communist orbit.

Now, during the current thaw in world tensions, I think it is appropriate that we remember those who have not yet attained those goals.

At this point, I would like to insert into the RECORD the two proclamations adopted marking the occasion of Captive Nations Week.

PROCLAMATION

Whereas, the United States has just celebrated the 214th year of independence and has been a living symbol and hope for mankind and serving as a guiding light for others to emulate; and

Whereas, the dramatic events of 1989 witnessing the emergence of several subjugated nations from the darkness of communist enslavement has given renewed hope for those still in bondage; and

Whereas, the farsighted passage of the Captive Nations Week Resolution in 1959 fully vindicated its most important purpose to give moral support to all nations who lost their independence; and

Whereas, notwithstanding the liberation of some formerly captive nations, the task of monitoring accurately the process remains to be followed, observed and transgressions cited; and

Whereas, the greatest obligation and task remains to help the liberation process of those who are still under the heel of Rus-

sian, Chinese or Cuban communist oppressions; and

Whereas, the Captive Nations Week Law has been the trailblazer for the great democratic movements in Central and Eastern Europe as it has been designed to encourage the just struggle to regain full national sovereignty and independence; and

Whereas, the monumental task in defense of freedom is yet incomplete and demands concentrated efforts, dedication, perseverance, which must work in tandem with our continued vigilance and defense preparedness being fully aware of the delicate balance of power now existing,

Now, therefore, I, James D. Griffin, mayor of the city of Buffalo, do hereby proclaim the week of July 15 to July 21, 1990 as "Captive Nations Week" in the city of Buffalo, and invite the people of our city to observe this week with appropriate ceremonies to give testimony and reaffirm their dedication to the ideals of freedom, independence, national and human rights.

PROCLAMATION

Whereas, for over two centuries the great American experience has been the guiding light of freedom and democratic principles and a role model for other nations to follow; and

Whereas, throughout the long history of mankind trials and tribulations tested the very foundations of civilization with encroachments upon the laws they developed; and

Whereas, thirty one years ago, recognizing the grave implication and direct threat to the free world, the Joint Congressional Resolution passed Public Law 86/90 calling for the restoration of sovereignty and independence for those who lost it; and

Whereas, the dramatic events of 1989 which witnesses the emergence of some nations subjugated by alien communist power and ideology and gave renewed hope for those still in bondage; and

Whereas, notwithstanding the liberation of some formerly captive nations, the important task of monitoring accurately the process remains to be followed, observed and transgression cited; and

Whereas, the spirit and essence of PL 86/90 continues to place its greatest obligation upon us to help the liberation process of those still under ceige and struggling to free themselves; and

Whereas, the defense of freedom is yet incomplete as long as all are not free, it demands concentrated efforts, dedication, perseverance. This must work in tandem with continued vigilance and defense preparedness being mindful the importance it places on the free world;

Now, therefore, I, Dennis T. Gorski, Erie County Executive, do hereby proclaim July 15th to July 21st, 1990 as "Captive Nations Week" in this Great County of Erie, of the State of New York—The Empire State.

WHAT WILL YOU DO TO HELP SOLVE THE DEFICIT CRISIS?

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PORTER. Mr. Speaker, Members of Congress are receiving thousands of letters from beer drinkers organized by one of America's largest breweries telling us not to raise taxes on beer. Other special interests are doing the same—telling us what we should not dare do to solve the deficit crisis.

In fact, these interests have become so sophisticated, so organized and are able to send forceful messages to Congress, that total gridlock—the inability to act at all to address the deficit—is a real possibility.

It's time, Mr. Speaker, to change the tune. It's time, as John Kennedy said, for people to ask not what their country can do for them, but what they can do for their country.

I'm replying to the beer drinkers and others writing in the same vein saying, "Fine, I've noted what you won't do, but now write me back and tell me what you will do, not on someone else's priorities, but what you are willing to give of yours to solve this serious problem."

Mr. Speaker, the deficit cannot be addressed unless Americans stop acting like the Balkans and start pulling together. Only by each of us agreeing to give something to the whole will we ever end this fiscal folly.

COMPULSORY UNIONISM

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3 1990

Mr. CRANE . Mr. Speaker, yesterday, I introduced along with my colleague from Flordia, Mr. MCCOLLUM, legislation which is designed to protect the rights and freedoms of all American workers. Specifically, the purpose of this bill, H.R. 5440, is to preserve the free choice of workers to join or not to join labor organizations.

The original intent of the Federal labor law was to guarantee employees the rights to form or join labor organizations. The granting of such a guarantee would seem to assume the converse—the right not to join. Unfortunately, in various places in this country, employees are compelled to pay dues to a union or lose their jobs. This is simply not fair and is not a situation that this Congress should tolerate. In short, forced union membership violates basic individual rights.

Samual Gompers, who founded the American Federation of Labor declared "There may be here and there a worker who for certain reasons * * * does not join a union of labor. That is his right." Mr. Speaker, I believe this is legislation that all Members of this Congress should be able to support and I look forward to working with my colleagues toward its passage.

A CONGRESSIONAL SALUTE TO EDWARD C. HENRY UPON HIS RETIREMENT FROM THE LOS ANGELES HARBOR DEPARTMENT

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute to an outstanding individual and public servant. Edward C. Henry will be honored on Wednesday, August 15, 1990, upon his retirement from the Los Angeles Harbor Department. This occasion gives me the opportunity to express my sincere appreciation for his many years of dedicated service.

While Ed will be honored upon his retirement from the Los Angeles Harbor Department, it is important to mention his over three decades of service to the Los Angeles Police Department [LAPD]. He first joined the LAPD in September 1943, and upon graduation from the police academy he was assigned to patrol. Later, after serving 2 years in the Navy during World War II, he returned to the police department and served as a juvenile officer, and as officer in charge of the Watts Juvenile Office. His exceptional performance and leadership skills, both on and off the job, led to his promotion to sergeant of police in August 1954. As sergeant of police, Ed was assigned to homicide and greatly assisted in containing the city's crime rate through his investigation of over 300 cases.

Over the next 10 years with the LAPD, Ed had assignments in the internal affairs division and in community relations. He was promoted to lieutenant of police in August 1966, and later, in 1970 to captain of police. Throughout his climb up the career ladder, Ed always displayed the utmost character and professionalism. It was with these same qualities that he was loaned to the Virgin Islands through the justice department in 1973, to serve as chief of police. After a successful LAPD career, one that could have easily continued, Ed retired in 1976.

It was after his retirement from the LAPD that Ed began his service with the Port of Los Angeles. In April 1976, he was appointed as port warden for the Port of Los Angeles Police and has served in this capacity ever since. During his tenure with the port, he has been instrumental in implementing numerous new programs. He has greatly assisted in the establishment of the Port of Los Angeles as one of the premier ports in the world. Ed's involvement with the police and the port has carried over to his extracurricular interests as well. He is currently a member of the International Association of Chiefs of Police, the International Airport and Seaport Police, the Propeller Club of the United States, California Peace Officers Association, Los Angeles County Peace Officers Association, Men of Tomorrow, Association of American Port Authorities, the Oscar Joel Bryant Foundation, and the San Pedro Chamber of Commerce.

The contributions that Ed Henry has made to the community are immeasurable. After 44 years in the field of law enforcement, it is high time that he be honored by his relatives and friends. On this most deserving occasion, my wife, Lee, joins me in extending our heartfelt thanks and congratulations. We wish Ed, his wife, Betty, and their children, William, Paul, and Laurel, all the best in the years to come.

A TRIBUTE TO THE HISPANIC AIDS AWARENESS PROGRAM

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to recognize the efforts of the Hispanic AIDS Awareness Program. The need to make everyone aware of the dangers and the transmission of AIDS is of acute importance. Every 2 hours a Hispanic is diagnosed with the AIDS virus and the tragedy of the disease hits home with the death of one Hispanic every 4 hours from AIDS.

The Hispanic AIDS Awareness Program is filling the need for more information about AIDS in the Hispanic community. Through the efforts of exceptional people they have been able to begin the process of informing the community of the dangers of AIDS and methods of prevention. A luncheon was held on July 31, 1990, that honored the fervent efforts of those community leaders who have performed outstanding service on behalf of AIDS awareness. Dr. Moraima Trujillo, a clinical professor of psychiatry at the University of Miami School of Medicine, Dr. Joyner Sims, the former chief of the AIDS program for the Florida Department of Health and Rehabilitative Services, Ms. Helen Aquirre Ferre codirector of the largest Spanish-language newspaper "Diario Las Americas," and Mr. Marcos Regalado, the Director of Dade County Equal Opportunity Board, all are examples of community leaders who are truly making a difference and saving lives.

Miami's Hispanic population owes a debt of gratitude to the Hispanic AIDS Awareness Program. The ravages of this disease have made it the bubonic plague of the 20th century. Until a cure is found, the best attempt we have at curtailing the disease is through education and prevention. This Hispanic AIDS Awareness Program is doing a favor to my district Miami, and the Hispanic community by being a cornerstone of the education process.

PRESERVE QUALITY IN TELEPHONE SERVICE

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BRYANT. Mr. Speaker, as a result of the continuing deregulation of the telephone industry, I am concerned that, as the local exchange carriers are permitted to enter into new competitive activities, business development opportunities will focus on new ventures rather than providing regulated telecommunications services. I believe the pressure on LEC management to dedicate its most experienced and talented personnel to these new endeavors further threatens the continued quality of regulated services.

In addition, I note that actual and anticipated changes from traditional rate of return regulation to price cap and other forms of incentive based regulation are anticipated at the Federal level and in some of the 50 States. The major concern with price caps and other forms of incentive regulation—whereby excessive earnings above an authorized rate of return are shared between stockholders and ratepayers—is that the monopoly carrier can increase profits accruing to the company by reducing costs through decreasing service quality. That is, while on the one hand these alternatives are expected to increase the incentives for more efficiency, they may also have the perverse effect of encouraging quality degradation.

For example, the number of transmission channels between two locations can be decreased—or needed expansion canceled—with a reduction in costs and an increase in the chances of having a call blocked during peak calling times. The expansion of the capacity in a switching office can be postponed, thus causing an increase in dial tone delay. The number of operators providing directory assistance can be reduced, thus increasing delays in access to information. Routine maintenance periods can be extended, causing and hard to detect deterioration in quality.

Under traditional regulation, the carrier does not have an incentive to reduce costs at the expense of quality because then-regulated rates would be reduced and there would be no additional profit as a result. Indeed, the critics of traditional regulation would argue that, under rate of return regulation, the carrier has an incentive to overinvest in plant—put in too much capacity—and not control maintenance expenses as closely since the former will increase total profits and the latter is merely a passthrough to the ratepayer.

With a profit-sharing system, the carrier has the incentive to skimp on quality because it can retain all or part of the moneys resulting from cost savings. The issue of quality is particularly troublesome because long periods of time can elapse before the effects of delayed maintenance, for example, must be recognized. This means the phone company could realize short-term profits by delaying maintenance or investments today at the expense of tomorrow's ratepayers. Moreover, economic theory and marketplace realities suggest that the carrier would tend to let quality slip in those areas of the business least threatened by competition—where customers have few or no alternatives.

Accordingly, the legislation I propose directs the FCC to establish, impose, and enforce upon the LEC's network quality standards for the purpose of ensuring the continued maintenance and enhancement of LEC facilities and service. To this end, the proposal directs the FCC to establish a separate joint board for the purpose of developing standards, to be enforced by the FCC and the State commissions, for measuring LEC network quality. Such quality standards should encompass the broad array of public switched and special access services; facilities; the statutory itemization of service installation; operator-handled calls; network call completion; transmission and noise requirements; and customer trouble reports—but this list is by no means meant to be all-inclusive.

My bill further directs that the joint board, at a minimum, set out quarterly reporting requirements directing the LEC's to submit uniform data reports to the FCC and State commissions regarding compliance with the prescribed standards. Further, the joint board is directed to recommend that the FCC and the State commissions contract periodic independent audits of LEC compliance.

Finally, the joint board is directed to recommend enforcement penalties and procedures, including expedited customer complaint mechanisms, to ensure LEC compliance with these network quality standards.

I invite my colleagues to join me in supporting this bill.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that regulatory changes allowing entry of the Bell operating companies into new lines of business, in addition to actual and anticipated changes from traditional rate of return regulation to price cap and other incentive based alternative regulation at both the Federal level and among some of the 50 States, make necessary new regulatory efforts to prescribe, monitor, and enforce standards designed to maintain and enhance the quality of the Nation's local exchange telephone network.

SEC. 2. NETWORK QUALITY STANDARDS.

Title II of the Communications Act of 1934 is amended by adding at the end thereof the following new section:

"SEC. 226. NETWORK QUALITY STANDARDS.

"(a) LOCAL NETWORK QUALITY STANDARDS.—The Commission shall, notwithstanding section 2(b) of this Act, impose and enforce network quality standards on the local exchange carriers for the purpose of ensuring the continued maintenance and enhancement of local exchange carrier facilities and service. Such standards shall, at a minimum, include measurement of local exchange carrier service installation, operator-handled calls, network call completion, transmission and noise requirements, and customer trouble reports.

"(b) JOINT BOARD.—Not later than 90 days after the date of enactment of this section, the Commission shall establish a separate joint board for the purpose of developing standards for measuring network quality, to be enforced by the Commission and the State commissions. The joint board shall direct local exchange carriers to submit to the Commission and State commissions quarterly uniform data reports regarding compliance with the prescribed standards. Additionally, the joint board shall recommend to the Commission and the State commissions to commission periodic independent audits of local exchange carrier compliance with the network quality standards developed by the joint board. The joint board shall recommend enforcement penalties and procedures, including expedited customer complaint mechanisms, to ensure local exchange carrier compliance with these network quality standards.

"(c) ESTABLISHMENT AND COMPOSITION OF BOARD.—The joint board established for purposes of this section shall be composed of an equal number of members of the Commission and State commissioners appointed in accordance with section 410(c) and approved in accordance with section 410(a). With respect to any regulation that directly affects rate regulation by a State commission, the commission shall adopt the recommendations of the board unless such recom-

mendations are inconsistent with the public interest or any provision of law.

"(d) DEFINITION.—As used in this section, the term 'local exchange carrier' means those common carriers, engaged in intrastate or interstate communications, who provide telephone exchange service as defined in section 3(r) of this Act.".

JOHN A. GRONVALL, M.D.

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MONTGOMERY. Mr. Speaker, today we learned of the sudden death of Dr. John A. Gronvall who was the Chief Medical Director of the Department of Veterans Affairs [VA] for almost 3½ years. He filled the job during an extremely difficult period for VA health care. Both before the committee and in public forums he took the tough questions and answered them directly and honestly. But it went beyond that. Back at his desk and in his travels throughout the VA health care system, he worked diligently to resolve the challenges which arose as a result of budget cuts. There were many major accomplishments during the years he headed the Department.

As head of the VA's medical care system, Dr. Gronvall administered an organization which employs more than 200,000 health care personnel in 172 medical centers, 233 outpatient clinics, 122 nursing homes, and 27 domiciliaries.

Dr. Gronvall first joined the VA in February 1983. Prior to his service as Chief Medical Director, he served as the Deputy Chief Medical Director, the agency's No. 2 medical position. Dr. Gronvall joined the VA as the Deputy Assistant Chief Medical Director for Academic Affairs, and was appointed Deputy Chief Medical Director in September 1983.

Dr. Gronvall received his undergraduate and medical degrees from the University of Minnesota. His residency in anatomic pathology and neuropathology was at the University of Minnesota Medical School, and he was certified by the American Board of Pathology (Anatomic Pathology).

Beginning his career in academic medicine in 1960 as an instructor of pathology at the University of Mississippi School of Medicine, Dr. Gronvall rose to become that institution's associate dean, as well as associate director of the medical center, by 1967. Joining the University of Michigan faculty as an associate dean in 1968, he was appointed dean of the medical school in 1971. He became a full professor of pathology in 1972.

Dr. Gronvall was serving as a VA distinguished physician at the time of his death.

Dr. Gronvall will be remembered as the man who held firm to the helm while bringing VA medical care through rough seas. His mark on quality care for veterans is indelible.

I had the highest regard for this great man. He was a compassionate and caring individual. This made him very popular among his colleagues. Dr. Gronvall was a fairminded man and was held in high esteem by Members of the House and Senate. He was a dedicated family man. These are but a few of the many things that made John Gronvall a personal friend of mine. Veterans throughout the country will miss him and so will I.

Mr. Speaker, on behalf of my colleagues, we extend our deepest sympathy to John's lovely wife, Cindy, to his stepdaughter, Jennifer, and his sons, Paul and Brad.

EC TRADE REFORM IS A MUST

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. THOMAS of California. Mr. Speaker, agricultural trade is the lifeblood for people across the globe, which is why it is imperative that agricultural goods be allowed to circulate freely. Unfortunately, this is not the case with regards to the European Community [EC], which continues to take unfair advantage of world agricultural markets through both its production and export policies. The EC is undermining the economic stability of the U.S. farmer by maintaining high trade barriers to American goods and by dumping its own products into the world market so that American sales opportunities are siphoned away. Indeed, the policies of the EC often hurt U.S. farmers directly, and if this situation is to change, the United States must reach a definitive trade agreement with all agricultural trading nations during the Uruguay round of the General Agreement on Tariffs and Trade [GATT] talks this year. President Bush has skillfully placed the U.S. negotiators in a position to bring about this agreement.

For years the EC has heavily subsidized its farming industry by erecting trade barriers against foreign products and by maintaining high price supports for its own products. Since 1986, for example, an average of 45 percent of EC farm income was a result of Government intervention in the farm economy. Last year, the EC spent a staggering $10 billion on export subsidies, which was 10 times more than the United States spent. The 1989 price-support level for corn in Europe was $205 per ton, while the United States level was half as much per ton.

The effects of these and other such policies are that the European farmers can and do sell their products on the world market for a price much lower than their domestic market price, a practice called dumping. This in turn reduces the rate of return for U.S. agricultural producers. Such a dumping of goods on the world market by the EC threatens the livelihood of U.S. farmers.

At the 16th annual economic summit President Bush aggressively attacked the heavily subsidized European agricultural system, and pushed for an agreement on farm trade. President Bush's unwavering efforts to get the EC agricultural system to stop hurting the world agricultural market were so well directed that EC president, Jacques Delors was unpleasantly surprised with the realization that the United States was serious about solving the trade problem immediately. Even though the United States has been serious about trade reform with the EC for many years, the potential for economic disaster has never been so great. If the Europeans are allowed to continue flooding the world market with their overly subsidized products, the problems that American farmers currently face will never improve.

In my meetings with members of the European Parliament, the legislative body for the EC, I have repeatedly stressed that the Europeans should reform their trade laws or face a tough U.S. reaction.

I believe that this solution, building upon President Bush's strong stance, should be reached during the current Uruguay round of the GATT talks. The 97-member nations will negotiate ways to reduce tariffs and other barriers to trade in order to increase international commerce and prosperity.

The U.S. proposal to GATT is a four-pronged approach designed to gain more market access, export competition, internal support, and higher sanitary regulations. The fact that President Bush has made his commitment to achieving these reforms may help improve the prospects for achieving reform as well as a world agricultural market that is free from detrimental trade policies.

ARTHUR MacDOUGALL LOVE, JR.

HON. HELEN DELICH BENTLEY

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mrs. BENTLEY. Mr. Speaker, last week one of my dear friends lost a long battle against cancer. And his community and the State of Maryland lost one of the true builders of the State. Arthur MacDougall Love, Jr. was not only an architect whose concepts and love of the conservation of the best is evidenced in Annapolis and at various Park Service installations; but, through his family's contribution, over many years, to the Republican Party of Maryland, he leaves a living legacy.

Born 66 years ago in Norfolk, VA, Arthur Love was educated in Baltimore, graduated from Baltimore Polytechnic Institute, and attended McCoy College of Johns Hopkins University, where he was later an engineering instructor. He died July 24, 1990.

After the bombing of Pearl Harbor, Arthur enlisted in the U.S. Army Air Corps and, was commissioned in 1944. He saw action in World War II in the European Theater as a B–24 bomber pilot in the 8th Air Force.

He continued to fly after the war as a charter pilot and then entered what was to become a distinguished career in architecture. Establishing his own firm, Arthur was recognized, nationally, for his achievements in the field when he received the National Honor Awards in School and Library Design for office buildings, homes, for any type of building or facility one could imagine. His stature, among his peers, was recognized when he was elected to several posts within the American Institute of Architects, including president of the Maryland council, the Chesapeake Bay chapter, and the Maryland council.

Retiring from his architectural business in Annapolis in 1980, Art moved to St. Augustine, FL. But, Maryland beckoned him home, and in 1986, he was appointed director of construction management for the U.S. Depart-

ment of Interior. In this position he was responsible for providing quality facilities for Native Americans on reservations throughout the United States. He received recognition for his success in providing excellent educational facilities for Indian children.

Long active in historic preservation, he was appointed a member of the Governor's Consulting Committee for the National Register. He also served on the Architectural Review Board for the State of Maryland and the Board of Historic Annapolis. For his important contributions to the State in these positions, Arthur received the Distinguished Citizen of Maryland Award.

He is survived by his wife, Virginia Allen Love of Bethesda, and three children, Arthur MacDougall Love III, Crofton, MD; Nancy Allen Love, Bethesda, MD, and Christopher Blake Love of St. Petersburg Beach, FL. There are three grandchildren, Courtenay Jane Stewart, Arthur MacDougall Love IV, and Christopher Blake Love.

SAY "NO" TO EXCISE TAXES

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CRANE. Mr. Speaker, in the last few months we have heard many calls to increase excise taxes as a way to help reduce the budget deficit.

Mr. Speaker, I cannot express my opposition to such proposals in strong enough terms. You will not find a more regressive tax than an excise tax. If you want to raise excise taxes to balance the budget you will be doing that balancing on the backs of middle- and lower-income Americans. At the end of my remarks I have included an article that appeared in the Washington Times which precisely illustrates my point with respect to excise taxes on beer, wine, and other alcoholic beverages. The figures show that those hit hardest by the latest booze tax proposals are the 20 percent of Americans with the lowest incomes who spend 3.7 percent of their income on alcohol. In contrast, the top 20 percent of Americans spend about 1.6 percent of their income on alcohol. I do not believe that the concept of "exise taxes toward deficit reduction" can be rationalized in light of such figures.

The final point, of course, is that increasing taxes—any taxes—is not the manner in which we should be reducing the deficit. Our problem is not that we are undertaxed, rather the problem is that we are spending too much. The American taxpayer is presently being taxed at all time record highs when you look at the total taxes levied by Federal, State, and local government entities. The spending side of the ledger is the problem and an across-the-board spending freeze or actual spending reductions will not create a drag on the economy as a tax increase most certainly will. We, as Members of Congress, are simply going to have to make some tough decisions—decisions that this Congress has to date been unwilling to make. Frankly, I find it absolutely pathetic that a majority of this House cannot summon the political courage necessary to even vote for a 2-percent across-the-board cut in appropriation bills that are 10 to 20 percent above last years spending level.

Mr. Speaker, I will never go back to my constituents and say "I voted for excise tax increases to reduce the deficit" when we have made no real effort to limit the growth of this Federal Government.

[From the Washington Times, July 30, 1990]

BOOZE TAX WOULD HURT POOR

The Bush administration's proposal to increase taxes on alcoholic beverages would cost the average American family $101 a year, with the greatest burden falling on the poor, congressional analysts say.

The proposal, which would cost drinkers $7.2 billion a year, is part of the second deficit-reduction tax increase offered by the administration this year. The new package has yet to be agreed to by Republican congressional leaders—let alone by top Democrats—who are trying to negotiate deficit cuts of more than $50 billion for next year.

Under the proposal, the $1.98 federal tax on a fifth of 80-proof vodka would rise to $2.54. For the first time in almost 40 years, taxes on beer and wine would be raised as well, so that an ounce of drinking alcohol would be taxed at 25 cents, regardless of the form.

That would boost the 16-cent tax on a six-pack of beer to 81 cents and the 3-cent tax on table wine to 76 cents. The tax on other forms of wine, which is based on alcohol content, would go up accordingly.

Analysts say the impact would be felt most by those with the lowest incomes, simply because they tend to spend a greater share of their earnings on alcohol than do the more affluent.

According to the Congressional Budget Office, the 20 percent of Americans with the lowest incomes [averaging $8,228 after taxes] spend $308 a year, or 3.7 percent, on liquor, wine and beer. The top one-fifth, with after-tax incomes averaging $77,622, spend about $1,210, or 1.6 percent.

A second new element of the administration plan would target upper-income Americans. For the first time, it would limit the federal deduction for state and local income taxes to $10,000 per couple or individual, raising up to $3 billion a year.

TAXING ALCOHOL

The Bush administration has proposed raising alcohol taxes $7.2 billion. The plan would:

Raise the current $1.98 federal tax on a fifth of 80-proof vodka to $2.54.

Raise the 16-cent tax on a six-pack of beer to 81 cents.

Raise the 3-cent tax on table wine to 76 cents.

Cost the average American family $101 a year.

Hit hardest the 20 percent of Americans with the lowest incomes, who spend 3.7 percent of that income on alcohol. The top 20 percent spend about 1.6 percent on alcohol.

THE CONTINUING PLIGHT OF THE VIETNAMESE BOAT PEOPLE

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ANDERSON. Mr. Speaker, I wish to bring to the attention of my colleagues a long-standing international problem. There can be no disagreement that under the Vietnamese Communist regime human rights abuses are widespread. These abuses include brutal treatment of persons, arbitrary detentions, absence of fair trails, denial of privacy, and severe restrictions on; freedom of speech and press; assembly and association; movement; worker rights, as well as the right of citizens to change their Government. Such abuses coupled with economic hardship forced an upsurge of people attempting to flee from Vietnam. Prior influx of Vietnamese refugees to Western nations, and its ensuing strain on economic resources, has resulted in the West reducing Vietnamese resettlement.

Approximately 660,000 boat people are known to have escaped from Vietnam since 1975. By spring 1979, nearly 60,000 boat people, often having endured the atrocities of pirates and other dangers of the sea, were arriving monthly in the nations neighboring Vietnam. While awaiting resettlement in Western nations, many of the boat people have remained in the first asylum states bordering Vietnam for extended periods. Consequently, as the refugee population of Southeast Asian first asylum camps has surpassed originally intended occupancy, Vietnamese boat people have exhausted their welcome with asylum governments. These first asylum countries have begun to divert the refugees to other countries or identify them as economic migrants and return them to Vietnam by force. The boat people, however, if forced to return to Vietnam, face stiff penalties imposed by the Government on anyone fleeing to a foreign country. The end result, further tensions between Vietnamese boat people and asylum nations.

For more than 12 years, beginning with the fall of Saigon, boat people have sought safety from the oppression of their Communist Government in asylum countries. The living conditions of these first asylum refugee camps are poor and of communal living. Boat people have reportedly lived in these poverty stricken asylum camps for up to 4 years while they await permission to resettle in a Western nation.

In an effort to address this problem and to make refugee admissions more equitable and orderly, Congress passed the Refugee Act of 1980. Hereafter, the United States defined a refugee as a person outside his or her country, "with a well-founded fear of persecution on account of race, religion, nationality, membership in a particular social group, or political opinion." In addition, on June 13–14, 1989, a conference attended by 60 nations attempted to resolve the problems of Vietnamese seeking asylum in Southeast Asia. In return for continued first asylum for the fleeing Vietnamese, resettlement efforts of the traditional re-

settlement countries will be accelerated. The United States, in turn, has agreed to admit 18,500 of the long-staying population and up to 50 percent of later arrivals classified as refugees.

Clearly, the plight of the Vietnamese boat people is uncertain and complex, however, significant strides have been made. It is important that Congress remember its commitments to these people, and take the necessary steps to honor them.

RECOGNIZING THE NAVY LEAGUE OF MIAMI

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I am bringing to the attention of my colleagues an organization which has furthered and supported the maritime services in America. Recognizing the importance of naval and maritime forces in our strategic triad, this organization has provided the American people with the opportunity to educate themselves and establish continuous sustenance for these services.

The Navy League of the United States was formed in 1902 to create interest and support for our Navy, Marine Corps, Coast Guard, and merchant marine. Today, the Navy League is engaged in several activities serving the community, industrial leaders, and elected officials. The education which they provide conducted on local, national and international levels and are welcomed in all four corners of the globe.

The Miami Council of the Navy League has repeatedly proven their dedication to serving the people of south Florida. Whether hosting receptions or sponsoring educational programs, the Miami Council are constantly displaying their patriotism and integrity.

The officers of the Navy League Miami Council are Bob Sprung, president; Martha Hoskins, senior vice president; Paul Gilson, vice president; E. Albert Pallot, vice president; Frank Simokaitis, vice president; Salley Wagner, vice president; Carmen Boom, secretary; John Pell, treasurer; and Dale Thorn, judge advocate.

I commend the Navy League for their hard work and dedication to the maritime services. Through them, the longstanding tradition of America's strength on the seas will undoubtedly continue.

CONCERNED CARIBBEAN CITIZENS ABOUT TRINIDAD AND TOBAGO

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DYMALLY. Mr. Speaker, I bring to the attention of Members of Congress a statement from the "Concerned Caribbean Citizens" about the situation in Trinidad and Tobago.

STATEMENT OF CONCERNED CARIBBEAN CITIZENS, MONDAY, JULY 30, 1990

The sudden and tragic disruption of the lives of the people of Trinidad and Tobago, caused by events in Port of Spain on Friday 27 July, 1990, has caused deep concern and anguish among Caribbean people here. The loss of life that has accompanied these events has been a source of acute pain and is profoundly regretted. We offer our most heartfelt sympathy to the families and friends of those who have perished. Our concern and that of all Caribbean and other peace-loving people, is for a peaceful and early settlement of this crisis.

We are mindful of the fact that the deteriorating economic situation in Trinidad and Tobago, as throughout much of the region, is a source of concern to all who have the interests of our people at heart. We are aware that the worsening trade, debt and balance-of-payments situation is evidence of this deterioration, which is also painfully manifested in the collapse of essential public services available to the local population.

We recognize that this crisis has not occurred overnight but has its roots in the inexorable collapse of development efforts over the last four decades. As persons living in the policy center of the United States, we are acutely aware of the contribution of a deepening global economic crisis to the collapse of these development efforts. We note, for example, that the accelerated downward slide of the Trinidad and Tobago economy over the last five months, has been exacerbated by International Monetary Fund (IMF) introduction of measures intended to stabilize the economy and get growth started. The austerity measures that have accompanied these policies of the IMF have been particularly hard on the poor in Trinidad and Tobago as well as on workers in the public and private sectors due to wage cuts, currency devaluations, budget cuts, and the accompanying decline in business investment.

We know that the efforts of the Government to raise funds in order to meet the outstanding problems have not been successful and that the small loans made available by the IMF the World Bank and other international donors in return for the institution of painful adjustment measures have barely scratched the surface of the country's capital needs. Under these circumstances it is inevitable that the conditions in the society would rapidly worsen.

In Trinidad and Tobago, as in most countries of the region, there is a time-honored tradition of the peaceful resolution of conflict through discussion and negotiation. We are pleased to note that the response of the government of Trinidad and Tobago to the events last Friday, has been to enter into a dialogue with the persons initiating those events. We commend this effort on the part of all concerned and urge the steadfast adherence to this approach.

We understand and share the deep concerns of Caribbean governments about the unwelcome departure from our tradition of peaceful dialogue that the activities of last Friday represent, but urge our government leaders to avoid being drawn into a course of action that includes a short-term military response to the situation in Trinidad and Tobago. Recent conflicts in our region have taught us about the implications of the quick-fix approach to situations of conflict, particularly when the military response is likely to involve personnel, materiel, equipment and the strategic interests of a non-Caribbean country, the United States. Our strict adherence to the principle of non-intervention is of paramount importance here.

No matter how temping the military approach may be in the current crisis, we urge our governments to see in the events in Trinidad and Tobago, an opportunity to turn away from the military and to return to our own traditions of peaceful and constitutional settlement of disputes.

In this regard, we see a vital role in this latter approach for our regional institutions both public and private. We note the important contribution already being made by members of the clergy of Trinidad and Tobago and recommend that this role be expanded to involve Caricom and the Caribbean Conference of Churches, two regional bodies representative of the concerns and aspirations of a broad cross-section of the Caribbean people.

These are trying times for Caribbean people. It is not easy in the heat of the crisis, to step back and remind ourselves of the connections between our situation and the larger, deeper global crisis. We consider it incumbent upon those who have the luxury of distance from the immediate situation, to remind our brothers and sisters in the region of those annoying complexities.

In this particular situation, we remain confident that the resilience, creativity, goodwill and common sense that the people of Trinidad and Tobago bring to so many other aspects of life will be drawn upon in their hour of greatest need. We wish to assure you that, together with our Caribbean sisters and brothers the world over, the Caribbean community in the greater Washington DC area stands firm with all the people of Trinidad and Tobago on the side of a peaceful Caribbean resolution to this crisis.

STATEMENT FROM A GROUP OF CONCERNED CARIBBEAN CITIZENS, WEDNESDAY, AUGUST 1, 1990

Today, we remain anguished by the uncertainty and fear that grip the people of Trinidad and Tobago and the rest of the Caribbean, and reaffirm our condemnation of the extraordinary circumstances leading to this regrettable departure from the formal and traditional approach to protest and conflict resolution among our people.

To this end, we the Concerned Caribbean Citizens of the greater Washington, D.C. area, humbly propose that the government of Trinidad and Tobago, together with institutions representing all other sectors, accept the assistance of the Church to comprise a Committee of National Reconciliation. This broad-based committee should become the vehicle for charting a peaceful way out of this crisis, that would determine appropriate treatment of the perpetrators consistent with the laws and constitution of Tinidad and Tabago; and chart a course for lasting and equitable reconstruction of the economic, social and spiritual recovery of the nation.

We note that the precedent for this consultative approach exists in other parts of the region. For example, on May 29, 1979, the people of Dominica responded to the attempts by the government of Prime Minister Patrick John to curtail press freedoms and to restrict the actions of labor unions, by instituting a national strike. The response of the security forces was to attack crowds assembled outside the Parliament building, killing and wounding several persons. The dramatic escalation of the situa-

tion which resulted, led to the formation of a broad-based Committee of National Salvation representing all sectors and interest groups of the society. The deliberations of this Committee led to a diffusing of the crisis and to the establishment of an interim government which saw Dominica peacefully through to fresh general elections in one year.

It is our view that in Trinidad and Tobago today, this approach will help diffuse and mitigate tension between the primary protagonists by involving other sectors of the society in the elaboration of a solution to the crisis.

We are confident that the healing process which needs to begin in Trinidad and Tobago must include just, appropriate and legal treatment of the instigators of this security crisis.

We believe that the healing process can commence soon if the energies of the people and their institutions are collectively focused through this mechanism on crisis resolution and national reconciliation.

We remain convinced that the political and spiritual reserves of the people of Trinidad and Tobago provide the most important basis for a peaceful and just resolution to the present crisis without the intervention of extra-regional military and security assistance.

Signed on behalf of the Concerned Caribbean Citizens,

LEO EDWARDS,
Jamaica.
ATHERTON MARTIN,
Dominica.
DORRELL PHILIP,
Trinidad and Tobago.
ACKLYN LYNCH,
Trinidad and Tobago.

CRITICISMS OF DR. SULLIVAN BADLY MISSED THE MARK

HON. J. ROY ROWLAND

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ROWLAND of Georgia. Mr. Speaker, I feel compelled to respond to remarks made about Health and Human Services Secretary Louis Sullivan. Dr. Sullivan and I have worked closely together in Georgia and now on the national level on efforts to improve our health care system. Our relationship has been both a professional and personal one.

I have never known a more dedicated and able physician and governmental leader. Or a more courageous one. No one in Washington has been put to a tougher test. He has been on the receiving end of one attack after another since taking office as Secretary of Health and Human Services and, through it all, has remained professional.

If you know Dr. Sullivan, you know that nothing will deter him from his goal of establishing a high-quality, affordable health care system for all Americans.

My colleague from California is also committed to achieving a better health care system. He and Dr. Sullivan differ on some fundamental issues. But his criticisms of Dr. Sullivan badly missed the mark.

Dr. Sullivan has been fighting for the poor and disadvantaged all of his career. As Health and Human Services Secretary, he has taken the lead on a number of controversial issues that need to be addressed. He is working diligently to put together unified administration positions on other issues, just as he should be doing.

On the question of nationalizing the health care system, Dr. Sullivan and I agree. Certainly, Government on all levels should be involved in our efforts to bring quality health care to everyone. But a massive Government takeover of health care is not the answer. That would only undermine the quality of the care that our country's health system has historically delivered.

My colleague from California and Secretary Sullivan should get together and discuss their differences. They may not always agree, but they should strive to work together on the many health issues that confront the country.

In the meantime, Mr. Speaker, I want Dr. Sullivan to know that we in Georgia are proud of him. He is bringing honor to the Administration and honor to the country.

ENSURE APPROPRIATE PUNISHMENTS FOR FINANCIAL CRIMINALS

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MAVROULES. Mr. Speaker, the savings and loan scandal has rapidly become a powerful example of flagrant abuse of trust and leadership. Financial criminals must be brought to justice and their inequities should not be paid for by the American people. The action which must be taken to alleviate the strain of this crisis need be neither biased nor partisan. It must be fair, swift, and effective.

Measures must be taken to ensure appropriate punishments for financial criminals and to fully enforce regulatory procedures for Government-backed lending institutions to avert another crisis like the savings and loan debacle. Last year's S&L bailout bill, H.R. 1278, the Financial Institutions Reform, Recovery, and Enforcement Act [FIRREA], expanded the enforcement powers of the banking regulatory agencies by allowing civil and criminal penalties to be imposed by the banking agencies or the Justice Department on bank executives. It also established two regional Justice Department fraud offices in California and Texas to strongly regulate S&L's in those States since they had the greatest number of failures.

Now, I believe even more stringent actions are necessary. I was indeed pleased when in June, FIRREA was amended to appropriate $75 million for the Department of Justice for the investigation and prosecution of S&L criminals.

Additionally, unanimously supported by the House Appropriations Committee on July 11 was the Savings and Loan Accountability and Management Reform Act [SLAMR], H.R. 5098. I supported the inclusion of this amendment in the House passed 1991 Treasury and Postal Services appropriations bill. By merely reallocating manpower to areas of greatest importance, this amendment will double enforcement capabilities without requiring any new resources. The advancement of enforcement and prosecution of financial criminals, putting them behind bars, and gaining restitution is way overdue.

I would also like to commend the diligent efforts of my colleagues on the House Banking and Judiciary Committees for drafting H.R. 5401, the Banking Law Enforcement Act which I joined my colleagues in adopting on July 31. This bill will strengthen criminal penalties, create a financial institutions fraud unit in the Justice Department, establish a commission to study the causes of the S&L crisis, and authorize $153 million in additional funds for Justice Department investigations, prosecutions, and civil actions involving financial institutions.

The most recent proposal brought to my attention is a resolution which states that the American people, innocent of these crimes, should not be held accountable for bailing out the savings and loans through tax increases. As a cosponsor of this legislation I feel that the taxpayers should not be asked to pay restitution through taxes for a crisis they did not create.

Once again I would like to commend my colleagues for their hard work and to stress my continued commitment to the American people in finding the most effective and responsible solution to the savings and loan crisis.

H.R. 5457 THE PUBLIC TRANSIT ACT OF 1990

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BORSKI. Mr. Speaker, Today I am introducing H.R. 5457, the Public Transit Act of 1990, which substantially increases Federal spending for public transit without raising taxes.

After a decade of severe cuts, Federal transit spending is only one-half of the 1980 level

A major cause of the decline is a huge surplus of transit funds which sits in the mass transit account of the highway trust fund. Although these moneys were paid in good faith by the traveling public for the purpose of maintaining and improving the Nation's public transit infrastructure, they have been held hostage in order to hide the true size of the Federal budget deficit.

Last May, the General Accounting Office testified before the House Public Works Investigations and Oversight Subcommittee, on which I serve, that the unobligated surplus in the mass transit account is almost $4 billion.

Mr. Speaker, it is unconscionable to withhold these moneys when transportation gridlock is choking the country and threatening the nation's economic competitiveness and future economic growth.

We can not solve the terrible congestion on our roads and highways and we can not improve the Nation's air quality unless we invest the sums necessary to rebuild and modernize the Nation's public transit facilities.

Safe and efficient highways depend upon quality public transit services. And no matter how much we improve vehicle emission con-

trols, unless we reduce the growth in the number of new vehicles on our roads and highways, clean air is likely to be just an illusion.

My legislation authorizes spending down the surplus in the mass transit account of the highway trust fund beginning in fiscal year 1992. The bill also preserves support for public transit from general revenues at the currently authorized level of $2.1 billion.

The legislation recognizes the 1982 understanding between Congress and the administration that Federal transit spending would include full levels of general revenue support as well as monies from the gas tax.

General fund programs play a crucial role in national transit policy because gas tax funds are not available for public transit operating assistance. Many smaller cities rely on the general revenue program for a substantial portion of their public transit operating subsidies.

My bill authorizes Federal transit programs through fiscal year 1996. The legislation authorizes $6.1 billion in transit spending for fiscal year 1992. For fiscal years 1993 through 1996, the bill authorizes $5.1 billion per year in transit spending.

Compared to the fiscal year 1990 appropriation, these levels represent a dramatic improvement.

I urge my colleagues to join me in renewing our support for the nation's public transit systems. Let's get America moving again.

WHO SHOULD PAY FOR PORN?

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DORNAN of California. Mr. Speaker, I would like to address today an issue that remains a perplexing one for many of my colleagues. For some reason, Mr. Speaker, some of us in this body still don't understand the arts funding issue, and some of us have somehow not heard the extreme outrage expressed around this country by taxpayers incensed at the use of their tax dollars.

In an editorial in U.S. News & World Report, July 30, 1990, entitled "Who Should Pay for Porn?" editor David Gergen describes in crystal-clear terms the erroneous claims of the arts community that no free Federal money equals censorship. Why can't these people see the difference between forbidding Federal funding for filth and censoring insidious slop in society? Could it be because the arts community sees itself in danger of losing its virtual lifeline to the public gravy train?

I'm going to submit the entire Gergen article into the RECORD for my colleagues' edification. Mr. Speaker, this article puts the arts funding issue in a clear perspective. I hope my colleagues will take heed.

[From the U.S. News & World Report, July 30, 1990]

WHO SHOULD PAY FOR PORN?

(By David Gergen)

As Congress prepares to vote on new funding for the National Endowment for the Arts (NEA), leading artistic figures are angrily protesting and any all restrictions on federal moneys. A recent rejection of four grants, they claim, means that America is retreating into a dark age of censorship and Stalinist-style art.

What rubbish. Amidst all the pieties coming from people who know better, there has been very little talk about exactly what the four "artists" in question would do with their cash. Let the protesters call off their press conferences and hold a town meeting in Main Street America where they explain why taxpayers should pay to support these four:

Karen Finley, Nyack, N.Y., whose avant-grade performances include an act in which she coats her nude body with chocolate and bean sprouts representing sperm. She also openly rubs canned yams across her vagina. Outspoken in her denunciation of her rejection by the NEA, Ms. Finley makes clear that her work is intended to advance her aggressive feminism.

John Fleck of L.A., whose work includes a scene in which he urinates on a picture of Jesus in a toilet bowl.

Holly Hughes of New York, a playwright who wants to advance lesbianism and whose performance on stage includes a scene in which she places her hand up her vagina, saying that she saw "Jesus between Mother's hips." Apparently fixated by the subject, Ms. Hughes moved to New York a decade ago, where, she said, she wanted to "arrange a giant quartz-and-steel vagina in Federal Plaza that would topple the military."

Tim Miller of Santa Monica, Calif., a man who has been described by the NEA's theater-program director as "always political. As a member of the gay community, his work presents this vantage of the world to encourage education, understanding and eventual acceptance."

Their buddies are free to call this art. They are free to hold public exhibits. No one is trying to shut them down, because this country has a robust tradition of allowing freedom of expression. Censorship simply isn't an issue here.

What is at issue is that some artists apparently believe they can have it both ways: They want to engage in wanton destruction of a nation's values, and they expect that same nation to pay their bills. Grow up, friends. No society, even one as tolerant as this one has usually been, is willingly going to pay for it own demise. The American people are rightly concerned about moral decay in our public life, from the thievery at savings and loans to the suppression of prayers in school. To argue that in the name of freedom they must send in money for smut perverts the idea of freedom itself. Taxpayers have rights, too, although they are often neglected.

The protesters answer that art has always pushed on the perimeters of social convention and that only by seeing in new ways will we advance. That's a fair point. But works of decadence and blasphemy have been around a long time; we don't need a new round to learn old lessons. If we can't draw a line here, where can we? Who will say no to the next applicant to the NEA who wants to attack blacks of Jews or gays? Andrew Dice Clay anyone?

If artists insist upon a wholesale denial of any standards, they will wind up wrecking the very institution they claim to need. The controversy over the NEA has already prompted some congressmen to believe the quickest solution is also the best: Off with its head. But that's wrong, too. The NEA has played a highly constructive role in the past quarter-century, and it deserves to be fully funded for the next five years. Its thousands of grants, all but a handful above controversy, have helped us spawn a flowering of the arts across the country. Since the mid-1960s, the number of major dance companies has reportedly jumped from 37 to 240; opera companies, from 27 to 125; orchestras, from 58 to 165. The NEA has been a wonderful catalyst for this explosion.

In its laudable desire to maintain standards of decency, Congress should leave in place its current rules against funding obscene works but should avoid imposing new restrictions that would handcuff the NEA. By rejecting the four controversial grants this summer, the NEA has shown a sufficient sensibility that it should now be allowed to run its own show. It knows where to draw the line.

OUR RELIANCE ON IMPORTED OIL

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CRANE. Mr. Speaker, on August 2, the House of Representatives voted unanimously to give the President authority to impose an import ban against any third country who does not, like the United States, impose import sanctions against Iraq. The United States all too often imposes unilateral trade sanctions against some of our more notorious trading partners because we oppose some objectionable behaviour. Ultimately, the sanctions become meaningless unless similar actions are taken by other trading nations. An example of such flawed U.S. policy is no more clearly evidenced than in the case of Panama, which, although in economic ruins, remained for years under the thumb of a narco dictator.

If the President chooses to exercise the authority granted to him, those countries in the Far East who rely heavily on imported oil, would likely call foul, and rightfully so. Current U.S. law bans the export of Alaskan North Slope crude oil despite its high demand in the Pacific Rim. For over 20 years, the Japanese, who are so often accused of being trade protectionist for refusing to purchase U.S. goods, have been begging to be allowed to purchase Alaskan oil. No doubt such a sale would substantially improve our trade deficit with the Japanese, not to mention our other Far Eastern trading partners, whose demand for oil is rapidly rising.

Those in Congress who believe that by hoarding our oil supply we are protecting the United States from becoming dependent on the Middle East are wrong. The fact of the matter is we are allowing the OPEC cartel full reign over world oil prices, thus ensuring their economic prosperity in exchange for our own.

By lifting the export ban, it has been estimated that demand will cause the United States to increase our oil output by up to 500,000 barrels a day. It is true that such output will not eliminate our need for foreign oil, and, in fact it will actually increase our reliance on imported oil on the east coast where it is cheaper to ship from abroad than all the way from Alaska. However, U.S. oil companies

can easily divert the freed up Alaskan oil back to the United States should our trading partners ever decide to cut off our oil supply.

It is important to note that our reliance on imported oil will increase whether or not we decide to allow exports. The cost of domestic production coupled with high transportation costs has made it less economical in some areas of the country to use Alaskan oil rather than foreign oil. Consequently U.S. production is on the decline while consumption continue to steadily increase.

The Department of Energy estimates that the United States will be dependent on foreign oil for approximately 55 percent of its oil by 1995. It is no doubt, therefore, that freeing up Alaskan oil is in our best interest both economically and strategically. Today, I will introduce a bill to remove the prohibitions on the export of domestically produced crude oil. I urge my colleagues to cosponsor this important piece of legislation.

A TRIBUTE TO GENESIS

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I am pleased to be able to recognize the selfless and devoted work of Genesis, a residential complex located adjacent to Mercy Hospital which serves as a centerpoint of services for people with AIDS.

Genesis opened its doors to 10 indigent homeless persons with AIDS on October 3, 1988. As the facility was renovated and cleaned up, mostly through the help of volunteers, rooms were immediately made available for immediate occupancy. Genesis had a maximum capacity of 25 in May, and increased this census to 30 in September once all renovations had been finished. As of September 30, 1989, the program had served a total of 114 residents.

The program began to quickly create linkage with those Government agencies responsible for entitlements, with outpatient clinics, inpatient care units, hospice care services for the terminally ill, as well as any other services required by clients.

Residents at Genesis are assisted in the activities of daily living and are given three meals a day and frequent snacks. Professional nursing care is provided, as well as individual counseling and various support groups and family therapy. Clergy and laity of all faiths offer religious counseling, and an interdenominational chapel is located within the facility.

The following highlights some of Genesis projects: First, contracts have been developed and signed with local universities that enable students to complete an internship at Genesis. One nursing student completed an internship toward a master degree and at present three students are completing internships in the Department of Social Services. Second, one of the residents of Genesis will be a guest speaker at a local university to discuss AIDS and the personal perspective and experiences related to persons with AIDS. The series of speaking engagements will be addressed to students and staff of the university. Third, educational programs related to AIDS and universal precautions have been developed for the volunteers of Genesis. It is mandatory that every volunteer attend these classes prior to becoming a friend of Genesis.

A larger staff was needed for patient personal care than was expected and special funds managed by the Florida AIDS network were found and applied toward expenses not covered by available grant funds, including such things as medicine and other special needs of the residents, or toward expenses which exceed original budget projections.

The number of reported AIDS cases in south Florida continues to grow at a staggering rate, with Greater Miami now ranked third in the Nation. Genesis needs and requests involvement and generosity to help fulfill its mission in caring for the growing number of people afflicted with AIDS.

The great achievements Genesis has had are due to the organization and its members who saw the need for Genesis and carried it out: The Catholic Health and Rehabilitation Foundation with the aid and support of the Catholic Archdiocese of Miami and Health Services. The directors are Msgr. Bryan O. Walsh, president; and Mr. Luis Botifoll, chairman. The members are Mr. Carlos J. Arboleya, Mr. R. Ray Goode, Mr. John H. McDonnell, Mr. Juan T. O'Naghten, Mr. Octavio F. Verdeja, Mr. Joseph M. Fitzgerald, Sr., Esq., Ms. Dorothy C. Norton, Mr. Rafael A. Sanchez, and Ambassador David M. Walters. The director of health services is Gloria A. Hansen.

The smooth and efficient functioning of Genesis is due to the group who has so generously given of their time on a daily basis to help the AIDS cases. These people start with the general director of Genesis, Lavern Koontz, who serves the patients with the aid of Paulette Lester, RD, dietary consultant; Dwight Barnes, dietary supervisor; Annie Goudie, resident manager; Theresa Clem, administrative assistant; Esther Rodriguez, counseling; Julio J. Rojo, fundraiser; Fr. Daniel Dorrity, pastoral care; Shirley Lowe, RN, medical department; Bertha Hackney, CNA, maintenance/security; and a medical advisory board whose members are Dr. Fournier, medical director; Dr. E. Rojo, Dr. L. Carmichael, Dr. J. Eustace, Dr. R. Pelaye, and Dr. H.L. Kirkpatrick.

I congratulate Genesis and all who have made the miracle of Genesis possible. I also wish them much success on their upcoming events: October, 1990 Walkathon for AIDS in conjunction with other AIDS organizations; November 1, 1990, a fashion show and dinner fundraiser; and December 1990, a ballet concerto in which full proceeds will go to Genesis. May they have continued success in their projects.

THE CRISIS IN TRINIDAD AND TOBAGO

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DYMALLY. Mr. Speaker, as of today all hostages taken in an attempt to overthrow the Government of Trinidad and Tobago have been released, and those holding them have been taken into military custody. There is no longer an imminent threat to loss of life; all the wounded are receiving medical attention in hospitals; life is slowly returning to normal. However, the situation remains quite worrisome and unstable, and the crisis is far from over.

Grave social and economic injustices lie at the heart of the current crisis, and deserve our attention as well. The past decade has been one in which Trinidad and Tobago, once the richest nation in the Caribbean, because of its oil and natural gas resources, has virtually collapsed due to the plunge in its crude oil price from $35 per barrel in 1975 to $9 in the late 1980's. The economy moved almost overnight from one with a surplus of $4 billion in 1980 to a deficit of $2.5 billion in 1989—a loss of $6.5 billion in revenues/assets. IMF policies force the Government to go even further in cutbacks and removal of subsidies.

The middle class fled to the United States and Canada and continues to do so today. Those who remained behind have been visited with a dramatically reduced standard of living. The poor suffer greatly from IMF austerity measures with budget cuts in health, housing, education, transportation. One event is instructive: as part of austerity, the Government eliminated the cost-of-living allowance, [COLA] for Government workers. This led to over 90 percent of Government workers going on strike and the Government was forced to reinstitute the COLA. Strikes, protests and many protestations to the Government paved the way to the attempted overthrow of the Government.

Blacks make up 40 percent of the population. Forty percent are East Indians including the Muslim population, 16 percent are Creoles, and 4 percent other. In the main, the East Indian and Chinese community control commerce, while the Creole class governs. The poor are made up of sugar and oil-field workers—both black and Indian—and, more and more, the urban working poor.

As of today, following the disarming of the insurgents, the current situation includes the following:

Food and medicines are in very short supply. Through its Embassy, the Government of Trinidad and Tobago has released a list of emergency requests.

There is no clear chain of command as far as the public sees it. This is because Prime Minister A.N.R. Robinson has not resigned but is hospitalized and generally out of circulation; the police and the military have indicated that they will not shy away from taking the law in their own hands at least in being violent with looters.

An 18-hour shoot on sight/shoot to kill curfew remains in effect. This contributes to the number of dead during the 5-day seize situation.

Many Trinidadians remain fearful that some kind of military intervention will yet come either from neighbors or from the United States, as in Grenada in 1983. Jamaica has already sent troops to Barbados and they remain there as of today.

Many Trinidadians are fearful that the 140 members of Jamaat Muslimeen taken into custody and, in particular, the leader Hasin Abu Bakr, will be killed.

Many Caribbean governments have condemned the action of July 27. In a statement of Caribbean Community, Caricom, they stress the importance of the constitutionality of the National Alliance of Reconstruction Government, the duly elected government.

We are all very committed to our full agenda of activities. But you can, as a Member of Congress, do something to assist in the restoration of normalcy in Trinidad and putting that nation on the path to a just democratic development for its people.

Here is some of what you can do:

Assure the Government authorities of Trinidad and Tobago of the continued support of the Members of Congress. Indicate our willingness to participate as a mediator in conjunction with the Caricom, the United Nations or others.

Appeal immediately to the authorities of Trinidad and Tobago not to carelessly or otherwise extend the bloodshed to people in the streets or to the Muslim rebels being held. Offer its good offices to mediate or otherwise play a conciliator role.

Send letters to the White House and the Department of State urging a policy of no military intervention to resolve what is essentially a situation of social and economic neglect and exclusion of the Trinidadian people.

Urge the governments in the Caribbean not to send troops to Trinidad but to use peaceful means for resolution of the crisis.

I thank you for your attention.

AMERICA'S HIDDEN HEALTH CARE PROVIDERS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ANDERSON. Mr. Speaker, I would like to call to the attention of my colleagues the lack of adequate care for disabled elderly Americans. Today, more than 6 million elderly Americans need 24-hour care. Most are cared for not by trained medical specialists, but by family members, particularly women.

According to a 1988 congressional study, the average American woman will spend 17 years rearing children and 18 years caring for elderly parents. Now however, women have become an integral part of the work force and are forced to shoulder both responsibilities. More than half the women who care for elderly relatives work outside the home and nearly 40 percent are still raising children of their own.

Today, only about 5 percent of U.S. companies have policies that assist employees caring for the elderly. Many caregivers are forced to take part-time jobs to care for their relatives because they cannot afford nursing homes. Medicaid does not cover many of these costs, forcing elderly people to deplete their lifesavings on care as well as laying a financial burden on their families.

By the early 21st century, the percentage of Americans who are elderly will double, while the percentage of young people to care for them will sharply decline. The Federal Government must do more to help the elderly and to help those who care for them. We in Congress have a responsibility to assist those who care for their dependent relatives in remaining productive in the workplace. I would argue that the cost to the American taxpayer in lost wages would far exceed the cost of assisting with dependent care. Clearly, we have a decision to make: We can pay less now, or we can pay more later. I would choose the former.

UNLV, NCAA SANCTIONS GO TOO FAR

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. TOWNS. Mr. Speaker, I rise today to alert my fellow colleagues to the plight of some young men who play basketball at the University of Las Vegas, Nevada, the 1989–90 NCAA basketball champions. The university has been sanctioned due to the alleged recruiting violations committed 13 years ago by head coach Jerry Tarkanian.

Coach Tarkanian fought a long court battle to dismiss the charges brought forth by the NCAA. The court and the NCAA determined that all actions taken were warranted and he was fined, and subsequent to his team winning the national championship, they were put on probation, effectively limiting some of these young men from defending their title.

My problem with the action taken by the NCAA is that it appears that the current team members are unfairly punished for an act performed by their coach 13 years ago. For many of the these young men, an opportunity to play in the NBA was put off a year in order to pursue a second title.

Without question, I believe that the NCAA, as a governing body, should enforce its policies and procedures. However, this should be done in a manner which reflects a sense of fairness. In this care, I believe a tremendous disservice is being done to the young men at this university.

As a former athlete, I can appreciate the dreams and ambitions of these young men who attained the pinnacle of their basketball careers in college. It seems to me that future dreams are now derailed due to the ill-advised application of rules applied to athletes who were in elementary school at the time of these violations.

Mr. Speaker, I ask you to take note of this injustice, and to serve notice to the NCAA that applying the letter of the law has to be done with reason and not in a fashion which punishes innocent parties.

TRIBUTE TO BISHOP WALTER McCOLLOUGH FOR PROVIDING 30 YEARS OF LEADERSHIP FOR THE UNITED HOUSE OF PRAYER FOR ALL PEOPLE

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DELLUMS. Mr. Speaker, I rise today on behalf of the Congressional Black Caucus to honor a true leader the Right Reverend Bishop Walter McCollough. This year, the United House of Prayer For All People will celebrate his 30th anniversary as leader and 50th anniversary as minister.

Bishop Walter McCollough has, with singular focus, rebuilt poverty-stricken, riot devastated communities across America. From 1960 to the present, he has built and dedicated nearly 1,000 units of low cost housing without Federal or local government funds. These low-income, multifamily dwellings are located in New Haven, CT; Norfolk, VA; Charlotte, NC; Los Angeles, CA; and the District of Columbia. Other properties have been purchased, renovated, and made available to low-income families in cities across the Nation.

Bishop Walter McCollough has been an inspiration to thousands of young people as well as the elderly. He has provided educational opportunities for young men and women by establishing college scholarship funds and special continuing education programs. He has renovated existing church property to accommodate senior citizens in the District of Columbia, and plans are currently underway to construct other senior citizen facilities throughout the South.

Bishop Walter McCollough is a beacon of light for a multitude of Americans. He presides over 130 congregations located in 14 States and 126 cities throughout America. He travels at least 10 months a year preaching a gospel of hope to the hopeless, comfort to the comfortless, revitalizing and giving new meaning to those who believed that life is not worth living.

It is my pleasure to stand before the U.S. Congress to pay tribute to this great leader as he marks his 30th year of service at the helm of the United House of Prayer For All People.

INTRODUCTION OF THE FEDERAL MANAGEMENT REFORM ACT OF 1990

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HORTON. Mr. Speaker, we hear more and more these days about scandals and other embarrassing episodes of waste, fraud, and abuse in our Government. Today I am introducing a bill, the Federal Management Reform Act of 1990, that seeks to radically reform the financial management processes of all levels of the Federal Government. This leg-

islation would attack head on the problems of Government mismanagement that we read about in the headlines every day.

This bill would create a chief financial officer [CFO] at executive pay level II in the Office of Management and Budget [OMB] with both financial management and general management functions; an office of Federal financial management in OMB with a level III administrator at its head, reporting to the Governmentwide CFO; chief financial officers in the departments and major agencies; and the requirement that each department and major agency produce annual, audited financial statements.

This is the most comprehensive legislative plan yet offered to get our Government's management house in order. The bill's regimen of centralization and standardization, when put into action by financial management personnel who possess both institutional clout and individual competence, will help prevent phenomena like the HUD scandal and the savings and loan crisis from occurring in the first place. The structure and processes which my bill would create, especially the requirement of audited financial statements, will shine light into the dark recesses of our agencies to help find waste, fraud, and abuse before it gets out of control.

In other words, my bill erects a system for front-end management. The chief financial officer, whether in OMB or at a department or agency, will have the power to guide the financial management of the agency from the making of policy to the making of individual decisions. The CFO will be able to move things positively in the direction of efficiency.

Mr. Speaker, I have served in Congress for almost 28 years, and for all of that time I have served on the Government Operations Committee. For the last 17 years I have been privileged to serve as its ranking minority member. In that time, I assure you, I have heard many sad stories of waste, fraud, and abuse in Federal agencies and programs. The HUD scandal, which my committee investigated, was not the first instance of poor management in Government, and it will not be the last. One thing is especially clear to me, though, after 28 years: We need to fundamentally reform our financial management structure. We need to weave discipline, coordination, and accountability into the threadbare fabric of Government management. And we must do it very soon.

I am pleased to be joined on this bill by a bipartisan group of distinguished Members—Mrs. SCHROEDER, Mr. BARNARD, Mr. SHAYS, Mr. BUSTAMANTE, Mr. SMITH of Vermont, and Mr. KYL. I urge all Members of the House to join me in sponsoring the Federal Management Reform Act of 1990 and supporting the cause of good Government.

TRIBUTE TO SGT. JAMES G. MARSHALL

HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HOCHBRUECKNER. Mr. Speaker, I rise today to pay tribute to the memory of an outstanding individual, Sgt. James G. Marshall, U.S. Army.

On the night of August 4, 1986, Sergeant Marshall lost his life during a river crossing training exercise at the Hantan River, Republic of Korea. An eyewitness stated that Sergeant Marshall, without hesitation or thought for his own personal safety, swam to assist his section chief, who was being dragged underwater by the current. As a result of this attempted rescue, Sergeant Marshall lost his life. His courage and selflessness were in keeping with the noblest of U.S. Army tradition.

James was well respected and admired by his fellow soldiers. He was an excellent soldier who performed all tasks assigned to him in a professional manner. James was always eager to do his best in the service of our country.

After Sergeant Marshall achieved the title of Eagle Scout he entered the U.S. Army through the Delayed Entry Program and achieved the highest grade on the entrance exam of anyone on Long Island. He served with the Army for 3 years and his accomplishments were many. Among them, he received a certificate of achievement for exceptionally commendable service from February 24, 1984, to May 4, 1984, while serving as a rifleman; two Army achievement medals for exceptionally meritorious service; and the Army Commendation Medal for exceptionally meritorious service while serving consecutively as rifleman, as an opposing forces instructor, assistant chief of staff, G–2, 2d Infantry Division from May 24, 1985, to August 4, 1986. He also served on 47 patrols of the DMZ in Korea.

Sergeant Marshall's total dedication to the readiness mission of the 2d Infantry Division and training of fellow soliders on North Korean tactics and weapons, as well as on U.S. Army tactics, reflects his professionalism as a soldier.

James is survived by his wife Hui Cha Marshall and his parents, Thomas and Elizabeth Marshall.

James will be missed by all those whose lives he touched and will be remembered affectionately by his family and friends.

TRIBUTE TO ANNE HUNTLEY

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PENNY. Mr. Speaker, I rise today to pay tribute to another Penny staff member who is soon to leave my Washington office in pursuit of graduate education. For the past 2½ years I, and the constituents of the First District of Minnesota, have been well served by a young woman from Florida, Anne Huntley. Anne has handled such complex issues as campaign finance reform and improvements in the Head Start and handicapped education programs. She has also been personally responsible for managing a quick and accurate turnaround on constituent correspondence, and all congressional offices know what a siginficant accomplishment that is.

Anne intends to use the experience she has gained on Capitol Hill as she pursues a graduate degree in management. Even though I am sorry to lose such a capable and loyal staff member, I wish her the best for a bright and successful future. Thanks, Anne.

NATIONAL HISPANIC HERITAGE MONTH

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. VISCLOSKY. Mr. Speaker, I wish to take this opportunity to remind my colleagues in the House of Representatives that "National Hispanic Heritage Month" will be celebrated September 15 through October 15.

According to the 1980 census, over half of the total Hispanic population in the State of Indiana resides in my congressional district. Hispanic Americans in my district are not only represented in numbers but by their many contributions to northwest Indiana, the State, and the Nation.

In the First Congressional District of Indiana, you will find a vibrant, active, and proud Hispanic community. Thriving organizations such as the League of United Latin American Citizens, Union Benefica Mexicana, Puerto Rican Parade Committee, Sociedad Mutualista Mexico, Raza de Bronze, Hispanic Coordinating Council, ALSE/Roberto Clemente Center, Latino Historical Society, and the Hispanic Catholic Center, to name a few, provide an effective avenue for promoting Hispanic interests and their shared cultural heritage.

Active in every aspect of community life from labor organizer, police chief, clergy, State representative, members of the city council, high school principal, Federal district court judge, to Congressional Medal of Honor winner, the citizens of northwest Indiana have a multitude of Hispanic role models to emulate.

Hispanics share in the mutual aspiration to earn and enjoy the promise and benefits that America, at its best, extends to all. I am proud to serve as the Representative in Congress for northwest Indiana, with its diverse multicultural heritage and I encourage my colleagues, and all citizens, to participate and experience in events commemorating "National Hispanic Heritage Month."

LAUDS PUEBLO NUEVO HOUSING AND DEVELOPMENT ASSOCIATION FOR PROJECT

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GREEN of New York. Mr. Speaker, I rise today to recognize the Pueblo Nuevo Housing and Development Association for implementing a commercial revitalization project on Clinton Street in New York City.

Since 1982, the Pueblo Nuevo H.D.A., Inc. has worked with the New York City Office of Business Development to provide grants to commercial tenants for capital and physical improvements. In addition, Pueblo Nuevo uses promotional opportunities as a prime component of its revitalization project. In conjunction with the Clinton Street Merchants Association, it has published a "Consumer's Guide to the Lower East Side," produced a sixth annual Clinton Street Immigrants' Fair, and published three annual Clinton Street Merchants Association calendars.

In many areas of my district, and in fact within New York City as well, nonprofit organizations are responsible for a rebirth of communities. By involving citizens in projects within their own neighborhoods, these organizations have rekindled a pride within some of the city's more distressed neighborhoods. Pueblo Nuevo is an excellent example of such an organization, and it is a vital part of our city.

At this time, I should like to join my colleagues in thanking the Pueblo Nuevo Housing and Development Association, Inc. for its efforts to revitalize a key section of New York City. Its revitalization program provides an excellent role model for similar projects across the Nation.

ADDRESS BY MR. KOSTMAYER TO THE GOVERNING COUNCIL OF THE UNITED NATIONS POPULATION FUND

HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ATKINS. Mr. Speaker, our distinguished colleague from Pennsylvania, PETER KOSTMAYER, recently addressed delegates from 48 countries attending the 37th meeting of the governing council of the United Nations Population Fund [UNFPA] in Geneva. His was a very thoughtful and wise speech and I recommend the text to my colleagues.

Congressman KOSTMAYER's remarks follow:

STATEMENT DELIVERED BY HON. PETER KOSTMAYER

Mr. President, Dr. Sadik, distinguished delegates, my countrymen and women in the American delegation, I speak to you this morning not as a member of the U.S. delegation, or as a representative of my government, but as an observer with the delegation of the population institute, an accredited ECOSOC/NGO. I serve on the board of directors of the population institute and am designated by the board to represent it.

From the United States I bring you good wishes, but no money.

Next year we hope to bring both.

There are some who say I should not be making these remarks today. Not here. Not now. But I cannot sit idly by while a rather large American delegation involves itself in the day to day deliberations in shaping the future and yet has not contributed one cent for the last 5 years to this powerful, humanitarian U.N. effort. I'm sure many of you have heard the phrase, "If you don't play the game, you don't make the rules." In yesterday's official U.S. intervention, we all waited for some financial commitment to UNFPA. None was forthcoming and, indeed, a stranger to these proceedings would have assumed that the U.S. was a total partner in the UNFPA effort if they listened to the U.S. speech.

We all need to be clear on the facts: Last year, the Congress voted to fund UNFPA, but President Bush regretfully vetoed the foreign aid bill containing those funds and while voluntary family planning enjoys the support of a majority of the House of Representatives and a majority of the U.S. Senate, we have failed to work out a compromise to allow us to support this crucial international effort.

There is strong support for voluntary family planning throughout the United States and in the Congress, even among many of those who for reasons of conscience, oppose abortion. They support voluntary family planning. They recognize the difference.

Ostensibly, because of the controversial nature of the Chinese program, this administration, like the Reagan administration before it, continues to oppose the funding for UNFPA.

Even when U.S. dollars are held in a segregated UNFPA account with none of the U.S. dollars going to UNFPA programs in the People's Republic in China or anywhere else in the world, the administration still denies United States assistance to the largest multi-lateral provider of voluntary family planning funds in the world.

The American administration trembles at the anti-choice forces in the United States, even as they grow weaker and suffer more defeats at the ballot box each day.

As we meet, the U.S. Congress is contemplating legislation I have introduced, sponsored by over 130 Members of Congress from both parties, to double U.S. population assistance to 500 million dollars for voluntary family planning assistance next year. Sixty million of this amount shall be solely for the use of the United Nations population fund. I believe the Congress will pass this legislation.

The importance of the work discussed here has been articultated this morning and yesterday by nations from around the world.

The report of Dr. Sadik yesterday provided ample evidence of the international dilemma.

Populations relationship to every issue facing humankind—from the environment, resources, nutrition, housing, education, employment, health, and peace itself, is obvious.

I commend Dr. Sadik for her indisputable conclusion laid out in her 1990 State of the World Population Report. I also commend her staff for the outstanding work done on the preparation of the documentation for the 37th Meeting of the Governing Council.

In the last year, the world has watched while the face of this continent changed. And, while a large part of the world's people remain oppressed and even brutalized, other governments have begun to relax their grips.

In both the Soviet Union and the United States, private and public citizens alike call for reduced spending on the international arms race.

Sentiment in the Congress from every region of the United States is the same. The world is changing before our eyes. Mr. President, let us refocus our energy, let us turn and face the problems we have ignored for so long. For we know that the problems bearing down so cruelly on the Third World must, before long, bear down on us unless we provide help for those who suffer in the world's poorest lands.

And so it is with some embarrassment that I speak to you this morning, embarrassed frankly by the unwillingness of the American administration to contribute to such a worthwhile venture.

Those of us in the non-governmental organizations community, and in the Congress, and in every part of America, who share your dream of a stable and just world, will continue to fight for UNFPA funding because we know America's proper place is in a partnership position of international leadership in helping to solve one of the great international problems.

And while our absence is shameful, it is only temporary.

We will be back, with more than just good wishes. In the meantime continue this struggle, for without your efforts, your generosity, and your commitment, the level of human suffering and misery would be so much greater than it is today.

Thank you, Mr. President.

THE RESCUE EFFORTS OF THE NEW CANAAN FIRE CO.

HON. CHRISTOPHER SHAYS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. Shays. Mr. Speaker, it is my privilege to recognize the valiant efforts of five members of the New Canaan, CT, Fire Co.

On May 21, 1990, Fireman Engineer John DiPanni suffered a massive heart attack while behind the wheel of a New Canaan fire engine responding to a local alarm. Reacting instinctively, coworker Mike Tiani steered the vehicle away from danger and applied the emergency break, brining it to a safe halt.

Assisting Fireman Tiani in pulling Fireman DiPanni from the cabin was volunteer fireman and New Canaan Police Officer Fred Pickering. Officer Pickering promptly engaged DiPanni in cardiopulmonary resuscitation, while awaiting the arrival of Assistant Fire Chief Jack Deusen and volunteer firemen Joseph Coviello, Paul Karl, Jr., and Ron D'Amario.

Asisstant Fire Chief Van Duesen coordinated the CPR efforts until the arrival of the New Canaan Emergency Medical Technicians.

Fireman DiPanni suffered two more heart attacks while en route to the hospital and was revived both times. John DiPanni was released from the hospital shortly afterward and is close to full recovery.

In recognition of the prompt reactions and professional qualities displayed in the face of

crisis and the potential loss of a close friend and coworker it is my pleasure to bring to my colleagues attention firemen Joseph Coviello, Ron D'Amario, Jack Van Deusen, Paul Karl, Jr., and Fred Pickering. Five true and dedicated heroes.

INTRODUCTION OF THE SMALL BUSINESS TAX INCENTIVE ACT OF 1990

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, today I am introducing the Small Business Tax Incentive Act of 1990.

This bill contains several tax incentives for small businesses, as well as provisions to make the Internal Revenue Service more responsive to small business concerns in its promulgation of tax regulations. This bill is intended to address legitimate needs of small businesses, but within the confines of current budgetary constraints. I would like to commend our colleague, the Honorable NORM SISISKY, who, as always has been instrumental in advancing the interests of small businesses.

The bill which I am introducing today incorporates a proposal similar to one originally sponsored by the Honorable FRED UPTON and the Honorable KWEISI MFUME in H.R. 3500 to provide a new tax credit of up to $5,000 for expenditures incurred by small businesses for public accommodations access. I want to commend both of my colleagues for their bipartisan cooperation across the aisle to get this done. This provision is intended to provide relief for small businesses that will be faced with new obligations to make such expenditures under the recently enacted Americans With Disabilities Act. To offset revenue losses from this provision, the existing cap on deductions for removing architectural and transportation barriers would be reduced from $35,000 to $15,000.

The bill would also extend permanently the 25-percent deduction for health insurance costs of self-employed individuals. The current provision is scheduled to expire after September 30, 1990.

In addition, the bill would require the Small Business Administration to comment to the IRS on the impact of proposed regulations on small businesses, and the IRS would be required to consider these comments and discuss them when it publishes its final regulations.

Finally, the bill contains a provision intended to be of benefit to all taxpayers and to make the Federal Government more accountable by requiring income tax instruction booklets to contain displays showing the sources and disposition of Federal revenues. This proposal was originally put forward by our colleague, the Honorable HOWARD WOLPE, in H.R. 4555, and I commend him for this useful contribution.

While my purpose in introducing this bill is to provide relief for small businesses, I am also committed that all legislative initiatives must be revenue neutral in this time of severe budgetary constraints. Mr. Speaker, in keeping with my strongly held view on fiscal responsibility, it is my intention that if this small business bill moves forward in the legislative process, it would be fully financed in the course of the normal budget reconciliation process.

Mr. Speaker, an explanation of the bill accompanies this statement.

EXPLANATION OF THE SMALL BUSINESS TAX INCENTIVE ACT OF 1990 (H.R. 5455)

1. Treatment of certain expenditures incurred to make public accommodations accessible to disabled individuals (secs. 201 and 202 of the bill and sec. 190 and new sec. 43 of the Code).

PRESENT LAW

Under present law, a taxpayer may elect to deduct certain architectural and transportation barrier removal expenses for the taxable year in which paid or incurred rather than capitalizing such expenses. Architectural and transportation barrier removal expenses are defined for this purpose as expenditures that are paid or incurred by a taxpayer in order to make facilities or public transportation vehicles owned or leased in connection with the taxpayer's business more accessible to handicapped and elderly individuals. In order for such expenditures to be deductible under this provision, the taxpayer must establish to the satisfaction of the Treasury Secretary that the facility or public transportation vehicle to which the expenditures relate conforms to standards promulgated by the Treasury Secretary with the concurrence of the Architectural and Transportation Barriers Compliance Board. The amount of the deduction allowed under this provision for any taxable year is limited to $35,000.

EXPLANATION OF PROVISION

Public accommodations access credit

In general

Under the bill, an eligible small business is allowed an income tax credit of up to $5,000 for the amount of eligible public accommodations access expenditures paid or incurred during a taxable year. The credit is a general business credit and, consequently, the credit is subject to the rules of present law that limit the amount of the general business credit that may be used for any taxable year.

Definition of eligible small business

An eligible small business is defined for any taxable year as any person that is engaged in the trade or business of operating a public accommodation and that is required by Federal law to make such accommodation accessible to, or usable by, individuals with a disability if (1) the gross receipts[1] of the person for the preceding taxable year did not exceed $1 million, (2) the person had fewer than 15 full-time employees[2] during the preceding taxable year, and (3) the person elects the application of the provision by claiming the credit for the taxable year.

Definition of eligible public accommodations access expenditures

Eligible public accommodations access expenditures are defined as amounts paid or incurred by a taxpayer either (1) for the purpose of removing architectural, communication, or transportation barriers which prevent a public accommodation operated by the taxpayer from being accessible to, or usable by, individuals with a disability, or (2) for providing auxiliary aids and services to individuals with a disability who are employees of, or using, a public accommodation operated by the taxpayer.

The amount of an expenditure is not to be considered an eligible public accommodations access expenditure unless the taxpayer establishes to the satisfaction of the Treasury Secretary that the removal of any barrier or the provision of any auxiliary aids and services to which the expenditure relates satisfies standards set forth in regulations promulgated by the Treasury Secretary with the concurrence of the Architectural and Transportation Barriers Compliance Board. In addition, amounts paid or incurred by a taxpayer for the purpose of removing architectural, communication, or transportation barriers do not qualify as eligible public accommodations access expenditures if the amounts are paid or incurred in connection with a facility that is first placed in service after December 31, 1990.

Other definitions and special rules

For purposes of the credit provision, the terms "public accommodation," "disability," and "auxiliary aids and services" are to have the respective meanings given such terms by the Americans With Disabilities Act of 1990, as in effect on the date of enactment of this provision.

For purposes of applying the $5,000 annual limitation on the amount of the credit and in determining whether the $1 million gross receipts limitation and the 15 full-time employee limitation are satisfied, all members of the same controlled group of corporations (as defined in section 52(a)) and all persons under common control (as defined in section 52(b)) are treated as one person. Thus, for example, two or more corporations that are members of the same controlled group of corporations would be allowed a credit that is not to exceed $5,000 if, treating all such corporations as a single person, the $1 million gross receipts limitation and the 15 full-time employee limitation are satisfied for the preceding year.

In the case of a partnership, the $5,000 annual limitation on the amount of the credit is to apply at both the partnership level and the partner level. Similarly, in the case of an S corporation, the $5,000 annual limitation on the amount of the credit is to apply at both the S corporation level and the shareholder level.

The bill also provides that to the extent that a credit is determined with respect to the amount of any expenditure, then no deduction or credit is to be allowed for such amount under any other provision of chapter 1 of the Internal Revenue Code and the adjusted basis of any property with respect to which the credit is determined is not to include such amount.

Finally, the bill requires the Treasury Secretary to prescribe such regulations as are necessary to carry out the purposes of the provision, including regulations that (1) adjust the $1 million gross receipts limitation and the 15 full-time employee limitation in the case of taxable years that are less than 12 months and (2) apportion the $5,000 annual limitation among two or more members of a controlled group of corporations that are treated as a single person

[1] The gross receipts of a person for any taxable year are to be determined after reduction for returns and allowances made during the taxable year.

[2] For this purpose, a full-time employee is defined as any employee of the taxpayer who is employed at least 30 hours per week for 20 or more calendar weeks during the taxable year.

under the related-person rules described above.

Reduction of amount deductible as architectural and transportation barrier removal expenses

The bill also reduces the amount of architectural and transportation barrier removal expenses that may be deducted for any taxable year to $15,000.

EFFECTIVE DATE

The provisions apply to taxable years beginning after December 31, 1990.

2. Deduction for health insurance costs of self-employed individuals (sec. 201 of the bill and sec. 162(1) of the Code).

PRESENT LAW

Under present law, an employer's contribution to a plan providing accident or health coverage is excludable from an employee's income (sec. 106). No equivalent exclusion is provided for self-employed individuals (i.e., sole proprietors or partners in a partnership).

However, present law provides a deduction for 25 percent of the amounts paid for health insurance for a taxable year on behalf of a self-employed individual and the individual's spouse and dependents. This deduction is allowable in calculating adjusted gross income. A self-employed individual is an individual who has earned income for the taxable year (sec. 401(c)(1)). No deduction is allowable to the extent the deduction exceeds the self-employed individual's earned income for the taxable year.

The 25-percent deduction is also available to a more than 2-percent shareholder of an S corporation. For purposes of the deduction, the shareholder's wages from the S corporation are treated as his or her earned income. In addition, the Secretary is authorized to prescribe necessary adjustments relating to the application of the deduction in the case of S corporation shareholders.

No deduction is allowable for any taxable year in which the self-employed individual or eligible S corporation shareholder is eligible to participate (on a subsidized basis) in a health plan of an employer of the self-employed individual (or of such individual's spouse).

The amount deductible under this provision is not taken into account in computing net earnings from self-employment (sec. 1402(a)). Therefore, the amounts deductible under this provision do not reduce the income base for the self-employed individual's social security tax.

The 25-percent deduction expires for taxable years beginning after September 30, 1990. For taxable years beginning in 1990, the deduction is allowed only for premiums paid for coverage before October 1, 1990. In addition, an individual's earned income for the taxable year beginning in 1990 is prorated in determining the applicable deduction for such year.

EXPLANATION OF PROVISION

The bill permanently extends the 25-percent deduction for health insurance costs of self-employed individuals.

3. Review of impact of IRS regulations on small business (sec. 202 of the bill and sec. 7805(f) of the Code).

PRESENT LAW

The Internal Revenue Service (IRS) must submit proposed regulations (after they are published) to the Small Business Administration (SBA) for comment on the impact of those regulations on small business. If the SBA chooses to respond, it must do so within four weeks. Similar rules apply to final regulations that do not supersede proposed regulations.

EXPLANATION OF PROVISION

IRS must continue to submit proposed regulations (after they are published) to the Small Business Administration (SBA) for comment on the impact of those regulations on small business. The SBA must respond within 4 weeks. The IRS must consider the SBA comments and discuss them in the preamble of the final regulations. Similar rules apply to final regulations that do not supersede proposed regulations.

EFFECTIVE DATE

The provision applies to regulations issued after the date 10 days after the date of enactment.

4. Require pie charts in IRS tax form instruction booklets (sec. 203 of the bill and new sec. 7523 of the Code).

PRESENT LAW

There is no requirement for the Internal Revenue Service (IRS) to publish pie charts. Pie charts illustrating where the Government dollar comes from and where it goes have, however, been published by the IRS in Publication 17, Your Federal Income Tax.

EXPLANATION OF PROVISION

The bill requires the IRS to include two pie charts in individual income tax form instruction booklets: one depicting sources of Government revenue and the other showing how that revenue is spent.

EFFECTIVE DATE

This provision applies to instructions prepared for taxable years beginning after 1989.

A TRIBUTE TO THE FRIEND TO FRIEND PROGRAM

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I am proud to recognize the Friend to Friend project of the Greater Miami Service Credit Volunteer Consortium which is a project with a force of over 800 volunteers who have been dedicated to helping the frail, the needy, the elderly, and the handicapped of Dade County for 3 years.

Friend to Friend is a program in which volunteers of all ages help older or disabled people. Its purpose is to help others to maintain their independence and dignity to the highest degree possible while aiding them with the things that no longer come easily. This can be done through personal services, household services, outside services, or companionship.

Volunteers for the program earn one credit for each hour of service they give. These service credits can be exchanged for a service needed or can be donated to someone in need or to a sponsoring agency. Service credit offers incentive for many to donate their time while still offering a solution to those in need. In order to qualify to volunteer for the Friend to Friend Program, one needs only to be able to perform the tasks needed, regardless of age.

On August 11, 1990 the International Bank of Miami will sponsor a fundraising fishing tournament to benefit the Service Credit Volunteer Consortium of Dade County Friend to Friend Program. It will be held at the International Yacht Harbor in Miami Beach, FL. The project will be sponsored by the Little Havana Activity and Nutrition Centers of Dade County in conjunction with the South Shore Hospital Community Health Service Department. Cosponsors will be Phoenis Marine Enterprises, Bacardi Imports, Gallart Industrial Components, Xeldom, Inc., Standard Motor Products, Tropical International Corp., Brami Corp., and others.

I wish the Friend to Friend Program and its directors much success in their scheduled events and future plans for the program.

TRINIDAD AND TOBAGO: FUNDAMENTAL PROBLEMS REMAIN

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DELLUMS. Mr. Speaker, fortunately, all hostages taken in the attempt to overthrow the Government of Trinidad and Tobago have been released. Those holding them have been taken into military custody. There is no longer an imminent threat of loss of life. Activities are slowly returning to normal. But, the situation there remains quite worrisome and many serious problems remain.

Grave social and economic injustices lie at the heart of the current crisis and deserve our attention. This is particularly so, because the same situation occurs across the Caribbean. Worsening trade, debt, and balance of payment deficits have plunged the area into a serious economic crisis which has painfully manifested itself in the collapse of essential public services.

The consequences of the downslide of the economy has been exacerbated by the International Monetary Fund [IMF] introduction of austerity measures designed to stabilize the economy. These measures have been particularly hard on the poor and on the working class.

The past decade has been one in which Trinidad and Tobago, once the richest nation in the Caribbean because of its oil and natural gas reserves, has plunged into economic crisis. This crisis is due in great part to the collapse of crude oil prices. IMF policies have forced the Government into even deeper cutbacks and removal of social subsidies.

The middle class is leaving for the United States and Canada. Those that remain are suffering a dramatically reduced standard of living. The poor suffer particularly from IMF austerity measures which have forced cuts in health, housing, education, and transportation.

The Government was forced to eliminate cost-of-living increases for Government workers. This led to a strike and forced the Government to reinstate the cost-of-living increase. Strikes and protests have paved the way for this attempt to overthrow the Government.

A healing process needs to begin in Trinidad and Tobago. Food and medicines are in very short supply. We must be prepared to

help. It is imperative that the Government of Trinidad and Tobago seek reconciliation with all institutions and sectors of its society.

I am very relieved that the United States has followed a policy of nonmilitary intervention. The problems are social, economic, and political, and need social, economic, and political answers. We must maintain a policy of nonmilitary intervention in Trinidad and Tobago and the Caribbean and seek peaceful means of resolution to the crises. It is imperative that we enhance our foreign aid assistance to the Caribbean nations to deal with the underlying factors that contribute to instability.

THANKS TO MICHAEL J. CRONIN

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PENNY. Mr. Speaker, with a combination of great sadness on his leaving and hope for his future, I rise to thank Michael Cronin for 2½ years of dedicated service to the people of the First District of Minnesota, During this time, Mike served first as my staff assistant and later as my assistant office manager and computer systems manager. In these capacities and in every other obligation, Mike served with diligence and good humor. Today is Mike's last day of service in my Washington office. He will soon return to Minnesota and begin studies at St. Mary's College in Winona, MI. Mike will eventually matriculate in the Roman Catholic Seminary.

Mr. Speaker, we, as Members, are indeed fortunate to have the services of talented men and women like Mike Cronin. As Mike departs for the challenges that will confront him, I wish him my very best. Thanks, Mike.

YOUTH SERVICE IS NEW ROUTE TO DIPLOMAS AND JOBS

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. TOWNS. Mr. Speaker, in a New York Times article I came across a New York City program that instills in young people a sense of work ethic and values while providing educational opportunities.

I recommend this article to the attention of my colleagues.

[From the New York Times, July 18, 1990]

YOUTH SERVICE IS NEW ROUTE TO DIPLOMAS AND JOBS

(By Michel Marriott)

Rubber soles padded soundlessly along a hallway of Coler Memorial Hospital recently as Yaninth Maldonado guided an elderly man in a wheelchair to a nearby day room. With each step, Ms. Maldonado, a teen-age mother with an eighth-grade education, moved closer to her own goal: attaining a college diploma.

Ms. Maldonado, a soft-spoken 18-year-old, joined the City Volunteer Corps of New York shortly before Christmas last year. She turned to the group, the largest urban full-time youth service organization in the United States, hoping that its offerings of public service projects, classroom work and college assistance programs would speed her on her chosen way.

"I just always wanted to be a secretary," said Ms. Maldonado, who lives in the Bronx with her 3-year-old son, Angel. "I'm taking my time, but I'm getting there, now."

In exchange for her work in the service corps, Ms. Maldonado receives not wages but a modest stipend and the option to take a cash bonus or a $5,000 college scholarship at the end of one year of service. Along the way, she is required to complete work for a high school equivalency diploma, while she learns through labor the virtue of helping others.

IDEA IS GAINING SUPPORT

After more than two decades of debate, broad support for groups like New York's City Volunteer Corps and for the students they serve is gaining momentum. And with legislation pending in Congress, Federal financing may also be on the way.

In cities and towns from Boston to Los Angeles, more than 60 such organizations, with little or no Federal assistance, are recruiting, training and using increasing numbers of young volunteers, say officials at the National Association of Service and Conservation Corps, an umbrella organization based in Washington. These volunteers work caring for the handicapped, tutoring children, tending parks and in dozens of other projects. This summer, more than 100,000 young people are involved in service corps, said Roger Landrum, executive director of Youth Service America, a Washington-based group that advises service corps.

This year, the W.K. Kellogg Foundation gave Youth Service America a $1 million grant to duplicate low-cost service corps programs in 40 cities over the next four years.

Dr. Landrum said the cost of his group's service programs was about $60,000 a year. Other programs cost up to $1 million a year, depending on how many salaried staff members they have, how much they pay participants and whether they are full-time or part-time programs.

More money may soon be available. In March, the Senate overwhelmingly approved a bill that would provide at least $100 million to create and finance service corps in different states. This one did not link service with college financial aid, a provision that had doomed previous measures. A similar House bill allocating $183 million a year is expected to go to a vote before the August recess, Congressional aides said.

This surge of interest in youth service results in part from the realization among educators and corporate and civic leaders that there is a shrinking pool of adequately trained Americans to fill available jobs. Such service, its supporters say, can encourage young people who are disenchanted with school to continue their education, while inspiring a work ethic that ties community work to personal success.

"What is being realized is that these experiences help young people make the transition from school to work," said Margaret Rosenberry, executive director of the National Association of Service and Conservation Corps. "And while young people are being seen as resources for communities, they are developing self-esteem and self-confidence and are really taking advantage of education opportunities."

Based largely on the old Civilian Conservation Corps of the early 1930's which eventually employed 2.5 million young men, the new youth service programs stress learning and labor, said Robert Burkhardt Jr., the executive director of the San Francisco Conservation Corps.

Few programs pay more than the minimum wage of $3.80 an hour. Some are part time and based in schools, operating mostly during school hours and sometimes on weekends. These programs attract a broad range of students. Other programs operate full time and year-round from their own headquarters, mainly attracting young people who have dropped out of school or are taking a break between high school and college, corps spokesmen say.

SUCCESS IN DIPLOMA TEST

In New York, 80 percent of City Volunteer Corps members are high school dropouts, said Toni Schmiegelow, the group's chief of recruiting. She also said, with unmistakable pride, that corp members' rate of passing the high school equivalency diploma test, the General Equivalency Diploma examination, is 11 points higher than the statewide rate of 50 percent.

Since the City Volunteer Corps was founded in 1984, its officials say, more than 5,000 men and women from 17 to 20 years old have worn its simple uniform: a red pinstriped shirt and gray work pants. Corps workers have contributed about 2.6 million hours helping the elderly, tutoring children, working in neighborhood gardens and performing other labor-intensive tasks for neighborhood groups and government agencies, said Gail Kong, director of the corps.

During their year of service, many corps members finish their high school educations while earning stipends of $97 a week enough to cover the cost of transportation, lunch and uniform maintenance. Ms. Maldonado, for example, is doing so while working at the hospital on Roosevelt Island. At the end of their service, they may receive either a lump sum "bonus" of $2,500 or a $5,000 scholarship that they can use to pay for a college education. One scholarship recipient. Cara Gaven, 19, went on to study conservation and sociolinguistics in Kenya.

A COMMITMENT TO STUDY

"They all come with a commitment to finish their education," Ms. Kong said. "They want to make it."

The New York program is one of several variations on the service corps theme. In Pittsburgh, the School Superintendent, Richard S. Wallace, and his staff founded Project Oasis, a school-based service corps, in 1982. That same year, the program enrolled 75 of the most academically troubled middle school students. Within months, Ms. Rosenberry said, the "results were startling."

By the end of the year, none had dropped out of school," she reported. "Several went on the honor roll."

This year, the program is in each of the city's eight middle schools, involving 400 to 500 students, said Fred Monaco, director of careeer and vocational education for the schools.

Similar programs are now being developed by foundations, corporations or local governments.

Last summer, Ms. Rosenberry's group founded the Urban Corps Expansion Project in association with Public/Private Ventures, a youth study and advocacy group based in Philadelphia. The project selected 15 cities to receive $225,000 in planning and seed grants to start and study youth service corps. More than 50 cities applied, Ms. Rosenberry said.

Despite such successes, service corps have been criticized by some as lumbering bureaucracies that serve little purpose. Doug Bandow, a senior fellow with the Cato Institute, a public policy research organization based in Washington, argues that a huge service organization is unnecessary, and expensive, in a country in which 80 million Americans each volunteer several hours a week.

Mr. Bandow, who soundly criticized national service in a commentary published last month in the professional publication Education Week, also says some larger corps are more welfare programs than service programs.

Many groups based in urban centers acknowledge that they have been unable to draw a wide demographic mix of participants, said Charles Moskos, a sociology professor at Northwestern University whose notion that civic service builds character has powerfully influenced the debate in Congress over national service. "Fairly or unfairly, the programs get stigmatized, get labeled, as programs for dead-end youth," he said, adding that many corps had "veered" into groups consisting of minority members and the lesser-educated.

The boldest exception to this is Boston's City Year. Started less than two years ago, the program employs 50 people, aged 17 to 22, to help the city's poorest and least able. Like New York's corps, the group emphasizes education. Unlike New York's program, City Year's recruits have diverse backgrounds.

Twenty-one are white, 21 are black, 7 are Hispanic and one is an American Indian, said Lonnie Tanner, vice president of development. "They've come from 23 towns and cities in the Greater Boston area and beyond," she said. "We try to bring together as many people from as many walks of life as we can."

The reason, she said, is simple. "If you keep putting at-risk people with at-risk people, they may always think of themselves as being at risk." But in City Year, she said, "they all benefit from the experiences of each other."

A CONGRESSIONAL SALUTE TO GLENN D. HUTCHINSON IN HONOR OF HIS RETIREMENT

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute to an outstanding citizen and a person I hold in the highest regard, Glenn Hutchinson. His years of dedication and commitment to the betterment of his community have made him a giant among his peers. In honor of his retirement as a public safety officer for the city of Bellflower, I would like to tell you a little about him.

Glenn Hutchinson was born March 24, 1930, in Morgantown, WV. He graduated from North Union Township High School in Uniontown, PA. Shortly after graduation, he enlisted in the U.S. Navy where he served until 1962. He also attended West Virginia University and studied business administration. Later, he moved to California and completed the Los Angeles County Sheriff's Training Facility in East Los Angeles. He then worked as a custodial officer in the jail division before becoming a patrol officer. After a successful 2 years as a patrol officer, he became an investigator and undercover officer with the Narcotics Bureau. He excelled in assignments where he worked closely with State and Federal agencies to curb drug traffic in the area. Later, Glenn Hutchinson transferred to the Vice Bureau and investigated crimes such as pornography and bookmaking. He further performed all aspects of control from initial investigation, to search, to court appearances.

As evidence of his competency and leadership, he was promoted to station coordinator and civil defense coordinator. His duties included organizing activities related to reserve, posse, and explorer contingencies. He participated in public relations to familiarize the community with the reserve's role in the sheriff's department and to recruit volunteer officers. Mr. Hutchinson was also asked to conduct training programs and maintain precise records of personnel, training, and equipment and supplies distribution. As civil defense coordinator, Glenn Hutchinson attended class meetings regarding various aspects of civil defense. He was also responsible for making sure all equipment was operable and help put together civil defense plans.

For the past 5 years, however, Mr. Hutchinson has worked as the public safety supervisor for the city of Bellflower. In that capacity, he was responsible for the city's parking enforcement program, business license enforcement, city crossing guards, traffic violator school, and general code disaster preparedness. He also had to act as liaison with the Los Angeles County Sheriff's Department and perform administrative and staff work for the city administrator in relation to all city departments and agencies.

Mr. Speaker, Glenn Hutchinson is a person who has served the public faithfully and loyally. His record as a law enforcement officer is unblemished. I take great pride recognizing Mr. Hutchinson for all his public service. He has done a great deal to make living and working in southern California a little better. I salute Glenn Hutchinson, his wife Elida, and their children, Kim Michael, Kurt, and Kathleen, all the best for the future.

TRIBUTE TO SCHOLAR BANGS

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. TORRES. Mr. Speaker, It is my sad duty to announce the loss our country has recently experienced of a distinguished American. On July 21, 1990, Scholar Bangs, not only an internationally known newspaper and aviation journalist, but also husband and father, passed away in Covina, CA, after a lengthy illness. His accomplishments deserve our recognition.

Bangs commenced his journalistic career as a reporter for the Bakersfield Californian. Following this, he became the first public relations director for a U.S. interstate commercial airline in the Pacific Northwest in 1928. In the 1930's Bangs served as editor of Hearst Los Angeles Examiner's Science and Aviation.

While serving as the Examiner's Science and Aviation editor in the 1930's, his responsibilities included bringing to public attention the work of relatively unknown scientists. Also included were stories which highlighted achievements and experiments of well-known astronomers. As editor for Aviation News, Bangs was the only reporter to cover the Operation Crossroads A-bomb test from an aviation view.

During these years Bangs covered the rapid growth of the aviation industry in southern California and became close friends with widely known aviators. His exploits included taking part in the first mock air raid over the United States in a B-24 bomber flying over a blacked out Los Angeles in the early days of World War II.

While with the Examiner in 1940, Bangs developed sketches of a hydraulic airplane speed brake which is now standard on all military and commercial aircraft.

Bangs was the U.S. Executive editor for Interavia U.S., the international aviation magazine, and the first western editor of the U.S. aviation publication Aviation Week & Space Technology. In a July 1955 issue of Interavia U.S., Bangs forecast an article which was subsequently read into the CONGRESSIONAL RECORD.

Last, I would like to acknowledge Bangs for his credibility as a poet. In the early 1960's he joined several poetry groups and subsequently became president of the California, Federation of Chaparral Poets. He was widely published in California and at the Federation's annual meeting in 1989, he won "The Best of Best" poems.

In closing I would once again like to commend Scholar Bangs for his most successful accomplishments and contributions to our well-deserved country. He served as an inspiration for many and he makes one proud to be an American. Bangs is survived by his three sons, Allan, Daniel, and Donald, and two grandchildren.

THE SAVINGS AND LOAN CRISIS

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PARRIS. Mr. Speaker, thank you for allowing me to once again address the House regarding the savings and loan crisis.

My purpose in talking to the well of the House this evening is to continue the dialog I started with the American people almost 5 years ago relating to the situation with the savings and loan industry.

Recently I have focused on discussing the genesis of the savings and loan debacle, and the failure of this institution—the Democrat-controlled Congress—to address and resolve the most costly financial meltdown in the history of the World.

As you will recall, Mr. Speaker, on Tuesday, July 25, I presented a 1-hour special order on the floor of the House which outlined the beginnings of the savings and loan crisis in the Carter administration.

Interest rates of more than 20 percent, an economic recession, and the highest unemployment rate since the Great Depression created an economic and financial environment in which thrifts simply could not survive. By the end of the Carter administration—and its failed economic policies—the combined net worth of savings and loans had plummeted to a negative $17.5 billion, and 85 percent of thrifts were losing money at an increasingly fast pace.

The response of the Carter administration was to enact the first savings and loan deregulation bill. That bill was a watershed in the history of the savings and loan industry. Most notable among this legislation's provisions are those which raised Federal deposit insurance to $100,000 per account, and phased out interest rate ceilings on deposits placed in savings and loans. The result was brokered deposits or "hot money," the negative ramifications of which I discussed at great length in a 1-hour special order that I delivered on the floor of the House on Tuesday of this week.

The causes most often cited for the savings and loan crisis are fraud, disintermediation, speculative lending practices, and inept regulatory supervision. I would submit that in reality these were merely viruses that found a receptive breeding ground in an industry susceptible to infection as a result of unrestrained deposit insurance abuse. There were no incentives for either depositors or thrift management to exercise caution or restraint. The incentives actually ran the other way. Millions of brokered deposits sought out the highest rates without regard for any safety and soundness considerations. The natural immunities of our free market system had been destroyed—savings and loan high-flyers weren't playing with their own money. We had lost sight of the fact that rates of interest are functions of risk.

In the special order that I delivered on last Tuesday, I discussed the distressed condition of savings and loans after 4 years of a Democrat administration's economic policies.

Out of 3,741 thrifts in existence in 1981, 110 were insolvent. By the end of 1982—just 1 year later—that number had increased by a factor of 4 to 415. According to some estimates at that time, two-thirds of the S&L industry was either insolvent or at a dangerously low level of net worth, and facing imminent insolvency.

Statistics from the Office of Thrift Supervision indicate that nearly all savings and loans were losing money in 1982. The net income of the savings and loan industry dropped from a positive $3.6 billion in 1979 to a negative $4.6 billion in 1981.

Problems in the savings and loan industry were justifiably of great concern to the Congress and to the American taxpayers. Afterall, savings associations were the only institutions specifically chartered for the purpose of providing home mortgages to low- and moderate-income families. In 1982, thrifts held over 30 percent of the total mortgage debt outstanding in the United States, and provided 35 percent of single multi-family mortgages as well as 17 percent of all commercial mortgages.

The Reagan administration and the 97th Congress were left to deal with the savings and loan crisis that began during the Carter administration, and the response in 1982 was the Garn-St Germain Act. While Garn-St Germain increased the flexibility of federally chartered savings associations to compete in the financial and economic environment of the late 1970's and early 1980's, many state legislatures went far beyond Garn-St Germain by approving thrift charters and authorized activities for State savings and loans which were extremely liberal. I would submit that the State legislatures in States like California, Texas, and Florida were clearly irresponsible in this regard.

The facts support this conclusion. Over three-fourths of the losses realized by the FSLIC IN 1988 and 1989 were caused by State-chartered institutions alone. All the Nation's taxpayers as a result of the Federal insurance programs are now carrying the financial burden of failed State-chartered savings and loans.

Some of the most notorious and scandalous savings and loan failures were State-chartered institutions such as Lincoln Savings & Loan of California, and Vernon Savings & Loan of Texas.

Creating the opportunity for States to enact their own loose and liberal guidelines for savings and loans insured by the Federal Government clearly created dangerous financial exposure to the insurance programs, and we are now experiencing the unfortunate and costly consequences of that sure recipe for disaster.

As the failures and hemorrhaging continued in the savings and loan industry after 1982, many Republicans undertook tireless efforts to get the Democrat-controlled Congress to act in a responsible way to address the increasingly serious and costly savings and loan situation.

Through lengthy statements on the floor of this Chamber, and letters to the Democrat chairman of the Banking Committee, as well as requests for reports and information from the General Accounting Office and the Federal Home Bank Board, Republican members like myself and the ranking Republican on the Banking Committee, Mr. WYLIE, Mr. HILER of Indiana, and others tried to bring attention to the impending savings and loan crisis, and to urge that action be taken by the Democrat-controlled Congress.

As early as 1984, a Presidential task force headed up by then Vice President George Bush, proposed a "Blueprint for Reform" which called for stricter regulation of savings and loan associations who abandoned traditional thrift activities. That proposal set the stage for regulating savings and loans in a manner that would mirror the tough regulation of commercial banks. Acting on now President Bush's "Blueprint for Reform" could have eliminated many of the problems which evolved into the massive savings and loan crisis that we face today.

These proposals were rejected by the Democrat-controlled Congress in 1984, but they were adopted in large part in the S&L bill that was passed last year, in 1989—although it was 5 years too late.

In 1986, the Reagan administration—through the hard work of Treasury Secretary James Brady and Under Secretary of Finance, George Gould—urged that the Congress enact a FSLIC recapitalization plan providing assessments against the savings and loan industry—not the taxpayers—in order to bolster the depleted reserves of the FSLIC.

Giving the FSLIC the financial resources to close insolvent institutions was vital in order to reduce the ongoing losses in the savings and loan industry—losses that were estimated at approximately $900 million per month.

Regrettably, the alarms sounded by Republicans fell on the deaf ears of the Democrat-controlled Congress, who were influenced by massive campaign contributions and personal favors from politically connected savings and loan executives and a powerful savings and loan lobby.

Democrats Jim Wright, Tony Coelho, and Fernand St Germain stalled efforts to address the savings and loan crisis, effectively ignoring the Reagan administration's cry for help in 1986 by killing the administration's FSLIC recapitalization bill until the next Congress. They all did this while using yachts, corporate jets, and credit cards owned by savings and loan executives and the S&L lobby.

CONDITION OF THRIFT INDUSTRY

During the period from 1980 to 1988, over 500 savings associations failed—more than 3½ times as many as in the previous 45 years combined. In trying to keep up with massive savings and loan failures and its obligations to depositors of failed institutions, FSLIC itself became insolvent shortly after 1985.

The FSLIC had a net worth of negative $50 billion at the end of 1988—down from a positive net worth of $6.3 billion only 2 years earlier.

At the end of 1988, there were 364 savings associations operating with a negative net worth, and a total of 390 thrifts operating with net capital ratios between zero and 3 percent which is the lowest permissible level. Moreover, out of 2,949 FSLIC-insured institutions in existence at the end of 1988, 508 or 17 percent were insolvent, and 754 or 26 percent were at the brink of insolvency.

The net income of all thrifts in 1988 was a negative $13.4 billion, down from a positive $132 million in 1986. In just the first 6 months of 1989, the net income of the savings and loan industry was a negative $7.7 billion—the largest thrift losses of any year in history. The average return on assets for the savings and loan industry was negative 1.1 percent in the first quarter of 1989—most of the industry was going broke, with the institutions in the worst financial condition losing the most money at the fastest rate.

While the Federal Home Loan Bank Board lacked the funds to close the insolvent and marginally capitalized savings and loans, hundreds of marginally capitalized thrifts continued to operate at an estimated loss of almost $30 million per day, $900 million per month, or over $11 billion per year.

The Federal Government had no choice but to make good on its full faith and credit guarantee on deposits, and make certain that families and individuals did not lose their hard earned savings that they had deposited in savings associations. Anything less would have sent shock waves through our communities and resulted in massive bank runs, with economic disaster in the Nation's economy, and real trouble for the United States in international money markets.

In fact, some claimed that there was a silent run on savings and loans during the first quarter of 1989 when the thrift industry experienced $3.4 billion in withdrawals of deposits.

PRESIDENT BUSH'S RESPONSE TO THE S&L CRISIS

In facing the largest financial disaster in our Nation's history, President Bush knew that calling attention to the troubles in the savings and loan industry could be a politically unpopular move. He risked having the American public mistakenly identify the savings and loan crisis with his administration—a case of mistaken identity that the Democrats could be counted on to foster and promote. At the same time, President Bush realized that there was no time to wait.

When he has sworn into office, the savings and loan industry was losing money at a rate of $1.5 billion per month. Something had to be done to rescue the savings and loan industry and save the American taxpayers from more losses.

Responding to the failure of the Democrat-controlled Congress to adequately address the thrift crisis, President Bush rose to the occasion by proposing to the Congress on February 6, 1989—just 19 days after being sworn into office—a substantive proposal to clean up the mess in the thrift industry, and crackdown on S&L highflyers who had looted depositors of their hard earned savings.

The administration's proposal, the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 [FIRREA], is the most far-reaching piece of financial institutions reform legislation proposed in over 50 years. It was fashioned not only to save the integrity of our Federal Deposit Insurance System and the security of individual deposits, but to ensure that the looting of federally insured depository institutions by rogues and highflyers—at the expense of taxpayers—would never happen again.

President Bush's proposal was hailed by the press as a responsible, tough, and substantive approach to resolving the savings and loan debacle.

Just as he had acted swiftly, responsibly, and decisively in responding to the problems in the savings and loan industry, President Bush expected the Democrat-controlled Congress to do the same. He asked the Democrat leadership in Congress to cooperate with his administration and pass FIRREA in 45 days. Since the insolvent one-third of the savings and loan industry was losing money at a rate of $1.0 billion per month, President Bush's request was both reasonable and responsible.

In fact, at a loss of over $1 billion per month, some could argue that it was too generous a time period.

President Bush acted quickly; however, the same cannot be said of the Congress.

Only through a cooperative and coordinated effort between the executive and legislative branches, could the thrift industry's losses be brought under control, and the ultimate financial burden on the taxpayers minimized. Unfortunately for the taxpayers, it took the Democrat-controlled Congress more than 5 months to enact the President's proposal for resolving the savings and loan crisis—at an estimated cost of $7.5 billion.

The S&L restructuring bill, or FIRREA, was finally agreed to by House and Senate conferees on August 5, 1989, and signed into law on August 9, 1989 by President Bush.

What did FIRREA accomplish?

FIRREA contained a variety of provisions designed to provide funding for the deposit insurance system, and to enhance and strengthen the regulations and enforcement procedures of the savings and loan industry.

FIRREA mandated that for the first-time owners of savings associations would have to put their own money on the line—in the form of capital reserves—to absorb any losses that their institution might realize. It gave regulators increased authority to close institutions before they slipped into insolvency, and it gave the Federal regulators more power to control the activities of State-chartered institutions acting in a manner which threatens the safety and soundness of the Federal Deposit Insurance System.

FIRREA increased the insurance premiums required to be paid by savings and loan institutions, and it moved the regulatory agency of the thrift industry under the strict guidance and oversight of the U.S. Treasury Department.

FIRREA cracked down on junk bond investment of savings and loans, effectively requiring that thrifts begin divesting of junk bonds and that all junk bonds be removed from S&L's portfolios within 5 years.

FIRREA authorized $75 million for the Justice Department to investigate, prosecute, and convict individuals who mismanaged federally insured institutions, and it modified the Qualified Thrift Lender test to refocus savings and loans on their original purpose of providing home mortgage financing for low- and moderate-income families.

Most importantly, not one dime of the money authored under FIRREA to resolve the savings and loan crisis will go to savings and loan executives, management, institutions, or stockholders. The money will be used to recover losses for the taxpayers, to ensure the full return of individual deposits, and to prosecute the swindlers and con artists who drove federally insured institutions into bankruptcy.

EFFORTS OF THE CONGRESS

Republicans and Democrats alike knew that something had to be done to substantively address the situation in the savings and loan industry.

FIRREA passed the House with a wide margin of bipartisan support.

Like most bills that are passed by this great institution, FIRREA is not perfect. It is, and has been, open to criticism. It is the result of substantial compromise like all legislation adopted by the Congress is.

While FIRREA may be a lot of things, it is not a bailout.

As I have already stated, not one dime of the money authorized in FIRREA will go to thrift executives, stockholders, or the management of savings and loans.

To refer to FIRREA as a bailout is a serious disservice to the many individuals who worked long and hard to enact responsible legislation to resolve, once and for all, the savings and loan crisis with the concerns of the taxpayers in mind.

Unfortunately, there seems to be an effort by Democrat political strategists to negatively bill FIRREA as a Republican administration's bailout of the savings and loan industry.

I would urge those Democrat political strategists to look at that which has been said and done by members of their own party before continuing their mudslinging or assessing blame for this situation through selective memory or attempting to rewrite history.

The following quotes illustrate the bipartisan nature in which FIRREA was considered by the Congress, and the distaste on both sides of the aisle for those who refer to the legislation as a benefit to the industry.

Congressional Quarterly quoted my colleague on the Banking Committee, Mr. SCHUMER, who worked long and hard on FIRREA as a "central player in drafting the [S&L] bill," and that "By all rights [FIRREA] should be called the Schumer Plan."

The gentlemen from New York [Mr SCHUMER] was quoted in the Congressional Quarterly of June 17, 1989 as saying, "We [Democrats] worked hand in hand with the administration in drafting FIRREA. * * * I sort of liked our colleague HENRY HYDE criticizing me for being the pawn of the administration."

The distinguished Speaker of the House, Mr. FOLEY, was also quoted in the Congressional Quarterly of June 17, 1989, as saying that "FIRREA was a victory for the Democratic Congress, for the Congress as a whole and for the country. The American people have been extremely well served by this vital piece of legislation."

I particularly agree with comments that were made by the current Democrat Chairman of the House Banking Committee when he stated on August 4, 1989, " * * * I want to remind everybody * * * [FIRREA] is not a bailout. * * * It is a workout of a dilemma that is confronting and jeopardizing the entire system of our financial institutions. * * * "

A Democrat Member of the other body echoed the comments of the Banking Committee chairman when he stated,

In voting for [FIRREA], we are not voting to bail out the thrift industry or individual thrift executives, or stockholders or creditors. What we are doing is standing behind the commitment the Federal Government made in the 1930's that savings of American citizens deposited in federally insured institutions, up to prescribed limits, are safe and sound.

I would assume from these quotes that many prominent Democrats in Congress who worked hard on the savings and loan bill are as frustrated as I am when political strategists attempt to negatively bill FIRREA as a bailout.

ACTIVITY SINCE THE PASSAGE OF FIRREA

Contrary to the assertions of Democrat political strategists, much has been accomplished since the passage of FIRREA. To be sure, the process will be slow—a decade of hemorrhaging in the savings and loan industry cannot be bandaged and stopped overnight.

There are almost 7,100 pending FBI investigations involving bank fraud and embezzlement, over 3,000 of which involve amounts over $100,000.

There are 530 insolvent institutions currently under investigation, and the Justice Department and the FBI have been steadily increasing the resources devoted to investigation and

prosecution of bank and savings and loan fraud.

Already this year there have been 368 new positions allocated in the Justice Department to financial institution fraud, including 202 FBI agents and 120 prosecuting attorneys.

These resources are beginning to pay off. In fiscal year 1989, there were 791 convictions in major bank and savings and loan fraud cases. Court ordered restitution was increased from $123 million in 1987 to $361 million in 1989. The amount of funds recovered from fraudulent activity has jumped from $284 million in 1987 to $466 million in 1989.

The Resolution Trust Corporation, the agency charged with resolving failed savings and loans and disposing of their assets, has closed down or sold 211 S&L's in its first year of operation. It has 257 institutions lined up in conservatorship, protected more than $60 billion in 5.7 million individual deposit accounts, and transferred nearly $50 billion of assets back to the private sector.

A recent article that appeared in the American Banker newspaper stated that "Nobody can say that the Resolution Trust Corporation isn't trying."

CONCLUSION

It is indeed unfortunate that Democrat political strategists have recently attempted to blame the savings and loan debacle on Republicans.

While this is regrettable, their motives are understandable, afterall it is the Democrats who have the most to lose on this issue.

The record on the savings and loan crisis speaks for itself.

The facts show that it was the result of the economic policies of a Democrat administration which brought about the genesis of massive failures in the savings and loan industry.

The facts show that same Democrat administration enacted the first savings and loan deregulation bill which lifted interest rate caps on savings accounts, and raised deposit insurance from $40,000 to $100,000 per account.

The facts show that it was the Democrat leadership in Congress which intentionally delayed a critical FSLIC recapitalization bill in 1986. A well-known author on the savings and loan crisis was quoted in yesterday's Washington Times as stating that "the epitome of—the savings and loan crisis—was a vote on the Competitive Equality Banking Act of 1987—which was the FSLIC recapitalization bill of 1986—in which regulators were denied funds the Reagan White House had requested to speed the cleanup"—and that delay persisted for over 14 months.

The facts show that when the Congress should have been addressing the fraud and mismanagement in the savings and loan industry, Democrats Jim Wright, Fernand St Germain, and Tony Coelho were accepting favors from savings and loan executives and intervening on their behalf with Federal thrift regulators.

As I stated in the special order I delivered earlier this week, I believe that the files on Democrats Jim Wright, Tony Coelho, and Fernand St Germain that are presently under the control of the House Ethics Committee should be turned over to the Justice Department and to the general public for a thorough investigation into their actions on behalf of savings and loan operators—some of whom are now under indictment for mismanaging federally insured savings associations.

Let justice prevail.

The Congress must work to ensure the savings and loan debacle never occurs again, and that those who are guilty of wrongdoing in this one go to jail. The American people are justifiably outraged, and they demand and should receive no less.

There are key reforms that the Congress must deal with in meeting its responsibilities in preventing future savings and loan crises.

The Congress must address the issue of deposit insurance reform. While FIRREA made significant changes to Federal deposit insurance that will enhance the safety and soundness of the system, this issue needs to be addressed in a more comprehensive manner. The American people will no longer tolerate the risks that they are exposed to by a system which privatizes the profits and socializes the losses.

There is also a dire need for campaign finance reform. One only needs to reference the "Keating Five" and the actions of Democrats Jim Wright and Tony Coelho to understand what can happen when Members of Congress are beholden to special interests that are large campaign contributors.

Deposit insurance has become an opiate that has dulled the American consumer's otherwise market-driven quest for financial industry products and services. In the public's mind, it has made sound financial institutions indistinguishable from insolvent ones. Well managed institutions pay the same insurance rates as the most recklessly run institutions. Both the institutions and its depositors have become addicted to the false sense of security Federal insurance provides.

As with any addiction, withdrawal will be painful, and the inclination will be to postpone it. The remedies required will have some unpleasant side effects. Some additional industry fallout may occur. Institutions that have existed on the artificial life support of Government guarantees will either adapt to a new environment or wither. The strongest and best managed among them will flourish.

I look forward to working with my colleagues in the House in addressing these important issues in sessions yet to come.

Deposit insurance reform will require real political courage. It should not become a Republican or Democrat issue. Responsibility for the demise of the thrift industry rests in part on both sides of the aisle in all branches of Government, and in most areas of America.

The standard of living we have all come to enjoy in this country depends on it.

I hope that these special orders have been helpful to my colleagues in the Congress as well as to the American people, in setting the record straight on the savings and loan crisis.

TRIBUTE TO MRS. ANN DeSARNO FLYNN

HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PALLONE. Mr. Speaker, it is my distinct privilege to recognize Mrs. Ann DeSarno Flynn, of Long Branch, NJ, who on August 23, 1990, will be honored at a retirement dinner for her accomplishments and many years of public service.

Mrs. Flynn has served as chair of the Monmouth County Board of Elections for the past 20 years. She has gained widespread respect and admiration for her fair and impartial administration of our election laws.

As an expert in election law, Mrs. Flynn was appointed by former Gov. Thomas H. Kean as the superintendent of elections/commissioner of voter registration in 1984, and to the Election Registration Advisory Council with the office of the New Jersey Secretary of State. She has also served as vice president of the New Jersey State Association of Election Officials and was a former chairwoman of the legislative committee of this organization.

Mrs. Flynn has also served the city of Long Branch as chairperson of the housing authority and had previously been administrative secretary of the New Jersey Tax Appeals Court. Her other civic posts have included president of the Women's Columbian League of Monmouth County, president of the Shore Area Business and Professional Women's Organizations, and president of the New Jersey Federation of Republican Women.

Mrs. Flynn has also held several posts in the Republican Party. She has been a county committeewoman for over 43 years and a State committeewoman for over 17 years. She served on the County Republican Finance Committee and was elected three times as a delegate and twice as alternate to the National Republican Convention. For all of her work, she was honored in 1971 as New Jersey Republican Woman of the Year.

Mr. Speaker, at this time I would like to congratulate Mrs. Flynn on her many successes and achievements in life. Although our political beliefs differed, I always admired her and I commend her on her many years of public service to the State of New Jersey.

TRIBUTE TO PROF. ALEXANDER GUSS

HON. C. CHRISTOPHER COX

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. COX. Mr. Speaker, our Nation recently lost one of its truly great scholars and gentlemen. Alexander Guss, emeritus professor of Slavic Languages at Macalester College in St. Paul, died on July 18, 1990. He was 85.

It was my privilege to work with Dr. Guss in founding a small business. As the managing editor of Associated Publishers, Dr. Guss was instrumental in launching the world's first-ever

English translation of a foreign daily newspaper. With a staff of 50 people, Associated Publishers translated Pravda, the official newspaper of the Communist Party of the Soviet Union, for colleges and universities throughout America and 26 countries. The translations were also used by the CIA, the FBI, and U.S. military intelligence.

Born in Dunayevetsy, Russia, Dr. Guss came to the United States by way of Poland in 1922 because of a pogrom in his native land.

He attended public schools in Pittsburgh and received his undergraduate degree in economics from Sophia University in Tokyo, Japan. He graduated from Georgetown University in Washington, DC, with a master's in Russian language and literature and did additional course work at Indiana University and the University of Minnesota.

Dr. Guss served 22 years in the U.S. Army and fought in World War II. Later, he worked in psychological warfare operations for the army and taught Russian to U.S. soldiers.

Dr. Guss began his career at Macalester College in 1963 when there was an opening for a Russian language professor in the Classics Department. He became president of the Minnesota Chapter of the American Association of Teachers of Slavic and Eastern European Languages. By 1967, he had become chairman of the Slavic Languages and Literature Department.

While at Macalester, Dr. Guss was noted for arranging the 1972 visit of Russian poet Yevgeny Yevtushenko, and for developing the Russian Department into a separate department of the college. He retired from Macalester in 1978 but continued to teach occasional courses.

Lucile, his wife of 44 years, has said what we all know: That he loved to teach, and was always there for his students. Alex Guss had high standards, but he was always helpful and compassionate toward his students. Their best interests always came first. They, like to many others whose lives he touched, will dearly miss him.

Mr. Speaker, it is appropriate that this Congress honor the memory Dr. Guss, a man of keen intellect, but more importantly, a man of magnanimous spirit and a great friend.

INTRODUCTION OF THE NATIONAL ENERGY POLICY ACT OF 1990

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SHARP. Mr. Speaker, today, I am introducing the National Energy Policy Act of 1990. I am pleased to be joined by my friend and colleague MARILYN LLOYD of Tennessee.

This legislation is intended to take a first cut at reducing the emission of so called greenhouse gases, which threaten to increase the average temperature of our planet. Its purpose is not to undertake drastic crash programs which may or may not be warranted. Rather this bill is a start on doing those activities that will be helpful both in reducing greenhouse gas emissions and in meeting other social goals. Specifically, this bill promotes energy efficiency and research and development on clean energy technologies that not only can reduce greenhouse gas emissions but also reduce other air pollutants, improve the competitive position of our economy and increase the security of our energy supplies.

Before discussing the legislation further, I would like to discuss the phenomenon known as global warming, and the uncertainties surrounding it. A set of reports released in June from the Intergovernmental Panel on Climate Change [IPCC] is very helpful in understanding the current level of knowledge.

The IPCC is an international group of scientists and governmental officials who have been convened under the the auspices of the World Meteorological Organization and the United Nations Environment Program with the active support and participation of the United States. The IPCC established three working groups. Working Group I was charged with providing an assessment of the scientific knowledge on the factors that affect climate change, what has happened already and what might happen. Working Group II assessed the potential impacts on man and the environment if climate change occurs. Working Group III, chaired by the United States, scoped out potential response strategies to a change in climate and the attendant impacts.

One of the conclusions is that there is a great deal of uncertainty. There is much we do not know. But, the working groups also believe there is much we know. Working Group I is certain that emissions resulting from human activities are substantially increasing the atmospheric concentrations of the greenhouse gases, and that these increases will enhance the greenhouse effect, resulting on average, in an additional warming of the Earth's surface.

The best guess of the same working group is that, under a business-as-usual scenario, the global mean temperature will increase 1.8 degrees Fahrenheit by 2025 and 5.4 degrees by the end of the 21st century.

Their best judgment is that global mean temperatures have increased 0.5 to 1 degree over the last 100 years but that we cannot be certain whether the increase is due to a general warming trend or to natural climate variability.

There is also great uncertainty about the impacts of global warming. Working Group II looked at the potential for such impacts as increased rainfall, decreased rainfall, rising oceans, shifting agricultural zones and the effects on humans, animals, and plants. It is important to point out that not all the potential changes studied are bad and that the smaller geographic area you look at, the less precise any estimates may be.

Working Group III, chaired by the United States, had as one of its main findings that: "The potentially serious consequences of climate change on the global environment give sufficient reasons to begin by adopting response strategies that can be justified immediately even in the face of significant uncertanties."

Group III identified measures that can help tackle climate change in the shorter term while yielding other benefits. The first item on this listed was improved energy efficiency which they said: "Reduces emissions of carbon dioxide, the most significant greenhouse gas, while improving overall economic performance and reducing other pollutant emissions and increasing energy security."

Second, they also listed a number of steps which governments should undertake now in order to prepare for more intensive action in the longer term. One of these was the development of new technologies in the fields of energy, industry, and agriculture.

In short, those two items are what this bill is about. It is about improving our Nation's energy efficiency in the short run and developing new energy technologies that can reduce the emission of greenhouse gases in the long run. Both these objectives have positive benefits to the economy and the environment even if there were no concern about global warming.

Because of the uncertainties in our understanding of climate change, we should not rush headlong into major crash programs that may or may not be of use, nor should we be complacent. This is a no excuses, no regrets global warming bill that, if eventually enacted into law, will help us, and not haunt us, even if the scientific predictions of the IPCC do not come to pass. And, if they do come to pass, we will be that much ahead of the game.

This approach is in keeping with the joint policy communique issued by the group of seven at the recent economic summit hosted by the United States in Houston. The communique, which was supported by President Bush, stated in the first point on the environment that: "We agree that, in the face of threats of irreversible environmental damage, lack of full scientific certainty is no excuse to postpone actions which are justified in their own right."

This bill is a starting point, a place to begin sorting out those steps and measures which can make a down payment on reducing greenhouse gas emissions and which make sense for other reasons as well.

The text of this bill is basically the same as legislation filed in the Senate by my friend and colleague Senator WIRTH of Colorado, as reported out of the Energy and Natural Resources Committee. Senator WIRTH has done some important ground-breaking work with this legislation and rather than reinvent the wheel I have introduced it as reported by committee, with only minimal changes to reflect differing jurisdictional boundaries in the House. Despite the good work done in the Senate, I am not satisfied with everything in this bill and foresee making changes in it after receiving agency and public input through the committee process.

I look forward to working with my colleagues to improve and pass this bill. If the crush of business at the end of this Congress does not afford the time for passage, I intend to reintroduce this bill next Congress.

IRISH AMERICAN HERITAGE MONTH

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DONNELLY. Mr. Speaker, I rise today in strong support of House Joint Resolution 482, a resolution designating the month of March 1991, as "Irish-American Heritage Month."

This resolution pays tribute to the heritage of over 40 million Americans of Irish descent. "Irish American Heritage Month" celebrates a national recognition of the contributions made by Americans of Irish ancestry.

The Irish have played a significant role in the United States' rise to independence. By 1776 nearly 300,000 natives of Ireland had emigrated to the United States. A French major general, who witnessed the United States victory at Yorktown over the English, reported that Congress owed it's existence to the tenacity of the Irishmen that fought there. The Declaration of Independence was signed by at least eight Irish Americans. The Irish have contributed to the advancement and enrichment of our culture, including education, art, science, business, industry, governmental services, and athletics. The Irish that have emigrated to this country have embodied, promoted, and perserved American Ideals.

This resolution is an expression of sincere appreciation for the commitment of Irish Americans to the growth and development of the United States. This resolution will provide Members with an opportunity to recognize and honor the lasting contributions by Irish emmigrants to the American way of life.

THE HUMAN RIGHTS CRISIS IN LIBERIA

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. TOWNS. Mr. Speaker, recent reports indicate that Krahn soldiers, loyal to President Samuel K. Doe slaughtered at least 600 civilians in Monrovia, capital city of the West African State of Liberia. Of those murdered, most were women and children who had sought refuge in the St. Peter's Lutheran Church.

The violence being perpetuated against the civilian population in Liberia by the Government and rebel forces in Liberia is an atrocity and an indisputable violation of human rights.

I urge my colleagues to join me in calling for an emergency U.N. Security Council meeting to discuss possible solutions to the Liberian crisis.

For 7-months Liberia has been engaged in a civil war with no successful negotiations. It appears unlikely based on recent events that any talks will take place in the near future without a neutral body like the U.N. Security Council assisting.

Presently there are two opposing groups, one is led by Prince Johnson and the other by Charles Taylor, a former Doe aide who led the original invasion with Doe in 1980.

The rebel forces have accused Doe of corruption and abuse of human rights, while President Doe has charged the rebel forces of conspiring in criminal activity against the state.

The situation in Liberia has reached a crisis level, and it is critical that action be taken now to end the systematic slaughter of civilians in Liberia.

CHAMBER RECOGNIZES COAST GUARD SERVICE

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to bring to your attention an event in Miami which will pay tribute to the servicemen of the U.S. Coast Guard. These men and women have demonstrated their dedication to the preservation of democratic beliefs and American ideals.

On Monday, July 23, the Latin Chamber of Commerce of the United States of America [CAMACOL] hosted a reception in honor of the U.S. Coast Guard. The reception was held in celebration of the 200th anniversary of the Coast Guard while recognizing their active role in the war on drugs.

Also sponsoring the reception was Asociacion Interamericana de Hombres de Empresa, El Colegio Nacional de Periodistas de Cuba, the Cuban Women's Club, Martin Luther King Economic Development Corp., the Little Havana Development Authority, the Latin Builders Association, the Florida Trade Center, the Latin Quarter Association, the Small Business Opportunity Center, the Banker's Advisory Committee, the Kiwanis Club of Little Havana, the Hispanic American Builders, S.A.L.A.D., La Asociacion de Vendedores del Estado do la Florida, Haitian Task Force, El Colegio Nacional de Abogados de Cuba, La Asociacion de Publicitarios Latinoamericanos, Coalition of Hispanic American Women, and the National Association of Cuban-American Women.

I commend these organizations for their initiative in promoting and recognizing the U.S. Coast Guard. I have no doubt that the Coast Guard will continue their tradition of service and commitment to the American people.

NATIONAL DRUG-FREE SCHOOLS AND COMMUNITIES EDUCATION AWARENESS DAY

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ERDREICH. Mr. Speaker, I rise today to introduce a joint resolution to designate October 17, 1990, as "National Drug-Free Schools and Communities Education and Awareness Day." This joint resolution expresses the urgency of the problems that permeate the drug abuse crisis in this country.

We are all concerned by studies that show one out of every two high school seniors graduating in 1989 used an illegal drug before graduation. What this says is that we are on the verge of losing an entire generation of our young people to the scourge of drug abuse. We hear stories daily of young people dying of drug overdoses or murdered in disputes over the buying and selling of drugs. The playgrounds and streets of too many of our neighborhoods are becoming open markets for drug dealers to sell their wares.

The horrors of addiction are affecting growing numbers of the most vulnerable members of our society: the newborn. Our hospitals have become inundated with babies born addicted to cocaine. As our children go, so goes our Nation. We must put forth a concerted effort to stop the spread of drug abuse throughout the Nation.

Mr. Speaker, this resolution recognizes that the problem of drug abuse is not the province of one geographic area or of one particular group. The drug menace is affecting all parts of our country, from the urban core to the Nation's heartland. People of all races, creeds, and colors are experiencing the devasting effects of drug abuse. If we delude ourselves into thinking that drug abuse is someone else's problem, then we all are doomed in our efforts to fight it.

Education must play a key role in our commitment to combat drug abuse. We must devise programs that raise the awareness of our young people to the dangers of drugs. The message of living a drug-free life should be instilled in our children at every step of the education process. We must make them aware that the decision to live drug-free is not only a healthy choice but a moral one as well, a choice that will open the door for them to achieve any goal they pursue.

Finally, this resolution recognizes the importance of uniting all members of the community in combating the problem of drug abuse. Each day there are thousands of people in our communities who are on the front line, fighting to create drug-free zones in their homes, schools, and neighborhoods. They should not struggle alone. It is imperative that we muster the resources of our governmental and community based social service organizations, churches, schools, medical community, and families in this important fight for the future of our children and our Nation.

The goal of achieving drug-free schools, communities, Nation, and lives is attainable. But only through the combined efforts of each and every one of us can the battle against drugs be won.

Mr. Speaker, I urge my colleagues to become cosponsors of this resolution.

TRIBUTE TO COMMODORE ROBERT FIELD STOCKTON, USN

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. COURTER. Mr. Speaker, it is with great pleasure that I rise today to dedicate a memorial to Commodore Robert Field Stockton, USN on Sunday, August 19, in Santa Barbara, CA.

Commodore Stockton was born in Princeton, NJ, on August 20, 1795. He was the grandson of Richard Stockton, a signer of the Declaration of Independence. In 1809, at the age of 14 he entered the College of New Jersey, now Princeton University. As war with England became inevitable, he left college to become a midshipman in the U.S. Navy at the age of 17, an example of his selfless patriotism.

After various notable accomplishments during his naval career, including the founding of the site on the African coast now known as Liberia, he was the first man to being an ironhulled, screw propelled ship to America.

After being ordered to take command of the American Squadron in the Pacific, Commodore Stockton anchored his frigate U.S.S. *Congress* off Santa Barbara and ordered his crew ashore to launch an armed conquest of the city. Commodore Stockton and his men successfully captured the city from the Mexicans. After the capture of Santa Barbara and Los Angeles, he assumed the title of governor and commander-in-chief in the new territory, before returning home to become a U.S. Senator in 1851. While serving in that capacity, he introduced legislation which abolished flogging in the U.S. Navy. He died in Princeton on October 7, 1866.

The Naval Reserve Center at Santa Barbara is in itself a historical naval treasure and it continues to be recognized as one of the most beautiful and exciting liberty ports for our sailors today. It is appropriate that we dedicate the Stockton Memorial at this center. We must continue to cherish such places that remind us of the people that made America the great Nation it is today.

NATIONAL KEY CLUB WEEK

HON. MIKE PARKER

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PARKER. Mr. Speaker, today I have introduced a bill designating November 4–10, 1990, as "National Key Club Week."

Being the largest high school service organization, the Key Club has shown the capability of providing a positive impact on society. This proclamation affirms the endorsement of their goals and ideals protrayed in the Key Club motto: "Caring . . . Our way of life." Founded in 1925, membership includes over 133,000 high school students in more than 3,800 high schools in all 50 States and across 14 nations. Club members put in over 6,500,000 hours annually on community service projects such as the Buddy Programs, Adopt-a-Grandparent, Peer Counseling, Meals on Wheels, School/City Beautification Projects, and Special Olympics.

The Key Club International is dedicated to supporting youth and their ambitions. It is with great admiration that Congress should honor this organization and its accomplishments.

A TRIBUTE TO ROBBIE WALLIS

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DYSON. Mr. Speaker, I rise today to pay tribute to a distinguished individual, friend, community leader, and the former managing editor of an outstanding newspaper in my district—the Aegis.

W. Robert Wallis retired this year from the Aegis, bringing an end to a career in journalism that lasted 38 years. He will be sincerely missed by his staff and most assuredly by his readers.

Mr. Wallis enjoyed much success in all facets of life—as a journalist, Federal employee, father, grandfather, and citizen. Raised in Harford County and a graduate of Bel Air High School and the University of Baltimore, Mr. Wallis considered attending law school early in his career. I believe that life in Harford County would be much different today if he had pursued a legal career.

During his 38-year tenure with both the Harford Gazette and the Aegis, Mr. Wallis witnessed—and contributed to—many changes in Harford County. In the late 1940's, he began his career in journlism as cub reporter for the Harford Gazette. His beat included the local sports action around the county. Young Wallis believed, "Two things missing in local papers were photos and sports coverage." When the Gazette began including sports and photographs in the section featuring Mr. Wallis' work, the circulation of the Gazette doubled from 1,000 to 2,000 readers. In claiming this section as his own, Mr. Wallis developed it into one of the notable components of the paper. This stands as one of the major achievements of his career.

After working for almost 2 years at the Gazette, Mr. Wallis held brief positions with post engineers at Aberdeen Proving Ground and in the public information office at the Edgewood Chemical Center. However, Robbie Wallis knew that the newspaper business was for him.

In 1941, he joined the Harford Gazette's rival, the Aegis and began the sportswriter's notebook which would gain him much notoriety. In 1962, while considering law school, Mr. Wallis was offered the news editor position at the Aegis. After years of night school earning a bachelor's degree at the University of Baltimore, Mr. Wallis elected to accept the position at the Aegis rather than continuing night school. Anyway, he said, "being a news editor required working days and nights."

The sportswriter's notebook and his editorial work landed him prestigious job offers with other papers including the Evening Sun. Mr. Wallis also captured the attention of five separate Governors including William Donald Shaefer, Harry Hughes, Blair Lee III, Marvin Mandel, and J. Millard Tawes.

Robbie Wallis once said, "One of the most rewarding things about the job—of editor—is having the chance to help people in the community.

And help the community he did. Robbie once raised enough money for a woman to fly across the country to remove a cancerous tumor from her brain. Robbie's humanitarian exploits were and are still legendary in and around Harford County. It was he, who after years of stagnation, had almost singlehandedly revived the Harford County Fair.

He currently serves on the Stadium Authority and is a former member of the Maryland Physical Fitness Commission, the Maryland Censor Board, and the State Food Market Commission. Mr. Wallis also served as chairman of the Maryland Home Improvement Commission.

Mr. Wallis will not be forgotten. His outstanding work at the Aegis has made the paper exceptional, and the community a better place to live. It is under his guidance that the Aegis continues to provide quality news coverage of local events.

There is no doubt that the Aegis will be a different place without Robbie Wallis. I wish him all my best in his retirement.

TRIBUTE TO JOHN W. LITCH

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to the late John W. Litch of my 17th Congressional District of Ohio.

An Army veteran of World War II, Mr. Litch was born on February 20, 1914, in Youngstown, OH. He retired in 1974 from the city of Campbell, where he was supervisor of the street department for more than 40 years. Mr. Litch was also a reserve deputy sheriff for more than 20 years. He was also a member of the church, a 50-year member of the Croatian Fraternal Union Lodge 66, where he served as trustee, a former president of Eastern Ohio Flying Association and a member of YMCA Businessmen's Club.

It was an honor and a privilege to serve as the representative of such a fine man. It gives me great personal satisfaction to have been involved with such a fine man and his family. Mr. Litch was an outstanding citizen of the 17th District of Ohio, and, again, I would like to express my gratitude for being able to serve such a fine gentleman.

HONORING PATIENT RECOGNITION DAY AT BRONX PSYCHIATRIC CENTER

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ENGEL. Mr. Speaker, on August 23, Bronx Psychiatric Center is holding its second annual Patient Recognition Day to honor those patients who have made significant progress in their treatment. As a public official who has taken an active interest in mental health services, I wish to also recognize the accomplishments of these patients, as well as compliment their families and the staff of Bronx Psychiatric Center.

Patient Recognition Day is organized by the BPC's Board of Visitors, a seven-member volunteer body appointed by the Governor of New York that makes visits to mental health facilities and reports to the State on the quality of care being provided. The event was conceived last year by the past president of the board of visitors, Cynthia J. Fox, and the tradition is being continued by the new board president, Sylvia Lask. The executive director of BPC, Marlene Lopez, and the State commissioner for mental health, Dr. Richard Surles, are also to be commended for their support of this special day.

The goal of all the people involved in BPC programs is to help patients complete their treatment at the center and return to the community to lead active lives. Those honored during Patient Recognition Day have made great strides toward this goal. These patients have realized that when there is dedication to improvement and active participation in their treatment plans, positive results will follow. Several patients of Bronx Psychiatric Center have progressed so far that they have organized programs to assist their fellow patients. I can attest to the fact that this spirit of cooperation is what makes Bronx Psychiatric Center a special and unique place.

While we recognize on this day the effort put forth by the patients on their own behalf, their treatment would not be complete without the support of their families and the dedicated staff of Bronx Psychiatric Center. I have seen the positive results of your efforts and encourage you to keep up the good work.

The entire Borough of the Bronx relies on BPC for mental health service, both at the center itself and through a network of satellite clinics offering day care and aftercare. As a representative of the borough, I am honored to say that the Bronx is proud of the accomplishments of the patients and staff of BPC. I wish you all continued happiness and good health.

PITTSFIELD GIRLS ALL STAR SOFTBALL TEAM WINS STATE CHAMPIONSHIP

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CONTE. Mr. Speaker, I rise today to recognize and congratulate 17 very special athletes from my district. The Pittsfield Girls All-Star Softball Team, comprised of girls 12 and under , has captured its first ever State championship in slow pitch softball. In doing so, they have also captured the hearts of every sports fan in our community, none more so than mine. These budding superstars have given the entire county a great sense of pride, the same pride welling up inside of me as I stand here today.

During the course of the season, these young ladies won 15 games and lost only 1. This is certainly a tribute to their outstanding coach, Joe McGovern, whose lessons of teamwork manifested itself in unity and pride among his players, and whose belief in the value of hard work were adhered to all the way to the State championship. The team has practiced, together, at least every other day for the entire season. The experiences of partnership and dedication have yielded great success today, and the lessons learned will surely lead to greater successes in the future.

Presently, the all-stars are practicing daily in preparation for the national tournament in Meridian, MS. I am considering, Mr. Speaker, suggesting to Manager Joe Morgan that the Red Sox spend some time at these practices to pick up some helpful hints on winning. If these young ladies can bring the national trophy to Pittsfield, maybe they can help the Olde Towne Team bring the Commissioner's Trophy to Boston!

Mr. Speaker, in this national forum, I wish the best of luck to the Pittsfield 12-and-Under Girls All-Star Softball Team, and I have my fingers crossed for their performance at the national tournament in Meridian, MS. I am confident that the strength, camaraderie, and skill which has been developed throughout this season will place them in good standing against the rest of the Nation.

Hopefully, the national trophy will return to Pittsfield with them in August. Good luck, girls.

AVIATION SAFETY AND CAPACITY EXPANSION ACT

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SYNAR. Mr. Speaker, yesterday I voted for H.R. 5170, the Aviation Safety and Capacity Expansion Act, a bill to reauthorize the Airport and Airway Trust Fund programs and FAA research and development programs for fiscal year 1991 and fiscal year 1992.

I supported H.R. 5170 because I am concerned about improving both the safety of all Americans who fly and to improve our Nation's airports competitive opportunities for the future.

Since 1978, when the airline industry was deregulated, airline passenger traffic has increased from 276 million passengers to 480 million passengers in 1989. The FAA estimates that passenger traffic will continue this increase to 775 million by the year 2000.

H.R. 5170 will address these shortages by drawing down on the Airport and Airway Trust Fund. The bill authorizes $2.5 billion in fiscal year 1991 and $3 billion in fiscal year 1992 for modernizing air navigation facilities and equipment badly needed by the FAA to keep pace with the increasing air traffic. The bill also authorizes $4.1 billion in fiscal year 1991 and $4.4 billion in fiscal year 1992 to improve FAA operations, including increasing funding in aviation safety and security programs as well as the air traffic control system.

I believe it is important that the $7.6 billion surplus in the Airport and Airways Trust Fund be used to improve the national airport infrastructure and transportation system. Our country needs to spend these funds to continue to grow economically and prepare for future economic competition. For this reason I strongly support the provision in the bill which eliminates the "penalty clause" and establishes a new formula to fund FAA operations through general appropriations and the Trust Fund.

I do want to express my concern about the Passenger Facility Charge [PFC] provision in the bill which calls for a $3 direct charge on airline passengers, in order to raise money for airport improvements. I do not believe this regressive tax on airline passengers is justified, especially when commercial airlines and cargo carriers, which also use airport facilities, are not taxed additionally as well. The trust fund is already financed by a variety of taxes on aviation users, including an 8 percent tax on domestic airline tickets. In the last 20 years we have seen the surplus in the trust funds pile up annually. I support spending down the trust fund before adding to the tax burdens of the flying public. For this reason I voted for the Bosco amendment to strike the PFC tax from H.R. 5170.

COMMUNITY ACTION'S SILVER ANNIVERSARY

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MURTHA. Mr. Speaker, I would like to take a moment to express my congratulations and appreciation for the excellent work done over the past 25 years by the Cambria County Community Action Council.

The council has worked diligently to provide services to literally thousands of low-income individuals who live throughout Cambria County. These services include the Women, Infants and Children Program, known as WIC; the Head Start Program for preschool children from disadvantaged backgrounds; weatherization to reduce home heating costs for the elderly and poor; emergency shelter; transportation for medical and other important needs; and various educational programs.

These programs have helped many of my constituents through tough times and back to self-sufficiency.

Of equal importance is the community action council's role as an advocate for low-income people. The council has been tireless and relentless in its efforts not only to inform but to educate elected officials about the needs of these people.

In its 25 years, the council has grown and now has a staff of 130 dedicated people. I commend each one of them, as well as board President James E. White for the leadership he has given the council through the years.

I want to publicly recognize the Cambria County Community Action Council for its contributions and its continuing efforts to assist those in poverty. Congratulations and keep up the excellent work.

VENTO-RIDGE AMENDMENT WILL RESTORE ACTUARIAL SOUNDNESS TO FHA INSURANCE FUND

HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. McMILLEN of Maryland. Mr. Speaker, I would like to express my support for the amendment offered to the Housing and Community Development Act of 1990 by my colleagues, Representatives VENTO and RIDGE. This amendment seeks to reform the Federal Housing Administration's [FHA] Mortgage Loan Insurance Program by eliminating heavy up-front costs to homebuyers and reinstating a pay-as-you-go financing structure to achieve actuarial soundness.

The FHA was originally created in 1934 to provide mortgage insurance to low- and moderate-income first-time homebuyers. Since that time, it has been assisting families, who might otherwise be unable, to achieve the American dream of owning their own home. Currently, the FHA serves about 6.5 million existing homeowners and 600,000 new homebuyers each year. In my State of Maryland 23 percent of all mortgages are made through the FHA.

The accounting firm of Price Waterhouse recently completed an audit and analysis of the FHA's mortgage insurance fund showing that, while the FHA is solvent, it is losing money at the dangerous rate of $350 million a year. Price Waterhouse concluded that the mortgage fund is not actuarially sound and went on to offer recommendations on how to maintain solvency. One of these recommendations is the pay-as-you go system that has been incorporated into the Vento-Ridge amendment.

Specifically, the Vento-Ridge amendment phases out over a 5-year period the current up-front insurance premium of 3.8 percent of the loan amount, replacing it with 1.35 percent to be paid at settlement and a 0.6 percent annual payment for the life of the loan. This change is vital because it reaffirms the mission of the FHA to provide affordable loans to families without an unmanageably large downpayment. It also provides for the FHA to reach a capital standard of 1.25 percent, as recommended by Price Waterhouse, within 24 months of enactment of this legislation and a 2 percent capital standard would be reached by the year 2000.

The administration opposes the Vento-Ridge amendment. The reason they do not want to see this reform enacted is because it will stop the current practice of using the large up-front insurance premiums to mask the true size of the Federal budget deficit. Congress has repeatedly worked to prevent this kind of smoke and mirrors but we keep having to reassert ourselves on this matter. The House has already visited the issue once this week when we voted to take the Social Security trust fund off budget during consideration of the debt limit. What makes the administration think we are going to feel any differently about this gimmickry? The American people should not be forced to subsidize the Office of Management and Budget's accounting schemes. This amendment sees that they don't

The other important aspect of the Vento-Ridge amendment is that it provides for the financing of closing costs. This is of special interest to me because Maryland has some of the highest closing costs in the Nation. Without this financing option, many families across the country would find it impossible to raise the necessary funds to secure a loan through the FHA.

I support the Vento-Ridge amendment because it will restore actuarial soundness to the FHA insurance fund without needlessly blocking families from purchasing homes through excessively high up-front payment requirements. I believe that this amendment will help to save the FHA and the American dream of a family home at the same time.

BREAKDOWN IN THE BUDGET SUMMIT

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PURSELL. Mr. Speaker, with all of the recent controversy over who is responsible for the breakdown in the budget summit, I want to remind my colleagues and the American people of a budget plan that was presented in 1985 by the GOP 92 group which I chaired. A 30-member House Republican study group. Had this budget been adopted back when our overall deficit was only $1.4 trillion, we would have achieved a total deficit reduction of $263 billion by 1988 and a zero deficit—that is, a balanced budget—by 1991. All of this would have been accomplished without raising taxes.

It is unbelievable that the Democrats have been participating in the budget negotiations since May and have failed to bring a deficit reduction package to the table. The Republicans put their plan on the table in 1985.

We can no longer negotiate with ourselves. With the multibillion dollars S&L crisis staring us directly in the face, we need the participation of the people who are responsible for this mess. As long as the majority party refuses to face up to the budget crisis, like they did in 1985, and refuses to act in good faith, the American people are the losers.

CONSOLIDATION OF EXPORT CONTROLS ENFORCEMENT AUTHORITY

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BARNARD. Mr. Speaker, I want to share with my colleagues the substance of a letter I recently sent to the chairmen of the House Committee on Foreign Affairs and the Senate Banking, Housing, and Urban Affairs Committee.

The Commerce, Consumer, and Monetary Affairs Subcommittee, which I chair, has followed the evolution of the administration of export controls enforcement since 1984. At that time, the subcommittee expressed its concern over the practical and philosophic question of having the Commerce Department handle both export promotion and enforcement responsibilities. Recently, members of the subcommittee staff conducted an investigation of the present state of enforcement administration. The facts disclosed by the subcommittee's investigation are significant and in my view demand action by the Congress.

Section 12 of the Export Administration Act, as amended, created an enforcement role for the Department of Commerce and provided for shared enforcement responsibility between Commerce and Treasury—Customs Service. The intent of this arrangement was to create an enforcement regime which capitalized upon the established enforcement skills of the Customs Service together with the export licensing expertise of Commerce. Unfortunately, since the beginning, lack of cooperation between the two enforcement arms of the respective agencies has been the principle distinguishing characteristic of their association. As matters now stand, separate and uncoordinated investigations of the same target by Commerce and Customs have created international problems, complicated the investigations, lead to unnecessary work by both agencies, and has resulted in jeopardized criminal prosecutions and/or loss of controlled technology.

As early as 1985, the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs recommended consolidation of enforcement authority within a single agency. The Congress failed to accept that recommendation, and, although there is general acceptance of the fact that export enforcement administration requires fixing, current bills reauthorizing the EAA do not resolve the enforcement problem. In addition, one amendment proposes to provide additional enforcement authority to the Department of Commerce which, if enacted, in my opinion would only exacerbate an already bad situation.

Based on the subcommittee's review, I believe there is serious question regarding the workability of the present enforcement arrangement or the modifications being proposed in pending legislation. Recent events demonstrating the existence of sophisticated, ongoing attempts ot subvert U.S. export controls only serve to reaffirm the need for the United States to have the most effective enforcement capability possible. In fact, recent changes in Eastern Europe which have promoted the administration to propose liberalizing export controls to former East bloc nations and the Soviet Union will no doubt call for intensified, as opposed to reduced, enforcement efforts. Further delays in correcting enforcement administration difficulties are not in the national interest and the Congress should act now to reverse provisions of the Export Administration Act and consolidate enforcement authority within a single agency.

I urge my colleagues to support this view.

TRIBUTE TO ROBERT BARNETT

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. PELOSI. Mr. Speaker, I rise to pay tribute to one of my constituents, Robert Barnett, who died last month of AIDS-related complications. Mr. Barnett was a selfless man who, in the midst of his own battle with AIDS, dedicated himself to educating and counseling others. San Francisco has lost a magnificent person and a model citizen.

Moving to San Francisco from Virginia in 1979, Robert Barnett immediately became active in civic affairs. He directed the Gay and Lesbian Speakers' Bureau and spent many hours educating high school students and local groups about issues facing the gay community. He was active in Project Inform and was one of the first AIDS patients to volunteer to test the controversial drug, Compound Q.

Living with AIDS himself, Robert nevertheless found time to work with Shanti, listening and providing guidance to others who were encountering the disease. His dedication to others was surpassed only by his exuberant love of life.

Mr. Speaker, Robert Barnett embodied the spirit of generosity and commitment to community which characterizes so much of our city. It is my hope that his compassionate spirit will guide this Congress as we work to improve the lives of all citizens of this Nation.

LEGISLATION TO REPEAL NRC'S "BELOW REGULATORY CONCERN" POLICY

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MILLER of California. Mr. Speaker, today I am pleased to introduce legislation to protect the right of State and local governments to prohibit the disposal of radioactive waste in ordinary landfills and to overturn the Nuclear Regulatory Commission's below regulatory concern [BRC] policy. Similar legislation is being introduced in the other body by Senate Majority Leader GEORGE J. MITCHELL.

This legislation is needed because the NRC has reversed its longstanding policy that radioactive waste from nuclear reactors be disposed of in specially designed repositories licensed and regulated by the NRC. To make matters worse, under current law, the NRC has the power to force this senseless policy on the States.

The BRC policy is fatally flawed in many respects. First, it is an open invitation to abuse by unscrupulous operators who could use it to dispose of highly radioactive waste that does not meet the BRC standard into landfills. This would place an unnecessary burden on landfill operators and local governments who would have to measure the radiation level of every load of garbage to guard against abuses.

In addition, the radiation exposure levels permitted by the policy are far higher than those originally proposed by the NRC staff and those in similar policies proposed by the EPA, the United Kingdom, Canada, Japan, Finland, the National Council on Radiation Protection, and the International Atomic Energy Agency.

The NRC has proposed increasing radiation exposure to the public when there is a growing scientific consensus that low-level radiation is far more hazardous than previously thought. To give just one example, in 1989 the National Academy of Sciences concluded that low-level radiation is three or four times more hazardous than it believed in 1980.

The new NRC policy would also permit the radioactive contamination of drinking water way above the limits established by EPA. A recent EPA critique of the policy stated that a waste stream deregulated by the NRC, "* * * could be allowed to contaminate groundwater so the community drinking that water, now or in the future, would have to clean it up to meet the EPA criteria."

Unfortunately, the flaws in the BRC policy also reach far beyond the low-level radioactive waste issue. Under the policy, irradiated structures and sites that previously might have been subjected to extensive cleanup could be declared below regulatory concern and left as is. Consequently, State and local officials could be faced with the dilemma of trying to clean up a site that the NRC has declared clean but the EPA and the public believe is still hazardous.

Finally, the BRC policy would make it far easier to use radioactive materials in consumer products. In the past, the NRC rejected or discouraged the use of radiation in consumer products such as cosmetics, toys, and jewelry on the grounds that radiation should not be used for frivolous purposes. Under the new policy this approach has been abandoned.

It is difficult to conceive why the NRC has come up with such a senseless policy. At an investigative hearing that I conducted on the BRC policy last week I could find no plausible explanation or rationale for the policy. Indeed, documents obtained by my office revealed that the NRC Commissioners overrode the recommendations of their own staff experts when they were developing the policy. The hearing also revealed that the Commissioners ignored legitimate objections raised by the Environmental Protection Agency, the States, and the public.

The product of this skewed process is a policy which defies common sense and has the potential to endanger the public health. The Congress cannot let the BRC policy stand. I strongly urge my colleagues to support this legislation and work for its rapid passage.

BONE MARROW DONORS FOR A BRAVE YOUNG GIRL

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. APPLEGATE. Mr. Speaker, I rise today to recognize the residents of St. Clairsville, OH, for their participation in a blood drive that was held on July 22, 1990. This drive was organized with the hopes of finding possible bone marrow donors for a brave young girl diagnosed with leukemia.

Kelly Dolan of St. Clairsville is 18 and has acute myeloid leukemia. Her father, Richard Dolan, arranged the drive, where 500 people, including nurses, teachers, friends of Kelly, and people who just casually know the Dolans, volunteered to have their blood tested. Although a total of $37,000 was raised to pay for the testing, some of the volunteers who showed up had to be turned away because of lack of funding.

The blood that was taken at the drive must be analyzed within 48 hours by means of a very complex testing program. The chances are 1 in 20,000 that a suitable donor will be found for Kelly. Her father notes, however, that Kelly's chances are improved due to the support that the residents of the St. Clairsville community have shown during the drive.

Mr. Speaker, it is my distinct privilege and honor to ask my colleagues to join with me in acclamation of both the residents of St. Clairsville and the Dolan family for their efforts in this very important step in Kelly's recovery.

FRIENDS NOT SURPRISED GRANDDAD GAVE HIS LIFE TO RESCUE CHILDREN

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BURTON of Indiana. Mr. Speaker, I read the enclosed article in the paper recently and thought it would serve as an inspiration to my colleagues and anyone else who reads the CONGRESSIONAL RECORD.

This was certainly an extraordinary man, who really cared about his grandchildren.

Greater love hath no man than this that he laid down his life for his friends. I would have liked to have known this gentleman. He must have been a wonderful guy.

FRIENDS NOT SURPRISED GRANDDAD GAVE HIS LIFE TO RESCUE CHILDREN

(By Richard Seven)

SEATTLE.—Wayne A. Dean of Snohomish, Wash., thought the world of his grandchildren, so much so that he wouldn't have hesitated at taking on 7-foot-high breakers three times to rescue them, friends say.

Dean, 56, is missing and presumed drowned after trying to rescue six children, at least five of whom were his grandchildren, off the southern Washington coast of the Pacific Ocean. The U.S. Coast Guard in Astoria, Ore., ended its search for Dean near Cape Disappointment and south of Long Beach, Wash., on Friday.

Dean swam 100 yards out into the choppy ocean three times before disappearing Thursday night.

"Mr. Dean made three trips, bringing two children back with him on each of his first two trips," said Coast Guard spokesperson Sandy Calhoun. "On the third attempt, the last two children were able to make it to shore on their own, but Mr. Dean disappeared."

The Coast Guard search was curtailed because of darkness shortly after it was started Thursday night, and there was no trace of Dean the next morning.

Authorities say the six children, ranging in age from 8 to 13, were apparently wading off Benson Beach when they were dragged out by heavy undertow and high waves.

Last Christmas, Dean and his wife, Virginia, sent portraits of themselves and their grandchildren to friends. The photo was taken on the beach near the site of last week's accident.

Darlene Huntington, a friend, said it seemed the couple always had their grandchildren with them.

"Knowing Wayne and how much he loved his grandchildren, I know he never gave rescuing them a second thought," said Huntington. "They really loved them and he was a very caring person."

The Deans tended Snohomish city parks for three years, living for a while in a city-owned house. They became popular at City Hall.

"Mr. Dean and his wife are just great people, salt of the earth," said Snohomish community development director Mike Beardslee.

The Deans quit taking care of the parks two years ago when he began selling houses. He also joined the Snohomish Historical Society, where Virginia served as a board member and he was a regular fixture at work parties.

"Always the first there and the last to leave," said Huntington.

A TRIBUTE TO NUREMBERG, PA

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. YATRON. Mr. Speaker, I rise today to pay tribute to the town of Nuremberg, PA, which was established 150 years ago. This month marks the sesquicentennial of the first settlement and establishment of a genuine Pennsylvania town called Seiwellsville. It was settled primarily by pioneers of German descent, and the town was surrounded by forests. In its early days, Seiwellsville was the epitome of a young and vibrant American community, characterized by freedom of religious thought and dreams of prosperity for all who chose to settle there. The town of Seiwellsville was first renamed New London, and its name was later changed to Nuremberg.

I take pride in recognizing the 150th anniversary of the town of Nuremberg. It symbolizes the type of northeastern American town that was settled primarily as a farm town and eventually diversified with the establishment of small businesses. The residents of Nuremberg embraced the attributes and qualities of true American life, and they revelled in their liberty to pursue any goal they wished. Freedom of religion was witnessed by the establishment of churches of many different denominations. Education for all ages was provided through the careful establishment of schools. And the business community matured along with the town when banks, bakeries and blacksmiths started to set up shop in town.

Today, Nuremberg remains a beautiful and exciting town, and the citizens' civic pride is evidenced by their commitment to preserving the town in all of its historic splendor. Therefore, as the community of Nuremberg comes together to celebrate their town's sesquicentennial this month, I ask my colleagues here in the House of Representatives to join me in extending my best wishes to them for a happy celebration and a very prosperous future.

STARK WAS RIGHT AND RIGHT

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CLAY. Mr. Speaker, our colleague FORTNEY PETE STARK, of California, was right in both instances involving the Secretary of Health and Human Services Louis Sullivan. Mr. STARK was correct in his public apology on the floor of this House to Secretary Sullivan for his intemperate remark about race. The race of the Secretary is not the issue and Mr. STARK sincerely regretted the unfortunate inference.

Mr. Speaker, the issue is the quality of health care for the poor, of whom a disproportionate number happen to be black. On this issue Mr. STARK is imminently correct in this criticism of the Secretary of Health and Human Services. It is not some random coincidence that poor and black people just happen to lack adequate, quality health care. These citizens are victimized by insensitive, callous Government policies and Secretary Sullivan is defending these policies.

Mr. Speaker, Secretary Sullivan is a personal friend of mine, but I still feel obligated to disagree with his professional positions regarding the health care of impoverished American citizens. Specifically, his opposition to universal health insurance, which is based on the economic theory that the market place will resolve our health care delivery problem, poses a great problem for me. Almost 40 million poor Americans—most of them dependents of persons who work full time, and disproportionate number of whom are black and Hispanic—have no access to adequate health care service. The plight of these 40 million Americans does not bode well for the free market theory. These individuals live in pain longer and die earlier than those who can afford health treatment. The free market policy that Secretary Sullivan supports is not reaching these 40 million Americans. How can we be silent when millions of our brothers and sisters are suffering this deprivation.

Mr. Speaker, I also disagree with the Secretary's public position regarding a national policy of family and medical leave. His insistence that such a policy would be counterproductive inasmuch as it would make American companies less competitive with foreign companies, and force jobs to move overseas, is not supported by the facts. This same argument is repeatedly used by ultra-conservatives in opposition to every effort to improve the benefits of American workers. This argument is seriously flawed. Already, more than 100 countries have national family leave policies that far exceed the benefits stipulated in the Family and Medical Leave Act which President Bush vetoed. Japan and Germany, our major trade competitors, guarantee at least 3 months of paid family leave. U.S. businesses would not be disadvantaged by a family leave law. Mr. Speaker, I would think that the Secretary of the Department of Health and Human Services should be sensitive to the stress problems created when a worker must choose between a job and taking family leave to be present with a newborn child or a dying parent.

Mr. Speaker, I was appalled that six or seven Members on the other side of the aisle took to this well and attacked Mr. STARK in such a questionable manner. Each of them expressed indignation about a racial statement and each proceeded to vote against the Civil Rights Restoration Act which we passed today. Apparently, some Members are more indignant about a racial but not racist remark, than they are about protecting the basic civil and human rights of Secretary Sullivan and his fellow black citizens.

Mr. Speaker, I hope that Dr. Sullivan will expand his one dimensional program regarding medical care for minorities. I am afraid that the perception so far is that if blacks and other minorities just stopped smoking, all their health problems would blow away.

DARE PROGRAM—PROVEN EFFECTIVE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MICHEL. Mr. Speaker, The Drug Abuse Resistance Education [DARE] Program, established in 1987, has taught children the mechanisms necessary to say no to drugs. The DARE Program, now taught in 49 States and overseas, has a strong record of success. This year this program will reach an estimated 4.5 million students. The positive aspects of this program are illustrated in a letter I received from Bob Carlson, an eighth-grader in my district, which I would like to share with my colleagues:

"I am an eighth grader at Blessed Sacrament School in Morton, Illinois, which is just southwest of Peoria. In Sixth grade I had participated in the D.A.R.E. program and will be participating in it again this year.

I feel this is an extraordinary program. It teaches kids the consequences of drugs and also helps kids build their self-esteem. One of the best things it does, is that it tells kids how to say NO.

I think this is one of the best drug education programs around. I feel this would heavily decrease the drug problems over the years. I think D.A.R.E. should be a nationwide drug program."

THE TRUTH-IN-BUDGETING REFORM ACT OF 1990

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CONYERS. Mr. Speaker, yesterday, I introduced H.R. 5437, the Truth-In-Budgeting-Reform Act of 1990. This bill is a comprehensive proposal designed to restore truth-in-budgeting through a number of enforcement mechanisms and changes to existing law. It is a synthesis of the major Democratic proposals that have been introduced in the House to date, and is the product of thorough deliberations with other Members who have shown a continued interest in budget reform.

The Truth-In-Budgeting Reform Act of 1990 is being introduced after the Committee on Government Operations, which I chair, held two hearings earlier this session on major budget process reform legislative proposals that received substantial attention inside and outside of Congress.

Specifically, the Social Security trust funds, now part of G-R-H calculations, would be removed under my bill. As long as the trust funds are included in the deficit calculation, the magnitude of the Federal deficit is hidden from the public and incentives to reduce the deficit decreased. In conjunction with this provision, the proposed legislation would protect Social Security benefits so that any proposed change in benefits or in revenue would require a super-majority of the Senate.

Another major provision of the bill revises the current G-R-H sequestration formula through 1993, whereupon it would lapse. Fifty percent of required deficit reduction is achieves by sequestering equal amounts of defense and nondefense spending using the existing G-R-H formula. The remaining 50 percent would come through creating an explicit 33-percent-tax bracket, and a higher bracket if necessary, which would increase the taxes of the 700,000 wealthiest Americans. This is only fair, since according to Congressional Budget Office data, the income of the top 1 percent of Americans—measured in 1990 dollars— increased 87.5 percent, from $213,675 in 1980 to $399,697 in 1990. In contrast, the poorest Americans experienced a 5.3 percent decline in their income from $7,357 in 1980 to $6,973 in 1990.

Under the bill G-R-H deficit targets would be replaced with specific deficit reduction amounts of $30 billion in the first year and $40 billion in subsequent years of the 5-year plan. This is the most reasonable approach to deficit reduction because it ensures an orderly fiscal policy that will not disrupt the economy. By requiring deficit reduction targets for 5 years, rather than for 1 year under G-R-H, we would be able to eliminate some of the gimmicks such as asset sales and timing shifts that have occurred in the past. Violations of these targets would result in points or order rather than sequestration.

Important truth-in-budgeting measures are also included in the bill. The current congressional budget timetable would be revised to insure timely consideration of the budget. The current timetable often produces a backlog of legislative activity at the end of the session, making the budget the central focus of our legislative calendar. Budget enforcement and reconciliation would be strengthened and tightened. The tracking of spending decisions and relating them to budget authority and outlay targets would be tightened to facilitate more accurate scorekeeping.

Finally, the credit budget activities of the Government would be accounted for using more modern accounting techniques to show the real cost of loans, loan guarantees, and Government-sponsored enterprises. These activities, spread throughout the Federal Government, constitute one of the fastest growing areas of the Federal budget. However, despite this growth, the current budget process operates without timely or accurate recognition of their costs.

During the committee hearings, we were able to receive testimony from Members of Congress and experts on fiscal policy and buget process reform, which led to the tailoring of a bill that provides for a budget process which will allow us to manage our affairs more honestly and fairly. The hearings also revealed that our budget process was in need of serious reform, and that the public strongly endorses a program that will enable the Congress and the President to better manage the ballooning deficits created in the 1980's.

I believe that we need to have a bill in place that recognizes the relationship of the major truth-in-budgeting reform measures to solving our fiscal problems. I believe the Truth-in-Budgeting Reform Act of 1990 is such a measure.

I know you share my concern that large Federal deficits are undermining our economy, damaging our international competitiveness and seriously restricting our ability to improve the standard of living of all Americans, particularly those most in need. For the past 5 years we have operated under the G-R-H automatic deficit reduction mechanism. G-R-H has been woefully inadequate at reducing the deficit. When the Social Security trust fund surpluses are excluded from the deficit calculation, the deficit virtually has remained the same; it was $221.6 billion in 1985 and is estimated to be $221.2 billion in 1991.

These deficits largely were the result of sharp reductions in taxes for the wealthy, at the expense of low- and middle-income Americans, and accelerated military spending. We need to address our fiscal problems through a combination of fair and equitable taxes and military spending reductions which take advantage of the end of the cold war. But we also need to reform the budget process to restore honesty and discipline. Clearly, a better process is needed, and the Truth-in-Budgeting Reform Act is a comprehensive measure to accomplish that goal.

DUTY RATE APPLICABLE TO CANNED CORNED MUTTON

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SHUMWAY. Mr. Speaker, today I am introducing legislation which amends the Omnibus Trade and Competitiveness Act of 1988 to reconvert the duty rate applicable to canned corned mutton that was unintentionally increased from free to 10 percent ad valorem in the conversion from the tariff schedules of the United States on January 1, 1989. The Omnibus Trade and Competitiveness Act of 1988 instituted the harmonized tariff schedule into law such that only an act of Congress will rectify the current unfair duty treatment of canned corned mutton. My legislation is a simple, straightforward bill to reinstate the duty free status of tinned corned mutton that was previously in place before the conversion to the harmonized tariff schedule of the United States.

I became aware of the difficulties that this inadvertent increase in the duty rate has caused to both consumers and distributors of the product through constituents in my district. Prior to the conversion, suppliers were able to market their tinned mutton at approximately $1.89 to $1.99 per can. Today, however, they are obliged to charge up to $2.99 per tin. This kind of price increase has reduced sales substantially, thereby placing significant stress on these distributors.

This conversion is especially harmful to consumers. In northern California, those who purchase this mutton are predominantly Fiji Indians and Muslim immigrants wishing to continue their traditional dietary habits and religious practices in their new American homes. To compound the problem, there are very few distributors who import this type of mutton from New Zealand, which may be the only supplier of this product for these ethnic Americans.

In my efforts to resolve this penalty on tinned corned mutton, I have contacted the Commissions of Customs as well as the chairman of the U.S. International Trade Commission who have indicated that the increase was indeed unintentional.

Mr. Speaker, while this legislation is essentially an administrative correction of an unintended error in the harmonized tariff schedules, this measure reaffirms a central principle upon which this Nation was created. Freedom to practice one's religious faith without fear of persecution or discrimination. As I indicated earlier, the aforementioned imported product is used for religious purposes. While this duty conversion appears to be a minor oversight, it does, in fact, constitute U.S. Government discrimination against these ethnic populations by charging an additional financial burden on a product used in the obervance of their cultural and religious traditions. However subtle, this discrimination must be ceased. Therefore, Mr. Speaker, I submit that if the Congress is to continue to be the guarantor of religious freedom, it is not our prerogative, but rather our obligation to see that this legislation be

enacted as soon as possible. I strongly urge my colleagues to support this legislation and see to its swift enactment.

VISIT TO NATION'S CAPITAL BY TOTAL EXPERIENCE GOSPEL CHOIR OF SEATTLE, WA

HON. JAMES A. McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. McDERMOTT. Mr. Speaker, I rise in welcome of the Total Experience Gospel Choir of Seattle, WA, on the occasion of its visit to our Nation's Capital on August 20–31, 1990, and in recognition of all the people who have spent countless hours nurturing its growth.

Over the years, the choir has prospered under the able leadership of Ms. Patrinell Wright, founder and director. Much to her credit, the choir celebrates its 16th anniversary on Sunday, October 28, 1990. We in Seattle take pride in the fact that the choir is hailed as one of the finest musical groups in the Pacific Northwest.

Among its many accomplishments, the choir has recorded three albums, performed at numerous interdenominational churches, county fairs, and penal institutions. As goodwill ambassadors, the choir has toured and held concerts in 32 States, Canada, Mexico, the Bahamas, and Nicaragua. Most recently, the choir was designated the official choir of the 1990 Goodwill Games in Seattle. It is currently raising funds to travel to Africa next summer.

But even more important, the choir, which consists of 40 young people—ages 5 to 19—is to be commended for its commitment to excellence and for giving joy to so many others. It is a shining example of how young people dedicated to their faith and to sharing their talent can improve their lives, the lives of their families and friends, and the spirit of their community.

It is the good fortune of the Washington, DC, area that the Total Experience Gospel Choir will be performing in full concert on Sunday, August 26, 1990, at 3 p.m., at the Mount Carmel Baptist Church, 901 3d Street NW., Washington, DC. Everyone is invited to come out and enjoy an afternoon of good music. As one of the many thousands who has enjoyed hearing the Total Experience Gospel Choir, I can vouch for its moving and heartfelt performance.

In conclusion, I ask my colleagues to join me in welcoming the choir to our Nation's Capital and in extending congratulations and best wishes to all who have strived to make the Total Experience Gospel Choir the total success that it is today.

LEGISLATION TO SIMPLIFY TAX PROCESS

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FLIPPO. Mr. Speaker, I rise today to introduce legislation that would modify an onerous provision of the Tax Code that has increased the complexity and cost of compliance for thousands of small- and medium-sized businesses and their tax advisers.

I am pleased to be joined in this effort to simplify the tax process by my good friend, the distinguished representative from Colorado, HANK BROWN.

The Tax Reform Act of 1986 [TRA '86] imposed a requirement that partnerships, S corporations, and personal service corporations adopt, in general, a calendar year for tax purposes. As a result of public outcry concerning the difficulties created by this requirement, the Revenue Act of 1987 modified TRA '86 with the creation of section 444 which allowed retention or adoption of a fiscal year by partnerships, S corporations, and personal service corporations if certain annual requirements were met. Section 444 provided a mechanism for relief. However, time has demonstrated that the original rules are overly restrictive and need modification.

The increased complexity of TRA '86 has resulted in more time being devoted by taxpayers and their advisers to both planning and preparation of individual and small business tax returns. This increased workload has been further compounded by many taxpayers having switched from fiscal years to calendar years. More tax planning and preparation must now be done in a shorter period of time.

A nationwide survey conducted by a national organization of certified public accountants indicates that there has been a 20-percent increase in accountants' workload during the period January 1 to April 30 with a corresponding decrease during the remainder of the year. This has historically been a heavy workload period, but it has now become unacceptably heavy for taxpayers and their advisers.

Automatic extensions are available for many returns which provides minimal relief to small business taxpayers and advisers. However, extensions are costly and inconvenient. The tax liability must still be computed with great accuracy by the original due date. Further, it makes it difficult to obtain the information necessary to estimate the tax liability of owners in order for them to apply for an extension.

This workload compression problem is not limited to tax work. It has become an even greater problem with accounting and auditing work. Owners and creditors typically demand financial statements and audit reports within 90 days after year end. Now this work must also be done between January 1 and April 15.

On average, only about 20 percent of small businesses which were on a fiscal year prior to TRA '86 remains on a section 444 fiscal year as of December 31, 1989.

The administration of the tax system is also damaged by the resulting uneven workload experienced by the Internal Revenue Service. This is inconsistent with past congressional and other recommendations to stagger return filing to alleviate heavy workload that has precipitated IRS processing problems in recent years. The IRS, taxpayers, and tax practitioners can better meet filing requirements if the demands are spread throughout the year.

With the enactment of the section 444 fiscal year retention rules, Congress acknowledged that there are legitimate business reasons for allowing fiscal years. Fiscal years are ordinarily chosen to coincide with the "natural business year" of the taxpayer. The yearend conformity requirement of TRA '86 unduly interfered with business operations, and the fiscal year retention rules of TRA '87 did not go far enough in remedying the problem.

The legislation I am introducing today modifies a portion of the rules for fiscal year retention in a way which addresses the continuing problems in this area without sacrificing revenue. The general rules of sections 444, 7519, and 280H would remain relatively unchanged. The proposed legislation would reopen the election process to allow existing entities to either elect, reelect, or modify an existing election for a fiscal year. The Secretary of the Treasury would prescribe rules consistent with current IRS practices for the frequency of changes and limitations on the utilization of any resulting net operating losses.

In addition, no restriction would be imposed on the length of the deferral period. Entities would be allowed to elect a fiscal year which ends in any month. The proposed legislation would also make minor technical corrections and administrative changes which will make the provision fairer and more administrable.

This corrective legislation is intended to be revenue neutral. Preliminary data received from the IRS indicates that the required payments collected from the entities which elected section 444 fiscal years may actually exceed the 1986 revenue estimate. It is anticipated that the proposed changes to the laws will sustain the anticipated revenue levels. A revenue estimate on the proposal to confirm this neutrality has been requested. If necessary, the required payment made by taxpayers retaining a fiscal year under section 444 could be adjusted to meet revenue shortfalls.

The proposed legislation addresses serious problems being encountered by small businesses and their tax advisors; it offers taxpayers greater flexibility and fairness; it adds to the administrability of the tax system; and, it meets anticipated revenues in this difficult time of budget constraints. Mr. Speaker, I urge my colleagues to cosponsor and support this bill.

DAN SCHUEFTAN ON IRAQ WAR

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FEIGHAN. Mr. Speaker, Dan Schueftan, a research fellow at the Harry S. Truman Institute of the Hebrew University of Jerusalem, has written a penetrating analysis of the crisis surrounding the Iraqi invasion of Kuwait. It ap-

peared in the August 3 Washington Jewish Week. I commend it to my colleagues.

[From the Washington Jewish Week, Aug. 3, 1990]

BAGHDAD GOES FOR THE JUGULAR

(By Dan Schueften)

Iraqi President Saddam Hussein is looking beyond Kuwait. The crisis that erupted last week in the Persian Gulf is part of a far more significant phenomenon that already has greatly changed the inter-Arab system and has the potential—if not checked in time—to transform the regional balance of power in the Middle East.

For millenia empires based in Mesopatamia competed with those in the Nile Valley for regional hegemony. In modern times Egypt and Iraq have pursued this same competition.

In the mid-1950s, Egyptian leader Gamal Abdel Nasser's messianic movement captured the imagination of Arabs everywhere, while Iraq entered a long period of political instability and could not challenge Egypt's position.

Iraq's domestic weakness proved to be so deep-rooted that even when Nasser was humiliated by Israel in the 1967 Six Day War and finally died in 1970, Iraq could not achieve leadership over the Arab world.

Hussein has tried to deal with these weakness primarily by providing Iraq with relative political stability. He achieved that by his inimitable ruthlessness, which stands out even in Iraq's brutal tradition. His totalitarian control over the country has spanned the last two decades. From his position of absolute control in Baghdad, he has attempted to establish Iraqi hegemony over the Gulf, and subsequently over the region as a whole, relying heavily on his country's oil reserves and the billions they have brought in since the oil crises in the 1970s.

Hussein found a golden opportunity to strengthen his hold over the inter-Arab system in the late 1970s, when the late Egyptian president Anwar Sadat's peace initiative removed Egypt, for a decade, from its unquestioned position of leadership of the Arab world.

The major setback to Hussein's master plan came in 1980, when his consuming ambition led him to attack Iran, believing that the Khomeini revolution had so weakened his mighty neighbour that it was easy prey for the Iraqi army.

Eight years of savage war, hundreds of thousands of Iraqi casualties, tens of billions of wasted dollars, and immeasurable suffering inflicted on his people proved not only the failure of the Iraqi military initiative; they also illustrated the determination of Hussein and the extent of the domestic terror that has kept him in power.

When Iran eventually proved less able than Iraq to take the punishment of the war, Hussein claimed victory and renewed his quest for regional hegemony. In a way, he really did emerge victorious. His major enemy has been attrition. Saddam does not mind the enormous casualties and suffering; the oil-rich states paid most of the economic price, and Iraq came out of the war with a huge, well-equipped and experienced army.

With this army, and his well-deserved reputation for ruthlessness and brutality, Hussein can dictate his terms—at least for a while—and he says so in so many words.

Unlike other Arab states and national movements that depend on Western sympathy and support, Iraq does not pretend to have adopted and internalized Western values and codes of conduct. Hussein does not pretend to seek "peace," to be committed to "human rights," to preach, "the right of self-determination," to foster "democracy" or pursue "pluralism."

He wants to dominate, threatens to burn anybody who stands in his way, demonstrates his brutality by massive murder of his own civilians with poison gas, and claims his right to equate "scientific and technological progress" with his quest for instruments of mass destruction.

The Iraqi dictator's message is simple: Iraq is strong and ruthless—and determined to impose its domination on the Gulf and beyond. It will force its rich and weak neighbours to finance its quest for regional control and dictate the crucial aspects of their oil and foreign policies. The other Arab states or outside powers can do very little about it; and to secure their interests in the Gulf, they will have to deal with Iraq on Hussein's terms.

The new "rules of the game" that he seeks to impose, represent not only a change in Baghdad's policy, but also reflect the new balance of power in the area. It is a major challenge to the trend that developed in the Middle East after the death of the Nasser and the failure of his messianic movement.

Nasser had captured the imagination of the Arabs (and people in the Third World in general) when he forced his will on the Western powers as well as the "reactionary" Arab regimes and boosted Egypt from a negligible position to major significance on the world scene.

Nasser's spectacular successes in the 1950s lingered into the '60s. His eventual failure taught Egypt and the other Arabs a lesson about the limitations and the dangers of such radical policies. Sadat reflected that lesson in the '70s when he went to Washington and finally came to Jerusalem. The Arab world proved that it understood these same lessons and acquiesced when they "came back" to Egypt in the second half of the '80s.

For a while, when he was mired in his war with Iran, even Hussein pretended to accept this. Now, he feels he no longer needs to pretend and that his opponents in the region and beyond don't have the power or the determination to stand in his way.

If Hussein succeeds and convinces the Arabs that his way may prevail, the implications may be far-reaching and the Middle East may be drawn into protracted turmoil.

Arab acceptance of "the Egyptian school," based on the bitter lessons of Nasser's failure, provided the area with a period of relative stability and tranquility. It also produced the Egyptian-Israeli peace treaty, and the slow-but-constant move towards settlement between Israel and the other Arab states—as well as the awareness among many Palestinians that such a settlement is inevitable.

If Hussein's policy pays off in a major way, the region may plunge into violent inter-Arab and Arab-Israeli confrontations, and we may again face a major economic crisis on a global scale that will adversely affect the industrial nations and bring calamity to Third World nations.

The danger is that the Middle East will again resemble a crime-ridden neighborhood, where Saddam Hussein runs a protection racket, making the regional nations "offers they cannot refuse."

On the international level, there is, unfortunately, no equivalent of a determined and clean-handed police force to nip this in the bud.

The only hope is a concerted effort led by the U.S. and Egypt, with Cairo providing regional leadership to the Arab states that stand to lose the most from Hussein's success, and the U.S. providing superpower backing to Egypt's efforts, as well as direct encouragement to the individual Arab states.

Israel, which stands to lose the chance of relaxation of its conflict with the Arabs, could contribute its share not only through military deterrence against an Iraqi-led war coalition; it should also consider its relations with Egypt and the U.S. beyond the bilateral level and in the broader context of the Iraqi challenge; since that challenge can only be met through efforts originating in Washington and Cairo.

TOUGALOO COLLEGE

HON. MIKE PARKER

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PARKER. Mr. Speaker, I rise today with hope to better ourselves by investing in our children. Today, I have introduced a bill to authorize financial assistance for the construction of a building at Tougaloo College of Jackson, MS. It is representative of the value we should all realize as No. 1—education. Financial assistance in education is imperative to all of us as Americans. This bill would not only do justice to students attending Tougaloo but to all of us in sending a message that education in America is our No. 1 priority.

Recognized by U.S. News & World Report in their highlight of America's "Best Colleges," Tougaloo ranked in the Nation's top 125 as one of the best regional liberal-arts colleges. Tougaloo also shines in its track record of faculty and student success. Forty-seven percent of Tougaloo's faculty hold Ph.D's. For its contribution back into the community, Tougaloo produces 40 percent of Mississippi's black physicians, 50 percent of its black attorneys, and 28 percent of its black dentists. Now, in its second century, Tougaloo is still a place "where history meets the future." The passing of this bill will make possible the preservation of this tradition.

This bill would follow through on pursuing even further excellence in education by providing financial assistance to pay the cost of constructing the Health and Human Resources Center. This center would house academic, community service, and physical education instructional programs. It would also be the home of the college's new program in community health education. A progressive step in the construction of this building is in its inclusion of a community day care center and other facilities suitable for use by neighborhood groups for community activities. With this bill, the surrounding community as well as the educational community will benefit.

This bill is an investment in our future. Education in America is a priority and I, as a representative of Mississippi, stand with pride in introducing this bill that sets that example.

RADIOACTIVE WASTE DISPOSAL LEGISLATION IS INTRODUCED

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. COLEMAN of Texas. Mr. Speaker, today Representatives TIM JOHNSON of South Dakota, DAVID O'B MARTIN of New York, JOHN BRYANT of Texas, and I are introducing legislation to protect the interests of certain areas likely to be affected by the establishment of low-level radioactive waste disposal facilities. In our bill we have included the interest of nations with adjacent borders to the United States, habitats of endangered species, wetlands, and archeologically important areas.

Congressional involvement on the subject of low-level radioactive waste disposal ended with legislation adopted in 1982 which directed States to provide for the disposal of low-level radioactive waste generated within their borders. The law also authorized and encouraged States to enter into compacts for the disposal of low-level waste generated within their borders. This landmark legislation was an important first step in dealing with the safe management and disposal of radioactive waste. However, when Congress granted this jurisdiction exclusively to the individual States, we do not believe the Federal Government intended to avoid responsibility when the issue is in a border State and concerns another country or when an environmentally sensitive or historically important area is involved.

In the State of Texas the process of selecting a site within the State's border has taken on a direction that I am sure Congress did not anticipate in 1982. The Texas Legislature provided for waste disposal within its borders by establishing the Texas Low-Level Radioactive Waste Disposal Authority in 1981, commonly known as the authority. This authority was commissioned to select, prepare, construct, operate, maintain, decommission, close, and finance a disposal site for Texas low-level waste.

Subsequent to creating the authority, the Texas Legislature directed it to focus its siting on lands that were State owned. In fact, in determining acceptable dumpsites, the authority was ordered to give preference to publicly owned land. The adoption of this 1985 provision by the Texas Legislature was made along regional lines, and virtually guaranteed the eventual placement of the site somewhere on sparsely populated public land found in west Texas despite the fact that more geologically suitable sites may exist on privately owned land in east Texas. This directive resulted in the consideration of three separate tracts of land in Hudspeth County, a county of 2,500 residents, one of these tracts now being the leading candidate under consideration by the authority.

The site under primary consideration is located near Fort Hancock, TX, and is approximately 11 miles from the Rio Grande. In the State of Texas, this river serves not only as the international border between the United States and Mexico and is also used by thousands of people on both sides of the Rio Grande for irrigation, drinking, and domestic consumption and livestock water. The site is also in close proximity to El Paso, TX, the largest population center on the United States-Mexico border. The potential for ground water contamination from a leakage at the facility and the eventual seepage of this ground water into the Rio Grande certainly could pose a problem for the 13 counties downstream from El Paso which also depend on water from the Rio Grande.

The risk of failure is great because part of the radioactive wastes will have an active life of 350 years or more. No one can be sure of the changes that will occur over the next 350 or more years. In the case under consideration, the site proposed on the Rio Grande is in an area which has been subject to earthquakes and to destructive erosion by the torrential rains which occur there.

The decision on the part of the State of Texas to locate the dump site near the United States-Mexico border is inappropriate. The proposed site violates our national interests because it ignores a 1983 Agreement on Cooperation for the Protection and Improvement of the Environment in the Border Area with the Republic of Mexico. This executive agreement declared that an area of 60 miles on both sides of the border between the two countries should be an environmentally protected zone.

The proposed site in Hudspeth County, TX, and the dumping of low-level radioactive materials in our area would threaten not only our country's relationship with Mexico, but also two international aquifers, the Rio Grande River, the Guadalupe Mountains National Park, Lincoln National Forest, Big Bend National Park, and a wildlife sanctuary being operated near the Rio Grande. Further, the Fish and Wildlife Service has mapped the area and determined that there are two wetland areas near the proposed dump site. Finally, parts of the area have recently been listed in the National Register of Historic Places because of the recent discovery of 22 prehistoric examples of rock art near the proposed site. It is believed that the land was sacred to people who lived there 900 to 2,000 years ago and that it may be an ancient burial and hunting ground for Indians.

It is our contention that stored low-level radioactive waste is the business of all people whose environment is affected by it and, further, that it is the responsibility of the Federal Government to ensure the safety of those involved. The bill we are introducing today honors our environmental agreement with Mexico by prohibiting the location of radioactive dump sites within 60 miles of the United States-Mexico border. It also protects the habitats of endangered species, wetland areas, and archaeologically significant areas.

We look forward to working with our colleagues in the appropriate committees in considering this legislation.

THE COURAGE OF OUR CONVICTIONS

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GUNDERSON. Mr. Speaker, today the House of Representatives will add a new chapter to our civil rights laws. And we will do so enthusiastically, in the belief that no man, no woman, should ever be denied opportunity based on race, gender, or beliefs. But in passing the Civil Rights Act of 1990, we must not be content just to vote for a title. It is incumbent upon each of us today to understand the issues confronting us and base our decisions on firm conviction in what is morally right.

Unfortunately, for many Members that will be difficult. Why? Simply because they have been made to feel that opposition to H.R. 4000, the Kennedy-Hawkins bill, indicates opposition to full civil rights. To those Members I say, look to your own conscience and the choice will be clear.

President Johnson, in his 1965 inaugural speech said:

> Justice requires us to remember that when any citizen denies his fellow, saying "his color is not mine" or "his beliefs are strange and different", in that moment he betrays America, though his forbearers created this nation.

We are united in our goal today—to further strengthen our civil rights laws. But we are divided over how best to achieve that goal. Too much thoughtless rhetoric has been used over the months as competing bills on this issue were drafted. It is time to lay down the rhetoric and to honestly deal with the important issues.

Let us be clear, Americans want equal opportunity. But they do not want quotas. Americans want fairness, but they do not want endless litigation. And Americans want justice, they do not want a system where lawyers fight for hugh financial damages. H.R. 4000, the Kennedy-Hawkins bill, does not address these needs. Rather, it violates each and every one of them by guaranteeing a system of quotas, of litigation explosion, and of opportunity only for plaintiff attorneys.

Concerned over the true implications of H.R. 4000, I joined other Members of this body who spent hundreds of hours crafting a bipartisan alternative. We were guided by one motive; to do what is right. We feel strongly that our bill is right on every point and challenge proponents of the Kennedy-Hawkins bill to compare H.R. 4000 to the compromise bill.

H.R. 4000 and our substitute both overturn the five objectionable Supreme Court decisions. The most important of those Wards Cove which required plaintiffs alleging an employer's employment practices lead to disparate treatment of minorities to identify specific practices causing the discrimination. H.R. 4000 overhauls the Court ruling to place the burden of proof on the defendant and to eliminate that requirement. Under the bill, employers would face an impossible task of proving every single business practice in question was justified as a business necessity, defined as

bearing a significant relationship to job performance.

The compromise bill would maintain the burden of proof shift—and therefore overturn the ruling—by requiring employers to justify identified employment practices as a business necessity, defined as having a manifest relationship to the employment in question. This change in definition simply restores the very Griggs standard Kennedy-Hawkins proponents have insisted they want to restore. It does not lower the standard held by the courts on this issue prior to Wards Cove. Any statement to the contrary is false, period.

In a spirit of fairness to employers and employees alike, the substitute includes language stating that the simple existence of a statistical imbalance in an employer's work force is not alone sufficient to establish disparate impact. H.R. 4000 leaves such assurances out, allowing discrimination charges to be brought to any business whose racial makeup did not precisely reflect the racial makeup of the surrounding community. Under this system, employers would be forced to consider race as a primary factor in hiring and promoting employees. If they did not, they would face discrimination charges, and under the bill, jury trials and punitive and compensatory damage awards.

This leads to the other most objectionable aspect of the Kennedy-Hawkins approach—the irresponsible focus on outlandish remedies. Under the bill, remedies for discrimination under title VII would be expanded beyond reinstatement and back pay to include punitive and compensatory damages in cases of international discrimination. For cases of malice or callous indifference leading to discrimination, punitive damages would be allowed for the first time. These provisions are made far more dangerous by the addition of jury trials at the request of plaintiffs. This simply means the focus of our longstanding title VII protections will be completely altered from getting victims back to work with protections to forcing them into a risky lottery system.

Unfortunately, under this "Wheel of Fortune" system, victims will cerainly be denied swift justice as the courts would be further clogged by a litigation explosion of fortune-seeking lawyers. A Federal court study estimate stated courts would see an increase in cases filed by 30 percent. Cases filed before the EEOC would also increase by 30 percent.

In further bonanza for lawyers under the Kennedy-Hawkins plan, lawyers reimbursements would be guaranteed in many areas where they are not under current law. Incredibly, proponents of the bill have gone so far as to prevent victims from accepting settlements if their attorneys complain to the court that they have had to waive any part of their fees. Who are we trying to help in this legislation?

Where our first priority in this debate should be to defer to our own moral standards, those pushing H.R. 4000 have also deferred to the best interests of trial lawyers. Without inpugning the intent of House Democrats on this issue—as I stated, we all share the goal of strengthening civil rights—the American public must wonder why proponents of the bill would support such ridiculous sweetheart deals for lawyers in their bill. Does it represent another pathetic example of letting PAC's and interest groups drive the process?

PAC contributions from the trial lawyers alone—those who would benefit greatest from these provisions—have gone 7 to 1 in favor of Democrats over Republicans. Is it a coincidence that united efforts by Republicans on the Education and Labor Committee—who received a total of $17,500 from the "Trial Lawyers PAC" last year—to eliminate these provisions were opposed in united efforts by the Democrats—who received a total of $38,850? There is no justification at all for what we are giving away to lawyers under this bill. It is not right, and we should not be ashamed to say so.

By comparison, the bipartisan substitute completely eliminates the increases for lawyers. Our focus is solely on the victim, and in equitable relief—getting victims back to work—over litigation and punitive damages. Only the substitute provides for immediate injunctive relief. Only the substitute provides tough coverage under title VII for sexual harassment, providing long-needed protection for women in the workplace.

An honest and careful reading of each of these bills must lead to the conclusion that H.R. 4000, despite the intent of its proponents, goes to far, causes too many new problems, and denies quick justice to those we are trying to help.

Let us have the courage not to vote for a bill simply because it carries "Civil Rights" in its title. Let us do more. Let's stand up, not for huge jury awards, but for immediate relief; not for litigation, but for justice; not for lawyers, but for victims. Let us each take the time to know what is right. And let each of us have the courage to vote our convictions.

PROTECT OUR SOLE SOURCE AQUIFERS

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GALLO. Mr. Speaker, today, I am introducing legislation to protect our Nation's sole source aquifers from potential contamination resulting from the siting of landfills.

We have learned from past experiences that it is easy to pollute our underground sources of safe drinking water and much more difficult to reverse the process of leachate seepage once it has begun to occur.

Most of the Superfund sites in my congressional district involve ground water pollution from a specific source, often a landfill. My bill will prevent future occurrences of this unfortunate pattern by requiring specific actions to certify protection before the fact.

In 1986, we passed the Safe Drinking Water Act amendments creating a national program to identify our sole source aquifers and now it is time to provide protections for these valuable sources of clean water.

My legislation is a significant step toward providing the needed protection by placing the responsibility for prevention with the States under Federal guidance.

The States make most of the decisions that affect ground water protection and the States should be responsible for certifying that projects under their review are safe.

Specifically, my bill would ban the construction of a landfill, surface impoundment, waste pile, or land treatment facility within the aquifier protection area unless the State developed a comprehensive plan for protection of the aquifer.

The plan must include a mapping of the sole source aquifer, an assessment of the relationship between land surface activities and ground water quality, management practices to be implemented in order to prevent the adverse impacts on ground water, and a program for State and local implementation of the plan to ensure the continued protection of the sole source aquifer.

In addition to the creation of a plan and a means to implement this plan, the State must during the development of the plan consult with and consider the comments of concerned individuals.

The State must also conduct public hearings at places within the protection area to provide the opportunity for comment.

My bill will play an important role in protecting sole source aquifers and will provide our Nation with clean drinking water.

IRISH AMERICAN HERITAGE MONTH

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GILMAN. Mr. Speaker, I am pleased to rise in support of House Joint Resolution 482, designating "Irish American Heritage Month." And I commend my colleague from New York [Mr. MANTON] for introducing this resolution.

The Irish, and in particular, the New York Irish have had a proud, rich American history.

However, this year is particularly significant for one group of American Irish. This year, the Irish-American Carmelites celebrate their 100th anniversary of ministering to the poor and the sick in New York.

As you may know, the Carmelite order originated on Mount Carmel in the holy land. After being driven from that land, the Carmelites settled in Ireland in 1271. Centuries later missions were established in New York and Australia to minister to the sick and the poor.

And for 100 years, the Carmelite order in New York has been reaching out to the sick and the poor, regardless of who they might be or what they might believe.

Mr. Speaker, I am particularly proud to note that the Carmelite province of Saint Elias, the Carmelite mission to the United States, is headquartered in my home town of Middletown, NY. Further, the largest Carmelite parish outside of New York City, is located in Tarrytown, NY, which is also within my congressional district.

I am pleased to rise in support of this measure, and I urge my colleagues as well to join in support of this important measure.

IN RECOGNITION OF WILLIAM G. "BILL" SIMPSON OF MISSISSIPPI

HON. MIKE PARKER
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PARKER. Mr. Speaker, today, I stand in the Halls of Congress, in the people's chamber, to speak in honor of a great Mississippian, Bill Simpson.

Bill Simpson was attending the University of Mississippi at the time of the outbreak of World War II. During the war he was graduated as commander of the 1st Battalion from the Merchant Marine Academy in King's Park, NY. He received a commission in the Naval Reserves and saw combat in four major amphibious campaigns while serving on the U.S.S. *Chepachet*.

After the war he returned to his father's family seafood business which he successfully operated until they were destroyed by two hurricanes. Very active in civic affairs, he became the first chairman of the Marine Conservation Commission in 1963 by appointment of the Governor. In the mid-sixties he served as president of the Mississippi State Port in Gulfport, MS. In 1965, he came to the Governor's office by invitation of Gov. Paul B. Johnson where he served as special assistant until the end of Governor Johnson's term.

This record of public service would suffice most people for lifetime, but not Bill Simpson. He was then called to serve as an administrative assistant to the late Senator James O. Eastland in Washington, DC. Senator Eastland became chairman of the Judiciary Committee and President pro tempore of the Senate. Until the Senator's retirement, Mr. Simpson served as Administrative Assistant to the President pro tempore. Upon the Senator's retirement, Mr. Simpson was named by President Jimmy Carter as his Deputy Assistant in the Office of the White House Chief of Staff. At the conclusion of President Carter's term, he went into private business in Washington as a Government affairs consultant.

He continues today in service to the State of Mississippi as a consultant to the State in its Washington endeavors. He is president of Bill Simpson and Associates and vice president of McAden & Simpson, Inc.

Bill Simpson is a family man with two children, one of whom carries on his tradition of public service as a congressional assistant to Congressman MIKE ESPY in the Clarksdale, MS, office.

Every citizen of the State of Mississippi owes Bill Simpson a debt of gratitude for his long and distinguished career of public service. He recently made a speech honoring another great Mississippian which captures the essence of Bill's character. The occasion was the designation of the Education and Research Center of Mississippi as the Paul B. Johnson, Jr. Building.

Mr. Speaker, I am honored to count Bill Simpson as my friend and I respectfully request that his speech be entered into the RECORD as a further tribute to Bill Simpson and to recognize the achievements of former Governor Johnson.

REFLECTIONS BY BILL SIMPSON, FORMER SPECIAL ASSISTANT TO GOVERNOR JOHNSON

Ladies and gentlemen, let me say at the outset that this will not be a cool—detached—dispassionate look at the administration of Governor Johnson or at Paul B. Johnson, Jr. It will, within my very limited talents, be a view from the inside of the battle waged by a gallant, multi-talented, visionary leader to preserve the peace and dignity of the State of Mississippi and to advance her interests, and those of her people during one of the two most perilous periods in all of the long history of this State.

It is not possible for me to speak of Governor Johnson's life, and the service he rendered to his State and nation, without reference to his family, which was so woven into his life, so much a part of the role assigned him by history.

Aside from the love and support given him by his parents and his children, and by the family of the late Pat Johnson, simple honesty leads me to say that his wife, Dot, and his brother, Pat, were towers of strength for him in all of his endeavors.

Dot, that lovely lady, brought grace and charm and style to us along with a quality of judgement and wisdom that made her a contributing partner in the Johnson administration.

I can only describe the bond between Paul and Pat Johnson as a parallel to the acclaimed relationship between President John Kennedy and his brother, Robert, the kind of forever feeling that exists between my brother, Jim, and me.

Let's now go into the Governor's office. Here is the close-knit team that staffed the operation. The competent women whose dedication and hard work made the railroad run were Edith Sims, Adele Mullin, Sue Ivy Turk, Margaret Kern Furlow, Dawn Armistead, and Wrenelle Barr. The men were Senator Kenneth Stewart, Senator Herman Glazier, Senator Frank Barber, and last, and least me. I will always be proud of my association with these truly fine people.

Every frail human who serves as Governor of Mississippi must bear the heavy burden of leading a State which is lacking the financial resources of a California, but which must deal with identical problems. In addition to that burden—Paul Johnson, Jr., was required to meet his mission during days of real and present danger. He also imposed upon himself the task of measuring up to his father, the legendary Governor Paul B. Johnson, Sr.

I assert, this afternoon, that his performance in the presence of those daunting challenges mark him as one of our truly great Governors and places his name very high on the honor roll of the servants of our people.

What was in his mind and in his heart as he journeyed to the State capitol to swear before God and those he was to lead that he would well and faithfully discharge his duties?

During my service in the Navy as the assault at Lingayen Gulf in the Philippines was getting underway one of the men on my ship gave me a description of what was coming. He said: "Mr. Simpson—dying time is here."

When Paul Johnson raised his hand to take his oath of office, I believe a voice from within was telling him: "Paul, testing time is here, again."

To the lasting benefit of every person in this State, the man taking that oath was a hero, in the sense of that noble term that reaches back into ancient history.

In a time of conflict, when a great city was threatened, the following was written of a Roman soldier:

"Then out spake brave Horatius, the captain of the gate

"To every man upon this Earth, death cometh soon or late

"And how can man die better than facing fearful odds

"For the ashes of his fathers and the temples of his Gods?"

The Governor, in the bitter and bloody island fighting across the Pacific Ocean, laid his life on the line to defend what his fathers had built in America. What his generous god had bestowed on our people.

The Roman soldier, to meet his harsh test, told his warriors: "In yon straight path a thousand might well be stopped by 3, now who will stand on either hand and keep the bridge with me?"

Paul Johnson confronted, once more, another test. He led the battle with the invaluable support of the Mississippi Highway Patrol's thin gray line and of courageous local law enforcement officers to keep the bridge for our State and her citizens.

The other image of Paul Johnson that sticks in my mind is the similarity between the Governor in his life and the movie characters portrayed by the famous actor, John Wayne. The Marine leader who did a lot of hard fighting and little talking, the western marshall who not only spoke of the sanctity of the law, but who also never failed to uphold the law, the "Quiet Man" who, without fanfare, unflinchingly looked every crisis in the eye, no matter the personal or political ramifications.

As he became our 54th chief executive, the Governor spoke in the spirit of an expression he loved which tells us "We are not here to curse the darkness. We are here to light a candle."

In his eloquent inaugural address he unhesitatingly faced the future. He said, "We are Americans as well as Mississippians." He went on to take a position he held through every day of his term. He asserted "Hate, or prejudice, or ignorance will not lead Mississippi while I sit in the Governor's chair." He closed with this assurance "If I must fight, it will not be a rear-guard defense of yesteryear, it will be an all-out assault for our share of tomorrow."

He walked into the office his people had entrusted to him and went to work.

When he entered that office he brought with him a deep and abiding love and respect for the law, and an iron commitment to honor the oath he had taken. Paul Johnson was a dedicated enemy of lawlessness in any form.

Further, he was determined to lift the level of life for every Mississippian under his sweeping agriculture, industry, commerce program. And he knew full well that the progress he desired so strongly was attainable only in the atmosphere of absolutely assured peace and order that each of our citizens wanted and deserved.

In the civil rights-related situations that swept across this State, and swirled around us, the Governor's calm and deliberate, brave and firm course of conduct, based on the maintainance of law and order, shielded our people, our communities, and our State. It saved lives, prevented injuries and suffering and avoided destruction of public and private property even as it preserved and enhanced the peace and dignity of Mississippi. Of paramount importance, it allowed his AIC program to bring a multitude of benefits into every section of our State.

It is certainly fitting and proper that this marvelous complex where we meet today, bear his name, because a major part of his vision for Mississippi's passage to brighter tomorrows resides within these walls. Indeed, in his very first appearance before our legislature when he delivered his acclaimed address "The Death of Mediocrity, the Pursuit of Excellence." He set his priorities. His lead-off request included this sentence: "I label now this proposed Mississippi Research and Development Center as the keystone in the arch of balanced development." Should you ever be asked what this "keystone" contributed to development, I offer a single suggestion. Point to the billions of dollars that Litton's "shipyard of the future" has delivered to us.

One of his many accomplishments that I will always hold in my heart, is based on a simple fact. Many young Mississippians, for whatever reason, will either not attend or not graduate from any of our fine institutions of higher learning. And yet, these deserving young women and men are entitled to their piece of the economic pie. The Governor met this need. He placed vocational and technical training in our exemplary junior college system. And, as was his practice, he articulated his deep feeling about this matter in these words "unemployment is an evil, but under-employment is equally evil. When a man works, and strives, and tries, and when his efforts are hobbled by lack of training when he is shackled to a station by lack of skill, this is one of the great tragedies of humanity."

In this field of learning and training, each of us should be grateful to Governors of this State who have dedicated themselves to the great cause of education. Those of us who were privileged to work with Paul Johnson saw, close up, his ceaseless labors in that cause. Please listen as he pleads his case. In January of 1966 he said: "Mississippians can never hope to live as fully or as well as their fellow Americans until our State with the unstinting support of every citizen does whatever is necessary to provide superior educational opportunities. On another occasion he asserted "If there is a one-word answer to all of the evils that keep mankind mired in the mud, that one word is education." In a commencement address he offered this judgment, "Nothing is more important to Mississippi, to the formation of the future of our State and her people than a continuing policy of unwavering support of every facet of education." Action was joined to those words and education was advanced by his administration.

What I must term his crusade for agriculture and forestry included the establishment of the marketing council which very early in its existence received the nationally prestigious "E" award. Were his efforts successful? Here is one example: The Saint Regis Paper Company constructed in Lawrence County what was, at that time, the largest single project ever undertaken by a paper company.

He was a champion of industrial development and he called the A&I board "the backbone and muscle of Mississippi's action program." His requests for increased appropriations for both development and tourism received legislative approval and resulted in record shattering performances in new and expanded industries and the creation of jobs as well as a strong leap forward in tourism.

As we near the end of my story allow me to return to Governor Johnson's reverence for the law.

In this great and proud State, we had a black market tax on liquor. We were collecting a tax on an illegal commodity. Additionally, we had a worrisome and dangerous kind of selective enforcement of the law, wherein lawmen were expected to turn their heads in certain circumstances, which tore at the very fabric of that respect for the law upon which a free society stands. The Governor was, of course, advised that this was an issue packed with political dynamite. He reacted in typical Paul Johnson style. He went to the legislature and the people and spoke of "the shameful, disgraceful, indecent, and scandalous situations that now exist in practically every area of Mississippi * * *." He appealed to the legislature as follows "* * * You as a legislator, and I as Governor, must take positive action in this matter without further delay." The Senate and the House courageously heeded his call and adopted a model alcoholic beverage control act. After the law become operative, Governor Johnson said in a speech with quiet satisfaction: "No longer does the State of Mississippi stand under the dome of her beautiful capitol with her hand behind her back and head bowed in shame."

Another bright page in the memorable saga of the Johnson administration, which relates to his love for the law, was his successful effort to establish the law enforcement officers training academy. He told of the need for this facility in these words: "One of my most basic beliefs is that the majesty of this mighty nation and the dignity of our great State rests firmly on a foundation of law. And yet, the law is language, it is the enactment of the Congress, the pronouncement of the court, the action of the legislature as expressed in words. The law must live and it must work where our people live and work. It must function on the highways on the streets of our cities in the light of day and in the darkest night. Out there where it is the difference between life and death, between safety and injury, between preservation and destruction. The law walks around and rides around in the hearts and in the hands of the professional police officer." At the dedication of the academy, the Governor concluded with a line that indicated his unwavering faith in the men and women who enforce the law. He said: "* * * And I believe that police officers from this facility will serve this State in a fashion that will earn for them the gratitude of the sons of men and the blessing of the Son of God."

So, my friends, alongside of the striking portrait of the Governor done by a superb artist, Mr. Marshall Bouldin, you now have my portrait of him drawn in weak and inadequate words.

I hope what shows through is what I see, there stands the leaders, the hero of the Nation and of this State, the preserver of the peace for Mississippi, and the defender of her dignity, the visionary who launched the research and development center. The man who cared very deeply about the under-employed, the champion for education, and agriculture, and industry and commerce, the banisher of hypocrisy. The man who loved the law, who was a brother to those who enforce the law. There stands one of Mississippi's giants.

ARE CONSTITUTIONAL RIGHTS IRRELEVANT?

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FEIGHAN. Mr. Speaker, forcing an American citizen to give up his first amendment right to petition his Government strikes at the fundamental principle of American democracy. But that is exactly what is at the heart of Frederick R. Weisman versus Toyota Motor Sales.

The plaintiff is a Maryland businessman whose company, Mid-Atlantic Toyota, has distributed Toyotas in Maryland, Virginia, Pennsylvania, Delaware, West Virginia, and the District of Columbia for 20 years. In 1987, in order to renew its contract with Toyota Motor Sales, Mid-Atlantic was coerced into agreeing that it would "obtain, directly or indirectly, any political actions at the local, State, or Federal level that are contrary to any business objectives of Toyota sales."

This gag order represents a shocking assertion of private economic power to interfere in the public process of governance. This issue raises some troubling questions about Japanese car manufacturers' business conduct and practice in the United States. If Toyota's efforts succeeds, this may become a practice by foreign companies in other industries trying to strip U.S. businesses of their ability to petition elected representatives when disputes arise over similar agreements. I believe that this is a matter that should be the subject of congressional hearings in the near future.

This week, 26 of my colleagues and I joined with our distinguished former colleague and longtime chairman of the Judiciary Committee, Peter Rodino, in filing an amicus curiae brief in Federal court in Los Angeles. According to an article in the August 1 edition of the Washington Times, a Toyota spokesperson responded to the filing by saying our arguments are irrelevant.

Mr. Speaker, I highly resent a representative of a foreign corporation referring to our constitutional concerns as irrelevant. No individual has a right to seek to keep Congress from becoming informed about matters of public interest. We are urging the court to clearly, plainly, and promptly declare that the gag provisions such as the one involved in this case are unlawful, void, and repugnant to our laws and to our Constitution. I urge my colleagues to show their support in this matter by adding their names to the amicus curiae brief.

The article follows:

[From the Washington Times, Aug. 1, 1990]

CONGRESSMEN GET INTO TOYOTA TIFF

(By Todd Smith)

Fifteen members of Congress told a federal court in California yesterday that Toyota's major American marketer is wrong in trying to enforce a gag order against its East Coast distributor, Mid-Atlantic Toyota.

The representatives challenged an order imposed by the Japanese automaker's Torrance, Calif.-based subsidiary, Toyota Motor Sales Inc., that bars Mid-Atlantic Toyota from discussing business matters with members of Congress.

Mid-Atlantic is the sole distributor of Toyotas in the District, Virginia, Pennsylvania, Delaware and West Virginia. In 1987, Mid-Atlantic singed a contract with Toyota essentially agreeing to the gag order.

In yesterday's filing, the congressmen said the contract "represents a shocking assertion of private power to interfere in the public process and a substantial threat to the ability of Congress to carry out its constitutional function of legislating for the welfare of the American people."

"Essentially, Congress is clamoring to let Mid-Atlantic tell its story and let the [court] system work," said former U.S. Sen. Birch Bayh, one of Mid-Atlantic's attorneys. "Toyota has a right to contact Congress, and Congress has a right to investigate issues surrounding the case."

But Toyota said the congressmen's arguments are irrelevant because both companies agreed to the contract.

"The [gag order] concept was imposed three years ago and it has Mid-Atlantic's signature on it," said Toyota spokeswoman Mindy Geller. "We aren't trying to inhibit anybody, and we did not force them to do it."

Earlier this month, Tom McMillen, Maryland Democrat, filed an affidavit in support of Mid-Atlantic. Mr. McMillen said he contacted Mid-Atlantic officials only to be told they could not discuss the matter.

Yesterday's filing follows two recent lawsuits Mid-Atlantic filed against Toyota charging the company is trying to cut out the middleman in its relationship with area car dealers.

In the suit, Mid-Atlantic accuses Toyota of fraud, false sales reporting practices, misrepresentations and racketeering under the Racketeer Influenced, Corrupt Organizations Act. The suit is scheduled to be heard Aug. 13.

MORE PRODUCTIVE FEDERAL FORESTS ARE VITAL TO THE NATION'S WOOD PRODUCTS INDUSTRY

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WYDEN. Mr. Speaker, today, I join with my colleagues Mr. DEFAZIO, Mrs. UNSOELD, Mr. DENNY SMITH, Mr. SID MORRISON, and Mr. JOHN MILLER, to introduce the Timber Management Improvement Act of 1990, which we believe will lead to more productive sustained yield management of Federal timber lands.

It is our hope that the changes set forth in this bill will result in hundreds of millions of additional board feet per year in timber available for harvest on these lands while, at the same time, allow Federal agencies to enforce both the letter and the spirit of laws protecting our forest environment.

This bill specifically is directed at so-called second-growth forests—National Forest and Bureau of Land Management timberlands which already have been harvested at least once, and which remain a crucial, but underutilized part of our Federal timber inventory.

I commend to my colleagues a Congressional Research Service analysis of this issue dated June 20, 1989, by Ross W. Gorte. Mr. Gorte's review offers sound support for the four primary elements of the legislation we introduce, today:

First, this bill would direct the secretaries of Agriculture and Interior to prepare a yield report on second-growth timber management investment opportunities for lands in Oregon, Washington, and California. This directive is designed to provide, within 1 year, the first definitive survey on higher yield opportunities within this region since the 1970's.

Second, the bill amends the Knutson-Vandenberg Act to include BLM lands. The goal of this section is to eliminate the massive backlogs in reforestation on these important timber-growing acres.

Third, the bill also amends the K–V Act to limit expenditures from the fund to reforestation, timber enhancement, and related activities.

Fourth, additional moneys would be made available in Oregon, Washington, and California for enhancement of second-growth forestry on private woodlands under the Forest Assistance Act.

Mr. Speaker, forest products manufacturing is a keystone industry in much of this country, including my home State of Oregon. Currently, that industry is being bludgeoned by a shortage of raw material—a shortage of trees. This bill is not a short-term answer to that problem. But I believe that it can assure this industry, particularly in the Pacific Northwest, a new measure of resource certainty over the long haul. In turn, certainty will positively influence mill owners to make the long-term investments required to modernize plants, increase efficiencies and prepare for nonold growth dimension logs.

I believe this bill will mean jobs for the future. It will help provide stability in many of our timber-dependent communities. And it recognizes the new reality for forest planning and forest utilization engendered by Federal environmental regulation.

I point out that endorsements for this bill include the Oregon Forest Industries Council, the Wilderness Society, and the Northwest Reforestation Contractors Association—groups which represent a broad spectrum of both the timber and environmentalist communities.

Mr. Chairman, I urge my colleagues to join us to ensure sounder forest practices and more productive Federal timberlands in the 21st century. I urge them to support this legislation.

TRIBUTE TO EDUCATOR DR. G. JAMES FLEMING

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MFUME. Mr. Speaker, I rise to pay tribute to Dr. G. James Fleming. Dr. Fleming was a scholar, author, journalist, and a public servant. He used his knowledge of various issues and eloquent and persuasive pen to champion the cause of justice.

Dr. Fleming recently passed away on August 1, 1990, and shall be dearly missed by those in Baltimore who knew and loved him. He taught political science at Morgan State University for 20 years and founded Morgan State's Institute for Political Science Education, serving as its director until 1966. He joined Morgan's board of regents in 1969, where he served as chairman from 1976–1980.

Dr. Fleming was a respected writer, educator, and author with a reputation as a master instructor and activist. He authored two published books on African-Americans in Baltimore politics and was a significant contributor to Gunnar Myrdal's monumental book "The American Dilemma." Dr. Fleming also edited specialized Who's Who books in addition to editing the Kappa Alpha Psi Journal.

Prior to coming to Baltimore, he worked as a reporter and news editor for the New York-based Amsterdam News, the Philadelphia Tribune, and the Norfolk Journal and Guide. In Baltimore, his journalistic talents were taken to the Afro-American newspaper where he stridently advocated social and economic justice issues.

Throughout his academic and public career, Dr. Fleming earned a reputation for both intellect and influence. He served as a member of the Baltimore Civil Service Commission, the Baltimore Equal Employment Opportunity Commission, the Baltimore Commission for Historical Architectural Preservation, and the boards of the former Provident Hospital and the Maryland Association for Mental Health.

Dr. Fleming's outstanding scholarship did not go unnoticed by his peers. This is evidenced by membership in Phi Beta Kappa; Sigma Delta Chi journalism honor society; Delta Sigma Rho for speech proficiency; and the Pi Gamma Mu social sciences honor society. He also served on the staff of the American Friends Service Committee and during World War II he was a regional director of the President of the United States' Committee on Fair Employment Practice.

During the 1965–66 academic year, Dr. Fleming devoted his career to a tour of Israel and 12 other countries on the African continent.

Mr. Speaker, to say that Dr. Fleming will be missed by the citizens of Baltimore and the Morgan State community is truly an understatement. Equally, it is very difficult to abbreviate this great American's life within the text of this statement. Nonetheless, I wanted to go on record to state how I will dearly miss this giant who did so much to enrich the lives of so many.

In closing, I am proud to be an alumnus of the university where an astounding man had such a powerful influence on young African-American students. While Dr. Fleming has departed this world in the flesh, the fruits of his labor shall continue to reap large harvests on the Baltimore community for decades to come.

AGAINST THE IRAQI INVASION OF KUWAIT

HON. JOSEPH P. KENNEDY II

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. KENNEDY. Mr. Speaker, early yesterday morning, Iraq commenced a brutal invasion of its neighbor Kuwait. Just 2 days ago, Kuwait was a peaceful country, quietly going about its business as a responsible member of the community of nations. Today it is a country under seige by the latest and hopefully last 20th century dictator. Stores have been looted, homes pillaged, citizens murdered. All in the name of nationalistic belligerance and the most venal economic domination.

The Hussein regime is one of the most brutal and repressive in the world today. There is no free press. Political opponents are executed, tortured, and imprisoned arbitrarily. The Kurdish minority has seen their villages burned and their people killed by poison gas.

We have tolerated these horrors long enough. The time to act is now. Otherwise, we appease the limitless ambitions of a tyrant. If that happens, we will have only ourselves to blame when the tentacles of his tyranny spread to choke the life out of the nations of the Middle East, and to strangle our supply of petroleum.

I support the President's decision to "take whatver steps are necessary to defend our longstanding vital interests" in the Persian Gulf. To that end, I stand fully behind the decision yesterday by the House of Representatives to impose tough trade sanctions against the Hussein regime. These include a total ban on Iraqi imports, including oil, and a total ban on United States exports of goods, technology, and services—save medical and humanitarian supplies.

Our Government's swift reaction will be to no avail unless our allies follow our example. To that end, I call on all nations of the civilized world to join in a total embargo against the butcher of Iraq.

THE PRODUCTIVE INVESTMENT INCENTIVE ACT

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mrs. JOHNSON of Connecticut. Mr. Speaker, as we approach adjournment for the August break, I am pleased to introduce a new bill, the Productive Investment Incentive Act, that I believe will help strengthen our small- and medium-sized manufacturers and help those who are dependent on defense spending convert to nondefense production.

Manufacturing is the heart and soul of our economy and current tax policy simply does not allow us to be competitive in the world market. Furthermore, we should be concerned that the economy is beginning to show weakness. As we have learned in the past, manufacturing employment is often hardest hit when the economy slumps. We need a simple, direct policy that gives manufacturing a competitive advantage.

Not only is the weakening economy endangering manufacturing but reduced defense spending directly endangers the thousands of small Connecticut manufacturers who depend on defense subcontractor work. Tax changes to help manufacturing retool for nondefense purposes and strengthen this important sector of our economy should be at the top of the summit tax agenda.

When Congress passed the 1986 Tax Act, we took away most of the complex tax preferences that had crept into the Tax Code over the years, but we also left manufacturers with a Tax Code hostile to investment and competitiveness. I strongly supported our effort to bring simplicity and fairness back into the Tax Code, and I believe my new investment bill meets both of those goals while giving manufacturers a fighting chance in this period of change and slow growth.

Under current law, the cost of most equipment is depreciated over 10 or more years. My bill would allow manufacturers to treat a certain portion of productive equipment as an expense during the year it was purchased, in effect allowing it to be written off in 1 year. The PII would allow small and medium-sized manufacturers to expense up to $250,000 per year in productive equipment investment, and would be phased out for businesses that invest more than $1 million per year.

In a competitive world, manufacturers do not have the luxury of using a machine for its entire depreciable life. Today you use a machine until the pressures of the marketplace require you to buy a more accurate, productive one, not until it is depreciated. The PII is realistic because it reflects how manufacturers actually purchase and use equipment.

Our manufacturers are competing directly with the Japanese and Europeans whose tax policies are far more supportive of investment. Last year, the manufacturing trade deficit, $103 billion, was nearly as large as the overall trade deficit of $108 billion. If we hope to narrow that gap, we need policies such as the PII that take direct aim at helping manufacturers recapitalize.

THE FINANCIAL FRAUD BILL

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WEISS. Mr. Speaker, I am introducing legislation today to substantially facilitate the discovery and disclosure of fraud and misconduct at financial institutions across this Nation.

This bill, the Financial Anti-Fraud Enforcement Act of 1990, would readjust the rewards and incentives for individuals who provide tips or leads concerning violations of Federal criminal law relating to insured depository institutions.

Ridding the financial institutions of fraud and criminal activity is essential to providing a stable banking environment and restoring the public's confidence in the banking system. Attorney General Dick Thornburg said that 25 percent to 30 percent of the thrift failures can be attributed to criminal activity. Congress must find more effective alternatives to stop this activity. Granted, running the crooks out of the financial industry can be as frustrating as stamping out a brush fire. But clearly, the present law does not provide adequate incentives for potential informers to come forth with allegations of fraud and misconduct.

As the law stands, informants of illicit activities are only eligible for rewards if the assets stolen are recovered, and if the assets recovered are more than $50,000.

I believe we can offer a more attractive incentives package. For starters, this bill readjusts those financial rewards. A reward could be given to any informant who provides information on financial fraud that leads to a criminal conviction, and not just recovery of the stolen assets. The bill lowers the threshold requirement of recoverable assets from $50,000 before an informant may share in the recovery. To fund the rewards, the bill will levy fines from criminal activity.

An effective way to combat fraud and misconduct is to make it easier and attractive for potential informers to be forthcoming with information about such wrongdoing. My bill does just that. I urge my colleagues to support it.

YEAR OF THANKSGIVING FOR THE BLESSINGS OF LIBERTY, 1991

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GEPHARDT. Mr. Speaker, on behalf of myself and Mr. MICHEL, I am introducing today a House joint resolution to designate 1991 as the "Year of Thanksgiving for the Blessings of Liberty."

During 1991 our Nation will celebrate the bicentennial of the ratification of the Bill of Rights. Making 1991 the "Year of Thanksgiving for the Blessings of Liberty" will foster national expressions of gratitude and thanksgiving for America's quality of life and the freedoms guaranteed under the U.S. Constitution and the Bill of Rights embodied in its first 10 amendments. Moreover, it will create greater awareness of the fact that along with these freedoms come responsibilities to help the less fortunate in our society.

The National Thanksgiving Foundation is a nonprofit foundation, which has made it purpose to establish 1991 as the "Year of Thanksgiving for the Blessings of Liberty." The foundation is working in cooperation with the Commission on the Bicentennial of the U.S. Constitution, the National League of Cities, the U.S. Conference of Mayors and other groups to hold simultaneous dinners throughout the United States to afford Governors, mayors, local government officials, schools, colleges, universities, and civic groups the opportunity to also designate 1991 as the "Year of Thanksgiving for the Blessings of Liberty."

These "National Thanksgiving Dinners" will also serve as fundraisers for local hungry and homeless. All proceeds from these dinners

remain in the communities where the dinners are held and go to local groups serving the needy. This is an excellent opportunity to illustrate to the youth of our Nation and to all Americans that freedom and responsibility go hand-in-hand.

A year of reflection and thanksgiving will also serve to inspire our Nation and renew in our citizens the spirit of unity and patriotism.

I urge all my colleagues to vote in favor of this important resolution. We can all look forward to a year when we can focus on the many ways our Nation has been blessed.

GIVE LOCAL POLICE THEIR SHARE OF SEIZED ASSETS

HON. LOUISE M. SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mrs. SLAUGHTER of New York. Mr. Speaker, today I am introducing a bill to guarantee that law enforcement agencies receive no less than 90 percent of the proceeds from assets seized in drug raids.

Local law enforcement agencies serve on the front lines of the war on drugs. Indeed, State and local law enforcement agencies are responsible for approximately nine times the number of drug arrests that are made by the Drug Enforcement Agency, Customs or the FBI combined. Despite being out-numbered, out-funded, and out-gunned, our local crime-fighters have rallied to the challenge. We must ensure that these local law enforcement receive the greatest share of proceeds from the sale of these assets seized in drug-related crimes.

The Department of Justice is currently considering increasing up to 35 percent the share the Department takes from seized assets for administrative purposes. This bill would establish a statutory limit of no more than 10 percent.

We must take back the streets from the drug lords currently terrorizing our communities throughout this country. This bill guarantees local law enforcement our maximum support. Senator DECONCINI has introduced an identical bill in the Senate. I urge our colleagues to sponsor this important legislation.

IN RECOGNITION OF THE VOTER EDUCATION PROJECT

HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. LEWIS of Georgia. Mr. Speaker, as we commemorate the 25th anniversary of the passage of the Voting Rights Act, I want to acknowledge the contributions of the voter education project [VEP]. Passage of the Voting Rights Act of 1965 was secured, in part, through the efforts of VEP volunteers and staff workers.

The VEP was founded in 1962, to study the reasons for low black voter turnout in the Southern States. The VEP documented many cases of voter fraud and intimidation. This documentation was used to secure passage of the Voting Rights Act.

After passage of the Voting Rights Act, VEP continued to play an important role in the struggle for increased minority political participation. VEP raised funds to help local community groups conduct voter registration drives. By providing crucial funding and training when it was needed, the VEP helped many local organizations all over the South to register and educate minority voters.

In 1962, when the VEP was founded, only 1 million blacks were registered to vote in the South, and there were less than 50 elected black Southern officials. Through the work of the VEP and the organizations that it funded, there are now more than 5½ million blacks registered to vote in the South, and over 5,000 elected black officials.

In addition to sposoring voter registration efforts, VEP conducts citizenship education, seminars for black officeholders, and workshops for black candidates and poll watchers. VEP continues to produce important research and election analysis.

Because of VEP's efforts, our Nation has a larger and better informed number of minority voters—voters who have proved pivotal in securing minority representation at the local and national levels. The VEP has worked to make our country more democratic. For that, they deserve praise, as well as support for their ongoing efforts.

COMPUTER RESERVATION SYSTEM REFORM

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. OBERSTAR. Mr. Speaker, today I am introducing legislation to deal with a problem which has been a long standing source of concern to the traveling public and to the Aviation Subcommittee of the Committee on Public Works and Transportation: the domination by two major airlines, American's and United, of the computer reservation system [CRS] used by travel agents and the inhibiting effects of this domination on airline competition.

United's and American's CRS's are used by travel agents who, collectively, account for about 67 percent of all revenues booked through a CRS. American's and United's domination of the CRS business creates substantial competitive advantages for these carriers in the sale of air transportation. The dominant CRS position which American and United hold gives them the power to charge other airlines high booking fees for having their tickets sold through the CRS controlled by either of these two carriers.

A 1988 Department of Transportation study showed that the booking fees which United and American were charging other airlines for each ticket written on a CRS were approximately twice United and American's average cost for providing that service. These booking fees result in the transfer of hundreds of millions of dollars from other airlines to United and American.

In addition, CRS ownership by American and United gives them substantial "incremental revenues," that is, excess revenues, resulting from the tendency of travel agents to book on the airline owning their CRS. The 1988 DOT study showed that the incremental revenue transfers were producing additional revenues of hundreds of millions of dollars a year for American and United.

As a result of high booking fees and incremental revenues, American and United are realizing rates of return on their CRS system of 60–100 percent a year.

In addition, American and United have imposed restrictive provisions in their contracts with travel agents, including high liquidated damages if an agent terminates a contract, as well as provisions requiring minimum use of the CRS. These contractual provisions prevent competing CRS systems from displacing American and United, no matter how high the quality of the competitor's CRS system.

Domination of the CRS industry by American and United is inhibiting airline competition. The high booking fees are an added cost for other airlines, making it difficult for these airlines to compete with American and United. The incremental revenues also make it difficult for other airlines, particularly airlines which do not have their own CRS system, to compete.

The CRS problem is widely considered to have been an important factor in the mid-1980's wave of airline mergers, in the disappearance of new entrants from the industry and in the absence of significant new entry since 1985. Many airlines and observers of the industry believe that there is no future for an airline which is too small to own a CRS system.

The Department of Transportation inherited from the Civil Aeronautics Board rules to deal with some of the problems of the CRS industry. These rules have not been sufficient to prevent the adverse effects on competition which I have discussed. The CAB's rules will expire at the end of the year, and DOT is now considering whether to renew the rules and whether to add new regulations to deal with some of the persistent problems.

I hope that DOT will take strong regulatory action to deal with the problem. However, in the event DOT fails to take adequate action, the Subcommittee on Aviation will. The bill I am introducing today indicates the type of legislative remedy which I will pursue, if necessary.

Briefly, the bill deals with three major issues: discrimination, liquidated damages, and arbitration.

First, discrimination: the bill prohibits discrimination in CRS scheduling displays and prohibits a CRS from making it easier for an agent to make reservations on the airline owning the CRS than on other airlines.

Second: the bill contains limitations on the contract between the CRS owner and travel agents, by providing that the contract may not exceed 1 year, by imposing limitations on liquidated damages, and by providing that no contract may require that the agent make minimum use of the CRS.

Third, the bill provides for arbitration if an airline feels that the fees it is charged to par-

ticipate in the CRS system are not fair and reasonable.

Mr. Speaker, I believe that this bill offers a solid point of departure for considering CRS legislation, should DOT fail to live up to its responsibilities to deal with the problem.

TRIBUTE TO JOHN O. THAYER

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to pay tribute to Mr. John O. Thayer, who is retiring after serving as town administrator in Portsmouth, RI.

Mr. Thayer is retiring after 17 years of outstanding and dedicated administration. Selected in July of 1973 as the first ever town administrator for Portsmouth, Mr. Thayer has helped develop and manage his town with diligence and exemplary skills. Being a resident of Portsmouth myself, I can testify to the excellent job Mr. Thayer has done day in and day out over the years.

During his tenure as town administrator, Portsmouth has grown and expanded from a rural farming community to a dynamic and vibrant town. Mr. Thayer coordinated Portsmouth's switch from a part-time to a full-time local government and oversaw the development and construction of the police station. In addition, Mr. Thayer has been the commissioner of the police, fire, and public works departments. He also developed the Melville Campground area which has been a very successful venture for the town.

I would like to thank Mr. Thayer for his years of service to the town of Portsmouth. His dedication and loyalty are a tribute to his concern for his fellow citizens. I wish him all the best for a happy and healthy retirement.

PLANT CLOSINGS CREATE 1.8 MILLION LOST JOBS PER YEAR

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DOWNEY. Mr. Speaker, the Department of Labor recently released a report on worker displacement. In the last 5 years, about 1.8 million workers per year have permanently lost their jobs because a plant or business closed or moved, work was slack, or jobs were abolished. About three-fourths of displaced workers with firm job attachments were reemployed by January 1990, and about three-fifths were earning as much or more than they did before their displacement.

Yet, despite rapidly growing employment, there were perhaps 300,000 workers each year who were permanently displaced and still unemployed. Now employment growth has nearly stalled, and changes in Federal policies will displace defense workers, loggers, coal miners, and others in the next few years. Like other displaced workers in the past, many of these workers will find new jobs. But a few will need our help. Since changes in Federal policy will lead directly to their displacement, we owe it to them to provide the assistance they need.

The legislation which Representative PETE STARK and I have introduced today is designed to provide that assistance. Workers who lose their jobs as a result of military base closings, defense spending cuts, protection of endangered species, or the Clean Air Act Amendments would be eligible to apply for benefits. Modeled after the existing Trade Adjustment Assistance Program, groups of workers would apply to the Department of Labor for eligibility certification. Eligible workers would obtain their benefits from their State employment security agencies. In keeping with our pay-as-you-go approach, these benefits would be financed by a 5-year extension of the two-tenths of a percentage point Federal unemployment tax rate, which expires at the end of this year.

A summary of the Economic Adjustment Assistance Act follows:

SUMMARY OF THE ECONOMIC ADJUSTMENT ASSISTANCE ACT OF 1990

OVERVIEW

The bill would authorize a five-year adjustment assistance program for dislocated workers patterned after the trade adjustment assistance program. In addition, unemployment compensation for ex-servicemembers would be restored to the same 26-week duration available to civilians. The bill would be financed by extending the current 0.2 percentage point Federal unemployment surtax for five years beginning in 1991.

ADJUSTMENT ASSISTANCE PROGRAM

Under the adjustment assistance program, 26 weeks of unemployment compensation would be provided (in addition to the regular 26 weeks of benefits) for workers who are dislocated from their jobs as a result of:

(1) military base closures;

(2) defense authorization cuts below fiscal year 1990 levels;

(3) the Clean Air Act Amendments of 1990; and

(4) protection of species under the Endangered Species Act of 1973.

Benefits would be available as an entitlement to eligible workers subject to a cap in fiscal year 1991 of $700 million and one billion dollars in each of the ensuing four years. The program would expire at the end of fiscal year 1995.

WORKER CERTIFICATION

Groups of workers could petition the Department of Labor for certification of eligibility. State employment security agencies would administer the program under cooperative agreements with the Department of Labor. A group of workers would be eligible for certification if:

(1) a significant number or proportion of the workers have been or are threatened to be totally or partially laid off from a firm or appropriate subdivision of a firm (including the Federal government);

(2) sales or production or both of the firm or appropriate subdivision of the firm have decreased absolutely; and

(3) a military base closing, defense authorization cuts below fiscal year 1990 levels, the Clean Air Act Amendments of 1990, or protection of species under the Endangered Species Act of 1973 contributed importantly to the layoffs and the decline in sales or production.

INDIVIDUAL ELIGIBILITY

In order to receive benefits, each worker from a certified group must meet the following criteria:

(1) The worker's separation from the firm or appropriate subdivision of the firm must have occurred within the applicable certification period;

(2) the worker must have been employed at least 26 weeks at wages of no less than $30 per week during the 52-week period preceding the week of the first qualifying separation;

(3) the worker was entitled to regular unemployment compensation and has exhausted all regular and extended unemployment compensation; and

(4) the worker must be enrolled or participating in training, or have completed an approved training program, or have received a waiver from the training requirement because training is "not feasible or appropriate." (If the worker is not enrolled or participating in training, but still is eligible for benefits, he is subject to the job search requirements under the Extended Benefits program.)

PROGRAM BENEFITS

Under the program, certified and qualified dislocated workers could receive cash benefits and health insurance. In addition, employers could claim the targeted jobs tax credit for certified and qualified dislocated workers. Each of these benefits is described below:

CASH BENEFITS

Cash benefits would be equal to the weekly benefit amount for which the worker is eligible under the regular State unemployment compensation program. Total weeks available under the regular, extended, and dislocated worker programs would be limited to 52 weeks. If the worker received only 26 weeks of regular benefits, he could get 26 additional weeks of cash benefits. If he received 26 weeks of regular benefits and 13 weeks of extended benefits, he could receive only 13 additional weeks of cash benefits.

HEALTH INSURANCE

During the first 26 weeks of unemployment, workers would be eligible for the current COBRA health insurance provisions for the unemployed. These provisions enable former employees to purchase health coverage under the employer's plan for a period of between 18 and 36 months after leaving the job.

Workers receiving adjustment assistance under this program or trade adjustment assistance would be eligible for health insurance through the Medicare program after 26 weeks of unemployment with the same benefits as the program currently offers those over age 65.

Workers would be offered the option of not enrolling in Medicare, enrolling as an individual, or enrolling the worker's entire family. State employment security agencies would process enrollment.

Workers would pay the Medicare Part B premium through a deduction in the unemployment insurance benefit they would receive otherwise. The individual premium would be the same as that paid by the elderly and the family premium would be a multiple of that amount based on average family size.

Eligibility would end after reemployment or termination of cash benefits whichever occurs first.

TARGET JOBS TAX CREDIT

Certified and qualified dislocated workers, including those certified and qualified for trade adjustment assistance, would be added to the list of workers for whom employers may claim the targeted jobs tax credit.

EX-SERVICEMEMBERS

The 4-week waiting period and the limit of only 13 weeks of benefits for ex-servicemembers would be repealed. This would give ex-servicemembers the same benefits as civilians. Generally, they would wait one week and then begin receiving up to 26 weeks of benefits.

PAY-AS-YOU-GO FINANCING

The bill is financed fully within the unemployment compensation system by extending an existing unemployment surtax. Over the five-year period, the revenues raised would exceed outlays by about $220 million. Total cost of the bill would be about $5.2 billion from fiscal year 1991 through fiscal year 1995.

PRELIMINARY COST ESTIMATES

[In millions of dollars]

Provisions	Fiscal years—					
	1991	1992	1993	1994	1995	5-yr
Extend surtax	−790	−1,110	−1,140	−1,170	−1,200	−5,410
Program benefits	700	1,000	1,000	1,000	1,000	4,700
Ex-servicemembers	90	90	100	100	110	490
Effect on budget deficit	0	−20	−40	−70	−90	−220

THE BEHAVIORAL AND SOCIAL SCIENCE DIRECTORATE ACT

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WALGREN. Mr. Speaker, today Mr. BROWN of California and I are introducing a bill to establish a separate directorate within the National Science Foundation [NSF] for the social and behavioral sciences. I hope this measure will give these critical but often overlooked fields the support and visibility within the Federal Government that they deserve.

Over the past half century, federally funded basic scientific research has allowed us to make great strides toward understanding our world. We have probed the mysteries of the atom, searched the night skies for distant galaxies, and unlocked many secrets of life itself. Basic research yields new knowledge, products, and processes which, over time, result in economic growth and better, more productive lives for all Americans.

For most of these 50 years, the National Science Foundation has taken the lead in setting basic research goals and priorities and in distributing Federal-civilian research resources. While it suffered terribly at the hands of the Reagan administration during the early 1980's, NSF's budget has enjoyed a recent upswing, and President Bush has proposed doubling the NSF budget by 1993.

Unfortunately, one area of scientific discipline—the study of the behavioral and social sciences—has been conspicuously immune from this upswing in Federal support. In current dollars, the behavioral and social sciences have only recently caught up to their 1980 levels. In constant dollars adjusted for inflation, NSF support for the social sciences has fallen nearly 38 percent in the past decade—while the total NSF research budget grew by 27 percent by comparison. Like all budget requests under the Reagan administration, President Bush's fiscal year 1991 proposal would grant social science programs a far smaller increase than the 14-percent increase proposed for the NSF as a whole. It has become clear that the NSF's enthusiasm for the behavioral and social sciences is at best lukewarm.

Should the NSF be more supportive? We believe it must be. Research in the behavioral and social sciences is absolutely essential if we are to make informed choices about our society. Social and behavioral scientists investigate the most serious problems of modern life—like violence, theft, and illness—and work to enhance those things which represent the best of civilization.

Through research in fields such as psychobiology, neuroscience, social development, and economic, historical, and demographic surveys, scientists have developed greater understanding of behavior and social phenomena which affect the quality of life of all of us. Revitalized Federal funding and visibility for these disciplines would permit scientists to continue to advance our understanding of brain processes, memory, motivation, social interactions, individual and group choices, language, family relations, negotiating techniques, and the structure of organization. By allowing the behavioral and social sciences to wither from lack of support, we are dooming ourselves to repeat the mistakes and tragedies of the past.

I believe that the cause of the NSF's declining support for research in the social and behavioral sciences is largely structural. Since 1975, NSF's behavioral and social science programs have been developed within the Directorate for Biological, Behavioral, and Social Sciences [BBS]. Since its creation, this directorate has been headed by a biologist, a physical scientist with relatively little background in the behavioral or social sciences. Within NSF, the BBS is even known informally as "the Biology Directorate."

As the chairman of the House Science Research and Technology Subcommittee, I heard testimony from numerous witnesses who identified the NSF's directorate structure as one of the primary reasons for the declining Federal support of the social sciences. Indeed, an ad hoc committee commissioned by NSF to examine the organization of behavioral and social science within the Foundation recently recommended "radically increased" resources for NSF's behavioral and social science programs and the "consideration of a separate directorate for behavioral and social science."

The historic pattern of reduced support for the behavioral and social sciences can lead only to the conclusion that the biological, behavioral, and social science directorate should be divided into its natural parts with a behavioral or social scientist at the helm of a separate directorate for behavioral and social sciences. The legislation we introduce today would make this important change.

THE BILL

Our bill would amend the National Science Foundation Act of 1950 to require the establishment of a separate directorate for behavioral and social sciences. The bill would authorize the NSF Director to appoint an assistant director to head this new directorate and would stipulate that the new assistant director possess all of the functions, duties and benefits currently provided to all other NSF assistant directors. It is important to note that our bill would retain the NSF Director's discretion to establish whichever other directorates and divisions he or she determines to be necessary. The full text of my legislation follows.

If we are to restore Federal support for research into areas as important to our survival as human behavior, Congress must act to give the behavioral and social sciences adequate standing and visibility within the National Science Foundation. I am pleased that Congressman BROWN has joined me as an original cosponsor of this bill, and I urge the rest of my colleagues to join me in support of this important measure.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Behavioral and Social Sciences Directorate Act of 1990".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) the contributions of the behavioral and social sciences to the welfare of the Nation have been well-documented in reports by the National Academy of Sciences, in testimony before the Congress, and through other means;

(2) in 1968, the Congress recognized the potential of these disciplines to benefit the Nation by providing the National Science Foundation explicit authority to support the social sciences;

(3) Federal funding is essential if the Nation is to realize the potential resulting from advancements in research in the behavioral and social sciences;

(4) the programs carried out by the National Science Foundation in the social and behavioral sciences have, since 1975, been administered by the Directorate for Biological, Behavioral and Social Sciences (an administrative unit of the Foundation), which Directorate has been headed solely by biologists;

(5) financial support provided by the National Science Foundation for research has increased 27 percent in constant dollars since 1980, while financial support provided by the Foundation for research in the psychological and social sciences has fallen by 38 percent in constant dollars during the same period;

(6) Federal financial support for the behavioral and social sciences has fallen by approximately 30 percent in constant dollars since the late 1970's; and

(7) the public welfare regarding the behavioral and social sciences is best served by providing such sciences a status within the National Science Foundation equal to the status provided to disciplines represented in the Foundation through separate directorates.

(b) PURPOSE.—The purpose of this Act is to establish a Directorate for Behavioral and Social Sciences to carry out the functions of the National Science Foundation that relate to the behavioral and social sciences.

SEC. 2. ESTABLISHMENT, WITHIN NATIONIAL SCIENCE FOUNDATION, OF THE DIRECTORATE FOR BEHAVIORAL AND SOCIAL SCIENCES.

Section 8 of the National Science Foundation Act of 1950 (42 U.S.C. 1866) is amended to read as follows:

"DIRECTORATES AND DIVISIONS WITHIN THE FOUNDATION

"SEC. 8. (a) There is established within the Foundation a Directorate for Behavioral and Social Sciences, which shall be headed by an Assistant Director of the Foundation (hereafter in this section referred to as 'the Assistant Director'). The Director of the Foundation, in consultation with the Board, shall appoint the Assistant Director, who shall be an individual with expertise and experience in the behavioral and social sciences.

"(b) The Foundation, acting through the Assistant Director, shall carry out the functions specified in section 3 as such functions relate to the behavioral and social sciences.

"(c) There shall be within the Foundation such directorates in addition to the directorate established in subsection (a), and such divisions within the directorates, as the Director, in consultation with the Board, may from time to time determine.

"(d) Each additional directorate shall be headed by an assistant director. Each assistant director shall receive basic pay of equal rates and shall perform duties similar to every other assistant director.

"(e) For purposes of this section, the term 'behavioral and social sciences' includes anthropology, behavioral neuroscience, demography, economics, geography, history, linguistics, political science, psychology and psychological processes, sociology, and any other disciplines commonly understood to be within the realm of the behavioral and social sciences.".

BILL KRUEGER: A TRIBUTE

HON. JAMES L. OBESTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. OBERSTAR. Mr. Speaker, a short time ago, northeastern Minnesota lost a fine journalist and a good friend.

For 40 years, William H. "Bill" Krueger was a voice of conscience for listeners to radio station KDAL in Duluth. Two generations of news consumers grew up listening to Bill Krueger's news and commentary each day.

Bill brought Duluth radio into a new era. He was the first full-time radio journalist in the market. He was also the area's first broadcast editorialist, and his commentaries were always well-reasoned, insightful and thought-provoking. He was not afraid to take an unpopular position, or to stand up for what he believed.

Bill's big, authoritative voice belied his small physical stature. Afflicted by a genetic disorder that stunted his growth, Bill stood 4-foot-6. Additionally, a spinal defect, possibly related to his size, left him confined to a wheelchair for the past 36 years.

Bill saw his physical problems as a challenge, rather than a handicap. Besides his radio work, he also wrote a column for a weekly newspaper, the Duluth Budgeteer, and taught journalism at the University of Minnesota at Duluth.

However, it was in radio where Bill made the greatest impact. In that magical medium, where presence is more important than appearance, he stood 10 feet tall. His list of awards and citations is lengthy and impressive. He was recognized throughout Minnesota and the Midwest as a leader in journalism, as a friend of education and as an advocate of the handicapped.

Bill retired 5 years ago, but continued to provide commentary for KDAL and KDHL-TV. His death May 25 marked the end of an era for broadcasting in the Twin Ports, and in northeastern Minnesota and northwestern Wisconsin.

I invite my colleagues to join me in recognizing the accomplishments of this remarkable man, and in extending sympathy to his widow, Marilyn, and his children: Margaret, Mary, Kathleen, Paul, Phillip, and Daniel.

In closing, I would like to share with the House three of Bill's commentaries, broadcast on KDAL just before his retirement in 1985. I'm sure after reading them, you will share my unending admiration for Bill Krueger, a beloved and treasured friend.

THIS IS BILL KRUEGER WITH COMMENT

There is always the future tense about international terrorism—where and when will it happen next. America had been hungry for some kind of victory over terrorism, and it got one when American fighter planes forced the Egyptian airliner to land in a Sicily rather than proceeding to Tunis. For its expert effort, the United States captured four suspected terrorists. And President Reagan made a public statement, saying about the Navy pilots involved: "These young Americans sent a message to terrorists everywhere; they can run but they can't hide."

While the United States did achieve a victory, the President, as is his wont, carried the value and the significance somewhat beyond the reality. Terrorists will continue to run and hide, and they will continue to strike. Moreover, it is impossible to know what this capture of terrorists will do so far as other American hostages overseas are concerned and what stimulus the forcing down of the airliner will have on other terrorist attacks at points unknown around the world.

It is to be hoped that if, by some chance, the terrorists are extradited to the United States that we, through the Reagan administration and the media, will not put on a show trial of some kind. That would be to lose completely the perspective on this recent achievement, where a battle truly has been won, but where the war continues at about the same pitch as in the past.

Most of the research studies on Lake Superior continue to tell us that it is becoming increasingly polluted, despite the best efforts to keep it clean. At least one member of the Minnesota pollution control agency has said that we must accept a certain level of pollution if we are to maintain industrial development in the region. No one states clearly how much pollution that might be, and once a breach is made in that wall of cleanliness, how much pollution does one allow.

Lake Superior and the other Great Lakes were the result of a great glacial movement thousands or millions of years ago. There are nothing but so-called natural pollution of the lakes for years following that time—only the fallen trees and the natural erosion to muddy the water. But since the industrial revolution, there has been a slowly growing level of pollution, which expands more rapidly year by year because there are more people and because there is heightened economic development.

Lay people can assume that Lake Superior will be around in a recognizable shape and form until the next great glacier, if there is one. In the meantime, we will be passing the lake along to countless generations in the future. By allowing what we called limited pollution, we will be turning an increasingly dirty lake over to generations to come. Since it takes scores of years for this giant body of water to flush itself, what kind of increasing degradation can our great-great-grandchildren and those who follow expect from this father of waters?

A former Twin Ports television news achorwoman, Cindy Brucato, is the subject of an interesting yet unsettling profile in the Minneapolis paper last week. Cindy was rather a brash, assertive person who conveyed that very personality as an achorwoman at channel 10 in Duluth in the mid-seventies then she moved on to channel 5 in the Twin Cities, into the big leagues as the twin cities market is often called. Cindy ultimately worked into an anchor spot at 5, 6, and 10 p.m., conveying the same assertiveness with considerable success.

Now, according to the newspaper profile by TV critic Nick Coleman, Cindy Brucato has changed, and Cindy acknowledges the change. After being taken off two of her broadcasts while the station was suffering some low audience ratings, Cindy became softer and more demure, somewhat more retiring in her interaction with the male coanchor. It seems she had received letters from viewers suggesting she tone down her image, and powers and the TV station suggested much the same. So Cindy Brucato changed.

The point of all this is that here, again, the medium becomes the message. Cindy Brucato presumably is a newswoman and it should not matter whether she is assertive to a point on the TV tube. What should matter is her news sense and her ability to get the news across to the viewers—neither of which has been questioned. But the reality is that these latter elements are less and less concern. Cindy Brucato becomes yet another victim of image over substance in the electronic news business.

TRIBUTE TO JULIE ARMOR

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Julie Armor, of Portsmouth, RI, this year's "Providence Journal Bulletin Honor Roll Girl."

Julie, who attends Portsmouth High School, is an outstanding athlete. She excels at a wide variety of athletics, including basketball, gymnastics, cross country, and track. Through her 4 years of high school she was chosen for "All-State and All-Division" teams in track. In

addition, during her junior and senior years, she was chosen as captain of the cross country team.

Julie, besides being an excellent athlete and competitor on the field, is also an outstanding student in the classroom. During her 4 years at Portsmouth, she received straight "A"s in all her classes. She is a member of both the National Honor Society and the Spanish Honor Society. She was selected as class secretary for her junior and senior years as well.

Through her accomplishments, both in the classroom and on the playing fields, Julie has proven to be a model student. She is a proven leader, and I commend her on her outstanding achievements. I wish her best of luck in her future.

VOLUNTARY NATIONAL SERVICE

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PENNY. Mr. Speaker, throughout our history, and particularly in this century, generations of young Americans have been called on to serve their country. We have faced two World Wars, conflicts in Korea and Vietnam and dealt with a worldwide economic depression. And we have prevailed. Thankfully, the threat of world war has been lessened for the young people of the nineties. But, the challenges of our society are as great as ever as we struggle to meet the needs of our citizens—young and old, the needs of our communities—large, and small; and the needs of the future—economic and educational. How are we to address these needs?

A program of national voluntary service which would allow the energy, vitality, and intelligence of this new generation of Americans to be used to address these needs is that positive step.

The debate on the issue of national service has been around for several years, but was specifically opened at the beginning of this Congress by my colleagues Senator NUNN and Mr. MCCURDY who introduced the most sweeping proposal, based on an initiative of the Democratic Leadership Council and the work of Dr. Charles Moskos. Other service proposals such as the civilian conservation corps proposed by Mr. PANETTA have been around for a number of years. And, bills such as Mikulski-Bonior, McCain-Porter, and others contributed further to discussion on the issue. And, in my legislation, I am indebted to all these and others who have made various proposals.

For a short while, national service was the hot topic editorially, on talk shows and here in Washington. But like many hot topics, this one was cooled off. I think that is a shame, and hope to reopen the debate once again with my proposal.

Some would argue that the Kennedy service bill passed by the Senate and H.R. 4330 currently pending in the House have moved us closer to establishing a workable system of national service. These are very modest proposals and neither addresses the issue in any broad way. Again, it is important to continue to discuss national service bcause the unmet needs of our society continue to grow and we need to cultivate a civic consciousness among today's citizens.

What exactly do I propose? I am introducing legislation that would create, restore, and expand opportunities for voluntary national service. The legislation is designed to promote community service and civic responsibility by providing opportunities for individuals to serve their communities. It would encourage volunteer participation by providing assistance in student financial aid in exchange for voluntary service. It would enhance recruitment and retention in our Nation's Armed Forces by improving benefits under the provisions of the Montgomery GI bill education programs. It would expand international volunteer service opportunities by affording educational assistance for those serving overseas with private voluntary organizations as well as those serving in the Peace Corps. And, it would encourage qualified individuals to enter and be trained for law enforcement service.

Title I of my bill establishes a program of domestic voluntary service under the auspices of the ACTION Agency and in cooperation with the States. Under this title, States would submit a plan to ACTION, requesting the number of volunteers they could utilize in Federal, State, and local agencies or community organizations. These slots could be either full time or part time. Volunteers from that State would then apply and be placed in these positions, taking into account the abilities of the volunteer as well as the needs of the agencies. While most of the volunteers are expected to be of high school and college age, the program has no upper age limit, and is open to any volunteer age 16 and above.

Volunteers may choose to contribute 1 year of full-time service, during which they would receive a small stipend and health insurance benefits. Upon completion of their service, they would be entitled to a nontransferable voucher of $8,904. This voucher could be used only to pay for a federally sponsored student loan or for tuition, fees, and so forth, at an educatoinal institution.

For volunteers who choose to make a part-time commitment, they must serve for a period of 2 years, consisting of either two weekends a month and 2 weeks a year of full-time service or an average of 9 hours each week of community service. Upon completion of the 2-year commitment, the volunteer would receive a voucher of $4,452. The part-time option is important for those who want to do community service but for whom a full-time commitment is not practical.

In order to encourage volunteers to complete and continue their education, the bill also requires that volunteers have a high school diploma or its equivalent by the time they complete their service.

As much as possible, volunteers are to be utilized in existing programs, with an emphasis on areas of greatest need such as Head Start programs, child care centers, facilities for the elderly, and so forth. Even in program administration, I have attempted to use existing structure. ACTION is the ideal overseer for the program since ACTION already has 45 State offices, a number of regional offices, and their designated mission is coordination of voluntary service throughout the Nation. It also makes good use of the vast voluntary resources already in place in the 50 States. Most already have youth service programs and would readily be able to mesh their activities with a national service program. The idea of my domestic service initiative is to build on rather than supplant existing programs.

Title II came from an idea that occurred to me at a hearing held by the Select Committee on Hunger. It seemed reasonable to give educational assistance to those who chose to serve overseas with private voluntary organizations such as Save the Children and CARE just as we provide educational assistance to Peace Corps volunteers. Title II allows repayment of $6,700 per year on principal and interest for educational loans, with a cap of $13,400 on the total repayment. By expanding this benefit to service with private voluntary organizations we would encourage many more individuals who are willing to make at least a 1-year overseas commitment.

For title III of the legislation, I am indebted to my colleagues Mr. DORNAN and Mr. FRANK who introduced H.R. 2798, the Police Corps Act, last summer. As I have said previously, I think establishment of a police corps is a role that the Federal Government can appropriately play and one that will make a tremendous difference in the ability of our State and local governments to fight crime, curb drug abuse, and make all our communities safer. By increasing the pool of trained law enforcement officers, we will be addresssing the problem right where it will do the most good, on the front lines. In addition, the police corps provides a means for these young people to attend college in order to enhance their law enforcement skills. The police corps would also assist financially strapped cities, counties, and communities by assuming a significant share of the costs of training law enforcement personnel. This title incorporates much of H.R. 2798, while establishing lower participant numbers and benefit levels consistent with the military service benefits elsewhere in the legislation. This title also allows the child of a law enforcement officer killed in the line of duty to receive the benefit.

Title IV of my bill addresses the issue of college student loans. While the legislation does not change existing student loan programs, it does provide deferment of loan repayments while the student is participating as a volunteer in any of the programs proposed.

Earlier bills have proposed eliminating existing college student aid programs and replacing them with vouchers earned exclusively through national service. I do believe that an earned benefit based on previous service is a good idea, however, it is perhaps too early to phase these programs out entirely. Recognizing the high costs of higher education, we instead need to look at other options for complementary student aid and national service programs.

Title V builds on one of the most successful incentive programs ever passed by the Congress, the Montgomery GI bill. Basic benefits under the Montgomery GI bill, both active duty programs under chapter 30 to title 38 and Guard and Reserve programs under chapter

106 of title 10 would be increased. The increase of benefits reflects the approximate 30 percent increase in education costs that have occurred since the inception of the program 5 years ago. The basic benefits for those who served a 3-year enlistment would be $468 per month for 36 months and $325 per month for a 2-year enlistment. For Guard and Reserve members, the benefits would be $182 a month for full-time students, $136 per month for 3/4-time, and $91 per month for half-time students.

Since the Montgomery GI bill has been responsible for the recruitment and retention of the brightest and best of our young people into military service, I would not want to tamper with its success. It works, it provides outstanding educational opportunities for our young people and it is widely accepted throughout our Nation.

Overall, I think this legislation is a good start. It is an attempt to incorporate the best ideas and programs currently available and is a springboard for further discussion of the issue of national service.

There is also no question that this legislation would be costly. But, if we are able to get our Federal deficit under control today, by the time we are of a consensus on national service, we should be able to afford the costs of the program. Unless we prepare the groundwork now, we will not be able to take advantage of the opportunity before us to recruit a new generation of Americans in areas of service which enhance their own sense of citizenship, and advance—at home and abroad—the helping hand that is part of America's character.

TRIBUTE TO MOLLY LOCKE

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. WILSON. Mr. Speaker, during our July recess this year I had the high honor to pay tribute to one of the finest citizens in my district.

Molly Locke is one of our local heroes in east Texas. She works miracles for her neighbors and community, is always ready to help people in need, and is continually mobilizing cadres of helpers for the senior citizen programs that she runs. A friend of mine, W.O. (Zero) Lewis, wrote a wonderful column about Molly's miracles last December, and I insert it in the RECORD as Zero's and my tribute for a fine and special lady:

ZERO'S COMMENTS FROM CORRIGAN

(By W.O. (Zero) Lewis)

Molly Locke wasted no time in getting the ball rolling for assistance to the four Woodside children following the loss of their parents and everything they owned when their home burned. The accident occurred on a Saturday. By the following Wednesday Molly had completed the coordination and administrative work with proper government agencies to start social security and Veterans Administration assistance to the children, plus legal initiatives for guardianship of the children by their grandparents.

Learning of her speedy and untiring efforts for that family resulted in a visit and interview with Molly to talk about her work, and to talk with others on that same subject, and enlighten our readers via this column about her importance to our community and county and state with regard to health care of certain categories of local people, especially the needy (indigent) and/or elderly.

Molly Locke wears three hats. One is as manager of the Corrigan Nutrition Center, one of the best anywhere; one as County Indigent Health Care Administrator for North Polk County; and third as administrator of the Human Resource Service Center, the large building which started out as a hospital.

You might get a fight if you criticized the Corrigan Nutrition Center, or Molly, before about 45 regulars and another 20 who have meals brought to them five days a week. Managing the center also includes supervision of the Retired Senior Volunteer Program (RSVP); Outreach Telephone Reassurance which provides assurance to senior citizens who need help; Omnibus Meal Program for Hungry People; transportation for the elderly.

That network of services to help the elderly is funded through several sources including the county, Deep East Texas Council of Governments (DETCOG), U.S. Department of Agriculture, contributions to meals by participants, omnibus federal funds for feeding the hungry, plus local support from businesses and corporations.

Indigent health care is for those who are the poorest among the poor ages 18 through 64, males, nonpregnant females, for emergency or short term illnesses. Those categories of people usually are referred to Molly by other organizations or individuals. She interviews them and provides assistance through coordination with an appropriate agency which may be social security, SSI, medicaid, Department of Human Resources or others. Personnel with whom she works are exceptionally cooperative and helpful, Molly said. Many categories of illness and injury require checking with several sources. Numerous rules and laws apply to many different and specific illnesses and injuries.

Molly knows the procedures and routes to take to get results. She said, "Excellent cooperation and coordination from other agencies help me get quick action on any matter." She has high praise especially for those who work in Congressman Charlie Wilson's office in Lufkin who help cut 'red tape'. She said, "They are just great. They provide excellent, fast coordination on any federal government matter."

And Molly also was complimentary of the East Texas Legal Services office in Huntsville.

Needless to say, her work involves much correspondence, filling out numerous forms, many telephone calls and follow-up.

Molly Locke also has become quite an expert on insurance matters. She is very helpful with advice and assistance on insurance to many senior citizens, particularly with regard to help on filing and collecting on insurance. Much of that help involves supplemental insurance policies, those policies which supplement medicare payments.

On that and another subject Molly said, "Many elderly who have income of $444 per month or less are qualified for benefits they are not aware of and some have a supplmental insurance policy either related to their retirement or from another insurance company which causes them to be eligible for benefits if they will apply. I help them in those matters."

Over the years Molly has served on many committees and boards which have resulted in acquisition of vast experience and expertise in her work involving health matters. Some include Ombudsman for the state of Texas; regional health planning board; long term health care board; Home Health, Home Care advisory board; advisory committee of health for DETCOG; Corrigan Hospital District Board secretary for 18 years, and other boards which relate to health care. She also is a past director of the Polk County Chamber of Commerce.

About her work in health care matters Molly said, "It is a self-satisfying job because I can help people meet their needs."

Molly's duties as administrator of the Human Resources Center involve keeping the large building and grounds in good condition, renting office space, and related matters.

Those who know Molly Locke and are familiar with her work have high praise of her uncanny knowledge of pertinent rules and regulations and her ability to get quick results even when dealing with a multitude of government bureaucracies, rules and laws.

She is a real asset to our community and this area.

JAN SMITH/ORGANIC GARDENING

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HYDE. Mr. Speaker, I want to commend to my colleagues the work of a constituent, Jan Smith of Carol Stream, IL. Jan has been extensively involved with the bread for the world and with the harvest of peace projects. She has been recognized for her work with organic gardening, which, in a world that is becoming increasingly ecologically aware, has proven quite successful. Jan's work was highlighted in an article in the April 1990 issue of Midwest Living, which I include for your consideration.

NATURAL GARDENER IN ILLINOIS

Jan Smith makes friends with almost all the creatures that creep, crawl, or flutter into her vegetable garden. "That striped worm," she says, pointing to the critter that's nibbling on her carrot leaves, "is the larva of the beautiful black swallow-tailed butterfly. So, I just share."

An organic gardener, Jan grows her vegetables in a natural environment. Composts and earthworms, not synthetic chemicals, nourish the soil. Quiet benefactors, such as toads, birds, and ants, thrive without harming her flourishing plants.

"If we use chemicals, we kill way more than we realize, and then we have more problems," she explains simply.

Instead, Jan cleverly discourages unwanted garden guests. She sprinkles wood ashes on cucumber plants to deter many insects; pesky aphids lay their eggs on the lamb's-quarters weeds in Jan's garden, not on the cabbage; and she plants Butternut winter squash, a variety that borers simply seem to pass up.

GARDENING NATURE'S WAY

Raised on an Illinois farm, Jan started gardening organically 26 years ago, when she and her husband, Earl, a school principal, moved to Carol Stream, just west of Chicago. A flower garden (organic, of course) consumes half their front yard, and vegetables and flowers grow out back.

"When I started here, I found an insect on a bush and rushed out to buy a can of [bug spray], she recalls. "But I didn't use it after reading the label!"

Nearly three decades later, neighbors hardly bat an eye when Jan backs her trusty Mazda pickup into her yard to dump another load of straw, manure, or leaves she's collected. In fall, her phone rings with offers of leaves. Sometimes, she helps herself to bags of leaves sitting along the curbs. "I used to stop and tell the homeowners how wonderful leaves were for their soil, but I've stopped crusading like that," she says.

"PESTS" HELP OUT

Into Jan's compost pile go straw, leaves, manure, mushroom compost (from a nearby Campbell's Soup Co. mushroom farm), worm castings from an earthworm farm, grass clippings, and wood chips. After the compost seasons for a summer, Jan spreads it on her soil in fall. "I don't mix it in," she says, "because the earthworms eventually will. That's closer to the way nature does it.

Jan's vegetable patch grows in five 12×4-foot raised beds. Between each bed is a 16-inch-wide and 2½-foot-deep trench, where she piles compost. The soft trenches are her pathways; Jan can tend her plants without compacting the beds.

Admitting that her organic methods don't bring the same results every year, Jan says: "I don't always have control. But that's part of the wonder of it all—not knowing what this year's adventures will be!"

ORGANIC GARDENING ADVICE

Organic gardeners build up the soil's nutrients naturally to raise healthy plants. "Also, you avoid toxic chemicals to protect the beneficial organisms in the garden—including the gardener!" explains Jan Smith.

Here are her tips to help you get started:

Buy seeds or plants that are the most disease-resistant. Jan plants the Whopper VFNT tomato, a quadruple-disease-resistant hybrid available from Park Seed Co., Greenwood, South Carolina.

Use straw, grass, or leaves, mulch freely and frequently. Mulch keeps the soil moist and cool, suppresses weeds, and adds valuable compost.

Compost, compost, compost! But remember: Compost bins aren't garbage piles. Jan piles on grass clippings, leaves, wood chips, vegetable and flower prunings, and small branches. She lets those decompose through the summer, then spreads the compost on the soil in the fall.

Put birdbaths around your yard. Birds tend to stay near water sources in summer and control garden insects.

Learn about using beneficial weeds and insects. Lamb's-quarters weeds, for instance, not only attract aphids away from vegetables, they also draw invaluable ladybugs that feed on the aphid larvae.

SUPPORT THE BLACK LUNG BENEFITS RESTORATION ACT

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MURPHY. Mr. Speaker, I rise today to introduce a long overdue package of amendments to reform the Federal Black Lung Benefits Program. I chair the Subcommittee on Labor Standards, which has jurisdiction over the Federal Black Lung Benefits Program, and over the course of the past 6 months we have held several oversight hearings on the status of the program around the country. Our findings have been disappointing, and the testimony I have heard has made me angry and concerned.

Over the 20-year life of this program, many retired men and women have come to depend on its monthly stipend as an important means of support. These people, many elderly and infirm, have come to lose faith in the program over the last decade realizing that during the Reagan years their health and well-being could be sacrificed for the fleeting benefits of meager budget savings. This situation is both disheartening and sad. I am introducing this legislation today, because I believe it offers a chance to start over. I encourage my colleagues to support this amendment, and I would like to take this opportunity now to briefly outline my proposal.

Section 1 mandates that any claim filed between July 1, 1973, and April 1, 1980, be approved if any medical evidence of black lung is provided. The presumption could be rebutted if the claimant is able to do their usual coal mine work, if disability did not arise from black lung, or if the claimant did not have the disease.

Section 2 calls upon the Secretary of Labor to review any black lung claim filed with the Department of Labor before April 1, 1980, or with the Social Security Administration at any time. Decisions as to eligibility by the Secretary concerning such claims would be based upon guidelines established in the pre-1980 act. If a claim is approved, the claimant would be given an immediate benefit payment. If the claimant is rejected, they would be given the opportunity to introduce additional evidence to support their claim.

Section 3 exempts claimants from repaying benefits that they received in good faith for at least 2 years prior to a final decision that the claimant is ineligible. If the claimant has already been required by the Secretary to repay benefits, the Secretary will refund to the claimant the amount he or she repaid.

Section 4 extends the current moratorium on interest owed by the black lung disability trust fund to the U.S. Treasury. The bill mandates that no interest will be charged against the trust fund from October 1, 1990, to September 30, 1995.

Section 5 establishes a contingency fee system, allowing an attorney to be paid up to 25 percent of the benefits paid to a claimant. This payment would begin at the date of the claimant's retirement or from the date that the attorney takes this person on as a client. If the person is denied their claim and the same attorney continues to represent them, the attorney will be paid no more than 25 percent of the benefits from the date that appeal is filed to the date the claimant prevails or the attorney no longer represents that person.

I believe the time has arrived for us to correct inequities in the Black Lung Program. This legislation addresses the concerns of many Members of the House who have expressed an interest in this issue, and I ask my colleagues to give this proposal their careful consideration.

DOMESTIC VIOLENCE IS A CRIME; NOT A PERSONAL MATTER

HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BUECHNER. Mr. Speaker, imagine a world where there are no laws, where crimes are neither prevented nor punished, but merely a fact of life. Imagine also living in constant fear of an angry, sadistic, or drunken aggressor from whom there is no escape. Many Americans, especially women, will be going home to just such a world tonight.

Spousal abuse is a crime to which we have historically turned a blind eye. In fact, society often refers to it as domestic violence, believing that the word "domestic" somehow mollifies violence. However, violence that occurs within the home is just as serious as the violence in the streets.

As a governing body, Congress can only legislate and hope that attitudes will follow. Today, I am introducing legislation that will lay the legislative groundwork for State policies concerning family assaults. It makes strong recommendations to amend the Family Violence Prevention and Services Act to establish certain procedural protections for victims of domestic violence. The bill also plugs loopholes in State domestic violence laws by interstate enforcement and provides for the establishment of training programs for judges in the laws of the States on family violence.

As years ago in the Missouri State Legislature, my fellow Missourian, Congressman ALAN WHEAT and I joined together to protect the rights, and lives, of domestic violence victims. Those were tough times back in the State legislature over 8 years ago when we were deeply involved with the creation of Missouri's adult abuse protection law. We and others had to fight backward attitudes toward the treatment of domestic violence. However, in the end we prevailed. Although Missouri's adult abuse law is not perfect, it is considered extremely progressive and effective because it strikes a middle ground with protecting victims while offering discretion in arrest to law enforcement officers.

Mr. Speaker, there is no institution more sacred than the American family. Yet there is increasing evidence that the greatest threat to the family may come within.

I urge all my colleagues to join me and my Missouri colleague ALAN WHEAT in supporting a national standard for laws to fight abuse.

Domestic violence must be treated as a crime, and not as a personal matter.

AMENDMENT TO MEMORIALIZE THOMAS HAWKINS JOHNSON

HON. JOHN M. SPRATT, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SPRATT. Mr. Speaker, the Armed Services Committee has reported the defense authorization bill, and included in it is a special provision to which I would like to call attention. The bill notes with deep gratitude the service of the late Col. Thomas Hawkins Johnson to our country and establishes in his memory a visiting scholar program at West Point and a distinguished lecture series at the National Defense University. Colonel Johnson was director of the Science Research Laboratory at West Point, and the bill also gives his name to that institution.

In offering these provisions for adoption as part of the defense authorization bill, I made the following statement:

STATEMENT OF HON. JOHN SPRATT

Mr. Chairman, on June 27, 1990, one of the finest soldier-scientists ever to serve in any of the military services, Colonel Thomas Hawkins Johnson, died of cancer at the age of 46. Colonel Johnson spent virtually all of his adult life in service to his country; and to paraphrase what was once said of another great Army officer, his service brooks few comparisons.

He graduated from West Point, but took his commission as an officer in the Air Force. In 12 years, he was Chief of the Physics Section at the Air Force Weapons Laboratory. In time, he returned to the Army and to West Point, where he joined the faculty. To show you the breadth of his intellect, at one time or another at West Point, Colonel Johnson taught "Laser Physics" and "Tradition and Innovation in Modern American Poetry"; "Physical Chemistry"; and a "T.S. Eliot Colloquium"; "Electricity and Magnetism" as well as "Film Analysis and Criticism." He became Director of the Science Research Laboratory at West Point, and strived to make that institution a means of attracting first-rate scientists to the Academy's faculty and a means for retaining such scientists for careers in the Army.

Colonel Johnson was an applied physicist, and he applied his talents across an exceptionally broad range. He was Chairman of the Free Electron Laser Technical Advisory Group, and by my count, 15 or 16 other advisory panels to the Department of Defense and the Department of Energy. He was sought after for these panels not only because he was a talented physicist, but also because he was a gifted writer. In 1986, for example, the Institute of Electrical and Electronic Engineering conferred on him their award for the best journal article in their field. Colonel Johnson was a visiting scientist at Lawrence Livermore National Laboratory and at Los Alamos National Laboratory, a consultant to the CIA, Executive Director of the White House Science Council and, most recently, Special Assistant to Admiral Watkins at the Department of Energy. Some of you on the committee knew Tom Johnson. A couple of years ago, he held a group of us in thrall for two hours, explaining lasers and the physics of light. Many of you did not know him; but, believe me I do not exaggerate, he had few peers; his service to this country was exemplary; and I think it should be commemorated. For that reason, I am offering the three amendments now before you. The first is to name the Science Research Laboratory at West Point the "Thomas Hawkins Johnson Science Research Laboratory"; the next two establish a visiting scholar program at West Point and a lecture series at the National Defense University, both bearing the name of Colonel Thomas H. Johnson and commemorating his service as soldier, scientist, and public servant.

DRUG-FREE CITIES ACT OF 1990

HON. STEVE BARTLETT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BARTLETT. Mr. Speaker, today Mr. TOWNS and I introduced a bill entitled the Drug-Free Cities Act of 1990. The primary purpose of this bill is to reduce the use of unlawful drugs in the United States. Its emphasis is on demand reduction; its aim is to promote the adoption of tough sanctions by localities against the users of unlawful drugs and to foster public attitudes and behaviors that express intolerance for drug use. Localities that take such steps would be designated drug-free.

The drug-free designation is not intended to mean that all unlawful drugs have been eliminated from a locality. Rather, it is to be applied to those localities that have adopted serious measures that provide no tolerance for unlawful drug use and that have achieved significant, measurable results in reducing drug use.

This bill authorizes the Director of the Office of National Drug Control Policy to designate localities as drug-free; to make grants to localities that are also seeking the drug-free city designation; to collect and disseminate information about the status of drug reduction efforts and to recognize exemplary drug reduction efforts.

In order to be eligible for the drug-free designation, a county, city, town or other locality submits an application to the Director. The application includes a plan for developing and implementing local laws, policies and programs of strict, speedy and effective sanctions for drug use and for local community efforts to instill rejection for the unlawful use of drugs.

The plan must address measures related to user accountability, law enforcement, workplace policies, drug testing, education, treatment, and neighborhood initiatives, and must include goals, activities and an implementation timetable for each area. A comprehensive, effective war on drugs must include measures, like these, that make drug avoidance more attractive than drug use.

The Director would determine which applicants had acceptable plans and would designate them as drug-free city (or county) candidates. A drug-free city candidate would have up to three years to meet the goals described in its plan. Based on its actual achievements, the Director would either designate the applicant as a drug-free city, remove its candidate status, or, upon application, extend its candidate status for up to 3 additional years.

This is not principally a grant program; however, applicants with the best plans will be considered for one-time grants that can be used for start-up activities under the plan.

The Drug-Free Cities Act would authorize the Director to make grants (ranging from $75,000 to $500,000 for 3 years, depending on the size of the locality) to the highest ranking applicants. Annual spending authority would be $25 million for fiscal years 1991 through 1994.

Seventy percent of the funds would be reserved for small and rural localities with less than 50,000 population, 20 percent would be reserved for medium-sized localities up to 250,000 population, and 10 percent would be reserved for localities greater than 250,000 in population.

In addition, the Director would be authorized to report on the status of drug reduction efforts in the States, and to disseminate information about projects that have been especially effective in reducing drug use.

Efforts directed at user accountability and public rejection of drug use are working. While the war on drugs is being waged on many fronts—education, source country eradication, interdiction, treatment, and demand reduction—we know that where local communities take aggressive steps, drug use goes down measurably and dramatically.

In Overland Park, KS, a recently adopted local ordinance provides mandatory jail terms for convicted drug users.

In Chicago, IL, the Housing Authority and local police instituted Operation Clean Sweep, securing the most threatened buildings from drug dealers and organizing the residents to help them resist further encroachments.

In Los Angeles, CA, a group of residents, united under the slogan Take Our Community Back, set up neighborhood patrols to keep the 36-block area of free of drug use and crime.

Similar locally-inspired efforts are being tried, successfully, across the nation. But these efforts have been essentially uncoordinated and ad hoc.

The bill I have introduced would establish a national program to identify and designate drug-free cities, patterned after the model cities program of the 1970's. It would help galvanize and focus local drug reduction initiatives. It would give recognition to those localities that have done a particularly good job. It would provide modest grants to help localities implement their plans. And it would be a potent and effective way to achieve a climate of nontolerance for drug use among the general public.

This bill supports a workable demand reduction strategy and I look forward to working with my colleagues toward its enactment.

LEGISLATION TO RESTORE EQUITY TO TREATMENT OF PUBLIC PLANS INTRODUCED

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MATSUI. Mr. Speaker, I rise today to introduce legislation to restore equity to the treatment of public pension plans. This legislation is designed to respond to the unfortunate fact that our pension laws do not reflect the needs of our State and local governments.

Specifically, I am referring to section 415 of the Internal Revenue Code, which was initially enacted as part of the Employee Retirement Income Security Act of 1974. Its purpose is to limit the ability to accumulate retirement income on a tax-favored basis by capping the maximum amount that can either be contributed to certain plans known as "defined contribution" plans, or paid out in benefits from other pension plans known as "defined benefit" plans. Although section 415 has been amended over the years, it continues to impose two basic limits on retirement income provided by defined benefit plans, into which category the vast majority of public plans fall. Namely, the retiree's benfits cannot exceed either: First, 100 per cent of his or her average income over the 3 consecutive years of highest W-2 compensation; or second, a maximum dollar limit, which is adjusted depending upon the age at which a person retires, so that, generally, the amount is the actuarial equivalent of an annual benefit of the maximum amount at age 65. For police and firefighers, special rules enable retirement at younger ages. The current dollar limit for 1990 is $102.582.

If a pension is structured to allow even one person a benefit in excess of either of these limits, the entire plan can lose its "qualified"—tax exempt—status. If this were to take place, earnings of such pension plans would be subject to taxation and employee contributions to the plan would be made in after tax rather than before tax dollars. Furthermore, contributions made by employers would be taxable to the employee in the tax year in which they were made.

Section 4154 was amended in 1976, 1978, 1980, 1981, 1983, and 1984. The thrust of these amendments was to refine the provision and to lower the cap on amounts that could be set aside for retirement years, which had been permitted to increase with inflation.

In 1986, Congress once again decided to reduce the dollar limits. In addition, Congress decided to eliminate the $75,000 maximum benefit floor for benefits beginning at or after age 55, and below which the dollar limits did not apply, regardless of the acturial adjustment. However, in doing this, Congress was forced to confront the constitutional quandary in which several States found themselves. In these States, their courts or constitution prohibit a reduction in a benefit promised when a pension participant first becomes covered by the plan. Since these court decisions are based on State and Federal constitutional prohibitions against impairment of contracts, the rulings cannot always be overturned merely by amending State laws of State constitutions.

The solution that was devised was to exempt public plans from the new, lower dollar limits and to maintain the $75,000 floor for the limits on benefits that start on or after age 55. However, the issue required visiting in 1988, when a State came to Congress and indicated that at least one of its beneficiaries would be paid a benefit in excess of the older, pre-1986 limits to which the public plans were still subject. This isolated incident reopened the debate over the treatment of public plans. However, recognizing that the constitutional prohibitions mentioned above would force States to violate these lower section 415 limits, Congress decided to entice State and local government plans to elect the lower benefit limits. A special rule was provided that enabled a plan to grandfather benefit payments to existing employees and retirees that were in excess of pre-1986 limits if the plan agreed to adopt the lower, post-1986 dollar limits for new employees hired after January 1, 1990.

Thus, we believed we had leveled the playing field. Public plans would have the same benefit limits as private plans without forcing violations of contracts and constitutions in the various States. The 1988 rule would prohibit higher income persons in the public and private sector from developing big retirement windfalls on a tax-deferred basis.

We were wrong. Even with grandfathering, section 415 limits will still be exceeded by public plans, but not because of a few, highly compensated academics, football coaches, or public safety employees with high amounts of overtime. Thanks to the 100 percent limit, persons who make less than the Social Security wage base will exceed the limits, and in some cases, even a person who receives a pension of less than $20,000 a year will violate section 415.

How will plans violate the new section 415 limits? Let us take the hypothetical case of a highway worker hired on January 2, 1990. The following week he is fixing a pothole and is hit by a car, permanently disabling him. The disability payment he will receive will eventually cause him to receive benefits in excess of the dollar limits because of the actuarial reductions for retirement before age 65.

Take another hypothetical example. On January 2, 1990, a young woman goes to work for the city library; she marries, has children, the children go to school, and eventually leave the home. It is now 2011. The woman is still working for the library; she and her husband have little debt, so she begins deferring her pay into a deferred compensation plan. She retires in 2020. Her highest 3-year pay averaged $20,000 and she gets 80 percent of that, or $16,000. But in addition, she gets her deferred compensation money, which amounts to $4,100 a year. Now she gets $20,100 a year, exceeding the 100 percent rule by $100 per year.

The 1988 amendments create a situation where employees working side by side can get significantly different retirement benefits, despite the fact that they perform exactly the same job for the State or local government. Quite simply, this is an unfair situation, and we need to correct it.

The legislation I am introducing today will make the needed changes, so that public pension plans will not be in violation of these Federal rules. The public sector is now abusing the Tax Code by allowing high rollers to squirrel away hundreds of thousands of dollars in tax-deferred savings. Each of us know that, and it is time for the Tax Code to recognize this as well.

Mr. Speaker, public sector plans already are the subject of intense State and local government scrutiny. Public employee plans are accountable to the same taxpayers to whom we in Congress are accountable. There are significant differences between public and private pension plans, and the Internal Revenue Code should reflect this.

INEQUITIES IN PUBLIC PENSION PLANS

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. STARK. Mr. Speaker, I am joining today with my colleague from California, Mr. MATSUI, in introducing important legislation to assist public pension plans in complying with section 415 of the Internal Revenue Code.

Section 415 is an antiabuse provision which sets limits on the amount of retirement income that we as a society are willing to subsidize through our Tax Code. If a single person in a plan can receive a pension benefit in excess of the limits, then the entire plan, which may include hundreds of thousands of persons, can loose its tax-exempt status.

The bill we are introducing today recognizes that Congress did not intend to cause the loss of tax-exempt status because a police officer or a firefighter receives a benefit slightly in excess of the limits because of a disabling injury suffered as a result of trying to protect the public.

The bill addresses some inequities in the Code with regard to the treatment of public sector employers and employees. For example, the bill recognizes that school cafeteria workers and street sweepers and public health nurses are usually paid less than private sector employees. Moreover, the bill acknowledges that teachers and librarians and janitors are required to contribute to their own pension plans, while private sector workers enjoy pensions that are built, for the most part, by tax deductible contributions of their employers.

Mr. Speaker, there are serious abuses in the area of employee compensation in this country that need to be addressed. However, these abuses are not found among the people who teach our children; who provide comfort and shelter to battered women; and who fix our streets and roads. The abuses can be found among the highly compensated private sector employees and their top hat plans, which all too often provide perverse tax sheltered rewards for running once-great American companies into the ground, causing thousands of people to lose their jobs.

As section 451 stands, more than 860,000 people in my State who depend on the Cali-

fornia Public Employees' Retirement System for their retirement security and health benefits could be forced to pay taxes on their retirement savings because a young disabled policeman gets $7 dollars a month more than section 415 says he should. The bill that I am cosponsoring today does not exempt public plans from section 415. Rather, it would refocus section 415 on the few highly compensated public employees, where it rightly belongs. I commend it to my colleagues for their serious consideration and support.

REVERE BEACH STUDY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. MARKEY. Mr. Speaker, today I am introducing legislation that I hope will ultimately lead to the restoration and protection of America's first public beach. Revere Beach, located in the city of Revere, MA, holds the distinction of being the first beach in the Nation that was established for public enjoyment and preservation. It is truly one of New England's great natural assets—a beautiful crescent beach, easily accessible to an urban area, rich in history and with numerous recreational resources. The bill I am introducing today would require the Department of the Interior to conduct a study to determine the feasibility of including Revere Beach as a part of the National Park System.

It was in the early 1890's when Mr. Charles Eliot, alarmed at the rapid development and loss of natural beach and ocean panorama at Revere Beach, appealed to the Massachusetts Metropolitan Park Commission to take action and establish a public recreation area at Revere Beach. Eliot commented at the time that such a move was "a difficult and novel question, the beach being the first that I know of to be set aside and governed by a public body for the enjoyment of the common people."

Revere Beach first became a summer resort attraction in the mid-1800's because of its accessibility by rail to the city of Boston. Its popularity gave rise to numerous resort hotels, restaurants, bathhouses, and dance halls. By the early 1900's, lively and colorful amusements lined Revere Beach Boulevard including carrousels, roller coasters, fun houses, and various games of chance. Rather than evolving as an exclusive enclave of the wealthy, it represented the first time a seaside recreation area was set aside for the enjoyment of a basically working class urban population. It is a slice of American history that deserves to be presented and appreciated for generations to come.

I recall taking daily summer swims at Revere Beach as a boy. Located a short ride on the Blue Line from Boston, Revere Beach was a schoolboy's summer paradise. I have fond memories of the sun and sand, ice cream and hot dogs, and the hundreds of people escaping the city heat and bathing in the cool, clean water. Inclusion of Revere Beach in our system of national parks and recreation areas would avail future generations from around the country the opportunity to enjoy fully this historic beach and help to return it to the pristine recreational preserve of the "common people." I encourage my colleagues to cosponsor this measure, one which I believe deserves the enthusiastic support of this body.

THE IRAQI INVASION OF KUWAIT— NO NIGGLING LITTLE BORDER SPAT

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ASPIN. Mr. Speaker, the Iraqi invasion of Kuwait is extremely serious. This is much more than some niggling little border dispute half a world away.

It almost certainly threatens our interests in terms of oil supply and price. There is almost certainly going to be an Iraqi effort to drive oil prices skyhigh.

This is also the first chapter in Saddam Hussein's effort to achieve hegemony over the Arab world—what isn't clear is whether a second chapter, a military assault on Saudi Arabia, is coming soon.

WHAT ARE THE IRAQIS TRYING TO ACHIEVE?

Any understanding of what is going on in the Persian Gulf right now must start with an understanding of what Iraqi President Saddam Hussein is trying to achieve. Essentially, he has two goals.

First, this is the opening chapter in Saddam's effort to command the entire Arab world. He is a threat not just to Kuwait but to every Arab state. The irony is that the other Arabs seem oblivious to the threat. Saddam is trying to portray himself as the leader of the Arabs against a rapacious Western World, when in fact Saddam is the local hood and the Arabs are his first victims. There is the possibility that Saddam will now invade Saudi Arabia. I base that statement on the fact that he has assembled far more troops than he requires to take over Kuwait—and is still assembling them even after conquering Kuwait.

Second, this is Saddam Hussein's effort to drive oil prices skyhigh. If he invades Saudi Arabia, he will be moving to control well over half the world's oil reserves. We cannot sit idly by and watch him slit our jugular. We would inevitably become directly involved ourselves—militarily involved. Saddam must understand that. He is playing with fire and could set off a huge conflagration. The Bush administration must not leave this unsaid. It should draw a line in the sand and tell Saddam he must not cross or it will mean war.

HOW FAR WILL THE IRAQIS GO?

Given those goals, the next question is how far south Saddam will send his forces. Essentially, he faced three alternatives when he decided to wage war.

He could simply have seized the contested border regions, which would be an appropriate response to what Iraq says is the problem—but Iraqi troops have gone far beyond the border. That is clear evidence of Saddam's broader goals. This isn't just some niggling little border spat.

Alternatively, the Iraqi Army might seek to seize all of Kuwait, effectively wiping it off the map—and significantly reducing oil production from Kuwaiti wells in order to drive up the price of oil. To many, that appears to be Saddam's goal.

But there is a third alternative. Saddam may well have decided to send his troops beyond Kuwait—down the Persian Gulf littoral to take over the Saudi oilfields and perhaps as far as the oilfields in the United Arab Emirates, reducing or halting oil output to jack up the price. This is very serious—not to mention dangerous—possibility. But it is a real possibility. Saddam assembled far more troops and equipment than were needed to subdue Kuwait. Maybe he engaged in overkill because he thought it would be good for troop morale. Maybe he just likes the idea of massing troops. But maybe he consciously sized his mobilization to fit bigger goals than are apparent today. Furthermore, his mobilization is continuing today—after the collapse of the Kuwaiti military.

The United States cannot sit around as a spectator while someone of the ilk of Saddam Hussein takes over more than half the world's oil reserves.

WHAT WILL HAPPEN TO OIL PRICES?

There are three ways to address oil prices.

In the short run, prices are very volatile and panic often rules the market. Prices could soar this week even if Saddam doesn't do anything to cut output. In the short run, the market is very sensitive to marginal changes. But the short run isn't really important—unless you're speculating on the market.

In the medium term—the next few years—Saddam can probably jack up prices significantly by cutting back on production in the oilfields he occupies. Even in the medium term, prices are set at the margin. Kuwait has been producing 2 million barrels of oil a day or about 4 percent of the free world's output. Cutting its production down to 500,000 barrels a day would cut supplies by 3 percent, a significant change at the margin. A smaller reduction caused the panic of 1973.

The long term—starting in the 21st century—is something else. Excessively high prices for oil have three results. We know this from our experience after the oil shocks of the 1970's. First, high prices drive people to economize—in the United States that means small cars and lower thermostats. Second, high oil prices drive people to other energy sources—maybe even to nuclear power. Third, high prices make oil left in old fields and small fields economical. Many, many wells in Texas were simply shut down as uneconomical when oil prices plummeted in the mid-1980s. If Saddam hikes prices way up, he will make a lot of people in Texas rich and happy. And, in the process, he will reduce the demand for his own oil. We will have gone round the circle again.

In other words, in the long term, Saddam cannot rule the roost. But in the medium term, he can make life very uncomfortable for all us chickens in the roost.

HOW WILL THE ARABS REACT?

So far I've discussed this in Western-oriented terms. But there's much more to what is going on than thermostats and car sizing. Saddam has a political agenda. He wants to be the Gamal Abdel Nasser of the 1990's or the caliph of the modern era. He wants to run the Arab world.

We in the West have tended to see him as a threat to Israel. That's really not the best way to look at Saddam. He doesn't bear any good will for Israel. But his immediate goals are within the Arab world. He is, in sum, a real, immediate, and serious threat to the Arab countries today. He is only a threat to Israel if he succeeds in becoming Caliph Saddam.

The irony is that the rest of the Arab world is immobile in the face of his challenge. Today, when virtually the entire world has spoken out in defense of Kuwait and in condemnation of Iraq, the Arab world has stood mute. Arab leaders are holding meetings trying to figure out what to do. The Arab foreign ministers met yesterday in Cairo. They talked and talked—but they did nothing. That's a very bad sign. The train is coming down the track—and they are standing on the track debating whether it's going to rain or not.

This isn't due to stupidity. It's due to fear. In the Nasser years, a lot of power in the Arab world rested in the streets. In the 1970's and 1980's that wasn't true. But today, power is back in the streets. Saddam is appealing to the streets. And that scares the ruling elites, whether they be leftist or rightist.

I think Saddam has a plan for appealing over the heads of the ruling elites to the streets. I suspect—based on what he's done in recent weeks—that when Saddam makes his move to drive oil prices skyhigh, he will also announce that he is creating an "Arab development fund" capitalized with some proportion of all the revenues gained from each barrel of oil produced in Iraq and the zone he occupies. The idea will be to cement the street behind him throughout the Arab world.

He might couple that fund with an effort to topple other governments by saying the billions would be available to Arab countries run by the Baath party. More likely and more subtly, he will endeavor to control other Arab countries by making cash available only to those that sign onto some organization he will create and run.

As part of this campaign, Saddam believes he must portray the current confrontation as "the Arabs versus the rest of the world." It must not be perceived as "Saddam versus Kuwait" or—heaven forbid—as "Saddam versus the other Arabs." Whatever we do, we must avoid helping him gather the Arab masses under wing. We need to act in ways that will not drive other Arabs toward him.

I must say that Saddam has done a very good job to date of selling his ploy to his Arab audience. And other Arab elites have walked right into his trap with their eyes wide open. For example, when Britain blocked the export of parts for his "super gun" and we blocked the export of nuclear triggers, Saddam responded that he was simply trying to advance the cause of Arab science and technology while the West was pressing a plot to keep all Arabs deep in poverty and ignorance.

After Saddam made this self-serving charge, officials and editorial writers throughout the Arab world fell all over one another trying to be the most vocal echo of this mumbo-jumbo.

In sum, Saddam will try to portray anything we do to help Kuwait as Western/imperialist/colonialist interference in the Arab world. The Bush administration should try to speak and act in ways that do not make his job easier. We need to portray this as Saddam versus the rest of Arab world.

WHAT'S THE MILITARY SITUATION?

Let me turn for a moment to the military situation. With regard to ground forces in place, Saddam had an advantage of 13 to 1 over Kuwait in terms of mobilized troops. His troops are battle hardened. He placed all his Republican Guard units—the cream of the crop—along the border over the last week.

Should Iraq go beyond Kuwait, the Republican Guard is a better force, man-for-man, than anything it will meet. There are two key questions, however.

First, what about Iraq morale? The Iraqi soldier fought well, when he defended his own soil against the Iranians. But he didn't fight well when he was inside Iran. There may be a distinct attitude of: "I will die to protect my home, but I don't want to die to advance Saddam's personal political agenda."

Second, what about Iraqi long-haul logistics? Can they operate over long distances? They ran a good logistics system during the Iran-Iraq war, but supply lines were relatively short and constant, that is, the Iraqis weren't moving supply lines forward every day. They might have a problem operating a few hundred miles from their border. This, not incidentally, has major implications when measuring the threat to Israel.

WHAT CAN WE DO MILITARILY?

Somuch for the Iraqi military. What about the American military? What can we do? The short answer for the Kuwaitis is: not much. This war is evolving very quickly half a world away. It is chiefly a ground war. In fact, the part we care the most about—who holds the oilfields—is exclusively a ground war. We can move more ships into the area, but that's more a political move than a military one.

However, if Saddam goes beyond Kuwait, and runs into trouble because of the morale and logistics problems mentioned above, we will need to address the option of getting involved in the ground war.

If Saddam stops at the Kuwait/Saudi border, that doesn't mean this war is simply history. The Saudis will be very nervous. They may well change their mind about an American military presence in the region. They may eagerly want us to station troops in Saudi Arabia.

Indeed, they may need outside help desperately to make sure that they aren't target No. 3—after Iran and Kuwait—in Saddam's effort to prove to history his military brilliance. An American troop deployment might, however, provide fodder for Saddam's us-against-them scenario. In that case, troops from somewhere else might be deployed to Saudi Arabia. For several years, a large body of Pakistani troops were deployed in Saudi Arabia. With suitable income generation permitted, I suspect Pakistan might be willing to deploy there again. And Pakistani troops are superb fighters, more than equal to the Iraqi challenge.

WHAT SHOULD WE BE DOING RIGHT NOW?

We cannot ignore the blatant aggression against Kuwait. There are several policies the Bush administration should pursue—some of them obvious and some not so obvious.

Start with the United Nations. The Security Council has already condemned the invasion. Most people see little further role for it. The United Nations may be viewed as a weak organization, but it is important in this incident nor as a source of military power but as an avenue for isolating Saddam politically and spiking his us-versus-them campaign.

Next, we should pursue a united front with the Soviets. Secretary of State Jim Baker publicly told the Soviets they should halt arms deliveries to Iraq. Unfortunately, that sounded more like a confrontation with Moscow than a cooperative approach. It would be better if we jointly indicated anger at Baghdad, including the hint of joint military action against Baghdad. I'll be watching what comes out of Mr. Baker's meeting today with Foreign Minister Shevardnadze in Moscow.

We need to discourage Baghdad from going beyond Kuwait. The administration should be talking of the possibility of American military involvement if Saudi Arabia is attacked. Thursday morning, President Bush said, "We're not discussing intervention." He should have pointed to Saudi Arabia and said, "We can't standby just watching while Saddam tries to cut our oil jugular." He should draw a line in the sand—quickly. We need to tell Saddam Hussein that an invasion of Saudi Arabia means war. At this time we are not in a very good position to back up that threat—in a couple of weeks we could be. But the problem is that, if Saddam goes after the Saudi oilfields, we could not sit by and let 50 percent of the world's oil reserves fall into his hands. And that message needs to be delivered this week while it might influence his decision.

Next, we need to discourage the Israelis from getting involved. If they try to take advantage of this, it will make the confrontation into one of Arabs versus the rest of the world rather than Saddam versus the rest of the world. There are some people who think Saddam may lob a few missiles at Israel in order to make this into a broader confrontation and cement the rest of the Arabs around him. Israel should not rise to the bait. It should indicate to Syria and Jordan that it would be the better part of valor on their part to face down Saddam and that Israel will not take advantage of they did so.

There are some military moves we should contemplate, beyond the obvious movement of warships closer to the scene. For example, with Saudi consent, we could dispatch AWACS aircraft to Saudi Arabia. This is the simple and easy and nonprovocative response—dispatching and American military unit that is unarmed. But I think that's too weak a response in this case. Alternatively, we could, again with Saudi consent, dispatch one or more F-15 squadrons to Saudi Arabia. This would be a much more substantial demonstration of practical support. The announcement could be made immediately and the

planes could be in place very quickly. I think this would be viewed worldwide as a real and meaningful commitment to the Saudis—though it does nothing for the Kuwaitis. It might, of course, help Saddam portray this as the Arabs against the West—but if the Saudis specifically ask, and ask for Air Force help only, not ground troops, I think it would help more than harm.

Dealing with the oil problem, and in order to try to quell any market panic, the administration ought to announce that it will dip into the strategic petroleum reserve [SPR] if there is any shortage whatsoever. This is why we have spent a fortune on the SPR. Let's get some mileage out of it.

Finally, the administration has already frozen both Iraqi and Kuwaiti assets. That's good because it prevents the Kuwaiti puppet regime from turning Kuwaiti assets here over to the Iraqis. Some of our allies have announced similar freezes. We should encourage all our allies to do the same. The Kuwaitis have about $100 billion in oil surplus assets scattered around the world. Much of it is in fixed assets, for example, gas stations in Europe and the United States, but a substantial sum is liquid.

CONCLUSION

In summary, there are three avenues we should pursue now.

Militarily, we need to draw a line in the sand. We are moving some ships toward the region and the administration should be talking to the Saudis about the possibility of moving U.S. Air Force units to their bases. Then, the planning staff at the Central Command should start cranking up a response for a worst case scenario—because the worst case is no longer laughable.

Politically, we must posture to keep to keep this from becoming an Arabs-versus-the-world confrontation. We must let the Arabs know we are ready to help if they can get their act together, but we cannot impose ourselves.

Diplomatically, we must endeavor to maximize world pressure on Iraq and minimize Israeli involvement.

TOYOTA ATTEMPTS GAG ORDER

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BROOKS. Mr. Speaker, I recently joined more than 20 colleagues in signing an amicus legal brief challenging an unprecedented political gag order imposed on American citizens by Toyota, the Japanese auto manufacturing giant.

The subject of this attempted gag is a company call Mid-Atlantic Toyota [MAT], one of the three remaining independent distributions of Toyota automobiles in the United States. For 20 years, MAT has distributed the popular automobiles in five States and the District of Columbia.

MAT contends that the distributor was forced to agree to a 1987 renewal of its distribution agreement, in which Toyota stipulated that MAT would be barred from petitioning elected representatives and Government officials on every level about any grievances. Toyota is trying to enforce a political gag order.

MAT is challenging this violation of its first amendment rights in Federal court. Also behind MAT's legal action are serious allegations of fraud by Toyota since 1987.

Mr. Speaker, I find this attempted gag order repugnant to the fundamental first amendment rights of all Americans. This issue may merit hearings concerning current disputes between this embattled American distributor and Toyota. But we cannot learn the facts behind this case if this gag order is enforced on the distributor.

I urge my fellow Members to sign onto the amicus brief.

THE TILTROTOR AND OIL CONTAINMENT

HON. PETE GEREN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GEREN of Texas. Mr. Speaker, the old adage has it that lightning never strikes twice in the same place. That may or may not be true for lightning but we all know that it is certainly not true for all disasters. And we have had that brought home to us all too forcefully in the last few days.

In less than 1 week's time we have seen two oilspills in the bay off the coast of Galveston, TX. That small area is one of the most fertile and productive areas in the entire gulf coast for aquaculture and marine wildlife. Because of the barrier islands, it is also one of the most confined areas with limited chance for the oil to disperse into the open sea. All of this gives us a potential for an environmental disaster of the first magnitude.

There is no doubt in my mind that the Coast Guard is doing its best to minimize the impact of those spills with the equipment available to them. And that brings me to the point I wish to make. The Coast Guard, unfortunately, had little or no equipment available on a timely basis to contain the oil once spilled. And the same was true for the *Megaborg* spill last month and the *Exxon Valdez* a year ago. That does not have to be the case, however.

The Department of Defense is currently testing a new concept in aviation, the tiltrotor aircraft. The tiltrotor aircraft takes off and lands like a helicopter yet flies as a fixedwing turboprop with twice the speed of a helicopter. The military tiltrotor, the V-22 Osprey, has been developed to satisfy a variety of military requirements. Four of those aircraft have been flying for some time.

This aircraft appears to have great potential and flexibility that extend to missions yet to be considered. One such mission is exactly what was needed in Galveston Bay—the containment of oilspills. The tiltrotor would have allowed containment task forces to reach the spill area quickly loaded with enough equipment to do the job. The tiltrotor can fly at speeds up to 350 MPH ranging to 1,200 miles carrying a load up to 20,000 pounds. Once at the spill site, the tiltrotor can convert to helicopter mode, hover, and deploy containment equipment to localize the spill area and minimize the cleanup effort. Nothing in the current or projected Coast Guard inventory has this capability.

Mr. Speaker, we should insist that the Coast Guard look closely at oilspill mission requirements and see how to apply the tiltrotor aircraft to the task. Tiltrotor technology is available today and is proven. The employment of this modern technology will not keep lightning from striking or oilspills from occurring but it can certainly help control the damage.

WE MUST BOOST OUR ENERGY SELF-RELIANCE

HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ANDREWS. Mr. Speaker, the last few days we have watched in agony and anger as the invasion of Kuwait unfolded. Iraq has proven once again that it is a brutal country led by a mad man. This crisis may be felt most deeply by the famlies in Texas who still have not heard from loved ones missing along the border of Kuwait.

This crisis in the Middle East also brings home the United States' lack of a national energy policy.

The year of 1973 was a painful lesson of what happens when the United States becomes too dependent on foreign oil and those sources decide to cut back on production. The shortages meant long lines at the gas pump and skyrocketing prices.

We are—like 1973 and 1977—becoming too dependent on foreign oil. In 1989, 44 percent of the oil used in this country was supplied by foreign sources—the second highest level in our history. In January of this year, we hit an all-time high: 54 percent of the oil we used came from overseas.

And yet we seem to be doing nothing to change this trend. We are doing nothing, as OPEC raises prices and tightens their hold on our country.

Meanwhile, oil production here at home has plunged to the lowest level in 25 years. The amount of drilling has dropped since oil prices were slashed in half in 1986. Even the Alaskan output—which had offset drilling declines for the rest of the States—has been dropping since 1988.

Compounding the problem is the fact that exploring for new oil has dropped by three-quarters in the last 5 years. Fewer seismic exploration crews were at work last year than in any year since World War II. Texas had more exploratory rigs operating in 1949 than the entire United States did last year.

Not only does this hurt our national security, it damages our economy. Right now, oil imports account for nearly half of our trade deficit. Environmentally, the fewer barrels of oil we import lessens the chance that oil tankers will soil our shores.

We cannot let this continue. We have to boost our energy self-reliance. We need a national energy policy that provides incentives for domestic energy production. We cannot

allow ourselves to be held hostage by a country that terrorizes even its neighbors.

BRIAN BAKER—EXEMPLARY REPRESENTATIVE OF THE 10TH DISTRICT OF ILLINOIS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PORTER. Mr. Speaker, I was very happy to sponsor as a House page this summer Brian Baker, a high school junior from Glenview in my 10th District of Illinois.

Brian has done an exceptional job here in Washington, not only in fulfilling the often mundane duties of a page, but more importantly in representing the people of our district. Often I tell my colleagues in the House of Representatives that I am privileged to represent a constituency that is perhaps the best educated, most well informed and most committed in all America. Now, along comes Brian Baker to prove it.

Brian is a top student at Glenbrook South and a top athlete as well. But beyond the qualities of intelligence and athletic ability, Brian, you will find, reflects his parents and his home life. He is sincere, polite, anxious to be helpful, interested to learn, ambitious to succeed. He also has a great sense of humor. He's the kind of young person that would make any parent proud and he's the kind of young person from the 10th District that makes his Congressman proud, as well.

I suspect if he did not already have it, he has caught a severe case of Potomac fever over the last 3 months that may last him the rest of his life. I cannot say that it is necessarily good for Brian, but I think ultimately it will be very good indeed for America. Government needs people like Brian Baker to be interested and to pariticipate. And if out of his exemplary service in the capitol in the summer of 1990 an ambition for further service to our country should be born in Brian, I will be the first to applaud and encourage it.

Brian has promise written all over him. His proud Congressman and the entire staff of the Porter office that has come to know him and like him so much, wishes Brian all the best in all that he undertakes and is keeping a place open for him when, as they know he will, Brian returns, wracked with the fever, to this small city on the Potomac.

A TRIBUTE TO BILLY GENE JACKSON, SR.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. DYSON. Mr. Speaker, I rise today to salute one of the distinguished residents of Maryland's First Congressional District, Mr. Billy Gene Jackson, Sr. I have known Billy Gene for many years and he is an outstanding and respected leader of Maryland's Eastern Shore. He has never been afraid to fight for what is right and he has earned the respect of countless friends.

Billy Gene Jackson will soon be retiring and leaving the warmth of his friends for the warmth of the Florida sun. He shall be remembered, however, and he will be missed. I would like to take this opportunity to share Billy Gene's accomplishments with my colleagues

On Friday, September 7, 1990 at the Delmarva Center, Delmar Maryland, a Farewill Dinner will be held for one of Wicomico County's outstanding individuals. Mr. Billy Gene Jackson, Sr., will retire from AT&T and relocate to Florida.

Billy Gene Jackson was born August 30, 1937 in West Palm Beach, Florida, where he lived until he moved to Salisbury in 1955 with his wife Lois. He worked doing farm labor work and later worked as a carpenter's helper. He worked at Peninsula General Hospital and in 1959 began working for C&P Telephone Company as a garageman, and has spent the last thirty years working for the telphone companies.

Things at the phone company were a bit different then. There were separate bathrooms for Blacks and Whites, Blacks couldn't even go to their own union meetings, and any company social events were separate functions. The Equal Opportunity Law was not in effect. "There was a lot of prejudice in a natural way." He tolerated it because there was no way to fight it.

In 1964, the Wicomico County Chapter of the NAACP summoned him to a meeting. They plotted to get Blacks into the craft positions instead of just garagemen and other similar menial jobs. A group of seven, he being the only C&P employee, met with company executives in Baltimore and threatened action if Blacks were not put into better positions. The company gave in.

Mr. Jackson was very active in the community, especially working with kids. "I love kids more than anything in the world." His daughter, Toni, wanted to go to a track meet in Baltimore. After he saw all those kids running around in uniforms, he wanted the same, for any other child that was interested. Hence, the beginning of the Lake Street Sprinters which has evolved into the Salisbury Youth Development Organization. These kids went all over the United States for about nine years. Mr. Billy, as as was called, was also the first Black football and basketball coach at Red Shields Salvation Army Boys Club. He coached there for some fifteen years. The Red Shields used a draft system to pick teams. The Black boys were chosen last and never put into the thinking positions. After two successful seasons of using a Black quarterback, his boys became like first round draft picks. A racial stereotype was destroyed. Some of his boys have gone on to play college and professional ball.

In 1978, the New Directions political group was formed. Its sole purpose was to bring about political and social change for Blacks. Also in 1978, Mr. Jackson became the first elected Black on the Wicomico County Central Committee, New Directions also helped to elect their first Black Councilman, Mr. Emerson Holloway.

Mr. Jackson has received awards and recognitions too numerous to mention. He has been a pioneer in many areas.

Mr. Jackson is a very humble person. He is concerned about the welfare of our kids. When he sees kids standing on the street using and selling crack, he prays.

Someone asked Mr. Jackson how he would like to be remembered. He told them, "I am sombeody who cared, somebody who never had a whole lot and never wanted a whole lot." He wants to be remembered as a "gift from God."

Mr. Jackson, Wicomico County and the State of Maryland is losing a great person, but we will never forget what you have accomplished here to make things better. Good luck, God Bless You, and we all love you.

Billy Gene Jackson has three daughters, one son and several grandchildren.

Mr. Speaker, I join Billy Gene's many friends who wish him the very best in his future endeavors.

INTRODUCTION OF THE MEDICARE CONTROLLED SUBSTANCE ACCOUNTABILITY ACT OF 1990

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. STARK. Mr. Speaker, I am introducing today the Medicare Controlled Substance Accountability Act of 1990, and related legislation, which will prevent widespread drug abuse associated with prescription narcotics, amphetamines, and tranquilizers, and also significantly reduce injuries and health care costs associated with the indiscriminate, inappropriate, and illegal prescribing of these drugs. The elderly are especially susceptible to serious injuries and health care costs which result from the unnecesary prescriptions for these drugs.

In the war on drugs, few people recognize that almost one-third of the hospital emergency room drug overdose cases are from pharmaceuticals, rather than the better known street drugs. In human terms, this is estimated to be as many as 88,000 people per year. The sources of these drugs of abuse are not foreign cocaine barons, or clandestine laboratories, but doctors and pharmacies located in our neighborhood office buildings. Some sell the drugs illegally, others are scammed by doctor shoppers which roam from doctor to doctor to fraudulently obtain drugs of abuse. Still other abusers print up their own prescriptions and fill them in pharmacies through elaborate schemes. The sources are many, but the result is the same—crime, fraud, drug abuse, and increased costs to the Federal health care system.

In addition to the substantial problem of pharmaceutical drug abuse from illegal or fraudulent prescriptions, the unnecessary prescribing of these drugs, especially to the elderly, is also a major health care concern. Recently, the HHS inspector general reported that overmedication and adverse reactions to drugs are prevalent and have probably become epidemic among the elderly. The OIG noted that a 1987 review of Medicare hospital bills showed an estimated 200,000 older adults were hospitalized due to adverse drug reactions or experienced a drug reaction while hospitalized. The report also noted 2 million elderly are addicted or at risk of addiction to minor tranquilizers or sleeping pills because of using them daily for at least 1 year.

These social concerns are reason enough to look seriously at the prescriptions for controlled substances. But another reason is that the taxpayers of the United States are subsidizing, at the rate of $1 billion per year, these illegal, fraudulent, or unnecessary prescriptions. In 1988 Medicaid spent an estimated $525 million on drugs that are favored for street sales. This does not include costs for fraudulent office visits that accompany illegal prescribing. The HHS-OIG found one doctor that prescribed one-forth of all the Medicaid tranquilizer prescriptions in a State. OIG also has reported that the annual cost of drug-related hospital admissions and associated care for the elderly ranged from $4.5 to $7 billion per year. An OIG computer review in Washington DC, found over 600 previously unidentified Medicaid patients obtaining excessive amounts of these drugs of abuse.

My legislation will require that prescriptions for abusable drugs be written on accountable prescriptions. It is modeled after a program, known as the Multiple Copy Prescription Program, currently in effect in several States, including California, New York, Illinois, and Texas. These programs have demonstrated great success in reducing prescription forgery, patient fraud, illegal sale by doctors and pharmacists, and unnecessary prescriptions. In addition substantial health care cost savings are now being recognized in those States.

The most dramatic of these savings occurred 18 months ago when New York State required an accountable prescription for tranquilizers—drugs such an valium, librium, and xanax. These drugs had not been found effective in treating anxiety beyond 4 months. Yet New York found 300,000 persons had been prescribed these tranquilizers for use every day for a year or more, with one-third using tranquilizers every day for more than 7 years. Indeed, one-half of those receiving tranquilizer prescriptions for over a year were over 65, and were thus at high risk for tranquilizer induced memory loss, accidents, hip fracture, chemical restraint in nursing homes, and other physical and mental impairment. New York health authorities identified at least 60,000 hospital days that were needed to treat accidents attributable to tranquilizer use each year. In addition, New York has seen a 95-percent reduction in prescriptions to a group of 3,400 persons suspecting of diverting, a 31-percent reduction in tranquilizer-related emergency room admissions, and between $18 to 24 million in savings in reimbursement for the costs of these drugs.

The bill I am introducing today requires that a doctor write prescriptions for these addictive narcotics, amphetamines, tranquilizers, and similar drugs on a prescription pad which is accountable to the individual doctor. The pharmacy that fills the prescription must report it to an appropriate State agency for monitoring. Several major benefits of this program are realized by preventing the illegal or unnecessary prescriptions—forgeries are eliminated; patient fraud and illegal prescribing are deterred and detectable. Most importantly, the accountable prescription reminds the doctor that prescribing these drugs requires special attention.

Each State implementing a program, even on a limited basis, realizes a 35- to 50-percent reduction in distribution of covered drugs without any restrictions on the doctor's professional judgment. The only impact on the doctor is that after the treatment decision is made, the medication order is recorded on a different prescription pad. Surely, no legitimate doctor would object to being accountable for his prescribing decisions, especially in light of the drug abuse and fraud prevention benefits which have been shown.

There have not been any problems with protection of patient privacy under the State programs, however, I have long been concerned with issues of privacy, and have ensured that patient privacy is protected in this legislation. If any group, particularly those in the mental health field, feel that stronger privacy protections are needed, I am happy to entertain their suggestions.

I have drafted this bill to minimize paperwork burdens, because I am concerned about problems of paperwork burdens on pharmacists, and would like to work with pharmacists to ensure that this program does not add to the regulatory burdens on small businesses.

Spending health care dollars for fraud, illegal and unnecessary prescribing is inexcusable when we have so many unfunded health care initiatives for the aged and poor. I am very pleased to introduce this bill which will aid our Nation in dealing with the very serious problem of drug abuse, provide an additional protection to the elderly who are at particular risk from unnecessary prescriptions for psychoactive drugs, and result in substantial health care cost savings through Medicare and Medicaid without any reduction in benefits.

ENDING THE HEALTH CARE CRISIS

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. NEAL of North Carolina. Mr. Speaker, we are all aware of the health care crisis this Nation is facing. My office has a huge amount of mail on the inadequacy of our health care system. My home office staff spends more of their time and effort helping people in need because of health care problems than for any other reason. Across the Nation, Americans are suffering because they do not have access to the health care they need. They are counting on Congress to provide a solution.

Mr. Speaker, our system is costly and ineffective. The statistics are appalling. Thirty-seven million Americans cannot afford health insurance of any kind. Millions more are inadequately insured. Yet the United States spends over $500 billion a year, 11 percent of our gross national product, on health care.

The veterans' health care system is not functioning properly. Millions of senior citizens cannot afford long-term home and institutional health care. Access to health care in rural areas is deteriorating as some rural hospitals are forced to go out of business. Medical malpractice premiums are skyrocketing. Confidence in the Medicare system is deteriorating. There is a shortage of prenatal and perinatal services. The list of problems seems to be endless.

Mr. Speaker, I must confess that I do not have a solution to the health care crisis. I am sure that many of my colleagues are in this same position. Therefore, I believe it is essential that we bring together our country's most competent experts on health care to examine this issue in a comprehensive manner. To accomplish this goal, I have introduced legislation to create a National Health Care Policy Commission, modeled on the blue ribbon panel which proposed an overhaul of the Social Security system in 1983.

Mr. Speaker, I believe we must bring together health care professionals, representatives of insurance companies, employers with health plans, consumers of health care, experts on health care financing, Congress and the administration and other knowledgeable people, if we are going to find a workable solution. I urge my colleagues to support this effort to create such a panel. We must take action to resolve the health care crisis so that all Americans will have access to quality, affordable health care.

MILLIE IS NOT SUFFERING ALONE

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. STOKES. Mr. Speaker, In today's Washington Post, a news article calls attention to the fact that President Bush's dog, an English springer spaniel named "Millie", has developed lead poisoning from eating paint chippings off the White House which is being renovated.

In the article, the President called lead poisoning "a terrible thing." He went on to describe how Millie came into contact with the lead. "Flaking paint, licking her toes," he said. "The paint falls—you know, there're redoing the White House and she's licking her feet and she's ingested lead."

The article further notes that lead poisoning can cause vomiting and anemia and affect the nervous system, kidneys, and reproductive organs.

Mr. Speaker, it is appalling that the dangers of lead poisoning has to be brought to the Nation's attention through the White House dog. Every day in our Nation 3 million children suffer the effects of lead poisoning. Poor, inner-city children who live in older buildings are particularly vulnerable. According to the Centers for Disease Control, there may be as many as 21 million houses in this country which still have lead-based paint. The sad fact is that lead poisoning is preventable. But it takes commitment, the resources and a coordinated effort to eliminate this devastating disease.

Mr. Speaker, I am certain that all of us wish Millie well. We also hope that this incident will make the President and others in our Nation focus on the children of this Nation who are sick from lead paint poisoning.

H.R. 4593: THE SAN CARLOS MINERAL STRIP ACT OF 1990

HON. JON L. KYL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. KYL. Mr. Speaker, I rise in support of H.R. 4593, the San Carlos Mineral Strip Act of 1990.

The bill will resolve a dispute, which dates back to the early part of this century, over the administrative control over approximately 11,853 acres of land on what is known as the San Carlos Mineral Strip.

Mr. Speaker, it might be helpful if I outlined very briefly some of the history that underlies this legislation.

The south boundary of the San Carlos Reservation was originally established by President Ulysses S. Grant in 1872.

In 1896, the San Carlos Tribe conditionally ceded a total of 232,000 acres of mineral strip land to the United States. In ratifying the agreement, Congress expressly provided that "the lands so surrendered shall be open to occupation, location, and purchase under the provisions of the mineral-land law only."

San Carlos Mineral Strip lands were subsequently added to the Crook National Forest—now known as the Coronado National Forest—by Presidential proclamations on July 1, 1908 and March 21, 1917, These actions were prohibited by the act of June 10, 1986. They also violated section 24 of the act of March 3, 1891, which authorized the Federal forest reserves to be created from public lands, not Indian lands, as well as section 10 of the 1891 act which stated: "that nothing in this act shall change, repeal or modify any agreements or treaties made with any Indian tribes for disposal of their lands, or of any land ceded to the United States to be disposed of for the benefit of such tribes. . ."

In 1963, Undersecretary of Interior Carr issued an order restoring the subsurface rights in the mineral strip to the San Carlos Apache Tribe, subject to any valid existing rights.

In 1969, Secretary Udall issued an order restoring the surface rights in the mineral strip to the tribe. However, the Forest Service objected that national forest lands were not subject to the authorities under which the Secretary of the Interior's order was issued, and that there was no other authority by which the Secretary of the Interior could legally transfer national forest lands to the tribe.

Mr. Speaker, H.R. 4593 settles this dispute once and for all. The bill affirms that the mineral strip lands are a part of the San Carlos Apache Reservation, and it modifies the boundaries of the Coronado National Forest accordingly.

Since the tribe had indicated that it may seek damages against the United States as a result of Federal occupancy of the lands—and it would be inappropriate to try to influence the outcome of the potential litigation here—we have included language to make it clear that nothing in the act can be construed to enhance or diminish any such claims. The tribe will have to make its case in the courts should it choose to do so.

Finally, the bill includes language directing the Secretary of the Interior to acquire the permanent improvements on the grazing allotment located on the mineral strip lands which are subject to a grazing permit from the Forest Service on the date of enactment. The Secretary is directed to pay $122,842 for such improvements, an amount based upon a BIA-obtained appraisal in 1978.

Before closing, Mr. Speaker, I want to thank the chairman of the Interior Committee, MO UDALL, and his staff for moving this bill so quickly.

This is a fair settlement to an old problem, and I urge my colleagues' support.

REPRESENTATIVE J. WILL ROBINSON: PUBLIC SERVANT

HON. HOWARD C. NIELSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. NIELSON of Utah. Mr. Speaker, it was with great pleasure that I recently introduced legislation to memorialize the selfless service and lasting contributions of Utah's longest serving Member of this distinguished body: J. Will Robinson. My bill would name the Federal building in Provo, UT, the "J. Will Robinson Federal Building." While admittedly a small gesture, I think it appropriate we honor this public servant in such a manner.

Born in the town of Coalville, Summit County, UT, on January 18, 1878, Congressman Robinson attended public school until the sixth grade, when he was forced to drop out in order to help support his family. From then on, he would work for a year and then attend school for a year, until he was finally able to complete his public education. He eventually enrolled at Brigham Young Academy, later renamed Brigham Young University, in Provo, UT.

During his undergraduate years, Robinson developed somewhat of a reputation as a scrapper. Among other things, he would hustle bets at country fairs and the like, claiming he could beat a horse in a 40-yard race. Given the fact he could indeed run the 100-yard dash in under 10 seconds, he would usually come out on the winning end. In 1905, perhaps to settle down a bit, he married the former Birda Billings in the LDS Salt Lake Temple, the mother of his six children.

Prior to and after completing his undergraduate studies in 1908, Robinson entered the field of education as a teacher and principal of Unita Academy in Vernal, UT, and later as principal of Wasatch High School in Heber, UT. From there, he went on to get his juris doctorate from the University of Chicago in 1912, the same year he was admitted to the Utah bar. He established a private practice in Provo, and was admitted to practice before both State and Federal courts. This period was punctuated by a brief stint as the county attorney of Utah County, 1918–21, and an unsuccessful candidacy for State attorney general in 1924.

Robinson also made a name in business, serving as director of the Provo Building & Loan Association, and as vice president of the Springville-Mapleton Sugar Co. On top of all of that, he served 10 years as a member of the University of Utah Board of Regents. In 1932, he was elected to Congress.

During his seven terms in Congress, Robinson was well known as an innovator and defender of issues important to the West. As chairman of the Committee on Public Lands, and later the Committee on Roads, he made his mark in the areas of public land management and reclamation. He considered the highlight of his career his role in helping pass legislation that created the National Highway System. Congressman Robinson was defeated in the 1946 election.

After leaving Capitol Hill, Robinson remained in Washington, serving for 2 years as the Director of Grazing in the Office of Land Management, Department of the Interior. In 1949, he retired from Government service and returned to Utah.

In 1962, his wife of 57 years passed away. A year later, he moved to Escondido, CA, to live with a daughter, where he remained until his death in December 1964 at the age of 86.

Congressman J. Will Robinson was a man of many talents and a caring heart, eager to do his part to help build his community, his State, and the West that he so loved. Survived by four of his children, three of which are still with us today, I think he would be pleased to know that, many years later, another Utah Congressman is standing before this body this day, introducing legislation to honor his many contributions. In fact, I wouldn't be surprised if somewhere, somehow, he is collecting on another bet, knowing that this day would come.

INTRODUCTION OF THE PRESIDENTIAL AWARDS FOR EXCELLENCE IN ENVIRONMENTAL EDUCATION ACT

HON. SHERWOOD L. BOEHLERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BOEHLERT. Mr. Speaker, I am pleased today to introduce a bill which would establish a Presidential awards program, to be administered by the Council on Environmental Quality, to recognize and stimulate excellence in environmental education in grades kindergarten through 12. I am joined in this important endeavor by my colleague and friend, Mr. TOM CARPER of Delaware.

As cochairman of the House Working Group on Acid Rain, I have been working hard in Congress to pass meaningful acid rain pollution laws since I came to Congress in 1983. My interest in the issue was sparked by my constitutents, who lament the degradation of the Adirondack Park in upstate New York. During the development of acid rain legislation, I have been in contact with a number of school teachers in my district. I have been amazed by the accuracy, creativity, and care that these educators used to teach their students about pollution problems in our country and the consequences of our actions on the environment.

These teachers and students have set up accurate acid rain monitoring programs, and have reported their findings to their peers, family, friends, and elected officials. They are learning first hand of the necessity of passing pollution control laws to protect our natural resources. The students were truly knowledgeable about the causes of acid rain, and have demonstrated in science fairs the affects of acid rain upon buildings, wildlife, forests, lakes, and streams in the nearby Adirondack Mountains. This creative participation in learning about our environment does not end in the classroom; rather, it instills in youth a sense of responsibility and commitment to personally undertake changes in their own lifestyle for the good of the environment around them.

This legislation recognizes the many educators across the Nation who undertake these kinds of special efforts for their students. I have worked with the Council on Environmental Quality to prepare a bill that would provide uniform cash awards of up to $5,000 to two teachers every year from each State, and one from the District of Columbia and one from Puerto Rico. This Presidential awards program will be administered by the Council on Environmental Quality, which will work with other government agencies to encourage participation in this program. A letter of endorsement from the administration follows, along with the text of the legislation.

EXECUTIVE OFFICE OF THE PRESIDENT, COUNCIL ON ENVIRONMENTAL QUALITY,
Washington, DC, June 1, 1990.

Hon. J. DANFORTH QUAYLE,
President, U.S. Senate, Washington, DC.
Hon. THOMAS S. FOLEY,
Speaker of the House of Representatives, U.S. House of Representatives, Washington, DC.

DEAR MR. PRESIDENT AND MR. SPEAKER: Please accept the enclosed proposed legislation for consideration by Congress. The Presidential Awards for Excellence in Environmental Education would establish a high level program, administered by the Council on Environmental Quality, to recognize and stimulate excellence in environmental education in elementary and secondary schools.

Pollution prevention, rather than after-the-fact clean up, is the long-term solution for our environmental problems. Education plays a key role in prevention. Teachers can lay a strong foundation in tomorrow's adults by teaching environmental awareness and means to prevent and minimize pollution. Further, outstanding teachers often work without the recognition they deserve. This proposal addresses both concerns.

The President proposes to stimulate environmental education by establishing Presidential awards to recognize excellent teachers. The awards are one small, but important, component of the solutions to protecting our resources and environment for future generations.

The Office of Management and Budget has advised that there is no objection to the presentation of this legislative proposal to Congress, and that its enactment would be in accord with the program of the President.

My staff or I can provide additional information as required.

Thank you for your consideration.

Sincerely,

MICHAEL R. DELAND,
Chairman.

TRIBUTE TO COMMODORE ROBERT FIELD STOCKTON, USN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. LAGOMARSINO. Mr. Speaker, this year is the bicentennial of the Coast Guard and the 75th anniversary of the U.S. Naval Reserve. The local Navy Reserve is commemorating this occasion with a permanent memorial dedicated to Commodore Robert Field Stockton, USN.

Commodore Stockton's long naval career which he began at age 17 as a midshipman is marked by many notable accomplishments. He helped establish the country of Liberia in Africa and was the first man to bring an iron-hulled, screw-propelled vessel to the United States.

Commodore Stockton played a very special and significant role in Santa Barbara's history. During the Mexican-American War he was ordered to take command of the American squadron in the Pacific. Anchoring his frigate, the U.S.S. *Congress*, off Santa Barbara, he led his men ashore and successfully captured Santa Barbara from the Mexicans. Following the capture of Santa Barbara and Los Angeles, Commodore Stockton was named Governor and commander in chief in the new territory. His service to his country did not end there. After returning home to his native New Jersey, Commodore Stockton was elected to the U.S. Senate where he served with distinction.

As a Navy veteran myself, I agree that it is very appropriate for Santa Barbara, especially the citizen-sailors of the Naval Reserve, to honor Commodore Stockton with a memorial at the Santa Barbara Naval Reserve Center. The center itself is a historic building designed in the local spanish motif located on Santa Barbara Harbor.

Both the Naval Reserve, this year celebrating its 75th birthday, and the Coast Guard, celebrating its bicentennial, have long been a part of the Santa Barbara waterfront. Following the Coast Guard's motto of "semper paratus"—always ready—both forces are prepared to serve and protect our Nation and its freedom and liberty. I welcome this opportunity with the dedication of the Stockton memorial to pay special tribute to the Naval Reserve and the Coast Guard.

CAMPAIGN COST REDUCTION AND REFORM ACT

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. LEWIS of Florida. Mr. Speaker, we have talked about campaign reform throughout this Congress and have promised action. In keeping with this pledge, tonight we have taken the first real step in that direction. I voted in favor of H.R. 5400 in order to move this process forward. While I do not endorse all of the points of this legislative package, it is my hope that those areas of concern which I have highlighted within the following comments will be addressed in conference before I consider support of the conference report on the Campaign Cost Reduction and Reform Act of 1990.

POLITICAL ACTION COMMITTEES

I have supported measures which appropriately limit amounts which can be contributed to candidates through PAC's and thereby limiting the large funding role they have held in the past. I have cosponsored Congressman PAT ROBERTS' Congressional Campaign Reform Act of 1989, H.R. 1707, and Congressman BOB MICHEL'S House Republican campaign reform plan, H.R. 5030. If we are to embrace true reform, we must take a strong stand in this area.

LEADERSHIP PACS AND PAC TRANSFERS

I support the provision to eliminate the ability of candidates and officeholders to sponsor PAC's.

BUNDLING—SOFT MONEY

I am pleased to see the loopholes closed in the areas of bundling and soft money. These are questionable campaign practices and their elimination will help restore integrity in the area of campaign finance.

LOCAL FUNDING

I was disappointed that H.R. 5400 did not contain the provisions in the GOP substitute which would have provided that a majority of a House candidate's funds be raised from local residents. This has been an area which I have supported and hope that the conferees will include in final passage.

PUBLIC FINANCING

While there was no provision in H.R. 5400 for public financing, it is part of the Senate's campaign reform package. I am strongly opposed to the principle of taxpayer financed elections and would vote against any campaign reform package that included this provision.

INDEPENDENT EXPENDITURES

I am pleased to see this formally gray area of the present law addressed in this legislation. Its inclusion better defines the law and strengthens regulations on these expenditures.

SPENDING LIMITS

While I endorse spending limits, I have concerns regarding the setting of a single cap on spending limits. Clearly, the needs of candidates in high growth States and numerous media markets differ greatly from those candidates in States who deal with limited media markets and have far fewer constituents to reach. Without addressing this discrepancy, incumbents and challengers alike will be limited in having the appropriate tools to educate the voters. Caps which address the uniqueness of each State must be addressed in conference. This point will be pivotal to my final support of this legislation.

CANDIDATE CONTRIBUTION LIMITS

Limiting personal funds is a good provision and one that will eliminate an advantage that has been unfair in the past.

NATIONAL GUARD ALIEN ENLISTMENT ACT (H.R. 5458)

HON. BENJAMIN A. GILMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GILMAN. Mr. Speaker, I would like to take this opportunity to draw the attention of my colleagues to a bill I have introduced today, H.R. 5458, the National Guard Alien Enlistment Act.

This measure is the result of a careful evaluation and revision of H.R. 3971, legislation granting lawful residence status to certain aliens enlisting in the U.S. Armed Forces.

H.R. 3971 is intended to alleviate the critical manpower shortage currently facing several National Guard and Reserve units throughout our Nation. On September 21, 1989, an earlier version of this measure was the subject of hearings before the House Judiciary Subcommittee on Immigration, Refugees, and International Law.

In response to comments from the Department of Defense, the Department of State, and the Immigration and Naturalization Service, I revised the original legislation to narrow its focus and making it more responsive to the bill's original intent.

H.R. 3971 was the result of those revisions. However, once again the legislation has been revised based upon the suggestions of the Defense Department.

This new measure is virtually identical to the previous measure with three important exceptions:

First, the alien enlistment program would be authorized for a limited period of 3 years, and the Secretary of Defense will report to the Congress on the success of the program at the close of the 3-year program.

Second, a limit of six States with a personnel strength of less than 95 percent, instead of 90 percent, of the authorized strength of that State's National Guard as of September 30, 1990, would be eligible.

Finally, the new legislation would allow 1,000 aliens, rather than 3,000, to enlist in the National Guard each year in those eligible States.

Mr. Speaker, I am requesting that the full text of H.R. 5458 be inserted at this point in the CONGRESSIONAL RECORD, and I invite my colleagues to cosponsor this measure.

H.R. 5458

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AUTHORITY TO ACCEPT ENLISTMENTS IN THE NATIONAL GUARD FROM CERTAIN ALIENS.

Section 302 of title 32, United States Code, is amended by adding at the end the following new subsection:

"(d)(1)(A) Under regulations to be prescribed by the Secretary concerned, an original enlistment in the Army National Guard or Air National Guard of a designated State may be accepted during the three-year test period (as defined in paragraph (8)) from a person who is not a citizen of the United States and who is otherwise described in paragraph (2) if the actual total personnel strength of the Army National Guard and Air National Guard of that designated State, at the time of such enlistment, is less than the baseline strength for that designated State.

"(B) For purposes of this subsection, the term 'designated State' means a State or Territory, Puerto Rico, or the District of Columbia that is designated by the Secretary of Defense, acting through the Chief of the National Guard Bureau, for the purposes of this subsection. The Secretary of Defense shall make six such designations.

"(C) For purposes of this subsection, the term 'baseline strength', with respect to a designated State, means 95 percent of the total authorized strength of the Army National Guard and Air National Guard of that designated State as prescribed by Federal law or regulation for September 30, 1990.

"(2) A person referred to in paragraph (1) is a person who is otherwise qualified for an original enlistment in the National Guard and who as of the date of the enactment of this subsection—

"(A) is not admitted to the United States for permanent residence; and

"(B) is present (whether or not lawfully) in the United States (including any commonwealth, territory, or possession of the United States).

"(3)(A) A person may not be enlisted under this subsection unless the person, in addition to taking the oath prescribed under section 304 of this title, declares an intention to become a citizen of the United States.

"(B) The enlistment of a person under this subsection shall be void if—

"(i) the person does not apply for adjustment of status under section 245B of the Immigration and Nationality Act within 90 days after the date of such enlistment, or

"(ii) the Attorney General determines that the person, having applied for such adjustment of status, is not eligible for such adjustment of status.

"(4) The number of persons enlisted under this subsection in the National Guard of a designated State may not exceed 1,000 during any fiscal year. The Governor (or, in the case of the District of Columbia, the commanding general) shall determine the apportionment of enlistments under this subsection between the Army National Guard and the Air National Guard, except that at least two-thirds of such enlistments shall be in the Army National Guard.

"(5) The term of an enlistment under this subsection may not be less than six years.

"(6) If, within 60 days after the beginning of the war or of a national emergency declared by Congress, the number specified in paragraph (4) is not increased by law, the President may increase such number as the President considers appropriate. Any such increase may remain in effect for the duration of the war or national emergency.

"(7) In the case of an alien enlisted under this subsection who is released or discharged from service under any condition other than honorable, the adjutant general for the National Guard from which the alien was released or discharged shall notify the Attorney General of such release or discharge within 90 days after the date of the release or discharge.

"(8) For purposes of this subsection, the three-year test period is the three-fiscal year period beginning on the first October 1 after the date of the enactment of this subsection.

"(9) At the end of each fiscal year during the three-year test period, the Chief of the National Guard Bureau shall submit to the Secretary of Defense a report describing the operation of this subsection during that fiscal year. At the end of such three-year test period, the Secretary of Defense shall submit a report to Congress on the operation of this subsection. That report shall include the Secretary's evaluation of success of the enlistment program under this subsection and the desirability of continuing the program."

SEC. 2. ADJUSTMENT OF STATUS OF ALIEN ENLISTED MEMBERS AND THEIR FAMILIES.

(a) PROVIDING FOR LEGALIZATION.—Chapter 5 of title II of the Immigration and Nationality Act is amended by inserting after section 245A (8 U.S.C. 1255a) the following new section:

"ADJUSTMENT OF STATUS OF CERTAIN ALIENS ENLISTED IN THE NATIONAL GUARD

"SEC. 245B. (a) TEMPORARY RESIDENT STATUS.—

"(1) PRINCIPAL ALIEN.—The Attorney General, in consultation with the Secretary concerned (as defined in section 101(8) of title 10, United States Code) or the appropriate chief executive officer of the pertinent State, territory, or possession, shall adjust the status of an alien to an alien lawfully admitted for temporary residence if the alien applies to the Attorney General for such adjustment of status and, in the application, establishes the following:

"(A) The alien is accepted for enlistment and is enlisted in the Army National Guard or Air National Guard pursuant to section 302(d) of title 32, United States Code.

"(B) The alien is admissible to the United States as an immigrant, except as provided under subsection (c)(2).

"(C) The alien has not been convicted of any felony or 3 or more misdemeanors committed in the United States.

"(D) The alien has not assisted in the persecution of any person or persons on account of race, religion, nationality, or membership in a particular social group.

"(E) The alien was in the United States as of the date of the enactment of this section and has resided continuously in the United States since such date.

"(2) SPOUSE AND MINOR CHILDREN.—The Attorney General shall adjust the status of an alien to an alien lawfully admitted for temporary residence, if the alien applies to the Attorney General for such status and establishes, in the application, the following:

"(A) The alien is the spouse or child of an alien lawfully admitted for temporary residence under paragraph (1).

"(B) The alien is admissible to the United States as an immigrant, except as provided under subsection (c)(2).

"(C) The alien has not been convicted of any felony or 3 or more misdemeanors committed in the United States.

"(D) The alien has not assisted in the persecution of any person or persons on account of race, religion, nationality, or membership in a particular social group.

"(E) The alien was in the United States as of the date of the application of the principal alien under paragraph (1) and has resided in the United States continuously since such date.

"(3) TERMINATION OF STATUS.—The Attorney General shall provide for termination of temporary resident status granted to an alien under this subsection if—

"(A) it appears to the Attorney General that the alien was in fact not eligible for such status,

"(B) the alien commits an act that (i) makes the alien inadmissible to the United

States as an immigrant, except as provided under subsection (c)(2), or (ii) is convicted of any felony or 3 or more misdemeanors committed in the United States, or

"(C) the alien described in paragraph (1)(A) was released or discharged from service described in such paragraph under any condition other than honorable.

"(4) AUTHORIZED TRAVEL AND EMPLOYMENT DURING TEMPORARY RESIDENCE.—The provisions of section 245A(b)(3) shall apply to an alien granted lawful temporary resident status under this subsection in the same manner as such provisions apply to an alien granted lawful temporary resident status under section 245A(a).

"(5) CONFIDENTIALITY.—The provisions of paragraphs (5), (6), and (7) of section 245A(b) shall apply to applications under this subsection in the same manner as they apply to applications under section 245A.

"(b) ADJUSTMENT TO PERMANENT RESIDENCE.—

"(1) CERTIFICATION OF SERVICE.—An alien described in subsection (a)(1) may apply to the Secretary concerned or to the chief executive officer referred to in subsection (a)(1)(A) for a certification that the alien (A) has at least 6 years of honorable service in the Army National Guard or Air National Guard and (B) was not released or discharged from such service under any condition other than honorable. If such an application is granted, the Secretary or officer shall issue such certification.

"(2) ADJUSTMENT OF STATUS OF PRINCIPAL ALIEN.—The Attorney General shall adjust the status of any alien provided lawful temporary status under subsection (a)(1) to that of an alien lawfully admitted for permanent residence if the alien applies to the Attorney General for such adjustment and establishes, in the application, the following:

"(A) Subject to paragraph (4), there has been a certification made with respect to the alien under paragraph (1).

"(B) The alien is admissible as an immigrant, except as provided under subsection (c)(2).

"(3) ADJUSTMENT OF STATUS OF SPOUSE AND CHILDREN.—The Attorney General shall adjust the status of any alien provided lawful temporary status under subsection (a)(2) to that of an alien lawfully admitted for permanent residence if the alien applies to the Attorney General for such adjustment and establishes, in the application, the following:

"(A) Subject to paragraph (4), there has been a certification made with respect to the alien's spouse or parent under paragraph (1).

"(B) The alien is admissible as an immigrant, except as provided under subsection (c)(2).

"(4) WAVIER OF SERVICE REQUIREMENT.—Upon the petition of the Secretary concerned or the chief executive officer, the Attorney General shall waive the certification requirement of—

"(A) paragraphs (2)(A) and (3)(A) for any alien if the alien was wounded in action or held in captive status (as defined under section 559 of title 37, United States Code), or

"(B) paragraph (3)(A), if the alien's spouse or parent was killed in action or otherwise died while in the line of duty.

"(c) WAIVER OF NUMERICAL LIMITATIONS AND CERTAIN GROUNDS FOR EXCLUSION.—

"(1) WAIVER OF NUMERICAL LIMITATIONS.—The numerical limitations of sections 201 and 202 shall not apply with respect to aliens covered under this section.

"(2) ADMISSIBILITY DETERMINATIONS.—The provisions of section 245A(d)(2) shall apply to determinations of admissibility under this section in the same manner as they apply to determinations of admissibility under section 245A.

"(d) TEMPORARY DISQUALIFICATION FROM CERTAIN PUBLIC WELFARE ASSISTANCE.—The provisions of section 245A(h) shall apply to aliens granted lawful temporary resident status under this section in the same manner as such provisions apply to aliens granted lawful temporary resident status under section 245(a), except that any reference to a 'five-year period' shall be considered to be a reference to a 'two-year period'.

"(e) EXPEDITED NATURALIZATION.—In the case of an alien who is granted lawful permanent resident under subsection (b) and who re-enlists in the Army National Guard or the Air National Guard for an addition term of 6 years, there shall be counted toward the period of physical presence and residence required for naturalization under section 316(a), the period of physical presence and residence while the alien was in lawful temporary resident status under subsection (a).".

(b) CLERICAL AMENDMENT.—The table of contents of the Immigration and Naturalization Act is amended by inserting after the item relating to section 245A the following new items:

"Sec. 245B. Adjustment of status of certain aliens enlisted in the National Guard.".

VIOLENCE AGAINST WOMEN MUST END

HON. LOUISE M. SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Ms. SLAUGHTER of New York. Mr. Speaker, today I am proud to introduce with Representative BARBARA BOXER the Violence Against Women Act. Through this legislation we are taking a tough stand against this heinous but all-too-common type of violent crime.

In the United States today, a woman is beaten every 18 seconds; raped or attempted to be raped every 3½ minutes; and murdered by a husband or boyfriend every 6 hours. In 1989 alone, the Rochester police in my own district reported 3,886 domestic violence offenses. Rape is the fastest growing crime in our country, and it's estimated that 50 to 90 percent of all rapes are never reported to the police. In Rochester, calls to a rape crisis hotline have increased an average of 15.3 percent each year from 1980 to 1989, and 47 percent of the callers do not report the attack to the police. These shocking statistics demand that our judicial system enact legislation on the Federal and State level to break this cycle of violence against women.

The Violence Against Women Act increases Federal penalties and sentences for those convicted of sex offenses. It doubles sentences for repeat offenders. This is critical because rape is the crime with the highest rate of recidivism, according to Linda Fairstein, the head of the Manhattan district attorney's sex crimes unit.

The bill requires attackers to make financial compensation to their victims, and for the first time would make victims of violence based on their gender eligible for the compensatory and punitive damages available to others whose civil rights have been violated. The bill provides grants to governments in areas of high intensity crime to develop effective law enforcement and prosecution strategies to combat violent crimes against women and creates a commission to study violent crime against women.

These and other provisions of this bill will be effective only if they are copied and adopted by every State. They certainly will make a difference to the victims in my congressional district if New York State adopts similar legislation.

This year, Arthur Shawcross was arrested and indicted for murdering 10 women in the Rochester area. Outrage mounted when it became known that in 1972, Shawcross had been convicted of raping and murdering a little girl, sent to prison, and paroled after only 15 years. He was on parole for other crimes when he committed the 1972 murder. Had New York State enacted legislation like the bill we are introducing today, sentencing guidelines would have required that Shawcross have served at least 18 years for the rape and murder. He would still be in prison now, and the 10 women he is accused of murdering might still be alive today.

This July, the Rochester Democrat and Chronicle ran a superb, thought-provoking five-part series on violence against women. For 6 months, reporters Susan McNamara and Deborah Fineblum Raub researched these articles, interviewing experts on law, counselors, victims, and violent men who have attacked women. I commend these reporters, the newspaper, and photographer Karen Mitchell for devoting so much time and space in the paper to promoting public awareness of this critical issue.

The series highlights the extent of the problem, the many effects of violence against women, and the avenues available for help. It sympathetically and concisely discusses the facts and feelings of victims such as Kathy Corey, who was brave enough to come forward and prosecute the man who raped her in 1977, and who now volunteers to counsel other rape victims on how to recover from this terrible crime. The series echoes the reasons why last year and again this year I introduced legislation designating October as National Domestic Violence Awareness Month. If we can begin talking about the dimensions of the problem we can begin pursuing a solution.

I recommend the Democrat and Chronicle series to anyone interested in learning about the extent and horror of violence against women. Because this issue is so important, and because this series so eloquently examines violence against women, I am including in the RECORD excerpts from this extraordinary series.

I hope that Congress will set an example to States by toughening Federal law setting the consequences for those who attack women and by working with local police to stop the problem. We can do that by passing the Violence Against Women Act.

MANY SHARE A CYCLE OF PAIN

(By Deborah Fineblum Raub)

This was absolutely the last time she would let her husband beat her, Gloria said, eyes puffy and red from a night of crying.

But, she admitted, she has said that before.

In fact, after every beating she swears she'll never let it happen again. Then, in the morning, thinking about her children's need for their father, her own financial helplessness, and the fervor of her husband's apologies, she forgives him * * * again.

And the cycle of domestic violence begins again in the night of Gloria's suburban Rochester home.

"Everything will be fine for a while, then it starts all over," she said.

The accusations: "I'm a lousy mother, I'm a lousy housekeeper and cook, I'm being unfaithful * * * I'm a nothing." And then come the beatings.

Cheryl and Jill are seated near Gloria (not their real names) in the living room of the Alternatives for Battered Women shelter. "'You're just a nothing,' that's *exactly* what my boyfriend says to me before he slaps me around," said Cheryl.

These women are not alone. Domestic violence—committed by a husband or boyfriend, ex-husband or ex-boyfriend—is the most common violent crime against women.

Consider the following:

Domestic violence is the most frequent cause of injury to women, more prevalent than auto accidents, rapes and muggings combined, according to former U.S. surgeon general C. Everett Koop.

Men commit 91 percent of all assaults on their spouses or ex-spouses.

Twenty percent of visits by women to emergency medical services are caused by battering.

Forty percent of divorce cases in the New York State cite physical violence as the reason for termination of marriage.

Four women die each day in the United States from domestic abuse.

In the 10 months of 1989 for which figures were compiled the Rochester Police Department reported 3,886 domestic violence offenses, up from 2,071 in 1988. "And these numbers are just a fraction of all the women who get abused; most of them don't ever report to authorities," said Diana Compos, project director for the state-wide Spanish-language domestic violence hotline.

Experts say that even those episodes of domestic violence that are reported are just beginning to be perceived as crimes. "For many years our judicial system did not put an end to it. They called it a family feud and looked away," said University of Rochester anthropology professor Ayala Gabriel. "Now it's against the law but the attitude remains. We've only just begun to take the laws seriously."

The lag in societal attitudes has frustrated Phyllis Korn every day of the last 10 years that she's worked as executive director of Alternatives for Battered Women in Rochester. "Traditionally domestic violence has been viewed by society as just a domestic squabble, something that's OK as long as it's kept behind closed doors."

It's an attitude that's been absorbed so deeply that it is reflected in the English language, she added; the expression "rule of thumb" derives from an old English law that says a man may beat his wife, as long as the stick is no thicker than his thumb, she said.

"And, even though the law now tries to protect a woman against violence in her home, the same people who will intervene when someone attacks a stranger on the street, will still turn aside if it's a man hitting 'his' woman."

Domestic violence is a crime that tends to victimize a woman over and over again; on the average, a woman returns to an abusive husband or boyfriend five to 10 times, Korn said. "Some women are beaten for months, others for years before they say, 'No more.'"

Why do women caught in this cycle remain? Terry Servis, former Monroe County assistant district attorney, said, "It's tough to explain why some women permit this to go on. But some feel trapped. They have no other visible means of support, they may have children, they may feel there is no alternative."

Alternatives for Battered Women runs one of approximately 1,200 domestic-violence shelters across the United States. The not-for-profit service also provides a 24-hour hotline for abused women, ongoing support groups and individual counseling, and temporary housing for battered women and their children.

"They're more fortunate (in Rochester) than those in rural areas, where there's usually no support at all for abused women, and they're better off than the ones living in big cities where the services they have are overwhelmed," said Korn.

The shelter, which occupies an upper floor of a downtown Rochester office building, houses as many as 26 women and children at a time, serving nearly 500 each year. Security is a primary concern, with dead bolts on all doors, closed-circuit television cameras focused on the foyer.

"The ultimate need here is for safety," Korn said. "This is a place where a woman can relax enough to tackle the critical issues she needs to resolve."

Only at the shelter could Jill escape from her boyfriend's beatings. "I kept going home because I'm not safe on the streets, but I'm not safe at home either."

Jill said that the battering began after she gave birth to their first child. That's not uncommon, Korn said, adding that it's often during pregnancy or after a baby is born that the violence starts.

Battering during pregnancy is the subject of an ongoing study by researcher Judith McFarlane at Texas Women's University in Houston. McFarlane is the recipient of a Centers for Disease Control grant used to track the pregnancies of 1,200 women in two states. Results from preliminary research show that a woman battered during pregnancy has four times the chance of delivering a low birth-weight baby—one at risk for early death or complications—as a woman not battered. She is also more likely to miscarry.

"Ours is the first study to track women through their pregnancies and document the effects of abuse on them and their babies. What we're hoping is that the study will encourage all health professionals to ask questions about abuse of the women they see, pregnant and otherwise," McFarlane said. "Only then can we educate women about the risk of violence in their lives and help them stop the cycle of domestic violence. Knowledge is power, it really is."

Korn said the shelter provides not only "a setting that is indignant that a woman should be subjected to this crime" but counseling support to help her make decisions and an opportunity to be with other women in the same situation.

The National Crime Survey reports about 2.1 million women were beaten in their homes between 1978 and 1982. Deborah White of the National Coalition Against Domestic Violence in Washington, D.C., estimates the current number of abused women nationally between 3 million and 4 million each year.

Of this number, the Bureau of Justice Statistics identifies 57 percent of the beatings are done by spouses and ex-spouses. Boyfriends and ex-boyfriends make up another, uncalculated, percentage of the national total.

The leap in the numbers of reported cases stems largely from increased community pressure on police to make more arrests, better community education, and more shelters and services for abused women, White said. "So, even though it's still a stigma, more are coming forward," she said. "But it's also true that we have just become a more violent society, with the incidence of this kind of crime up."

In her office, Brigitte Abraham of the Monroe County District Attorney's Domestic Violence Bureau sees "a steady rise in felony assaults and murders that are domestic violence."

And she's glad that women are reporting more than in the past. "The difficulty is that these are very isolating crimes. It's humilitating because it says that you were stupid enough to pick somebody who beats the poop out of you."

On an average day, Rochester police receive 10 calls reporting domestic violence, said Sgt. Steve Di Gennaro, who is in charge of the family victim service section there.

More than a year ago, the department adopted a pro-arrest policy, one that gives a police officer on a domestic violence call the right to arrest the abuser, even if the victim is reluctant to press charges. This is within the officer's power if he or she sees physical evidence of abuse. Previously, abusers were arrested only when the victim agreed.

"So the officers' hands were tied," said Di Gennaro. Now, under the pro-arrest policy, the abuser can be removed from the home, defusing—at least temporarily—a violent situation.

"Pro-arrest policies mean that police are looking at these cases in a different way," said Abraham. The change is responsible in part for the increase in the number of domestic violence calls to police, she added. "More women are calling now as society doesn't condone it as much as it used to."

Becky McCorry heads Family Crisis Intervention Team, (FACIT) a program of the Rochester Police Department that sends mental health professionals into homes torn by domestic violence. "Pro-arrest provides the support an abused woman needs, because the dynamics of control in domestic violence means that most women are too paralyzed to make the decision to have the batterer arrested."

But McCorry said that pro-arrest is only the first step. "Sometimes people think that the arrest stops a problem. It doesn't. Long-term counseling—separately for batterer and victim—is what's needed."

Korn said judges "are a key link."

"I think many of our judges are heads-and-shoulders above those in other areas, but we still need to establish a greater understanding of the domestic violence cycle with them."

Sheer volume is the primary challenge facing those courts that deal with domestic violence, said Judge Leonard Maas, who has been a Monroe County Family Court judge for nine years. "The number of our cases has mushroomed completely."

Maas said his court regularly issues temporary orders of protection to keep the

abuser out of the home. "And matters are brought back to court in a relatively short time." But there is room for improvement in the way the courts deal with battered women, he said, adding that he's looking forward to read recommendations forthcoming from the New York State Commission on Domestic Violence.

Despite a legal system and community agencies working to be responsive to battered women, many women remain in their violent homes.

"It's a cycle; by the time a relationship has escalated to violence, a women's self-esteem is very low," Korn said. "She thinks it's her fault. She's heard, 'If you hadn't been a whore, if you weren't ugly, if dinner was ready on time, if the house was straightened, I wouldn't have to do this for so long; she feels she's worth nothing."

Jill, however, talking about her life in the shelter's living room, wiped her eyes, blew her nose and made a quiet resolution to fight back.

"I'm not going to stand there and take it anymore," she said. "Each time he's tried to make up, I've fallen for it. The message we get from the legal system is that beating your woman is a little bit acceptable, but I'm realizing that nobody deserves to be beat."

FEAR SHRINKS A WOMAN'S WORLD

(By Susan McNamara)

Last December at a local shelter for battered women, a woman recalled the indignation her husband felt as he read newspaper accounts of Rochester's serial killer.

"'Geez,' he'd say, 'I can't believe the cops are letting this guy run around killing women.'"

When she asked how that violence differed from the violence he inflicted on her, he replied, "That's different. You're my wife and I can do what I want to you."

Violence against women takes many forms—from a gruesome death at the hands of a serial killer to rape in a woman's own home by her husband.

In the United States, a woman is beaten every 18 seconds. Every 3½ minutes a woman is a victim of rape or attempted rape. Every four hours a woman is murdered. Every six hours a woman is murdered by a husband or boyfriend, according to the U.S. Bureau of Justice Statistics and the Federal Bureau of Investigation.

And while some crimes can be committed as easily against men—and men, in fact, are crime victims more often than women—few would argue that men feel the same fear as women.

It is this fear that forces women, not men, to live in a smaller world: one that is brightly lit after sundown, one that has deadbolt locks and security alarms, one that encourages travel in groups, not alone.

It is this fear that forces many men to worry about wives, girlfriends and daughters—when they work late, when they jog, when they go shopping in the evening.

It is a fear so ingrained that many women don't even recognize it. Yet it amounts to a denial of women's basic rights to life, liberty and the pursuit of happiness.

"I'm not rich but I have the right to live safely in my own neighborhood, to pick up the paper and not read that someone in my family is dead," said Denise P. Logan, of Rochester, in a speech at the "Take Back the Night" rally and march downtown in February. Logan's cousin, Kimberley Denise Logan, was found murdered last year on Meigs Street. There have been no arrests in the case.

"This is not a look-the-other-way issue," she said. "It's time to get busy."

Violence against women, whether it's murder, rape or domestic violence, doesn't occur in a vacuum. The crime doesn't stop with the victim; it touches everyone, from family and friends to the larger community.

However, it is hardly a 20th-century phenomenon, psychologists say. The image of the cave man with the club dragging around a woman by a hank of hair may not be far off the mark. The violence is probably as old as relationships between men and women.

"It's a fairly traditional thing for women to be beaten, killed and raped," said Leslie R. Wolfe, executive director of the Center for Women's Policy Studies in Washington, D.C.

"As depressing as that fact is, it's true. The serial killer in Rochester sounded like Jack the Ripper. We're talking about a continuum here.

The issue has become a popular one in some political circles.

It was more than a decade ago—before it was fashionable for male politicians to address the subject—that Rep. George P. Miller, D-Calif., first spoke out on violence against women. He says he was accused by a colleague of "trying to take the fun out of marriage."

Miller is chairman of the Select Committee on Children, Youth and Families of the U.S. House of Representatives. Among the committee's work was the 1987 hearing on "Women, Violence and the Law" in Washington, D.C.

"Violence against women is an everyday occurence in America," he says. But despite great strides in the last decade or so, "there is still much work to be done."

Last month, congressional hearings were held in Washington on legislation calling for tougher penalties for violence against women.

The proposed bill would make gender-related violence a civil rights violation, entitling the victim to sue for punitive damages. Also, $300 million in grants would be provided to create a commission on violence against women.

Consider these statistics:

More than half of all violent crimes against women are committed by people they know. Yet, according to the Office for Victims of Crime of the U.S. Department of Justice, violent acts against women are the crimes least likely to be reported.

A girl who was 12 years old in 1989 has a 73 percent chance of being a victim of violent crime—rape, robbery or assault—sometime in her life.

In all categories of violent crime, women are victims in numbers disproportionate to the crimes they commit. A woman is more than twice as likely to be murdered as to murder. She is 12 times more likely to be a victim of domestic violence than an abuser.

Ninety-nine percent of serial killers are men; between 80 and 90 percent of victims of serial killers are women.

Between 1977 and 1986, the number of rapes reported to police was up 43 percent, making it the fastest growing type of violent crime in the United States.

Nationally between 1978 and 1982, 2.1 million women were battered at least once. However, it's hard to estimate how many battering incidents occur locally. Four jurisdictions in Monroe County don't keep records of family trouble or domestic disturbance calls. The Rochester Police Department reports as many as 10 arrests a day, with most of the violence directed against women.

Experts say that illegal drugs also may account for some of the violence against women.

"They definitely contribute to the climate of violence," said Phyllis Korn, executive director of Alternatives for Battered Women in Rochester. "I would never say that drugs or alcohol or stress make people violent but for those who need to control others, it makes things much worse."

But American culture should share some of the blame for the climate of violence, too.

"We call ourselves peace-loving but it's a cliche. Look at our heroes," said psychologist Elaine F. Greene, who has a private practice in Brighton. "Over the decades, we have admiration for macho figures—Batman, Superman, Rambo."

Even in romantic films, the depiction of dominant men and submissive women may give mixed messages.

"You've seen the old movies, where a women is slapped across the face and brought to her senses, or where she's picked up and carried off as she beats her little fists on the man's back, said Ayala H. Gabriel, assistant professor of anthropology at the University of Rochester. "The myth is that women love it. Violence and sexuality get mixed, and a myth is propagated."

The case against pornography is even more dramatic. Research studies haven't always agreed that depicting women in non-violent ways in pornography causes antisocial behavior. However, most experts agree that pornography portraying sex in combination with violence—sadomasochistic themes, bestiality and portrayals of rape, for example—does contribute to an individual's tendency toward aggression.

Other possible effects include stimulation of rape fantasies, an increased callousness about rape, loss of compassion for women as rape victims, and greater acceptance of so-called rape myths—for example, that women "ask for it."

Another serious concern is that men, women and children of all ages and backgrounds are becoming inured to all kinds of violence, including violence against women. The average 18-year-old, for example, will watch an estimated 16,000 murders on TV in his lifetime. American culture is rife with incidents of violence in favorite pastimes—from sports to rock concerts—and in the language—including vengeful slogans on T-shirts and bumper stickers.

That worries many of those who are touched by the phenomenon—women's advocates, law enforcement officals, mental health practitioners, social workers, shelter and crisis center workers, as well as the victims and their families.

"We're much too comfortable with violence," said Harry Reis, professor of psychology at the University of Rochester. "There has been a lot of research done on desensitization. Essentially, every time people see or hear of a violent act it makes them that much more used to it. We know that was the case in Rochester with the serial killings. If these were 14-year-old girls from good neighborhoods, imagine the outrage."

The mind also distances itself from fear of crime by blaming the victim.

"The victims gets re-victimized by society, and the scenario gets played out again and again and again," said Kathy Cottrell, assistant director of Rape Crisis Service of

Planned Parenthood of Rochester and the Genesee Valley Inc. "The most famous example is the woman jogger (in Central Park) who was brutally raped and very nearly killed. She was blamed for her own sexual assault. I've heard this a million times: 'It would never happen to me. I wouldn't jog there. Or you'd hear: 'I would never be a victim of a serial killer. I don't walk the streets.' "

Indeed, some women's advocates find disturbing irony in the increase of reported rapes on college campuses.

"Intellectually we try to empower women. We encourage them to make the best of their capabilities. But is it wrong to do that, to encourage them to reach for the brass ring, to give them a false sense of their own capacities, when the world is such a dangerous place? It may come down to a basic, physical kind of danger for which they'll be totally unprepared," said Bonnie Smith, former director of UR's Susan B. Anthony Center for Women's Studies, now with Rutgers University.

"It's also important to acknowledge that this is just another burden that women alone carry. We have to take extra measures to protect ourselves in the world in a way that men don't have to."

COMMEMORATING THE CHANGING OF COLORS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. RITTER. Mr. Speaker, the times they are a changin' from maize, raw umber, and orange-yellow to dandelion, wild strawberry, vivid tangerine, and cerulean. I am referring, of course, to the colors that are childhood itself: Crayola crayons.

The tots of America have spoken and Crayola has responded by replacing eight of the traditional crayons with brighter and bolder colors. On August 7, the retiring crayons will be inducted into the Crayola Hall of Fame in Easton, PA.

With the new colors, the future leaders of America will see not a blue-gray future, but a fuchsia future with a wild strawberry, white, and teal blue flag flying proudly over the land. The medium is the message and I expect bolder plans and brighter prospects from future generations using these new colors.

Even though the colors are a changin', Crayola crayons have more staying power than teenage mutant ninja turtles, more moves than a hoola hoop, and more tricks than a pet rock. Crayola crayons are classics.

NEW JERSEY PRIDE HONOR ROLL: FRED G. STICKEL III

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. GALLO. Mr. Speaker, our local governments are the backbone of our democratic system because they are closest to the people. In New Jersey, we have a system of home rule that further strengthens the local decisionmaking process.

Local governments depend upon professionals with known expertise and background to perform many specialized tasks and these experts often become very important even if they are not well known.

On September 14, Fred G. Stickel III of Roseland, NJ, will be honored by his colleagues and friends in recognition of his 50 years of legal practice and, more specifically, for his many contributions to municipal government law and procedure.

Next to home rule, Fred Stickel is considered by many to be the most hallowed municipal government tradition in New Jersey.

Fred G. Stickel III is a recognized authority on planning and zoning law and is an architect of New Jersey's municipal land use law of 1975, a nationally recognized model.

Fred Stickel serves as general counsel to the New Jersey State League of Municipalities and is a past president of the New Jersey Institute of Municipal Attorneys. He is a past general counsel of the New Jersey Federation of Planning Officials.

He has made an indelible mark on municipal government in general and New Jersey's planning and zoning law, in particular.

He has been an advisor to a number of State commissions in the planning field and his guidance and counsel have molded the development of communities across the Garden State for the last 50 years.

He began his career of municipal law in several West Essex communities, serving as attorney for Cedar Grove from 1943 to 1955, for Roseland from 1948 to 1968, and for Verona from 1961 to 1963, as well as serving as counsel for a number of planning boards and school districts during the early years of his career.

He has appeared as special counsel for numerous New Jersey municipalities and has provided counsel in various capacities in towns throughout northern New Jersey.

He is a member of the County and Municipal Law Revision Commission appointed by Governor Richard J. Hughes in 1966.

Mr. Speaker, I ask my colleagues to join me in recognition of Fred G. Stickel, whose career of public service spans 50 years and includes a diverse list of accomplishments and awards for his contributions to municipal government law in the State of New Jersey.

DEDICATION OF THE JOHN E. LAWE MEMORIAL SPORTS STADIUM

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ACKERMAN. Mr. Speaker, I would like to take this opportunity to recognize the successful efforts of the founders of the Irish Cultural & Sports Centre and friends of John E. Lawe to create a complex that celebrates Irish culture. On September 23, 1990, the John E. Lawe Memorial Sports Stadium, an integral part of the center, will be dedicated. The late John E. Lawe's name will grace the stadium as recognition for his important contributions to the American labor movement and the Irish-American community.

John Lawe's ascendency to the position of international president of the Transport Workers Union of America exemplifies the opportunities America offers immigrants who are hard working, honest, and imaginative. In 1949, John emigrated to this country from Ireland. For a short time, he worked as an elevator operator before becoming a bus cleaner. Over the years, John held every position in his union, from shop steward to president of the TWU local 100 in 1977. As president of the TWU local, John Lawe led the union through the difficult 11-day New York City transit strike of 1980. Lawe's approach to leadership and union politics centered on several principles: never promise anything you cannot deliver, never mislead the membership, and base your actions and decisions on what's best for the majority of the membership.

In addition to his union activities, over the years, John devoted a vast amount of time to Irish causes. In recognition of his work on behalf of the Catholic minority in Northern Ireland, John received honors from the Irish Northern Aid Society, the Grand Council of United Emerald Societies, the Irish National Caucus, and the Ancient Order of Hibernians. In 1987, John Lawe received the great honor of being elected grand marshal of the St. Patrick's Day Parade. John also found the time to serve as the general labor chairman of the Arthritis Foundation of the New York region. Over a year and a half has passed since his death, but his important contributions to our country will not be forgotten, due in part, to the creation of the John E. Lawe Memorial Sports Stadium.

Mr. Speaker, I call upon all my colleagues in the U.S. House of Representatives to join me in paying tribute to the late John E. Lawe and the Irish Cultural & Sports Centre.

HONORING THE PITTSFIELD GIRLS ALL-STAR SOFTBALL TEAM, 1990 STATE CHAMPIONS

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. CONTE. Mr. Speaker, I rise today to recognize and congratulate 17 very special athletes from my district. The Pittsfield girls all-star softball team, comprised of girls 12 and under, has captured its first ever State championship in slow-pitch softball. In doing so, they have also captured the hearts of every sports fan in our community, none more so than mine. These budding superstars possess such exceptional talent it is no wonder that the entire county is beaming with pride.

During the course of the season, these young ladies won 15 games, and lost only 1. This is certainly a tribute to their outstanding coach, Joe McGovern, whose lessons of teamwork manifested itself in unity and pride among his players, and whose belief in the value of hard work were adhered to all the way to the State championship. The team has practiced together at least every other day for

the entire season. The experience of partnership and dedication have yielded great success today, and the lessons learned wills surely lead to greater successes in the future. Presently, the all-stars are practicing daily in preparation for the national tournament in Meridian, MS. I am considering, Mr. Speaker, suggesting to manager Joe Morgan that the Red Sox spend some time at those practices to pick up some helpful hints on winning. If these young ladies can bring the national trophy to Pittsfield, maybe they can help the Olde Towne Team bring the Commissioner's Trophy to Boston.

Mr. Speaker, in this national forum, I wish the best of luck to the Pittsfield 12 and under girls all-star softball team, and I have my fingers crossed for their performance at the national tournament in Meridian, MS. I am confident that the strength, camaraderie, and skill which has been developed throughout this season will place them in good standing against the rest of the Nation.

Hopefully, the national trophy will return to Pittsfield with them in August. Good luck team.

TRIBUTE TO LEOMINSTER, MA, LITTLE LEAGUE BASEBALL VOLUNTEER OF THE YEAR

HON. RICHARD E. NEAL

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. NEAL of Massachusetts. Mr. Speaker, it is with pleasure that I pay tribute to a special constituent of mine from Leominster, MA. David DiGeronimo, cochairman of the Massachusetts State tournament and one of the most successful coaches in Leominster American Little League history, has been selected the Massachusetts Little League Volunteer of the Year.

Since 1979, David has served as a coach for Little Leaguers in Leominster. During these years of involvement with Leominster's Little League, David served as coach, manager, vice president, and member of the board of directors. This type of commitment to Little League is unusual, especially since as of yet, David has no children of his own involved with the league.

During his years as manager of the Whittons Insurance baseball team, David has turned the team record around. When David became involved as coach, Whittons was at the bottom of the ranks. Now, Whittons' record is 108 wins and 18 losses. In 1983, 1984, and 1987, DiGeronimo brought the team to become city champs. In 1984, DiGeronimo reached a milestone by coaching the Leominster American all-stars and bringing them to the Massachusetts State tournament championship.

David's real ability is being able to judge hidden talent in a young player. David has taken players of average ability and turned them into all-stars.

In addition to keeping his players involved in the game, David DiGeronimo has encouraged the involvement of parents. He kept the American League together during the mid-1980's, when volunteers were scarce. He's there for the opening day jamboree; tag day, the most important fundraising day of the year; and field day, the annual cookout. He's there for fall tryouts and practice during the season. He loves Little League.

On behalf of the baseball lovers of the Second District of Massachusetts, I thank David DiGeronimo for all that he has done to promote the game to both the young and old. His contribution to Little League will never be forgotten by all the players he has worked with. His contributions have been a real home run for Leominster Little League.

TRIBUTE TO JTPA ALUMNI

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. BONIOR. Mr. Speaker, I rise today to pay tribute to JTPA alumni from Macomb and St. Clair Counties.

In 1982, the Job Training Partnership Act [JTPA] became the centerpiece of Federal employment and training policy. The act provides training for economically disadvantaged adults and youth, summer jobs and training programs for low-income youth, a training program for dislocated workers, the residential Job Corps Program for extremely disadvantaged youth, services for special target population groups, and various national activities.

The MACOMB/St. Clair Private Industry Council, Inc., is holding an open house on Thursday, August 30, 1990, to honor JTPA alumni success stories. Those stories include: Mr. Keith Corsi, Ms. Alexandria Asselin, and Ms. Kara Cuellar.

Mr. Corsi, a dislocated worker, completed a JTPA-sponsored training program in electronics and computer repair and is now employed in a new career.

Ms. Asselin, on pubic assistance and struggling to support a disabled husband and two children, graduated with honors from a JTPA-sponsored secretarial training program, landed a job with a major corporation over 4 years ago, and has since doubled her salary.

Ms. Cuellar, a high school dropout who graduated with her high school diploma from an alternative high school program supported by JTPA funds, was a speaker at commencement ceremonies, a recipient of an achievement award, and is now a student at a local community college.

I believe these success stories, as well as the numerous others since JTPA's enactment, prove that this program is, as Congress wrote, "an investment in human capital, not an expense." We should all learn from these successes. The dedication and desire of these people provide an example for all of us to follow.

Above all Mr. Speaker, I pay tribute to those students who have demonstrated that there is always more to learn. In circumstances where most have given up, these students are accepting new challenges and increasing their understanding of themselves and their importance to their community.

HONORING ALBERT HERNANDEZ, BUSINESS REPRESENTATIVE, LOS ANGELES COUNTY FEDERATION OF LABOR, AFL-CIO

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. TORRES. Mr. Speaker, today I rise to recognize an outstanding individual, Mr. Albert Hernandez, business representative for the Los Angeles County Labor Federation, AFL-CIO. On August 31, 1990, Mr. Hernandez will officially retire from the federation and enter a new phase of life.

Mr. Al Hernandez has been with the federation for the past 21½ years. His involvement has taken him from a union steward, to a local union officer, to an international union representative, and finally, to hold the position of business representative. Overall, his union affiliation with the United Cork Rubber, Linoleum, and Plastic Workers of America has totaled 44 years.

Mr. Hernandez was born in east Los Angeles to an immigrant couple from Mexico. He grew up in Watts and graduated from David Starr Jordan High School, where he met his wife to be, Dolores Saldivar. Together, Al and Dolores have four children, Gloria, Leonard, Anthony, and Sylvia. With good reason, Al takes great pride in his children's contribution to society and their service work.

Al's mission and career dedication has been focused to improve the quality of life for working men and women and their families. He has always remained with the federation because of a felt sense of accomplishment, an enjoyment for his work, and the people surrounding it. As he now makes another choice in his life, to retire, Al will be missed and remembered by his peers for his dedication to his country, his union, the federation, and to his family. Whether it was flying a mission over Germany or France in the Army, whether it was leading the Labor Council for Latin American Advancement, or whether it was successfully implementing a program for the federation, Al always worked so that other lives could be changed for the better.

Mr. Speaker, at this time I ask that my colleagues please join me in saluting Mr. Albert Hernandez for his invaluable contribution to the working people of this country and to his profession.

CONDEMNATION OF THE ARAB HITLER

HON. FRANK PALLONE, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. PALLONE. Mr. Speaker, today I join my colleagues in condemning Saddam Hussein's invasion of Kuwait.

Poland was weak, and Hitler invaded. Austria was weak, and Hitler struck again. I need not repeat the details of English and French

acquiescence in the face of Hitler's actions. Today, the United States and our Arab friends cannot repeat the history of acquiescence in the face of this Arab Hitler.

Saddam Hussein will strike again if not deterred, and deterred strongly. The United States and her allies must work together to expel Iraqi forces from Kuwait, and to protect Saudi Arabia and Israel.

Saddam Hussein is a powerful, determined man, yet he is also an isolated man, alien of the notions of freedom. To permit his domination of Kuwait under any circumstances would mean nothing less than to reward his aggression. His great oil gamble will have returned enormous dividends, and Saudi Arabia will be the new prize on the gaming table.

By its domination of Kuwait alone, Iraq's actions will severely effect the economy of the United States. The interest rates, oil and gas prices, all will be within the grasp of a man who has lied to, murdered, and terrorized his own people. There are the stakes—prosperity in a world where the free flow of ideas and goods benefits all, or a return to the rules of the past, where aggressive nationalist strongmen decide the fate of the world.

Adolf Hitler was fueled by two things—his desire to dominate other lands, and his hatred of Jews and other minorities. Saddam Hussein's goals are not dissimilar. His goal, in addition to domination of the region, has been the extermination of Israel. Infamous terrorists such as Abul Abbas, who has traveled on an Iraqi passport since 1985, and Abu Nidal, who has an office in Baghdad, have long been supported by Iraq. As we speak, terrorists and soldiers alike are training in Iraq to destroy Israel.

We cannot forget our obligation to Israel in these troubled times. To know our goals and guiding principles in the Middle East will mean our victory in peace or war. The extension of Hussein's influence in the region puts him closer to his ultimate target—Israel. To permit Iraqi domination of the Middle East under any circumstances would not buy peace, but only postpone war.

The coming days and months hold great uncertainty for us all. The future can bring blood and the sand, or peace and dignity for the nations of the Middle East. A responsibility is before us and our Arab friends to be resolute in deterring further Iraqi aggression, and a responsibility is before Saddam Hussein to respond to the outrage of the global village.

HUNGER IN ANGOLA

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. HALL of Ohio. Mr. Speaker, I rise in strong support of House Resolution 446, a resolution which I introduced on July 31 to address the urgent famine situation in Angola. The resolution expresses the sense of the House that all parties to the conflict in Angola should put humanitarian needs above military goals. We need to get urgently needed humanitarian assistance through international relief and private voluntary organizations to the people of Angola.

I am pleased at the speed with which the Foreign Affairs Committee brought this legislation to the floor. This resolution has attracted strong bipartisan support from Members who take widely varying views on overall United States policy toward Angola. However, as chairman of the Select Committee on Hunger, I know that there is no disagreement among us when the issue is providing food and other necessary relief supplies for innocent, hungry civilians.

Over 250,000 civilians now are at immediate risk of death from hunger-related illnesses. Angola is considered the most severe humanitarian crisis in Africa today—perhaps in the world. Any assistance already comes late: more than 2,500 people have already died.

This resolution acknowledges that while we must do everything we can to feed the hungry in Angola, that alone is not enough. The United States Government, and all groups supplying military support to the warring parties, must also work to promote a successful conclusion to ongoing negotiations, an end to the civil war, and a lasting peace in Angola. Let this be the final time we must cross battle lines to provide emergency relief to the people of Angola.

I urge all my colleagues to support this legislation.

PROTECT THE MEDICARE SYSTEM

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. ROTH. Mr. Speaker, as the deadline for reaching a deficit reduction agreement grows closer, some in Congress are once again targeting the Medicare Program for steep cuts. This would be a terrible mistake. Congress has already cut billions of dollars from the Medicare Program in recent years. Additional reductions of this magnitude will deal a serious blow to our Nation's health care system.

Ensuring that our Nation's citizens have access to high-quality, affordable health care must be one of our Government's top priorities. Medicare is a vital part of our country's health care system, serving 33 million individuals throughout the Nation. The heart of this program is doctors treating their patients. We cannot jeopardize the ability of these doctors to care for aged and disabled Americans. That is why I have voted against previous cuts in Medicare that the majority forced through, and that is why I oppose these latest proposals to slash Medicare funding.

It is apparent that the priorities of many Members of Congress are backward. Every year they send billions of dollars overseas as foreign aid, while they ignore the very real needs of American citizens. It is unbelievable that on the very same day the Congress was asked to increase foreign aid by $1 billion to pay the Philippine national debt, a House panel voted to cut Medicare payments to our elderly. We should not cut programs like Medicare that provide critical assistance to our citizens.

Unfortunately, the majority in Congress has not been content to just cut spending on the Medicare Program. They have also overburdened doctors with excessive regulations and redtape. For instance, I am hearing from scores of doctors in my district about the new clinical laboratory regulations Congress passed in 1988. I voted against the legislation that mandated these rules because I knew the big-government regulations would stifle doctors. I was right: Now our health care system is suffering.

Congress must learn that the actions taken in Washington have real effects on the lives of individuals throughout the Nation. Congress cannot keep arbitrarily cutting Medicare funding and saddling doctors with burdensome regulations without jeopardizing the quality of health care. That is why I urge my colleagues in Congress to join me in fighting to protect the Medicare system.

PROF. O.B. HARDISON, RENAISSANCE MAN

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. FAUNTROY. Mr. Speaker, on August 2, 1990, we lost a valuable scholar, a distinguished leader in the arts, history, and theater when Prof. O.B. Hardison died. Professor Hardison and his wife, Marifrances, and their six children have enriched the life of Washington, DC, with their total commitment and involvement in all aspects of our life. Whether it was music, in the form of the D.C. Youth Orchestra, or education, in support of the Duke Ellington School of the Arts, this wonderful family lived, in their contributions to our community life, the true meaning of dedication.

I know that their many friends in Washington, DC, and the Congress join me in this tribute to the life of a man who is truly a Renaissance Man, a presence we will sadly miss but a presence that will always be with us through the institutions he created and sustained. I ask that the CONGRESSIONAL RECORD provide you with an obituary that mentions at least some of O.B. Hardison's contributions. And our prayers go with his wife and family.

PROF. O.B. HARDISON, RENAISSANCE MAN

(By Richard Pearson)

O.B. Hardison, 61, a Georgetown University literature professor who served as head of the Folger Shakespeare Library from 1969 to 1983, died of cancer Aug. 5 at Georgetown University Hospital. He lived in Washington.

Dr. Hardison was a native of San Diego. He received bachelor's and master's degrees from the University of North Carolina and a doctorate in English literature from the University of Wisconsin.

He taught English literature at the University of North Carolina for 12 years before coming to Washington as Folger Library director in 1969. He retired from the Folger in 1983, and the next year he joined the faculty at Georgetown. He was a professor of English at the time of his death.

He was the author of books on criticism, theater, English literature, poetry, the medieval world, the Renaissance and the modern relationship of culture to technology. He also contributed articles to journals

such as Renaissance Quarterly, the Sewanee and Georgia reviews, the New York Review of Books, the New York Times and The Washington Post's Book World section.

The Folger Library, an internationally known center of Shakespearean research, is administered by Amherst College. When Dr. Hardison took over its direction in 1961, it was primarily for scholars and known for its book collection.

Dr. Hardison oversaw enormous expansion of its resources and opened the Library's doors wider to the general public. He helped establish the Folger Theater Group as a leading area cultural resource and established a popular series of poetry readings. He also introduced the Folger Consort, a group of musicians specializing in medieval and Renaissance offerings.

He was instrumental in the formation of the Folger Institute of Renaissance and 18th Century Studies, oversaw the establishment of a docent program and saw the Shakespeare Quarterly make the Library its home.

Over the years, he became as adept as funding-raising as he was in his more scholarly pursuits. The library's annual income increased from about $20,000 to more than $1 million annually. He left the institution with an endowment of more than $50 million. He also directed the campaign that raised $8.5 million for an expansion and physical plant improvement of the library.

He told a Post reporter, after leaving the Folger, that his two proudest achievements were acquiring a first edition (1684) of Isaac Newton's "Philosophiae Naturalis Principia Mathematica" and getting the theater fireproofed.

Before coming to Washington, Dr. Hardison had an enviable reputation as a writer and teacher. An authority on medieval and Renaissance history and literature, he was an expert on the life, time and work of John Milton and had been hailed by Time magazine as one of the country's outstanding college instructors.

His first book, a volume of poetry entitled "Lyrics and Elegies," was published in 1958. His most recent book, published by Viking in 1989, was "Disappearing Through the Skylight—Culture and Technology in the Twentieth Century." A combination of philosophy, literature, history and science, it was one in a series of books he was writing on man's history and evolution. Another in the series was "Entering the Maze: Identity and Change in Modern Culture," published by Oxford University Press in 1981.

Other books included "Christian Rite and Christian Drama," published by Johns Hopkins University Press, "Praise and Eloquence in Renaissance Literary Theory" and "Praise in Renaissance Literature," which was an expansion of his doctoral dissertation. He also had been an associate editor of the Princeton Encyclopedia of Poetry and Poetics.

Dr. Hardison was a past president of the Renaissance Society of America, the Shakespeare Association of America and the Washington English-Speaking Union. He was a former chairman of the National Humanities Alliance. He was a member of Phi Beta Kappa and had been a Fulbright and Guggenheim fellow and a recipient of awards from the British and Italian governments.

Survivors include his wife, the former Marifrances Fitzgibbon, of Washington; six children, Sarah Hardison O'Connor of Staunton, Va., Laura Hardison Willumsen of Wheeling, W.Va., Agnes Hardison-Sanchez of New York City, Osborne Hardison III of Santa Cruz, Calif., Matthew Hardison of Reston and Charity Hardison Moschopoulos of Washington; a brother, William Gerry Hardison of San Diego; and eight grandchildren.

A BILL TO ENFORCE AUTOMOTIVE FUEL POSTING REQUIREMENTS

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 3, 1990

Mr. SHARP. Mr. Speaker, the bill that Congressmen MOORHEAD, LENT, SCHUMER, and I are introducing today addresses the problem of gasoline octane mislabeling. This is a serious problem costing the consumers hundreds of millions of dollars a year. Although the majority of gasoline distributors and dealers are honest business men and women, a 2-year investigative report by the General Accounting Office [GAO] estimates that 9 percent of the gasoline sold nationwide in 1988 was mislabeled by at least half an octane point, the amount considered a significant violation.

Octane mislabeling is believed to occur mainly during distribution rather than during refining. Much of the mislabeling is accidental. However, there are known instances of octane cheating or fraud. One practice identified by the GAO is the sale of gasoline from pumps posted with different octane ratings, but which are supplied by the same storage tank.

Since 1981, according to the GAO report, the EPA and FTC have not tested or enforced gasoline octane rating compliance. There are currently no Federal controls to ensure that gasoline octane postings are accurate.

The 22 States that test gasoline octane ratings on their own appear to experience very little octane mislabeling or octane cheating. The GAO report demonstrates that where a testing program exits, it deters cheating.

Officials from States that test and enforce octane ratings believe that prosecuting octane labeling violators could become excessively difficult because their laws may be preempted by the existing Federal law which has not been enforced.

The bill will make it easier for States to test and enforce octane ratings. It does the following:

First, it empowers States to employ a range of remedies broader than those available under the Petroleum Marketing Practices Act [PMPA] to enforce octane posting requirements. This authority would allow the use of stop-sale orders to immediately halt the sale of mislabeled gasoline.

Second, it broadens the definition of automotive fuel so that all automotive fuels, not just gasoline, would be required to have their octane posted.

Third, it sets a consistent level of enforcement throughout the entire refining, distribution, and retailing chain. Previously, enforcement action at the refining and distribution levels required less stringent levels of proof than at the retail level.

Fourth, this bill also requires four studies:

The Environmental Protection Agency [EPA] is required to determine how the antiknock or octane rating equivalent of nonliquid fuels, such as compressed natural gas, can be determined; the Department of Energy [DOE] is required to determine if different color dyes could be used to distinguish automotive fuels of varying octane ratings or to identify new fuels which may be required for air quality reasons; DOE is required to determine the extent to which consumers use automotive fuel with an octane rating in excess of the rating necessary for the operation of their automobiles; the Federal Trade Commission is required to determine the need for uniform national labeling of all automotive fuels at the pump.

The Energy and Commerce Committee's Subcommittee on Energy and Power has already considered this proposal and voted unanimously that it be introduced as a bill and reported to the full committee for consideration. This is a good piece of consumer legislation that should be passed into law before the end of the 101st Congress.

H.R. 5520

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Octane Display and Disclosure Act of 1990.".

SEC. 2. CERTIFICATION AND POSTING OF AUTOMOTIVE FUEL RATINGS.

(a) COVERAGE OF ALL LIQUID AUTOMOTIVE FUELS.—Section 201(6) of the Petroleum Marketing Practices Act (15 U.S.C. 2821(6)) is amended to read as follows:

"(6) The term 'automotive fuel' means liquid fuel of a type distributed for use as a fuel in any motor vehicle.".

(b) AUTOMOTIVE FUEL RATING.—Section 201 of such Act (15 U.S.C. 2821) is amended by adding at the end the following new paragraphs:

"(17) The term 'automotive fuel rating' means—

"(A) the octane rating of an automotive spark-ignition engine fuel; and

"(B) if provided for by the Federal Trade Commission by rule, the cetane rating of diesel fuel oils; or

"(C) another form of rating determined by the Federal Trade Commission, after consultation with the American Society for Testing and Materials (ASTM), to be more appropriate to carry out the purposes of this title with respect to the automotive fuel concerned.

"(18)(A) The term 'cetane rating' means a measure, as indicated by a cetane index, of the ignition quality of diesel fuel oil and of the influence of the diesel fuel oil on combustion roughness.

"(B) The term 'cetane index' has the meaning determined in accordance with the test methods set forth in the American Society for Testing and Materials standard test methods designated D976 or D4737 (as in effect on the date of the enactment of this Act) and shall apply to any grade or type of diesel fuel oils defined in the specification of the American Society for Testing and Materials entitled 'Standard Specification for Diesel Fuel Oils' designated D975 (as in effect on such date).".

(c) CONFORMING AMENDMENTS.—(1) Section 201 of such Act (15 U.S.C. 2821) is amended—

(A) in paragraph (1), by striking out "gasoline" and inserting in lieu thereof "fuel";

(B) in paragraph (2)—

(i) by striking out "Standard Specifications for Automotive" and inserting in lieu thereof "Standard Specifications for Automotive Spark-Ignition Engine Fuel"; and

(ii) by striking out "D 439" and inserting in lieu thereof "D4814";

(C) in paragraph (4)—

(i) by striking out "gasoline" the first place it appears and inserting in lieu thereof "automotive fuel"; and

(ii) by striking out "gasoline" the second place it appears and inserting in lieu thereof "fuel";

(D) by striking out paragraph (5) and inserting in lieu thereof the following:

"(5) The term 'refiner' means any person engaged in the production or importation of automotive fuel.";

(E) in paragraph (11)—

(i) by striking out "octane" each place it appears and inserting in lieu thereof "automotive fuel"; and

(ii) by striking out "gasoline" each place it appears and inserting in lieu thereof "fuel"; and

(F) in paragraph (16), by striking out "gasoline" each place it appears and inserting in lieu thereof "automotive fuel".

(2) Section 202 of such Act (15 U.S.C. 2822) is amended—

(A) by striking out "octane rating" and "octane ratings" each place such terms appears and inserting in lieu thereof "automotive fuel rating" and "automotive fuel ratings", respectively;

(B) in subsections (a) and (b), by striking out "gasoline" each place it appears and substituting in lieu thereof "fuel";

(C) in subsection (c)—

(i) by striking out "gasoline" each place it appears (other than the second place it appears) and inserting in lieu thereof "automotive fuel"; and

(ii) by striking out "gasoline" the second place it appears and inserting in lieu thereof "fuel";

(D) in subsection (d), by striking out "octane" and inserting in lieu thereof "automotive fuel";

(E) in subsection (e)—

(i) by striking out "gasoline" each place it appears and inserting in lieu thereof "fuel"; and

(ii) by striking out "gasoline's" and inserting in lieu thereof "fuel's";

(F) in subsections (f), (g), and (h), by striking out "gasoline" each place it appears and inserting in lieu thereof "fuel";

(G) in subsection (h), by striking out "octane requirement" each place it appears and inserting in lieu thereof "automotive fuel requirement"; and

(H) in the section heading, by striking out "OCTANE" and inserting in lieu thereof "AUTOMOTIVE FUEL RATING".

(3) Section 203 of such Act (15 U.S.C. 2823) is amended—

(A) by striking out "octane rating" and "octane ratings" each place such terms appear and inserting in lieu thereof "automotive fuel rating" and "automotive fuel ratings", respectively;

(B) in subsections (b) and (c), by striking out "gasoline" each place it appears and inserting in lieu thereof "fuel"; and

(C) in subsection (c)(3), by striking out "201(1)" and inserting in lieu thereof "201".

(e) EFFECTIVE DATE.—(1) The amendments made by this section shall become effective at the end of the one-year period beginning on the date of the enactment of this Act.

(2) The Federal Trade Commission shall, within 270 days after the date of the enactment of this Act, prescribe rules for the purpose of implementing the amendments made this section.

SEC. 3. INCREASED AUTHORITY FOR ENFORCEMENT.

(a) STATE LAW.—Section 204 of the Petroleum Marketing Practices Act (15 U.S.C. 2824) is amended to read as follows:

"RELATIONSHIP OF THIS TITLE TO STATE LAW

"SEC. 204. (a) To the extent that any provision of this title applies to any act or omission, no State or any political subdivision thereof may adopt or continue in effect, except as provided in subsection (b), any provision of law or regulation with respect to such act or omission, unless such provision of such law or regulation is the same as the applicable provision of this title.

"(b) A State or political subdivision thereof may provide for any investigative or enforcement action, remedy, or penalty (including procedural actions necessary to carry out such investigative or enforcement actions, remedies, or penalties) with respect to any provision of law or regulation permitted by subsection (a).".

(b) FTC ENFORCEMENT.—Section 203(e) of such Act is amended by striking out "; except that" in the second sentence and all that follows through the period and inserting in lieu thereof a period.

(c) EPA ENFORCEMENT.—Section 203(b)(1) of such Act is amended—

(1) in the matter preceding subparagraph (A), by striking out "shall";

(2) in subparagraph (A), by striking out "conduct" and inserting in lieu thereof "may conduct";

(3) in subparagraph (B), by striking out "certify" and inserting in lieu thereof "shall certify";

(4) in subparagraph (C), by striking out "notify" and inserting in lieu thereof "shall notify"; and

(5) in subparagraph (C), by striking out "discovered" and all that follows through "testing".

SEC. 4. STUDIES.

(a) IN GENERAL.—For the purpose of making the findings, conclusions, and recommendations referred to in section (c)—

(1) the Administrator of the Environmental Protection Agency, in consultation with the Secretary of Energy, shall carry out a study to determine whether, and if so, how, the anti-knock characteristics of nonliquid fuels usable as a fuel for a motor vehicle (as defined in section 201(7) of the Petroleum Marketing Practices Act) can be determined;

(2) the Secretary of Energy, in consultation with the Administrator of the Environmental Protection Agency, shall carry out a study to determine the feasibility and the desirability of using dye—

(A) to differentiate automotive fuels with different automotive fuel ratings so that the automotive fuel rating can be determined by its color; and

(B) to identify transportation fuels required, or to be required, by law for clean air or other environmental benefits;

(3) the Secretary of Energy shall carry out a study to determine—

(A) the extent, if any, to which consumers use automotive fuel with an octane rating in excess of the rating necessary for the operation of their automobiles;

(B) the reasons for any such use of excess octane;

(C) the increase, if any, in energy consumption and in harmful emissions resulting from the consumption and production of the excess octane consumed in any such use; and

(D) the effect, if any, of any such use of excess octane with respect to automotive performance and emissions; and

(4) the Federal Trade Commission, in consultation with the Administrator of the Environmental Protection Agency, shall carry out a study to determine the need for, and the desirability of, having a uniform national label on devices used to dispense automotive fuel to consumers that would consolidate information required by law to be posted on such devices.

(b) IMPLEMENTATION.—In carrying out studies under this section, each agency shall—

(1) publish general notice of each of the studies in the Federal Register in a manner similar to that provided for in paragraphs (1), (2), and (3) of section 553(b) of title 5, United States Code, for proposed rulemaking; and

(2) give interested parties an opportunity to participate in its study through submission of written data, views, or arguments with opportunity for oral presentation.

(c) REPORTS.—The Administrator of the Environmental Protection Agency, the Secretary of Energy, and the Chairman of the Federal Trade Commission shall transmit to the Congress, within one year after the date of the enactment of this Act, the findings, conclusions, and recommendations made as a result of the studies carried out by such officers under this section, together with a description of the administrative and legislative actions needed to implement such recommendations.

PROPOSED AMENDMENTS TO PMPA TITLE II

SECTION-BY-SECTION ANALYSIS

Section I. Certification and Posting of Automotive Fuel Ratings.

Section I makes changes in Title II of the Petroleum Marketing Practices Act which requires the posting of octane ratings for gasoline. The term "gasoline" is deleted and the more generic term "automotive fuel" is substituted. As defined in this bill, the term "automotive fuel" means all liquid fuels sold for use as transportation fuels in motor vehicles. The change is proposed because the Federal Trade Commission has determined that gasohol is not "gasoline" for purposes of Title II of PMPA.

Section I will also require the posting of octane for any new alternative fuels, including any new fuels that may be required by the Clean Air Act Amendments. The bill allows the Federal Trade Commission latitude to use other similar ratings, if more appropriate, for new alternative fuels.

In the case of diesel fuel, the cetane index may be posed if the Federal Trade Commission requires it by a rulemaking is required to be posted. Octane has meaning only when a fuel is used in spark-ignited engines; diesel engines are compression ignited. Cetane is the comparable rating for fuels used in compression-ignited engines.

Section II. Increased Authority for Enforcement.

Section II allows states to use whatever investigative and enforcement actions they find necessary, including but not restricted to the provisions provided for by federal law, to enforce the certification of automotive fuel ratings as outlined in Section I.

Section II also sets the level of knowledge required for proof of violation at the same level for refiners, distributors and retailers. Previously proof of violation of the retail

level was a different level than for refiners or distributors.

Section II also made EPA testing for octane discretionary rather than mandatory, acknowledging the fact that EPA has not tested for octane since 1981.

Section III. Studies.

Section III calls for four studies:

(1) EPA is required to determine how the anti-knock or octane rating equivalent of a nonliquid fuel can be determined;

(2) DOE is required to determine if different color dyes could be used to distinguish automotive fuels of varying automotive octane ratings on to identify new fuels which may be required for air quality reasons;

(3) DOE is required to determine the extent to which consumers use automotive fuel with an octane rating in excess of the rating necessary for the operation of their automobiles;

(4) The FTC is required to determine the need for uniform national labeling of all automotive fuels at the pump.

The bill calls for a report to be transmitted to Congress outlining the findings, conclusions, and recommendations with relation to the above studies.

39-059 O-91-32 (Pt. 16)

SENATE—*Saturday, August 4, 1990*

The Senate met at 9 a.m. and was called to order by the Honorable RICHARD BRYAN, a Senator from the State of Nevada.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Baruch Hashem * * * blessed be the name of the Lord!

Father, we want to pray this morning for Senator BINGAMAN'S mother. We pray that You will give her peace and comfort in the hospital, give Your peace to her family, and bring her to total recovery.

Hear, O Israel. The Lord our God is one Lord: And thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might. And these words, which I command thee this day, shall be in thine heart: and thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up. And thou shalt bind them for a sign upon thine hand, and they shall be as frontlets between thine eyes. And thou shalt write them upon the posts of thy house, and on thy gates.—Deuteronomy 6:4–9.

O praise the Lord, all ye nations: praise him, all ye people. For his merciful kindness is great toward us: and the truth of the Lord endureth forever. Praise ye the Lord.—Psalm 117.

Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, August 4, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable RICHARD H. BRYAN, a Senator from the State of Nevada, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. BRYAN thereupon assumed the chair as Acting President pro tempore.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 2884, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 2884) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

(1) Warner Amendment No. 2482, expressing the sense of the Congress regarding greater utilization of the Reserve components of the Armed Forces.

(2) Nunn Amendment No. 2483 (to Amendment No. 2482), in the nature of a substitute.

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Virginia [Mr. WARNER] is recognized for the purpose of offering an amendment, on which there will be 1 hour for debate.

Mr. WARNER. Mr. President, the Senator from Virginia asks unanimous consent that he may proceed as in morning business, chargeable against his allocated time, for such time as he may require.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE SENATE STAFF

Mr. WARNER. I have had the privilege to serve in the U.S. Senate for 12 years, and I have seen those periods where we have lengthy debates and consideration on bills, and this is one of them.

I would like to start this day by thanking the staff of the U.S. Senate, the infrastructure that is there to back up those of us on the floor of the U.S. Senate, as we conduct the business of the Senate.

I saw the presence this morning of Henry Guigni, the Sergeant at Arms. I witness the presence of others who are faithfully serving the Senate, and I wish to, on behalf of this Senator, express my appreciation. They have been extraordinarily long hours.

I note that the Senate adjourned last night shortly after 3 o'clock in the morning, and it is now 9 o'clock, and we are ready to do business again. That sort of reliability makes possible the work of this institution.

Mr. President, I ask unanimous consent further that the Senator from Virginia be permitted to submit a bill this morning relating to the National Endowment of the Arts, accompanied by a statement from the Senator from Virginia explaining the text of the bill.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The Senate continued with the consideration of the bill.

Mr. WARNER Mr. President, I want to turn to the business of the day, namely, the completion, I hope, of the armed services authorization bill.

I note the presence on the floor of my colleague and a member of the committee, Senate BINGAMAN.

AMENDMENT NO. 2587

(Purpose: To express the Sense of the Congress on Enhanced Theater Defense Systems)

Mr. WARNER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from Virginia, [Mr. WARNER], for himself Mr. MCCAIN, Mr. WILSON, and Mr. DOLE, proposes an amendment numbered 2587.

Mr. WARNER. I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

At an appropriate place in the bill, insert the following new section:

SEC. . THEATER DEFENSE PROGRAM.

(a) FINDINGS.—Congress makes the following findings:

(1) The Director of Central Intelligence, William Webster, has testified before Congress than between 15 and 20 developing nations will possess ballistic missile capabilities by the end of the century.

(2) The Director has also testified that by the year 2000, at least six Third World countries will have ballistic missiles with ranges of up to 1,800 miles, and three of them may develop ballistic missiles with a range of 3,400 miles.

(3) The Director has also testified "that as many as 20 countries may be developing chemical weapons; and we expect this trend to continue despite ongoing multilateral efforts to stop their proliferation. * * * At least 10 countries are working to produce both previously known and futuristic biological weapons."

(4) During the war between Iraq and Iran each used ballistic missiles and chemical payloads.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

(5) The Defense Intelligence Agency (DIA) has also informed Congress that, in addition to the five nuclear weapons countries—United States, Soviet Union, England, France, and China—"about half a dozen additional countries have either acquired a capability to explode a nuclear device or are pursuing such a capability."

(6) DIA has also informed Congress that the proliferation of ballistic missiles is occurring at an ever-increasing pace. In just the last 2 years:

Over 1,000 ballistic missiles have been fired in combat in Iran, Iraq, and Afghanistan.

Flight tests of ballistic missiles have occurred in India, Pakistan, and South Africa.

Iraq has conducted an initial flight test of a space launch vehicle, which will enhance greatly their already extensive ballistic missile capability.

The longest range (1800+ mile) ballistic missiles in the Middle East have been supplied to Saudi Arabia by China.

(7) The proliferation of ballistic missiles, chemical weapons and nuclear technology poses a direct threat to many of our friends and allies. Moreover, United States contingency and projection forces are also threatened by these technologies, and this threat will increase in the future.

(b) Therefore, it is the sense of the Congress that—

(1) The proliferation to developing countries of ballistic missiles and chemical and nuclear weapons technology applicable to missile warhead development are potentially destabilizing, a threat to United States security commitments, and also pose a significant threat to the national security of our friends and allies around the world.

(2) Of the funds authorized for the Strategic Defense Initiative, up to $300,000,000 should be made available for the development of antitactical ballistic missile (ATBM) systems to counter such threats to United States forward deployed and projection forces. In this regard, the Congress recommends that the development of systems such as the Extended Range Interceptor and the Theater High Altitude Air Defense should be accelerated.

(3) The SID Organization should ensure that the Navy and Marine Corps are involved in developmental programs for future ATBM systems suitable for deployment with their projection and expeditionary forces.

(4) Since the Arrow ATBM has been a successful joint development program and, when deployed, will become an important asset for the defense of Israel against the threat of short range ballistic missiles in the region, the Secretary of Defense should negotiate, on an equitable basis, a memorandum of agreement to continue the program. Therefore, of the funds available for the Theater Defense program, element in SDI Program, not more than $50,000,000 should be made available for the Arrow program.

(5) Of the funds, authorized to the Army for Research, Development, Testing, and Evaluation, not more than $50,000,000 should be made available to conduct additional tests of the Patriot II system against existing types of ballistic missile threats.

(6) The Army should establish a vigorous program to develop and test a rapidly deployable ATBM capability for United States units. For the near-term, the focus should be on the Patriot II system. From within these funds made available for Patriot II testing, the Army should also develop support systems, such as tracking and attack assessment radars, for existing and future ATBM systems.

Mr. WARNER. Mr. President, the subject to be taken up today by the Senate are those amendments relating to SDI and what I regard as associated systems, the antitactical ballistic missiles.

As we witnessed the dramatic events this week in the Middle East, it brought to this Senator's mind once again the tensions in that area of the world, accompanied by the proliferation of a certain class of weaponry we refer to as "tactical ballistic missiles."

The purpose of this amendment is to express the sense of the Senate on the development and deployment of such missiles and what we in the United States, and indeed the Western World, should do to try and prepare ourselves as a means of deterrence against these systems.

The SDI Program has been actively developing technologies for the purposes of counting theater ballistic missiles. Given the emerging problems of missile proliferation and the chemical weapons and nuclear technology, it is becoming imperative that the United States and its allies begin to plan for this. This amendment encourages the United States to prepare for the eventual inclusion of defenses with the U.S. projection and expeditionary forces.

The Senator from Virginia, together with his cosponsors, endeavored during the course of the markup of the Armed Services Committee, to have this amendment included. For reasons which I may allude to later, that was stopped, although staff on both sides had cleared the amendment. Now I renew these efforts today.

The proliferation of ballistic missiles, chemical weapons and nuclear technology poses a direct threat to many of our friends and allies. Moreover, U.S. contingency and projection forces are also threatened by these technologies, and this threat will increase in the future.

The proliferation to developing countries of ballistic missiles and chemical and nuclear weapons technology applicable to missile warhead development are potentially destabilizing, a threat to U.S. security commitments, and also pose a significant threat to the national security of our friends and allies around the world.

Certain developing countries, such as Syria and Iraq, already possess ballistic missiles that are capable of reaching allies like Israel, which can be equipped with the chemical or biological weapons, and soon even nuclear weapons.

The Director of Central Intelligence, William Webster, has testified before Congress that between 15 and 20 developing nations will possess ballistic missile capabilities by the end of the century.

The Director has also testified that by the year 2000, at least six Third World countries will have ballistic missiles with ranges of up to 1,800 miles, and three of them may develop ballistic missiles with a range of 3,400 miles.

The Director has also testified "that as many as 20 countries may be developing chemical weapons; and we expect this trend to continue despite ongoing multilateral efforts to stop their proliferation. * * * At least 10 countries are working to produce both previously known and futuristic biological weapons."

During the war between Iraq and Iran each used ballistic missiles and chemical payloads.

The Defense Intelligence Agency [DIA] has also informed Congress that, in addition to the five nuclear weapons countries—United States, Soviet Union, England, France, and China—"about half a dozen additional countries have either acquired a capability to explode a nuclear device or are pursuing such a capability."

DIA has also informed Congress that the proliferation of ballistic missiles is occurring at an ever-increasing pace. In just the last 2 years:

Over 1,000 ballistic missiles have been fired in combat in Iran, Iraq, and Afghanistan.

Flight tests of ballistic missiles have occurred in India, Pakistan, and South Africa.

Iraq has conducted an initial flight test of a space launch vehicle, which will enhance greatly their already extensive ballistic missiles capability.

The longest range (1,800+mile) ballistic missiles in the Middle East have been supplied to Saudi Arabia by China.

In conclusion, missile defenses in the United States and within the borders of our allies would greatly deter long-range ballistic missile use. Tactical ballistic missile defenses deployed by our allies and on U.S. projection forces would enhance deterrence and stability.

I am convinced that we must now, more than ever before, plan for the inclusion of theater, and even strategic, missile defenses in our national security strategy and give greater emphasis to it.

Mr. President, I ask unanimous consent that the Senator from Washington [Mr. GORTON], be added as a cosponsor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WARNER. Mr. President, turning to the amendment itself, as I mentioned it is a sense of the Congress.

First, we make in the amendment a series of findings and I have enumerated, in essence, those findings. Then we go for our conclusion, and I have enumerated in my remarks basically

the essence of the conclusions, but I would like to put emphasis on one or two other points here.

The sense of this amendment is that of the funds authorized for the strategic defense initiative up to $300 million should be made available for the development of anti-tactical ballistic missile systems to counter such threats to U.S. forward deployed and projection forces. In this regard, the Congress recommends that the development of systems such as the Extended Range Interceptor and the Theater High Altitude Air Defense should be accelerated.

Further, the SDI Organization should ensure that the Navy and Marine Corps are involved in developmental programs for future ATBM systems suitable for deployment with their projection and expeditionary forces.

Since the Arrow ATBM has been a successful joint development program and, when deployed, will become an important asset for the defense of Israel against the threat of short range ballistic missiles in the region, the Secretary of Defense should negotiate, on an equitable basis a memorandum of agreement to continue the program. Therefore, of the funds available for the Theater Defense program element in SDI Program, not more than $50,000,000 should be made available for the Arrow program.

Of the funds authorized to the Army for research, development, testing, and evaluation, not more than $50,000,000 should be made available to conduct additional tests of the Patriot II system against existing types of ballistic missile threats.

The Army should establish a vigorous program to develop and test a rapidly deployable ATBM capability for U.S. units. For the near-term, the focus should be on the Patriot II system. From within these funds made available for Patriot II testing, the Army should also develop support systems, such as tracking and attack assessment radars, for existing and future ATBM systems.

Mr. President, I would like to turn to a little historical background with reference to this amendment.

Early in the first day of the Senate Armed Services Committee markup, I offered an amendment emphasizing the need to speed development of ATBM capability, including Arrow ATBM and Patriot. The amendment had been cleared by professional staff on both sides but the chairman asked for opportunity personally to review the amendment before adoption. That was agreed to.

Later in the markup this Senator was advised that the chairman had no objection to the amendment. The amendment was not offered at that time in order to permit the committee to continue working on other unrelated amendments.

In view of my position as a ranking member I felt that at any time I could interject myself during the course of markup. Out of deference to other Senators I allowed them to continue with their business to the termination period of the markup.

Some hours later Senators BINGAMAN and SHELBY offered an amendment to substantially alter the SDI Program. The Republican Member and staff had no advance knowledge of the amendment.

During a short staff discussion of the Bingaman-Shelby amendment the minority staff pointed out that the amendment would substantially reduce funding for development, including reducing development for the Arrow Program.

By agreement the Bingaman-Shelby amendment was substantially withdrawn with consent to offer it on the floor. Later when this Senator offered his cleared amendment again cleared on both sides, the chairman and other Democratic Senators objected that it would not be fair to accept this amendment in light of the earlier action on the binding Shelby amendment. This Senator then again agreed in a spirit of cooperation with the committee and its Members. And I withdrew the amendment indicating at that time that I would reinstate it during the course of floor deliberation.-

Now we find that the Bingaman-Shelby amendment has been altered to correct the obvious deficiencies of decreasing funding for Arrow ATBM development generally. Even now the amendment would not fund these programs, in the judgment of this Senator and others, sufficiently.-

This amendment now pending would put Congress on the record without micromanaging by statute the SDI Program for ATBM capability; ATBM and Patriot. These programs should be enhanced.-

Now, Mr. President, in conclusion, the basic difference in approach by the Republican minority and Democratic majority thus far in committee work is reflected in this amendment. This is a sense of the Congress. It is our judgment that the President of the United States in his capacity as Commander in Chief together with his delegates, namely the Secretary of Defense and those designated to manage the all-important SDI Program should be given maximum authority to exercise their constitutionally mandated powers to develop this program in the best interest of the United States.-

We find that the proposed amendment by our distinguished colleagues, Mr. BINGAMAN and Mr. SHELBY, is in direct contravention with the principle of giving the President the freest possible hand in the development of systems he feels and others feel are essential for the defense of this Nation.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. WARNER. Mr. President, I will ask unanimous consent that there appear in the RECORD immediately after the statements of the Senator from Virginia relative to this amendment a memorandum requested by the Senator from Virginia and provided by the Defense Intelligence Agency which includes the following:

It is a letter, first, from Lieutenant General Soyster to the Senator from Virginia stating:

In response to your request, DIA has prepared the enclosed paper on the increasing threat from the proliferation of chemical, biological, and nuclear weapons throughout the Third World. Even though there has been a large amount of information in the open press on this subject, it is difficult for DIA to address proliferation at the unclassified level. To answer your questions more completely, a classified response is also being prepared and will be forwarded to you later this month under separate cover.

I ask unanimous consent that the letter from General Soyster, together with attached memorandum, be printed in the RECORD immediately following the remarks of the Senator from Virginia.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEFENSE INTELLIGENCE AGENCY,
Washington, DC, June 29, 1990.

Hon. JOHN W. WARNER,
U.S. Senate, Washington, DC.

DEAR SENATOR WARNER: In response to your request, DIA has prepared the enclosed paper on the increasing threat from the proliferation of chemical, biological, and nuclear weapons throughout the Third World. Even though there has been a large amount of information in the open press on this subject, it is difficult for DIA to address proliferation at the unclassified level. To answer your questions more completely, a classified response is also being prepared and will be forwarded to you later this month under separate cover.

Sincerely,

HARRY E. SOYSTER,
Lieutenant General, U.S. Army,
Director.

WEAPON PROLIFERATION IN THE THIRD WORLD

INTRODUCTION

Proliferation of chemical, biological, and nuclear weapons (CBNW) and associated delivery systems throughout the Third World is a growing problem. The number of countries who have chemical weapon programs has been increasing rapidly and those with biological weapon programs are not far behind.

The spread in nuclear weapons has been slow over the years although the number of countries with the technical capabilities to develop weapons continues to grow. A number of countries are at the threshold where they could develop nuclear weapons over the next decade, should they decide politically to do so.

Ballistic missiles, with conventional warheads or as potential delivery vehicles for CBNW, have been proliferating recently. Not only do Third World countries attempt to supplement their indigenous ballistic missile programs with foreign assistance and foreign technology, many also attempt to buy complete missile systems from other countries. Active marketing by some nations of their missile systems and related technologies makes the proliferation problem even more difficult to control.

Various aspects of CBNW have their own proliferation concerns. In the next sections of this paper, we develop related background information in each area and discuss treaty considerations. Finally, we project the extent of proliferation throughout the Third World by the year 2000.

CHEMICAL WEAPON PROLIFERATION

Chemical agents

Chemical agents are chemical substances which cause injury or death to affected personnel. Many countries define chemicals which are useful in warfare, such as smokes, obscurant, flame weapons, and riot control agents, as chemical agents. In this paper, however, only lethal and casualty-producing agents are considered.

The most common types of chemical agents are the nerve and blister agents. Nerve agents cause death by interfering with the normal functioning of transmission of nerve impulses, making breathing impossible. Nerve agents are most effective when inhaled, causing death in minutes; they can also act through the skin. At very low concentrations, nerve agents can impair vision. Blister agents cause injuries much like severe burns on the skin; if inhaled, blister agents cause the lungs to fill with fluid and can cause death by restricting breathing. Almost every proliferating country has elected to develop nerve and blister agents for incorporation into chemical weapons.

Toxicity is the most significant property of chemical agents, determining the exposure that causes injury or death. Other properties dictate the most effective way these agents can be incorporated into weapons. Persistence, the time the agent can remain active on the target, makes different agents useful against targets at various depths of the battlefield. Other important factors are cost, availability of raw materials, stability, and ability to treat persons exposed to the agent. Modern chemical agents such as the nerve agents sarin, VX, and soman, and the blister agents mustard and Lewisite are usually selected after a process of screening many potential agents. Since these agents have predictable properties, and can be made by a number of well-known synthetic route, they are the agents of choice for countries entering the chemical weapons arena.

Agent production

Chemical agents are made using standard industrial process techniques. Blister agents are made by relatively simple one- or two-step processes followed by production purification. Once purified, these agents are stable in storage for long periods of time; in fact, some blister agent mustard produced by the United States during the World War II era is still in storage. Nerve agent production is more complicated, requiring a series of steps to completely produce the agent. Both nerve and blister agents are made using commercially available industrial chemicals as starting materials. Since these chemicals have other uses in addition to production of chemical agent, and several countries can provide the chemicals, controlling production of chemical agents in the proliferating countries is very difficult. Constant vigilance is needed to assure that industrial chemicals are not diverted for use in chemical warfare agent production. There is also a danger that proliferating countries will attempt production of the needed precursor, or starting chemicals, themselves when faced with continuing export restrictions. This could make the proliferating countries potential exporters of chemicals to other nations in the Third World.

Chemical treaties

Chemical weapons use is prohibited by the Geneva Protocol of 1925, which most proliferating countries have signed. The Protocol does not prohibit signatories from producing, developing, testing and storing chemical ammunition as a deterrent to use by others. In addition to the provisions of the treaty, many states have signed with reservations that the treaty is no longer binding if others do not observe its provisions, or that the treaty does not apply with regard to states who did not sign the treaty. The stockpiles of chemical weapons held by the United States, the Soviet Union, and others who have signed the Protocol are thus legitimate, allowed activities.

A chemical weapons ban is the best long term solution to the threat to international security posed by the use and spread of chemical weapons. A global ban on chemical weapons is being negotiated at the Conference on Disarmament (CD) in Geneva. In a separate action, the United States and Soviet Union have signed a bilateral Memorandum of Understanding (MOU) to facilitate the process of negotiation, signature, and ratification of a comprehensive, verifiable, and truly global ban, and to increase confidence in monitoring procedures for such a ban. These bilateral discussions have resulted in an agreement for both sides to reduce their CW stockpiles to a small fraction of their present size.

BIOLOGICAL WEAPON PROLIFERATION

The nature of disease research, wherein research for peaceful or military purposes is virtually indistinguishable, makes it extremely difficult to determine its ultimate purpose. Virulence, infective dose, aerosol behavior, immunizing characteristics, and production economy studies that are done for legitimate medical, biological, and public health research are also relevant to developing infectious disease agents or highly lethal toxins for warfare purposes.

Biological warfare agents

Biological warfare (BW) agents, including toxins, are much more potent than the most deadly chemical warfare (CW) agents and provide the broadest area coverage per pound of payload of all warheads. A BW agent is a microorganism or biologically derived toxin whose intentional use is meant to cause incapacitation, damage, or death to humans, animals, or plants; or to damage or destroy material. Infectious microorganisms which can be used as BW agents include bacteria, rickettsia, and viruses. Toxins, suitable for BW purposes, may be derived from microorganisms, animals, or plants. With the advent of biotechnological methods, such as genetic engineering, it is possible for the genetic material of plants or animals to be incorporated into bacteria. This enables large quantities of some plant and animal toxins to be produced for BW purposes. A BW agent must simultaneously possess a number of characteristics to make it useful militarily. These include:

High infectiousness or toxicity to ensure maximum results with a minimum of material.

Rapid action.

Sufficient resistance to environmental conditions such as sunlight, alkalinity/acidity, temperature, moisture/desiccation to permit the agent to survive long enough to infect, intoxicate, or damage.

Low cost and ease of production.

Low contagiousness to help prevent uncontrollable spread of disease.

Availability of vaccine strains or toxoids to immunize the user's troops.

In the past many infectious microorganisms or toxins were automatically excluded as BW agents due to these highly demanding criteria. However, as advances in biotechnology are made, the potential for applying them to BW increases significantly and will very likely make new agents available which have optimal weapons potential. Additionally, basic research-to-mass production of agents will be accelerated and distinguishing between peaceful research, development, and production and its application for BW purposes will become even more difficult. Third World nations will be able to take advantage of some biotechnological developments especially when it comes to production of agents.

Agent production

There are no unique precursor chemicals or equipment to indicate BW agent production. The equipment used to produce BW agents is truly dual-use in nature. Any nation with a modestly developed pharmaceutical industry already has the necessary technical infrastructure to produce BW agents if it so chooses.

In a strict sense, industrial fermentation processes, such as those used in the production of pharmaceuticals, are concerned with the products generated by multiplying microorganisms. However, a fermentation process can also be used to produce large numbers of microorganisms which themselves become the desired end-product. Thus, an infectious agent grown in large numbers and then placed in a weapon/dissemination system becomes a BW weapon. Production of a toxin agent is usually accomplished using fermentation processes except that the toxin produced by the microorganisms and released into the liquid cultivation medium during the growth process is the end-product rather than the microorganisms themselves. Viruses or rickettsia agents, unlike bacteria, require living metabolizing animal cells for growth, thereby requiring large-scale use of embryonated eggs or tissue cell culture systems to produce quantities of viruses or rickettsia for BW weapons. These agents are inherently more expensive and difficult to produce, but nonetheless well within the capabilities of many Third World countries.

The production of large quantities of infectious agents or toxins can be accomplished by various fermentation processes. With currently available technology, BW agents can be produced at such a rate that large stockpiles are no longer necessary. For example, a bacterium, such as the causative agent of anthrax, can be grown in batch fermentation systems or by continuous culture methods with or without computer-control. In either case, the anthrax can be produced in very large quantities from start to finish in 96 hours or less.

Agent weaponization

Countries usually acquire a CW capability before embarking on the development of BW agents and weapons. During the research, development, acquisition, and testing of CW agents and weapons, a considerable knowledge base is generated which has applicability to BW as well. Aerial bombs, rockets, artillery, missile warheads (with or without submunitions), and land mines can be used to deliver either CW or BW agents. The method of delivery depends upon operational objectives and capabilities, and strategic and tactical doctrine. Both BW and CW agents are also potential weapons for terrorist use.

International agreements

There are two international agreements which regulate biological warfare: the Geneva Protocol of 1925 and the Biological Weapons Convention of 1972.

Geneva Protocol

The Geneva Protocol prohibits the use of "bacteriological methods of warfare" but not possession of the agents. The Protocol's major weakness is that it does not prevent countries from developing bacteriological agents, thereby relying upon the signatories' good intentions not to use BW. Additionally, the Protocol only prohibits "bacteriological methods" which, if interpreted literally, means only bacteria could not be used as warfare agents but other microorganisms, such as viruses, or toxins could be.

Biological Warfare Convention

The Biological Weapons Convention (BWC) broadens coverage of potential BW agents by prohibiting the development, production, and storage of "microbial or other biological agents, or toxins whatever their origin or method of production, of types and in quantities that have no justification for prophylactic, protective or other peaceful purposes." The BWC removes the ambiguity in the Geneva Protocol as to whether toxins and all types of microorganisms are covered. The BWC, however, does not have any monitoring or verification provisions. This deficiency has made the BWC unenforceable.

NUCLEAR WEAPON PROLIFERATION

The nuclear fuel cycle

The nuclear fuel cycle begins with uranium ore mining. The ore is then "dressed" to concentrate it (forming yellow cake) for shipment to a feed materials processing plant. Depending on the specific need, the next step can be conversion to metal, oxide or fluoride. Two commercial reactor types, light water reactors (using slightly enriched uranium in the oxide form for fuel) and heavy water reactors (using uranium with the natural isotopic ratio for fuel) are commercially available, although others have been built and operated. For use in light water reactors, the uranium is slightly enriched in an isotope separation plant. After enrichment, the uranium is converted either to a metal or an oxide, fabricated into the specified fuel and place in the reactor. After irradiation in the operating reactor, the fuel is moved to a cooling pond where it is allowed to stay while natural decay takes place. It then moves to either a permanent waste disposal site or to a fuel reprocessing plant. At the latter it can be chemically processed and separated into two or more components: fission products (high-level waste), and actinides (uranium, plutonium, etc.). The first is handled as high level radioactive waste, the latter may be recycled as feed materials for a nuclear power program or the plutonium may be used in nuclear weapons fabrication. In some cases, additional processing may be required before such a use can be achieved.

Concurrent development of nuclear weapons related technologies can be carried out. Further, full-yield tests are not an essential requirement if a country has enough confidence in its design calculations.

Isotope Separation Technologies

Several technologies available today are practical for the separation of isotopes. The particular one used depends on the isotopes for which separation is desired, the level of national technology, and resource availability. Salient features of the more viable methods are presented below.

Gaseous Diffusion. This is a repetitive, multistage process in which a process gas (uranium hexafluoride for uranium separation) is forced through a porous membrane or barrier. Since a molecule which has U-235 is lighter than one with U-238, the former moves at slightly greater velocity, strikes the barrier more frequently and thus preferentially diffuses through the barrier. The low efficiency and degree of separation per stage results in the need for thousands of stages connected in a series cascade. Large quantities of power are required for compressors and cooling in a rather complex production plant. Components such as barrier, pump and compressor seals and piping must meet exacting manufacturing specifications. Thus, an enormous capital investment and high level of technical production capability is necessary.

Gas Centrifuge. This process uses the phenomena of gas mixture separation into heavy and light fractions in the strong field developed by a high-speed centrifuge. The light component tends to concentrate nearer the center, the heavy nearer the periphery. Scoops provide the extraction path and hydrodynamic force of the rotating gas provides the extraction energy. The efficiency of the gas centrifuge process is several orders of magnitude better than that of gas diffusion. Thus, fewer stages result in a given level of enrichment. However, each unit has a small capacity, requiring the use of many machines in parallel to achieve substantial results. Power consumption is reduced because of the hydrodynamic transport. Such mechanical systems in large numbers require a highly developed technical capability for both design and manufacture. In addition, large inventory and maintenance expenditures are required for continuous plant operation.

Several other technologies for isotope separation are operational or under development. Laser and chemical processes have been under development for several years but have not been implemented in a production scale plant. While aerodynamic techniques of various types have been investigated, only one has been applied to the production scale. It is not an efficient process when compared to the gas centrifuge.

Fuel Reprocessing

Extraction of plutonium from irradicated reactor fuel is generally done using chemical techniques. The process of solvent extraction is the most highly developed and most commonly used, and several variations exist depending on the specific fuel system being handled. In all cases, the fuel cladding is breached either mechanically or chemically, the fuel is dissolved and the uranium, plutonium, and fission product fractions are separated.

The "art" and engineering know-how required to implement this technology are such that access to the vast body of open literature by itself is inadequate to permit construction and immediate operation of an effective plant. Either technology transfer or arduous experimental development effort are required to reach such a point. A further complication arises because of the fissionable nature of plutonium. All process and product equipment must be "critically safe," i.e., plutonium accumulation in any portion of the process equipment must be kept well below the critical mass.

The rate of plutonium recovery is determined by plant size and plutonium concentration in the fuel. Plant size can range from a major industrial facility to a "glove box" scale operation. However, the recovery of enough plutonium for a single nuclear weapon (nominally 5 Kg) from a natural uranium fueled reactor would require processing 15-25 kg of fuel per week for about two years. This is achievable in a glove box scale facility.

The Nuclear Non-Proliferation Treaty and its effectiveness

The Treaty on the Non-proliferation of Nuclear Weapons (NPT) became effective March 5, 1970. Treaty objectives are to:

Prevent the spread of nuclear weapons to countries other than the five that possessed them at the end of 1966.

Promote international cooperation in developing the peaceful uses of nuclear energy, and particularly to help developing countries in this regard.

Afford all parties whatever benefits may be derived from the peaceful uses of nuclear explosives (PNE's). (The U.S. view is that PNE technology is indistinguishable from the technology for nuclear weapons.)

Obligate all parties to pursue negotiations toward a cessation of the nuclear arms race, nuclear disarmament and eventually a treaty on general and complete disarmament.

The Treaty distinguishes between Nuclear Weapon States (NWS) and Non-Nuclear Weapons States (NNWS), each with appropriate responsibilities. An NWS party to the Treaty will furnish no one with nuclear weapons, "nor will they aid NNWS in acquiring a nuclear explosive device," nor will they aid NNWS in acquiring a nuclear explosives capability. NNWS will not accept transfer of nuclear explosive devices, will not make or otherwise acquire them, and will not seek assistance in making them. NNWS will accept safeguards and verification as negotiated with the IAEA. All states party to the Treaty will not provide any NNWS with special fissionable material—or equipment for processing, using, or producing it—for peaceful purposes except under IAEA safeguards. NPT safeguards shall not hamper the economic or technological developments of the parties or international cooperation in peaceful nuclear activities. Any state party to the Treaty may withdraw from the NPT upon 90 days notice.

The Safeguards Agreement negotiated between the respective states and the International Atomic Energy Agency (IAEA) is the principal tool in the administration of the NPT. The safeguards are to permit the timely detection or diversion of significant quantities of nuclear material from peaceful activities to the manufacture of nuclear weapons or other nuclear explosive devices and to deter such diversion through the threat of early detection. Detailed accountability records of production and operation are submitted to IAEA, and IAEA inspectors

examine the facilities to verify that such materials are accounted for in the system.

Becoming a party to the treaty is one means of expediting the necessary technology transfer to establish research, power, or other related nuclear fuel cycle facilities. With 140 parties, the NPT is the most widely accepted arms control agreement in history. Thus, nonproliferation has been established as an international norm. However, not all countries are party to the NPT, and the sincerity of a few that are is questionable. Thus, party status cannot be looked upon as a clear indicator of weapons intentions, although being a party to the NPT does pose a political and legal barrier to the acquisition of nuclear weapons which nonparties do not face.

The Treaty of Tlatelolco, the Zangger Committee and the London Suppliers Group represent additional efforts to prevent the proliferation of nuclear weapons. The first creates a nuclear weapons free zone for South and Central American countries. The latter two represent efforts to establish responsible norms for the export of nuclear commodities including a requirement of IAEA safeguards on items listed on so-called trigger lists. The degree to which the spirit of these agreements are carried out varies from one country to another, although all adhere to the letter of the agreements.

BALLISTIC MISSILE PROLIFERATION

Proliferation of ballistic missiles is occurring at an ever-increasing pace. In just the last 2 years:

Over 1,000 ballistic missiles have been fired in combat in Iran, Iraq, and Afghanistan.

The first flight tests of ballistic missiles have occurred in India, Pakistan, and South Africa.

Israel has successfully orbited two satellites. Iraq has conducted its initial flight test of a space launch vehicle.

The longest range ballistic missiles in the Middle East (2500+ km) have been supplied to Saudi Arabia by China.

One form proliferation can take is the direct sales or transfers of complete missile systems from one nation to another. In the recent past, China and North Korea have been particularly aggressive in marketing their ballistic missile systems.

Another route a Third World nation can take is to develop an indigenous development and production capability. These countries tend to nurture their ballistic missile projects by tying them into related ongoing activities such as the development and production of surface-to-air missiles, space launch vehicles, and unguided rockets. In this way, the countries try to make maximum utilization of their extremely thin pools of trained manpower, facilities, materials, and experience in precision manufacturing.

Missile technology control regime [MTCR]

All of the current Third World ballistic missile programs are forced to rely on foreign technology to some degree. International efforts to stem the flow of ballistic missile technology—such as the MTCR—have slowed the pace of some programs and may have discouraged some countries.

The MTCR is the primary multilateral mechanism for controlling missile proliferation. The MTCR was created in 1987 by the United States, the United Kingdom, Canada, West Germany, France, Italy, and Japan. Other countries may join soon. The purpose of the MTCR is to control the transfer of technology and equipment associated with nuclear-capable ballistic and cruise missiles; specifically, missiles capable of carrying a 500 kg payload to a range of at least 300 km. In addition to its efforts under the MTCR, the United States maintains a regular dialogue with the Soviet Union on missile proliferation, and also has discussed the issue with many other countries.

ASSESSMENT

Chemical warfare

Iraq used chemical weapons in its war with Iran, and is the only country known to have used weapons containing nerve agents. Accusations of chemical use are fast becoming a feature of conflicts involving Third World countries. This trend toward a greater awareness of the military potential of chemical weapons is firmly established; reversal of this trend will be difficult since many of these proliferating countries view chemicals as a practical way to achieve the benefits of other weapons of mass destruction such as nuclear weapons. Changes in the chemical arsenals of the United States and Soviet Union as their chemical weapons are destroyed are not expected to significantly change the desires of the Third World countries to develop what they consider to be essential weapons for their own national security. Over 20 Third World countries have chemical warfare programs.

Biological warfare

BW proliferation has progressed rapidly since the signing of the BW Convention in 1972; the number of countries with BW programs has tripled in that time. Most of the proliferation has occurred in the Third World with the Middle East and Far East accounting for the preponderance of the activity. As a rule, countries generally develop a CW capability before embarking upon BW. Since there are about twice the number of countries with CW programs than with BW programs, additional BW proliferation is anticipated to occur especially within the Third World.

In February 1989, before the Senate Committee on Governmental Affairs, Judge Webster stated: "We are concerned that the moral barrier to biological warfare has been breached. At least ten countries are working to produce both previously known and futuristic biological weapons."

Nuclear warfare

Five countries—United States, Soviet Union, United Kingdom, France, and China—are acknowledged nuclear weapon states. About half a dozen additional countries have either acquired a capability to explode a nuclear device or are pursuing such a capability.

Ballistic missiles

By the year 2000, in the absence of effective export controls, approximately 15 of the developing countries will either have produced ballistic missiles or be able to do so. Although this activity is now focused in the Middle East, the list of 15 countries stretches from South America to Asia. At least initially, most of these missiles will be inaccurate, short-range (less than 1,000 km), single-stage weapons. However, several of the countries are displaying the technical potential and the political resolve needed to develop much more accurate, longer range, multistage weapons. Most missiles will be equipped with conventional, high-explosive warheads; but submunitions, chemical warheads, biological warheads and, in a few cases, nuclear warheads are also candidates.

Mr. BINGAMAN addressed the Chair.

Mr. WARNER. Mr. President, if the Senator will forbear for a moment I may ask that additional cosponsors Senator THURMOND and Senator WALLOP be noted.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from New Mexico [Mr. BINGAMAN] is recognized.

Mr. BINGAMAN. Mr. President, I just rise to support the amendment and to indicate that, from the perspective of myself at least, this is an amendment that makes good sense. The exact figures in it are not precisely what we have proposed in ours, but the general intent is exactly in the right direction.

I do believe that the precise funds need to be looked at. But clearly that is a sense-of-the-Congress resolution, and the figures in here are not fences. I think the Senator made that point in his presentation before. The figures in here are caps and very much would indicate that the sense of the Congress is that these are important programs, and we support that.

I have been requested to reserve the remainder of the time of Senator NUNN.

Mr. SHELBY addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from Alabama is recognized.

Mr. SHELBY. Mr. President, I rise to support the amendment offered by the Senator from Virginia. It makes sense, but it especially makes sense today. This is the direction that I believe we need to go. We have no choice. I commend the Senator from Virginia for his foresight and his diligence in bringing this to the Senate floor.

Mr. WARNER. Mr. President, I wonder if I might propound a question to my distinguished colleagues. I have in my hand what purports to be the amendment that will at some point be offered by my colleagues, Mr. BINGAMAN and Mr. SHELBY. I direct them to page 3, paragraph 4, in which they call for a vigorous pursuit of a variety of theater and antitactical ballistic missile defenses.

Is that pursuit to be conducted solely in the area of research and development, or is it the intention of the Senators to seek goals comparable to those set forth in the amendment of the Senator from Virginia; that is, to get these systems into the field at the earliest possible date given the growing threat?

Mr. SHELBY. If the Senator from Virginia will yield, I agree, and it would be my intention here to get it in the field as soon as is feasible. There is a growing need for it. We just have to

look around at what is happening in the Third World at this very moment.

As soon as we are able to get it developed and deployed, the better off we are going to be.

Mr. BINGAMAN. If the Senator from Virginia will yield, I would just respond that I agree with the statement of my colleague, the Senator from Alabama, with one exception. I am sure the Senator from Virginia is well aware that the general principle we have pursued in the Armed Services Committee this year is fly before buy and not rush forward with the acquisition or procurement of systems that have not been adequately proven out. The only reservation that I have with regard to it is the development of these theater missile capabilities.

Mr. WARNER. Mr. President, I bring to the Senator's attention that the system has concluded an exhaustive test program, but it has been indicated from those test results the high measure of success to date.

I think, given the problems to that we are experiencing today in the world, that is in the Middle East, that we should certainly try to expedite these systems, given the fly before buy policy as enunciated by our committee in its action on a number of programs.

Mr. President, I ask unanimous consent that the distinguished Senator from Georgia, the chairman of the Armed Services Committee, be made cosponsor of the pending amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WARNER. My question to my colleagues would be along the line of their approach, and how it contrasts sharply with the approach of the Senator from Virginia; namely, again reposing in the President the maximum possible discretion to develop these programs, in contrast to the direction, as I understand the amendment of the Senators from New Mexico and Alabama, in which that discretion is sharply curtailed.

I ask my colleagues why they felt that the Commander in Chief's hands should be so tied by their approach, versus the approach of the Senator from Virginia; namely, just providing a sense of the Congress?

Mr. BINGAMAN. Mr. President, I would respond to the question, and just indicate that I do not agree with the characterization of our amendment as sharply curtailing the discretion of the President in this regard.

The President, this year, in fiscal year 1990—the information that was given to us by the Director of the Strategic Defense Initiative Office, General Monahan, was that this year the program will spend $124.7 million on theater defense.

The administration had asked, when it testified to our committee, that it be permitted to go ahead and spend $131.8 million this next year. The amendment that the Senator from Alabama and I are proposing today would increase that nearly $50 million additional.

And it is our thought again that is not micromanagement. This is a $180 million line item which we are urging the Secretary of Defense to go forward with. I think when you look through the defense bill that we were considering in the last several days here, and again today in the Senate, that there are a tremendous number of line items that are much less than any $180 million.

So this is not a question of us unduly restricting what the Secretary is able to do or what the President is able to do.

The ACTING PRESIDENT pro tempore. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I thank the Chair for his courtesy, and my colleagues. We are about to conclude the first part of a unanimous-consent request.

The comments of the Senator from New Mexico will be addressed in fuller context by my distinguished colleague from Wyoming, Mr. WALLOP, during the course of his analysis of this amendment, which, on this side of the aisle, I say at this time, we have grave concerns about whether or not it is cast in such a manner as to enhance the abilities of the Commander in Chief to go forward in this wide range of research and development in this category of weapons to provide for our defense as an element of our deterrence against the growing threat not only in the theater systems, but in the intercontinental systems.

Mr. President, so we can expedite matters, if the Senator from Virginia has any remaining time, I will yield it back at this time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE ARROW PROJECT: PROTECTING ISRAEL, OUR ALLIES, AND OURSELVES

Mr. McCAIN. Mr. President, I am proud to have joined Senator WARNER and Senator WILSON in developing the amendment. Even in normal times, the case for the Arrow antitactical ballistic missile project would be an overwhelming one. Israel is located in the center of hostile states that are acquiring long-range missiles and weapons of mass destruction. Iraq already has targeted these missiles on Israel, and threatened to attack Israel's population. Syria has missiles in shelters that are armed with nerve gas warheads. Libya has built the largest single chemical weapons facility in the world, and is actively seeking long-range missiles.

Each of the nations I have just listed is actively involved in developing biological weapons. Iraq has probably deployed them, and Syria could probably do so on short notice. Libya lags behind, but is the most reckless of the three. Iraq has gone further, and persists in a major nuclear weapons effort.

Israel cannot rely upon a balance of terror. It cannot trust its enemies to accept a rationale or stable level of deterrence. It cannot accept significant casualties. It is too small, and it is a democracy. It cannot and will not sacrifice its people, and it has no autocratic leader who would ever make such sacrifices.

At the same time, the Arrow project offers great benefits to the United States. We, too, live in a world of wars. Secretary Cheney has stated that there are now 15 nations developing their own surface-to-surface missiles in the developing world, and that several are working on very long-range missiles. He has also testified that this number does not include nations trying to buy such missiles. Many of these nations, including North Korea, also possess weapons of mass destruction and are seeking, or have, nuclear weapons.

As Saddam Hussein's vicious invasion of Kuwait has shown, many of our allies are already threatened by nations with long-range missiles and weapons of mass destruction. We must seek every alternative way to negotiate a more peaceful world, but the day may well come when we will desperately need the kind of technology the Arrow represents, and we then will be able to cooperate with Israel in providing it to other States.

We also cannot ignore our own military forces and our own tactical and strategic defense needs. Many of the technologies in the Arrow are of great value in developing the anti-tactical ballistic missile and strategic defense technologies needed in the United States.

We can no longer ignore the need to provide such protection for our forces overseas. We can no longer ignore the long-term threat that a leader like Saddam Hussein might be able to acquire at least a few nuclear armed missiles that he could target on the United States.

Finally, Mr. President, let me go further. These are not normal times. Iraq has invaded and seized Kuwait. It is poised on the Saudi border. It is exercising growing influence over Jordan. The stability in the Arab-Israeli military balance established by Camp David is suddenly uncertain and tenuous. We need to fully reevaluate all our military assistance to Israel to determine whether it is adequate. We may need to strengthen Israel's conventional military capabilities as well. This amendment is a first step in securing the safety of a vital and proven

ally. We may soon have to take other steps as well.

Mr. BINGAMAN. Mr. President, I am advised that there are no additional requests for time on this side of the aisle, and therefore we yield back any time that remains on this side of the aisle.

The ACTING PRESIDENT pro tempore. Without objection, the pending amendment is laid aside.

The Senator from New Mexico is recognized.

Mr. BINGAMAN. Mr. President, under the unanimous consent agreement, I gather than it is appropriate at this point for me to send forward the amendment on behalf of myself and the Senator from Alabama, or should we withhold until 9:30?

The ACTING PRESIDENT pro tempore. The Senator may proceed.

AMENDMENT NO. 2588

(Purpose: To specify certain limitations on the use of funds for the SDI Program)

Mr. BINGAMAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN], for himself, Mr. SHELBY, Mr. HEFLIN, Mr. JOHNSTON, Mr. DOMENICI, Mr. HATFIELD, and Mr. D'AMATO, propose an amendment numbered 2588.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 14, beginning with line 8, strike out all down through line 19, and insert in lieu thereof the following:

SEC. 222. LIMITATIONS ON THE STRATEGIC DEFENSE INITIATIVE

(a) FINDINGS.—Congress makes the following findings:

(1) The Strategic Defense Initiative (SDI) has become too focused on a projected 1993 Presidential decision on whether the United States will deploy a space-based kinetic energy weapon system, known as "brilliant pebbles".

(2) There has been tremendous instability in the Phase I architecture of the strategic defense system.

(3) A decision to deploy the phase I architecture of that system would have grave implications for offensive arms reduction negotiations with the Soviet Union and for continued United States compliance with the 1972 Anti-Ballistic Missile Treaty.

(4) Changes in the international political environment over the past year permit the United States to pursue the SDI Program at a more measured pace, with increased emphasis on theater and anti-tactical ballistic missile contingencies.

(5) A broad-based research program on the feasibility of highly effective missile defenses remains in the national interest.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Strategic Defense Initiative should not be focused on the projected 1993 Presidential decision on deployment of a space-based kinetic energy weapon system;

(2) the Strategic Defense Initiative should continue a balanced, robust program of research on those technologies that offer the prospect of highly effective anti-ballistic missile defenses;

(3) priority under the Strategic Defense Initiative should be given, in the near term, to research on a defense system that (A) would protect against an accidental missile launch against the United States or a limited ballistic missile attack against the United States by a third-world country, and (B) if deployed, would not be in violation of the 1972 Anti-Ballistic Missile Treaty.

(4) the Strategic Defense Initiative should include a vigorous pursuit of a variety of theater and anti-tactical ballistic missile defenses which would be of value to allies of the United States and to the military forces of the United States temporarily or permanently deployed within range of tactical ballistic missiles of a potential enemy; and

(5) the Strategic Defense Initiative should continue support, as it has over the past six years, for those critical technology efforts that have both civil and military applications in areas other than ballistic missile defense systems.

(c) LIMITATIONS ON SPENDING.—Of the funds authorized to be appropriated pursuant to section 201 for the Strategic Defense Initiative—

(1) not more than $345,000,000 may be obligated for the ground-based radar, space-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $142,000,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $894,300,000 may be obligated for other phase I programs;

(5) not more than $944,400,000 may be obligated for follow-on technologies programs;

(6) not more than $320,000,000 may be obligated for key technologies activities;

(7) not more than $227,800,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

(d) BUDGET INFORMATION.—With respect to each program and activity specified in clauses (1) through (11) of subsection (c), the Secretary of Defense shall include in budget justification materials submitted to Congress after the date of the enactment of this Act for any fiscal year, and in each annual report submitted to Congress after such date pursuant to section 224 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (10 U.S.C. 2431 note), a description of the program or activity, any changes made in the program or activity since the last budget justification materials were submitted to Congress or the last annual report was submitted as the case may be, and the amount budgeted for that program or activity for the fiscal year concerned.

(e) REPORT.—(1) The Secretary of Defense shall submit to the congressional defense committees a report on the allocation of funds appropriated for the Strategic Defense Initiative for fiscal year 1991. The report shall specify the amount of such funds allocated for each program, project, and activity of the Strategic Defense Initiative, including the amount allocated for each of the programs named in subsection (c).

(2) The report required by paragraph (1) shall be submitted not later than 90 days after the date of the enactment of legislation appropriating funds for the Strategic Defense Initiative for fiscal year 1991.

(f) CONSTRUCTION OF TERMS.—As used in this section:

(1) The terms "Phase I", "follow-on technologies", "key technologies", "operational support and management", "test and evaluation", "theater defense", "innovative science and technology", "small business innovative research", and "engineering analysis" shall be interpreted consistent with the use of those terms in the testimony of Lieutenant General George L. Mohahan, and the materials presented by General Monahan, before the Committee on Armed Services of the Senate on June 20, 1990, except that the term "Phase I" does not include the boost surveillance and tracking system program.

(2) The terms "brilliant pebbles", "space-based surveillance and tracking system", "ground-based surveillance and tracking system", "ground-based radar", and "ground-based interceptor" shall be interpreted consistent with the use of those terms in Appendix F to the "1990 Report to the Congress on the Strategic Defense Initiative", dated May 1990.

(g) DEFINITION.—In this section, the term "1972 Anti-Ballistic Missile Treaty" means the Treaty Between the United States of American and the Union of Soviet Socialist Republics on the Limitations of Anti-Ballistic Missiles, signed at Moscow on May 26, 1972.

The ACTING PRESIDENT pro tempore. Under the previous order, debate on the amendment is limited to 4 hours, equally divided and controlled by the Senator from New Mexico [Mr. BINGAMAN] and the Senator from Wyoming [Mr. WALLOP].

Mr. BINGAMAN. Mr. President, this amendment which I have sent to the desk on behalf of myself and my colleague, Senator SHELBY, the Senator from Alabama, I believe is an important amendment for the Senate to consider, and it is one that I also believe is somewhat overdue.

First, I would like to describe the amendment and what we are trying to accomplish by it, and then explain some of the reasons why we believe it is important.

This amendment does not argue with the total dollar figure that is being allocated by the Senate or approved by the Senate for the SDI budget.

The Armed Services Committee, on which both Senator SHELBY and I serve, determined to approve $3.573 billion in the SDI Program this year. I realize that is an issue that is going to

be the subject of additional amendments this morning and, of course, the subject of a great deal of negotiations with the House of Representatives over exactly what level of funding is appropriate for the entire program. We are not arguing about that in our amendment.

What we have done in this amendment is to take the figure, the $3.573 billion, and we have divided that into 11 line items. In so doing, we are holding fund levels for space-based phase I at about fiscal year 1990 levels. In addition to holding those funds at about the fiscal year 1990 levels, we are emphasizing those parts of the phase I of the SDI Program which relate to treaty compliant systems because it is clear there are some parts of the phase I proposal coming out of the administration that are, even if deployed or during testing and deployment, which would be in compliance with the ABM treaty. We are continuing to emphasize those.

Also, in the amendment we are emphasizing the long-term research for potentially far more effective options.

The amendment, for the first time, if this amendment is adopted, will put Congress on record as giving the SDI Office and the administration a budget in this area. It may come as a surprise to some in the Congress that this is the only area in the defense budget where there is no real direction from Congress. We have had some report language which has largely been ignored in recent years, but there has been no statutory direction as to how the funds are to be spent.

We believe it is important that that direction be given.

Let me review a few of the high points in the SDI Program leading up to this point, Mr. President, because this has been a subject that is of interest to all of us and has taken a great deal of time here on the Senate floor, since I came to the Senate in 1983.

In March 1983, President Reagan gave his speech, his now well-known and famous speech, in support of the SDI Program. I believe that since 1983, since March 1983, we have seen this SDI Program become a very robust research and development program that, in fact, could offer some effective and affordable defenses for this country in the future. I think that is still a very real possibility.

Starting in the 1984 budget, and during the years from 1984 until now, we have approved and appropriated here in the Congress about $20 billion for the SDI. Unfortunately, each of those years—and maybe it was appropriate the first few years—but each of those years, we have, in essence, given the administration a blank check on how the funds are to be spent.

About 2 years ago, the orientation of the overall SDI Program began to shift. It began to shift from the broad-based research that it had been pursuing on the feasibility of highly effective systems, to a much more focused program on a system of limited effectiveness that could be deployed this decade. That was a very conscious decision by the administration, reflected in budgets and reflected most obviously and most importantly in the budget that we have been considering this year from the administration.

The only apparent direction to the SDI Program from the administration today is based on the Presidential directive in January 1989 that we should go forward with development of an early deployment option so the President could make a deployment decision in his first term or in early 1993.

In compliance with that, the administration's budget request to the Congress this year called for a substantial increase in SDI, which it had each year, but three-quarters of the increase being asked for by the administration was proposed to go into work on this early deployment option.

The amendment we are offering today does not agree with that set of priorities. The amendment we are offering would keep the SDI Program a research and development program. The amendment would prevent the administration from shifting funds out of research and into what they call pre-full-scale development of an early deployment option, which is currently the most promising candidate from the point of view of the administration—the so-called Brilliant Pebbles Program. Clearly, that is what the administration would prefer to shift more and more of these funds to pursue.

The SDI Office currently plans to deploy a two-layered defensive system. One layer consists of space-based interceptors, which are these so-called Brilliant Pebbles, which would attack Soviet warheads during the boost phase and while dispensing a single warhead. The second layer consists of ground-launched interceptors that would engage the Soviet missiles during the late, midcourse, and terminal phases of their flight. Our amendment slows the testing and development of Brilliant Pebbles, but it allows SDIO to continue their plans for the ground-based interceptors and related sensors which might form the basis for a treaty-compliant deployment of an accidental launch protection system.

We propose to give Brilliant Pebbles a $129 million budget in 1991, just as it has had this year. That will allow SDI to continue a modest pace of testing. It will not permit them to go ahead at the crash pace that would bring that program into conflict with the ABM Treaty as early as late this next year.

Let me give a brief description of the reasons for our amendment, Mr. President. If we allow the administration to proceed as it would proceed absent this amendment, I think clearly we are taking action which contradicts the position we were just discussing with the Senator from Virginia, which is the fly-before-buy idea that we have tried to pursue in the Armed Services Committee. I seriously believe we do not have at this point a realistic assessment of the technology. There has never been a review by the Defense Acquisition Board of this Brilliant Pebbles Program. We are, simply stated, Mr. President, not yet in a position to determine whether deployment makes sense. We are not in a position to advise the President on that decision in late 1992 or early 1993, as the administration would try to do.

A second reason for this amendment is that if the administration is allowed to proceed as they would like, absent this amendment, it only makes sense to permit that if it is clear that we are willing to spend, as a country, about three times more on SDI each year in the next 5 years, the next 10 years, than we have been willing to spend in any previous year.

This year we are talking about a $3.573 billion budget. It is very clear from the testimony of the Department of Defense to our committee that their estimate is that to pursue their plan for going forward with pre-full-scale deployment, full-scale development, and then on to a decision to deploy, to proceed with that plan as they have laid it out will cost, in their own estimate, $58 billion between 1992 and 1997.

Mr. President, that is simply unrealistic. It is unrealistic for us to be considering that kind of expenditure. We do not have the funds in this country, and we will not have the funds, to triple the size of the SDI budget next year or the year after or the year after that. We need to be realistic about that and be realistic at the earliest possible date. I believe today is that day.

A third reason our amendment is important is that, absent our amendment, it is clear to me the administration will pursue a course, as budgets are cut by the Congress—and we are all well aware that the budget of the SDI will be cut by the Congress this year substantially below what the administration requested—as that budget is cut, the administration will steal funds from the other research activities, will try to shift the funds and maintain the funds necessary for early deployment and get the program further out of phase than it is even today.

Let me cite a couple of quotations. Senator WALLOP, our colleague from Wyoming, who has been a very strong advocate for the course the administration is advocating, was very kind to distribute to all of us a booklet in the

last couple of days, entitled "Critical Issues."

It is a Heritage Foundation publication. Its title is "SDI At the Turning Point: Readying Strategic Defenses for the 1990's and Beyond."

I think it is clear when you began to read this that what I am saying here at this point is clearly recognized by all concerned. One of the essays in this publication by Baker Spring makes the point on page 45 that:

When SDIO applies congressionally mandated budget cuts, it should favor near-term program over long-term research.

That is clearly the set of priorities that the administration has indicated to us, in the Armed Services Committee, that it will pursue. That is a set of priorities they pursued last year, and I think there is no question that they will do so. The country, I believe, will be poorly served by that shifting of resources to that early deployment idea.

Another reason I cite to the Senate this morning in favor of our amendment, is that absent our amendment, this administration based on what they have testified to before the Armed Services Committee and what they have intended to do and indicated their intention, is clearly on a path to undermine or abandon the ABM Treaty by going forward as the administration would have us.

This same publication that I referred to a few minutes ago, which is just recently published, has a very interesting article about SDI and arms control in it. The author of that is Henry F. Cooper, who is the new director of the SDI office. It is very clear in there. He makes the point very explicitly:

Since such a deployment would go beyond that permitted by the ABM Treaty as signed in 1972, this means that eventually the ABM Treaty must either be amended or abandoned.

Clearly, that is the course that the administration has our country on at this time. Our amendment would turn that around and see to it that our research and our development in this area not pursue a course that violates the ABM Treaty.

Mr. President, I am not opposed to the SDI Program as a realistic research and development program. I have supported high level of funding for that each year, as has my collegue from Alabama. I think it is clear that we are opposed to letting that program get as far off track as this administration is intent on taking it.

The President should not be making a deployment decision in 1992 or early 1993. We do not know enough. We are not able or, in my view, in a position to commit the funds to carry through on a deployment decision, if one were made in that timeframe. We should not be proceeding as though we are going to deploy a system in the mid-1990's—1994 and 1995—because, in fact, Mr. President, we are not.

I know there are many criticisms of the amendment that have been raised by others who will speak as the morning proceeds. I will withhold my arguments in response to those criticisms until we have had a chance to hear the criticisms made.

At this point, I will be glad to yield whatever time my colleague from Alabama needs for his explanation of the amendment and his point of view.

The ACTING PRESIDENT pro tempore. The Senator from Alabama [Mr. SHELBY] is recognized.

Mr. SHELBY. Mr. President, I rise to join my good friend and colleague on the Senate Armed Services Committee Senator BINGAMAN, in offering this amendment to the Defense authorization bill. I must say at the outset that I have not come to this decision lightly. I have been a vocal defender of the strategic defense initiative from its inception in 1983. I have, in past years, managed floor debate in opposition to amendments to cut this program. I have supported efforts in Congress to give the director of SDIO a virtual blank check to develop the program within the framework of the 1972 antiballistic missile treaty.

Mr. President, while this blank check may have been appropriate in 1984, 6 years ago when SDI began, I do not feel that it is prudent today. I say this for two reasons: First, the orientation of the SDI Program has changed. The emphasis has shifted from broad-based research on the feasibility of highly effective systems to focused development of a system of limited effectiveness that could be deployed this decade, and second, the threat, which SDI was designed to counter, has changed.

The purpose of this amendment that the Senator from New Mexico and I have offered today is to bring the SDI Program in line with the sweeping changes we are witnessing in the nature of the threat, the constraints of the Defense budget and the unfolding opportunities of the START process. We have offered this amendment in the spirit of positive reform of a high priority national program, of transfusing it with renewed relevance at this critical juncture I believe, in its history.

This is not an anti-SDI amendment. On the contrary, the supporters of the amendment view it as strengthening the SDI Program this year and for many years to come

While the threat of the Soviet arsenal of nuclear ballistic missiles has not gone away, the probability of a large scale attack in the near term has receded with the warming of East-West relations. A trend of growing concern, which we should respond to in the SDI Program, is the proliferation of nuclear missiles in the Third World.

This period of staggering national debt requires us to reexamine every major defense program, including SDI. While the Armed Services Committee has reduced funding for SDI in fiscal year 1991 by nearly $1 billion, it was largely silent on policy issue. The Bingaman-Shelby amendment speaks in a clear voice on the issue of SDI policy.

With respect to the START process, we are on the threshold of a major reduction in the numbers of strategic nuclear missiles on each side, a landmark event with profound implications to SDI. I believe the SDI Program has helped to get a START agreement, and that SDI can be structured to live in harmony with the continuing START process.

It is certainly legitimate to ask: What is wrong with the way the SDI Program is currently structured and how should it be changed? Let me address this question by reviewing some legislative history and outlining the central themes of the amendment.

Mr. President, in fiscal year 1988, just 2 years ago, the SDI Program changed from a broad-based program to one that has focused on the near term deployment of a defense system. A strategic defense architecture was proposed, emphasizing the deployment of space-based kinetic energy weapons. The basic idea of near-term deployment was not seriously opposed in this body, but there was strong opposition to the emphasis on space-based weapons.

In hours of Senate debate, the criticism of space-based weapons was vividly expressed, particularly by the Senator from Louisiana, on the grounds of technical feasibility, command and control problems, vulnerability to Asat attack and creation of strategic instability. This concern went largely unheeded by the Reagan and Bush administration, and the Bush administration has continued to march with a phase I SDI architecture that has, as a cornerstone, the use of space-based weapons.

In every succeeding year, Mr. President, this body, and the House of Representatives, have debated SDIO's emphasis on reaching a near-term decision on the deployment of space-based weapons. This debate continued despite prohibitions that the Armed Services Committee placed on the development, testing and deployment of space-based weapons. The SDI Program has proceeded with early deployment plans for a system that not only violates the prohibition against deployment, but is also incompatible with the prohibitions against development and testing.

In the fiscal year 1989 authorization the Armed Services Committee proposed budget fences on particular SDI Programs. The Senate-House confer-

ence resulted in the requirement of minimum allocations to ground-based weapons and limitations on expenditures for space-based weapons. These fences were subsequently removed in negotiations with the administration after President Reagan vetoed the legislation. However, the sense of the Congress on this issue was clearly evident. The SDI Program has not conformed to this expression. Instead, it has moved in the opposite direction by continually increasing the relative expenditures on space-based weapons.

During this period, the design of the space weapons has been changed from space-based interceptors [SDI], featuring clusters of weapons on space platforms, to Brilliant Pebbles, with larger numbers of single weapons located in a low earth orbit. While Brilliant Pebbles may lessen the vulnerability to Asat attack, the other congressional objections have not been removed; in fact, the command and control problems of thousands of relatively autonomous kill vehicles have become even more difficult and dangerous.

In parallel with the consistent record of congressional concern about space-based weapons, has been a uniform congressional advocacy of a treaty-complaint initial step in the SDI Program plan. Two years ago, Chairman NUNN advanced the idea of an accidental launch protection system [ALPS], and similar proposals have appeared in legislation since then. In the fiscal year 1989 defense authorization, the Spratt amendment, calling for an administration study and report on this type of system was adopted by an overwhelming majority in the House and subsequently agreed to by the Senate in conference.

All administration spokesmen have been negative regarding the ALPS concept, and the requested report was never submitted. Thus, the basis for a bipartisan consensus on the first step in an SDI deployment plan has been rebuffed, and we have continued divisive sparring about a phase I strategic defense system which violates the ABM Treaty.

Again in fiscal year 1990, the authorization bill coming out of the Armed Services to the Senate floor contained a sense-of-the-Congress resolution urging the administration to consider an accidental launch protection system that fully complies with the ABM Treaty. There has been no evidence that this congressional guidance has received any more attention than previous appeals.

In view of the growing menace of third world ballistic missiles and the undiminished threat of accidental and unauthorized launches, it is puzzling why this concept has been so relentlessly resisted by the administration. The Soviets already have a treaty-compliant system deployed in Moscow and they have continually upgraded it to provide protection against a limited ballistic missile attack. The cost of developing and deploying a comparable system in the United States, using existing SDI ground-based elements, would be only a fraction of the cost of the current phase I SDI system.

What we have seen, over the past 3 years, is a persistent campaign by the administration to sell the early deployment of space-based weapons and their adamant refusal to seriously consider the alternative of a treaty-compliant first step. As a result, the Congress and the administration remain at an impass. In the current environment, when world conditions have made the SDI phase I deployment plan an anachronism, we must change the SDI Program. This is the reason that Senator BINGAMAN and I offered this amendment in committee, and ultimately agreed with the chairman, the distinguished and ranking member, the Senator from Virginia, that the amendment should be deferred for consideration by the full Senate which we are doing today. We would have preferred that the administration take the initiative to make the needed changes, but that simply has not occurred. We ask you now to approve the amendment, and implement some critically needed reforms in the program.

What are the essential elements of this amendment? There are three main themes which we urge you to consider:

First, slow funding for space-based weapons systems within the phase I architecture.

Second, maintain fiscal year 1991 funding levels for long-term research.

Third, increased development effort on theater missile defense, the fence that we have been talking about.

The phase I architecture, with its emphasis on space-based elements, represents a budget drain that precludes any increased emphasis on long-term research or theater missile defense. Focusing on a limited protection system, which could be accomplished at a small fraction of the cost of phase I, would free up funds to diversify and balance the program. Furthermore, it would remove the cloud of a violation or abrogation of the ABM Treaty and thus improve the atmosphere for continuing START negotiations.

As to the second major theme, we have seen a steady shift of SDI resources over the past 3 years from far-term research to near-term deployment. This has been a natural consequence of the emphasis on the phase I architecture and the annual rite of Congress slashing in ever increasing amounts the budget request for SDI. Those of us who have loyally supported SDI have fought in committee and on the floor to stem the tide of SDI budget reductions, However, the time has come for a structural change, a fundamental reordering of priorities within the program, rather than stopgap measures.

Far-term research is the hallmark of the SDI Program. It is this class of research that accelerates the transition of embryonic technology from the laboratory into practical applications. If SDI is ever to fulfill the dream of being a highly effective Defense against the threat of ballistic missiles, of providing a technical basis for "saving lives, rather than avenging them," it must never give up its birthright of highly innovative technology. Technologies in the fields of semiconductors and directed energy weapons, for example, have benefited immensely from SDI funding, and they have promising applications in the civilian sector.

Finally, let me say a few words about the proposed increase in theater missile defense. A primary objective of the SDI Program from the outset has been to provide protection for our allies, as well as ourselves. The main question confronting us now is how best to provide that extended protection. The two competing approaches that are currently defined are a ground-based approach and a space-based approach called global protections against limited strikes [GPALS]. For many of the same reasons previously discussed, it is far preferable, at least in the near term, to proceed with the ground-based approach.

The same technology which drives an ALPS system for the continental United States can be applied to the defense of any other territory in the world. Ground-based interceptors and sensors can be deployed to defend against ballistic missiles of any range, from short-range tactical ballistic missiles to intercontinental missiles. They are not limited, as are weapons in Earth orbit, to a certain minimum range or minimum time-of-flight targets. Additionally, ground-based defense systems can wait to engage threatening missiles until it is clear exactly where the missiles are aimed. Under this system, the chances of making a mistake, or accidentally shooting down a nonthreatening missile, are extremely remote.

There are a number of technology demonstration programs under way, including the extended range interceptor [ERINT-1], the Israel Arrow interceptor, and the tactical high-altitude area defense [THAAD] interceptor. The ERINT project will demonstrate hit-to-kill capability of a small missile using an onboard radar seeker to guide it to intercept. The Arrow is an Israeli developed missile designed to achieve a near-perfect defense against a limited missile threat and to perform intercept sufficiently far from the defense position. THAAD is an area coverage

system that can protect large geographical zones. All of these systems are designed to be effective against the tactical missiles that are being proliferated in great numbers in potentially hot spots around the world.

Senator Bingaman and I feel that this problem is of such consequence that we have included almost $50 million in funding above the administration's request for theater missile defense. Within this amount we have provided $42 million for the Arrow Program.

Mr. President, this morning, I have discussed some legislative history that reveals the fundamental conflicts between the legislative and executive branches on the direction of the SDI Programs over the past 3 years. This legislative history makes it clear that this amendment is not a sudden "bolt out of the blue," or an action that should take the administration by surprise.

Once again, this amendment will allocate the $3.573 billion in funding proposed by the Armed Services Committee for the strategic defense initiative among 11 line items. The Bingaman-Shelby amendment holds funding for space-based phase I systems at approximately fiscal year 1990 levels, while emphasizing ground-based ABM Treaty compliant phase I systems, theater defenses, long-term and key technologies.

Mr. President, we believe that passage of this amendment would give the administration clear guidance on the direction of the SDI Program. While the sponsors of this amendment have supported SDI since its inception, we have become increasingly wary over the shift of orientation of the program from a board-based research program to an emphasis on a near-term deployment decision based on space-based interceptors. Our amendment will ensure that SDI pursues the balanaced research program that a majority of the Congress and the American people desire.

Mr. BINGAMAN. Mr. President, we reserve the remainder of our time.

Mr. WALLOP. Mr. President, I yield myself such time as I may consume.

Mr. President, let me begin by saying that the SDI debate is always prefaced by a statement "I always support SDI. I am a strong supporter of SDI." And then they seek to neuter it, keep it research only, and to keep it research is to keep it sterile. To keep it research is to deny to the American people the fruits of the research conducted already.

It is surprising to this Senator—and I will say it more than once in this debate—why it is so important for Israel to have a defense against ballistic missiles and deny it to the United States. My colleagues from New Mexico and Alabama justify their amendment with the argument that the Strategic Defense Initiative Organization has spent some $20 billion since the program was launched, largely at its own discretion, with "little formal guidance."

Now they say the time has come to impose significant restrictions on how that money will be spent, presumably, in the interest of America. I do not quarrel with anybody on patriotism. This is not an argument about patriotism, but about judgment.

Their amendment would allocate all of SDIO's funds by 11 internal line items, capping the amounts to be spent on phase 1 key technologies and follow-on technologies and theater defense and so on. They claim that it is balanced.

Mr. President, this is a peculiar idea of balance that takes phase 1 space-based interceptors and reduces them to less than 10 percent, $3.57 billion of the SDI budget. Follow-on technology under this proposal, on the other hand, rises to nearly 33 percent. The balance is not there, and I think it is fair to observe that in the beginning.

The proposed allocation cuts nearly $200 million from the program called Brilliant Pebbles, the most promising near-term interceptor technology, and $200 million from other phase 1 research. SDI line items benefiting the most from this amendment would be long-term technologies and ground-based systems where the research is done, not coincidentally, in New Mexico and Alabama.

Mr. President, over the course of debates, both in the committee and in the past, I have made the claim—and I can document it historically today—that the problem with the strategic defense of America has never been technology; it has always been political indecision, sometimes driven by the Congress and sometimes by the administration.

During the fifties, America spent about $50 billion—real dollars in those days—to provide ourselves with a first-class air defense system. Soviet bombers could have come in force, but few, if any, would have gotten through. And as the missile race began, America was far ahead in developing defense against ballistic missiles.

Up until the mid-1960's, while this Government might not have been too keen on the fine points of strategy, it had a firm grip on the basic duty of all governments—that was to protect their civilian population.

Then along came the doctrine of "mutual assured destruction." It became fashionable to think in utopian terms and to neglect reality. The thing was, if only we could destroy the Soviet Union, and they could destroy America, and if neither of us was able to protect ourselves, we would all live happily ever after

So, as a consequence, we scrapped our air defense, and we scrapped the promising ABM system, and slowed down to almost nothing the promising research on new defense technology.

We had at the time the Patriot Program that could have provided real protection to the American people against the threat that existed in those days. But the floor of this Senate set about systematically gutting those programs until they fell on the face of their own inconsequence because of the numbers in reductions that took place.

In 1983, in a debate in the Senate throughout that year, despite the obvious sense of the Senate and despite an unbroken string of technical successes, the overall effort in the area of a space-based laser weapon lost what little orientation toward an early success that the Carter administration had given it.

The three basic technology programs in that era of DARPA were reduced in scope. They were the Alpha laser, which was arbitrarily in power; the big mirror project, LODE, large optic diameter, was arbitrarily shorn of the features which connect it to the pointer-tracker; the Talon Gold pointer-tracker had one of its two telescopes removed.

The Carter administration's schedule, insufficient as it was, provided for an on-orbit demonstration of a 5-megawatt/4-meter laser weapon in 1991. In 1980, Robert Fossum, President Carter's Director of DARPA, stated officially in a letter to this Senator that the demonstration could take place in 1987—3 years ago.

In 1985, in a debate I suggested that had we simply followed the plan of the Carter administration, we would have had an American space-based laser in orbit, at the latest, by 1991 at a total cost, according to the Carter administration, of $2.3 billion.

While the technology permitted us to test a 10-megawatt, 10-meter weapon in the 1980's, mismanagement and shortsighted funding resulted in an official schedule that will not permit a five-four to be tested before 1993.

On the one hand, in 1985 the technology managers waxed eloquent about the technology—indeed, they sounded wildly optimistic about doing tricks—such as pointing to five targets within 1 second or compensating for atmospheric diffraction in a millisecond, or building mirrors with 100 percent reflectivity—which had not been demonstrated and which no one knows how to do.

So we rant into a technological barrier carved out of whole cloth that had no relation to either the requirements of a defense or the requirements of an administration.

On the other hand, however, they doggedly resisted building the only laser systems we knew then how to

build. Who can make sense of this methodical skepticism about the things we can do and a complete suspension of doubt for the things we do not yet know how to do?

This I suggest is the absolute essence of the amendment from the Senators from Alabama and New Mexico, and it follows and tracts the history of the behavior of this body.

ERIS: One of the most promising ground-based interceptors—had the original program been adequately funded and authorized to proceed according to the planned schedule, we could have begun full scale development in 1987. With a 5-year completion schedule, a treaty-compliant 100-interceptor system would have been operational by the early 1990's. Even this limited deployment would have provided protection over the entire North American continent against a limited ICBM or SLBM attack.

And the homing overlay experiment [HOE]: The successful intercept of a target vehicle in a space trajectory launched from Vandenberg AFB, destroyed by a simulated interceptor fired from Kwajalein in 1984. Demonstrated conclusively that high-velocity target acquisition, tracking, guidance, and intercept were all possible 6 years ago.

The airborne optical adjunct [AOA]. This was a means by which we were going to initiate control over the terminal attacks of missiles. Guess what we did? We severed completely the airborne from the adjunct. We put the adjunct on the east coast and airborne on the west coast, vitiating the promise it gave to the American people to provide them a needed capability.

We squandered the money spent on those programs once again, stopping a promising technology on the threshold of operational capability because there was something better over the horizon. Another example of our pattern of letting what we might be able to do tomorrow supplant what we can do today.

Let me put it in more prosaic terms. If I said to my colleagues even though we are hungry we better not have a steak for lunch because, by golly, we might be hungry again by dinner, they would think me insane. And it is insane, what we do to ourselves and what we do to the American people, all the while professing we are for the SDI Program to provide a real defense, by golly, someday.

In 1984, in a debate on this floor I asked the Senate to look back one generation to the few brief years when our present strategic weapons were conceived, designed, and built in a burst of creativity and efficiency. In those years we simply confided the task to competent individuals and gave them the power commensurate with their responsibility.

Gen. Bernard Shriever thus delivered to America the intermediate range ballistic missile in less than 4 years. And it was done without congresional micromanagement. It was done with a task given to them and not with direction to do this and not that, choose this and not that. We in the Senate do not have the scientific capability to choose this and not that, but that is what we seek to do.

Adm. "Red" Raborn delivered to America the Polaris system in about 4 years. When we are serious this is what we do.

We cannot stand on the floor today and vote for this amendment and claim to the American people that we are serious. What we want to do is to get technical success at a reasonable price and in good time. When we are not serious, we get programs managed like we managed MX—they take a generation, cost unbelievable amounts of time, and end up of doubtful worth. And that is going to be the net result of this amendment should it be enacted into law.

I noted on the floor in July 1983 that SDI was following a pattern similar to other advanced defense technology weapons programs; that it was becoming enmeshed in a web of bureaucratic interests.

I suggest today that the Senators, whatever their purpose, have fed the bureaucratic interests of the labs in their States. Not coincidentally, the lab in Los Alamos rejected this proposal in their statement made last week. They rejected the concept of the plan that is offered by the two Senators from New Mexico and Alabama.

I will print this statement in the RECORD and read it at a later point, Mr. President.

Regarding the armed services and the national labs, I observed in 1983 that these R&D bureaucracies spent a great deal of money on promising technologies and yet produced little of value to the country. I feared the same thing was going to happen to the SDI Program. And here we are witnessing not only that it has happened but we are about to make it worse because we will have now lost some of the great promise that has developed.

At last, SDIO has come under the leadership of a civilian Director who is not driven by his service's desires and his service's promise of promotion. He is not tied to the bureaucratic interests that have been feeding off SDI, and he inherits a remarkable record of technological process including the breakthroughs such as Brilliant Pebbles.

Now at last there is a good chance that SDI funds will actually be spent to produce the protection that the American people think they have been paying for from the beginning. But the Bingaman-Shelby amendment would use the defense authorization bill to turn SDI into a technological welfare program and divert the money to Sandia, Los Alamos, and Huntsville with no end or usable product in sight, and in fact not sought for because the possibility that we could get to a deployment decision is specifically the reason they offer for not going ahead with the program that the President's people have designed.

In their "Dear Colleague" letter, the amendment's sponsors admit they are attempting to derail the near-term deployment decision. That is what this debate is all about. But who knows? Coming to a deployment decision does not say we must decide to deploy; it simply says come to a deployment decision.

The sponsors of the amendment before us now are simply trying to deny any of us the ability to come to that decision. We are now at that point.

Their letter reads, and I quote from it:

> We fundamentally disagree with the need for a 1993 deployment decision and do not want the entire SDI program oriented to such a goal.

Mr. President, this statement compels me to ask my colleagues, and in fact the entire Senate: If not in 1993, when do they want to see a deployment decision? In 1998? In 2010? In 2030? Or never? Is it in fact their idea that this country will never be able to avail itself of the technology which it has so brilliantly brought to the stage where we can make those decisions?

How many more billions and billions of dollars for laboratory research and years of that research will satisfy them before we can make a decision for the Americans whom we say we serve when we spend their money, and yet deny them the fruits of the brilliance and the technological genius of America's scientists?

Senators BINGAMAN and SHELBY argued in committee that the SDI program is at a crossroads. That is true. One path, they say, leads to expenditures over the next 10 years of over $100 billion to $150 billion, a figure dropped on the floor this afternoon to $55 billion. I would say that figure is wrong and they know it. The figure is now $45 billion and is going down because of technological advances which will be stopped in their tracks, stopped in their tracks; for example, the miniaturization and the cost reduction that have come about so dramatically. The downward trend from $150 billion to $45 billion will be stopped in its tracks and we will not be able to avail the American people with either the economics or the promise that comes from this research.

Even if you accept their inflated cost estimates—which I do not—this is a false dichotomy. The real issue at hand is not how much we are going to

spend on SDI. What we have to decide is this: Are the American people ever going to get any return from the money spent and effort expended on SDI to date? Or are we by law going to ensure that the SDI program yields no security, nothing except a steady shower of money for well-connected R&D organizations? I would remind my colleagues that over the long run it costs no more to purchase real hardware—really useful things—than it does to pay welfare to favored technical constituencies.

The SDI issue is driven by the hard fact that ballistic missiles are the dominant weapon of modern warfare, and by the fact that the Soviet Union has an array of modernized nuclear-armed missiles pointed at us with no sign of a diminution of their strategic effort. The Soviet Union continues to modernize and expand this arsenal. Furthermore, under the much heralded START Treaty, the ratio of Soviet warheads to American targets would rise, not fall.

There will be more Soviet warheads targeted on fewer American targets after START than exists today. So the threat becomes greater and the promise farther away of countering that threat.

And if my colleagues have convinced themselves against all the evidence that the Soviet threat has evaporated—the threat from their capabilities, not their presumed intentions—they should consider other dangers in a world troubled by the rapid proliferation of ballistic missiles.

The sponsors of this amendment say their purpose is to give direction—give direction—to the SDI program. With all the technological, scientific prowess the two Senators possess, they are going to give direction to the people who have spent a lifetime working on this, and whose laboratory at Los Alamos has rejected the very program that has been offered.

But this amendment does exactly the opposite of giving direction. In closing the door on the possibility of building and deploying real defenses in the foreseeable future, it would deprive the program of any meaningful direction because it would have no meaningful goal.

But this amendment does exactly the opposite of giving direction. In closing the door on the possibility of building and deploying real defenses in the foreseeable future, it would deprive the program of any meaningful direction because it takes all meaningful goals away from it.

It says spend the money, boys. Bring us something someday, but do not bring us something to the point where we can make make a deployment decision. That is the meaning of their "Dear Colleague" letter.

So if reaching the point where we can give some actual protection for the American people, as the program exists today, is not real direction, then I ask the Senator to describe to me what is.

Mr. President, it is clear to me, to many Senators, and to Defense Department and SDIO officials, that instead of providing direction, the amendment is a cynical attempt to divert the program away from its presumed mission and toward open-ended research that essentially leads nowhere, except to more money for New Mexico and Alabama. The authors of the amendment offer absolutely no indication that the Bingaman-Shelby version of SDI will ever stop a single missile, or ever lead us to the point if we can decide if that may be the case or not. They offer no timetable for building any hardware that will ever stop a missile—not even ground-based or theater defense systems, let alone the exotic, longer term technologies.

Let me make it clear, as I have from the beginning, I have no dog in this fight except the protection of the American people. I stongly support directed energy technology. I was the original sponsor of the research on directed energy weapons. I tried and tried to get the Carter administration to spend $100,000 at MIT disproving the lowly article that this Senator wrote in 1979 in "Strategic Review." But they "disproved" it with mathematics so faulty that, to their credit, the administration admitted that their rebuttal did not in fact disprove it. And then I got the letter from Dr. Fossum saying that the program could go on and achieve the kind of technical capabilities that were claimed for it.

I always have been and am, convinced that the technical innovative genius of the American engineering and scientific community is a major national asset.

And I am certainly, not by any means, against ground-based systems. I tried 2 years ago to force us to get to accept a ground-based defense when I suggested if we were worried about MX and its vulnerability, as the chairman of the committee was in those days, I said, defend it. Just defend it. We knew how. And we know how today.

We need these ground-based systems now to provide the synergism with the boost phase and the mid-course system. I would even be happy to see us begin deployment of the strategic defense system with the ground-based element, as long as that is not a half-a-loaf ploy to kill space systems.

I would rather have the American people have some protection than no protection. I do not understand the argument that since we cannot do everything, we must therefore keep the people vulnerable to everything. It just defies logic, that, somehow or another, since we are not able to guarantee an impermeable umbrella, we can not promise the American people that we will even try to do anything to soften the edge of what might come our way, and thus generate the necessary element of doubt in the mind of the attacker and the deterrence that goes with that.

This amendment is carefully constructed to protect the Arrow for sufficient reasons, some among which are political. I unequivocally support the Arrow. In fact over the course of the American participation in it, I worked with Secretary of Defense Weinberger to get a greater level of participation on the part of the United States and a lower percentage requirement for the Government of Israel.

I recently sent a strong letter to the Secrertary of Defense urging him to begin the negotiations for the Arrow's follow-on phase. And indeed no one can deny and no one doubts that Israel is facing a severe threat from ballistic missiles in the Middle East. One has only to see the events there today with the madman dictator Saddam Hussein, who has shown his warlike intentions by invading his erstwhile ally, Kuwait, and by threatening the Saudis, by threatening the Middle East, by threatening Israel, as he has the United States, as has Qadhafi.

No one can doubt that Israel has a problem. Iraq not only has ballistic missiles, but also chemical weapons to attach to them, and they have shown an absolute uncaring willingness to use them. They have no conscience whatsoever.

And Saddam Hussein is racing to build nuclear weapons, if he has not already done so, with aid and help of some West European governments.

So our embattled ally Israel needs Arrow; she needs a missile defense. But, Mr. President, I wish my colleagues from Alabama and New Mexico would explain to the Senate—and to the American people: if Israelis deserve to be defended from the mass destruction of a ballistic missile attack, why do Americans not deserve the same protection?

Why is it good for us to commit ourselves, as we should, to the protection of our allies in the Middle East and say to the American people, "Not you fellows."

Mr. President, I would be willing for SDI funding to stay level or even shrink in exchange for allowing SDIO to build things that would actually prevent nuclear missiles, if launched, from wreaking destruction on their targets; or better yet, would dissuade an enemy from ever launching them in the first place.

But, if the Congress enacts what in all charity I have to say is a deceptive and irresponsible piece of legislation. If by law we restrict SDI to an entitlement program for special R&D inter-

ests that pours billions of taxpayer dollars down a bottomless money pit, with no promise that we will ever achieve anything—no timetable, no goal, no mission—then I suggest maybe the time will have come that we stop funding SDI altogether, because if we are to ever get anywhere, if our promise and certainty are that Americans will never have it, let me suggest that there are other things we could expend the money on that Americans can have.

My friends have mentioned that ABM Treaty. I do not know where they were during the course of the hearings, but Dr. Herzfeld, the Director of Defense, Research, and Engineering, at DOD, in testifying before the Senate Armed Services Committee this June, described in exquisite detail the compliance efforts that the Government is taking to make certain we do not breach even the concept of the ABM Treaty. To get us to a deployment decision does not breach the ABM Treaty.

The ABM Treaty contemplates a renegotiation, if it is in our national interest. The defense-in-space talks contemplate an arrangement between the Soviet Union and the United States, that will get us to, quoting Mr. Baker and Mr. Shevardnadze, "a more responsible, more reliable balance between strategic offenses and defenses."

I say to my colleagues, what on Earth do they expect the administration to negotiate if they deny the administration the ability and deny America the ability to go to those talks with something in hand? Otherwise, there is nothing to negotiate.

And, while they are worried about it, let me suggest the Soviet Union today is in absolute violation of the ABM Treaty. I refer not just to the Krasnoyarsk radar, which they have agreed is a violation, and have promised fitfully to perhaps dismantle. But I have here an interview that was published in Moscow on the 26th of May this year, with a General Kraskovskiy, who is, the Department of Defense believes, Chief of Soviet Missile Defense Forces. He has been on the front lines of the Soviet effort to save their large phased array radars, including the Krasnoyarsk radar. We have seen in several months a concerted effort to walk back on the political leadership's position—Mr. Shevardnadze's, position—that Krasnoyarsk is a violation of the ABM Treaty.

In an institutional way, he owns these large phased array radars, and this fact, coupled with General Kraskovskiy's interview, is significant because it demonstrates in public the operational like between the Soviet large phased array radars and the ABM system. American intelligence has generally taken the position that these LPAR's are not tied into their ABM system, perhaps because the intelligence community did not want to make what might be seen as a political judgment undermining the ABM Treaty. But, if this conclusion is so, then the internetted, centrally commanded and controlled system of interceptors and radars and large phased array radars suggest a highly significant nationwide ABM system in complete violation of article I of the treaty.

Let me read a little from the interview. Badurkin, the TRUD correspondent, wanted to know, "Just what is ABM?"

General Kraskovskiy responds:

The anti-ballistic missile system [ABM] is considered to be one of the most "restricted areas" in the country's Armed Forces.

And it was originally, organizationally, part of the Moscow air defense troops.

But the telling cite is this. Kraskovskiy, in response to Badurkin's question, says:

I think the time has come to tell our leaders about the ABM System in greater detail: How does it function and what missions does it accomplish during peacetime?

(Kraskovskiy) During peacetime, the system is in a State of permanent combat readiness, and it "monitors" outer space. Its eyes and ears are the early warning radar sites. The large phased array radars.

What better admission can we ask for of what this system is for?

They are capable of ascertaining the fact of an attack against the Soviet Union in seconds and transferring to automatic tracking of ballistic targets, having discriminated nuclear warheads from false targets and decoys.

Anti-ballistic missiles are simultaneously brought to their readiness condition automatically, they are distributed among the targets, predicted target destruction points are calculated, and anti-ballistic missiles are automatically launched at the designated time. At first, the exo-atmospheric anti-ballistic missile interception echelon is employed and undestroyed ballistic missile warheads will be shot down in the atmosphere by short range interceptors.

Mr. President, I ask unanimous consent that this interview, this illuminating interview with General Kraskovskiy, be printed in the RECORD in its entirety, as an admission by the man in charge of Soviet ABM systems that the Soviet Union is in violation of article I of the ABM Treaty.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AIR DEFENSE OFFICER ON MOSCOW ABM SYSTEM, PEACEFUL USES

(90WC0077A Moscow TRUD in Russian 26 May 90 p I)

[Interview with Colonel General Volter Makarovich Kraskovskiy by TRUD Correspondent V. Badurkin: "Just What Is ABM?"]

[Text] The Anti-Ballistic Missile System (ABM) is considered to be one of the most "restricted areas" in the country's Armed Forces. A paradoxical situation has developed when the entire world knows that the Soviet Union deployed an anti-ballistic missile defense force around its capital in accordance with the Treaty on the Limitation of ABM Systems [1972] but there has not been a word about it in our own press! But, glasnost has also finally penetrated into the Army's activities. TRUD Correspondent V. Badurkin met with Colonel General Volter Makarovich Kraskovskiy, one of the PVO [Air Defense] leaders, and asked him to answer some questions for TRUD's readers.

[Badurkin] Volter Makarovich, considering the total absence of any information at all about anti-ballistic missile defense, first of all tell us about its place in the Armed Forces system.

[Kraskovskiy] Organizationally, Moscow's anti-ballistic missile defense is part of the Air Defense Troops. It consists of command and control facilities based on the most modern computers with software containing one million commands, acquisition and guidance radar sites, and firing complexes with anti-ballistic missiles deployed dozens of kilometers from each other. All of this has been developed and functions based on the very latest achievements of command and control theory, mathematics, electronics, radar, and other sciences.

[Badurkin] You emphasized the word "Moscow" in your answer. . . .

[Kraskovskiy] I did that intentionally. I think a small historical digression is necessary to clarify it.

In the 1960's, when the Cold War was at its height, the need arose to reliably defend the country from an American ballistic missile (ICBM) surprise attack. However, it soon became clear that creation of an anti-ballisitc missile defense system, not even for the entire country but only for primary strategic areas, would be a very expensive and futile venture. The fact is that if we covered, say, 10 targets with anti-ballistic missiles, the Americans would accordingly soon increase the number of their missiles in order to penetrate this shield. We, in turn, would once again strengthen our ABM System to protect ourselves from them. . . . And so on and so forth ad infinitum. A classic pattern of the arms race.

Fortunately, both sides had enough common sense to think it over in a timely manner and to begin negotiations to limit strategic weapons and anti-ballistic missile defense systems. As a result, as we all know, the 1972 Treaty was concluded between the USSR and U.S.A. which permitted each side to have only one area protected by ABM's on its territory. Furthermore, the radius of the ABM weapons system deployment areas must not exceed 150 kilometers. The Americans decided to cover their Grand Forks strategic missile base in the northern portion of their country and the Soviet leadership decided to cover the capital of the USSR.

[Badurkin] What played the determining role during selection of the region? We really have regions that are much more important in a strategic sense. . . .

[Kraskovskiy] The Soviet side proceeded from the fact that Moscow is the most important political, administrative, and industrial center of the State. All organs and all threads of command and control, including with the country's defense, are concentrated here. If we did not cover it, then it could occur in such a way that there would be no one to make a decision on a retaliatory strike or that the decision would not reach the executors.

[Badurkin] I think the time has come to tell our readers about the ABM System in

greater detail: How does it function and what missions does it accomplish during peacetime?

[Kraskovskiy] During peacetime, the system is in a state of permanent combat readiness and it "monitors" outer space. Its eyes and ear are early warning radar sites. They are capable of ascertaining the fact of an attack against the Soviet Union in seconds and transferring to automatic tracking of ballistic targets, having discriminated nuclear warheads from false targets and decoys.

Anti-ballistic missiles are simultaneously brought to their readiness condition automatically, they are distributed among the targets, predicted target destruction points are calculated, and anti-ballistic missiles are automatically launched at the designated time. At first, the exoatmospheric anti-ballistic missile interception echelon is employed and undestroyed ballistic missile warheads will be shot down in the atmosphere by short range interceptors. Anti-ballistic missile command and control is carried out by ground-based and on-board computers according to a calculated and confirmed point that is reflected by combat algorithms and programs and implemented on domestically produced supercomputers using target tracking radars and anti-ballistic missiles. This is a brief outline of our operations.

[Badurkin] I am afraid that, putting it mildly, not all of our readers will know how to sort this out. . . .

[Kraskovskiy] I will attempt to explain it in more understandable terms. Imagine a man who is being steadily fired at from practically all directions but he manages to react to each shot. At the same time, he selects only those bullets for destruction that are flying directly at him. If he sees that he cannot hit all of the bullets, he selects those bullets that are aimed at vitally important organs.

[Badurkin] We all know that the Americans have already mothballed their ABM System that protected their ballistic missile base in the 1970's. Why did the Soviet leadership not resort to that same step?

[Kraskovskiy] Let us begin with the Americans. The Americans have actually mothballed their Safeguard [ABM] System but they have left its primary element, the PAR [Perimeter Acquisition Radar] site, to serve as a nuclear missile attack early warning system. Furthermore, they are constantly improving ABM technology and conducting scientific research and experimental design work for this purpose. And considering the U.S.'s high scientific and technical potential, I can state with certainty that they are planning and are capable of deploying their own combat [ABM] complexes in a very short period of time if the need arises.

In addition, we should also not forget that, for seven years now on that side of the ocean, they have been intensively developing the SDI Program that envisions deployment of an ABM system, including space-based elements, along with the total build up of strategic offensive force capabilities.

As for our system, we think: It is not economical to "freeze" the enormous sums spent on its development. Therefore, it not only defends the capital of the USSR from ballistic missiles but also accomplishes other missions.

[Badurkin] That is, you want to say that the Soviet ABM System also performs peaceful operations?

[Kraskovskiy] Of course. It is needed by many sectors. ABM radar systems are utilized for monitoring outer space where thousands of artificial Earth satellites [AES] are permanently located. They monitor AES's while they enter into their calculated orbits, search for space vehicles that have changed the position of their orbit as a result of an accident or due to other causes, determine state affiliation of AES's and monitor their activities. We frequently have occasion to participate in supporting space vehicle docking, elimination of accident situations on them, conduct various maneuvers and carry out their landings. For example, I can remind your readers about the test flights of Buran-Energiya, the new Soviet space system, and the docking of the Mir Orbital Station with the Kvant-2 Astrophysical Module.

The responsible portion of our work is surveillance of Shuttle reusable space vehicle flights. (For example, from 1 through 4 March 1990, we observed Atlantis in outer space for the Pentagon). We also participate in determining times and possible reentry areas of space vehicle fragments, especially those that have nuclear power plants on board. Using ABM systems, we can determine space vehicle movement parameters with a very high degree of accuracy and check the characteristics and adjustment of new radar sites located in remote areas of the earth's surface.

I can list many more missions accomplished by the ABM system in peacetime but nevertheless our primary mission is maintenance of all systems at constant combat readiness to repel an enemy nuclear missile attack and to intercept ballistic missiles launched as a result of erroneous or arbitrary actions of individual subunits (for example, a submarine) or, finally, during disruption of stability in a country that has ballistic missiles with nuclear or chemical warheads.

[Badurkin] And the last question, Volter Makarovich. Everything that we have talked about until now concerns armed confrontation. But if we pose the problem in a different and maybe unusual plane for a military commander: How do you assess the possibility for cooperation between the USSR and U.S.A. in the area of security, including monitoring air space and outer space?

[Kraskovskiy] By the way you posed the question. I see the reflection of an attitude that has developed that military people are somehow only engaged in those things that prepare them to fight and that they do not at all want to think about detente for some reason. I personally think it is not such a fantastic idea to establish an all air and space monitoring system data correlation facility somewhere in the center of Europe where information would flow in from radar, optical, and other systems not only of the USSR and U.S., but of other countries and joint combat crews would perform alert duty there. Although in this case, obviously it would be more appropriate to call these alert forces not "combat" but peace crews.

It seems to me that during implementation of this idea, the world community would at least be guaranteed that nuclear war would not begin due to a ridiculous error in a combat program or due to a meteorite or a falling satellite that is perceived to be a ballistic missile.

Mr. WALLOP. Mr. President, let me conclude by saying the administration program neither undermines nor abandons the ABM Treaty. This is nonsense. Article XV of that treaty clearly grants the right to withdraw after notice, negotiate new terms; and part and parcel of American policy is to negotiate a more stable balance, admitted and accepted by the Russians, between offenses and defenses.

The warming of superpower relations, as addressed by my friend from Alabama, is precisely the reason we ought to proceed to the point with SDI where we can make this arrangement between ourselves and the Soviet Union, finding a more stable balance that gets rid of the hair-trigger effect of large intercontinental ballistic missiles.

The amendment's purpose, I again state, is to deny the President the ability to reach the deployment decision. Reaching that point is not necessarily a decision to deploy. The President wants the ability, he has sought and asks the ability, to be able to make that decision in this term. And this amendment specifically denies him this possibility at the moment when it is within our reach but denied within our policy goals—and prohibited by our arms control strategies yet projected.

I reserve the remainder of my time.

Mr. President, I yield 15 minutes to the Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho is recognized for 15 minutes. The Senator may proceed.

Mr. SYMMS. I ask unanimous consent to speak for 15 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. SYMMS pertaining to the introduction of S. 3001 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. SYMMS. Mr. President, in these times of changed global tensions we find ourselves faced with tough decisions regarding the status of our military. Many people feel recent international events mandate a significant disarmament of our Armed Forces, and from the looks of things, it seems this will happen. To these advocates of large-scale disarmament, I ask a single question: If we are to withdraw or significantly reduce our conventional forces from many regions of the world, does it not make sense to have an effective, reliable mechanism to defend our country in the absence of traditional methods? With SDI, we can be more aggressive in stopping the hegemony of tyrants like Hussein.

The warming of the cold war has prompted people to declare the world is more stable than ever before in this century. Well, I will be the first to tell you this reasoning is wrong. In fact, a more relaxed international environment invites crisis, rather than deterring it. This is true for several reasons: In the absence of bipolarity, smaller countries are less likely to suffer repri-

mand for acts of aggression, and because of this, the possibility for confrontation increases. This is particularly true for reactionary nations that were under the suppression of the Soviets. As the Soviets lose their influence over parts of the world, where previously their authority was never questioned, these regions become destabilized as border disputes and sovereignty rights come into question.

Another important aspect that cannot be ignored is the increased proliferation of ballistic missiles—including nuclear warheads—to Third World countries. This in itself constitutes a crisis, and it certainly justifies an effective strategic defense system. Saddam Hussein is living proof of the unpredictability and madness that typifies many Third World leaders. It is quite plain to me that we need to take protective measures against unpredictable and potentially lethal elements in the international community. The most practical way to achieve this in light of reduced conventional forces is SDI.

Although there is indication the Soviet Army will be making conventional force reductions, their strategic upgrading and technological advancements continue at a rapid rate. Soviet offensive missiles are formidable and will remain as such even under START. In fact, Soviet modernization programs will provide a ballistic missile force of higher technical quality than what they presently have. Furthermore, the Soviet rail garrison missile force has distinct advantages which SDI can successfully counter—where other counter and verification measures fail. This brings to the surface another consideration—problems with verification and treaty compliance. SDI would serve as an insurance, should we need it, against any consequences resulting from treaty violations and verification complications.

Global transitions are requiring us to reevaluate our force structure. We face many uncertainties now and in the future, but one thing remains clear: As we cut back our conventional forces, and consequently our quick-reaction capabilities, a reliable system of protection is imperative.

Opposition to continued funding for SDI indicates shortsightedness and inability to properly prioritize national security options. If bottom-line answers concerning SDI are what you want, then I offer this in reply: There should be no question about whether funding should be continued—SDI offers an important element to our future security structure. Any security system without SDI is an inept system, and this makes each and every American citizen vulnerable to the worst of disasters, and that, Mr. President, is the bottom line.

We currently have several amendments before us that would inhibit much more than just continued research for SDI. By limiting further research, program direction is changed. By changing project and program direction, previous research and development advances will not be optimally exploited, which means time and money will have been wasted. For example, reducing funding by allocating fixed amounts to 11 line items is not only inefficient, it does not align with the current SDI project or program element structure. Do we have the technical training to determine how to reallocate research funds for a project that has been structured in such a manner that a realignment would nullify much of the progress that has already taken place? This is exactly what would happen if these hasty and shortsighted amendments were agreed to.

Mr. President, I support the Senate Armed Services Committee Defense authorization bill as it pertains to SDI. I ask each and every one of my colleagues to give this vital program the consideration and the support it needs.

Mr. President, I thank the distinguished colleague from Wyoming for his remarks. Mr. President, if I were the author of this amendment, I believe, after hearing those remarks, I would give serious consideration to withdrawing the amendment. I think back to the days when I, along with my good friend from Alabama, was in the other body and the first start of the strategic defense initiative was underway, the Senator from Wyoming was first initiating those ideas in the Senate. I know my colleague from Alabama, the late Congressman from Georgia, Larry McDonald, who was a very distinguished member of the Armed Services Committee, many of us would get together and discuss the strategic programs and where we were going to put this country.

Mr. President, one of the major reasons that SDI is important—and it was important back in the seventies when President Carter started the Carter doctrine in the Middle East—was threats of Soviet hegemony.

We had no way, and we still have no way, to prevent being blackmailed by the Soviet Union or by others who may some day have the capability to launch intercontinental ballistic missiles with nuclear tipped warheads. I quote Garrick Utley, NBC Nightly News:

NEW THREAT FROM COLONEL QADHAFI

GARRICK UTLEY. What today brought from Libya is the latest threat from Colonel Qadhafi. He said Arab nations must develop nuclear weapons within the next several years. He also said that if he had had nuclear missiles when American planes attacked Tripoli in 1986, he would have retaliated by firing those missiles at New York City.

That from Colonel Qadhafi today.

Mr. President, I speak today with very sincere, profound concern for the safety and security of our country. There is now before us what I consider to be a matter of tremendous importance. This is a very fundamental, important issue. Of course, I am referring to the strategic defense initiative.

I would just like to take a moment, Mr. President, to go back and review the beginning, of what we did during the 1980's. And this buildup started during the late 1970's.

After the Soviet invasion of Afghanistan, then President Carter made a decided policy change for the United States of America, and made it very clear to the American people, and to the Congress that we had to make a change in the direction we were going because we were being blackmailed by our adversaries at the time, the Soviet Union.

In the early 1980's, with the election of President Reagan, he continued the same thrust that had been started at the end of the Carter administration, but some very firm decisions were made early on in the Reagan administration: The B-1B, the Trident, the MX, the continuation of the F-16, F-15 and other tactical air programs, the M-1 Abrams, the remodernization of the Navy and Marine Corps, the remodernization of the Army, were all a part of it.

Mr. President, President Reagan and Cap Weinberger and others were right when they said peace through strength works. They were right. They have been proven right. But when the evil empire really started coming unraveled was when President Reagan gave his SDI speech in 1983.

Senator WALLOP had been giving the same speech for many years before that, ever since he came to the Senate. In the seventies, he was a member of the Armed Services Committee and started focusing attention on it.

But the fact of the matter is, the turning point, the linchpin of when the recognition came to the Soviet empire that they could not compete with the United States was when the chance came that their intercontinental ballistic missiles strategic force might be dealt inoperable and out of date.

Mr. President, I am really surprised by the amendments being offered to reduce the SDI budget. It is so serious—we cannot make jokes about it—but it concerns me greatly when I study the amendment offered by Senators BINGAMAN and SHELBY. It appears that what we are seeing is parochial interests to emphasize more spending in certain States on an issue that is so big: to defend all the people of the United States. It is just wrong, Mr. President.

The strategic defense initiative is for the protection of all the people of the United States and should be above the line of local pork barreling. We should

be allowing the scientific judgment of those people who have been given the task to make these decisions and not shackle them, not tie their hands and not micromanage; and that is exactly what this amendment and the other two amendments that follow are trying to do.

Mr. President, we must make an informed decision as to whether to deploy phase I of SDI. We cannot tie their hands, unless we simply do not want to defend the American people, unless, Mr. President, we really do not care about Soviet hegemony, or Iraqi hegemony, or what other hegemony happens.

One of the key fundamental reasons—I say again to my colleagues—for SDI, is so that our leaders, whoever is in the White House, who is given the responsibility to provide for the security of the American people as Commander in Chief of our Armed Forces and head of our diplomatic corps, will not be blackmailed. If we do have to use conventional forces in a conflict, like the one that is going on as we speak on the Senate floor today—and I must say that in a general sense with respect to this entire bill. I praise the Senator from Virginia and the Senator from Georgia, and the members of the Armed Services Committee, for their efforts to try to bring the best bill possible forward to this Senate—but for anyone who looks at what is happening, we still live in a very troubled world.

We see this morning, the Iraqi troops staging on the border of Saudi Arabia. I can well remember during the 1973 war in the Middle East, when I was a member of the other body, President Nixon made it very clear at that time that the linchpin of the Persian Gulf is Saudi Arabia, and at that point the United States goes to war. At that time, of course, the Soviet Union was more of a threat to enter into that war. Now I think they are more interested in seeing oil prices go up. The benefits they can get from higher oil prices has probably as much to do with their cooperation with the United States and the West as anything else.

Be that as it may, the threat has somewhat changed, the players have changed, but the threat has not lessened in the Middle East.

Mr. President, the threat has not lessened in Eastern Europe and inside the Soviet empire. This Senator would not be at all surprised to see a major civil war taking place within the borders of the Soviet empire within the next 12 months.

Who is going to have control in that kind of a situation? Who is going to have control of the strategic nuclear weapons? That is a threat to the American people. If I were a resident of the city of New York, I would be greatly concerned to hear people like Qadhafi saying he would like to launch an intercontinental ballistic missile at New York City. I would be greatly concerned to think of where will Saddam Hussein be in 8 years. Will he have capability to launch intercontinental missiles with nuclear warheads in 8 to 10 years?

Mr. President, we live in a dangerous world. As I said earlier, President Reagan, Secretary Weinberger, the Congress of the United States that funded and helped make it happen, the leadership of the Armed Forces—I believe that the record shows they were right; peace through strength does work.

If you look at the history of people's ability to protect and defend themselves, it started out in the early times when you could defend and control the land you could protect yourselves. Then came the great sea powers of Great Britain, and then the great air powers of the United States.

Whoever controls space will be the power of the future. It is the only way, in the dangerous world we live in, that we can assure the safety and security of the American people and also give our President, whoever that may be in the future, the ability to do what is right in terms of protecting our friends and our alliances, and the security of our own people.

We are faced with many tough global political problems. If we are to withdraw, signficantly reduce our conventional forces, in many regions around the world it simply does not make sense not to have an effective and reliable mechanism to defend this country.

With an effective SDI system, we can be more aggressive with less conventional forces when we must stand up for the international laws of the sea, and international laws on human rights that are being grossly violated in Kuwait under the oppressive heel of the Iraqi invaders. If you always have the threat in the back of your mind, if you get in some kind of trouble, someone launches a missile at your country, and you have no means to stop it, it is very much of a detering factor to the President making the right decisions.

Mr. President, I predict here today on the floor that if we in the United States and the Western alliance do not react strongly, militarily if diplomacy fails, to ejecting Iraq from Kuwait and in the Middle East region, we will suffer long and hard for it in the next decades.

Mr. President, we have had the so-called warming of the cold war. It has, as I have said, caused people to declare that we have stability. What is happening in the world is this so-called "relaxed environment" is inviting crisis rather than deterring it. It is true for several reasons.

It is particularly true for the reactionary nations that have been previously under the suppression of the Soviets. The Soviets have lost a lot of influence. So Saddam Hussein has no problem speaking up for example. There is more destabilization. The disputes and sovereignty rights come into question. The proliferation of ballistic missiles including nuclear warheads becomes a bigger question to Third World countries.

The PRESIDING OFFICER. The Chair advises the Senator from Idaho his 15 minutes have expired.

Mr. SYMMS. I ask unanimous consent that I might have 5 more minutes.

Mr. WALLOP. I yield 5 more minutes.

The PRESIDING OFFICER. The Senator may proceed.

Mr. SYMMS. This in itself constitutes a crisis and certainly in my opinion justifies the strategic defense system.

As I said, I would not be surprised that within at least the next decade, and maybe sooner, the Iraqis will have the ability to deploy intercontinental ballistic missiles with nuclear warheads. This impedes us and should impel our colleagues to allow the professional scientists to make these decisions so that the American people can get the benefit—as the distinguished Senator from Wyoming said—of the moneys they have already spent and achieve some security that they want, they expect, they demand, they should have, from the tax dollars that have already been spent on this research and development of their system.

Mr. President, the Senator from Wyoming pointed out, and I say it again for my colleagues, Soviet modernization programs are improving their ballistic missile force. As we speak here, as we are in the process of a disarmament state and $1 billion down in American defenses, there is not one single reason for Americans to feel any safer in terms of those nuclear warhead-tipped missiles that are in the Soviet Union.

I invite my colleagues to think about the fact of 300 SS-18's targeted on U.S. targets. It means between at least 3,000 and maybe more targets can be targeted. Those SS-18's are all targeted at the United States of America. That has not changed. In fact they are modernizing those systems.

As the Senator from Wyoming points out, as we build down and have less targets, it makes it easier for them with their strategic forces to concentrate their firepower for first strike capability, hegemony, and blackmail on those targets. We do not know what the future holds. We do not know what is going to happen inside the

Soviet empire. We do not know who is going to control those missiles.

I urge my colleagues to vote down this amendment and the other amendments that follow it.

In closing, I would like to say that I urge my colleagues to vote down these amendments and not micromanage, not pork barrel on an issue that is this all-encompassing and this national in its scope; not try to stand here on the Senate floor and redirect and micromanage these programs that are so vitally important to the very security of our beloved country.

I yield the floor.

Mr. BINGAMAN. Mr. President, we yield 10 minutes to the senior Senator from Alabama [Mr. HEFLIN].

The PRESIDENT pro tempore. Senator HEFLIN is recognized.

Mr. HEFLIN. Mr. President, I rise in strong support of the amendment offered by my fellow Senator from Alabama, Senator SHELBY, and my colleague from New Mexico, Senator BINGAMAN.

Mr. President, the improvements in East-West relations, the demise of the Warsaw Pact, and the return to democracy in Eastern Europe are welcome and encouraging trends. However, in spite of these trends, the Soviets are not reducing their strategic assets but are, in fact, enhancing their effectiveness through new technology. Significant unrest remains in the world and the potential for confrontation continues in areas of vital interest to the United States. The instability in Third World nations, and among ethnic, religious, and terrorist organizations creates uncertainties that must be carefully considered.

What better example of this than Iraq's invasion of Kuwait this morning. If Iraq gains control of Kuwait, they will control 20 percent of the world's oil, jeopardizing our own supply.

Mr. President, Iraq possesses ballistic missiles and chemical weapons, and it is foolish to believe that they will not use them, should the need arise.

At one time, the threat presented by Third World nations such as Iraq could be virtually ignored, but no longer. William Webster, Director of the Central Intelligence Agency, recently testified that in the next 10 years, at least six Third World countries will have intermediate range ballistic missiles. Three of these countries will have missiles with ranges that could exceed 3,400 miles. Today, 13 countries have short-range missiles.

Mr. President, the genie is out of the bottle, and it is wishful thinking to hope that we can limit the spread of ballistic missile technology.

Therefore, I feel that SDI's highest priority should be the development of a treaty-compliant capability against unauthorized ballistic missile launches and deliberate ballistic missile terrorist attacks. At the same time, we must maintain a vigorous R&D program to insure long-term options.

Last year, I introduced a sense-of-the-Congress resolution that endorsed this approach. This resolution was approved by the Senate and made a part of the fiscal year 1990 authorization bill. Unfortunately, our recommendations were ignored. This year, the Senate must take stronger action. The amendment now before the Senate will insure that the emphasis of the Strategic Defense Initiative Office is shifted away from a premature deployment of a space-based system. Instead, the efforts of the SDIO will be directed toward the development of treaty-compliant accidental launch protection systems.

The Soviet Union, which shares borders with a number of Third World countries that possess ballistic missiles, already has a deployed, treaty-compliant, limited protection system. The Moscow ABM system has been upgraded and now has a two-tiered defense capability.

Mr. President, I believe that one of the most controversial elements in the Strategic Defense Initiative Program is the space-based interceptor. My fellow Senators can refer to all of the debates on funding of SDI since its inception, and they will find that the space-based interceptor has been its most criticized element. However, I am not necessarily opposed to the space-based interceptor. I simply feel that it should receive less priority than the ground-based elements which are much more mature and are our only hope of achieving a defense system within a reasonable timeframe which is capable of protecting this country.

We must also be mindful that protection against ballistic missiles must also be extended to our allies. Therefore, the increased emphasis on theater-missile defense called for in the Shelby-Bingaman amendment is a move in the right direction. Theater-missile defense will protect other nations which are threatened by the proliferation of ballistic missiles and contribute to stability in regions of potential conflict throughout the world. Accelerated development and testing of ground-based systems for this role will, in itself, serve as an added deterrent to the ominous spread of these weapons of mass destruction.

The ground-based interceptor program has achieved remarkable successes.

In 1984, a ground launched missile successfully hit a simulated nuclear warhead by tracking its thermal signature.

In 1987, a tactical missile, traveling at three times the speed of sound, was intercepted in the atmosphere by a ground-based missile.

In 1990, the successful test flight of the Hedi ground-based interceptor demonstrated the feasibility of cooling a hypervelocity vehicle. This missile could provide important capabilities in an accidental launch protection system.

In 1991, the ERIS missile will be launched for the first time. This missile could serve as the front-line weapon in an accidental launch protection system.

Ground-based systems have a proven track record. These defensive systems can be securely based on our own soil, and can be ready, should the need arise, to protect the United States against a limited attack. Furthermore, this system would not violate the 1972 Anti-Ballistic Missile Treaty.

With CFE agreements and START talks, we are finally seeing significant progress toward treaties with the Soviet Union that call for the reduction of conventional and nuclear forces. Mr. President, if we are to insure our credibility at the conference table, this is not the time to start breaking treaties ourselves. To proceed with Brilliant Pebbles testing and deployment would certainly cause us to do so.

For these reasons, Mr. President, I fully support the Shelby-Bingaman amendment. This amendment allocates the SDI budget between 11 line items and insures that the Strategic Defense Initiative Office takes a balanced stand on the various available technologies. Ground-based elements, the most mature technologies, are emphasized, and theater defense and follow-on technologies are supported.

The amendment also allocates $129 million for Brilliant Pebbles. This is sufficient funding to continue research on this promising technology.

This amendment gives the SDIO clear guidelines to follow. Guidelines that will eventually provide us with a working, treaty-compliant, limited defense system. I, therefore, urge my colleagues to support this amendment.

The PRESIDENT pro tempore. Who yields time?

Mr. BINGAMAN. I yield such time to the Senator from Alabama as he may require.

Mr. SHELBY. Mr. President, earlier the distinguished Senator from Wyoming in his opening statement, I believe, said the Senator claims the problem is not technology, it is political will, or something to that effect.

Let us look at some of the recent examples.

There is the B-1B; despite having the B-1A test program, the B-1B's defensive avionics, I believe, shows it does not work. What is the Senator of Wyoming's definition of technically feasible in this case?

There is the Airborne Self-Protection Jammer—the ASPJ—now years behind its schedule, as he knows and I know, hundreds of millions or more

overbudget, and it sure does not work well. What is the Senator's definition of technical feasibility in this case?

Then there is the AMRAAM missile—also years behind and millions over budget. And its capability is dubious to this Senator. What is technically feasible here?

I believe the truth is—and I submit to the Senate—all of the above exist not just as bright ideas at a national laboratory, plus a few bits of hardware here and there, like Brilliant Pebbles today. No, I believe the B-1B is a deployed system, and its ECM does not work; the ASPJ exists as production units, and barely works; AMRAAM exists as production missiles, and it barely works.

Yet, the Senator speaks as though Brilliant Pebbles are lying around, produced and developed, in the Pentagon parking lot, and the only reason we do not have defenses is because Congress will not fund the deployment.

I submit to the Senators here today that there are no production versions of Brilliant Pebbles. There are hardly any prototype versions. Nothing so far has been anywhere near space. There is no hardware to purchase with SDI funds. I believe if we focus on exotics, on ALPS, and on theater defenses, there will be plenty of hardware.

I would like to hear your response. I yield for that purpose.

Mr. WALLOP. Mr. President, am I on my own time or on yours?

The PRESIDENT pro tempore. The Senators will address one another in the third person, and through the Chair.

Staff will take their seats.

Mr. WALLOP. Mr. President, I direct the question through the Chair to the Senator from Alabama as to whether or not I am using my time or his to respond to the question.

Mr. SHELBY. My time, Mr. President.

Mr. BINGAMAN. Mr. President, we yield such time as the Senator may require to respond to this and any other questions that the Senator from Alabama propounds.

The PRESIDENT pro tempore. Without objection, the Senator from Wyoming may respond to questions asked by the Senator from Alabama, who holds the floor.

Mr. WALLOP. I thank the Chair.

Mr. President, there is something really quite amusing about both the questions and the premise of the Senator from Alabama. He cites the B-1 and its problems and AMRAAM and other problems as a reason to deny us the ability to move forward and test and seek to eliminate the problems of Brilliant Pebbles which the directors of the national labs at Los Alamos and Livermore have said is the most promising and most likely of our new technologies.

Because another program has had a problem, he is sitting here suggesting that we ought not to proceed through testing, and in fact, I think the more distressing and the point of my opening remarks is there is not any hardware—well, in fact, there is hardware, but what the Senator's amendment seeks to do is to deny us the ability to ever find out what that hardware can do, in other words, the near-term promise must be put on the shelf for farther term promises which will be put on the shelf for still farther term promises. This is the kind of absurdity we arrive at when we do not trust the technological ability of Americans to arrive at solutions.

One last point. The amendment of two Senators is based on this quirky assumption that you can turn on and turn off technical staffs of high competence like a light in a room, that you can have them in full-scale development 1 year and then scaled back the next year; and at some other moment in time when those things may not prove out you can turn them back on.

That is not the way scientific minds work, that is not the way laboratories work, and that is not the way sophisticated teams are put together.

Mr. SHELBY. I appreciate the Senator's response.

Mr. BINGAMAN. Will the Senator from Alabama yield for a comment in response to the comment of the Senator from Wyoming?

Mr. SHELBY. I yield.

Mr. BINGAMAN. Mr. President, I believe the point the Senator from Wyoming just made about the importance of maintaining a consistent program over a period of time is the exact reason we are offering this amendment. The SDI program in recent years has gone through tremendous turmoil and continues to go through tremendous turmoil, and that is largely a result of the fact that the Congress has failed to give any direction and failed to set out any kind of an achievable goal.

Let me also ask the Senator for his reaction to a point that he has consistently made and the Senator from Idaho also made that we are micromanaging by trying to designate some line items. In 1983 the Senator from Wyoming, 4 months after President Reagan gave his speech, in fact on the 19th of July, the Senator from Wyoming offered an amendment here on the Senate floor to establish seven line items in the ballistic missile defense program and they were much smaller line items. He had line items of $10 million in there, which is much more approximate to some kind of micromanagement than anything we are talking about.

I would point out to the Senator in case he fails to recall it that he is suggesting we are trying to identify particular technologies that deserve attention. He was proposing the lion's share of the fund going to the space-based chemical laser program at that time because in his judgment that program deserved much greater attention than it was getting.

Fortunately that amendment was denied and rejected by the Senate. But clearly it is hard for me to understand why we would be charged with micromanaging in light of the Senator's amendment in 1983.

Mr. SHELBY. Mr. President, reclaiming my time here, I believe one of the main problems with the argument of the Senator from Wyoming is that we do not have to be rocket scientists here this morning on the Senate floor to understand that we basically cannot afford phase 1 even if it worked, which I concede is questionable, as wonderous as the Senator from Wyoming claimed.

I do believe we need to try to judge whether it works a little or works a lot here. As far as the Senator's claim there is no timetable out on the theater defense in this amendment. I will point out to the Senator from Wyoming that SDI has never given any of the reports to show what can be done and at what cost it would be done.

I yield back my time.

Mr. WALLOP. Mr. President, I am still in response to the questions from the Senator.

The PRESIDENT pro tempore. The Senator from Wyoming is recognized. The Senator from Alabama has yielded the floor.

Mr. WALLOP. Well, tactics are tactics and some are fair and some are less so. Let me respond then.

The Senator from New Mexico makes a good point, but he merely reinforces the point that I made in my historical review of how we have limited our technological successes by our political choices. When we were operating on the basis of the Carter administration's judgment as to how the technology of an SDI-type chemical laser would be developed. It was clear at that time that the Administration was doing just exactly what the Senators from Alabama and New Mexico were doing when they put together the study that ended in this amendment. The study was directed not to look at near term technical ability and to look only at the things we did know how to do to see if someday we might know how to do them. It purposely moved us away from the threshold of real capability.

That is exactly what is happening here this morning with regard to Brilliant Pebbles.

I say to my friends with sincerity, it is history repeating itself. Yes, we were ready to do something concrete back then. We had information in hand ready to do something with

lasers. Now the information has all been scattered over the country, though strangely enough it is now coming back in vogue in the Office of SDIO.

The Senator suggests SDI has been going through turmoil. I suggest the turmoil has been politically induced. Congress is in absolute terror of coming to grips with real capability, real things that build real defenses to protect real people from real missiles.

Regarding the views of the able Senator from Alabama, the senior Senator, Senator HEFLIN, I am astonished that such an able jurist would come all this way and now suggest that by going ahead with Brilliant Pebbles we are ipso facto going to break the ABM Treaty.

I refer again, and I ask unanimous consent that it be printed in the RECORD, to the testimony of the administration's Dr. Herzfeld to the Senate Armed Services Committee about the compliance regimes that govern SDI, and which state in this Senator's point of view in too exquisite and excruciating detail precisely how well we are complying. We are overcomplying.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF HON. CHARLES M. HERZFELD, DIRECTOR, DEFENSE RESEARCH AND ENGINEERING

Mr. Chairman, thank you for the opportunity to testify before the Subcommittee on Strategic Forces and Nuclear Deterrence. Today I will discuss the process which ensures that all DoD acquisition activities are fully compliant with our ABM Treaty obligations. Accompanying me today are the Honorable Stephen J. Hadley, the Assistant Secretary of Defense for International Security Policy, and Lt. Gen. George L. Monahan, Jr., Director of the Strategic Defense Initiative Organization.

When I accepted my post, I knew that I was accepting a great management challenge—that of helping Under Secretary Betti to make the defense acquisition process more efficient, more streamlined, and more responsive. This requires understanding the differences between those constraints on the process that can and should be changed and those that cannot be changed. As part of the process of cultural change, we are engaged in a number of initiatives to improve the process that was laid out in the architecture of the Defense Management Review by the Secretary last year. At the same time, we must comply with existing laws, including assuring that the defense acquisition programs remains compliant with limitations associated with arms control agreements. That job requires supervision of an existing process to review and evaluate our defense acquisition programs so we can certify compliance with our treaty obligations. In responding to such management challenges, I believe that we must demonstrate the ability to meet our commitments and develop confidence and trust that we are not only doing things right, but doing the right things. By proper planning, we hope to improve the acquisition system to ensure that it functions efficiently, effectively, and lawfully in a rapidly changing budgetary, political, and arms control environment.

In general, we have developed what I believe to be an excellent process to ensure continuing compliance with the ABM Treaty, the INF Treaty, and other treaty obligations that could impact our acquisition programs. As part of this process, in coordination with the DoD General Counsel, the Under Secretary of Defense (Policy), the Chairman of the Joint Chiefs of Staff, the defense agencies, the SDIO, and the military services, the USD(A) issues instruction and guidance to the military services and defense agencies to help structure their R&D, field-testing, and acquisition programs so that they are compliant.

We establish the necessary management process and procedures for evaluating compliance, and render on a case-by-case basis decisions which certify programs that are compliant with our treaty obligations. We also review and evaluate quarterly compliance reports by each military service Secretary and defense agency director and certify their internal compliance programs.

Questions which arise within the department regarding the compliance of acquisition programs with specific agreements are referred to the USD(A) office for resolution on a case-by-case basis. Any system that raises a compliance issue will not be tested or deployed without prior clearance. Before rendering a decision, we receive the advice of the DoD General Counsel, the Under Secretary of Defense (Policy), and the Chairman of the Joint Chiefs of Staff or their staffs. Let me reassure you that I fully understand the obligation and responsiblity to ensure that our DoD acquisition programs are compliant with the ABM Treaty and other treaty obligations.

To assist in evaluating research & development, testing, acquisition, and deployment programs, a DoD Compliance Review Group chaired by Mr. Lee Minichiello, the Director, Strategy, Arms Control, and Compliance, who has accompanied me here today, provides technical analysis and staff review of experiments and programs that raise compliance questions. In addition to the chairman from acquisition, the Compliance Review Group is composed of representatives from the offices of the General Counsel, International Security Policy, and the Joint Staff. The review group functions as the central body within the Department of Defense responsible for directing and reviewing technical analysis to ensure compliance with our treaty obligations.

For example, the first step in evaluating a Strategic Defense Initiative experiment occurs when the SDIO contemplates an experiment which may require technical analysis to assure its compliance. Once identified, the program manager briefs the Compliance Review Group on the purposes and objectives of the experiment, how the experiment is structured, and on important programmatic timeframes and deadlines.

Members of the Compliance Review Group then discuss with the program manager the relevant compliance aspects of the prospective experiment; any pertinent guidance and instructions dealing with the experiment; any previous Compliance Review Group analysis that could have a bearing on the experiment being compliant; and, if appropriate, clarifications regarding ABM Treaty language.

At this juncture, the Compliance Review Group constructs a framework for any technical analysis necessary to help clarify and ultimately resolve compliance questions, should any arise. The Compliance Review Group may require further analysis before assessing compliance; or it may direct an independent technical analysis of the experiment.

FY 90 and 91 SDIO programs certified for compliance are listed in the Appendix to the Secretary of Defense's Report to Congress on the Strategic Defense Initiative entitled "SDI Compliance with the ABM Treaty." The experiments are: the Delta Star Experiment (on orbit; launched February 1989); the Laser Atmospheric Compensation Experiment (LACE) and Relay Mirror Experiment (RME), on orbit; the Kinetic Kill Vehicle Integrated Technology Experiment (KITE) flights in the High Endoatmospheric Defense Interceptor (HEDI) program; the Airborne Surveillance Testbed (AST); the Starlab tracking and pointing experiments; the Ground-Based Interceptor (GBI), formerly the Exoatmospheric Reentry Vehicle Interceptor Subsystem (ERIS) flight experiments; the Arrow antitactical missile flight experiments; the Lightweight ExoAtmospheric Projectile (LEAP) flight experiments; and a series of tests associated with the Brilliant Pebbles concept.

In addition, the Boost Surveillance and Tracking System (BSTS) has been reviewed and guidance issued for the construction and deployment of Treaty compliant satellites for the Tactical Warning/Attack Assessment mission; to be launched beginning in the mid-1990s.

As a result of the compliance process which I have explained, Secretary Cheney, Under Secretary Betti, and I can confidently state that the SDIO's research program is being conducted in a manner fully compliant with all U.S. international obligations, including the ABM Treaty.

As a matter of fact, the SDI program we are proposing includes no experiments or tests in FY 91 that would go beyond what some call the restrictive interpretation of the ABM Treaty; nor does our program include funds to purchase equipment in FY 91 that would be uniquely required for such experiments or tests. Should our plans in this regard change, we would consult with the Congress and request your approval through normal budgetary procedures.

Mr. Chairman, this concludes my statement. I would be pleased to respond to your questions.

Mr. BINGAMAN. Mr. President, could I ask the question?

Mr. WALLOP. Let me finish, and then I will answer the question. I am responding on my own time to the question. The Senator from Alabama suggested earlier I could respond on his time, but I will not argue that. If SDI has been through turmoil it has been created by us, and more turmoil is about to be created here because we are trying to deny the administration the ability to get to the point where they can build real things against real threats and make the decision as to whether or not to deploy. And that is not against the ABM Treaty. The tests are not against the ABM Treaty, and if there is turmoil, it is because we have created the turmoil and are setting about trying to create even more.

The last and most amazing thing is we are not going to build strategic de-

fenses because we cannot afford phase 1. Why are we doing anything? What can we afford? I mean if that is the criteria, that before we ever get there we decide we cannot afford it because somewhere down the road it might be too expensive, there is absolutely no sense in spending another dime on SDI because everything is going to cost something and somebody will always be able to overdefine it, whatever that may be.

So I suggest that the cost of phase 1 is not at issue. The cost of phase 1 becomes an issue when you get to the point whether or not to deploy, and not until.

I also suggest that the price has come down from $150 billion to $45 billion for phase 1, and will keep going down unless their amendment succeeds, when it will start going back up again because it denies us the ability to complete research or take advantage of the cuts in cost we have already achieved.

I reserve the time.

Mr. BINGAMAN. I yield myself the time I need.

I ask the Senator to respond on my time to this question. It seemed to me when Dr. Herzfeld was testifying to the committee on the compliance with the ABM Treaty that he made the point that there were 12 additional tests scheduled for Brilliant Pebbles or anticipated for Brilliant Pebbles at this point. Eight of those he could be sure were in treaty compliance. The ninth he could not. He would have to advise us at some time in the future as to the ninth of those tests which would be performed in his estimation in 1991.

He did not know at this point whether it would comply with the ABM Treaty or not. That is my recollection of his testimony. I ask if the Senator from Wyoming has a different recollection.

Mr. WALLOP. The Senator recalls conveniently. The Senator conveniently recalls that portion of testimony that suits him. But in fact no decision has been made on that test and no decision to do it would be made before it was either determined to be treaty compliance or complied with the will of the Congress. So there is no threat.

Mr. BINGAMAN. Mr. President, let me ask another question and I ask unanimous consent to let the Senator respond on my time.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BINGAMAN. This article that I read from the Heritage Foundation's last publication on this subject, on page 92 we have the statement—this is by the new director of the SDI office—where he says since such a deployment would go beyond that permitted by the ABM Treaty signed in 1972 this means that eventually the ABM Treaty must be abandoned.

Do you disagree with that statement?

Mr. WALLOP addressed the Chair.

The PRESIDENT pro tempore. Will the Senator please address other Senators not in the second person, but in the third person.

Mr. BINGAMAN. Mr. President, I ask the Senator from Wyoming if he could respond to the question.

Mr. WALLOP. The Senator understands the question and will not use my colleagues' time.

No, I do not disagree with the statement. But that decision is made only after a decision to deploy; is it not? That is the whole point. The President is asking us to get him to the point where he can make that decision.

Therefore, nobody is suggesting that at any moment in time somebody is going to violate the treaty. The treaty issue is part and parcel of the administration's arms control strategy. It has been a stated part of the Soviet arms control strategy. And yet the choice is now on the threshold of being denied to us by the potential harm of this amendment.

Mr. BINGAMAN. Let me, Mr. President, if the Senator has completed his response, just make another point in response to a comment which has been made repeatedly by the Senator from Wyoming and the Senator from Idaho, as well. And that is that the amendment that the Senator from Alabama and myself have proposed is essentially a pork-barrel amendment; the idea being that by this amendment, we are trying to fence adequate funding for the programs important to our States or the programs upon which work is done in our States, and deny funding elsewhere.

Mr. President, I think that reflects a genuine lack of understanding of what is proposed here. We are not fencing particular amounts of money in this amendment. I think everybody in the Senate is well aware of how you go about fencing money in order to pursue a so-called pork barrel project.

The way you do it is, and it is primarily a mechanism that applies in appropriations bills, you say of the funds appropriated, not less than x number of dollars shall be spent on this particular project. We are not doing that.

All we are doing is giving broad categories of direction to the Secretary of Defense and indicating that those are caps, those are maximum amounts that can be spent in those areas. These are ceilings. These are not floors. And there is a very real difference there.

If we were trying to establish or fence funding for particular projects in our States, there is no difficulty in drafting an amendment to accomplish that. That is not the way this amendment is drafted. That is not the purpose of this amendment.

Second, I would point out the obvious point that there is tremendous flexibility in the line items that we have identified here for the Director of the SDIO and the Secretary of Defense to allocate funds as they choose. The programs that are important and that have significant amounts of work going on in my home State of New Mexico are programs that are in the so-called follow-on line.

And the figure there that we are asking for is not as much as the administration requested. We are asking for $40 million less than the administration requested, and well over $900 million is being requested overall. We are not speaking in any place in the amendment as to where that money is to be spent. If the Director of SDIO and the Secretary of Defense were so persuaded, they could spend all that money on the program that the Senator from Wyoming was just recently talking about, the space-based chemical laser, or any of the other follow-on programs. So there is not an effort to earmark funds.

The only case where there is an exemption is in the case of the Arrow Advanced Development Program. And there Senator WARNER'S earlier amendment clearly made the point, and makes the point—and we will vote on that later today—that that is a priority. I believe that is an agreed-upon priority between the proponents and opponents of the amendment.

Mr. President, my colleague, the senior Senator from New Mexico, [Mr. DOMENICI] would like to speak on our side on the amendment, and I yield him such time as he may require.

The PRESIDENT pro tempore. The Senator from New Mexico [Mr. DOMENICI] is recognized for such time as he may require.

Mr. DOMENICI. Thank you, Mr. President.

Let me ask how much time does Senator BINGAMAN have?

The PRESIDENT pro tempore. Senator BINGAMAN has 62 minutes.

Mr. DOMENICI. I yield myself 5 minutes.

The PRESIDENT pro tempore. The Senator is recognized for 5 minutes.

Mr. DOMENICI. Mr. President, while I do not think the Bingaman-Shelby amendment is perfect, and I think it definitely needs some changing, I am going to support it because, frankly, I believe that the President of the United States is getting some very bad advice. I do not think I have said that very often as a Senator, but I really believe that.

And let me also say with reference to this President, I have infrequently failed to support him, and I hope we end up with a program which is helpful to the President. I think my record supporting this President is probably second to none in this institution.

But let me give you examples of why I believe he has not received good information. First, I will give you anecdotally how I have seen this SDI program for a few years.

The Director of the SDI ends up with billions of dollars for the SDI program. For those Senators who are genuinely interested, and I am, you might invite the SDI Director up to talk about how he is going to allocate the money. In a discussion about the program, you would see that part of the SDI budget is going to kinetic energy programs—Brilliant Pebbles, and the like. You will see it going up dramatically, and the other parts of the program being squeezed.

You say, "Well, look, just 2 years ago we had another trend line. What has happened?'

Well, the President has issued a directive that he wants to be in the position to make a deployment decision by 1993." And let me suggest I do not hear any of them saying it is right. They say, "Since he has issued that, we do not have any alternative. We have to put the money into essentially a couple of programs led by Brilliant Pebbles."

Mr. President, there are some who would say, since we are not scientists, we ought not concern ourselves about this. Mr. President, I am not a scientist, but I believe I am entitled to concern myself about this. I do not believe the Brilliant Pebbles technology is sufficiently credible to predicate a 1993 deployment decision on it.

Mr. NUNN. Will the Senator yield for just a minute?

Mr. DOMENICI. I am pleased to yield.

Mr. NUNN. Mr. President, the Senator makes, I believe, a very, very good point. I would ask the Senator a couple of other questions that I do not believe you have to be a rocket scientist to answer. I am not. I do not know many around here who are.

One question would relate to the relationship between phase 1 and phase 2. It has been the understanding of the Senator from Georgia all along that we would never make the deployment decision, the go-ahead decision, on phase 1 until we had a phase 2 technology coming behind it, so we know we would be able to fill in the obvious gaps that are going to be there when there becomes countermeasures available to the Soviets.

And by 1993, if you deplete funding for phase 2, which is being done and has been done for several years, there is no hope to be able to have a phase 1/phase 2 relationship that makes any sense at all.

My question is, Would we not simply be going out and spending a whole lot of money, billions and billions of dollars, even if phase 1 is ready, knowing perfectly well if the Soviets choose to counter it, they can find ways to counter it, and then we have to take another whole barrel of billions that we are not ready to do because we do not have phase 2 coming?

Mr. DOMENICI. The Senator is absolutely correct. And if you do not really believe that the principal science and technology that is pushing phase 1's timetable, if you do not believe it is as credible as a small group of scientists think, then it even makes your notion that you have just described even more phenomenally absurd.

The PRESIDENT pro tempore. The time of the Senator has expired. Senators will please address other Senators in the third person.

Mr. DOMENICI. I thank the Chair and apologize for not doing that. May I have another 5 minutes?

Mr. BINGAMAN. We yield the Senator from New Mexico an additional 5 minutes.

The PRESIDENT pro tempore. The Senator from New Mexico is recognized for 5 minutes.

Mr. DOMENICI. I will describe the way I learned what was going on. I asked the directors how come the allocation is going so much in one direction or another and it has, of late, been motivated by what I just described; a set of information that is supposed to be delivered to the President, toward a 1993 deployment decision. So everybody working on the program is saying, since that is what the President wants, let us do that.

Frankly, the Senator from New Mexico does not believe that is the kind of technology or science upon which to base the entire allocation of the dollars that are in this program.

In the past, there has been no stronger advocate for SDI than the Senator from New Mexico, and I know the Senator from Wyoming said earlier this morning, if a Senator says he was for SDI but is for the Bingaman amendment, he is not really for SDI. I want to say I do not really think that is true in the case of this Senator. This Senator has supported it. I have defended it. I believe it has accomplished tremendous things for this country. I believe its research and development has caused technological breakthroughs that are going to benefit humankind for a long time.

As a matter of fact, I might say to my friend from Georgia, the free-electron laser research may, indeed, yield technology that will produce, 10 years from now, the next generation—the second one out; not the next intervening, but the next after that—computer chips. I believe it is indeed possible and they will be the most phenomenal sources of computer information the world has ever seen. That is happening because of this program.

I believe miniaturization of profoundly complex items is a result of this program. We have seen a piece of equipment literally half the size of a major room reduced to the size of a water pump in just 4 years. Everything that was half the size of this room is now in a little piece of equipment about the size of a little water pump. I think these are all the kinds of things that are going to be spinoffs from this program.

Having said that, I believe what the administration ought to be doing with reference to this amendment, instead of opposing it here on the floor, they should be talking about how much more they might have need for Brilliant Pebbles; agree to some management of this program; and agree that Congress has the right to want some balance in this program between the kinetic energy technology, directed energy technology, and the various other technologies.

There are those who think we ought to just appropriate this money and that there are other people who are going to allocate it properly. I do not believe that, especially when those other people are under the kinds of pressures that I have just described.

The Senator from New Mexico does not believe for a minute that a scienced board, a broad-based science and engineering board, given the money in this bill, would make the same allocation of funds that the Director of the Strategic Defense Initiative Organization plans to make. The Director of the Stratgic Defense Initiative Organization is being pushed by a directive to "let us get an answer by 1993." This directive that he would push Brilliant Pebbles and one other technology. I am absolutely convinced a broad-based science group would say that such plans are not the best use of these resources. If your goal is development at some reasonable time and research and development of follow-up technologies, as the chairman of the committee has just described, I just do not believe it for a minute.

Since the Senator from New Mexico does not believe it, I join today in trying to send a signal that that ought to be reviewed. I repeat, every time I have tried to find out why are there these huge ups and downs in spending and allocations aside and apart from the total dollars, and the principal answer is "Brilliant Pebbles, 1993," it seems to me the time has come to draw some lines.

I regret that in order to do that I have to support some aspects of this amendment that I do not like. But I do that because I genuinely feel it is in the best interests of the SDI Program for somebody to take another look at that 1993 date as it is pushed by two technologies, principally Brilliant Pebbles.

I thank my friend from New Mexico for yielding.

The PRESIDENT pro tempore. The Senator from Wyoming [Mr. WALLOP].

Mr. WALLOP. Before yielding 7 minutes to the Senator from Arizona, let me say to my friend from New Mexico, I am disappointed in the judgments he has demonstrated, though I understand why he has made them. But I say they run somewhat counter to the judgments of Drs. Browne and Canavan, of Los Alamos National Laboratory, as of August 1.

I also say to the distinguished chairman and to the authors of this amendment that, contrary to their statements on the floor, there has been Defense Acquisition Board study of phase 1 cost estimates. It is so contained in a memorandum from the Under Secretary of Defense, Mr. John Betti. On June 15, 1990, the Defense Acquisition Board reviewed the Stratetic Defense Initiative Program. The Strategic Systems Committee endorsed these recommended actions, which includes the demonstration phase of Brilliant Pebbles—"I also approve proceeding with Brilliant Pebbles as briefed to the DAB."

There was also the Jason study, conducted in June or July of last year, by 55 scientists who declared there were no obstacles to proceeding with a Brilliant Pebbles-based architecture.

The Defense Science Board study of June and September 1989 recommended that the evaluation be conducted to understand fully the impact of Brilliant Pebbles.

The Red Team/Blue Team study, under the Department of Defense, was conducted under contract to the Strategic Defense Initiative Organization. Fundamentally, it determined that Brilliant Pebbles would be subject to the countermeasures, and their recommendation was to build survivability into the design.

I would say again to my friend from New Mexico, that countermeasures are not a simple matter. Countermeasures have to be designed by scientists. They have to be constructed by missile manufactuers. They result in the loss of capability of an ICBM and increase cost; and consumption of time, all of which works to the advantages of going after the synergism available with phase I.

Mr. President, I ask unanimous consent that the memorandum, the independent reviews, and the statements by Drs. Browne and Canavan of Los Alamos National Laboratory, in which they say, "The timely development of Brilliant Pebbles must be viewed as the cornerstone of the SDI program and pursued accordingly," be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE UNDER SECRETARY OF DEFENSE,
Washington, DC, June 19, 1990.

Memorandum for Director, Strategic Defense Initiative Organization; Chairman, Strategic System Committee.

Subject: Acquisition decision memorandum for Strategic Defense Initiative Program.

On June 15, 1990, the Defense Acquisition Board (DAB) reviewed the Strategic Defense Initiative Program. The Director, SDIO presented a review of the Brilliant Pebbles program in the context of the overall SDI program. He also recommended Milestone I approval for the Ground-Based Radar, and its inclusion in the Phase I Strategic Defense System (SDS). The Strategic Systems Committee endorsed these recommended actions.

I approve the Ground Based Radar Milestone I and authorize the conduct of Demonstrative/Validation Phase activities. This is done with recognition that studies are ongoing which may impact the overall architecture of the SDS program. I also approve the attached Ground-Based Radar baseline, and Demonstration/Validation Phase exit criteria. I also approve proceeding with Brilliant Pebbles as briefed to the DAB.

The Director, SDIO shall present the following to the DAB in the Spring of 1991:

(1) a system-level baseline for the Phase I Strategic Defense System;

(2) system and element level cost estimates for the Phase I SDS; and

(3) a review of the degree of concurrency in the acquisition strategy of each SDS element.

The Chairman of the Strategic Systems Committee will define within two weeks, the Terms of Reference for the Process Action Team to make recommendations regarding the role of the DAB in the SDI oversight process as well as the DAB process to be applied to the SDS. These recommendations will include, among other things, how acquisition phases (e.g., demonstration/validation, fullscale development, etc.) will apply to the SDS as an overall system.

JOHN BETTI.

INDEPENDENT REVIEWS

Several independent reviews of the Brilliant Pebbles concept were conducted to assess its potential contribution to a strategic defense system. These reviews are summarized below:

A JASON Study was conducted in June and July 1989. JASON is a group of approximately 55 scientists dedicated to scientific and technical research and analysis in support of the national security community. JASON members, almost all of whom are university professors whose expertise and academic careers have been primarily devoted to theoretical and experimental physics and allied disciplines, are associated with over twenty academic institutions. The group endorsed the pursuit of further research on the concept of proliferated, small, lightweight, smart interceptors for ballistic missile defense. While some technical problems were identified, the group said it found no technical "show stoppers." The group commended Lawrence Livermore National Laboratory's demonstrated technical accomplishments and expressed confidence that technical obstacles could be overcome.

A Defense Science Board (DSB) Study was conducted in June–September 1989. The DSB is a federal advisory committee established to provide independent advice to the Secretary of Defense. Membership includes top executives of Defense industries and distinguished private consultants. The board found no fundamental flaws in the Brilliant Pebbles approach; they pronounced the idea innovative and capable. The study cited several critical issues that require resolution, but predicted that two years of continued research would resolve those issues. The board recommended continuing pursuit of the Brilliant Pebbles project to maintain the pace of innovation and improvement while maintaining the SDI program until the advantages and disadvantages of a Brilliant Pebbles system architecture are qualified. Such an approach would also serve as an aid to improvement of both designs. Further, the board recommended that an evaluation be conducted to understand fully the impact of Brilliant Pebbles on the Space Surveillance & Tracking System (SSTS) and the Boost Surveillance & Tracking System (BSTS) elements.

A Red Team/Blue Team Study was conducted by experts assigned or under contract to the Strategic Defense Initiative Organization to assess countermeasure issues. Results are classified, but fundamentally the group determined that Brilliant Pebbles would be subject to the same countermeasures as would all spacebased elements. The key recommendation was to build survivability into the design.

An Air Force/SDIO Cost Study was conducted from May to December 1989. The study retained the $8 billion cost of BSTS confirmed by the Defense Acquisition Board in October 1988, but examined the comparative cost of a Space-based Interceptor (SBI) versus a Brilliant Pebble approach; launch costs also varied for the two concepts. The study determined that Brilliant Pebbles, SSTS and associated launch costs would be about $22 billion; the estimated cost for the Phase One system employing Brilliant Pebbles would, therefore, be about $55 billion, as opposed to the $69 billion for Phase One with SBI.

SUMMARY

These series of independent reviews of the Brilliant Pebbles concept point to several important conclusions:

First, the October 1988 DAB system concept remains sound.

Second, system robustness can be increased through proliferation and autonomy, and therefore the survivability, of space-based elements.

Third, a distributed, autonomous space-based architecture is attractive and holds promise for cost savings, though further system refinement is required.

Lastly, while the role of SSTS may change somewhat in a Brilliant Pebbles architecture, it remains an important element of Phase One and should be vigorously pursued.

ISSUES AND OPTIONS IN STRATEGIC DEFENSE

(By J. Browne and G. Canavan, Los Alamos National Laboratory and E. Teller and L. Wood, Lawrence Livermore National Laboratory)

Recent developments in interceptors and sensors have opened new options for strategic defense. Due to the interactions between boost-phase lethality and mid-course discrimination, however, it is important for these technology advances to be viewed in an integrated framework, which this note outlines.

"Brilliant Pebbles" (BPs) offer effective and survivable space-based means for addressing near and long-term missile threats

in the boost phase. The timely development of BPs must be viewed as the cornerstone of the SDI program and pursued accordingly. Mid-course and terminal interceptors have also progressed. Against moderate threats, which would be adequately attrited in the boost phase, mid-course interceptors could provide effective, preferential defense of essential targets. With adequate and survivable sensors, terminal interceptors could provide a final layer of defense of cities and other exceptionally high value targets.

Sensors have developed a number of options. The BPs' integral sensors could provide the warning and assessment needed to allocate BPs in the boost/post-boost phase as well as the homing needed for effective interceptions. Passive and active discrimination with optical, infrared, laser and radar techniques could be useful adjuncts to mid-course or terminal interceptors. Each of these sensors has limits; these include the ability to discriminate anti-simulation and replica decoys, their communication links, and the survivability of ground-based radars. An additional limitation that dominated past ideas was the range from which objects had to be inspected. If mounted on the BPs or on their supporting "life jackets," the sensors could be given a survivable platform from which to view objects at very close range, which would significantly enhance their performance.

More capable and survivable interactive discrimination sensors could evolve on a slightly longer time scale, but sufficient to meet the anticipated decoy threat. Neutral Particle Beams (NPBs) are the only sensors that can actually measure an object's mass, the fundamental quantity that distinguishes between weapons and decoys. If the NPBs were popped up on warning, only a few would be needed against expected threats due to the NPBs' potential ability to interrogate hundreds of objects per second at distances of a thousand kilometers.

The expected missile threat is integral to deployment considerations. The current numbers of Soviet missiles are threatening, but if they deployed relatively few decoys, about 4000 BPs and a lesser number of mid-course interceptors could attrit them sufficiently to meet the goals of the first phase of a strategic defense system. However, the 5-10 decoys/weapon that might elude the passive and active discrimination sensors could drive up the required number, and hence cost, of the ground-based interceptors by as much as a factor of 10. With the addition of interactive discrimination by NPBs, however, the interceptor cost could remain quite acceptable.

START could reduce heavy ICBMs to levels at which defenses were much less sensitive to decoys and discrimination. Against START-constrained missile forces, it would be possible to handle up to 10 credible decoys per weapon by oversizing the boost-phase BP layers by about 50% and intercepting all leakage in the mid-couse and terminal layers. The net result is less than a factor of two increase in interceptor costs. The Soviet Union could respond with continued modernization of its missile forces, either through larger numbers of more sophisticated decoys or through the deployment of fast, compactly-based missiles. More and better decoys would require that NPBs be developed at a pace consistent with this threat. On a longer time scale, the BPs could be supplemented with advanced lasers to maintain effectiveness against the fast, compact missile threat; lasers, operating at the speed of light, are less vulnerable to faster-burning missiles, faster busing, or compact launches.

BPs could be deployed with either mid-course or terminal interceptors in a manner that should be arms control- and crisis-stabilizing against START constrained forces. Those combinations could also be effective in defending the U.S. and its allies against nuclear, chemical, or biological threats from theater or other short-range missiles. They would also protect against unauthorized or accidental launches by the Soviets or others. With enhanced interceptor capability, they would be effective against Third-World country launches against extra-theater targets. BPs could be effective against all missiles except those with ranges less than about 100 km. Very close-in submarine missile launches could be addressed with interceptors such as FLAG-E.

There exists, therefore, a logical progression of defenses against current or future missile threats to the U.S. and its allies. The BPs and GBIs should be developed and deployed to handle the Phase One requirements. The directed energy weapons should be pursued vigorously so that they can be available at the required time to supplement the interceptors as required for discrimination or missile modernization. The timely development of NPBs will either discourage heavily decoyed attacks or provide the necessary mid-course discrimination to allow preferential defense of key assets following the thinning-out of the attack in the boost phase by the BPs. The continued development of advanced lasers will discourage the pursuit of fast, compactly-launched missile threats, or provide the necessary complement to the BPs to handle this threat. Both interceptors and DEWs must be pursued to have a strategic defense strategy that can evolve to meet all presently foreseen threats, thereby maintaining sufficient effectiveness to deter potential adversaries from attack well into the next century.

Mr. WALLOP. I yield 7 minutes to the Senator from Arizona.

The PRESIDENT pro tempore. How much time does the Senator yield? Seven minutes? The Senator from Arizona [Mr. McCAIN] is recognized for 7 minutes.

Mr. McCAIN. Mr. President, let me begin by following up on what my friend from Wyoming has just said. The decisions that shape the program priorities in SDI are not made in a vacuum by some general sitting in the Pentagon. This program has been shaped by a broad-based range of scientific opinion that has governed all the recommendations the Reagan and Bush administrations have made on this program.

There is probably no military program in U.S. history that has been more studied by the scientific community. In contrast, the advocates of this amendment have little comparable data, except for that generated by the professional opponents of SDI and their own staffs.

I do not think this is a time to mince words, Mr. President. If this amendment is agreed to, we will face a crisis over the Strategic Defense Program. The President has stated unequivocally that he will veto this bill if this amendment is agreed to. I do not think he has any choice. This amendment would change SDI from a broad-based, nationally supported program—which will provide us with an opportunity to defend ourselves—to what might end up being little more than a subsidy program for the States of New Mexico and Alabama.

Mr. BINGAMAN. Will the Senator yield for a question?

Mr. McCAIN. I will not yield until my remarks are finished, because I might tell the Senator from New Mexico that I am deeply concerned about this amendment. I am concerned that this amendment could virtually emasculate this Nation's ability to defend itself against the greatest threat to world peace that exist today—the proliferation of atomic, biological and chemical weapons and the means to deliver them.

In May 1990, Saddam Hussein, who is increasingly known as the "butcher of Baghdad," stated:

With the help of Allah, we shall rid that region of American influence. Our missiles cannot reach Washington, but if they could, we would hit there as necessary. However, we can still strike at Washington in other ways and other U.S. targets in the world.

Saddam Hussein of Iraq, as reported in the Lebanese Weekly, Al-Moharer, May 10, 1990.

So we have the opinion, the views. Despite the reservations of my friend, the senior Senator from New Mexico, the preponderance of scientific and military opinion and the opinion of those who have been involved in this issue for many years—such as my friend from Wyoming and the distinguished chairman of the committee—there is only one immediate prospect that will allow us to deploy some kind of limited defensive capability, and that is Brilliant Pebbles.

So what does this amendment do? This amendment earmarks funds which would dismantle many of our key program activities, and disengage us from the only program which could allow us to defend ourselves from the proliferation of missiles that goes on throughout the world.

Mr. President, I wonder what challenges the President of the United States, the Joint Chiefs of Staff and the National Security Council would be facing today if Saddam Hussein had ICBM's on his launching pads somewhere in Iraq, as opposed to IRBM's. As we know, Mr. President, the only basic difference between the two is the size of their rocket boosters and the range they can carry a warload. Iraq's recent missile tests show that it is only a matter of time before Saddam Hussein has such weapons. It is only a matter of time before other nations like Iran, Libya, North Korea, and others acquire intercontinental ballistic missile capability—often with some help from our friends.

So, Mr. President, I find this amendment to be one that is being sent forward at the wrong time and at the wrong place, and which could lead to a veto on the part of the President; an emasculation of a critical program that we need to defend ourselves, and which would further delay the implementation of a program upon which our Nation's survival may ultimately rest.

If we are to have a future, we must plan for that future. If we are to have national security, we must pay for it. We cannot let the entire strategic defense initiative become an arena for special-interest funding, and we cannot afford to let it be so underfunded that it becomes a hollow shell.

Mr. President, no one can deny that the cold war seems to be ending. Every week seems to bring dramatic new changes to the situation in Europe, and reductions in the Warsaw Pact threat. These changes, however, are not yet reflected in Soviet strategic nuclear forces or in the nuclear threat to the United States. Moreover, there are at least 10 countries in the world today that are likely to be nuclear powers by the end of the 1990's, and 25 countries that have, or are acquiring, long-range missles.

We have not come to the end of history, or the end of threats to the United States and its allies. In fact, the U.S.S.R. still possess approximately 30,000 nuclear weapons, and the current trends in its strategic forces show no correlation to the other changes taking place in its relations with the West.

The Soviet Union may be far less of a political threat than in the past, but it so far seems committed to an extraordinary degree of nuclear modernization—if only to retain its last real credential as a superpower.

The U.S.S.R. has built roughly twice as many ICBM's as the United States since 1975. There are now 1,400 Soviet ICBM's deployed at roughly two dozen locations in the Soviet Union.

Last year the Soviet Union produced 140 new ICBM's, the United States produced 12 Peacekeepers. This is reinforcing a Soviet advantage in megatonnage that has exceeded 2 to 1 ever since 1975, and a more than 2 to 1 lead in reentry vehicles.

At least one new warhead variant of the SS-18 Heavy ICBM is still being deployed that is capable of carrying 10 warheads and has a range of 5,940 miles. The Air Force estimates that these improvements could allow the SS-18 force to retain its present hard target kill capability even if it is cut from 308 to 154 deployed missiles under START.

The U.S.S.R has deployed at least 20 rail-carried versions of the fully MIRV'd 10 warhead SS-24 ICBM on at least 6 trains, and there are least 50 more SS-24 missiles deployed in former SS-19 silos. The U.S.S.R has deployed 220 mobile, single warhead, SS-25 missiles. This gives the U.S.S.R more than 240 mobile missiles, with nearly 100 becoming operational in 1989 alone. At current rates, the United States will not have a single mobile ICBM until after 1997.

The Soviet Union has increased its number of SLBM warheads from 750 in 1975 to 3,600 in 1989. It continues to produce two SSBN's per year; the United States is debating the termination of the Trident Program. It also continues to make major improvements in the capability of its SLBM's.

The Soviet Union continues to phase out the older SS-N-6 and SS-N-17 SLBM's on its *Yankee*-class submarines. It is replacing them with Delta III's and Delta IV's that can hit U.S. targets without warning from home waters. At the current rate of improvement, the Soviet SSBN force will be more lethal in the late 1990's even if its size is cut 25 to 50 percent.

The U.S.S.R. has deployed six *Typhoon*-class submarines, each of which is 30 percent larger than the U.S. *Ohio*-class submarine. The submarines are still under construction and carry 20 SS-N-20 missiles per submarine, each of which has a range of 4,500 miles, and 6 to 10 warheads.

The U.S.S.R. is developing two nuclear armed cruise missiles. One is the subsonic SS-N-21, deployed aboard modified Yankee Notch submarines. The other is the supersonic SS-NX-24, which is likely to be deployed on specially reconfigured Yankee submarines.

Last year, the Soviet Union produced over 40 strategic bombers, the United States produced one B-2. The U.S.S.R. has built over twice as many strategic and long range theater bombers as the United States since 1960.

The Bear-H appears to be reaching final deployment levels, and the Blackjack is in active production, although the ultimate number will probably be smaller than the number the U.S.S.R. once planned. The Blackjack is a mach 2 bomber with a range of 7,900 miles.

The Soviets have two nuclear-armed cruise missiles designed for use on these bombers. The subsonic AS-15 ALCM has a range of 3,000 kilometers, and is carried by both planes. The AS-X-19 is currently undergoing testing for deployment on the Bear-H.

These Soviet offensive forces are backed by strategic air defenses that the United States does not attempt to match.

Approximately 20 percent of the 7,000 surface-to-air missiles in Soviet forces are now SA-10's—a missile which can engage several targets simultaneously, and which may have a limited anti-missile capability. The Soviet Union continues to deploy more SA-10's at a steady rate. The United States has no national surface-to-air missile defenses.

The Soviets still have some 2,100 fighter interceptors dedicated to strategic air defense. These are rapidly being equipped with fourth generation look down/shoot down aircraft like the SU-27 and Mig-31, and the U.S.S.R. has deployed its own version of the AWACS—the IL-76 Mainstay.

By 1999, all these aircraft will be fourth generation or even newer types.

The lesson of these developments in Soviet forces, Mr. President, is that the Soviet Union has decided what aspects of military capability it can cut and defer. It has given strategic nuclear weaponry priority at the expense of all other defense spending because this is the one way it can still maintain a preeminent position as a world military power.

All of us are very grateful and, in fact, encouraged enormously by the cuts we have seen in Soviet conventional weapons and the reductions in Soviet military operations. However, we cannot be encouraged by the continued production of a broad inventory of strategic nuclear weapons.

This is why strategic defense is still a powerful lever that will help lead the U.S.S.R. to end the nuclear arms race in the way it seems to be ending the arms race in Europe. It is still a powerful lever in persuading the U.S.S.R. to accept START and follow-on arms agreements. It is still a better alternative than more offensive nuclear weapons. It is still a way of guaranteeing our security against some sudden reversal in Soviet behavior.

Strategic defense is our best way of reacting to what may well be a nuclear armed world. As the Israeli Arrow project demonstrates, strategic defense offers a way of protecting our friends and allies against nuclear threats, and chemical and biological threats as well.

At the same time, strategic defense offers us a way of protecting the United States against the hostile states that may be able to strike us in the future, and where the threat of retaliation may be far less effective than it has been in dealing with the rational and conservative leadership of the Soviet Union.

We may not face such threats today, but no one can deny that we are likely to face them tomorrow. It does not take great vision to imagine what may happen if a leader like Saddam Hussein, who has threatened to "let our fire eat half of Israel" and to "retaliate for days and weeks and years" is able to equip a missile booster capable of launching a satellite with nuclear warheads—the result is an ICBM, and Saddam Hussein already has the primary stages of such a launch vehicle.

It does not take great vision to imagine the conduct of a nuclear armed

Qadhafi, a man who has already threatened the United States with "our special means, the right to actually practice terrorism against the American presence everywhere."

If we are to have a future, we must plan for that future. If we are to have national security, we must pay for it. We cannot let the entire Strategic Defense Initiative become an arena for special interest funding, and we cannot afford to let it be so underfunded that it becomes a hollow shell. Let's give President Bush the money he needs, and let's defeat this amendment so that the President is still able to manage this program in a way that will make it effective.

Mr. President, I ask my colleague for an additional 1 minute.

Mr. WALLOP. I yield 1 more minute to the Senator.

The PRESIDENT pro tempore. The Senator is recognized for 1 more minute.

Mr. McCAIN. Mr. President, we must either vote against this amendment, or ensure Presidental veto on the entire act, see SDI micromanaged to an incredible degree; or emasculate a program on which the American taxpayers have spent an enormous amount of their tax dollars.

To me, Mr. President, the choice is clear. I hope this body will act in accordance not only with good sense, but with the urgency of the world situation as we view it today.

Mr. WALLOP. Mr. President, I yield 4 minutes to the Senator from South Carolina.

The PRESIDENT pro tempore. How much time does the Senator yield?

Mr. WALLOP. Four minutes.

The PRESIDENT pro tempore. The Senator from South Carolina [Mr. THURMOND] is recognized for 4 minutes.

Mr. THURMOND. Mr. President, I rise in opposition to the pending amendment which suggests that we allocate the strategic defense initiative funding among 11 line items.

Mr. President, this amendment will stymie the strategic defense initiative team's ability to accomplish research across a wide range of strategic defense systems concepts and technologies. It is micromanagement, which will focus SDI research toward specific programs rather than allow enough flexibility to pursue the most promising technologies and systems. Which is what the program was designed to do.

The $3.57 billion recommended by the Armed Services Committee for the SDI Program is almost $1 billion less than requested by the President. This cut will, by itself, limit research and seriously jeopardizes the President's ability of choosing an appropriate architecture by the end of his first term.

The amendment proposed by Senator BINGAMAN and Senator SHELBY, combined with the funding reductions in the bill, would cripple the SDI Program. Of particular concern is the $129 million ceiling for the Brilliant Pebbles Program. Are we so afraid to find out if this technology proves feasible that we have to deny it the funds to test it?

Mr. President, only last month the President appointed Dr. Henry Cooper as the new director of the Strategic Defense Initiative Organization. I have known Hank Cooper a long time. He is a take-charge individual, with the technical background, who has a clear vision of where the SDI Program must go.

I ask my colleagues to give him the flexibility he needs to take advantage of rapidly evolving technology and architectural concepts. More importantly, I ask that this body give him the flexibility he needs toward meeting the SDI objectives of a safer, more stable world. I urge my colleagues to reject the Bingaman-Shelby amendment.

Mr. President, I hold in my hand a letter written August 3, 1990, to Senator WARNER by President Bush. I want to read one paragraph from it.

He says:

* * * in marking up the Defense Authorization Bill, the Senate Armed Services Committee has cut almost a billion dollars from my SDI request. The House seems determined to cut more. But a vote to cut SDI below the Senate Armed Services Committee mark will force us to delay critical tests and cancel contracts, and therefore is essentially a vote against strategic defense for America. Some in the Senate are also seeking to manage the SDI program themselves by cutting my request for the most promising SDI technologies. In many ways this is more serious than a funding cut. As Congress imposes cuts in the Defense Budget, at the very least, I need flexibility to manage our programs. Moreover, it makes little sense to force us to forego realistic tests of promising SDI technologies.

Mr. President, that is a letter by the President of the United States. It is the business of the Congress to legislate. It is not business of the Congress to micromanage. It is not the business of the Congress to manage these programs. Our business is to make the law. Then we have to leave it to the Chief Executive who is elected by all the people of this Nation to decide how to manage these problems and how to give the flexibility needed. That is what we ask you to do.

It would be a great mistake in my opinion to adopt this amendment, and I hope the Senate will defeat it.

Mr. WALLOP. Mr. President, how much time does the Senator from California seek?

Mr. WILSON. Mr. President, I would think something in the neighborhood of 10 to 12 minutes.

Mr. WALLOP. I yield 12 minutes to the Senator from California.

The PRESIDENT pro tempore. The Senator from California [Mr. WILSON] is recognized for 12 minutes.

Mr. WILSON. Mr. President, I thank the Chair.

Mr. President, I rise in strenuous opposition to this amendment which would truncate America's 7-year-old effort to deploy a practical strategic defense system.

The proposal that is offered by the Senators from New Mexico and Alabama reflect several unwise choices in priority. It chooses for example a limited ground-based system for stopping nuclear missiles just as they enter American airspace over the promise of a space-based system designed to intercept these missiles even before they pierce the ozone. It chooses the worn-out and inaccurate assumptions of the Antiballistic Missile Treaty over an effort to defend American territory and to deter an offensive nuclear launch from any source.

It chooses the study of long-term technologies and of uncertain feasibility over proven technologies such as Brilliant Pebbles that rely on proven kinetic principles. It chooses to invest American sciencific resources in stopping only an accidental nuclear strike but not a deliberate first strike.

Can we afford to make these choices, Mr. President? Does the changing international security environment permit us to do so?

Perhaps the most inevitable and the most revealing answer to these inquiries was given by no less an expert than Marshal Sergei Akhromeyev, the former chief of the Soviet general staff and now the personal military adviser to Mikhail Gorbachev. In testifying before the House Armed Services Committee barely a year ago, Marshal Akhromeyev stated "The position of the Soviet Union is that ground-based mobile ICBM's have a role to play.* * *. That is why they can be legitimately deployed."

Indeed the architects of perestroika have enthusiastically accorded this honor to and legitimate role to Soviet ICBM forces. Based on total current deployment figures, Gorbachev and Akhromeyev have assigned roles to more than 200 SS-25 road mobile warheads, over 270 SS-24 rail mobile warheads. Both of these systems could easily accommodate more than 1,100 warheads combined through their MIRV'ing capability.

The United States currently has zero road mobile warheads, zero rail mobile warheads. Secretary Cheney, Mr. President, anticipates that at a minimum a credible space-based strategic defensive system could destroy between 20 and 40 percent of the total number of weapons eliminated in space. The point is that the strategic defense initiative as configured today will have interceptor systems designed to halt a nuclear strike not totally, but in substantial part in each of its phases, in the boost phase, in the mid-

course and in the terminal phase—early, midcourse, and terminal.

No defensive system offers absolute protection, and no one claims that it does. But the existence of a layered multiphase deterrent so decreases the ability of a first strike, a nuclear strike, because of the certainty that it produces that enough of the attacking warheads will be destroyed in every phase that it will assure that a first strike cannot succeed.

Mr. President, rational war planners who are assured that a first strike cannot succeed in crippling and virtually decapitating the U.S. retaliatory capability will be deterred from launching an unsuccessful first strike.

Indeed, only the prospect of such a U.S. defensive capability gives any real credibility to our present or prospective offensive deterrent.

But by stark and terrifying contrast this amendment creates the scenario of warheads cruising into the most dangerous and difficult interception phase, indeed with every warhead because there has been no layered defense to thin the attack. They will enter the most difficult interception phase, the terminal phase, that nearest to and indeed dangerously close to targets on American soil.

Will the Soviets launch an intercontinental nuclear strike in the near future? We hope not. We think not.

Can we morally and strategically permit only one ground-based system to deter any future nuclear strike as long as the possibility of a strike exists? Absolutely not. We cannot be so comforted, so euphoric by what are admittedly dramatic changes in Eastern Europe and behind the Iron Curtain itself that we literally let down our guard or fail more accurately to erect it.

What about commitments under the ABM Treaty? As our additional Republican views to the Senate Armed Services Committee in the fiscal year 1991 budget report states so clearly, the strategic force assumptions under which we concluded the ABM Treaty simply have not come to pass.

Our ABM negotiators assumed that the Soviets would undertake deep offensive missile reductions commensurate with our own.

Mr. President, that simply did not happen. Our ABM negotiators also assumed that both sides would make their land-based nuclear systems more survivable, but that happened only on the Soviet side. There was unilateral compliance with that expectation.

Our ABM negotiators also assumed that strategic defensive technologies would be too expensive and too ineffective. Well, that could happen in the United States, if we adopt the Bingaman-Shelby amendment.

The past 7 years and $20 billion that we have invested in SDI have yielded significant financial and technological dividends. We do not claim to have the ability to erect an impenetrable shield over our Nation, or over any portion of the globe. But what we do claim is that the kind of progress and cost savings that have been achieved through the systems that have been developed by the SDIO, such as Brilliant Pebbles, do allow the President to make an entirely informed decision on initial SDI deployments just 3 years from now.

Mr. President, if we can reduce the risk of future nuclear terror, if we can end the exclusive reliance that we presently have upon a very precarious balance of nuclear terror, then, Mr. President, why should anyone hesitate to make what is, in fact, a rather modest investment, given the enormous benefits to be achieved by that investment? Why should we instead deliberately undertake to undermine that kind of deterrent capability by the Bingaman-Shelby decision?

Mr. President, we should not. We have, in the additional views that were added to the 1991 budget report, the kind of professional decisionmaking capability that has advised the Defense Science Board, the Jason group, having studied this at great length, has indicated that Brilliant Pebbles, which seems to be the chief target of the Bingaman-Shelby amendment, "is a program of research on light-weight proliferated autonomous kinetic kill interceptors using near term and maturing technology that deserves continuing support. It will be essential to avoid either excessive conservatism or excess optimism in choosing which technologies to support. Near-term but not off-the-shelf technologies may be mission-critical."

That is what we have, exactly, in this program. Interestingly enough, it is the official view of both Los Alamos National Laboratory and the Lawrence Livermore National Laboratory in a paper entitled "Issues and Options in Strategic Defense," that makes clear why the Brilliant Pebbles program offers "effective and survivable space-based means for addressing near- and long-term missile threats in the boost phase."

Mr. President, I happen to be a fan of the free electron laser technology that I know is one of the passions of my friend from New Mexico. But if the purpose of this amendment is to allow funds to be spent for the purpose or for some other technology, then I say that we should not do so by the device of really crippling the kind of program that will allow, and is designed to allow the President of the United States to make a deployment decision in his second term, in 1993.

It is a fact that the real architect of perestroika is the former President of the United States, who made it clear that SDI was not a bargaining chip. Indeed, nothing can be a bargaining chip; it can have no value with which to bargain unless it is indeed viewed by the other side as having substantive significance. That is precisely how the Soviet Union has viewed SDI.

When the President called upon the research community in 1983 to engage in providing a defensive technology that would give us bargaining power, he changed the stakes entirely; he changed the negotiation; he hastened the day when in fact he would be able to state that the Berlin Wall should come crumbling down—and I remind my friends that less than a year ago, it did—not simply because of his skills as a great communicator but because he had given this Nation, in that charge in 1983, the kind of credibility, which our rather slender offensive deterrent will never otherwise achieve by itself.

We are so afflicted and constrained with respect to that offensive retaliatory capability, that it candidly does not have great credibility only by itself. Only when it is coupled with a capability of a defensive system of the kind SDI put before us do we enjoy that capability

Mr. President, I ask the Senator to yield 30 more seconds.

Mr. WALLOP. I yield 30 more seconds.

The PRESIDING OFFICER (Mr. ROBB). The Senator is recognized for 30 more seconds.

Mr WILSON. I ask unanimous consent to have printed in the RECORD the paper entitled "Issues and Options in Strategic Defense," which represents the official views of the Los Alamos National Laboratory and the Lawrence Livermore National Laboratory. It is an endorsement of the Brilliant Pebbles program, an endorsement of the existing program of SDIO. It is a warning to be heeded, that we should not vary from that program.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ISSUES AND OPTIONS IN STRATEGIC DEFENSE

(By J. Browne and G. Canavan, Los Alamos National Laboratory and E. Teller and L. Wood, Lawrence Livermore National Laboratory)

Recent developments in interceptors and sensors have opened new options for strategic defense. Due to the interactions between boost-phase lethality and mid-course discrimination, however, it is important for these technology advances to be viewed in an integrated framework, which this note outlines.

"Brilliant Pebbles" (BPs) offer effective and survivable space-based means for addressing near and long-term missile threats in the boost phase. The timely development of BPs must be viewed as the cornerstone of the SDI program and pursued accordingly. Mid-course and terminal interceptors have also progressed. Against moderate threats, which would be adequately attrited in the boost phase, mid-course interceptors could provide effective, preferential defense of essential targets. With adequate and surviv-

able sensors, terminal interceptors could provide a final layer of defense of cities and other exceptionally high value targets.

Sensors have developed a number of options. The BPs' integral sensors could provide the warning and assessment needed to allocate BPs in the boost/post-boost phase as well as the homing needed for effective interceptions. Passive and active discrimination with optical, infrared, laser and radar techniques could be useful adjuncts to mid-course or terminal interceptors. Each of these sensors has limits; these include the ability to discriminate anti-simulation and replica decoys, their communication links, and the survivability of ground-based radars. An additional limitation that dominated past ideas was the range from which objects had to be inspected. If mounted on the BPs or on their supporting "life jackets," the sensors could be given a survivable platform from which to view objects at very close range, which would significantly enhance their performance.

More capable and survivable interactive discrimination sensors could evolve on a slightly longer time scale, but sufficient to meet the anticipated decoy threat. Neutral Particle Beams (NPBs) are the only sensors that can actually measure an object's mass, the fundamental quantity that distinguishes between weapons and decoys. If the NPBs were popped up on warning, only a few would be needed against expected threats due to the NPBs' potential ability to interrogate hundreds of objects per second at distances of a thousand kilometers.

The expected missile threat is integral to deployment considerations. The current numbers of Soviet missiles are threatening, but if they deployed relatively few decoys, about 4000 BPs and a lesser number of mid-course interceptors could attrit them sufficiently to meet the goals of the first phase of a strategic defense system. However, the 5–10 decoys/weapon that might elude the passive and active discrimination sensors could drive up the required number, and hence cost, of the ground-based interceptors by as much as a factor of 10. With the addition of interactive discrimination by NPBs, however, the interceptor cost could remain quite acceptable.

START could reduce heavy ICBMs to levels at which defenses were must less sensitive to decoys and discrimination. Against START-constrained missile forces, it would be possible to handle up to 10 credible decoys per weapon by oversizing the boost-phase BP layers by about 50% and intercepting all leakage in the mid-course and terminal layers. The net result is less than a factor of two increase in interceptor costs. The Soviet Union could respond with continued modernization of its missile forces, either through larger numbers of more sophisticated decoys or through the deployment of fast, compactly-based missiles. More and better decoys would require that NPBs be developed at a pace consistent with this threat. On a longer time scale, the BPs could be supplemented with advanced lasers to maintain effectiveness against the fast, compact missile threat; lasers, operating at the speed of light, are less vulnerable to faster-burning missiles, faster busing, or compact launches.

BPs could be deployed with either mid-course or terminal interceptors in a manner that should be arms control- and crisis-stabilizing against START constrained forces. Those combinations could also be effective in defending the U.S. and its allies against nuclear, chemical, or biological threats from theater or other short-range missiles. They would also protect against unauthorized or accidental launches by the Soviets or others. With enhanced interceptor capability, they would be effective against Third-World country launches against extra-theater targets. BPs could be effective against all missiles except those with ranges less than about 100 km. Very close-in submarine missile launches could be addressed with interceptors such as FLAG-E.

There exists, therefore, a logical progression of defenses against current or future missile threats to the U.S. and its allies. The BPs and GBIs should be developed and deployed to handle the Phase One requirements. The directed energy weapons should be pursued vigorously so that they can be available at the required time to supplement the interceptors as required for discrimination or missile modernization. The timely development of NPBs will either discourage heavily decoyed attacks or provide the necessary mid-course discrimination to allow preferential defense of key assets following the thinning-out of the attack in the boost phase by the BPs. The continued development of advanced lasers will discourage the pursuit of fast, compactly-launched missile threats, or provide the necessary complement to the BPs to handle this threat. Both interceptors and DEWs must be pursued to have a strategic defense strategy that can evolve to meet all presently foreseen threats, thereby maintaining sufficient effectiveness to deter potential adversaries from attack well into the next century.

The PRESIDING OFFICER. Who yields time,

Mr. WALLOP. I yield 3 minutes to the Senator from Washington [Mr. GORTON].

Mr. GORTON. Mr. President, the amendment proposed by Senators BINGAMAN and SHELBY is a not-too-subtle congressional attempt to wrestle control of the SDI Program from the President. And in so doing, to keep this rapidly maturing program in the laboratory, never to see the light of day-or the dark of space.

The intent of the Bingaman-Shelby amendment is clear: To foreclose an informed deployment decision of a first phase defensive system by the President in 1993. What the amendment says is: "We don't want to learn whether near-term deployment is feasible." But Mr. President, how can we respond to the critics of SDI who state that the technology does not exist to defend against ballistic missiles when these same critics block attempts to demonstrate the feasibility of the most mature technologies? They can't have it both ways.

Even more pernicious is the amendments' division of the SDI program into 11 arbitrary line-items, each with its own funding cap. There is no rationale for the grouping of some 60 SDI projects into these 11 categories. It is clear, however, that this is an attempt to micromanage the SDIO Program. While there is precedent for congressional management of particular weapons systems, SDI is not a single program but an amalgam of research efforts.

The SDI organization was created in 1984 to provide overarching management for what is perhaps the Nation's most diverse technology program. The concept behind SDI was to explore a number of technologies necessary for detecting, tracking, and intercepting ballistic missiles and their warheads in various stages of flight. SDIO was given the flexibility to shift funds as emerging technologies and architectural concepts were developed, and to concentrate on those that offered the greatest promise for providing an effective defense.

If Congress is allowed to redirect various elements within the program, the end result will be an SDI Program with 535 program managers, no clear direction, and no clear deployment objective.

If this is going to be the case, we should determine whether we want defenses or not. If we decide we do not need missile defenses, then we are spending too much on SDI. On the other hand, if we desire protection against ballistic missiles, then we need a well-funded and unfettered SDI Program that will permit the President to make an informed deployment decision as soon as possible.

The SDI Program is now conducting research on both near- and long-term defensive technologies. The near-term architecture consists of ground-and space-based interceptors and sensors, including the Brilliant Pebbles concept. The administration does not advertise this first phase system as a leak-proof defense. Rather, it is designed to bolster deterrence of a Soviet attack while providing a response to the global proliferation of ballistic missiles. It is important to note that phase I is a baseline concept, used to move the research effort forward. The President could decide to alter the architecture or could even decide that it is simply unworkable. But we will never know if Bingaman-Shelby passes.

While one can argue against Bingaman-Shelby on grounds that it is micromanagement of the SDI Program, it is clear that underlying the Bingaman-Shelby amendment is a fundamental predisposition against missile defenses in principle. By reaffirming their support for the ABM Treaty, the authors of the amendment make it plain that they are opposed to a truly effective missile defense system that would include space-based elements. It is inconsistent, I believe, for these same opponents of space-based defenses, to argue for continued funding of the follow-on technologies such as lasers and particle beams, which would also be deployed in space, and therefore also be in violation of the ABM Treaty.

At some point, we need to address the fundamental question of the im-

portance of protecting the American people. With tens of thousands of nuclear weapons and ballistic missiles in the world, there can be no reasonable guarantee that these weapons will not be employed, either through accidental or unauthorized use or with the intent of conquest.

The strategic environment of the 1990's is different from that of the seventies, when the ABM Treaty was signed. Today, both the United States and the Soviet Union are faced with ballistic missile threats from other, perhaps less rational, countries. The Senate has noted with concern, through passage of S. 195, that by the year 2000 an additional 15 nations could have the capability to launch ballistic missiles. Many of these nations will also have a chemical and biological weapons capability as well. It makes no sense for the Senate to acknowledge this danger while doing nothing to protect our citizens and territory against this emerging threat.

Given the warming of United States-Soviet relations and the general move toward a more defensive posture by the Soviet Union, the time may be ripe for recasting the deterrent relationship away from hair-trigger offensive retaliation to a regime where both countries feel secure behind missile defense deployments. Ambassador Paul Nitze has noted that the ABM Treaty was intended to be adaptable to new circumstances, not to lock the United States and Soviet Union into a strategic relationship that might be less stable and less desirable than other possibilities that might emerge in the future.

I am confident that the Soviet Union can be persuaded to join with us in a negotiated transition to defenses. Recent statements at the Washington summit in May and June indicate that the Soviet Union is at least willing to discuss ways of implementing such a transition, Bingaman-Shelby would be a serious setback for our position and would make it increasingly difficult for our negotiators in the defense and space talks to advance the U.S. position.

For those skittish about missile defense deployment, it should be made clear that a vote against Bingaman-Shelby is not a vote for missile defense deployment. It simply allows the President to pursue the research program necessary to determine whether it is possible to eliminate the threat posed by ballistic missiles. After over 6 years and $20 billion of research and development, we owe it to ourselves to find out whether missile defenses are feasible in the near term.

Mr. President, some 6 years and $20 billion ago, the United States started down the road toward determining whether or not it could deploy effective defenses against nuclear missile attack, from whatever source they came. We started down that road in order to get out from under the mad concept of mutual deterrence through mutual fear, with a view toward the proposition that it was both effective and moral to attempt to provide a defense for the people of the United States against such an attack.

During the course of that 6 years and the spending of that $20 billion, much promising research has been conducted, much knowledge, which, incidentally, may be used for other purposes, has been gained, and many dead-ends have been explored and abandoned.

Many of the critics of SDI have criticized this multiphased approach on the grounds that it lacked focus, and that we were gaining nothing from it.

Now many of those same critics are backing this particular Bingaman-Shelby proposal, which will intensify that lack of focus. One of the most promising programs, the single most promising avenue toward a first phase of nuclear defense, is the so-called Brilliant Pebbles concept which, if we pursue it, can, within 3 years, reach the point at which the United States could make an intelligent determination as to whether or not to deploy.

If Bingaman-Shelby is agreed to, that ability will be frustrated. We will continue down a road toward many dead ends except that this time those dead ends will be required by the Congress of the United States.

It seems to me that we have a highly questionable justification for spending $3.5 billion on unfocused research when we know perfectly well that we can focus it more narrowly and reach a decision on deployment by 1993.

To follow this course of action is to raise the question as to whether or not we are spending our money wisely and whether or not any research will ever lead us to any kind of final determination.

The amendment proposed by Senators BINGAMAN and SHELBY is a not too subtle congressional attempt to wrestle control of the SDI Program from the President and in so doing keep this rapidly maturing program in the laboratory never to see the light of day.

The PRESIDING OFFICER. The Senator's time has expired.

Who yields time?

Mr. WALLOP. Mr. President, may I ask how much time I have?

The PRESIDING OFFICER. The Senator controls 27 minutes and 44 seconds.

Mr. WALLOP. I yield 11 minutes to the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I commend my distinguished colleagues, Senator BINGAMAN and Senator SHELBY, for their work in this area, and it is with reluctance that I disagree with the import of their amendment because in my judgment we should be allocating more resources to SDI for the flexibility with our efforts along that line.

It is my judgment, the potential for SDI for effective defense is enormous. There have been times when our leading scientists said we could not have intercontinental ballistic missiles. Others have said we had such an enormous lead on the Soviets that they could never catch up, and there is that famous statement by the head of the Patents Department that he was resigning because nothing more could be discovered. But defense against nuclear weapons is a matter of enormous importance.

The proposal which has been advanced by Senator BINGAMAN and Senator SHELBY has within its framework the strict interpretation of the ABM Treaty and I think that is a fundamental flaw. I have had occasion to study in some depth the ABM Treaty and it is my legal judgment that the broad interpretation rather than the narrow interpretation is correct.

This is an involved subject and regrettably we have limited time here.

The subject matter of the ABM Treaty is a very complicated one and there is limited time here this morning and I know my colleagues are anxious to conclude and there are planes to be caught so I will be very brief and try to condense my remarks on this subject.

The negotiating record is plain that the United States and the Soviet Union on the ABM Treaty had intended the broad interpretation. It is true that in the ratification record there were a limited number of comments made in representations to the Senate looking toward the narrow interpretation.

We have the anomalous situation that the treaty really is what the parties negotiate, the United States executive branch on one hand negotiating with the Soviet Union, and they concluded a treaty with the broad interpretation. Then you have the subsequent practice under constitutional law of the United States where the treaty has to be ratified by the Senate and it may be that there is a different understanding between the executive branch and the Senate on the narrow interpretation. Frankly I do not think so. But there is grounds for that kind of a contention.

So, Mr. President, you have the anomalous situation where you have the negotiations between the United States executive and Soviet Union on the broad interpretation and perhaps a ratification process on the narrow interpretation which puts the United States at a disadvantage.

But I believe, taking the record as a whole, the negotiating record, the ratification record and the subsequent practices of the parties, that a fair interpretation is the broad interpreta-

tion. So I must disagree forcefully with Senator BINGAMAN and Senator SHELBY when they make reference in their "Dear Colleague" letter of July 30, 1990, to the ABM Treaty strictly interpreted.

I point out, Mr. President, that in the letter from President Bush to Senator WARNER dated August 3—and in the event these are not in the RECORD I ask unanimous consent that these letters be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SPECTER. President Bush makes his reference that his approach to the SDI development is consistent with the ABM Treaty.

Mr. President, if we take the narrow interpretation, what is happening is that it is costing us a great deal more money and we are proceeding at a much slower pace. It is simply unrealistic and foolish for the United States to be bound by a more restrictive interpretation than is the Soviet Union. And that is a consequence which has been foisted on the United States on what is essentially a political decision.

When we have debated this issue on this floor in the past and the Senate has voted for the strict interpretation, I think fairly stated it is because the proponents of the strict interpretation think that it will better promote arms control, that it has not been based on the legal merits of the case, and that when we had hearings in 1987 before the Judiciary Committee and Foreign Relations Committee and had these extensive debates on the law a fair interpretation is that the broad interpretation was the correct one.

Mr. President, the SDI program was the greatest leverage for bringing the Soviets to the bargaining table as those talks proceeded in Geneva in the era around 1987, and that brought the INF Treaty and the real progress for START.

It is my view we ought to have the greatest flexibility possible for the executive branch for pursuing SDI.

Mr. President, when you talk about 1989 deployment, that does not mean we will deploy in 1993. And that does not mean that we will abrogate the ABM Treaty. But it sets a target in that direction which will have the most expeditious activities by the SDI program to try to bring it to fruition at an earliest possible date with that target being desirable in order to move the program along.

But we may well choose not to deploy in 1993. We are talking about the capability to take that action if we decide at that time that it is in our interest to do so.

Mr. President, the strategic defense initiative has become even more important in 1990 than it was in 1983 or in 1987 because now we see the proliferation of missiles around the world, we see the problems which are engulfing us with the attack by Iraq on Kuwait, and we have a greater need than ever to develop this important technology.

I compliment the President and the Secretary of Defense in working with the Israelis on strategic defense initiative which has the impact of accelerating our technology and providing greater efforts and a real likelihood of success to counterbalance the proliferation of missiles as for example now controlled by the Iraqis.

Mr. President, I take this opportunity to call to the attention of my colleagues the importance of proceeding with research and development of the strategic defense initiative [SDI]. Our scientists have made great progress during the past 7 years since the concept for SDI was first announced in 1983.

We are now at a point in history where it is incumbent upon our Government to make a decision on how best to meet the strategic challenges that face us in a rapidly changing and uncertain global environment. I believe that a first phase development of an SDI system offers us the means to make the world a more stable place and fulfills a fundamental component of our Government's primary obligation to protect the people.

I fully support the administration's request for $4.6 billion for SDI in fiscal year 1991. President Bush and Secretary Cheney have made SDI a priority in our national security strategy and have argued strongly in favor of a robust SDI Program. I believe that it is essential that Congress grant this request so that we can address the strategic challenges ahead from a position of strength and security. Because of the advent of Brilliant Pebbles and other nonnuclear defensive SDI technologies, we now have the ability to develop a low cost, technologically feasible, and highly effective defense against ballistic missiles.

There are a multitude of benefits accorded during the first phase of development of a strategic defense system [SDS]. Some of the major implications include: The enhancement of our strategic deterrent vis-a-vis the Soviet Union; provision of an insurance policy against unauthorized or accidental launches of ballistic missiles; protection against Third World or rogue terrorist threats; an inducement for and stability factor in arms control; and a catalyst for keeping America economically competitive and on the threshold of innovative spinoff technologies.

Several independent review boards, including the Defense Science Board, have concluded that a first-phase development of a SDI architecture is now technically practical. At first, many scoffed at the idea that we could develop strategic defenses in this decade, saying that is was technologically impossible. I am reminded of Charles H. Duell, Director of the U.S. Patent Office, who resigned in 1899 because he thought that "everything that can be invented has been invented." SDI has become the product and success story of American innovation. The same American ingenuity and resourcefulness that landed a man on the Moon, can now provide America with the capability to defend ourselves from nuclear missiles.

The basic elements of this first phase of SDI consists of: A space-based interceptor; several surveillance and tracking systems including boost-phase [BSTS], space-based [SSTS], and ground-based [GSTS]; and a battle management/command, control and communications [Bm.C3] system. Already, each element is undergoing demonstration and validation through the Defense Department acquisition process.

The cornerstone of the first phase of SDI and the most promising of the space-based technologies is called brilliant pebbles. Basically, this notion consists of constellations of about 3,000 electronically advanced, highly maneuverable satellites that could track and collide with launched missiles. We have had the ability to track and detect missiles for over 30 years and this technology utilizes these capabilities. General Monahan, Director of the Defense Department's Strategic Defense Initiative Organization [SDIO] already has announced that "the technology is at hand" for this brilliant pebbles space-based protection system.

The concept for brilliant pebbles is relatively simple. These interceptors would be about 1 meter long and weigh about 100 pounds when fully loaded with fuel. The Pebbles would be deployed in groups by expendable launch vehicles and dispersed about 250 nautical miles high in orbits around the globe. The pebbles would have the capability to detect, track, and then collide into ballistic missiles, destroying them by nonnuclear means by sheer impact.

Reports indicate that the Ground-based Interceptor Program [GBI] and the High-Endoatmospheric Defense Program [HEDI] also are promising and have proven capable in experiments and demonstration tests. The first phase of SDI is clearly technologically feasible and most importantly can be utilized in the near term to protect the American people.

President Bush recently commented during his visit to the Lawrence Livermore Laboratories that "in the 1990's, strategic defense makes much more sense than ever before." SDI is necessary for reducing the vulnerability of offensive nuclear weapons and strate-

gic assets and keeping us safe in volatile times.

The unfortunate reality is that the United States is totally undefended against a nuclear attack. Most Americans are unaware that we do not even have the capability of knocking down one single missile, despite spending approximately $300 billion a year for our defenses during the last decade. At the very least, SDI will act as a deterrent and dissuade the Soviets from attempting a first strike on our land-based ICBM's. Even if the system is only 50 percent efficient in knocking down missiles, it would still enormously complicate Soviet objectives by improving the survivability of our retaliatory forces.

In a world of increasing uncertainty, we can no longer rely on the obsolete notion of mutually assured destruction, also known by its appropriate acronym of MAD. In contrast to the Soviet Union and despite allowances under the ABM Treaty, the United States has chosen not to deploy a limited antiballistic missile system or create extensive civil defenses. We have literally gambled under the zero sum doctrine of MAD. But can we still afford the risks?

I believe that is in the interests of both the United States and the Soviet Union to abandon MAD and work toward building a new relationship of mutually assured survival. To his credit, Secretary Gorbachev and his policies of glasnost have done a great deal to help lessen the tensions around the world, but despite these changes, the future is still too unpredictable.

For instance, what if events in the Soviet Union changed overnight and others seized power? Or, what would happen if nuclear weaponry fell into the hands of new rulers in a newly created Islamic Federation of Turkestan? Speaking to a National Defense University symposium last fall, Vice President QUAYLE addressed these possibilities: A frightening question is emerging in this nuclear era: Who controls nuclear weapons during a period of intense civil strife, and who has the authority to release them in a time of great instability, or a prolonged internal crisis?

Serious questions were raised about Soviet nuclear security during the recent war between Moslem Azerbaijanis and Christian Armenians. The Pentagon revealed that a large nuclear warhead stockpile was stored south of the city of Baku in Azerbaijan.

Former President Carter's Deputy National Security Adviser, David Aaron, noted that on the question of nuclear security, the Soviets "are just as screwed up on this as anything else—their command and control is not good, and we know that alcoholism is rampant."

No matter what happens in Eastern Europe or the Soviet Union, America should have the capability for defending itself from ballistic missile attacks. The risks are simply too great to leave our vital security interests vulnerable to a myriad of potentially irrational and dangerous adversaries. Because of the proliferation of missiles and the rapidly changing strategic challenges we now face, it will be in the interests of both the United States and the Soviet Union to embark upon a relationship of mutually assured survival, rather than mutually assured destruction.

The development of phase 1 of the strategic defense architecture also will serve to prevent a hypothetical Soviet break-out in SDI technologies. According to some estimates, the Soviets have spent over $150 billion, or about 10 times that of the United States, to develop SDI. The Soviets have been successful in many areas of research, having tested antisatellite systems and devoting significant resources to laser and particle beam research. Moreover, the Soviets still maintain some 10,000 strategic nuclear warheads and by the mid-1990's, they could be in a position to deploy some 15,000 warheads. While Soviet conventional force capabilities have certainly diminished due to recent events in Eastern Europe, their long-range attack capabilities have not declined and, in fact, have been constantly upgraded with new generations of delivery systems.

Besides acting as a safer and more reliable deterrent, the technologies for a SDI phase 1 architecture can operate as an insurance policy against accidental launch by either the Soviets or even our own nuclear arsenals. With a minimum multilayer protection system, we can prevent the unauthorized or accidental launch of a boatload of submarine-launched ballistic missiles, a scenario made vividly in Tom Clancy's novel "The Hunt For Red October."

Although accidents are always a possibility; that is, Chernobyl; perhaps the most likely utility for SDI will be its deployment to protect against attack or blackmail from a rogue country like Libya. According to CIA Director William Webster, 15 nations other than the United States and the U.S.S.R. are now acquiring ballistic missiles. In the Iran-Iraq war alone, hundreds of missiles were fired in the war between the cities. The reality is that despotic nations already have used ballistic missiles against each other. What is to stop them from using nuclear and chemical warheads in a future conflict? With a deployed Brilliant Pebbles space-based element of SDI alone, the United States will have the ability to protect our territory and our allies from the ominous and growing threat of Third World and rogue threats.

We can learn much about missile defense from the joint United States-Israeli Arrow anti-tactical ballistic missile project. The follow-on program recently approved by Secretary Cheney specifically addresses the Third World threat of short and intermediate range missiles. Full funding of this project can lead to a stability in the Middle East where a fatal miscalculation or incident can lead to an all-out conflict. The ominous spread of missiles in the Middle East makes Arrow an imperative. In conjunction with our SDI effort, I urge that Congress proceed with the full funding and development of the joint United States-Israeli Arrow Program.

Perhaps the least discussed implication of SDI is that it will lessen the risk for the United States in entering into arms reduction agreements. Many experts believe that President Reagan's decision to pursue the SDI program brought the Soviets to the bargaining table. In any event, SDI and particularly, Brilliant Pebbles will provide insurance against cheating on arms control treaties.

The safeguarding of arms control treaties is an issue of major importance. Senate ratification of the INF Treaty concluded an historic step in arms control and SDI will allow us to continue to facilitate the negotiation of future strategic arms reductions. I have actively participated in efforts to reduce weaponry with visits to arms control meetings in Geneva in 1982, 1983 and 1987. I also have participated extensively in the debate on the ABM Treaty and I have pressed for the broad interpretation of the ABM Treaty, which I have concluded to be in the best interests of the United States.

With specific regard to the ABM Treaty, I believe that it is in both the Soviet and American interests to resort to a defensive posture rather than an offensive strategy. The economic costs and the proliferation of missiles by Third World nations make it imperative to revise strategic thinking. It should be noted that the Soviets already have moved toward delinking SDI and the strategic arms reduction talks [START].

The costs of producing and deploying nuclear offensive forces, such as the Soviet SS-25, far exceed the costs of deploying additional interceptors. Cheating would be too costly, both in economic and political terms. The interceptors can be independent or jointly controlled with the end results being that the United States and the Soviet Union will have greater strategic stability and the incentives for offensive nuclear arms reduction will be enhanced.

Another important argument for SDI is the economic implications derived from its research and development. In the last decade, America has faced growing competition from

Europe and the Far East in the area of high technologies and industrialization. No doubt, the competition for innovation and world markets will increase with the consolidation of the European Economic Community in 1992, unification of Germany and the economic entrepreneurship from the Japanese. Like the space program in the 1960's, SDI will keep America on the threshold of scientific developments and help contribute to the restoration of U.S. supremacy in space. SDI already has led to significant spinoffs for the civil economy worth hundreds of millions of dollars in manufacturing applications, particularly in the medical field.

A question that inevitably arises from SDI's critics is whether we can afford SDI, especially in the era of a possible peace dividend. The real question is, can we afford not to develop cost-effective strategic defenses?

The reality is that SDI is one of the most cost-effective defense programs that this country has instituted. According to studies conducted by Dr. Robert Jastrow of the George C. Marshall Institute and Gen. Dan Graham, USA retired, former Director of the Defense Intelligence Agency, a nonnuclear, multilayered defense of our Nation can be completed within 7 to 8 years at a cost of only 5 percent of our annual military budget. Currently, the SDIO budget of $3.8 billion amounts to only 0.33 percent of the Federal budget.

In terms of military offsets, we can acquire formidable strategic defenses for less money than the new proposed bomber force of B-2's or the Midgetman missile. The GAO estimates the cost of a Midgetman program at $60 billion at the low end and $100 billion at the high end alone. If we make a decision to develop and incrementally deploy SDI, we probably will not need to procure offensive weaponry such as the Midgetman. The costs we will save by reducing our dependencies of repetitive offensive systems will far exceed the costs of developing and eventually deploying SDI.

Also, the biggest outlay at DOD is in terms of our overseas basing and personnel. With significant troop reductions expected from that portion of the defense budget, there should be adequate moneys available for a robust SDI development. Ironically, SDI may turn out to be the most fiscally responsible defense program we pursue because it allows us to cut from so many other areas without creating vulnerabilities in our strategic posture.

According to Ambassador Edward Rowney, the former Special Adviser to the President and Secretary of State for arms controls matters, we could buy a system that includes the entire first phase of SDI deployment for $55 billion. The acquisition cost for Brilliant Pebbles he projects at about $12 billion. The latter cost may even decrease as our capabilities in microcircuit technologies continue to advance.

The stated goal of the strategic defense initiative is to conduct research to permit the President and the Congress to make an informed decision about deployment in the early 1990's. The ultimate decision on deployment and the future of the ABM Treaty will depend on future relations between the U.S. and U.S.S.R. including arms control agreements. We are entering a new era in strategic relations when it is incumbent that we prepare ourselves for the challenges of the next century. We have a big responsibility to meet and if we do not commit ourselves now, there may be no second chances. President Bush stated it best: "we owe it to ourselves and our children to pursue that goal" and that he is "personally and deeply committed to doing so."

I concur with the President and urge my colleagues to support funding of $4.6 billion, which will allow for the vigorous development and potential deployment of SDI's nonnuclear strategic defense architecture. We owe it to future generations to ensure that the United States and the rest of the world will remain stable and protected during these exciting but dangerously uncertain times.

EXHIBIT 1

THE WHITE HOUSE,
Washington, August 3, 1990.

Hon. JOHN WARNER,
U.S. Senate,
Washington, DC.

DEAR SENATOR WARNER: I am writing to underscore the importance of the SDI program and express my concern about Congressional action to further cut SDI funds or restrict our ability to manage the program.

When I entered office, I ordered a thorough review of the SDI program—both the progress of its technology and our policy governing it. I concluded that SDI had made tremendous progress toward giving us the technological means to strengthen deterrence through introducing defenses. As the technology matures, we will need to conduct rigorous and realistic tests—consistent with the ABM Treaty—in order the make an informed decision on the feasibility of defenses. To fund these tests I asked for an increase in the SDI budget, even as we faced an overall cut in the Defense budget.

Nonetheless, marking up the Defense Authorization Bill, the Senate Armed Services Committee has cut almost a billion dollars from my SDI request. The House seems determined to cut more . But a vote to cut SDI below the Senate Armed Services Committee mark will force us to delay critical tests and cancel contracts, and therefore is essentially a vote against strategic defense for America. Some in the Senate are also seeking to manage the SDI program themselves by cutting my request for the most promising SDI technologies. In many ways this is more serious than a funding cut. As Congress imposes cuts in the Defense Budget, at the very least, I need flexibility to manage our programs. Moreover, it makes little sense to force us to forego realistic tests of promising SDI technologies.

As you and your colleagues consider the Defense Bill, I hope you will take into account the tremendous progress and promise of SDI, and will provide us with the means to manage an effective program. SDI will be among the most important factors in my evaluation of the Defense Authorization Bill.

Sincerely,

GEORGE BUSH.

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, July 30, 1990.

DEAR COLLEAGUE: When the FY91 Defense Authorization Act comes to the floor of the Senate, we plan to offer an amendment which would allocate the $3.573 billion in funding proposed by the Senate Armed Services Committee for the Strategic Defense Initiative among 11 line items. The Bingaman-Shelby amendment would hold funding for space-based Phase I systems, in particular Brilliant Pebbles, at approximately FY90 levels, while emphasizing ground-based, ABM treaty compliant Phase I systems; theater defenses, including the Arrow program; longer-term, potentially far more effective options; and key technologies, in areas such as sensors and microelectronics with applications extending beyond defense.

Over the past seven years, SDI has grown from a challenge to the nation's research community outlined by President Reagan in March, 1983 to a robust program of research and development that could in time offer the prospect of highly effective defenses. Throughout this period, the Congress has given the director of SDIO a virtual blank check to develop the program within the framework of the 1972 Anti-Ballistic Missile (ABM) Treaty, strictly interpreted. While this blank check approach may have been appropriate in 1984 when SDI began as an experimental research program, we do not feel that it is appropriate today.

Some two years ago, the orientation of the SDI program began to shift from broad-based research on the feasibility of highly effective systems to focused development of a system of limited effectiveness that could be deployed this decade. The only apparent direction to the SDI program today is the rush to make a deployment decision in 1993. We fundamentally disagree with the need for a 1993 deployment decision, and do not want the entire SDI program oriented to such a goal. For these reasons, we are proposing that the SDI program be given some broad policy guidance through the allocation of SDI funding among these 11 line items (see attached chart).

Passage of the Bingaman-Shelby amendment would give the Department of Defense clear guidance on the direction of the SDI program. We would be rejecting early deployment of systems which would violate the ABM treaty in favor of a balanced program that would stress research and development for a treaty-compliant, limited protection concept, theater missile defense, and follow-on technologies. Over the last several years the SDI program has gone through an annual restructuring, reinventing itself each year as smart rocks have turned to brilliant pebbles and perhaps one day soon to genius dust. With the recent appointment of a new SDIO director, another restructuring is apparently in the works. While we have supported SDI since its inception, we believe that it is past time that the Congress gave some direction to this important program. All previous efforts to do so in committee reports or conference reports have failed to

have any effect. Our approach, if enacted, would ensure that SDI pursues the balanced research program a majority of the Congress desires.

We are pleased that Senators Johnston and Heflin have joined us as cosponsors of this amendment. If we can provide you or your staff with more information, or if you are interested in cosponsoring the amendment, please contact John Gerhart (4-5521) or Terry Lynch (4-6516).

Sincerely,

RICHARD SHELBY,
U.S. Senator.
JEFF BINGAMAN,
U.S. Senator.

FISCAL YEAR 1990–91 SDI LINE ITEMS

[In millions of dollars]

	1990	1991 (request)	1991 (Bingaman-Shelby)
Sensors	207.0	345.0	345.0
Ground-based interceptor	127.7	142.0	142.0
Brilliant pebbles	129.0	329.0	129.0
Other phase I	924.3	1,132.2	894.3
Subtotal, phase I	1,388.0	1,948.2	1510.3
Follow-on	840.2	984.4	944.4
Key technologies	284.7	337.1	320.0
Operational support/mgmt	227.9	228.3	227.8
Test and evaluation	189.5	217.3	180.0
Theater defense	124.7	131.8	180.0
Includes Arrow Advance	(0)	(0)	(42.0)
IS&T/SBIR	113.4	116.8	116.8
Engineering analysis	102.9	93.7	93.7
Total	3,271.2	4,058.0	3,573.0

Mr. SPECTER. Mr. President, I refer to the CONGRESSIONAL RECORD for the debates which we had in 1987 and 1988 and reference the relevant portions there so at least the record may be complete on the substance of the legal argument in favor of the broad interpretation. I refer my colleagues to the CONGRESSIONAL RECORDS dated May 13, 1987, on pages 12276 to 12279; June 30, 1987, pages 18170 to 18176; and December 8, 1987, pages 34303 to 34317.

I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. WALLOP. Mr. President, I reserve the remainder of my time.

Mr. BINGAMAN. Mr. President, I yield as much time as the senior Senator from Georgia will require.

Mr. NUNN. Mr. President, I do not intend to take a lot of time this morning. I hope to complete my remarks in about 15 minutes. I know there are Senators trying to leave. I hope we can accelerate this process.

Mr. President, I want to begin by commending the Senator from New Mexico and the Senator from Alabama for raising for debate here on this issue. This debate is long overdue. We are now well into the 6th year of SDI research since President Reagan's speech that initiated a new concept of defense more than 7 years ago.

Seven years and some $21 billion of R&D funding later, the reality of the SDI Program under the Bush administration has been revealed as something quite different from President Reagan's grand vision. The Strategic Defense Initiative Organization, which manages the SDI effort, is vigorously pursuing the development of what is now characterized as a phase I strategic defense system.

Defense Secretary Cheney recently outlined the JCS requirements for the phase I system:

I can't say that we are capable in the near term of producing a 100-percent effective shield against nuclear weapons. If we deploy even a partial defense force to satisfy, for example, the phase I deployment, designed by the Chiefs, that would allow us to intercept approximately forty percent of a first wave attack and fifty percent of all the SS-18s, that capability in and of itself adds enormously to deterrence.

General Herres, former Vice Chairman of the Joint Chiefs of Staff, explained it last year to the Armed Services Committee in quite different terms:

The requirements for Phase I * * * represent the minimum level of capability the Joint Chiefs of Staff consider necessary for a meaningful contribution to deterrence.

In other words, phase I is a very minimum that the Joint Chiefs consider that meets their requirements for any meaningful contribution to deterrence. To underscore this change from the Reagan goals, let me cite Vice President QUAYLE's remarks last fall, when he said:

The Reagan administration * * * talked about this impenetrable shield that was going to be completely leak-proof. I believe that in the semantics of, let's say, political jargon, that that was acceptable. But it clearly was stretching the capability of a strategic defense system.

The Vice President continued:

I think since that time the capability * * * has been clearly rethought. We are looking at what is militarily effective and how this will be used for deterrence.

Vice President QUAYLE has thus recognized what many of us have been explaining for years—that even if the SDI as now envisioned is fully successful, it will not end the role of nuclear weapons and will not obviate the need for thousands of United States nuclear weapons to survive any possible Soviet surprise attack. In short, President Reagan's hope of escaping from the policy of deterrence through the threat of unacceptable retaliation—what some would call mutual assured destruction—has been discarded. We will have to continue to rely on deterrence through the threat of unacceptable damage in retaliation.

I believe that that point is very important in this debate.

But if that is the case, Mr. President, then the cost and effectiveness of phase I system in contributing to deterrence can and must be measured and compared directly to the cost and effectiveness of other means of improving deterrence, including the modernization of our strategic offensive systems.

We are going to abolish nuclear weapons. Everybody concedes that we are going to have to maintain the capability to survive a nuclear strike and retaliate. The question then is how do we best maintain and enhance deterrence.

Let us turn to SDI costs.

For the past two years, SDIO has been reporting to the Congress that the cost of a phase I defense is declining. They now estimate that phase I will costs $55 billion. But this estimate does not reflect the true costs of strategic defense. The $55 billion estimate is a constant fiscal year 1988 dollars, not the dollars the Congress would have to appropriate each year. And none of those SDIO estimated included any funding estimates for the vital follow-up, or exotic, systems and technologies that the JSC and SDIO have declared be developed in parallel with phase I, for deployment soon after phase I is completed. The funding requirement for these follow-up systems is also substantial; ultimately their costs will rival those for phase I alone.

This linkage between the acquisition milestones of the phase I system and the follow-up systems has long been an integral part of the development of the SDI. Again quoting General Herres:

What we have said is that phase I is not an objective system. It is the first increment. Now, where you go beyond phase I is yet to be determined. We will develop a Phase II requirement next year.

Gen. James Abrahamson, at that time the Director of the SDIO, in testimony on the same issue of linkage between Phase I and the follow-on phases, said at the same hearing:

Yes sir, I think there is a kind of ground rule that has been established and that was discussed in the context of the acquisition process. This is, prior to the time that you begin (full-scale) development of phase I, the first system, that you have at least brought the next phase far enough forward that a milestone one type of decision is established. * * * Obviously, you can extrapolate that a step farther and say you probably would not want to begin the deployment of that phase I system until you had progressed quite substantially farther * * * (with) the next follow-on.

Thus, Mr. President, in asking what it will cost to develop and deploy a phase I strategic defense, it is absolutely necessary to count all the expenditures the SDIO will have to make to bring Phase I to deployment and for the development of the follow-on systems forward in parallel. As we will see, that phased development increases the cost of limited strategic defenses significantly. In my judgment, once all such adjustments are made the full costs of the SDI program through phase I deployment will be significantly higher than the GAO's

estimate of $123 billion in yet-to-go costs.

But the $123 billion, as I view it, is an absolute minimum.

I should further emphasize that, to meet SDIO's timetable, this $123 billion would have to be authorized and appropriated between this year and very early in the next decade. This means that the Congress would have to contemplate annual SDI funding levels of more than $10 billion per year for the next 10 years. Mr. President, where does anyone think we are going to find that kind of money? Does anyone really think that the Congress is going to vote to authorize and appropriate more than $10 billion for SDI every year for each of the next 10 years or so?

I have not heard one clue from anybody in this administration, from the President, from the Department of Defense, from the Office of Management and Budget, from the SDIO Office, no one can tell you where that money is coming from and yet they are charging straight ahead as if it is all of a sudden going to appear in some kind of miracle, or maybe the Japanese are going to give it to us with no interest.

Let me further note that the GAO estimate of $123 billion makes no allowance for the additional billions of defense dollars that would be required to develop even partially effective air defenses against Soviet bombers and cruise missiles.

This is one of the reasons I am in favor of the B-2. We do not have an air defense system. What good will it do to have a complete phase I or phase II system against missiles if we are going to give bombers a free ride, if we are going to say: "Come on in with your bombers anytime you want to, but we are going to stop those ballistics missiles?" Somebody has to explain that one to me. I have never figured that one out.

So you are going to have to have an air defense system, too, and nobody has counted the cost of that.

It would hardly make sense to deploy even a fully successful phase I ballistic missile defense while continuing to offer Soviet bombers and cruise missiles the same free ride they enjoy today.

Turning for just a moment to what this money will buy in other defense programs.

Since the administration has admitted that the goal of the phase 1 SDI system is to enhance our traditional concept of deterrence through the threat of retaliation, let us consider the contribution to deterrence that could be made if that $123 billion yet to be spent on a phase 1 deployment were instead allocated to other strategic modernization programs.

All of us know we are going to have a lid on defense. All of us know it is going to come down. All of us know it is going to be reduced.

Let us look at $123 billion yet to be spent on SDI phase 1 and related phase 2 thereto. Let us look at what we could buy.

The balance of 75 B-2 bombers now planned could be bought. All the 500 small ICBM's and hard mobile launchers; all the 50 rail garrison MX trains; all the military construction for all three of those programs, and all of the additional Trident submarines and Trident II missiles that the Navy would be allowed under START.

And after we do all of that, we could have $40 billion left over; $40 billion left over. We are going to have nuclear weapons either way, and they are going to have to survive and they are going to have to be able to retaliate.

Mr. President, let me now turn to Brilliant Pebbles since it is one of the key issues in the debate on this amendment. With regard to Brilliant Pebbles, I believe we should continue to fund further development of what appears to be a highly innovative technical approach, combining miniaturization with substantial computing power.

This is where I may have some disagreement with the authors of this amendment. I do not know how wide our gap is, but I intend to support the amendment for reasons I will give.

The concept of many small packages constituting a distributed network may have applications for all kinds of missions currently performed by constellations of a few large, very costly satellites, having little survivability or launch flexibility.

I doubt, Mr. President, that Brilliant Pebbles will be deployed in the near term as space-based interceptors. I doubt that and I said why, I think, pretty clearly. But I think further research on miniaturization, producibility and cost-reduction is justified. Should events in the Soviet Union deteriorate, a cold-war leadership emerge, and new military challenges be raised—and we hope and pray they will not—the continuation of Brilliant Pebbles development could be a useful additional hedge against a Soviet breakout from START or the ABM Treaty. I think that is becoming less likely, but I think we still need a hedge.

Turning to Third World missile proliferation, some SDI proponents have recently been touting the use of space-based Brilliant Pebbles as a response to the growing problem of ballistic missile proliferation. Indeed, with this threat in mind, President Bush has declared that: "In the 1990's strategic defense makes much more sense than ever before."

There are a number of questions I would put to proponents of deploying a space-based Brilliant Pebbles defense in the name of countering this threat. First, would we really scrap the ABM Treaty for the sake of using a space-based Brilliant Pebbles defense system against Third World missile threats against our friends or allies around the world, or should we instead counter such threats with rapidly deployable ground-based ATBM systems—which are permitted under the ABM Treaty—along the lines recommended in the Warner ATBM amendment, which I support and cosponsor and we will vote on later today.

Second, do we really want—this is conceptual, you do not have to be a rocket scientist to figure this out—and could we possibly afford to have the United States assume the burden of "world policeman," as implied by a space-based, worldwide coverage ABM system under the sole control of the United States? Would we really want to put our strategic defense system into action if two or more Third World countries began shooting ballistic missiles at each other?

Do we want to have systems in space so we say to everybody in the world. "We are the big policeman; we are going to spend billions of dollars on this, and we will referee every dispute and knock down all the missiles you shoot at each other?" I do not think we have thought that one through.

Third, how effective would a space-based Brilliant Pebbles system actually be in intercepting short-range, short-time-of-flight ballistic missiles? How many Brilliant Pebbles must be put in orbit to ensure that we would at all times have an adequate number over any one specific launch area, whether that be Cuba, Libya, or North Korea? That is a very challenging concept.

Mr. President, these are just a few of the questions I believe that have to be answered by those who would advocate deploying a space-based phase I system to counter Third World missile threats.

Mr. President, let me turn to the Bingaman-Shelby amendment itself. During the preceding 6 years of research, the congressional direction to the DSIO has been minimal, as the sponsors of the amendment have made quite clear. What guidance the DSIO has been given has been largely contained in sense-of-the-Congress provisions, report language, and speeches by individual Members. That nonbinding guidance has been largely ignored by SDIO Directors.

For example, 2½ years ago I made a speech in which I recommended that the SDIO examine options for what I called an "accidental launch protection system," or ALPS for short. Right after the speech, I suggested that SDIO evaluate what could be done with a system that would be compliant with the ABM Treaty, or with some minor modifications thereto, which

could be negotiated with the Soviet Union. I have repeated that message in subsequent speeches.

I do not expect SDIO to take note of my speeches. I know they do not take note of speeches by Senators. But the committee itself asked for a report on the cost of the ALPS system. In the conference report on the defense authorization bill that year, Congress endorsed the ALPS concept in a sense-of-the-Congress resolution.

I see the Senator from Missouri here. He has talked about it over and over again.

What has this meant to SDIO? Exactly zero. All of it has been to exactly zero effect to no avail whatsoever. Indeed, the acronym ALPS does not appear in the May 1990 SDI report.

Since late 1986, Mr. President, the SDIO has been seized with the idea of early deployment of a space-based phase I system. Senator DOMENICI, from New Mexico, made it abundantly clear this morning that that is what is wrong. We have to send them a message and that is what this amendment does. I am in favor of sending a clear policy message. I am not in favor of everything this amendment does, but we have gone through four different architectures in 4 different years. They had one at the June 1987 milestone review; by June 1988 they had scrapped it and devised another; by October 1988, this second one was gone, replaced by a third; and, last year, the SDIO went to Brilliant Pebbles which requires a still different architecture. There are now indications that the new SDI Director, Ambassador Cooper may favor further restructuring within the program. If so, that will make 5 new architectures in less than 4 years. As the GAO noted in a July 1990 report on SDI, all these changes introduce great turmoil into the SDI's research program. Whenever the architecture is changed, changes cascade through almost every element of the system.

Mr. President, in the case of the SDI program, the executive branch has not been exercising appropriate oversight or management. The amendment before us is, in my judgment, a clear step forward for the Congress to exercise greater oversight. But congressional oversight is not an effective substitute for lack of DOD management attention.

If the Pentagon is not providing management oversight over the SDI program, then who is? The answer is "no one," and I have therefore concluded with Senators BINGAMAN and SHELBY that it is incumbent on the Congress to do its best to provide additional oversight.

What gives me some concern about this amendment is that there are more line items established than I think is realistically practical. There are 11 of them and I think that is too many. I would like at some point to change some of the categories so we can understand what each one means.

My second concern is that while some of the line items deal with relatively self-contained activities like "theater defense activities," others, I fear, are at least as broad as those which SDIO itself has specified in their line items in the past.

My main reservation Mr. President, however about the Bingaman-Shelby amendment, is the way it singles out the Brilliant Pebbles program for special treatment. In their amendment, they have set a ceiling of $894 million for all other phase 1 activities except Brilliant Pebbles. However, Brilliant Pebbles is put in its own separate line, and is capped at this year's level of $129 million.

Mr. President, it seems to me phase 1 should be given more flexibility than that and that Brilliant Pebbles should be given more flexibility than that. I will be discussing that with the authors of this amendment as we go into conference, if the amendment is agreed to. I hope they will keep an open mind on the possibility of, within phase 1, giving more flexibility so we do not really say to the SDIO, we want you to go back to the old space-based interceptor garage concept. We really do not want to be applying that. I do not believe the Senate does.

I do not believe that phase 1 is an affordable system, with Brilliant Pebbles or without. But I see no good reason to constrain Brilliant Pebbles research to a greater extent than other programs within the overall constraints of funding for phase 1 systems.

What we really need to do is send them a message on phase 1 and tell them to get off this kick of the 1993 deployment decision, which does not make any sense fiscally, does not make any sense scientifically, and I do not think makes sense conceptually because phase 2 is nowhere near ready to go and phase 1 can be countered relatively cheaply by the Soviet Union.

So, Mr. President, that is the message I intend to send by my vote this morning for the Bingaman amendment. Our choice today is between the status quo and the Bingaman-Shelby amendment, and I urge our colleagues to vote for the Bingaman-Shelby amendment.

The PRESIDING OFFICER. Who yields time?

The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, in the discussions with the Senator from Wyoming, we discussed the possibility of shortening the time down and voting at 1 o'clock and splitting the time between now and then evenly between the proponents and opponents. I need to discuss that with the managers and see if that is an acceptable arrangement.

Mr. NUNN. Mr. President, may I suggest a procedure? I see the Senator from Virginia on the floor. He suggested it to me and I ask him to join in this, and that is the possibility of consolidating the remaining debate on the Warner amendment within the time for the debate here; whenever we get through with both debates, we go to a Bingaman-Shelby vote, which will be followed by a Warner vote that would only last 10 minutes. That way we would have both our votes take place, be consolidating our debate, and I think we would save 30 or 45 minutes.

Mr. BINGAMAN. I ask the Senator from Virginia if he would be agreeable to have a start on the Bingaman-Shelby vote at 1 o'clock and have that completed and then go on to his vote. Would he be able to complete his debate before that?

Mr. WARNER. After consultation with the Republican leader and others, that is quite agreeable, as I earlier stated to the distinguished chairman.

I will be happy to yield back my time.

Mr. BINGAMAN. I ask unanimous consent the vote on the Bingaman-Shelby amendment occur at 1 o'clock, to be immediately followed by a vote on the amendment by the Senator from Virginia, and that the time between now and 1 o'clock be equally divided between the proponents and opponents.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I yield 4 minutes to the Senator from Ohio, who wishes to speak in favor of this amendment.

The PRESIDING OFFICER. The Senator from Ohio is recognized for 4 minutes with the time charged to the Senator from New Mexico.

Mr. GLENN. I thank my colleague from New Mexico. I am glad to support his amendment.

Mr. President, I rise to express my support both for the Bingaman-Shelby amendment which at long last will provide the Department of Defense with clear guidance on the direction of the SDI Program through the allocation of SDI funding among 11 budget lines, as well as express my support for a reduction in the Senate Armed Services Committee mark of $3.573 billion. I would like to take this opportunity to discuss my views and concerns with the strategic defense initiative.

No defense program merits closer and more critical scrutiny than the strategic defense initiative. Against today's sobering budgetary background is the latest strategic defense initiative organization's estimate that the first phase of a fully deployed SDI system along the lines advocated by President Reagan would cost approxi-

mately $47 billion. Considering that the price tag for weapons systems usually increase significantly from the drawing board to deployment, this is undoubtedly an overly optimistic figure. And it is important to remember that this represents only phase 1 of a projected multiphased system. A fully deployed, multilayered strategic defense system woud cost many times that.

With a Defense budget that is likely to plummet over the next several years, it is fairly obvious that America will simply be unable to afford SDI's deployment price tag for the foreseeable future.

Mr. President, when one expresses support for the SDI Program, it is important to distinguish between SDI research and SDI deployment. Most responsible officials support the need for continued SDI research. Research cannot be verified and we must continue with a strategic defense research program if only as a hedge against a Soviet breakout of the ABM Treaty to deploy their own SDI system. Indeed, U.S. strategic defense research was conducted long before President Reagan's March 1983 speech elevating strategic defense as the primary American national security goal. This research must continue, but at a more moderate, reasonable level consistent with the traditional, restrictive interpretation of the ABM Treaty.

Since it was first proposed, SDI has become one of the most controversial and expensive defense programs in history with almost $20 billion appropriated thus far. I have found many of the claims made by SDI proponents to be seriously overblown.

Mr. President, I have closely followed the state of our Nation's defense technology base since my days in the Mercury Space Program over 30 years ago. Since I have been in the Senate, I have made it a point to regularly visit our national laboratories not only to learn as much as I can about our state-or-the-art R&D efforts, but to obtain briefings by our leading scientists on the state of research on directed energy weapons and other advanced technologies necessary to make a fully deployed, multilayered strategic defense system function. These scientists believe that the breakthroughs necessary for many of these advanced technologies are some years away.

In addition to the technical feasibility issue, I am also concerned with the management of the SDI Program. Brilliant Pebbles is now being touted as the most promising approach to SDI deployment and is the basis for current phase 1 deployment estimates. Previously, a more economical phase 1 space-based interceptor [SBI] system was considered most promising. We have witnessed radical shifts in both SDI budget estimates and system priorities within the program—astrodome defense, SBI, Phase 1, and now Brilliant Pebbles. One cannot help but wonder what will be the next SDI panacea.

In its review of Brilliant Pebbles last December, the Defense Science Board stated that:

> The SDI Program appears to suffer from a conflict of purpose. At times the program has emphasized research on new and better technologies and concepts. At other times it has emphasized deployment of a system. These two aims are in competition.

Clearly, the SDI Program is poorly defined and seems to be constantly shifting its budgetary and strategic priorities largely based on shifting political factors.

Indeed, SDI seems to be a program in search of a valid strategic rational. In my view, neither the Reagan administration nor the Bush administration to date has put forward a truly persuasive argument that the deployment of strategic defenses would enhance rather than diminish our national security.

With Ronald Reagan's departure from the White House and the dwindling Defense budget, more attention has been focused on the deployment of comparatively modest strategic defense systems which could have varied missions. But none of these missions justifies the expenditure of the billions necessary to deploy even a limited defense system and undercut the ABM Treaty which has contributed so significantly to strategic stability.

The vast majority of experts dismiss the idea of a leakproof, continental population defense as technically impossible. As a comparatively economical alternative to President Reagan's impenetrable peace shield, SDI proponents have advocated several other partial strategic defense systems with varying missions: First, to protect our land-based missiles; second, to protect against an accidental or unauthorized ICBM launch; and finally, to protect against the ballistic missile proliferation threat.

A growing number of SDI proponents favor a partial defense of our missile fields and command centers arguing that such a partial defense would supplement and not replace our offensive nuclear force. A partial system, they argue, would introduce a crucial element or uncertainty into Soviet nuclear attack plans and would therefore buttress deterrence. This position turns President Reagan's rationale for SDI on its head; instead of making nuclear weapons obsolete, SDI would be used to protect and preserve them.

The Soviets should not be expected to trust that we would not be attempting to create a first strike capability with a partial defense. Certainly, we would be highly alarmed if the Soviets were to deploy a partial defense, and would undoubtedly suspect that the Soviets were attempting to build a first strike capability of their own. The essence of deterrence is the mutual vulnerability of both sides to a nuclear attack. Deployment of even a partial defense by either side will therefore exacerbate strategic insecurity and greatly increase the possibility of a nuclear crisis.

If the goal of SDI is to optimize the survivability of our land-based systems, would it not be ultimately less expensive and far more stabilizing from an arms control standpoint to take our existing land-based missiles out of their silos and deploy the most mobile, and therefore most survivable land-based missile we have available—the single-warhead Midgetman missile? To deploy two mobile system Midgetman and the rail-garrison MX, as well as a strategic defense system to attain the solitary goal of protecting our land-based deterrent would be an absurd waste of increasingly scarce resources. We can only afford so much redundancy in our strategic arsenal. The Midgetman unquestionably carries a high price tag, but it is worth the investment if we determine that it is in our national security interest to proceed with deployment of a new strategic system. The midgetman system is far more survivable than the MX and makes eminently more strategic sense than a deployed SDI system.

Mr. President, advocates of SDI, mindful of the growing skepticism of even a partial SDI deployment to protect our land-based missiles have embraced the idea of deploying an accidental launch protection system [ALPS] to deal with the possibility of an accidental or unauthorized missile launch. Proponents argue that an ALPS system could be deployed within the confines of the 1972 ABM Treaty or with modest amendment to that agreement.

However, the ALPS approach to strategic defense is merely the replacement of one bad idea with another. Like President Reagan's original SDI vision of an Astrodome defense, an ALPS defense is neither desirable nor necessary.

First, one cannot deter as accident. If we are to have an adequate defense to ensure against any accidental nuclear launch, such a system would have to be nationwide and would thereby seriously erode the ABM Treaty which prohibits nationwide defense and permits deployment of a defense system at just one site. Additional defense sites and interceptors would undoubtedly be needed not only to protect against the possibility of an accidental Soviet land-based missile launch, but submarine launched missiles based in the Atlantic and Pacific as well. The United States would certainly feel threatened if the Soviets were to deploy such a nationwide defensive

network, regardless of the stated rationale for such a system.

In addition, the threat of accidental or unauthorized nuclear launch is extremely remote. The United States has stringent safeguards to prevent the unauthorized launch of its missiles and there can be little doubt that the intensely cautious Soviets have a nuclear weapon safeguard system that is at least as vigorous as our own. Particularly in the current budget environment, we can ill-afford to spend billions of dollars to counter a threat that is so remote.

Finally, if there is sufficient concern about the need to counter the threat of accidental or unauthorized launch of Soviet missiles, there are cheaper and far less destabilizing ways to attain that goal. Under the proposed START agreement, substantial reductions in the number of strategic nuclear delivery systems of both sides will logically mean a significant, proportional reduction in the threat of Soviet accidental or unauthorized launch. We should also consider sharing our permissive action link [PAL] technology which protects United States nuclear weapons from misuse with the Soviets to foil any potential accidental or nuclear lanuch threat, as well as consider a joint agreement to equip missiles with in-flight destruct mechanisms like those on space-launch vehicles and test missiles.

Mr. President, the latest, and to a growing number of individuals, most compelling rationale for a partial strategic defense system is to protect against the growing threat of missile proliferation in the Third World.

While no one should diminish the dangers posed by the proliferation of ballistic missiles, it is important to remember that ballistic missile proliferation raises more concerns about regional stability than any direct threat to the United States. These weapons are not likely to be aimed at the United States but at other regional enemies: For example, India at Pakistan, South Africa at its African neighbors, Arab nations at Israel, and vice versa.

Most of these missile proliferant nations will not be able to develop the technology base to deploy intercontinental ballistic missiles capable of reaching the United States any time soon. In addition, it is difficult to imagine the leadership of any country making the determination that it would serve its national interests by launching nuclear weapons at the United States, particularly when it could be assured that it would be decimated by a retaliatory U.S. nuclear strike. Does anyone seriously believe that the United States needs to rush out and deploy a multibillion-dollar SDI system to protect against the possible future threat of Brazil lobbing a nuclear equipped ICBM at the United States?

At the core of nuclear deterrence doctrine is the assumption that a nation's decisionmakers are rational and will act in a way to preserve their nation's survival. Despite the fact that there are some fairly unstable leaders in the world and we have a fondness for characterizing leaders like Saddam Hussein of Iraq and Libya's Mu'ammar Qadhafi as insane, there is little reason to think that such leaders would be immune to fairly straightforward considerations of continued survival.

Besides, why deliver a nuclear device to U.S. territory on a system that would clearly identify you as the perpetrator and ensure your destruction? It is far easier and cheaper for a determined fanatic to deliver a nuclear weapon to U.S. soil by transporting it in a pleasure boat, a civilian aircraft, or even a hefty piece of Samsonite luggage—these are the most likely nuclear delivery vehicles of choice for the world's 21st century terrorists. And no strategic defense system in the world will protect against that threat.

The pressure currently being exerted to deploy even a partial strategic defense system is clearly not based on any threatening change in the strategic status quo, but is instead motivated to a large extent by myopic political factors—primarily the desire to lock this and future administrations into support for SDI deployment and build up a domestic constituency for the program.

America has always invested in a redundant, three-legged strategic deterrent of air-, sea-, and ground-based systems to provide ourselves with an optimally survivable force structure. There is already sufficient redundancy in our strategic forces by virtue of this triad. Indeed, America's three-legged strategic deterrent is looking increasingly like an octopus. What sense does it make to stubbornly persist in the acquisition of new, extraordinarily expensive strategic systems such as SDI that contribute little if anything to an already stable strategic environment?

Mr. President, given our present budgetary climate, there is greater pressure than ever before to reduce defense spending on questionable defense programs that will divert increasingly scarce resources from more compelling national defense priorities. We need to focus more attention and resources on an equitable pay rate for our military personnel, cleaning up the long-neglected DOE nuclear weapons production complex, funding increasingly important but expensive arms control monitoring capabilities, and modernizing the conventional forces that will be left to us in a post-CFE environment.

Mr. President, it is foolish and irresponsible to continue to fund SDI at such high levels when these and other more compelling national security priorities are not receiving adequate attention.

To summarize, Mr. President, I feel this amendment does give some guidance to this program. I think what has happen in the program is too often there has been an attempt to move this program to deployment before the research was done. That has been the basic problem.

Now with the deployment that is being contemplated, we are talking about something like $47 billion for just a partial system, a system that would require new follow-on, new research breakthroughs before we would be able to accomplish the second part of that system. And nobody even knows how much that might cost.

Mr. President, the problem with this has been the competition between research and deployment.

I think the history of this program shows that we have not been able to deploy, when people were pushing to do exactly that. Remember the astrodome defense? It is going to be like a great blanket over this country, a tent that would prevent any nuclear weapons from getting through.

I remember General Abrahamson used to tell us all the time that unless we have that whole system ready to deploy, it does not pay to deploy part of that system. Because when we are talking about thousands of warheads, if only 5 or 10 percent get through that 5 or 10 percent can obliterate our Nation. It would not be worth putting the whole system up unless it was a leakproof program. That went down the drain.

Then we went to space-based interceptors. We talked about SBI. Then we went to phase 1. Now we are talking about deploying Brilliant Pebbles and some of the other technologies out of phase 1.

What has this meant? Since the President announced this program in March 1983, until Brilliant Pebbles was really announced in about mid-1988, in that 5-year period we have emphasized four different basic concepts. People have been wasting money on deployment, more for political factors than anything else. We should have been keeping this money tied into, basic research which benefits our overall defense posture.

We are not going to have a leakproof continental population protector for everybody. We know that. But if we want to go to first protecting our land-based missiles or protecting against accidental launch, we could go to all sorts of systems. If we really want to go to that kind of a system for these special situations, it does not make any sense at all to start deploying the larger program that has been talked about in the past.

If the goal of SDI is to optimize the survivability of our land-based sys-

tems, would it not be ultimately less expensive and far more stabilizing from an arms control standpoint to take our existing missiles out of their silos and deploy the most mobile and, therefore, the most survivable land-based missile we have, the single warhead Midgetman? With that we get mobility, a guaranteed retaliation. If we are talking about that kind of survivability, we can get that if we just go ahead with mobile programs such as midgetman instead of SDI.

The PRESIDING OFFICER. The Senator's 4 minutes have expired.

Who yields time?

Mr. BINGAMAN. Mr. President, I yield 2 minutes to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized for 2 minutes.

Mr. KENNEDY. Mr. President, I urge the Senate to support the Bingaman-Shelby amendment.

Over the past 6 years, Congress has written a $20 billion blank check to the Pentagon for star wars, and it's time we cancelled that extravagant and unjustifiable line of credit.

The pending amendment initiates a process of congressional oversight and supervison of star wars that should have been in place from the beginning.

In the absence of such controls, star wars has become a relic of the Pentagon "Days of Weinberger and Roses"—when the Soviet Union was an evil empire, when the Berlin wall was up, and when the Pentagon had an open faucet at the Treasury to spend untold billions of dollars trying to build a mind-boggling astrodome over the United States.

The strategic defense initiative continues to careen down various paths, all of which involve the early deployment of missile defenses. In the last 3 years, it has moved through three radically different concepts for space-based defenses.

Continuing on these paths now threatens not only to bankrupt the Treasury, but to undermine our security by provoking a nuclear arms race in space by the United States and the Soviet Union, just as our two nations are on the verge of achieving limits and even reductions on strategic offensive forces.

This amendment shifts star wars away from its narrow focus on immediate deployment of defenses, regardless of their cost or effectiveness. The amendment emphasizes more appropriate goals for SDI—examining the practicality of ICBM and theater missile defenses, and providing long-term research for follow-on technologies.

A return to these goals now will permit substantial savings in research on SDI, and it will ensure that such research will be in the area of most benefit to our national security.

And I hope very much that when and if the budget summit agreement is finally reached, we will have our priorities straight—and begin spending far more of our limited resources on star schools, and far less on star wars.

The PRESIDING OFFICER. Who yield time?

Mr. BINGAMAN. Mr. President, I reserve the remainder of out time.

The PRESIDING OFFICER. The Senator's time is reserved. Who yields time?

Mr. WALLOP. I yield 1 minute to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I have statement from Senator D'Amato which he wants me to read for him:

I very recently had the opportunity to review the letter from President Bush to Senator WARNER setting forth his concerns about the substance of the Bingaman-Shelby amendment. I find the President's position to be clear and compelling

Additionally, the extraordinarily dangerous situation in the Middle East and the irrational conduct of Iraq has convinced me that this is not the time for the Congress to begin to micromanage the SDI Program.

Because of these concerns, I am asking unanimous consent to remove my name as a cosponsor of the Bingaman-Shelby amendment.

Mr. President, in view of Senator D'AMATO's request, I ask unanimous consent that his name be withdrawn from the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WALLOP. I yield 1 minute to the Senator from Missouri.

The PRESIDING OFFICER. The Senator is recognized.

Mr. BOND. Mr. President, last year at this time I came to the floor and offered an amendment to take a first step toward protecting our Nation against the threat of ballistic missile attack from third countries by deploying an accidental launch protection system. Forty-five Members of this body supported that proposal.

Mr. President, after listening to the debate over the past few days, I am convinced many Members believe in the need for ALPS, and I believe the invasion of Kuwait makes that need more compelling. We need the ability to protect the people of America from a missile attack by terrorist and Third World countries, and we need to continue joint efforts, such as the Arrow program, to defend our allies.

I agree with much that has been said by the distinguished Senators from Alabama and Mississippi. But I do not believe that means we should deal a death blow to the many other promising technologies under development as part of the SDI Program. As my distinguished colleague from Wyoming has pointed out and argued so eloquently, it would be a mistake to curtail our research efforts.

In addition, I do not believe it is appropriate to put tight restrictions on, or micromanage the defense budget, as the chairman of the Armed Services Committee pointed out. I know a few examples where a few programs have been improved by micromanagement.

In conclusion, I point again to the compelling arguments of the Senator from Wyoming and urge my colleagues to oppose this amendment.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

Mr. WALLOP. Mr. President, I yield 1 minute to the Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized for 1 minute.

Mr. WILSON. Mr. President, the Senator from Missouri spoke of the necessity to be able to protect Americans from attack. I have just seen a dispatch that indicates that there has been the seizure by Iraqi troops of an American-driven oil tanker docked at a Kuwait seaport. The crew, 20 Americans, were taken off the vessel, the *Sea Wolf.* It is owned by the American firm of Crowley Maritime. It was docked at Shuwaikh.

Mr. President, this is the kind of escalating recklessness on the part of Saddam Hussein that makes all the more pertinent the amendment of the Senator from Virginia.

The same Hussein who says "With the help of Allah, we shall reach that region of American influence. Our missiles cannot reach Washington, but if they could we would hit there as necessary. However, we can still strike at Washington in other ways, at other U.S. targets in the world."

We should not only support the Warner amendment, but we will need to support the President of the United States in taking decisive action against this kind of threat.

Mr. WALLOP. I yield 1 minute to the Senator from Indiana.

Mr. COATS. Mr. President, I rise today today to oppose the amendment by the Senators from New Mexico and Alabama. This amendment would create a congressionally controlled, micro-managed budget for the Strategic Defense Initiative and place ceilings on each of the newly created program elements. These ceilings are intended to redirect the SDI away from near-term deployment of space-based systems and toward long-term research on more distant technologies. The ceilings also protect funding for ground based interceptor systems. This approach would be a fundamental departure from past congressional treatment of SDI and represent a radical restructuring of the program's management.

This amendment represents an attempt to micromanage the definition

and implementation of SDI, a key component of the President's national security policy. It violates a key guideline used by the Senate Armed Services Committee in preparing this bill—"To reduce congressional micro-management of defense programs." Its passage would directly usurp President's Bush's constitutional prerogative to shape defense policy. In passing this amendment we would once again be masquerading as commander in chief. In so stepping beyond our traditional role we run the risk of a Presidential veto of this very important bill.

The Bingaman-Shelby amendment represents more than a simple change in congressional treatment of the SDI program. It attempts to legislate a particular model of deterrence, direct the course of United States-Soviet arms control negotiations and severely limit United States defense options. It thus deserves close examination and thorough debate.

The proponents of this amendment have asserted that they are merely exercising a type of congressional oversight that is common to all other defense programs. This statement is misleading. It fails to recognize the unique nature of SDI. The Strategic Defense Initiative is not yet a weapons deployment program, it is a diverse and flexible technology demonstration program designed to explore and develop promising emerging technologies. For the time being, SDI's mission is to provide the President information he requires to make an informed decision on future U.S. policy regarding ballistic missile defenses. This amendment preempts the President, denying him information and limiting his decisionmaking ability before he has even made a concrete proposal on deployment.

The so-called phase one strategic defense system [SDS], which is considered a promising architecture for an initial deployment of ballistic missle defenses, remains a mere planning model, not a deployment program that has been presented to the Congress for oversight. In making the heralded deployment decision in the 1992–93 timeframe, the President is in no way chained to phase one as currently defined. He could just as easily choose another architecture, modify phase one, or decide that it is premature to deploy a strategic defense system.

In making this decision, the President needs all available information if the national interest is to be well served. In developing this information, the Strategic Defense Initiative Organization [SDIO] requires full control over the program while it remains in the demonstration and validation phase. The amendment by the Senators from New Mexico and Alabama denies this flexibility and hence part of the information the President has requested. The Congress will be given ample opportunity to comment upon and oversee deployment of a strategic defense system once the President has made a concrete decision; now is not the appropriate time for such heavy-handed congressional intervention.

Ceilings or other fences would severely complicate efficient management of the SDI program. Since most of the technologies being explored are complex and truly revolutionary, SDIO requires maximum flexibility to exploit breakthroughs and otherwise place emphasis on the most promising technologies. This flexibility is needed not only to exploit promising technologies, it is also required to reduce costs. Ironically, congressional micromanagement at this stage could actually drive costs up.

It is a serious burden to have Congress attempting to manage a program as complicated as the SDI, especially during a formative stage. Congress is ill equipped for this task. In fact, an examination of the ceilings contained in this amendment clearly reveals that Congress lacks the technical knowledge to manage such a complex program. The ceilings, though reflecting a particular philosophy, are essentially random; they are obviously not the product of careful analysis conducted by technical experts.

The Bingaman-Shelby amendment is based entirely on questionable assumptions. It poses a false choice between two supposedly clear paths. The first is allegedly an unaffordable and technically risky crash program; one which will derail the Strategic Arms Reduction Talks [START], signal the beginning of a new cold war and provide less than marginal protection against attack. This, of course, is the image the amendment's sponsors are attempting to attach to the current approach to SDI. The second path would allegedly establish a more stable relationship with the Soviet Union through arms control negotiations while the United States continues research on distant technologies.

This dichotomy is patently false. In stating that deployment of a strategic defense system will cause the Soviets to abrogate start or withdraw from negotiations, this amendment simply echoes stale Soviet propaganda. In my view, the deployment of ballistic missile defenses, including some form of phase one system, is entirely consistent with start and future United States-Soviet negotiations. As the two sides reduce their emphasis on strategic offensive forces, limited defenses could contribute significantly to stability and deterrence. Deep cuts in strategic nuclear forces could actually reduce stability if remaining forces become more vulnerable. This would be particularly worrisome if the United States abandons mobility for the future ICBM force. Limited ballistic missle defenses could reduce this vulnerability, thereby strengthening stability and deterrence.

Deployment of even a limited strategic defense system would also provide a significant hedge against Soviet cheating. As the May 1990 SDIO report explains, "This insurance would be particularly important because the reductions resulting from a start treaty would increase the marginal importance of each offensive weapon and thus the military significance of cheating." Given the Soviets' aggressive and multifaceted mobile ICBM program, this concern is all the more real.

The Bingaman-Shelby amendment also seems to dismiss the United States negotiating position in the United States-Soviet defense and space talks as unrealistic and misguided. The United States delegation is now attempting to gain Soviet support for a cooperative transition away from an offense-only deterrent relationship to a more balanced mix of offensive and defensive forces. Passage of this amendment would undermine the U.S. position in the defense and space talks and block movement toward a more balanced deterrent relationship.

For those who assume that the Soviets would never agree to such a transition, I draw your attention to the joint statement on future negotiations on nuclear and space arms, signed at the Washington Summit Meeting this June. The joint statement encourages the sides to seek, and I quote, "Agreements that improve stability, remove incentives for a nuclear first strike, and implement an appropriate relationship between strategic offenses and defenses." This statement assumes that the existing relationship between strategic offenses and defenses is other than appropriate. I would certainly agree.

For additional evidence of this growing Soviet interest in such a defense transition one need only examine a recent study by the national institute for public policy, which examined Soviet statements sympathetic to mutual deployments of ballistic missile defenses. The institute surveyed writings by Soviet military, political and technical experts and discovered an emerging interest in modifying the existing offense—only deterrent relationship. Let me quote some selected passages. Writing in a March 1990 issue of the Soviet Journal "Sovetskaya Rossiya", Major General Belous wrote as follows:

> Some of the arguments put forward by SDI's champions require careful consideration. The world today is bipolar, but in the near future it will become multipolar. Whereas today there are eight states on the "nuclear threshold," capable of crossing it and beginning production of mass-destruction weapons, by the end of the 20th century there will probably be 20 such states. They will also possess missile technology. All this will considerably increase the risk of

both deliberate and accidental nuclear conflict.

Based on this concern, General Belous continued with the following advice:

Mindful of current realities, we should hardly deny the possibility of reasonable compromises in the future and the development of defenses for the U.S. and U.S.S.R. territory against accidental missile launches or blackmail attempts and threats made by third countries.

Members of the Soviet foreign policy hierarchy have also expressed an interest in cooperatively establishing a new deterrent relationship based more on defense. For example, writing in a ministry of foreign affairs journal in 1989, Ednan Agayev, a Second Secretary of the International Organizations Department, made the following observation:

Under the ABM Treaty the U.S.S.R. and the U.S.A. gave up the development of defensive strategic systems in favor of offensive arms. The logic of their choice was quite understandable. But, as it was once pointed out by Rene Descartes, who was a strict logician, in order to get to the truth it is necessary to call everything in question. And hasn't the present "offensive deterrence" been long ripe for that? The only modern deterrence is defensive. And its prerequisites, even if they are only intellectual, already exist.

Another Soviet foreign ministry official, Mikhail Aleksandrov, writing in the December 1989 issue of "Soviet Military Review," followed similar reasoning:

It appears that if the trend towards the development of defense technologies is correctly oriented, it may, far from leading to destabilization, result in a better model of strategic stability than the one we have. . . . The model of defense domination will make it possible to switch over, in deed, and not in word, to a defensive military doctrine at all levels of confrontation.

While we should not make too much of these statements, they are symbolic of a growing interest on the part of Soviet officials to seriously consider a reordering of deterrence. Ambassador Smith, the chief U.S. negotiator at the defense and space talks, has expressed considerable hope that the Soviets are moving toward the United States position, and he has also pointed to "the fascinating Soviet public debate on the value of defenses, made possible by glasnost and new thinking." The mere fact that such a debate has surfaced in the public media indicates that it is serious and officially condoned. If the Soviets are serious about their enunciated defensive doctrine, then such a transition should appear quite appealing. The last thing we should be doing at this point in time is to discourage this shift in Soviet thinking.

The amendment by the Senators from New Mexico and Alabama, in dismissing the importance of near-term deployment of a strategic defense system and focusing on long-term research and development, also seems to imply that the current international security environment is benign while the future may be more threatening. While the future remains too uncertain to predict, the present international security environment is not free of danger. I remind the Senate that the Soviet ballistic missile threat the United States today has in no way diminished. The Soviet Union continues with vigorous modernization programs for both land-based and sea-based ballistic missiles, including two new mobile ICMB's, a new version of the huge SS-18 ICMB and two submarine launched ballistic missiles.

It seems somewhat ironic, therefore, that this amendment focuses on promising long-term technologies at the expense of promising near-term technologies. I am a firm supporter of a balanced SDI program, one which does not risk development of follow-on technologies for the sake of more rapid near-term deployment, but I am convinced that this amendment will not foster balance.

It seems ironic that this amendment favors both ends of SDI's technological spectrum at the expense of the most promising and revolutionary near-term technologies, especially Brilliant Pebbles. On the one hand the amendment dismisses the need for a phase one strategic defense system, and at the same time promotes an ABM treaty compliant limited protection system. In this regard, it seems odd that both the Senator from New Mexico and the Senator from Alabama opposed funding such an ALPS system during the Senate's consideration of last year's defense authorization bill. Now, however, their amendment informs us that such a system is necessary. Unfortunately, 100 ground-based interceptors based at a single location will offer only marginal protection against ballistic missile attack. In fact, it would not even cover the entire continental United States. While I support such a limited system as a good starting point, I do not see the utility in making such a system our only deployment effort.

The amendment's ceiling on the Brilliant Pebbles space-based interceptor program precludes development of the most promising technology for countering accidental, unauthorized or terrorist ballistic missile attacks. Brilliant Pebbles could very well turn out to be the most cost effective technology for such a limited protection system, especially if deployed in conjunction with ground-based systems.

The amendment's support for theater missile defense also appears somewhat contradictory. Seemingly, the only theater that the Senators from New Mexico and Alabama do not want to meaningfully defend is the continental United States. I am a firm supporter of theater missile defense, but I do not see how one can support robust defenses for allied territory while limiting protection of the United States to a single limited protection site.

It is probably true that the likelihood of a ballistic missile attack on Israel, for example, is greater today than a Soviet attack on the United States. Given this concern, the Arrow anti-tactical ballistic missile program makes a great deal of sense. I am a firm supported of the Arrow. Earlier this year I wrote to Secretary of Defense Cheney urging him to proceed expeditiously with a follow-on Arrow program and to add funds in fiscal year 1991 for that purpose. I reject the notion, however, that any U.S. ally should be afforded defenses against ballistic missile attack which the American people are denied.

I believe that the Senate would be better served by supporting the Warner amendment on this subject. We do not need to put a ceiling on the theater missile defense portion of the SDI budget in order to ensure the prosperity of these programs. The Arrow and the other theater missile defense programs in this category enjoy full support in the administration. The Warner amendment is a responsible way to express congressional support for these programs without the micromanagement which makes the Bingaman-Shelby amendment so problematic.

I disagree with the notion, which seems to be the underlying philosophy of the Bingaman-Shelby amendment, that there is little utility in a less-than-perfect strategic defense system, except against a very limited accidental launch. Even moderately effective strategic defenses can make a signficant near-term contribution to stability by initiating what promises to become a new United States-Soviet deterrent relationship. Such a relationship, once established, would be stable and enduring; it could be a major component of a new post-cold war international security order. A U.S. strategic defense system would not need to be 100-percent effective against a massive soviet attack to contribute to a stable deterrent. I am struck at how rooted in cold war thinking this assumption is; it assumes that deterrence is solely a function of threatened offensive nuclear retaliation. In fact, by merely complicating the planning of any prospective attacker, Soviet or otherwise, limited ballistic missile defenses, including some form of phase one system, could significantly bolster deterrence.

It is unfair and misleading to judge SDI by a standard that has never been used in evaluating offensive forces. Neither offensive or defensive forces need to have a near-perfect warfighting capability in order to contribute to deterrence. It is thus ironic that many of those who are least critical and de-

manding in judging the deterrent contribution of strategic offensive forces simultaneously set such a high and unreasonable standard for SDI.

In conclusion, Mr. President, let me reiterate that the amendment by the Senators from New Mexico and Alabama sets forth a misleading choice. Near-term deployment of a less-than-perfect strategic defense system would not signal the end of arms control and a breakdown in United States-Soviet relations. To the contrary, such deployments could stabilize a start treaty regime while providing the basis for a cooperative transition to a more defense oriented United States-Soviet relationship. Deployment of a phase one strategic defense system would also not undermine prospects for followon SDI technologies. Without modernization, a strategic defense system would eventually become obsolete. It is thus in the interest of the SDIO and proponents of strategic defense to ensure that research and development on followon components of SDI remain properly funded. I, for one, would not support deployment of phase one at the expense of followon technologies.

Let me also reiterate that this amendment is a gross intrusion into President Bush's formulation of U.S. national security policy. The President has expressed his strong opposition to this amendment and it is likely that its passage would cause this bill to be vetoed.

Finally, Mr. President, let us be clear on what the amendment by the Senators from New Mexico and Alabama would actually do. It would begin to reorient the SDI program toward a research-only project, denying the American people active defenses against ballistic missile attack, a form of protection most already assume they have. Senate approval of this amendment would be the beginning of the end of the stagic defense initiative.

This amendment explicitly rejects the need to create and deploy a strategic defense system. This was the U.S. approach between 1972, with the signing of the ABM Treaty, and 1983, when President Reagan announced the SDI. This amendment would take us back in time to the pre-1983 approach. This was a time when threatening to kill millions of innocent soviet citizens was our primary means of enforcing deterrence. Today we have a real alternative to mutual assured destruction. This amendment, unfortunately, prevents us from finally disposing of this immoral and unnatural form of deterrence. American interests and global security would be better served by encouraging the Soviet Union to move in the direction of a defense and space agreement that codifies a stabilizing and balanced deterrent relationship between the United States and the Soviet Union. I urge my colleagues not to obstruct this process.

Mr. President, in my statement, I have indicated my opposition to the Bingaman-Shelby amendment. It does micromanage a system that needs flexibility. I think in exploring emerging technologies and achieving the breakthoughs we need, we need all the flexibilities we can get.

Second, it places a ceiling on Brilliant Pebbles, which I think precludes, or may preclude, development of one of the most promising and perhaps one of the most needed technologies to deal with the threat we face in the future.

Third, I fear that it is the beginning of the end of exploration of a program that offers the opportunity to finally rid ourselves ultimately of a doctrine that has to be morally reprehensible to all of us, and that is the doctrine of mutually assured destruction. We spend billions, and hundreds of billions of dollars, to perpeturate that system. Obviously we will need it in the future for a number of years, but I hate to turn our back on something that offers a chance to finally rid ourselves of that.

Mr. WALLOP. Mr. President, I yield myself the remainder of the time allocated.

The PRESIDING OFFICER. The Senator is recognized for up to 5 minutes, 15 seconds.

Mr. WALLOP. Mr. President, I ask unanimous consent that a letter from our chief negotiator to the negotiations on nuclear and space arms with the Soviet Union, Ambassador David Smith, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. DELEGATION TO THE NEGOTIATIONS ON NUCLEAR AND SPACE ARMS WITH THE SOVIET UNION,
Geneva, Switzerland, August 3, 1990.

Senator BOB DOLE,
Republican Leader, U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: I am writing to urge you and your Senate colleagues to oppose the Bingaman-Shelby amendment to the Defense Authorization Bill. I know that our SDIO Director, Ambassador Cooper, has already shared with you the debilitating effect this amendment would have on the SDI program. I would like to tell you how this amendment would undercut the United States in the Defense and Space Talks in Geneva.

Our talks are at what I would call the conceptual stage, similar to the negotiations which took place in the early and mid-1980s in START. Then we had to convince the Soviets that Western concepts of deterrence and stability would enhance not just our, but also their security. We are now seeing the fruit of those patient and determined efforts in the emerging START Treaty and in the Joint Statement on Future Negotiations on Nuclear and Space Arms and Further Enhancing Strategic Stability, issued at the Washington Summit in June.

Now, my Geneva negotiating team and I have a similar challenge, this time on the defense side.

We are encouraged by small, but nevertheless real, Soviet steps here at the talks on predictability, or confidence-building measures. We are even more hopeful that the fascinating Soviet public debate on the value of defenses, made possible by glasnost and new thinking, will turn up patches of common ground which we can work to expand here in Geneva. It is clear that a number of knowledgeable Soviets agree that a safer, more stable strategic balance can be achieved by increasing reliance on defenses. This would be for the good of both countries, and a negotiated, cooperative transition to this safer balance may be achievable. This would be the first cooperative transition since the dawn of the nuclear era.

However, I must tell you frankly, our work in Geneva to seek Soviet agreement on ways to strengthen deterrence will be insufficient without a strong SDI program. If the Soviet Union is going to join hands with us in designing this safer world, it must see that it is technologically feasible and that America is determined to get there. This will mean diverting some of the still considerable money, manpower, technology resources, and political commitment the Soviet Union now applies to its extensive strategic offensive nuclear weapons. Only the knowledge that the United States is proceeding with a credible strategic defense program will provide incentive to do this.

If we can expand the footholds of common ground we see emerging, if our SDI program is progressing in accordance with the realistic timeable established by President Bush, there will be an opportunity for success in the Defense and Space Talks. The President's timeable, a realistic schedule for a Phase I deployment, and our proposals here in Geneva would converge to allow time for ample discussion of all relevant issues and negotiation of a cooperative transition. If, however, Secretary Cheney and Ambassador Cooper are prevented from running the SDI program in a way which supports President Bush's plan to make a decision within his first term in office, I see no hope of success at the Geneva talks. I am convinced that the Bingaman-Shelby amendment would constrain the program in a way that can only pull the rug out from under my negotiation team and me.

Best regards,

DAVID J. SMITH,
Chief Negotiator,
Defense and Space Talks.

Mr. WALLOP. Mr. President, I draw to the attention of my colleagues the following statement concluding this letter "I am convinced that the Bingaman-Shelby amendment would constrain the program in a way that can only pull the rug out from under my negotiating team and me."

Mr. President, I further ask unanimous consent on behalf of Senator WARNER that a letter from the President to Senator WARNER with regard to this topic be printed in the RECORD in full.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, DC, August 3, 1990.

Hon. JOHN WARNER,
U.S. Senate,
Washington, DC.

DEAR SENATOR WARNER: I am writing to underscore the importance of the SDI program and express my concern about Congressional action to further cut SDI funds or restrict our ability to manage the program.

When I entered office, I ordered a thorough review of the SDI program—both the progress of its technology and our policy governing it. I concluded that SDI had made tremendous progress toward giving us the technological means to strengthen deterrence through introducing defenses. As the technology matures, we will need to conduct rigorous and realistic tests—consistent with the ABM Treaty—in order to make an informed decision on the feasibility of defenses. To fund these tests I asked for an increased in the SDI budget, even as we faced an overall cut in the Defense budget.

Nonetheless, in marking up the Defense Authorization Bill, the Senate Armed Services Committee has cut almost a billion dollars from my SDI request. The House seems determined to cut more. But a vote to cut SDI below the Senate Armed Services Committee mark will force us to delay critical tests and cancel contracts, and therefore is essentially a vote against strategic defense for America. Some in the Senate are also seeking to manage the SDI program themselves by cutting my request for the most promising SDI technologies. In many ways this is more serious than a funding cut. As Congress imposes cuts in the Defense Budget, at the very least, I need flexiblity to manage our programs. Moreover, it makes little sense to force us to forego realistic tests of promising SDI technologies.

As you and your colleagues consider the Defense Bill, I hope you will take into account the tremendous progress and promise of SDI, and will provide us with the means to manage an effective program. SDI will be among the most important factors in my evaluation of the Defense Authorization Bill.

Sincerely,

GEORGE BUSH.

Mr. WALLOP. Mr. President, let me quote from that letter.

It said: "In many ways this is more serious than a funding cut," speaking of the Bingaman-Shelby amendment—

As Congress imposes cuts in the Defense Budget, at the very least, I need flexibility to manage our programs. Moreover, it makes little sense to force us to forego realistic tests of promising SDI technologies.

As you and your colleagues consider the Defense Bill, I hope you will take into account the tremendous progress and promise of SDI, and will provide us with the means to manage an effective program. SDI will be among the most important factors in my evaluation of the Defense Authorization Bill.

Mr. President, there have been a lot of strawman arguments and other misinformation scattered around and about here. Let me suggest that things have changed since SDI made its determination that phase II would have to be ready before a commitment to phase I, speaking to the remarks of the Senator from Georgia. Phase I is more robust than the phase I architecture of 3 years ago because of Brilliant Pebbles, and it can kill missiles much cheaper. The countermeasure environment is entirely different than it was then. We no longer expect the same countermeasures because of stark constraints in costs. Scientists from Los Alamos also point out that the new neutral particle beam system, not as a weapon but a discrimination sensor, will extend the vitality of Brilliant Pebbles against robust decoys.

I also point out that under START constraints Brilliant Pebbles is cost effectively overaugmented to meet a robust threat. The administration would like to spend more on phase II but Congress once again keeps cutting the funding and keeps denying us this promise.

Mr. President, we are at a crossroads and this debate has illuminated the choice. It is a basic choice as to whether or not the American people will be allowed to reap the harvest of this technology, or whether they will only be allowed to reap the harvest of politics which will create a sort of white collar entitlement fund.

That is where we are. Will we defend with real things to shoot down real missiles that are really in the world, or will we simply continue to do what historically we have done in the past, to get a morsel of meat about to be brought in from the kitchen and instead see it diverted, and get only another bowl of polenta? Will we accept politically arrived at costs, like Senator NUNN's figures of $123 billion, a construct figure that does not reflect the GAO study any more than it reflects the SDI and Department of Defense studies? And if that is the case, and costs are the problem, I say again to my colleagues, why spend anything at all? If we cannot develop and deploy technology why not just abandon it, if we cannot afford it when it comes down here?

The question really is can we afford to survive? The threat is real, and both sides have acknowledged that. We agree. All of us in here agree that Israel deserves and has real need for an ATBM capability as quickly as possible. Mr. President, I agree. But if Israel needs protection, why deny it to the American people when we have both the same right to be defended and the same threat lying on the doorstep.

Would the sponsors simply by way of closing tell the American people why they should be denied a defense and yet why we should help supply Israel with her own defense? The Bingaman-Shelby amendment provides no timetable for U.S. defense. It provides no promise of any concrete technical achievement. It provides no goal, only more study. Once again, on the threshold of technical success, we retreat from doing anything useful.

So history is repeating itself. So long as Congress denies the American people the ability to achieve the harvest of the progress of America's technological investment, so then will the Congress fail the American people in the responsibility which it owes them.

America will suffer, the danger will grow and, only thing that will grow in addition will be a welfare program for hometown constituents. The $400 million taken out of the Phase I architecture goes to the labs of the States of the two sponsors. It is basically nothing more than that—denying us capability, crippling our arms control process, which in fact I state again was the position of Secretaries Shevardnadze and Baker that we need a more stable balance between offenses and defenses.

The PRESIDING OFFICER. All time controlled by the Senator from Wyoming has expired.

Mr. BINGAMAN. I yield 2 minutes to my cosponsor, the Senator from Alabama.

RESPONSE TO COMMENTS

Mr. SHELBY. Mr. President, it is with regret that I respond to the comments of my distinguished colleague from Wyoming, because we have historically been on the same side on SDI debates. However, his comments reflect several misconceptions about the intent and provisions of this amendment, which I feel compelled to clear up.

First, I was opposed to any reduction of the administration's budget request for SDI. However, I receded to the majority view that defense cuts had to be made and that SDI should not be immune to such cuts. In the past, I have managed the floor debate on behalf of the proponents of SDI against attempts to cut back SDI. I believe that my record is clear on this issue.

I agree with the Senator's desire to see the program produce an actual, near-term defense capability. This is why the amendment funds treaty-compliant systems at the requested level and provides almost $50 million in additional funding for theater missile defense systems. The need for the enhancement of our theater missile defense work has never been more clearly demonstrated than by the events of the past few days.

I am concerned that we do not violate the ABM Treaty process. If we develop, test, or deploy a system containing space-based weapons, we clearly violate the treaty; therefore, the amendment calls for deferral of deployment of the Phase I system, containing thousands of space-based brilliant pebbles, and adherence to the restrictions on development and testing of space weapons. Only one ground-based site, with 100 interceptors, is allowed by the treaty, and the amend-

ment supports a deployment of that type.

I know there are those who think the ABM treaty has outlived its's usefulness and it should be scrapped. However, the impending START agreements, and the Soviets have made it clear that violation of the treaty is a basis for their withdrawal from the START agreement. We simply cannot, on the one hand, embrace an impending arms reduction agreement, while, on the other hand we the other hand, we violate an existing arms control treaty.

Adherence to the ABM treaty is a two-way street. Our Government bitterly complained when the Soviets violated the ABM Treaty by building a radar at Kransnoyarsk which did not comply with the provisions of the treaty. It is my understanding that the Soviets have recently indicated a willingness to dismantle the Krasnoyarsk radar, in deference to our repeated objections. Is it reasonable now to violate the ABM Treaty with our space weapons development, after our vociferous complaints about their noncompliance?

I also concur with the Senator's plea to prove out the Brilliant Pebbles concept. The SDI budget allocation we propose supports the development of space systems, including continuing of Brilliant Pebbles development at the same level of effort as the current year. If we refrain from full scale development and deployment of Brilliant Pebbles, in compliance with the ABM Treaty, there is not compelling reason for the large increase in the level of spending on Brilliant Pebbles proposed by the administration. Other SDI space system elements are supported in the amendment at the about the level requested, scaled to the total SDI budget reduction. In fact, SDIO can apply the entire follow-on technology allocation to the space-based laser program if they so desire.

The authors of this amendment do not take a back seat to anyone on the intensity of the consistency of my past support of the SDI program, as my record shows, and we are not now reversing myself on this vital defense program. We have offered this amendment because we sincerely believe that the time has come for a change in the content and direction of the program. The temperature of the cold war has risen dramatically, the threat has diminished, and the pressures for defense budget reductions have become acute. We simply cannot continue to carry out a program which is based on the world situation of 7 years ago, which sets back the arms control process and which costs far more than we can afford over the next several years.

Mr. President, I will be brief. What does this amendment do? It places emphasis on an already mature near-term treaty compliance limited protection system a concept that this body has already endorsed.

Second, we have been talking about theater missile defense, and it places a big emphasis on that.

Third, long-term technology, it has great promise which results in commercial spinoffs.

Fourth, this amendment would fund the balance of the SDI Program with few exceptions at the fiscal 1991 requested level.

The PRESIDING OFFICER. Who yields time?

Mr. BINGAMAN. I yield the remainder of my time to myself.

Mr. President, this debate has posed a very fundamental choice to the Senate today. I think it is a choice about what policy direction we would like to see in the SDI Program. I think it is exactly the kind of decision that Congress is called upon to make.

We have had a very heated, vigorous debate. I think it is a reflection of the fact that here we are discussing the real issue in the SDI Program, not just its funding level but what our intentions are. Senator WALLOP and I, I believe, agree that this fundamental issue has been joined today. If my colleagues support a push to early deployment of a system which would violate the ABM Treaty even in the testing stage, and which would be enormously costly, and have very limited capability to defend this country, then you need to vote against the amendment that the Senator from Alabama and I have proposed today.

If on the other hand my colleagues support a broad-based research program which in the near term focuses on treaty compliant, ground-based defenses, and antitactical missile defenses, and in the long term on potentially far more effective technologies, then you need to support our amendment.

This is not a funding choice. It is policy choice. Congress has every right to make such choices. We need to bring stability and rationality to the SDI program. I believe this amendment does that, Mr. President.

This amendment for the first time will put the Congress on record as favoring a robust research and development program in SDI but opposed to a rush to early deployment of an SDI system.

Mr. President, I yield the remainder of my time to the Senator from Virginia so he can summarize his amendment which will be voted on immediately after ours.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, I ask unanimous consent that the Senator from Virginia be recognized for a period not to exceed 2 minutes.

The PRESIDEING OFFICER. Without objection, it is so ordered.

Mr. WARNER. Mr. President, first I wish to compliment all Senators who participated in this debate which began promptly at 9 a.m. this morning which I think fairly, objectively, and in a very substantive way has addressed those key issues.

The Senator from Virginia initiated the debate this morning with an amendment which will be voted upon immediately following the amendment of the distinguished Senator from New Mexico, and for those who may not have been here at that early hour, I would like to clarify the purpose of this amendment. It was devised many weeks ago as a consequence of the growing feeling of many Senators on both sides of the aisle that the tactical ballistic missile situation, particularly, in the Middle East, was growing with such seriousness that we ought to begin to redirect certain emphasis within the SDIO structure toward resolution of the research and development problems in this area. That is precisely what the amendment does.

But where we dramatically depart from Senator BINGAMAN'S approach is that we repose in the President and his designees—SDIO and the Secretary of Defense—the discretion to allocate those funds which are essential to bring on a more vigorous research and development production of those weapons that provide a deterrence against this frightening threat of tactical ballistic missiles.

Mr. President, I am hopeful that all Senators can join in support of that amendment, and I thank my colleagues from Wyoming for assuming the managment of this side of the aisle of this important amendment.

BINGAMAN-SHELBY AMENDMENT: LIMITING OPTIONS

Mr. DOLE. Mr. President, over the last 72 hours, we have witnessed the bullying tactics of Saddam Hussein—his armed forces brutally rolled over Kuwait, a small country on Iraq's borders. In the near future, however, Iraq could be bullying countries far beyond its borders with ballistic missiles.

Hundreds of ballistic missiles were fired during the Iran-Iraq war. And, as the Senate has heard from the Director of Central Intelligence, between 15 and 20 developing nations, will possess ballistic missile capabilities by the end of the century—add to that efforts by some of the same countries to acquire nuclear and chemical weapons capabilities.

Mr. President, new threats, like this, are developing all around us; the United States must be prepared to meet them.

One of the ways to be prepared is to pursue programs like the SDI Program. And, it seems to me that in an era of declining defense spending, we need to make the most of the money we spend, especially in research and

development areas, like SDI—which are our hedge against new threats. We need to make sure that the money we spend is maximized—that it can be directed toward the most promising areas.

Well, the Bingaman-Shelby amendment would prevent us from maximizing our investment in SDI. It would have the Congress decide what technologies to pursue, and that decision would not be based on technological results, but on other factors, including where that money is spent.

While there are some in the Congress who are not fond of the Pentagon, the Pentagon is clearly more qualified than the Congress to make decisions regarding the progress of technologies and their application to military requirements.

In considering the Bingaman-Shelby amendment, we must also keep in mind the purpose of the SDI Program. It is to provide the President with options so that he can make an informed decision on deployment of strategic defenses by the end of his first term, as is his intention.

The cosponsors of this amendment say that such a Presidential decision on strategic defenses is premature. Well, as we can see so clearly, especially in the last few days, the threats are already there. And, let us not forget that an old threat still exists—the Soviet Union's massive nuclear arsenal. Mr. President, in face of these realities, we can't afford not to fully explore the promise of near-term technologies like Brilliant Pebbles.

Earlier this year, the President said, "In the 1990's, strategic defense makes much more sense than ever before, in my view." He offered three reasons why this is the case: First, strategic defenses contribute to deterrence; second, strategic defenses underlie effective arms control by diminishing the advantages of cheating; and third, strategic defenses can defend us against accidental or unauthorized launches or attacks from many countries that are acquiring ballistic missile capabilities.

I believe we should seriously consider the impact of Bingaman-Shelby on our current arms control efforts. The United States and the Soviet Union are moving toward completion of a START agreement, and are engaged in negotiations on defense and space. Both sides have also agreed to pursue follow-on negotiations on offensive weapons and, on the relationship of offensive and defensive weapons.

I received a letter from the U.S. Ambassador to the defense and space talks, David Smith. In it, Ambassador Smith indicates his strong opposition to the Bingaman-Shelby amendment. In his view, it would undercut the United States in the defense and space talks.

He points out that the talks are in an early, conceptual phase, similar to the early days of START, when we spent a great deal of time to convince the Soviets that our concepts of deterrence and stability would enhance not only United States security but Soviet security as well.

We are now seeing the fruit of our patience in the START talks. And the U.S. delegation to the defense and space talks is beginning to see some progress, too. The United States delegation is encouraged by the small, but real Soviet steps on predictability and confidence-building measures at the defense and space talks. Moreover, they take note that a number of knowledgeable Soviets agree that a safer, more stable strategic balance can be achieved by increasing reliance on defenses.

But Ambassador Smith emphasizes that, "Our work in Geneva to seek Soviet agreement on ways to strengthen deterrence will be insufficient without a strong SDI Program. If the Soviet Union is going to join hands with us in designing this safer world, it must see that it is technologically feasible and that America is determined to get there. If we can expand the footholds of common ground we see emerging, if our SDI Program is progressing in accordance with the realistic timetable established by President Bush, there will be an opportunity for success in the defense and space talks. If, however, Secretary Cheney and Ambassador Cooper are prevented from running the SDI Program in a way which supports President Bush's plan to make a decision within his first term in office, I see no hope of success at the Geneva talks."

Mr. President, in my view, it's not just the United States that has an interest in exploring strategic defenses. The Soviet Union does, too. The United States and the Soviet Union are forging a new relationship. In my view, our shared concern about strategic stability and missile proliferation—which were discussed during the June summit—provide us with an opportunity to work together toward solutions. One obvious and achievable solution is strategic defense.

The President has taken a forward-looking approach. He is trying to prepare the United States—to make us ready to respond to all threats—unannounced or announced. I believe we must assist the President in this effort.

Mr. President, I urge my colleagues to reject the Bingaman-Shelby amendment.

Mr. JEFFORDS. Mr. President, funding for the strategic defense initiative [SDI] is one of the central issues of this defense spending debate. Faced with a serious budget deficit and the possibility of deep cuts in all programs under Gramm-Rudman-Hollings sequestration, we are forced to examine all Federal spending with a very critical eye, approving only those projects that can prove their worth.

I do not believe that the current SDI Program meets this test. The Administration seeks a $1 billion increase over this fiscal year's funding. Nothing that I have seen convinces me that the SDI Program justifies this level of spending. There are much more pressing needs, both at home and abroad. I have voted consistently to cut SDI funding, and the worsening state of the Federal deficit makes it all the more imperative that we persist in our attempts to curtail SDI spending.

I was pleased that the Senate Committee on Armed Services voted to scale back the President's request of $4.7 billion by almost $1 billion. This action was followed by similar action in the House Armed Services Committee, which cut the funding even further. However, I do not believe either committee went far enough. I fully appreciate the necessity of continued research on possible missile defense technologies, particularly those that might protect against a theater missile attack, such as an attack by Iraq or Libya. Yet this type of research can go forward without excessive levels of spending. I would advocate bringing SDI funding down by yet another $1 billion.

We have before us today the Bingaman-Shelby amendment. This amendment leaves SDI funding at $3.57 billion—exactly the level of the committee bill. Instead of cutting the program, this amendment would set limits on how much could be spent within the various categories of SDI research and development. Through this amendment, Congress is telling the researchers what programs it thinks hold the greatest promise instead of allowing the specialists to pursue those areas that seem most productive.

I understand and sympathize with the intent of the authors to emphasize the importance of long-lead research in areas of promise other than Brilliant Pebbles. I share their concern that the SDI Office has disproportionately focused on deployment of a system as soon as possible to the detriment of other areas of research. Maintaining compliance with the ABM Treaty is also critical, and I trust the administration will notify Congress before it contemplates any testing that would violate the strict interpretation of the treaty.

However, let me emphasize that the role of Congress, as I see it, is to set the priorities, to decide how much we can afford to spend on SDI research. We are not physicists, and we are not qualified to evaluate each and every research project and pass judgment on which is likely to show promise down

the road. That is the job of the specialists. I advocate drastically reducing the level of spending, and then allowing the experts to decide how to best utilize those resources in the most productive lines of research. Therefore I must oppose the Bingaman-Shelby amendment.

As our debate continues today, I hope we will have the opportunity to consider amendments to cut the overall spending level for SDI. I intend to support these amendments. And I would hope that in the course of the conference with the other body on this legislation, the overall SDI level will be reduced. Adoption of the Bingaman-Shelby amendment would unfortunately make this more difficult. I would urge the conferees to consider our options for deficit reduction. It will be very difficult to cut $1 billion from health care, from aid to education or from programs to clean up our environment. Yet SDI research can go forward at reduced levels. For the security and health of our Nation, we cannot afford to do otherwise.

Mr. BURNS. Mr. President, I rise in strong opposition to the amendment offered by Senators SHELBY and BINGAMAN to fence funds within the strategic defense initiative program.

Mr. President, recent progress in phase I technologies are showing great promise. The committee's funding recommendation, while far short of the President's request, at least allows for continued research without onerous fences. I would like to associate myself with the minority views of certain Armed Services Committee members—Senators THURMOND, MCCAIN, GORTON, WILSON, WALLOP, WARNER, LOTT, and COATS—in disagreeing with the committee report language which criticizes SDIO's emphasis on research and development for phase I of SDI. However, I do agree with the committee's decision to stop short of restricting the use of the funds provided in this bill.

Very recent world events as well as the events of the past year clearly demonstrate the need for an immediately deployable space shield. The actions of Iraqi President Saddam Hussein in the past 48 hours are even more alarming when one considers that Iraq has already deployed medium-range ballistic missiles. Seven other developing countries now deploy shorter range ballistic missiles, and Secretary Cheney has testified that 15 such countries will produce ballistic missiles by the year 2000.

As Saddam Hussein has demonstrated, many of the leaders of these countries are not hesitant to enter into armed conflict. Once a conflict begins, no one can say to what level it will escalate. I believe that I speak for the majority of Americans when I say that our country should be protected from a possible attack from an ignorant person like Hussein.

In addition, while the threat of an allout attack on our country by the Soviet Union has diminished, the internal unrest in that country increases the possibility that nuclear missiles could fall into the wrong hands. And, of course, the threat of an accidental launch from a number of sources still remains.

It is for these reasons that I support a robust research and development effort on phase I systems. The latest development, the Brilliant Pebbles system, is truly amazing. Mr. President, I ask unanimous consent that an article entitled "Brilliant Pebbles: Amazing New Missile Killer" which appeared in the September 1989 Reader's Digest be printed in the RECORD immediately following my remarks. This article describes the birth of Brilliant Pebbles.

The PRESIDING OFFICER, Without objection, it is so ordered.

(See exhibit 1.)

Mr. BURNS. Mr. President, when Brilliant Pebbles first emerged from the Lawrence Livermore Laboratory, it was described as a promising new development for the SDI Program. Since that time, Brilliant Pebbles has far surpassed many people's expectation.

Brilliant Pebbles would consist of thousands of very small satellites circling the planet—enough to provide accidental or unauthorized launch protection. Each Pebble is about the size of a golf bag and consists only of miniature computers with which to make its own targeting decisions; communications gear; a wide angle camera, or eyes, and tiny rocket motors. The Pebble has no warhead. It does its job by homing in on the rocket plume of an enemy's incoming missile and then destroying it by colliding with it.

Brilliant Pebbles is not only amazing, it is affordable. The most recent estimates show that a phase I system using Brilliant Pebbles could be deployed for approximately $55 billion. This is a savings of $14 billion over previous phase I estimates.

SDIO began testing the components of Brilliant Pebbles this summer. On July 24—just last week—they successfully demonstrated the Pebbles capability to acquire and track an object. During the test, which was a part of the Space Based Interceptor [SBI] program, an SBI test model demonstrated its ability to acquire and track a target moving across the sky using its infrared sensors. This technology has direct application to Brilliant Pebbles.

Mr. President, this is clearly not the time to begin micromanaging the SDI Program. World events as well as technological advances prove that the time to go forward on our current course is now.

I urge my colleagues to vote against this amendment and to afford the American people a chance to be protected from the likes of Saddam Hussein.

EXHIBIT 1

BRILLIANT PEBBLES—AMAZING NEW MISSILE KILLER

(By Ralph Kinney Bennett)

(They are terrifying giants up to 115 feet tall. They could hurl clusters of nuclear weapons down on our undefended cities with less than 30 minutes' warning. Only an uneasy balance between these Soviet intercontinental ballistic missiles and our own has held these beasts at bay. ICBMs have always been thought too fast, formidable and numerous to defend against. But now a tiny, ingenious device is at hand. A triumph of old-fashioned physics and modern microelectronics, "Brilliant Pebbles" holds the promise of a low-cost, highly effective defense against ICBMs, and it could be in production early in the coming decade. Here is how it came to be.)

One morning in November 1986, Lowell Wood, a bear-like, bearded expert in high-energy physics at the Lawrence Livermore National Laboratory, was arguing at breakfast with Greg Canavan, an advanced-weapons specialist from the Los Alamos National Laboratory. Their conversation touched on one of the sharpest controversies surrounding SDI, the Strategic Defense Initiative: If you put something in space to defend against Soviet ICBMs, how do you ensure the device's survival? Haven't you just created another vulnerable target?

The question was particularly critical for Wood and Canavan. Both had been devoted to the idea that destroying a skyful of Soviet ICBMs and warheads would require exotic and expensive means—lasers or particle-beam weapons that could obliterate ICBMs from afar. This could mean hanging lots of hardware in orbit. Even more conventional "smart rocks," which could collide with ICBMs in their flight paths, would be parked in orbiting "garages" and guided to their targets by surveillance and battle-management satellites—all visible and inviting targets.

Canavan had become an expert in the various methods of defending an orbiting device against attack: shielding, maneuverability, decoys, electronic jamming and defensive armament. Some of the best technical minds in SDI were incorporating part of all of these elements into proposed systems, But, as Canavan reminded Wood, their efforts were resulting in hardware being too big and too expensive.

It was time for some fresh thinking, and Canavan had a suggestion for Wood that was breathtakingly new. For the first layer of defense, create a special kind of smart-rock missile so intelligent that it could operate on its own, but so small it would be hard to detect and so cheap it wouldn't be worth a Soviet effort to go after it. "Make it too cheap to shoot," said Canavan. Wood, however, who moved in the rarified air of directed-energy weapons, found smart rocks slow and clumsy compared to lasers. Joking about their size, he called them "telephone poles with engines the size of Volkswagens bolted to their ends."

"But you can make them much smaller," Canavan said, mentioning rapid advances in miniaturized electronics, lighter structural materials, smaller, more efficient rockets. And since lifting things into orbit costs $2000 to $5000 a pound, smaller meant cheaper.

Both men knew that such a missile didn't have to be large to kill. A smart rock would be orbiting at five miles a second. (A high velocity rifle bullet travels about a half-mile a second.) An ICBM might be traveling at as much as four miles a second. In a collision at that speed, something the size and weight of a saltshaker would utterly destroy a huge ICBM.

The problem was the size of the parts required to get the smart rock up there and maneuver it. The device needed good eyes to find an ICBM, a computer brain to judge what it saw and rocket motors to move it toward a collision. "You'd have to reduce these by more than 90 percent," Wood told Canavan.

Canavan argued that not only could this be done, but recent advances in miniaturization might make it possible with technology already "on the shelf." "You've been doing this exotic beam-weapon stuff so long," he told Wood "you don't realize the strides being made in other areas."

Wood still doubted Canavan but he listened and took notes furiously. He left the breakfast determined to master the world of interceptor missiles—if only to prove his friend wrong.

Amazing Devices. Because of his work in beam weapons, Wood reported to SDI's Directed Energy Office, headed by Jack Hammond, a quiet, good-humored man who had recently transferred from the Kinetic Energy Office. There Hammond had supervised work on smart-rock technology, ranging from huge electromagnetic "cannons" to the Space-Based Interceptor, a program involving anti-ICBM missiles parked in the orbiting garages.

Hammond told Wood that he thought Canavan might be right about the potential for miniaturization. Lt. Gen. James Abrahamson, then head of SDI, had ignited a wide range of work on new, lighter, stronger, smaller, simpler and more reliable hardware. Abrahamson also preached a gospel of affordability. The sway of the ICBM could only be broken, the general believed, when it became cheaper and easier to shoot down the missiles than to build them.

Wood found himself more and more preoccupied with the challenge of small smart rocks. Browsing through America's vast technological marketplace with a new awareness, Wood discoverd surprises at every hand. He remembered rocket motors the size of garbage cans that cost $150,000 each. But SDI had developed $20,000 motors he could hold in the palm of his hand. And because of advances in such areas as electrical valves, these motors could turn off and on in thousandths of a second, a hundred times faster than he had thought feasible. That meant a vehicle could be made nimble enough to engage an object flying at five miles a second.

Wood found over-the-counter silicon chips the size of a fingernail that were able to perform up to 30 million calculations per second. He also discovered an infrared detector chip that enabled a camera to "see" in utter darkness. Such cameras were already being sold for civilian use as electronic night watchmen. There were book-sized video cameras reproducing imagery superior to that from military systems costing thousands of times more. Technology was everywhere, just begging for creative adaptation.

Wood began preparing a concept paper for a smart rock to top all smart rocks. He started with its eyes. A colleague at Livermore had already developed a camera with a tiny electronic retina and a fish-eye lens that gave extraordinarily sharp images over a wide field of view. It could be scaled down to the size of a human eyeball. When equipped with infrared and ultraviolet sensors, it could see despite darkness and clouds.

Wood also had ambitious plans for the vehicle's brain, a tiny computer that had to be programmed to discriminate between ICBMs and, for instance, a harmless scientific rocket. It would know the location of every ICBM silo in the Soviet Union and the launch signatures of mobile ICBMs. Launches heading north toward the United States or toward its allies would attract its particular attention. It would be able to track the ICBMs, pick one out and steer toward it on a collision course. Like a fielder calling for a fly ball, it would also know to disregard an ICBM already singled out by another interceptor.

Such ability required a computer on a par with the CRAY 1, the world's standard in ultra-high performance. But a Cray was about the size of a refrigerator and weighed about 4½ tons. Nevertheless, experts at the lab told Wood, with new chips and new ways of wiring them together, they could give him a "Cray in a can"—a brain able to "think"as fast as 60 million calculations per second, yet small enough to fit easily in a soft-drink can.

The true genius of the device Wood envisioned lay not just in its reduced size, but in its breathtaking versatility. It would not require big tracking satellites to pick its target or a garage to house it. It could patrol its orbit 300 miles above Earth on its own.

When the legendary co-founder of Livermore, Edward Teller, heard about Wood's new interest, he was skeptical. He, too, had been committed to exotic weapons, so he summoned Wood to explain himself. This Wood did so convincingly that Teller became an advocate and agreed to talk to General Abrahamson about it.

Technological Dream. One morning in October 1987, Wood and Teller arrived at General Abrahamson's office in the SDI complex at the Pentagon. Word had spread that one of the "exotic weapons boys" had switched allegiance to smart rocks.

Abrahmason listened for more than an hour as the two made the case for an odd-looking device not much bigger than a golf-club bag. It would be extraordinarily agile and have sophisticated eyes and brains. Abrahamson found the idea "extremely interesting" and said he would visit Livermore soon to study it in detail.

A few weeks later, a year almost to the day from their first breakfast discussion, Canavan and Wood met again. From one of two bulging briefcases, Wood pulled a complete bluprint of his device. Then, like a jeweler displayng his most exquisite pieces, he laid out tiny items of high-tech hardware, including a miniature gyroscope and one of the fish-eye cameras, which together could have fit into the sugar bowl. He produced price lists, bids from contractors and simulations of how the smart-rock missile would perform.

Canavan as amazed: "Lowell had convincingly demonstrated that with some new thinking you could go to the technology shelf and put together a formidable device along the lines we had only dreamed about."

General Abrahamson and Jack Hammond arrived at Livermore the day before Thanksgiving 1987. They watched computer simulations, examined hardware, talked with scientists and grilled Wood and his people far into the night.

Abrahamson left Livermore a believer. It was the kind of energetic, innovative thinking he loved. He told Hammond, who had already begun low-level funding, to substantially increase funding—to push this amazing new smart rock toward reality. By the following spring, it had become an important potential building block of a strategic-defense system.

On March 13, 1988, at a conference marking the fifth anniversary of SDI, Lowell Wood spoke about smart rocks and their "evolution into brilliant pebbles," small, independently targeted interceptor missiles. The name *Brilliant Pebbles* was firmly attached to the project.

Because so few details have been made public, Brilliant Pebbles has been plagued by misinformation in the press, a lot of it the result of sniping from military officers and contractors with a vested interest in systems the small missiles would replace. Yet the Pentagon is spending $46 million this year for further research on Wood's device, a tribute to the hopes it holds for the missile killer.

The Greatest Challenge. Four major, independent studies of the system are under way. Wood's team continues to modify the missile to meet new conditions. Although capable of it, the pebbles will not operate with absolute autonomy, but will be under constant control of the U.S. Space Command on the ground.

Because their eyes are so versatile, they will be able to perform routine peacetime surveillance functions. To save weight, Wood and his colleagues have minimized the framework. The device now consists only of its rocket motors, fuel tanks, eyes, communications and navigation devices—stitched together principally by its plumbing. Improvements in the field are coming so swiftly that Wood and his team have not frozen the Pebbles' computer in its final design. It is growing smarter and smaller.

Every component of the device is being rigorously tested in experiments simulating the hostile atmosphere of space and the spectrum of possible Soviet threats: electromagnetic pulse, gamma rays, X rays, neutrons, laser beams. Wood is confident that his pebble will pass muster. In any event, Brilliant Pebbles' use of existing high technology may have changed the whole complexion of strategic-defense development. It means we can put the essentials of a defense in place within a few years, then add more exotic means, such as particle-beam weapons, later.

Indeed, the greatest challenge to Brilliant Pebbles may be political. Wood believes that the missiles can be deployed for approximately $330,000 each. The final cost will depend upon the number deployed—current estimates are from 3000 to 10,000. The feasibility and cost effectiveness of the device bring everything down to one quesiton: where there's a way, do we have the will?

SDI SUPPORTS US ALL

Mr. HOLLINGS. Mr. President, I rise today to talk in support of the strategic defense initiative and in strong opposition to the Bingaman-Shelby amendment. We are now beginning to realize the benefits of a dedicated strategic research program. This one, like the "race to the Moon" in the 1960's, is having spinoffs that will benefit all our lives for years to come. It is also bringing us to the point of being able to deter the threat of a current-day strategic Armageddon. Now is not

the time to pull the rug out from under the research and development efforts that will secure our strategic safety for the foreseeable future. If the authors of this bill want to be program managers, they should work for the Department of Defense. We, as legislators, must ensure that the professionals of the executive department are given the support and flexibility to pursue science and systems in our best interests.

The strategic defense initiative, SDI, is the source of our new developments and the promise of many more. We are not talking about just defending against a massive ballistic missile attack from the Soviet Union. The technology that is being developed in order to defend us, and, please note, our allies as well, from Soviet strategic attack is also bringing to our country and the world new technologies which have direct and important impact on our everyday lives. I do not mean to downplay the importance of strategic defense. It is an important and critical component in our national defense. Supporting the objective of defending our Nation from strategic attack is this body's solemn responsibility. But there is much more benefit to SDI than just the defense against an attack we hope will never come. Let me discuss both the strategic benefits as well as the civilian spinoff benefits of this program.

Let us look at the original and basic reason for having a strategic defense initiative. We need to develop a means to protect our Nation and, if necessary, those of our allies, from massive strategic ballistic missile attack. And we are close to a solution for that defense. The Brilliant Pebbles Program of SDI, coupled with its ground-based components, can provide a comprehensive defense umbrella against incoming ballistic missile warheads. Many now say that we do not need this kind of protection any more because the Soviets are now our friends. They are good guys and we do not need to defend ourselves against our friends. I am pleased with the developments in the Soviet Union and hope their country's development of democracy grows and succeeds. But we have absolutely no evidence that they are reducing their strategic weapons arsenal. In fact, Soviet strategic modernization continues in a "business as usual" fashion. We can hope for the best and wish them well, but the reality has not changed the fact that they can still destroy all we are and all we believe in. And they are continuing to develop better and better systems with which to wreak that destruction.

But let us give the Soviets the benefit of the doubt. Who, then, do we need to defend against? It is becoming trite in the newspapers and other national defense discussions, but the emerging nations of the Third World are not without danger to the things in which we believe. The problems are simple: nuclear weapons are relatively easy to build; the delivery systems for those weapons are easy to acquire on today's open weapons market. The biggest difficulty with the proliferation of these types of weapons to countries such as Libya, Iraq, others in the Middle East and some in South America is that those countries do not have the same maturity in recognizing what a weapon of mass destruction can do. We, the Soviets, the British, the French, and the Chinese have had nuclear weapons and their delivery vehicles for decades. But we are sufficiently aware of their destructive power and we are sufficiently concerned about our fellow man that we would never indiscriminately use these weapons. After what we have just seen this week, could you say the same for a country such as Iraq? It is the greater threat that is posed by small, partially developed countries with highly sophisticated weapons that they are not hesitant to use. That is what a limited deployment of the same Brilliant Pebbles system can protect us from.

So. We have a continuing need for strategic defense against the largest nuclear arsenal in the world. We have a real world requirement to defend ourselves against irrational weapons use by Third World countries. And SDI is providing us the solution to those requirements. And what is happening in the meantime? In developing the highly sophisticated technology necessary to provide our strategic defense, that same technology is being transferred into our civilian economy to make life better for all of us. Remember the 1960's when we dedicated so much effort to get to the Moon? Many people asked "Why?" But while we were working for that goal, we developed the things that brought us pocket calculators, instant-developing films and cameras such as the Polaroid, microwave ovens, small stereo radio systems, and, based on that beginning technology, recently we have gotten cellular phones, other high-speed and high-quality communications, compact disks, and better weather prediction. And today? Well, after the pocket calculator that revolutionized the 1970's, the SDI Program has now developed the computing capability to put the most powerful computer in the world in the palm of your hand. And that means we can improve, cost effectively, everything in our lives on which we depend which use computers. We're already seeing things like composite computer/wristwatches, personal computers, automobile computerized ignition control, VCR's, and anything like TV's, answering machines, cameras, and security systems that are programmable. And what about the medical field? The 1960's space program brought us electrocardiograms and electroencephalographs, as well as other means of monitoring and measuring the performance of our bodies and helping in the cures of diseases. Now, with the technologies being developed by SDI, we are revolutionizing the field of burn treatment and skin grafts and the basic image processing involved with X rays and many other medical procedures where the results are presented on film or in some kind of image.

We have a great opportunity here. This is a defense program that not only can provide advantages to our Nation's security but it can also give great benefit to every person in this country every day. This is the kind of effort that improves and increases our technological knowledge and capabilities in a world where it is getting harder and harder to compete. This is something that is good for all of us. We cannot afford to leave the scientific advances we have already paid for untested. We cannot afford to take away the flexibility of our scientific and engineering professionals in developing and providing systems that will provide for our strategic protection and our technological advance. We cannot afford to be program managers when we are here to give guidance and authority to the executive branch professionals we pay to be the technical experts and developers of our future. We need the SDI Program to proceed as it has and we need the flexibility to be able to make a deployment decision on a defensive system which we will need more and more in the future. I urge my colleagues to support the strategic defense initiative as presented in the Defense authorization bill and defeat the Bingaman-Shelby amendment.

The PRESIDING OFFICER. All time has expired.

Mr. SHELBY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. WARNER. Mr. President, at this time I ask for the yeas and nays on the Warner amendment which will immediately follow, not to exceed 10 minutes.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

VOTE ON AMENDMENT NO. 2588

The PRESIDING OFFICER. The yeas and nays having been ordered, the question is on agreeing to the amendment of the Senators from New Mexico and Alabama.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado [Mr. WIRTH] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Alaska [Mr. MURKOWSKI] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 55, nays 43, as follows:

[Rollcall Vote No. 223 Leg.]

YEAS—55

Adams	Domenici	Lieberman
Akaka	Exon	Metzenbaum
Baucus	Ford	Mikulski
Bentsen	Fowler	Mitchell
Biden	Glenn	Moynihan
Bingaman	Gore	Nunn
Boren	Graham	Pryor
Bradley	Harkin	Reid
Breaux	Hatfield	Riegle
Bryan	Heflin	Robb
Bumpers	Inouye	Rockefeller
Burdick	Johnston	Sanford
Byrd	Kennedy	Sarbanes
Conrad	Kerrey	Sasser
Cranston	Kerry	Shelby
Daschle	Kohl	Simon
DeConcini	Lautenberg	Simpson
Dixon	Leahy	
Dodd	Levin	

NAYS—43

Armstrong	Grassley	Nickles
Bond	Hatch	Packwood
Boschwitz	Heinz	Pell
Burns	Helms	Pressler
Chafee	Hollings	Roth
Coats	Humphrey	Rudman
Cochran	Jeffords	Specter
Cohen	Kassebaum	Stevens
D'Amato	Kasten	Symms
Danforth	Lott	Thurmond
Dole	Lugar	Wallop
Durenberger	Mack	Warner
Garn	McCain	Wilson
Gorton	McClure	
Gramm	McConnell	

NOT VOTING—2

Murkowski	Wirth

So the amendment (No. 2588) was agreed to.

Mr. SHELBY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, in order to save time and reduce the length of consideration of the remaining amendments from that contained in the existing order, I am about to propound a unanimous-consent request. The sponsors of the remaining amendments have agreed to reduce significantly the time for consideration of their amendments.

I ask unanimous consent that, following the disposition of the Warner amendment, Senator BUMPERS be recognized to offer his amendment, with 20 minutes of debate thereon, equally divided in the usual form; with no amendments or motions to commit in order; and upon the using or yielding back of time, the vote will occur on that amendment.

Further, that, immediately following the disposition of the Bumpers amendment, Senator KERRY of Massachusetts be recognized to offer an amendment on behalf of himself and Senator HARKIN; that on the Kerry-Harkin amendment, there be 45 minutes of debate, equally divided in the usual form, with no second-degree amendments or motions to commit in order; and that immediately upon the use or yielding back of that time, the Senate proceed without any intervening action to vote on or in relation to the Kerry-Harkin amendment.

The PRESIDING OFFICER. Is there objection? Without objection, that will be the order of the Senate.

Mr. BUMPERS. Mr. President, will the majority leader yield for a question?

Mr. MITCHELL. I yield.

Mr. BUMPERS. I have not discussed the two amendments: mine, and Senator HARKINS' and Senator KERRY's. I think we have tentatively agreed to reverse positions. I will go first.

Mr. MITCHELL. That is the request I made.

Mr. BUMPERS. I am sorry.

Mr. MITCHELL. I also modify my request that the vote on the Bumpers amendment be on or in relation to the amendment.

The PRESIDING OFFICER. Is there objection to the modification by the majority leader? If not, that will be the order of the Senate.

VOTE ON AMENDMENT NO. 2587

The PRESIDING OFFICER. Under the previous order, the question is on agreeing to the Warner amendment, No. 2587.

The yeas and nays have been ordered.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado [Mr. WIRTH] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from Alaska [Mr. MURKOWSKI] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 96, nays 2, as follows:

[Rollcall Vote No. 224 Leg.]

YEAS—96

Adams	Cohen	Gramm
Akaka	Conrad	Grassley
Armstrong	Cranston	Harkin
Baucus	D'Amato	Hatch
Bentsen	Danforth	Heflin
Biden	Daschle	Heinz
Bingaman	DeConcini	Helms
Bond	Dixon	Hollings
Boren	Dodd	Humphrey
Boschwitz	Dole	Inouye
Bradley	Domenici	Jeffords
Breaux	Durenberger	Johnston
Bryan	Exon	Kassebaum
Bumpers	Ford	Kasten
Burdick	Fowler	Kennedy
Burns	Garn	Kerrey
Byrd	Glenn	Kerry
Chafee	Gore	Kohl
Coats	Gorton	Lautenberg
Cochran	Graham	Leahy
Levin	Nickles	Sanford
Lieberman	Nunn	Sarbanes
Lott	Packwood	Sasser
Lugar	Pell	Shelby
Mack	Pressler	Simon
McCain	Pryor	Specter
McClure	Reid	Stevens
McConnell	Riegle	Symms
Metzenbaum	Robb	Thurmond
Mikulski	Rockefeller	Wallop
Mitchell	Roth	Warner
Moynihan	Rudman	Wilson

NAYS—2

Hatfield	Simpson

NOT VOTING—2

Murkowski	Wirth

So the amendment (No. 2587) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CHANGE OF VOTE

Mr. AKAKA. Mr. President, I ask unanimous consent that my vote be changed from "no" to "aye" on the last vote, and it will not affect the outcome of that vote.

Mr. WARNER. Mr. President, there is no objection on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The forgoing tally has been corrected to reflect the above order.)

CORRECTION OF VOTE

(Subsequently the following occurred.)

Mr. SIMPSON. Mr. President, on the vote preceding the last rollcall vote, I was recorded in the affirmative. That is not correct.

The PRESIDING OFFICER. The Bingaman amendment.

Mr. SIMPSON. That is not correct.

The table of the Secretary of our party records a negative vote, which is what I recorded.

I ask unanimous consent that the official record be corrected to indicate that I voted in the negative on that amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wyoming will be recorded as a negative vote on the Bingaman amendment.

Mr. SIMPSON. That does not change the result of the vote.

I thank my colleagues very much for that consideration.

(The foregoing tally has been corrected to reflect the above order.)

The PRESIDING OFFICER. The chair recognizes the majority leader, Senator MITCHELL.

Mr. MITCHELL. Mr. President, if I might have the attention of the manager? It is my understanding that the authors of the remaining two amendments have agreed to permit the votes to be stacked. Is that correct?

Mr. NUNN. That is my understanding.

Mr. MITCHELL. Mr. President, I ask that the previous order be modified, so that the vote on the Bumpers amendment occur at the conclusion of the debate on the Kerry-Harkin amendment and that, immediately following the vote on the Bumpers amendment, the Senate proceed without any intervening action or debate to vote on the Kerry-Harkin amendment and that the second vote be a 10-minute vote and that the vote be on or in relation to both amendments, and that the second vote be a 10-minute vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order the Senator from Arkansas is recognized.

AMENDMENT NO. 2589

(Purpose: To reduce funding for the strategic defense initiative.)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] for himself, Mr. JEFFORDS, and Mr. GLENN), proposes an amendment numbered 2589.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

Notwithstanding any other provisions of this Act, the funds authorized to be appropriated for fiscal year 1991 for the use of the Armed Forces for research, development, test, and evaluation for the Defense Agencies shall not exceed $8,643,293,000; of the amounts appropriated pursuant to section 201 or otherwise made available to the Department of Defense for research, development, test and evaluation, for the Strategic Defense Initiative,

(1) not more than $143,500,000 may be obligated for the ground-based radar, space-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $142,000,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $641,200,000 may be obligated for other phase I programs;

(5) not more than $840,200,000 may be obligated for follow-on technologies programs;

(6) not more than $284,700,000 may be obligated for key technologies activities;

(7) not more than $227,900,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and,

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

Mr. BUMPERS. Mr. President, I agreed to a 20-minute time agreement equally divided. Mr. President, could we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order. The Senator from Arkansas has the floor.

Mr. BUMPERS. Mr. President, I think everybody by now has probably heard about all they want to hear about SDI. I do not know that I can make much of a contribution to the debate that has already occurred. But I want to start off by saying, Mr. President, it is dismaying that this body—and this is true of the Congress in general—still has not come to grips with the tough choices. We have been postponing it; we have been putting it off.

As I said yesterday, what we are trying to do is not unilaterally disarm. If the Russians did not come and get us for $306 billion, they are probably not going to come for $296 billion, and we have to put some sense into the deficit.

One of the reasons my amendment cuts $594 million out of SDI and does not put it anyplace else is because—I have always believed and I believe to this minute—the No. 1 problem facing the Nation is our deficit, and the stock market believes it.

Saddam Hussein took the stock market down some, but the market was headed south. The deficit, the unemployment figures were all ominous because of the deficit.

In this entire $295 billion or $296 billion authorization bill, I ask my colleagues: Where can you save the most money and do the least damage to our defense posture? I thought the battleships were an ideal place. There are a few other places. I am going to vote for the Osprey. I have been a strong supporter of the Trident submarine, the most invulnerable strategic weapon we have. I have been an ardent supporter of the Navy's D-5 ballistic missile and a lot of the other programs, particularly conventional weapons.

But, Mr. President, I agree with the distinguished chairman of the Armed Services Committee. He was quoted in the Washington Post. Senator NUNN told the Washington Post in February of this year:

I just see the Brilliant Pebbles Program as a program in some kind of search of rationale and the rationale has not been supplied by anybody.

How can you beat that from the chairman of the Armed Services Committee? Even our Vice President in California said, when the President talked about a shield over America, that was just political jargon. He said, "President Reagan talked about this impenetrable shield that was going to be completely leakproof. I believe in the semantics of, let us say, political jargon, that that was acceptable, but clearly was stretching the capability of a strategic defense system."

Mr. President, phase I, the deployment of these missiles, Brilliant Pebbles, some people called them stupid pebbles. But let me give my colleagues a couple of other quotes. Just listen to this: "Brilliant Pebbles which didn't even exist in mid 1988"—did not even exist 2 years ago—"and was first hinted at to the Congress in late 1988, is now the centerpiece of phase I." This is the same Brilliant Pebbles that General Monahan called not even a weapon, just a concept. General Monahan called it just a concept 1 year ago.

Mr. President, I do not know whether I am going to support the Harkin amendment after my amendment or not. I might. But one of the things I feel strongly about is that this $600 million that I am cutting goes to deficit reduction. If the Appropriations Committee and this body wants to do something with that $600 million savings later, fine. But we do not have to make that choice today.

GAO says that SDI is being driven by an artificial timetable. The current schedule is unrealistic and one reason is because design continues to change.

Mr. President, I think one of the most brilliant chairmen of the Joint Chiefs of Staff we ever had in this country was Adm. Bill Crowe, who retired not too long ago. Bill Crowe said of this SDI Program, $3 billion is plenty and it ought to go for research. How can we justify putting over a billion dollars into phase I of SDI, when everybody knows, everybody knows that is a shifting sand.

It may be Brilliant Pebbles now; next week it may be something else. We have not decided, not only on Brilliant Pebbles, but we have not decided in the follow-on system to it. And, as my good friend and distinguished colleague from Georgia said in his speech this morning—I forget who it was who testified before his committee—it would be folly in the extreme to proceed with phase I without a follow-on. How are you going to do phase I without a follow-on?

Mr. President, what I want everybody to understand here is the argument that is going to be made by the distinguished floor managers in opposition to this amendment. I have heard it made here on every defense bill time and time again.

Mr. President, the House has put $2.9 billion in here, and when their bill reaches the House floor, they'll probably lower it more, to about $2.2 billion. I certainly hope so. The Armed Services Committee has put $3.7 billion. And the argument is going to be,

"well, we're probably going to wind up at about $3 billion. We have to give to the House, and they have to give to us, and we will wind up with $3 billion."

I say that it is the responsibility and the duty of the Senators not to worry about what the House figure is, not to worry about where the conference is likely to land. Our responsibility is to put the amount of money in SDI that we think is responsible and reasonable and will keep the research going. I say let's keep it going at about the level Bill Crowe says makes some sense.

So do not buy into what the conference is likely to do. Vote for what my colleagues think we ought to do. There are very few people here who believe that $3.7 billion is the right figure.

How much time do I have remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 2 minutes 47 seconds.

Mr. BUMPERS. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. EXON. Mr. President, I yield myself 3 minutes.

Mr. President, the Senator from Arkansas knows that I have been with him on several of the votes that he has offered on the defense authorization bill. The Senator from Arkansas played a very key role on the Appropriations Committee. Sometimes we see eye to eye. We certainly did on the battleship issue. We have seen eye to eye on other matters.

I rise in opposition, in the strongest possible opposition, to the suggestions made by the Senator from Arkansas on the SDI program. The Armed Services Committee has looked at this program in great detail. We have already cut $1 billion off of the request of the President. The figure that is in this bill is $3.57 billion. The House of Representatives at the present time has authorized $2.8 billion, and there is talk that is going to be taken down to 2 or 2.2 on the floor of the House of Representatives.

It seems to me that, after looking at the amendment that we just passed a few moments ago that was introduced by the Senator from New Mexico, the question about Brilliant Pebbles that the Senator from Arkansas raised was basically addressed in that matter.

The chairman of the committee, Senator NUNN, can speak for himself. There are those of us that have some reservations about Brilliant Pebbles.

I hope that the Senator from Arkansas will take a look at what we did in the amendment offered by the Senator from New Mexico to address that problem.

I agree with the Senator from Arkansas that the total shield that was promoted originally on the SDI was a farce, a sham. But those of us who have primary responsibility in this area recognize that at this time. It seems to me that we eventually are going to end up at an SDI authorization level when we get through with the House in conference somewhere around the $3 billion figure, which is a substantial cut below last year.

There are some promising programs in parts of SDI. It is going to be cut back dramatically.

I appeal to the Senate not to accept the amendment offered by the Senator from Arkansas because it would place us in an extremely difficult position as we go into conference with the House of Representatives.

I reserve the remainder of my time.

I yield 1 minute to the Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama is recognized for 1 minute.

Mr. HEFLIN. Mr. President, I rise in opposition to the amendments by Senators KERRY and BUMPERS to reduce the funding for the Strategic Defense Initiative Program. In my judgment, these amendments are ill-advised at a time when the United States is making significant progress in a program that will enhance the security of our Nation and our allies, provide a hedge against a Soviet breakout of the ABM treaty, and protect us from the growing Third World threat. As I have said many times before this body, SDI represents a welcome shift in our strategic policy from one which relies upon mutual assured destruction for deterrence to one based upon a commitment to self defense. The effect of these amendments would be to gut many of the existing projects now ongoing within the SDI organization.

The administration requested $4.7 billion in its 1991 defense budget for SDI in order to build upon the 1990 program. The Armed Services Committee has already seen fit to cut the program to $3.6 billion. I believe this is the minmum acceptable funding for SDI if we are to continue the intensive research already begun in many defense technologies.

Thus far, SDI has taken a balanced approach toward ballistic missile defense by stepping up the pace of research on advanced, long range defense concepts, such as directed energy devices, while continuing work on more mature, nearer term BMD concepts. This is an approach I have advocated since the inception of SDI. The United States must maintain the option of deploying an accidental launch protection system of relatively mature technology within a decade. This is an appropriate response to the ongoing and extensive Soviet anti-ballistic effort. The Soviet Union has constructed an ABM system around Moscow. They are also engaged in extensive research on lasers and neutral particle beams for strategic defense.

The ability to respond to unforseen national and international developments quickly and effectively constitutes one of the greatest reasons for pursuing SDI research. Since its inception, the program has achieved a series of remarkable successes. If we are to maintain this momentum, it is essential that the Senate support the Armed Services Committee funding recommendations.

Critics of the SDI program argue that it constitutes a breech by the United States of the ABM treaty. In my opinion, and that of many experts, this charge is totally unfounded. The ABM treaty places limitations on deployment of an ABM system and prohibits development, testing, and deployment of space-based, sea-based, air-based and mobile land-based ABM systems and components. SDI does not include development or testing inconsistent with the treaty. No decision on full scale development or deployment of the system has been made, and no decision will be made until we know the results of the research now underway. Nothing in the ABM treaty prohibits this type of research.

A second criticism leveled at the SDI program is that it will prove both destabilizing and provocative. In my judgment, development of a strategic defense system would only accelerate and guarantee a nuclear ballistic missile disarmament. If these new technologies do prove feasible and a defense system can be both cost effective and survivable, it will ultimately increase a potential attackers' uncertainty about the likelihood of a successful attack, which would enhance deterrence. If each side neutralizes the others offensive ICBM capability, the threat of ICBM's must be reduced. The United States must pursue equal and verifiable agreements with the Soviet Union to produce real reductions in the nuclear arsenals of both sides. SDI can be a crucial means by which such agreements can be reached.

Mr. President, those of us who support the Strategic Defense Initiative also demand that the cost of the program be kept reasonable. However, the funding reduction proposed in this amendment would absolutely cripple the SDI program. Anything less than the level recommended by the Armed Services Committee will mean delays in meeting the objectives of the program and arriving at the ability to provide a basis for informed decisions regarding strategic defense.

These amendments, if passed, would require a complete reappraisal of the SDI program. It would require elimination or the cut back of many of the SDI programs that are now ready to be demonstrated. To reduce the program beyond the level needed to insure our defense options would send

the wrong signals to the Soviet Union at this time, and would leave us totally vulnerable to the growing Third World threat.

The PRESIDING OFFICER. Who yields time?

Mr. EXON. I yield myself an additional 2 minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 minutes.

Mr. EXON. I heard very well the excellent statement made by the Senator from Alabama who has been included on this program for a long, long time. He articulated I think very well what we are trying to get across in the U.S. Senate, that this is not the time, this is not the place to be chopping further at the SDI Program when the Armed Services Committee by its action had knocked $1 billion off the amount requested by the President.

I am glad to yield at this time 2 minutes to the Senator from Indiana.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. COATS. Mr. President, I think it would be a tragic mistake at this point to cut further funds from SDI to undermine our ability to maintain any kind of viability in this program. Members need to know that the committee cut nearly $1 billion from the President's request, down to $3.57 from the President's $4.6 billion initial request.

So it is not a matter of looking at the initial level of spending that was requested by the administration. We have already made a substantial cut. We are doing this at a time precisely when the Soviets are beginning to move toward our position in the defense and space talks. As the two sides reduce their emphasis on strategic offensive forces, strategic defenses could contribute significantly to stability and deterrence.

Deep cuts in strategic nuclear forces could actually reduce stability if remaining forces become more vulnerable. Limited ballistic missile defenses could reduce their vulnerability thereby strengthening stability and deterrence.

It is interesting that the Soviets, a number of Soviet officials, have recently written or spoken out about the need for a major shift in emphasis on the part of the Soviets. Let me just quote one. Writing in a March 1990 issue of the Soviet journal, Sovetskaya Rossiya, Maj. Gen. Belous, wrote as follows:

> Some of the arguments put forward by SDI's champions require careful consideration. The world today is bipolar, but in the near future it will become multipolar. Whereas today there are eight states on the "nuclear threshold," capable of crossing it and beginning production of mass-destruction weapons, by the end of the 20th century there will probably be 20 such states. They will also possess missile technology. All this will considerably increase the risk of both deliberate and accidental nuclear conflict.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. EXON. We reserve the remainder of our time.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas [Mr. BUMPERS].

Mr. BUMPERS. Mr. President, here is what the Armed Services Committee report says. Even if phase 1 of SDI meets the Joint Chiefs' requirement, "This would result in the destruction of about 20 percent of the total Soviet arsenal. These are approximately the same percentage reductions the Soviet Union will be obliged to make under the proposed START agreement." You think about that. We will intercept as many Soviet warheads at the negotiating table as star wars would if displayed. And negotiations do not cost $55 billion.

No. 2, once you test and deploy phase 1, you will destroy the test treaty we have with the Soviet Union, namely the ABM Treaty.

No. 3, if you were going to activate phase 1 system, according to all the testimony I have ever heard, you would have 58 seconds after the Soviets launch their rockets to do it. You think of that, gentlemen—58 seconds to pull the trigger and decide whether we are going to destroy the planet or not. On a cloudy day, you would only have 30 seconds. That is because our early warning satellites cannot see through clouds.

Bear in mind that this system will not be effective against cruise missiles. You think about how many cruise missiles you could buy for what we are spending on star wars. This is not even effective against cruise missiles. It is not effective against bombers or clandestinely introduced weapons.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. EXON. I believe our side has 3 minutes remaining. I yield to the distinguished chairman of the Armed Services Committee, the Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. NUNN. Mr. President, I think I agree with some of the points the Senator from Arkansas has made on the concept and philosophy of the program and the challenge we have. And, of course, I voted for the Bingaman-Shelby amendment.

When we go to conference however I think people ought to take a look at where we are going to be. The administration request this year was for $4.46 billion for this program. The Senate Armed Services Committee cut approximately $1 billion out of that, and with last year's funding level which came out of appropriations it was $3.57 billion. That means no growth whatsoever. That means eating inflation on the program. The House Armed Services Committee came up with $2.8 billion.

All of us know in SDI and other programs like this, particularly SDI, that the likely outcomes in conference is not guaranteed but likely is to split the difference. That means that we are going to end up somewhere around $3 or $3.1 billion, which is going to be a reduction of about $400 or $500 million from last year, plus inflation. That is where we are going to end up.

If we go with these amendments, we are going to take it further down than that, and it is going to be very hard to make a case that that remains a viable research program. An awful lot of it is going to be by the board.

Mr. President, I have not looked at what President Carter's budget would be if brought up to date for inflation.

There was a research program in this area before President Reagan made his star wars speech. A lot of people forget that. We have always felt we had to have research in this area.

Do I not think we are going to phase 1 development? I do not think that it is feasible, nor is it affordable at this time. I do think we ought to continue the research. I think we ought to have it as a hedge against a Soviet change and a Soviet breakout. I think we ought to have it as a cutting-edge-type technology for the future. We do not know what may come out of it in the future. I think it has to be restructured.

I say also that the House has not finished their bill on the floor, and it is a very strong likelihood they are going to have another cut on the floor. So we may well be determining today whether we go into conference with a strong enough position, a sensible position, to have come out of this program at the end at all.

I respect my colleagues and what they are advocating, but I do not believe we ought to reduce this budget at this time. I think we have done all the cutting that we can cut.

I urge defeat of both the Bumpers amendment and the Kerry-Harkin amendment.

The PRESIDING OFFICER. Who yields time?

Mr. BIDEN. Mr. President, I rise today to make clear my opposition to an increase in funding for the SDI, Program. Last year, we spent some $4 billion to research ballistic missile defenses—to see if we can shoot down Soviet nuclear missiles before they strike United States territory. Now, President Bush has asked Congress to expand this program. In my view, $4 billion is already to much.

This program suffered from several technical and strategic liabilities even before the events of the last 2 years.

Now that the threat had changed so fundamentally—with the countries of Eastern Europe no longer our adversaries but now our friends—it seems to me this is no time to be expanding a program of such dubious value.

We can and should conduct a vigorous research program. But as numerous technical experts have pointed out, an effective research program can be adequately funded at a level closer to $3 billion.

Since this program began in 1984, we have spent nearly $20 billion examining the feasibility of ballistic missile defenses. And yet we are no closer to finding a technological solution.

THE REALITY OF STAR WARS

The technological reality is this: That even under the rosiest prediction, a high percentage of those Soviet missiles which exist today would penetrate any defense system we could deploy 10 years for now. Meanwhile, the Soviets, if they so chose, could increase and improve their offensive weapons, leaving both countries still vulnerable to total annihilation.

Worse yet, a star wars system to knock out ballistic missiles would do nothing to protect the United States against the thousands of nuclear weapons deployed of Soviet bombers and cruise missiles. To stop those weapons, a massive new program would have to be created—at an additional cost of hundreds of billions of dollars—to provide the United States with a continental air defense system, stretching from California to Maine and Texas to the Canadian border.

But even the theory of star wars is flawed. This plan will not improve the nuclear balance. Even if they did work, space-based antimissile systems would work even better against each other than against enemy missiles. Thus, the consequence of mutual deployment of such antimissile weapons would be an increase in first strike temptation.

In other words, the pursuit of star wars represents an extravagant means to an end not only unattainable—but dangerous if it could be attained.

At the same time, the very act of pursuing star wars is contrary to our national security interests. First, it will force the Soviet Union to build up its strategic forces in response, setting off an arms race in offensive and defensive weapons. Second, it will prevent us from reaping the rewards of arms control that are now possible because of President Gorbachev's new flexibility. And third, it will divert increasingly scarce defense resources away from the conventional forces that will be the backbone of U.S. military power in the post cold war era.

STARTING A NEW ARMS RACE

Let me address each danger in turn. An attempt to build star wars will inevitably provoke a Soviet response. For Soviet President Gorbachev has made clear that the Soviet military will respond to any effort by United States to build a strategic defense.

Gen. Colin Powell, the Chairman of the Joint Chiefs of Staff has stated on several occasions that the Soviet Union considers its strategic ballistic missiles to be the crown jewels of the Soviet military. And the experts of the CIA have warned Congress that the Soviet military will respond to a U.S. deployment of SDI—probably by increasing their overall level of defense spending and improving the capabilities of the strategic weapons.

While we cannot judge the actual Soviet response to SDI, we do know that they are capable of doubling the size of their ballistic missile force to some 18,000 nuclear warheads. And the Soviets are also capable of building an nationwide defense system of their own. If they took such a step, even President Reagan's own Secretary of Defense, who was the principal architect of star wars, acknowledged that we would be required to build more MX missiles, more Trident submarines, more air-launched and sea-launched cruise missiles, and more long-range bombers, like the B-1 and B-2, to overcome the Soviet defenses.

Given their dire economic straits, the Soviets surely would not wish to take these expensive steps in response to SDI. But let us remember that to ignore such Soviet responses would be to neglect the seriousness of the Soviet threat—which is the very reason given for building SDI.

All serious scientists in the United States have now acknowledged that a perfect defense—an antinuclear astrodome—is simply not possible. But the Pentagon still persists. Now they say we should build a less-than-perfect defense that will complicate a Soviet attack and therefore deter the Soviets from contemplating a first strike.

But the truth is that today no rational Soviet leader would contemplate an attack on the United States. No matter what the Soviets chose to attack us with a large percentage of our strategic submarines and bombers would survive. And they would contain thousands of nuclear weapons, each having the exlosive power of 10 Hiroshima bombs. That means tens of thousands of Hiroshimas would explode on Soviet territory if the Soviets attack. Deterrence works today because we have built a triad of strategic forces able to survive a Soviet attack and respond by wreaking unimaginable destruction and horror on the Soviet Union. We simply don't need SDI to ensure deterrence.

Still, even the act of pursuing a less-than-perfect defense will force the Soviets to respond by building more nuclear missiles to penetrate. Ironically, prior to becoming President Bush's National Security Adviser, Brent Scowcroft acknowledged the danger of building a limited SDI. I quote:

> While limited forms of SDI may be more plausible—than a population shield—it is unlikely that they would meet the criteria of cost-effectiveness and survivability. If they do not meet these technical criteria, premature efforts to deploy a system could stimulate a costly offensive and defensive arms race and reduce stability at a time of crisis. Both effects would reduce rather than enhance our security.

There is a second irony. According to Secretary of Defense Cheney, the criteria for a limited SDI system that the Pentagon is now advocating would require that the system destroy half of the Soviet force of heavy SS-18 ballistic missiles and some 30 percent of the overall missile force. But those specific numerical criteria can be accomplished without spending hundreds of billions of dollars for SDI. We can achieve those very same reductions by simply completing the START Treaty, which requires the Soviet Union to reduce its SS-18's in half and reduce its ballistic missile force from some 8,000 weapons down to 4,900 weapons.

STAR WARS OR ARMS CONTROL

This brings me to the second danger of pursuing star wars. It constitutes a fundamental obstacle to strategic arms control. For neither superpower, in its own interest, could ever agree to serious reductions in strategic nuclear weapons if faced with the prospect of large-scale defensive deployments by the other. That is why in 1972 the United States and the Soviet Union entered into the ABM [anti-ballistic missile] Treaty, which specifically prohibits either country from building a nationwide defensive system. And that is why the ABM Treaty is considered the foundation stone of nuclear arms control.

The pursuit of SDI is a direct assault on this treaty. And if we begin to build SDI we would be in direct violation of this solemn treaty commitment.

Last fall, President Gorbachev made clear that he would be prepared to go forward and complete the START Treaty without requiring that new limits be placed on the SDI Program. If completed this fall, START will be an historic achievement, drastically reducing United States and Soviet strategic arsenals and setting the stage for even further reductions in a START II Treaty.

But if we continue to pursue star wars and violate the ABM Treaty, the Soviet Union has made clear that they will not sign START I and will not begin to negotiate START II. Instead, we should make clear to the Soviets that—while we intend to continue SDI research to protect ourselves from any technological surprises and permit us to respond to any Soviet break out—we will not violate the ABM Treaty by beginning the construction of SDI. This position I have outlined has been

supported by six former Secretaries of Defense—three Republicans and three Democrats—and I believe it is the right one. It will permit us to do the necessary research but not prevent us from reaping the benefits of arms control now before us.

PERVERTING THE DEFENSE BUDGET

Mr. President, nobody knows how much SDI will cost in the end. It could be $100 billion; it could be $500 billion; it could be $1 trillion. Responsible experts—such as former Secretaries of Defense Harold Brown and James Schlesinger—have estimated that it would be close to a half a trillion dollars.

Imagine the effect on our defense budget of spending these sums of money. Right now, we know that defense spending will decline. In light of the changes in the threat arising from the revolutions in Eastern Europe and the Soviet Union and the ballooning budget deficits, the defense budget will fall.

It would be a supreme act of folly for us to spend a huge percentage of the budget on a program that won't work but will destroy the chances of reaching arms control agreements. To do so would mean not spending the funds we must spend to ensure that our conventional forces are capable of responding to the threats from the new world.

The invasion of Kuwait by Iraq is a case in point. If we were to respond to this blatant aggression, the forces we would need at our disposal are not antimissile defenses but ships, troops, helicopters, and airplanes. Building SDI would so pervert our defense priorities that we would not be able to build the kind of conventional forces we will need in the post cold war era. Not only is SDI a cold war weapon but it could prevent us from buying the weapons we need now that the cold war is over.

PROTECTION AGAINST TERRORISTS OR ROGUE NATIONS

Mr. President, I know that some have suggested that we should accelerate the development of SDI in order to allow us to protect ourselves from rogue nations, such as Iraq and Libya, or terrorist groups. But let me say emphatically that SDI would provide us no real protection against such threats. These nations or terrorist groups would not seek to attack the United States using ballistic missiles. They will do just what the drug smugglers do when they want to bring illegal drugs into the country. They will fly weapons in. Or they will ship weapons in.

We do not need a Maginot Line in the sky to protect against Saddam Hussein. It would be a waste of money; because, if he were ever so stupid as to try and attack this country and face our devestating response, he would use an airplane or a cargo ship and there would be nothing SDI could do about it.

In conclusion, Mr. President, let me say that I do not believe even the Bush administration seriously intends to push forward and build SDI. If they did, all the substantial political gains President Bush has achieved through his efforts to secure a lasting peace with the Soviet Union would go down the drain. There would be no arms control agreements to sign; and probably no summits. Rather, the United States would be facing an even more disastrous fiscal crisis and a far more dangerous world.

For these reasons, I support the efforts of my colleagues in reducing the Bush administration's SDI request.

Mr. WARNER addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia is recognized for 8 seconds.

Mr. WARNER. I wish to associate myself with the remarks of the distinguished chairman. We have worked together many, many years on this program, and we witness today a major—and I emphasize "a major"—turn of events as a consequence of the earlier vote on the amendment of the Senator from Alabama and the Senator from New Mexico.

I ask that the Senate repose some trust and confidence now in the conferees to properly restructure this program more in line with the accordance and wishes of the Senate.

The PRESIDING OFFICER. The Senator from Arkansas has an additional 1 minute 13 seconds.

Mr. BUMPERS. Mr. President, I want to ask my colleagues to listen to this very seriously posed question. No. 1, do you think the Russians are going to come and get us if we put $3 billion into this program, but not if we put $3.7 billion in it?

Do you think the program is really going to suffer when you cut $600 million, which you are certainly going to have to do with this budget summit? When you think about cutting $600 million from that program, I ask you, is that too much to cut a program down to $3 billion, when it has not even decided what the design of phase 1 is going to look like?

The reason we continue to put money into research is because we do not know what we want to do. The idea that GAO says they could not possibly deploy under the unrealistic time schedules they have set for themselves is because the design keeps changing. We have big financial problems in the country. Here is a chance to do something sensible—either bite the bullet, make the tough choices, or quit.

I offered this amendment on behalf of myself, Senator JEFFORDS, and Senator GLENN.

The PRESIDING OFFICER. All time under the previous order has expired for debate on the Bumpers amendment.

Mr. BUMPERS. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. NUNN. Parliamentary inquiry, Mr. President. As I understand it—I was not here during the unanimous-consent request—we are not going to vote on the Bumpers amendment at this time but conclude debate on the Kerry-Harkin and vote on both in sequence; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. NUNN. At expiration of the Kerry-Harkin time, I assume a motion to table would be in order on both amendments; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. NUNN. I assume it would not be in order now to move to table the Bumpers amendment.

The PRESIDING OFFICER. The Senator is correct.

Under the previous order, the Senate will take up consideration of the Kerry-Harkin amendment with 45 minutes to be equally divided.

AMENDMENT NO. 2590

(Purpose: To authorize the transfer of $400,000,000 of the funds authorized to be appropriated for the strategic defense initiative for drug treatment, pregnant women, and veterans' health program)

Mr. KERRY. I send an amendment to the desk under the unanimous-consent agreement and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The Senator from Massachusetts [Mr. KERRY] for himself, Mr. DASCHLE, and Mr. HARKIN, proposes an amendment numbered 2590.

Mr. KERRY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The legislative clerk read as follows:

The amendment is as follows:

At the appropriate place in the bill, insert the following:

SEC. . Funding for Programs Under the Public Health Service Act (42 U.S.C. 300x) and the Department of Veterans Medical Accounts.

(a) TRANSFER AUTHORIZATION.—Of the amount authorized in section 201 to be appropriated for fiscal year 1990 and made available pursuant to section 221 for research, development, test, and evaluation, for the Strategic Defense Initiative,

(1) $100,000,000 is authorized to be transferred and be made available for carrying out in fiscal year 1991 programs under Section 1911(a) of the Public Health Service Act (42 U.S.C. 300x) (Alcohol and Drug Abuse and Mental Health Services Block grants);

(2) $100,000,000 is authorized to be transferred and be made available for carrying out in fiscal year 1991 programs under Part A of title V of the Public Health Service Act (42 U.S.C. 290aa et seq.) as amended by the Anti-Drug Act of 1988, model projects for pregnant and post partum women and their infants; and

(3) $200,000,000 is authorized to be transferred to the medical account of the Department of Veterans Affairs.

(b) Notwithstanding any other provisions of this Act, of the funds authorized to be appropriated for fiscal year 1991 for research, development, test, and evaluation of the Strategic Defense Initiative,

(1) not more than $207,000,000 may be obligated for the ground-based radar, space-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $127,700,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $786,100,000 may be obligated for other phase I programs;

(5) not more than $840,200,000 may be obligated for follow-on technologies programs;

(6) not more than $284,700,000 may be obligated for key technologies activities;

(7) not more than $227,800,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

Mr. KERRY. I yield myself 8 minutes, Mr. President.

This amendment is a lesser cut than the amendment of the Senator from Arkansas. I intend to vote for the amendment of the Senator from Arkansas. But if the amendment of the Senator from Arkansas does not carry, then Senators will have another opportunity to vote not for just a straight cut, but for a cut that specifically designates a lesser amount of money to two objectives:

No. 1, to put it into the drug war and, specifically, the effort to deal with crack babies and with treatment in this country, a real threat that we face today, not in the future.

Second, to deal with the woeful underfunding of veterans' hospitals and veterans' health care in this country, which is $1 billion underfunded today.

Mr. President, the Senator from Arkansas has made it very clear that this is a matter of choice for the U.S. Senate. It is a question of whether or not we are willing to make the tough choices.

Frankly, I do not think this is really a tough choice. The House of Representatives is already at $3.2 billion with DOE money, and $2.9 billion if you take DOE out. So we are just questioning whether or not we are going to be willing in the Senate to acknowledge what everybody already knows.

What has happened each year, year after year after year that we voted on this program, is that the Senate votes by several hundred million dollars more, and we always have a lesser number when we come back from the conference.

Here we are, for the first time since the cold war started, with a totally different nature of threat. Yet, we are still coming in ready to fight a whole concept of deterrence against an enemy, the threat of whom has changed, and we are unwilling to put the money into an enemy, the threat of whom gets worse everyday.

The simple reality is that in the United States of America today, 20 million Americans have tried cocaine. One million are addicted to it. One out of ten babies born in the United States last year was born with exposure to illegal drugs to its mother before it was born. Yet, in New York City there is a study that shows that of the 78 treatment centers, 54 percent of them turn away pregnant mothers, they do not have the money to deal with the social costs attendant to them. It is inexcusable that the U.S. Senate should think of spending hundreds of millions of dollars to meet the threat that no longer exists and ignore the threat that exists in the streets of America. Every poll in America shows that Americans believe we are more threatened by drugs today than by the Soviet Union.

Let me make it very clear that this Senator wants a defense that is second to nobody in the world. I want it guaranteed that we do not allow the Soviet Union the opportunity for breakout. But, Mr. President, a $3 billion research program for star wars allows us all the missile laser technology, all the Brilliant Pebbles or dumb rocks technology that we want to pursue; it allows us every single effort we want. It just changes the pace to meet the real demands of the country.

If the U.S. Senate cannot face up to that, then what can it face up to? I know how hard it is to beat the distinguished chairman and the ranking member and the committee mark; we have seen that on amendment after amendment. But, Mr. President, it is very clear where this country is with respect to this threat.

What about veterans? The distinguished Chair is a veteran. He is about to be relieved or is talking to another veteran who holds a Congressional Medal of Honor. Other Members in this Chamber served with honor and distinction.

As all of us know, there was a contract made with the people who put on a uniform and went to serve their country. But, today, we have testimony after testimony from nurses and others who have come before the Veterans' Affairs Committee to say they do not even have the basics in the veterans' hospitals, do not have urinals, soap, gauze pads.

They are cutting beds at the very time when the veteran population is growing older. The Paralyzed Veterans of America, the Disabled Veterans of America, the American Legion, the Veterans of Foreign Wars, the Vietnam Veterans of America, all of them, have said that it is inexcusable that any veteran in this country be given Third World veteran health facilities.

I suggest respectfully that a veterans budget that is $1 billion below where it ought to be, with the kind of testimony we have seen from doctors, nurses, and counselors, about the health care system ought to at least put a down payment of one-fifth of the money that we are below.

Mr. President, we heard about adequate research being necessary. Let me just say respectfully to the chairman when President Reagan gave the speech that started star wars nobody even knew what it was, nobody in the administration knew what it was. They were surprised by it. By God, they rushed out quickly to give it a form. They pulled the programs together that were under DOE and others.

I support laser research. I have voted for that research. The issue here is not whether we should have a program, but it was at $900 million only years ago; in real term plus inflation, that would be about $1.9 billion or $2 billion today. The former Chairman of the Joint Chiefs of Staff comes up and says you could carry an adequate program to prevent Soviet breakout at about $2.9 billion. Why do we continue to spread so much more?

Mr. President, I believe it is vital for us to pay attention to the reality of what is happening in our streets, more cops being killed than ever before in history, one in every 7 hours, where it used to be one a week. We have more violent crime in our cities today than 30 years ago and less police officers per violent crime than we had 30 years ago. That is a real threat to the security of this country.

I hope that the U.S. Senate today would say that out of $3.8 billion in total, $3.5 some billion in the committee markup, we could take $400 million—that is all, $400 million—and divide it between the needs of our veterans and our hospitals and divide it between the needs of crack babies and pregnant women and the treatment centers of this country.

Here we are with a declared war on drugs and only 19 out of every 100 addicts in America receives treatment.

What do you say to the 81 others who get turned away? What do you say to someone who comes in wanting treatment and is sent away for 6 weeks and later comes back?

It is inexcusable we have not made that kind of commitment.

That is not what this is about. It is not about ending Star Wars. It is not about denying the ability to continue research. It is about priorities and recognizing the reality of the nature of the threat, about what changes it has taken and it provides perfectly adequate money to continue this program for research while at the same time saying we are going to meet some of the real needs of the country.

I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. KERREY). Who yields time?

Mr. EXON. Mr. President, I yield 2 minutes to the Senator from Virginia.

Mr. WARNER. Mr. President, I have great respect for my colleague from Massachusetts, but he is indeed trying to have it both ways. This is not a question of patriotism, who served, who has not served in the uniforms of this country. This is simply a question of whether or not we are going to abide by a decision earlier made by this body with reference to the SDI, to make a major change in the program as enunciated by the distinguished chairman as a consequence of earlier votes and other work that will transpire in the conference between the House and the Senate.

Mr. President, we are asking that this program not be made the banker for the problems of this country. I share with my distinguished colleague, having just visited the VA hospitals in Virginia, I share with him the problems inflicted on our society by the consequences of drugs.

We are making basic decisions here today with respect to the future of our security and that of our allies and of our friends.

As the Senator from Virginia pointed out earlier today, and the Senator endorsed in his amendment, we need greater emphasis placed on the tactical ballistic missile deterrence, both for ourselves and our friends and our allies, and that deterrence is derived from this account on which he is asking us to bank funds for these other problems which merit attention. But I suggest enough attention has been given in 1 day on this particular line-item of the defense bill.

The PRESIDING OFFICER. Who yields time?

Mr. KERRY. Mr. President, I yield to the Senator from Iowa 8 minutes.

Mr. HARKIN. Mr. President, I want to again join with Senator KERRY in offering our amendment, and I associate myself with the eloquent remarks he has made. As a member of the Appropriations Subcommittee on Defense that appropriates money under this authorization, I want to compliment both the distinguished Senator from Georgia, Senator NUNN, and the distinguished ranking member, Senator WARNER, and other members of the Armed Service Committee for what I think is a giant step forward in this bill, cutting out MX rail garrison, which I think is a major step. Cutting the Milstar Program is another major step.

The Senator from Georgia made us "fly before we buy," another step in the right direction. I only hoped that we had applied that to the B-2 bomber. But be that as it may, these are steps in the right direction.

The fact that that budget came down from $306 to $289 billion is again sending a strong signal to the Pentagon that the nineties are different than the eighties. We are beginning to shift priorities.

We have not made enough of a shift and are still proceeding down the wrong road. The SDI Program, like many others, when it was shown it would not accomplish its initial purpose and task, then it begins to look for different missions.

First it was to complicate Soviet attack plans, then to stop an accidental launch, and now to stop Third World threats. It just keeps switching missions.

Again I associate myself with the remarks of the Senator from Massachusetts. The biggest threat to our national security right now, the biggest threat to our way of life and biggest threat to the next generation of young Americans is not a ballistic missile threat from the Soviet Union or any Third World country, it is the threat of the influx of drugs into this country.

We are still fighting the old dead cold war with obsolete weapons and the biggest relic is star wars.

What our amendment does, as Senator KERRY pointed out, is to make a shift to two accounts, fighting the war on drugs and helping to meet our commitment to our veterans' hospitals.

As chairman of the appropriations subcommittee that funds alcohol, drug, and mental health programs in this country, I will wager right now I have a letter in my file from just about every Senator, requesting that I increase money for alcohol and drug abuse programs in every State and mental health program. Because you have heard from your States and are requesting help in fighting the threat of drugs both in education, treatment, rehabilitation, and in the other areas of law enforcement and prosecution.

I am going to do my best, but I must tell you we do not have enough money to meet all the requests that come in to increase alcohol, drug, and mental health programs around the country. So if you would like to have a shift and to make sure we can put some more money to send out to the States through these programs, then I ask for your support for the Kerry-Harkin amendment, a shift of $400 million.

As Senator KERRY said, it is not going to kill star wars; but a shift of $200 million to the war on drugs, $200 million into the veterans health programs, can make a big difference in both those programs.

My distinguished colleague from Massachusetts has talked a lot about the drug program and the threat of drugs. I want to focus on another aspect. Senator KERRY did mention the problem we have with veterans hospitals, where they are not getting adequate medical care. He is absolutely right. When veterans agreed to serve in the Armed Forces they were told the Nation would take care of their medical needs. We have honored the commitment for many years. Tens of thousands of veterans have received VA care in centers across the Nation. They came to depend on immediate service. They did not need private health insurance. they had a commitment from the Federal Government that their medical needs would be met.

Now, as many of the veterans are requiring more health care due to age, the rug is being pulled out from underneath them. Under economy moves, some VA medical centers have stopped outpatient service to some category A, category B, and category C veterans. In many cases these veterans have been receiving outpatient services including medicine and other service for years. They have no private health insurance. Many are too ill and too old to get private health insurance. And many could not afford it even if they qualified.

But I want to take my remaining time to tell you about one such veteran from Waterloo, IA, to drive home my point. His name is Jack Stone. He was a 57-year-old marine in poor health.

Jack Stone had diabetes. He lost his leg to the disease in 1986, but the VA medical center in Iowa City was there to help him.

Jack Stone was also crippled by arthritis of the spine, but the VA medical center was there to help him.

Jack Stone had hardening of the arteries, but the VA medical center was there to help him.

His kidneys began failing in 1988. But the VA medical center was there to help him: He began dialysis there in 1989.

By January of this year, Jack Stone received outpatient dialysis treatment twice a week, and took 16 different medications at a cost of about $200 per month. But the VA paid for his medical treatment, fulfilling the commitment we made to all our veterans.

However, on January 30, while receiving his dialysis treatment, Jack

Stone learned that a VA nurse had reclassified him as chronic and stable, thereby cutting off his outpatient services.

Jack Stone had kidney failure, arthritis of the spine, was losing his eyesight, but a VA nurse determined that he was chronic and stable, and took away his medical benefits.

Just like that. No review. No advance warning. No consultation with a doctor. No discussion of alternative methods to finance his medical treatment.

Dispondent and determined not to burden his family, Jack Stone killed himself the next day.

Mr. President, how many more Jack Stones are out there? Hundreds? Thousands?

How many more veterans with significant medical problems are removed from the rolls simply because their condition has become chronic and stable?

Well, I can tell you Jack Stone's widow, Carolyn, has dedicated hereself to telling Jack's story—and I wanted to tell it today—hoping to save other veterans from a similar fate. I have received over 3,000 signatures on petitions from concerned citizens of Iowa, demanding that we continue to provide adequate health care for our aging veterans.

Mr. President, cutting off veterans from medical care is a national disgrace.

We made a sacred pledge to our veterans when they offered their lives to protect our freedom and democracy. I know that budgets are tight, and some are advocating that we cut all Federal services to help balance the budget. But we must never balance the budget on the backs of aging veterans in poor health. We have to provide adequate funds so that all veterans receive the care they were promised when they served our Nation.

I call on all my colleagues to encourage Secretary of Veterans Affairs Derwinski to immediately stop the practice of cutting off services to veterans who are chronic and stable, and to request sufficient funds for outpatient services.

The amendment offered by Senator KERRY and I is one small step to correct the shortfalls in the VA medical account. As Senator KERRY said, the major veterans groups—VFW, DAV, Amvets, and the Paralyzed Veterans of America—have analyzed the VA budget, and they concluded that the President's request for fiscal year 1991, while much better than previous years, still falls over $1 billion short of meeting our real VA medical needs.

Our amendment would transfer $200 million from star wars to bolster the veterans' medical services, meeting about one fifth of the shortfall identified by the veterans groups.

Certainly restoring our commitment to our Nation's veterans should have priority over chasing the fantasy of star wars weapons system. This amendment makes one small step in shifting our priorities.

I urge my colleagues to support the Kerry-Harkin amendment to help fight the war on drugs, and to help keep our commitment to our veterans.

I yield the floor.

Mr. EXON. Mr. President, I yield myself 2 minutes.

Mr. President, I have listened with great interest to the very interesting amendment that has been crafted by my friends, the Senator from Massachusetts and the Senator from Iowa.

As one Member of the U.S. Senate, I would like like to say that few, if any, have been at the forefront in providing money for veterans and veterans' facilities than this Senator. Yet, by the clever arrangement in this amendment, I am being asked to vote against the veterans, against the Jack Stones and others, to cut star wars.

From a popular standpoint, who can disagree with that? I mean, that is just great, I would like to remind the U.S. Senate that of all the people in this body, it was this Senator's mark of a $13 billion cut in our overall military budget, which far exceeds any other number, that was approved as it was in the budget meeting.

Mr. WARNER. Will the Senator yield for a momentary crisis on a vote count? It will not take more than 10 seconds.

Mr. EXON. I am glad to yield to the Senator from Virginia.

Mr. WARNER. Mr. President, this Senator has fought for the Jack Stones and those similarly situated; I have visited the hospitals; I have provided additional money on two or three occasions in the Budget Committee to get this job done. But, unfortunately, I am faced, with the clever amendment, the way it is drawn, with voting against veterans.

Well, if people think I am against veterans because I am going to oppose the amendment the way it was offered, then that is the way it is going to have to be.

The statement was made in debate by the supporters of this amendment that the threat no longer exists—the threat no longer exists. What fools sometime we mortals be.

I think one of the single most devastating threat to the United States of America now and as far as we can see into the future is not necessarily an all-out Soviet attack against the United States of America—but let us think about it this way; and this is with the limited research about SDI, that we have cut and cut and cut, and scrubbed and scrubbed and scrubbed, and tightened down further with the amendment offered by the Senator from New Mexico that passed a few moments ago—what we need, I believe, is some kind of a defense against the "onesies" and the "twosies" or the "threesies" of intercontinental ballistic missiles aimed at the United States.

Where would we be if a Qadhafi could call up the President of the United States one day and say, "I have an ICBM," which he might be able to obtain, "and I am going to lob it at the United States. I do not know where it is going to hit because it is not very accurate. But unless you do this and that and such * * *"

What the thrust of the Armed Services Committee has been—and the proponents of this amendment should understand and all America should understand—is that there is indeed a threat and that threat still exists. And what we are trying to do is shape a program that would, at least in the initial phase, take away that ICBM pointed at the President of the United States to try to get him to do something. Essentially, that is what we're trying to do.

I reserve the remainder of my time.

Mr. EXON. In the interest of saving time, people are trying to leave here, there are 5 minutes left on the other side, I guess. I would agree to limit us down to 5 minutes on this side at this time so we can expedite the proceedings. Probably not many votes are going to be changed, regardless of what we debate here today.

Mr. HARKIN. I did want to make a short statement.

Mr. KERRY. I yield 30 seconds to the Senator from Iowa.

Mr. HARKIN. I want the Senator from Nebraska, my friend, to know I appreciated his strong fight for veterans in the past. The distinguished Senator from Nebraska has fought long and hard on the Veterans' Committee for veterans' programs, to shift those priorities, and I would in no way intimate that the Senator from Nebraska has been anything less than the strongest fighter for veterans on the floor that we have, and on the Budget Committee, also. I want the record to show the work he has done for the veterans of this country.

Mr. EXON. We are prepared to yield the remainder of our time on this side unless there are some Members who would like to put statements in the RECORD? We are ready to yield our time if the proponents of the measure are ready to yield their time and proceed to a vote.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Most of what is necessary to say has been said.

Let me address the comments of the Senator from Nebraska, for whom I have enormous respect. I join the Senator from Iowa in not one iota questioning his past commitment or efforts for veterans, but there is a reality.

This is a choice between putting additional money into veterans or keeping star wars where it is. That is the hard reality. That is where we are. Those are precisely the tough choices we have come down to here. There is nothing clever about this. We are presenting the choice because we think it is a necessary choice, and the vote this afternoon will be, either you think the first priority is to put money, additionally, into the drug war to deal with crack babies, additionally into the problem of underfunded VA health, or you believe that the system of the current configuration of star wars needs to be at the $3.5 to $3.75 billion under the committee mark without DOE. That is the choice.

This Senator did not say a threat no longer exists. This Senator said the threat as we have known it no longer exists. That is very different. Stalin is finally dead. We have a different Soviet Union. We do not have a Warsaw Pact. Clearly the Soviet Union cannot afford to spend in the same way. Why should we be different? Why should the American people, who need to compete with Europe and the Japanese and who are greatly struggling to get kids out of school literate rather than functionally illiterate, why should we not pay attention to those issues, while somehow we can fund a program like star wars endlessly at whatever sum we want?

I know the threat is not nonexistent, but it is a different threat than we have known. We must adjust.

On the question of Qadhafi, Mr. President, if we are dependent on star wars to deal with a Qadhafi with an ICBM, we are indeed in trouble. If we ever allowed him to have a launch pad, we would be crazy, and whether it is efforts like Israel took against Iraq or whatever, there are countless ways to deal with that issue.

But under the ABM Treaty we are allowed today to deliver and develop a land-based system. We could choose to do that, Mr. President. The Soviets have the Galosh system around Moscow. We used to have a system around Grand Forks but we scrapped it because we did not think it works. Maybe we should bring it back if we think that is the way to deal with Qadhafi but you do not need a multibillion-dollar system and the destruction of the START Treaty to do that.

The question is very simple. How rapidly do we want to proceed? I say to my colleagues we have a far greater threat from a nuclear bomb in a suitcase coming in in a truckload of marijuana than we do an ICBM coming from Libya.

Mr. HARKIN. Will the Senator yield for that?

Mr. KERRY. I yeld.

Mr. HARKIN. Former Secretary Harold Brown said it right. If we are really concerned about Third World problems, we ought to increase funding for the Customs Service, not SDI.

Mr. KERRY. I am prepared to yield my time.

Mr. EXON. We are not prepared to yield back our time. We will be in a moment.

Mr. KERRY. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Time for the proponents has expired.

Mr. EXON. I yield myself 1 minute and then 2 minutes to the Senator from Pennsylvania, and then I hope we can vote.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I think it is wrong to imply the SDI Program we are going to go to, and it is going to be a scaled-down version, pretty much along the lines, when we get through, as to what I believe the Senator from Massachusetts is suggesting—when we finish conference with the House, as we have said, on the previous bill and the bill that has been introduced as an amendment and this one.

What I am trying to emphasize is: Do not sell the terrorists of the world short. There are lots of ways to deliver ICBM's, and you do not need a full-fledged platform that could be interpreted by our reconnaissance intelligence that we have today.

I yield 2 minutes to the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I had requested more time, but I shall limit myself to 2 minutes or less. I requested the time because I served with Senator HARKIN as ranking member of the Appropriations Subcommittee on Health and Human Services. I am on the Veterans' Affairs Committee.

I am opposed to this amendment, Mr. President, because, as good as it sounds, it cuts needed funds from a very important program.

The source of amazement to me, Mr. President, is that the negative implication of this amendment is to agree with $3.3 billion for the strategic defense initiative.

Why agree to anything? If you vote against this amendment, you look like you are opposed to mental health, drug abuse grants, against projects for pregnant women and infants, against programs for the Veterans Administration. This is what you call a put-on-the-political-spot amendment.

You do not see 30-second spots on C-SPAN II, but these are the kind of amendments Senators face when they are up for reelection.

My record is plain, Mr. President, in fighting for drug abuse and mental health programs while on the subcommittee with Senator HARKIN, programs for infants and pregnant women, voting consistently for more money for veterans. But this amendment ought to be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. EXON. Mr. President, we yield the remainder of our time. I ask, if possible, the Chair recognize the Senator from Georgia for the purpose of a tabling motion.

The PRESIDING OFFICER. All time has expired. The Senator from Georgia.

Mr. NUNN. Mr. President, I move to table the amendment.

Mr. HARKIN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. NUNN. Mr. President, may I also move to table the second amendment?

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. KERRY. Mr. President, I ask unanimous consent that Senator JEFFORDS and Senator DECONCINI be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the motion of the Senator from Georgia. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado [Mr. WIRTH] is necessarily absent.

Mr. SIMPSON. I announce that the Senator from New Mexico [Mr. DOMENICI] is necessarily absent.

I also announce that the Senator from Alaska [Mr. MURKOWSKI] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced, yeas 56, nays 41, as follows:

[Rollcall Vote No. 225 Leg.]

YEAS—56

Armstrong	Garn	McConnell
Bentsen	Gore	Nickles
Bingaman	Gorton	Nunn
Bond	Graham	Packwood
Boschwitz	Gramm	Pressler
Breaux	Grassley	Robb
Bryan	Hatch	Roth
Burns	Heflin	Rudman
Coats	Heinz	Sanford
Cochran	Helms	Shelby
Cohen	Hollings	Simpson
D'Amato	Humphrey	Specter
Danforth	Inouye	Stevens
Dixon	Kasten	Symms
Dodd	Lott	Thurmond
Dole	Lugar	Wallop
Durenberger	Mack	Warner
Exon	McCain	Wilson
Ford	McClure	

NAYS—41

Adams	Biden	Bumpers
Akaka	Boren	Burdick
Baucus	Bradley	Byrd

Chafee	Kassebaum	Mitchell
Conrad	Kennedy	Moynihan
Cranston	Kerrey	Pell
Daschle	Kerry	Pryor
DeConcini	Kohl	Reid
Fowler	Lautenberg	Riegle
Glenn	Leahy	Rockefeller
Harkin	Levin	Sarbanes
Hatfield	Lieberman	Sasser
Jeffords	Metzenbaum	Simon
Johnston	Mikulski	

NOT VOTING—3

Domenici	Murkowski	Wirth

So the motion to lay on the table the amendment (No. 2589) was agreed to.

Mr. KERRY. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

The PRESIDING OFFICER. Without objection, the motion to lay on the table is agreed to.

Under the previous order, the question is on agreeing to the motion to lay on the table the amendment of the Senator from Massachusetts.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from New Mexico [Mr. DOMENICI] is necessarily absent.

I also announce that the Senator from Alaska [Mr. MURKOWSKI] is absent on official business.

The PRESIDING OFFICER (Mr. JOHNSTON). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 54, nays 43, as follows:

[Rollcall Vote No. 226 Leg.]

YEAS—54

Armstrong	Glenn	McClure
Bentsen	Gore	McConnell
Bingaman	Gorton	Nickles
Bond	Graham	Nunn
Boren	Gramm	Packwood
Boschwitz	Hatch	Robb
Bryan	Heflin	Roth
Burns	Heinz	Rudman
Byrd	Helms	Sanford
Coats	Hollings	Shelby
Cochran	Humphrey	Simpson
D'Amato	Inouye	Specter
Danforth	Kassebaum	Stevens
Dixon	Kasten	Symms
Dole	Lott	Thurmond
Durenberger	Lugar	Wallop
Exon	Mack	Warner
Garn	McCain	Wilson

NAYS—43

Adams	Ford	Metzenbaum
Akaka	Fowler	Mikulski
Baucus	Grassley	Mitchell
Biden	Harkin	Moynihan
Bradley	Hatfield	Pell
Breaux	Jeffords	Pressler
Bumpers	Johnston	Pryor
Burdick	Kennedy	Reid
Chafee	Kerrey	Riegle
Cohen	Kerry	Rockefeller
Conrad	Kohl	Sarbanes
Cranston	Lautenberg	Sasser
Daschle	Leahy	Simon
DeConcini	Levin	
Dodd	Lieberman	

NOT VOTING—3

Domenici	Murkowski	Wirth

So, the motion to lay on the table the amendment (No. 2590) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order the Senator from Wyoming [Mr. WALLOP] is to be recognized to offer an amendment on which there will be a 30-minute time limit for debate, equally divided and controlled in the usual form.

Mr. WALLOP. The Senator from Wyoming will not offer his amendment and therefore asks that that order be vitiated.

The PRESIDING OFFICER. Without objection, the order is vitiated.

The Senator from Ohio

Mr. METZENBAUM. Mr. President, I yield to the Senator to make an announcement.

Mr. NUNN. If the Senator will yield for a brief moment Mr. President.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. NUNN. If the Senator will yield for a brief moment, I am asked by the leadership to announce there will be a briefing for all Senators on the Iraqi situation in S. 407 at 3:30. It will be an intelligence briefing. The Senate will continue. We will not be interrupted, but will continue.

If the Senator will yield for a brief amendment, I could get one amendment that has been agreed to on both sides accepted quickly. This is a Bryan amendment.

AMENDMENT NO. 2591

(Purpose: To provide for a study)

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for Mr. BRYAN, proposes an amendment numbered 2591.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the anendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following: "As part of the request for authorizations of appropriations for fiscal year 1992, the Secretary of Defense shall transmit to the Committees on Armed Services of the Senate and the House of Representatives a report containing an analysis of the merits of utilizing as a dedicated NATO training facility a military installation within the United States which would otherwise be subject for closure or realignment."

Mr. NUNN. Mr. President, this requires a report from the Secretary of Defense on establishing a dedicating NATO training facility at military installations within the United States.

Mr. President, I urge adoption of the amendment. It has been agreed to on both sides.

Mr. WARNER. No objection.

The PRESIDING OFFICER. Is there further debate? If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2591) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. WARNER. Will the Senator yield for another amendment, which has been cleared on both sides?

Mr. METZENBAUM. I yield.

AMENDMENT NO. 2592

(Purpose: To amend the Foreign Assistance Act of 1961 to authorize the provision of medical supplies and other humanitarian assistance to the Lithuanian people to alleviate suffering during the current emergency)

Mr. WARNER. Mr. President, I send to the desk an amendment on behalf of the Senator from Colorado relating to medical supplies and other assistance.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Virginia [Mr. WARNER], for Mr. ARMSTRONG (for himself and Mr. MOYNIHAN), proposes an amendment numbered 2592.

Mr. WARNER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end thereof, add the following new title:

TITLE . LITHUANIAN EMERGENCY ASSISTANCE

Chapter 9 of part I of the Foreign Assistance Act of 1961 (relating to international disaster assistance) is amended by adding at the end thereof the following new section:

"SEC. 495L. LITHUANIAN EMERGENCY RELIEF.—(a)(1) The Congress recognizes that prompt United States assistance is necessary to alleviate the emergency existing in the Republic of Lithuania caused by the economic blockade imposed by the Union of Soviet Socialist Republics which has caused great suffering among the Lithuanian people, especially with regard to a severe shortage of medical supplies and the basic necessities of life.

"(b)(1) The Administrator of the Agency for International Development shall—

(i) furnish, in accordance with the authorities of this chapter, humanitarian assistance for the relief of the Lithuanian people during the existing emergency;

(ii) solicit private sector donations of humanitarian assistance for Lithuania; and

(iii) cooperate with private relief agencies attempting to provide humanitarian aid to Lithuania;

(2) The Commander-in-Chief of United States Transportation Command is authorized to provide all airlift and sealift necessary, throughout the course of the Lithuanian blockade, to transport United States public and private donations of medical supplies to Lithuania on a regular basis and should begin such transport as soon as the agreement described in subsection (e) has been concluded.

(c) For purposes of this paragraph, the term "humanitarian assistance" includes—

(i) oil, gas and fuel for emergency vehicles and medical facilities;

(ii) water purification supplies, materials, for immunization, and other materials needed to prevent the outbreak of contagious diseases and to safeguard public health;

(iii) medical supplies; and

(iv) food and clothing.

(d)(1) In addition to funds authorized to be appropriated to carry out this chapter, there are authorized to be appropriated to the President $10,000,000 to carry out subsections (b)(1) and (b)(2).

(2) Funds appropriated pursuant to paragraph (1) are authorized to remain available until expended.

(3) The authority contained in the Foreign Assistance Act of 1961 to transfer funds between accounts shall not apply with respect to funds appropriated pursuant to paragraph (1).

(e) The Congress urges the President to begin negotiations immediately with the nations surrounding Lithuania, including Latvia, Estonia, the Union of Soviet Socialist Republics and Poland regarding the importation of critical humanitarian assistance. Pending conclusion of these negotiations, the Administrator of the United States Agency for International Development shall furnish the necessary humanitarian assistance through the International Red Cross, the Lithuanian Red Cross, CARITAS, and other relief agencies, to ensure the Lithuanians begin to receive critical humanitarian assistance immediately.

(f) Assistance may be provided under this section notwithstanding any other provision of law, other than that included in Public Law 101-179, section 503, known as the Support for Final European Democracy (SEED) Bill of 1989.

Mr. HELMS. Mr. President, for almost 4 months the United States has watched in near silence as the Soviet Union wages war against a small nation. The State Department's policy is based on the erroneous assumption that helping Lithuania could somehow push events in the Soviet Union in the wrong direction and that the proper role for the United States is to stand on the sidelines, hoping that the "messy" situation will soon resolve itself.

Our current policy hardly does justice to America's 50-year rejection of the Soviet claim to Lithuania, Latvia, and Estonia.

This humanitarian relief legislation is urgent. The Soviet economic blockade, although "officially" lifted, continues to place limitations on the receipt of medical and energy supplies.

I have received word from President Landsbergis, Prime Minister Prunskiene, and the Lithuanian Minister of Health, that medical supplies have dwindled to critically low levels. The lack of syringes, scalpels, and antibiotics continue to restrict the number of surgeries performed.

These leaders fear that the present situation could continue indefinitely and they urge passage of this amendment to help alleviate further unnecessary suffering in Lithuania. They thank the Senate for its support of the Lithuanian nation.

Mr. President, we must acknowledge the need for humanitarian assistance from the United States. In fact, the longer we ignore the truth, the tighter becomes the noose around the necks of the people of Lithuania.

The blow to Lithuania was blunted through the determination and fine work of relief agencies such as the Lithuanian Red Cross, CARITAS, and the Governments of France, Switzerland, and Belgium. Concerned Americans have solicited donations and sent medical care packages to Lithuania. The Lithuanian people have ingeniously found ways to improvise and to barter for needed supplies. However, these efforts are not sufficient to deflect the enormous damage that continues to be wrought by the blockade.

Mr. President, this bill simply urges the President to negotiate with the Republic of Lithuania, the Soviet Union and other neighboring states to bring about immediately the importation of critical medical supplies.

Mr. President, it is time to realize that the process of peace in Eastern Europe has been brutally attacked in the Baltic States. The Soviet Union has tried to punish the people of Lithuania for the crime of declaring freedom by barring the free passage of the basic necessities of life.

President Landsbergis recently addressed the Lithuanian Parliament with these words:

Today we could ask the rather large and indifferent world why its interests are more weighty than its principles, and what this would mean to the further progress of Christian civilization. And why, when the faces of the states are changing, cruelty is not harmful, but goodness could be harmful?

Mr. President, sending humanitarian aid to Lithuania will end this paradox. The aid will both save lives and prove that the United States stands behind freedom and against human cruelty.

Mr. MOYNIHAN. Mr. President, I am pleased to cosponsor the amendment offered by the distinguished Senator from Colorado authorizing up to $10 million in humanitarian assistance to Lithuania. I authored this same provision as a free-standing bill, S. 2757. That bill was reported unanimously, as amended, by the Committee on Foreign Relations, and is cosponsored by 23 Senators, including Senators PELL and SIMON as original cosponsors. While the partial lifting of the Soviet Union's economic blockade of Lithuania has somewhat eased the crisis which prompted my bill. But the blockade has not been completely lifted. Moreover, its effects are still being felt within Lithuania. I have been informed that energy supplies have not been fully restored. Medical supplies are still in short supply. There are great backlogs in all nonemergency surgical procedures, maternal care and other health care areas.

Mr. President, this amendment will be a strong expression of support for Lithuania. Restoring Lithuania's exhausted medical supplies will greatly strengthen its negotiating position. The Soviet blockade reduced Lithuania to a pitiable state. Diabetics had literally begun to die due to the shortage of insulin. So long as Lithuanians are subject to the whims of the Soviet Government we should not hesitate. We should move ahead vigorously to put into place the authorization for humanitarian aid.

I urge the adoption of the amendment.

Mr. NUNN. Mr. President, I urge adoption of the amendment. It has been cleared on both sides.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2592) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote.

Mr. NUNN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Will the distinguished Senator give us an idea of how long he might wish?

I need to ask the Senator from Ohio how long he might speak, so we can make our plans.

Mr. METZENBAUM. I do not know. I have no desire to make an extended speech. I guess somewhere in the area of half hour, maybe 20 minutes, maybe 40 minutes. I have no desire to extend the debate. I have some thoughts on my mind on this bill. I do want to share them with my colleagues. In the area of 30 minutes.

Mr. DOLE. We have a lot of thoughts in our minds. One is catching airplanes.

Mr. METZENBAUM. I am aware of that.

Mr. President, I am well aware of the fact that many Senators would like to leave, want to get planes, and so when I decided to speak on this subject it was only after some consideration. But I said to myself I cannot fail to speak because I think this bill

just truly lets down the American people.

The American people think that the U.S. Congress is here in Washington doing something about cutting defense spending. They are talking about a peace dividend. They are looking forward with enthusiasm to what we are doing. They read in their papers and listen to television and learn about base closings and they think that is going to save some money. They talk about cutbacks of exotic weaponry, star wars and SDI and other names. They do not know what they all are, but they know they cost a lot of money and they know that as a consequence we do not have the money to cut the deficit, we do not have the money for some other necessary needs in this country. So they are looking forward to seeing what we in Congress are going to do about it.

They know that the cold war has come to an end and they say if we are not in a cold war we are certainly going to be able to cut back on defense spending which has gone up in a constant pattern during the last 10 years. So they think that something is going to happen.

Then when they know the President talked about bringing about 80,000 troops home, troops that we are paying for in Europe. What an unbelievable absurdity. As Senator KENT CONRAD pointed out, what an absurdity it is, the other day when he offered his amendment, that the West Germans are paying for the stationing of Soviet troops in East Germany while we are paying for the stationing of American troops in West Germany, and that comes out of the American taxpayer's pocket.

What are we doing about it? We have 310,000 troops there, and families. It affects our balance of payment. When we get all done we are bringing back 50,000 troops. Is that not incredible?

Then we read in the paper about our eliminating defense fraud. We read more about defense fraud day in and day out. You cannot pick up the newspaper without reading a story about defense fraud. You think that therefore we are going to really begin starting to save some money.

Let us take a look at what this bill is all about, all these great savings we are going to get, the peace dividend, the saving from defense spending. Last year we spent $297 billion and this year we are going to spend $297 billion. We are not saving a penny. The only thing we are saving is the inflation factor. That is the single item that is being saved.

The President requested a wonderful cut on his part. It was going all the way down from $307 billion to $304 billion. And then we, with great courage and a lot of fortitude, cut it all the way back to $297 billion. That is the same amount we spent last year.

It does not provide for inflation. But the fact is we have a bill on the floor today that continues the greatest peacetime military buildup that this country has ever seen.

After earlier wars, after World War II, we cut back drastically. Now, we were not at war, we had the buildup because of the cold war, and we are not cutting back drastically.

We still have in this bill, billions of dollars for strategic weapons that we were originally called upon to pay for because they were to be targeted on the Soviet Union. But now we have the agreement, and we are not doing that; we are cutting back with the Soviet Union.

This bill has in it all the bells, all the whistles, and the American people will be excited because we have Brilliant Pebbles in it. Brilliant Pebbles.

This Senator thinks that the American people would rather be spending those dollars for brilliant students rather than for Brilliant Pebbles. We do not need all of the exotic weaponry that is called for and paid for in this bill.

And if you do not believe me, and you do not believe the CIA, listen to what others are saying.

Richard Perle, former Assistant Secretary of Defense under President Reagan, formerly known as the hardline "prince of darkness"—never a man that I thought I would be quoting here on the floor of the U.S. Senate—but even he says it is "No longer possible to imagine a cohesive Warsaw Pact invasion." He says we ought to cancel the MX, the Midgetman missile, the advanced tactical fighter, and slow down SDI. That from Richard Perle.

Former Secretary of Defense, James Schlesinger, no "peacenik," a man who all this country respects, agrees that the Warsaw Pact's "role as an alliance and a military threat has largely been broken."

Mr. COHEN. Will the Senator yield for a question?

Mr. METZENBAUM. I will not.

I will be glad to yield to questions at the conclusion of my remarks.

And another luminary, former Secretary of Defesne Harold Brown, says we ought to limit SDI to research only, cut troops in Europe, and mothball some of our aircraft carriers.

Even John Lehman, the architect of Reagan's 600-ship Navy effort, now says that the active Navy can make do with 450 ships.

The man who pushed us and pushed the country toward a 600-ship Navy now says we can get along with 450 ships.

Mr. President, do we not understand the American people? There is a consensus out there. They truly want us to cut back on wasteful defense spending. They want us to cut back on exotic weaponry. They are not looking for more. That was yesteryear, when we thought we ought to be throwing billions and billions and billions of dollars for defense weapons.

Go out and run for reelection and tell your constituents that, yes, you want to spend more and more on SDI and Brilliant Pebbles and all of the other exotic weaponry. See how loud the applause will be. But tell them you want to take some of that money and use it to balance the budget, some of that money for education, some of that money for the environment, some of that money so that people can have adequate medical care in this country, and I will guarantee you the applause will be louder because that is what the American people want, and we are not giving it to them here this evening.

Ten billion dollars—3 percent out of a $300 billion expenditure. It is peanuts. It is nickels and dimes. Three billion dollars is all we can find to cut back. And when you try to get an amendment, not one single amendment was adopted by reason of a coalition, a grouping of some Members on this side, and an overwhelming number on the other side of the aisle.

Some have said that additional cuts would cause morale problems in the military and disrupt our national security. I think that what we are doing will cause morale problems with the American people. And I believe that the military would understand if we were to cut back.

This bill preserves the most expensive and the most unjustified weapons system ever to be fobbed off on the American taxpayers, the B-2 bomber. The Air Force recently has been unable to justify the need for this airplane. Do not hold your breath until the day that the Air Force sends one of these $860 million bombers off on a Third World "Show the Flag" operation.

Can you believe it? Spending $860 million on one airplane, almost a billion dollars. And it to this day has not been proven to have the value claimed for it; has not even been proven to have much value at all.

Had we canceled the B-2, we would have saved the American taxpayers some $34 billion dollars over the next 6 years. Let us put it in perspective. What are we talking about? Two B-2 bombers would pay for the entire Head Start Program for a year, or cover the entire budget for the National Cancer Institute.

When we do not have the money even to pay for vaccinations for kids, we have money to pay for the B-2 bomber, that is not very worthwhile.

One and a half B-2 bombers would cover the cost of the entire Federal range of Federal drug and alcohol abuse treatment grants. The cost of one B-2 is equivalent to what the En-

vironmental Protection Agency spends for pollution abatement control and compliance in a total year—one B-2—against all that we spend for pollution abatement control and compliance.

This bill pours another $3.7 billion into star wars. Go out and ask the American people if they want star wars. My guess is 90 percent of them will say: What are you talking about?

And why are we doing it? Who wants it? Why do we need it? Why not just put the money in a rocket and shoot it off into space? The impact on our national security would be just the same.

Suppose we encircled the globe with 4,600 weapons satellites and they all worked perfectly? Would the world really be safer? Not according to the Joint Chiefs of Staff. Gen. John D. Robinson of the Joint Chiefs of Staff testified before the House Armed Services Committee that the Soviets would simply build more ICBM's to overwhelm our defenses. He said the Soviets are capable of developing new technologies to overcome our capabilities.

Here is a weapon that does not even work—the AMRAAM. This bill authorizes $800 million to buy the AMRAAM missile next year. For all I have heard about the AMRAAM, the last thing I would want as a pilot going up against Saddam Hussein's Air Force is a bunch of AMRAAM missiles under the wings of my plane.

We ought to cancel that program. But, no, we do not cancel programs. We just throw more and more money at research and checking and more research and adding on to the original expenditure. That $800 million would be better spent retraining American workers who are out of a job because we cannot compete with our allies.

What about the issue of the troops? For 45 years the taxpayers of the United States have paid more money out their pockets to defend Europe than all the taxpayers in Europe combined. Is that not unbelievable that we here in this country, getting clobbered by some of our European allies and soon to be clobbered even more when the EC becomes a reality, we have been spending more money out of the pockets of American taxpayers to defend Europe than all of the taxpayers in Europe combined—$160 billion each year. Almost $700 for every man, woman, and child in America. What an outrageous, unbelievable subsidy, and we do nothing about it.

The standard of living, understandably, is higher in Europe than it is in our country. Their health care is free. We do not have health care for many of our people. Their education is free. We have substandard education for many of our people. Free day care is provided in Europe at government expense. Not so here. They are cleaning our clocks, economically, and we are paying for it with American taxpayers's dollars.

What does this bill do? It reduces U.S. troop strength in Europe by a miniuscule amount—50,000 out of 311,000 U.S. combat troops stationed there. Months ago President Bush announced he wanted to withdraw 80,000 troops. Why not do it? Even that is too little. But 80,000 is better than 50,000. The fact is, we could cut defense spending by 50 percent over 10 years, but we just do not have the temerity and we do not have the courage and maybe we do not have the intelligence to do it. We do not need the B-2, the Minuteman, SDI, and missiles that do not work. We need to refocus. We have to learn what our real priorities are in this country. We are facing a whole new set of threats.

Here we have what has developed in the Middle East, as we meet here today, where regional dictators like Hussein have been able to move in on Kuwait and maybe shortly move in on Saudi Arabia. With all of our military power and all the Soviet military power and all the European military power, nobody seems to have an answer. Our $300 billion bill has no answer in it either. And I am not sure, I regret to say, our military leaders have any answer either.

What are we facing in this country as we meet here today? We are facing worldwide economic competition from our allies, and we are providing the dollars to defend them, and we are pouring billions of our dollars out of this country into their country for that purpose. We have lost millions of manufacturing jobs in steel and automobiles and electronics in the past decade, because we have neglected to make crucial investments in education and retraining and other domestic priorities while we spend more and more billions building up our defense forces, yes, and throwing away billions of dollars that were poorly spent.

In 10 years, we have built a $1 trillion debt. We have pushed it off on our children and our grandchildren, and much of that $1 trillion debt results from wasteful defense spending. What an embarrassment to us in Congress and what an embarrassment to the American people and what a burden to the American people because they are the ones who are going to pay it.

Most of us will not be around to suffer the criticism from that debacle of the $1 trillion debt. Vast stretches of our cities have become divided battlegrounds, and gangs defend their turf, shooting up their rivals with automatic weapons. An entire generation of inner city youth is lost to crime and drugs, while we do not have the dollars to cope with the dope but we have the dollars for wasteful defense spending. How can we debate the relative importance of an AMRAAM missile when the murder rate in every city is climbing through the roof?

Our negotiators are meeting with the President, trying to figure out what to do about the budget, trying to figure how many dollars we are going to add on the backs of the poor working people of this country with cigarette taxes and liquor taxes and wine taxes and a tax at the airport. Put the tax on the people of this country—tax the poor, tax the middle-income American—but do not cut defense spending.

Who said we have to have half of the dollars come from new taxes and half the dollars come from cuts? If we did what we ought to do, we would be able to find the cuts—not all of them, but substantially more than we are finding in this defense spending bill.

But, no, we cannot change a comma. We have been here for 4 days on this bill, and I do not believe there has been one amendment of any significance that has prevailed. I am going to vote against this bill because it is fat. I am going to vote against this bill because it is wrong. I am going to vote against this bill because it is a letdown of the American people.

It is more and more of the same.

My friends in the Senate, I just do not think we can afford any more of that. I yield.

The PRESIDING OFFICER (Mr. AKAKA). The Senator from Missouri is recognized.

Mr. BOND. Mr. President, I thank the chair.

During the very informative debates we have had today, most of our colleagues have been focusing on the important discussions on this floor. But, given the tremendously important and very significant things that are happening in the Middle East, I took a little time off to watch CNN this afternoon. I found there a discussion. Admiral Crowe, the former Joint Chief of Staff, whom the senior Senator from Arkansas said—I would ask the Senator from Ohio not to leave, if I could, because I wanted to share with my colleague a discussion that the Senator from Ohio had with Admiral Crowe that I thought was very important and very significant.

The Senator from Ohio made the same statement that he made here, that we spent $300 billion and we cannot do anything in the Middle East.

I think my colleagues would find very informative the answer of Admiral Crowe. He said: "Senator, we have the military ability. The question is the political will."

I just wanted to share that with my colleagues here today because I think we are facing a very important question of political will. I have listened with great interest to the arguments and the comments of the distinguished Senator from Ohio. Certainly,

he is correct in saying that many domestic spending programs are far more popular and we would like to be able to spend money that we are now spending on defense in domestic programs. But, Mr. President, I think we have played a very important role in providing an adequate defense to protect Europe for the last 45 years. The 1930's may only be 50 or 60 years ago, but they provide us a very important lesson because elected leaders in that period of the thirties were saying, we need to spend more money on social programs and not on defense. And they made a tragic mistake. Those who ignore the lessons of history are committed to make them again.

I hope my colleagues will not make those same errors. We can get rid of wasteful things like the M-1-A tank that the House put back in. There are items of waste. But we need a strong defense.

I commend the distinguished chairman of the Armed Services Committee, the Senator from Georgia and our ranking member, the Senator from Virginia, who have worked hard to come up with a good compromise. I do not agree with all of it, but I urge my colleagues to support this bill and to support the very important defense mission we are authorizing here today.

I yield the floor.

Mr. WARNER. Mr. President, I thank my distinguished colleague from Missouri.

Mr. President, I regret the Senator from Ohio is off the floor for reasons, I am sure, which are valid. I, too, wanted to address him face to face because I have had the privilege to work with a distinguished Member of this body, the Senator from Georgia [Mr. NUNN], who carries with him a great tradition, not only for fairness, not only for sound judgment, but also for listening carefully to the views of all Members of this body as he, together with all Members of the Senate Armed Services Committee, worked diligently to put together this piece of legislation.

This piece of legislation represents, in my judgment, the high water mark as we pursue the budget summit, as we pursue the prioritization of the fiscal problems that we have before this Nation today.

I regret that one Member of this body has spoken so strongly against these efforts which, in every respect, have been bipartisan. I might note, during the course of this lengthy debate on this bill and the rollcall amendments that have been taken, on every single amendment, save one, the basic position of the Armed Services Committee has prevailed. I wish to thank the Members of this body for reposing in this committee of 20 Senators that trust and confidence to make those difficult judgments on behalf of the Senate as a whole.

Recognizing that we are anxious to try to bring this matter to a final conclusion as quickly as possible, to accommodate the many Senators and, indeed, the staff who have waited here so long, I will at this moment yield the floor.

Mr. NUNN. Mr. President, I think we are very close to final passage. But I would like to ask the staffs of the Senator from Montana and the Senator from Louisiana, Senator BAUCUS and Senator JOHNSTON, to alert both Senators that they are needed on the floor. We have one further matter that we did not think was going to be a problem. I hope it will not be a problem. It is a jurisdictional matter.

There is a provision in the bill that has caused some concern in the Energy Committee about jurisdiction. We have worked with the Energy Committee staff—Senator JOHNSTON and I worked with them—to try to take care of that problem. We have been working that one for 3 or 4 days. We thought we ironed it out, and we find in correcting that problem we have stirred up some considerable concern on the Environmental Committee. The Senator from Montana has made that concern known to us.

In this set of circumstances, I suggest to my colleagues that we leave the bill as it is and we go to conference. But I feel obligated, having worked in good faith, and I worked in good faith with the Senator from Louisiana, that he would like me to propose the amendment we worked out, and then we will see what the Senate would like to do with it. I will need both the Members on the floor. I hope they can come over.

Mr. WARNER. Mr. President, the leadership brought to the attention of both the chairman and myself that a number of Senators have very tight travel commitments. It is hoped that that matter can be brought to a conclusion as early as possible.

I also join the distinguished chairman in observing that although he, Senator JOHNSTON, Senator BAUCUS, and I believe Senator GORE, have worked diligently to resolve this, there are Members on this side, including this Senator, who do have concerns with the package as it presently stands.

Mr. NUNN. Mr. President, I understand the Senator from Virginia has concerns with the proposal that Senator JOHNSTON and I worked out. I respectfully suggest to my colleagues that the best way to handle this is for us to make a good faith pledge to get together before we go to conference and to discuss this with both committees in good faith and see if we cannot come up with some common solution.

Mr. President, while we are waiting for those two Senators to come to the floor, we have certain technical amendments. During the review of the bill, since the bill was reported by the committee on July 20, a number of items have been noted in which technical and conforming changes are required. This amendment would make those changes. Mr. President, this has been cleared on both side.

Mr. WARNER. Mr. President, that is correct.

AMENDMENT NO. 2593

(Purpose: To make technical corrections)

Mr. NUNN. Mr. President, do we have an amendment still pending?

The PRESIDING OFFICER. There are two amendments pending.

Mr. NUNN. I ask unanimous consent the pending amendments be laid aside temporarily, and I send to the desk technical amendments, and I ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN] proposes amendments numbered 2593.

Mr. WARNER. Mr. President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 9, strike out line 12 and insert in lieu thereof the following:

"(1) For the Army, $5,696,323,000.".

On page 11, line 17, strike out the period and insert in lieu thereof ", subject to the customary reprogramming procedures.".

On page 19, strike out lines 7 through 10, and insert in lieu thereof "not more than $3,000,000 shall be available for distribution of humanitarian relief supplies to non-Communist, noncombatant, displaced persons or refugees at or near the border between Thailand and Cambodia."

On page 105, line 12, strike out "(a)," and insert in lieu thereof "(b),".

On page 145, lines 10 and 11, strike out "each House of the Congress" and insert in lieu thereof "the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives,".

On page 145, lines 14 and 15, strike out "each House of the Congress" and insert in lieu thereof "such committees".

On page 208, line 4, insert "authorized to be" after "Funds".

On page 212, between lines 20 and 21, insert the following new subsection:

(e) RELATIONSHIP TO OTHER LAWS.—(1) The authority provided in this section for the support of counter-drug activities by the Department of Defense is in addition to the authority provided for such purpose under chapter 18 of title 10, United States Code.

(2) Nothing in this section shall be construed to modify or supersede the provisions of section 375 of title 10, United States Code, or the provisions of section 376 of such title, except to the extent provided in subsection (c) of this section.

On page 215, line 15, strike out "five-year defense program" and all that follows through line 16 and insert in lieu thereof the following: "five-year or six-year defense program submitted pursuant to section 114a of title 31, United States Code.".

On page 215, between lines 16 and 17, insert the following new subsection:

(d) SIX-YEAR NATIONAL FOREIGN INTELLIGENCE PROGRAM.—Notwithstanding the reference in subsection (a) to a five-year national foreign intelligence program, if in any year the Director of Central Intelligence prepares a six-year national foreign intelligence program, the Director may submit that program to the committees referred to in subsection (a) in lieu of a five-year national foreign intelligence program.

On page 223, line 24, strike out "the those" and insert in lieu thereof "those".

On page 302, line 4, strike out "section 501" and insert in lieu thereof "section 2501".

On page 375, line 14, strike out "section 201" and insert in lieu thereof "section 3201".

On page 380, line 9, strike out "Defense" and insert in lieu thereof "Energy".

In amendment number 2586, on page 2, strike out lines 1 through 4.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendment (No. 2593) was agreed to.

Mr. WARNER. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. NUNN. I move to lay that motion on the table.

The motion to table was agreed to.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the majority leader, after consultation with the Republican leader, may at any time, notwithstanding the provisions of rule XXII, proceed to the consideration of H.R. 5229, the Department of Transportation appropriations bill, and that it be considered under the following limitations:

That the committee amendments be considered and agreed to en bloc for purpose of further amendment; that there be 30 minutes on the bill with the time equally divided and controlled in the usual form; that there be 30 minutes for Senator NUNN to speak; that the only amendments in order, other than the committee reported amendments and technical conforming amendments, be the following: 5 minutes on an amendment by Senator DOLE: 5 minutes on an amendment by Senator FORD regarding aviation flight service stations; 5 minutes on an amendment by Senator MURKOWSKI regarding Konsai Airport; 10 minutes on an amendment by Senator HEINZ to strike section 32; that no motions to recommit be in order; that the time be controlled in the usual form; that when all time is used or yielded back, and the Senate has disposed of the amendments and proceed to vote, without intervening action or debate, on final passage.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The Senate continued with the consideration of the bill.

Mr. NUNN. Again, I put out a call to the Senator from Louisiana and the Senator from Montana, because we have a number of our colleagues who want to catch a plane.

Mr. WARNER. Mr. President, if I understand the distinguished chairman of the Senate Armed Services Committee, all matters now, technical and otherwise, have been concluded and there is just one matter remaining; is that correct?

Mr. NUNN. The Senator is correct.

Mr. President, as I said at the beginning of the debate on this bill, this is a far reaching bill and marks an important shift in our national security policy.

The Armed Services Committee worked very hard on both sides of the aisle to make a prudent and realistic assessment of the dramatic changes in the threat to our national security that have taken place in the past year. We have outlined the changes in the military strategy we need. We believe they are necessary in light of these changes in the threat.

I know there has been considerable discussion about the amount of money that is saved in this bill. Maybe to some people it is not enough, to others it is too much. We believe that what we have done is something that is rather unusual in this town. We have not started with the budget. We have started with the threat.

We have reassessed the threat. We have adopted a number of key elements of change strategy that make a very large difference in our military approach, and we have adjusted the budget accordingly.

The budget savings may seem to be not enough for some people. I have heard that here today; $10 billion in outlays is a lot of money. We cut $26 billion in budget authority. When I heard the Senator from Ohio speaking a few minutes ago—and I have great respect for him—he continued to talk about the $10 billion.

I hope everyone understands that outlay cuts are hard to make because they are based on previous years' budget authority. We cut $26 billion off the CBO baseline in budget authority. Over a period of 5 years, we think we have done a prudent job of protecting our national security; adjusting, primarily relating to the increased warning time in Europe and the reduced threat; but recognizing the world is still a dangerous place, that we have dangers in the Middle East, we have dangers in the Pacific, we have continued response; We have continued responsibilities, although reduced responsibilities in NATO. We have continued arms control negotiations going on. For all of these reasons we have developed here a manageable, a prudent, and we believe a responsible reduction in defense expenditures related to the threat and changed elements of strategy.

It also, I think, should be noted that what we are talking about saving over 5 years, we are talking about saving between $180 billion and $200 billion based on the changed direction of this bill. We are trying to take down the personnel structure gradually so we do not terminate people involuntarily. We have 100,000 people, many coming out of this bill. Over 5 years we anticipate the base structure will be reduced approximately 25 percent.

I hope everyone can put in perspective what $180 to $200 billion is. The summit conference, between the President and the leadership of Congress on both sides of the aisle, the goal there that they are struggling with is to save $500 billion over 5 years. This bill represents between 35 and 40 percent of that total. So anyone saying defense is not making a contribution is simply ignoring what we are doing here and not looking at the facts.

The facts I think are irrefutable but we are not galloping out to try to save every penny we possibly can at the expense of the men and women in the military. We choose not to take that course. We believe those men and women, who served so well and who have helped bring about the tremendous changes that have transpired in the last year that mean so much for freedom for so many people, should be dealt with fairly and equitably. We have tried to take that course.

We have also, as I mentioned, tried to make our colleagues understand, and they may have understood by their support of this bill that the world is still dangerous, that America still has responsibilities in the world, that we still are going to have to maintain a strong military to help preserve the peace in the world. So I hope that our colleagues who do not believe we have saved enough money will take that into account.

Mr. President, I thank the staff on both sides. They have worked together superbly. I do not believe we have ever had a staff in the Armed Services Committee, or for that matter any other committee, that has the degree of expertise, and professionalism, and integrity.

I can certainly say we have never had the kind of smooth working relationship that we have enjoyed in the last 2 years, and an awful lot of that is due to the leadership of Pat Tucker, on the minority side; Arnold Punaro, on the majority side; I would also say the superb continued consistent leadership of my colleague and friend from Virginia. I could not have a better partner to work with in this en-

39-059 O-91-34 (Pt. 16)

deavor, which is so important for our Nation. I thank him.

Mr. WARNER. Mr. President, I respect the chairman and I appreciate his kind remarks and return them in every way because it has been a team effort, not only this year but for many past years, and perhaps with a little luck, who knows, for several years to come.

I join with him in expressing total confidence in the staff of both sides. We almost take them as an interchangeable, fungible commodity, going backward and forth on all issues in our committee as a whole. I think it achieves a level of bipartisanship far higher than most committees are capable of attaining in the spirit of trying to work on behalf of national security.

Mr. NUNN. Mr. President, this bill begins the process of implementing a new military strategy to meet the challenges of the last decade of this century. It puts the Defense Department and each of the military services on a responsible and manageable glide path toward a smaller and restructured defense establishment over the next 5 years.

I am very pleased by the degree of consensus that has marked the Senate's debate on this bill. The Senate has endorsed the major themes and initiatives contained in the committee bill: maintaining nuclear deterrence at lower levels and with greater stability; shifting to a reinforcement strategy with fewer U.S. forces deployed overseas; making greater use of the National Guard and Reserve forces; moving toward a policy of flexible readiness in the military services; and developing a resource strategy based on "fly before buy" for major weapons systems; improving existing platforms and reducing new starts; and encouraging innovative research to preserve our technological superiority.

Mr. President, we have debated this bill for about 34 hours over the last 3 days and nights. For those who are interested, we have considered approximately 90 amendments—about normal for the defense authorization bill.

We have had only several quorum calls and no real dead time since we started debating this bill Wednesday evening. I want to thank all Senators for their cooperation and patience in this regard.

I want to particularly thank the majority leader, Senator MITCHELL, for his help in getting up to this point. He not only insisted that we could finish this bill before the recess, he devoted a great deal of his time and energy over the last 3 days making sure that we did.

I also want to thank the Republic leader Senator DOLE for all of his help. Without the personal attention both leaders gave to this bill, we would have been here this time next week debating it.

I want to thank all of the members of the Armed Services Committee for the spirit of bipartisanship and cooperation which has marked our work on the committee this year.

A great deal of the credit for this bipartisanship and cooperation goes to the ranking minority member of the committee, my partner in managing this bill, Senator WARNER. He is a true leader in our committee and in the Senate on national security issues, and I thank him for all of his counsel and assistance.

I want to thank the professional and dedicated Armed Services Committee staff, led by Aronld Punaro and Pat Tucker, for all of their hard work this year. They come in early and stay late and their work is superb.

I want to thank our policy committee staff and our exhausted floor staff for all of their help during the last 3 days.

And I want to thank Hugh Evans and Greg Scott of the Legislative Counsel's office for all of their help. I know that for every amendment that is considered on the floor, they have been asked to draft a dozen.

We face a difficult conference with the House, Mr. President, but we will do our best to bring back a conference report in September to guide the appropriations process.

LAND CONVEYANCE PROVISION

Mr. BIDEN. Mr. President, I would like to take just a few minutes today to discuss one provision of the bill before us. This provision, section 2824, is nearly identical to the text of S. 2696, a bill I have sponsored that authorizes the conveyance of an Army-owned parcel in Sussex County, DE, to the State of Delaware.

The passage of this legislation marks an important victory for the people of Delaware, to whom this land was granted over 300 years ago. That land grant, made by William Penn in 1682, has been interrupted for the last 50 years because the property has been owned by the Department of Defense, which acquired the land at the beginning of World War II for coastal defense. At that time—in 1941—the War Department seized over 1,000 acres at Cape Henlopen, DE, which is located at the foot of the Delaware Bay. The State of Delaware agreed to this, with the understanding that it would be returned to the State once it was no longer used for national defense purposes.

Fourteen years after the war ended, the Army deactivated the post, then known as Fort Miles. Soon after, a 30-year effort to have the land returned to the State began. Slowly but surely, the members of the Delaware congressional delegation have succeeded in securing the return of most of the 1,000 acres. This effort has not come without a struggle, as the Department of Defense has often resisted the return of the property.

In particular, the effort to regain the 96-acre parcel that is the subject of my bill has dragged on over two decades. Indeed, I have been working to return this land to State ownership since coming to the Senate in 1973.

At that time, I did not anticipate that it would take me 18 years to succeed. But persistence has paid off, as the Army, the owner of this particular parcel, has finally agreed to return the land to the State of Delaware.

With the enactment of this legislation, the land will be returned to its rightful owners—the people of Delaware. This parcel—consisting of 96 acres of prime real estate, including 1,700 feet of beach front—will be incorporated into Cape Henlopen State Park, which surrounds the property. As a result, the citizens of Delaware, as well as visitors to our State, will be able to enjoy 21,250 feet of uninterrupted beach—a beach that, I believe, is one of the finest on the east coast.

Moreover, the land will be available for the use of all citizens—civilian and military—fulfilling the vision that William Penn had over 300 years ago when he granted this land for the common use of all.

If I could have the attention of the chairman of the committee, I would like to clarify section 2824 of the pending measure. Over the course of the past 6 months, I have been negotiating with the Army about the details of the transfer I have described. The terms of the transfer have been agreed to by all parties concerned, and these terms are encompassed in this section.

A provision was added during the Armed Services Committee markup to require that the transfer shall be made not later than 1 year after the enactment of the legislation. I am grateful to the chairman for adding this provision, which ensures that the transfer process will not drag on for an extended period of time.

Quite frankly, I do not think the Army will need a year. The bill is designed to cut the redtape usually associated with land transfers so as to expedite the conveyance of this property.

I raise this issue because the property in question is an Army recreation area that is open only in the summer. My concern is this: Any needless delay in the transfer of this land could mean that the property—the Fort Meade Recreation Area—will again open for the season next year. If that occurs, then the transfer of the land would be delayed until the fall of 1991.

In negotiations with the Army, I have made it clear that it is my hope that the Fort Meade Recreation Area will not open in 1991. The State of Delaware has prepared a management

plan for incorporation of this property into the surrounding State park; any postponement of the transfer of the parcel would delay implementation of this plan.

Does the chairman agree with my view that the transfer of this land should occur as expeditiously as possible, and that the Fort Meade Recreation Area should not open in 1991?

Mr. NUNN. I completely agree with the Senator from Delaware. It is the intent of the committee that the land should be returned to the State of Delaware as quickly as possible.

Mr. NUNN. I completely agree with my view that the transfer of this land should occur as expeditiously as possible, and that the Fort Meade Area Recreation should not open in 1991?

Mr. BIDEN. I thank the Senator. Would he be willing, if necessary, to seek the inclusion of language in the conference report to that effect?

Mr. NUNN. I would be happy to consider such language.

Mr. BIDEN. I appreciate the assistance of the chairman on this matter. He and the ranking member, Senator WARNER, have been extremely helpful to me on this legislation, and I am very grateful to them. I would also like to compliment them for the fine work they have done on the defense bill.

I thank my colleagues.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. D'AMATO. Mr. President, I do not wish to impinge on the time of my colleagues, but if we are to have passage, and I do say with a little bit of exasperation, I am going to ask if we cannot hold the rhetoric down. Otherwise, I have something I would like to say. I have not said it.

I would like to know. Do we have an outline of some kind? I mean this very seriously. I do not mean to be flippant. If we are going to do it, fine. If not, there is something I would like to speak about. It is relevant to the defense budget. It also takes on overtones as it relates to the Middle East and a certain conference I had today with the Deputy Prime Minister or Deputy DCM of Washington, Japanese DCM, in terms of the kind of cooperation we could look forward to.

But if our colleagues are going to wrap it up, I am willing to sit down. If they are going to keep talking and talking then I am going to take some time.

Mr. NUNN. Would the Senator take yes for an answer?

Mr. D'AMATO. Yes.

Mr. NUNN. I have to take one other step. I do send to the desk an amendment on behalf of myself and the Senator from Louisiana.

AMENDMENT NO. 2594

(Purpose: To substitute revised Strategic Environmental Research Program provisions for title X)

Mr. NUNN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. NUNN], for himself and Mr. JOHNSTON, proposes an amendment numbered 2594.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 190, strike out line 6 and all that follows through line 26 on page 207, and insert in lieu thereof the following:

TITLE X—STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

SEC. 1001. STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

(a) PROGRAM REQUIRED.—(1) Title 10, United States Code, is amended by inserting after chapter 171 the following new chapter:

"CHAPTER 172—STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

"Sec.
"2901. Strategic Environmental Research Program.
"2902. Joint Strategic Environmental Research Program Council.
"2903. Executive Director.
"2904. Strategic Environmental Research Program Scientific Advisory Board.

"§ 2901. Strategic Environmental Research Program

"(a) The Secretary of Defense and the Secretary of Energy jointly shall establish a program to be known as the 'Strategic Environmental Research Program'.

"(b) The purposes of the program are as follows:

"(1) To address environmental matters of concern to the Department of Defense and the Department of Energy through support for basic and applied research and development of technologies that can enhance the capabilities of those departments to meet their environmental obligations.

"(2) To identify research, technologies, and other information developed by the Department of Defense and the Department of Energy for national defense purposes that would be useful to governmental and private organizations involved in the development of energy technologies and of technologies to address environmental restoration, waste minimization, hazardous waste substitution, and other related environmental concerns, and to transfer such research, technologies, and other information to such governmental and private organizations.

"(3) To furnish other governmental organizations and private organizations with data, enhanced data collection capabilities, and enhanced analytical capabilities for use by such organizations in the conduct of environmental research, including research concerning global environmental change.

"(4) To identify technologies related to energy conservation, environmental restoration, hazardous waste substitution, and waste minimization developed by the private sector that could be useful for Department of Defense and Department of Energy defense activities and to provide for the use of such technologies in the conduct of such activities.

"§ 2902. Joint Strategic Environmental Research Program Council

"(a) There is established a Joint Strategic Environmental Research Program Council (hereafter in this chapter referred to as the 'Council').

"(b) The Council is composed of ten members as follows:

"(1) The Assistant Secretary of Defense responsible for matters relating to production and logistics.

"(2) The Director of Defense Research and Engineering.

"(3) The Vice Chairman of the Joint Chiefs of Staff.

"(4) The Assistant Secretary of the Air Force responsible for matters relating to space.

"(5) The Assistant Secretary of Energy responsible for matters relating to defense programs.

"(6) The Assistant Secretary of Energy responsible for matters relating to environmental restoration and waste management.

"(7) The Director of the Office of Energy Research of the Department of Energy.

"(8) The Assistant Secretary of Energy responsible for matters relating to conservation and renewable energy.

"(9) The Administrator of the Environmental Protection Agency.

"(10) The Executive Director of the Council, who shall be a non-voting member.

"(c) The Secretary of Defense shall designate a member of the Council as chairman for each odd numbered fiscal year. The Secretary of Energy shall designate a member of the Council as chairman for each even numbered fiscal year.

"(d) The Council, under the control and direction of the Secretary of Defense and the Secretary of Energy in their respective departments, shall have the following responsibilities:

"(1) To develop policies and procedures for implementation of the Strategic Environmental Research Program.

"(2) To enter into contracts, grants, and other financial arrangements, in accordance with other applicable law, to carry out the purposes of the Strategic Environmental Research Program.

"(3) To prepare an annual five-year strategic environmental research plan that shall cover the fiscal year in which the plan is prepared and the four fiscal years following such fiscal year.

"(4) To promote the maximum exchange of information regarding and to help minimize duplication of environmentally related research and development activities through close coordination with the military departments and Defense Agencies, offices within the Department of Energy, other departments and agencies of the Federal Government, State and local governments, and other organizations engaged in such activities.

"(5) To ensure that research and development activities under the Strategic Environmental Research Program do not duplicate other ongoing activities sponsored by the Department of Defense, the Department of Energy, or any other department or agency of the Federal Government.

"(e) In carrying out subsection (d)(1), the Council shall develop policies and procedures for accomplishing the goals of—

"(1) providing access by Federal Government personnel, State and local government personnel, college and university personnel, industry personnel, and the general public to data under the control of or otherwise available to the Department of Defense that is relevant to local, regional, and global environmental change by—

"(A) identifying the sources of such data;

"(B) publicizing the availability and sources of such data by appropriately targeted dissemination of publicity to such personnel and the general public and by other means; and

"(C) providing for review of classified data relevant to environmental matters with a view to declassifying or preparing unclassified summaries of such data;

"(2) providing governmental and nongovernmental entities with analytic assistance, consistent with national defense missions, including access to military platforms for sensor deployment and access to computer capabilities, in order to facilitate environmental research;

"(3) identifying energy technologies developed for national defense purposes (including electricity generation systems, energy storage systems, alternative fuels, bio-mass energy technology, and applied materials technology) that might have environmentally sound, energy efficient applications for other programs of the Department of Defense and the national security programs of the Department of Energy, particularly technologies that have the potential for industrial, commercial, and other governmental applications, and to support programs of research in and development of such applications;

"(4) identifying and supporting programs of basic and applied research, development, and demonstration of technologies useful—

"(A) to facilitate environmental compliance, remediation, and restoration activities of the Department of Defense and the Department of Energy;

"(B) to minimize waste generation and for materials recycling by such departments;

"(C) to substitute use of nonhazardous, nontoxic, nonpolluting, and other environmentally sound materials practices and substances for use of hazardous, toxic, and polluting materials and substances by such departments; or

"(D) to treat, store, and dispose of waste in a manner that will not adversely impact the environment or human health;

"(5) identifying and supporting research, development, and application of other technologies developed for national defense purposes which, not only are directly useful for programs, projects, and activities of such departments, but also have useful applications for solutions to such national and international environmental problems as climate change and ozone depletion;

"(6) encouraging and supporting transfer to the private sector of technologies referred to in clauses (2) through (5) and promoting the use of cooperative, cost-shared arrangements under the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) and other applicable laws;

"(7) identifying and planning for the demonstration and use of existing environmentally sound, energy efficient technologies developed by the private sector that could be used by the Department of Defense and the Department of Energy;

"(8) identifying military specifications that prevent or limit the use of environmentally beneficial technologies, materials, and substances in the performance of Department of Defense contracts and recommend changes;

"(9) ensuring that the research and development programs identified for support pursuant to the policies and procedures prescribed by the Council are closely coordinated with, and do not duplicate, ongoing activities sponsored by the Department of Defense, the Department of Energy, and other Federal agencies;

"(10) ensuring that there is participation by industry and universities in conducting research, development, and demonstration activities; and

"(11) providing for the Secretary of Defense, the Secretary of Energy, and the Administrator of the Environmental Protection Agency jointly to develop—

"(A) innovative approaches to the prevention of environmental pollution caused by waste streams and other emissions resulting from industrial processes, post-consumer solid waste sewage and waste water, and other sources of air and water pollution; and

"(B) thermal technologies, biological technologies, chemical technologies, and other innovative technologies for the treatment of hazardous waste.

"(f) The Council shall be subject to the authority, direction, and control of—

"(1) the Secretary of Defense in prescribing policies and procedures under subsection (d)(1); and

"(2) the Secretary of Energy in prescribing the applicability of any such policies and procedures to the national security programs of the Department of Energy.

"(g)(1) Not later than February 1 of each year, the Council shall submit to the Secretary of Defense and the Secretary of Energy an annual report on the annual five-year strategic environmental research plan prepared pursuant to subsection (d)(3).

"(2) The report shall contain the following:

"(A) Actions to be taken during the five-year period covered by the plan to prevent duplication of research and development activities undertaken pursuant to the program.

"(B) A description of each project selected or recommended by the Council for support and funding, including the duration of and total estimated or, if known, actual cost of—

"(i) each such project supported during the fiscal year in which the plan is submitted and the preceding fiscal year; and

"(ii) each such project proposed for funding during the fiscal year in which the annual report is submitted and the following four fiscal years.

"(C) The amounts requested, in the budget submitted to Congress pursuant to section 1105(a) of title 31 for the fiscal year following the fiscal year in which the annual report is submitted, for the programs, projects, and activities of the Strategic Environmental Research Program and the estimated expenditures under such programs, projects, and activities during such following fiscal year.

"(D) The amount made available, for the fiscal year in which the annual report is submitted, to each Department of Defense laboratory and to Department of Energy facilities.

"(E) The amount requested in the budget referred to in subparagraph (C) for each Department of Defense laboratory and to Department of Energy facilities.

"(F) Any changes in military specifications recommended by the Council, actions to be taken to effectuate any such recommended changes on an expedited basis, and the projected date for each such change.

"(G) A description of all contracts, agreements, or other documents for cooperative research and development activities entered into pursuant to the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) during the fiscal year preceding the fiscal year in which the annual report is submitted.

"(H) Plans for transferring technology and information to other governmental agencies and to nongovernmental organizations involved in environmental research and related matters.

"(I) Plans to increase access to data described in subsection (e)(1).

"(J) Such additional recommendations or proposals, including proposals for legislation, relating to the Strategic Environmental Research Program as the Council considers appropriate.

"(3) The Council shall make a draft of the five-year strategic environmental research plan covered by the report available for public comment for a period of at least 30 days.

"(4) Not later than March 15 of each year, the Secretary of Defense and the Secretary of Energy shall transmit the annual report to the Committees on Armed Services and Appropriations of the Senate and House of Representatives, the Committees on Energy and Natural Resources and on Environment and Public Works of the Senate, and the Committee on Energy and Commerce of the House of Representatives. The Secretaries of Defense and Energy may submit such comments on the annual report as each Secretary considers appropriate.

"§ 2903. Executive Director

"(a)(1) There shall be an Executive Director of the Council appointed jointly by the Secretary of Defense and the Secretary of Energy.

"(2) The position of Executive Director shall be a Senior Executive Service position.

"(b) Subject to the authority, direction, and control of the Secretary of Defense, the Executive Director is responsible for the management of the Strategic Environmental Research Program in accordance with the policies established by the Council.

"(c) The Executive Director may enter into contracts or other agreements in accordance with applicable law, except that the Executive Director shall first obtain the approval of the Council for any contract or agreement in an amount equal to or in excess of $500,000 or such lesser amount as the Council may prescribe.

"(d)(1) The Executive Director, with the concurrence of the Council and without regard to the provisions of title 5 governing appointments in the competitive service, may appoint such professional and clerical staff as may be necessary to carry out the responsibilities and policies of the Council.

"(2) The Executive Director, with the concurrence of the Council and without regard to the provisions of chapter 51 of title 5 and subchapter III of chapter 53 of such title, may establish the rates of basic pay for professional employees appointed pursuant to paragraph (1). No such rate of basic pay may exceed the rate of basic pay payable for GS-18 of the General Schedule under section 5332 of such title.

"§ 2904. Strategic Environmental Research Program Scientific Advisory Board

"(a) The Secretary of Defense and the Secretary of Energy shall jointly appoint a Strategic Environmental Research Program

Scientific Advisory Board (hereafter in this section referred to as the 'Advisory Board') consisting of not less than 7 and not more than 14 members.

"(b)(1) Members of the Advisory Board shall be appointed from among persons eminent in the fields of basic sciences, engineering, ocean and environmental sciences, education, research management, international and security affairs, health physics, health sciences, or social sciences, with due regard given to the equitable representation of scientists and engineers who are women or who represent minority groups. At least one member of the Advisory Board shall be a representative of environmental public interest groups and one member shall be a representative of the interests of State governments.

"(2) The Secretary of Defense and the Secretary of Energy shall request—

"(A) the head of the National Academy of Sciences, in consultation with the head of the National Academy of Engineering and the head of the Institutes of Medicine of the National Academy of Sciences, to nominate persons for appointment to the Advisory Board;

"(B) the Council on Environmental Quality to nominate for appointment to the Advisory Board at least one person who is representative of environmental public interest groups; and

"(C) the National Association of Governors to nominate for appointment to the Advisory Board at least one person who is representative of the interests of State governments.

"(3) The Administrator of the National Oceanic and Atmospheric Administration and the Science Advisor to the President shall be permanent members of the Advisory Board.

"(4) Members of the Advisory Board shall be appointed for terms of three years.

"(c) The Advisory Board shall prescribe procedures for carrying out its responsibilities. Such procedures shall define a quorum as a majority of the members, provide for annual election of the Chairman by the members of the Advisory Board, and require at least three meetings of the Advisory Board each year.

"(d) The Advisory Board may make recommendations to the Council regarding technologies, research, projects, programs, activities, technology transfer, and, if appropriate, funding within the scope of the Strategic Environmental Research Program.

"(e) The Advisory Board shall assist and advise the Council in identifying the environmental data and analytical assistance activities that should be covered by the policies and procedures prescribed pursuant to section 2902(d)(1) of this title.

"(f) Not later than March 15 of each year, the Advisory Board shall submit to the committees referred to in section 2902(g)(4) of this title an annual report setting forth its actions during the year preceding the year in which the report is submitted and any recommendations, including recommendations on projects, programs, and information exchange and recommendations for legislation, that the Advisory Board considers appropriate regarding the Strategic Environmental Research Program.

"(g) Each member of the Advisory Board shall be required to file a financial disclosure report under title I of the Ethics in Government Act of 1978 (5 U.S.C. App.).".

(2) The tables of chapters at the beginning of subtitle A of title 10, United States Code, and the beginning of part IV of such subtitle are each amended by inserting after the item relating to chapter 171 the following:

"172. Strategic Environmental Research Program ..... 2901".

(b) INITIAL APPOINTMENTS TO ADVISORY BOARD.—(1) Up to one-half of the members originally appointed to the Strategic Environmental Research Program Scientific Advisory Board established under section 2904 of title 10, United States Code, as added by subsection (a), may be appointed for terms of not more than 6 and not less than 2 years in order to provide for staggered expiration of the terms of members. The Secretary of Defense and the Secretary of Energy shall jointly designate the members appointed for terms authorized under this paragraph and shall jointly specify the terms for which such members are appointed.

(2) The Secretary of Defense and the Secretary of Energy shall make the appointments required by section 2904(a) of title 10, United States Code (as added by subsection (a)(1)), not later than 60 days after the date of the enactment of this Act.

(c) FIRST ANNUAL REPORT OF THE JOINT STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM COUNCIL.—(1) The first annual report required by section 2902(g) of title 10, United States Code, as added by subsection (a), shall be submitted to the Secretary of Defense not later than February 1, 1992.

(2) The Secretary of Defense shall submit to the congressional defense committees, with the annual report referred to in paragraph (1), any recommendations for changes in the personnel management structure of the Department of Defense that the Secretary considers necessary to carry out the environmental activities of the Department of Defense more effectively.

(3) The Secretary of Defense shall prepare and publish with the annual report referred to in paragraph (1) an action plan to integrate the environmental change data gathered from the Department of Defense and the intelligence community into existing Federal and other research programs related to environmental change. In the preparation of the action plan, the Secretary shall consult with the Committee on Earth Sciences of the Federal Coordinating Council on Science, Engineering, and Technology.

(d) FIRST ANNUAL REPORT OF THE STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM SCIENTIFIC ADVISORY BOARD.—The first annual report of the Strategic Environmental Research Program Scientific Advisory Board shall be submitted not later than March 15, 1992.

SEC. 1002. AVAILABILITY OF FUNDS

Of the amounts authorized to be appropriated pursuant to section 201, $200,000,000 shall be available for the Strategic Environmental Research Program established under chapter 172 of title 10, United States Code, as added by section 1001. To the extent provided in appropriation Acts, the amount made available by this section shall remain available until expended.

Mr. NUNN. This is a good faith effort on the part of primarily Senator JOHNSTON and myself, and Senator MCCLURE's staff has been involved to work out a jurisdictional problem between the Energy Committee and the Armed Services Committee. In the course of trying to work that out, we did not take into account sufficiently some of the concerns of the Senator from Montana and the Environment Committee.

We are now caught in a squeeze because none of us have time to work this out. I believe it can be worked out. But I know that the Senator from Montana feels keenly about it and will object to the amendment.

I can only pledge to my colleagues from Louisiana and Montana that I will sit down with them as soon as we get back. In the meantime, we will have the staff working together to see if we can work this out. I believe we can before conference. I will make a good faith pledge to do that.

Mr. JOHNSTON. Mr. President, the history of this amendment is that when the Senator from Georgia and his committee began discussing this subject matter, and the shape of it began to take shape, we reported our concerns to the Senator from Georgia, pointing out that the legislation infringed upon the jurisdiction of the Energy Committee and upon the jurisdiction of the Energy Department, that it plainly did so.

The Senator from Georgia said that was not his intent, and in our very first conversation he said to me words to the effect of we will work it out. That is not our intent.

My relationship is such with the Senator from Georgia that when he says that, I have full confidence in both him and his staff. I knew that Senators in good faith could, in fact, work it out.

Mr. President, over a period of days different staff members dealt with the details of this legislation. Agreements were struck and then problems arose, and agreements were struck and problems arose again in the way that negotiation transpires.

As of last night it was still not agreed to. The Senator from Georgia and I spoke, along with our staffs, and we agreed on the shape of this amendment.

Mr. President, I must tell you that this amendment does not fully satisfy the concerns of either the Energy Committee, myself, Senator MCCLURE, the ranking minority member, nor certainly the Secretary of Energy, Admiral Watkins. He feels more strongly about this than we on the committee do. But again, our relationship is such with the Defense Committee that we will make it work because we support the idea of spending for environment. We support very strongly the idea of using these assets of the Defense Department, particularly DARPA, in a way to help in environmental cleanup.

Mr. President, even though the compromise does not fully suit us, we are willing to go along with it.

Now, Mr. President, at the 11th hour, much to our chagrin and our surprise, we find not only an objection but a threat which I am sure that the

Senator from Montana is fully prepared to follow through on to filibuster the whole legislation because, I do not know but I guess, the intent to take the jurisdiction of the Energy Committee was deemed to be a peril at great price.

He would have to speak for himself on that.

Well, Mr. President, I know that the only thing we can do by prolonging this matter is to discomfort Senators, and we have no objection to do that. The Senator from Georgia tells me when he goes to conference, he will try to work it out. I fully expect that he will do so, because he has said so. I hope that out of conference either something as good as this or perhaps fully dealing with our concerns will come out of that conference.

Mr. President, if it is going to be made to work, Senators must be brought on board with it. I do not believe you are going to have a successful program that is supposed by senior members of the Appropriations Committee.

We are not without resources on the Appropriations Committee. We want to make this thing work, but we are not going to have it jammed on us, take our jurisdiction in energy and natural resources and have it jammed on us. We can play the game, too.

At this point, we are surprised and somewhat shocked by the attitude of the Senator from Montana, but he has his rights, and at this point, 4 o'clock on Saturday afternoon, those are very strong rights.

Having said that, Mr. President, I will not ask that the amendment be further pursued. I think our record is made, and we will leave it to negotiate on another day.

Mr. DOLE. I wonder if we can get a time agreement for final passage. We have been trying to accommodate the leadership here for the last 60 hours. People want to get up and talk for 5, 10 minutes. We want to vote right now without any more speeches.

Mr. NUNN. We are ready.

Mr. DOLE. Let us get a time agreement. This is not going to end in 30 seconds.

Mr. NUNN. I believe I can say to the minority leader I believe it will be in about 30 seconds.

Mr. BAUCUS. I will be brief. I understand the concerns of the Republican leader.

Very briefly, Mr. President, this involves a matter called the joint strategic environmental research program, which sets up a council and a board and is in the authorization bill. The Armed Services staff worked with the Environment and Public Works Committee staff to work out a nomination that is agreed to. At 3 o'clock in the morning my staff found there was going to be an amendment offered, the first notice we ever received of the amendment. Unfortunately, my staff was not consulted in drafting the amendment.

My objections are, No. 1, that the amendment very significantly changes the scope and authority of the council which, in my judgment, involves matters that should be properly in the Environment and Public Works Committee.

Two, it changes the control of the council from more of an independent council directed under the control of the DOD and DOE. That does not, I think, comport well with the original intent of the council.

I hope that the Senator from Louisiana and the chairman of the committee can work out the joint problems between the Energy Committee and Armed Services, but I also hope the conference report does not encroach upon the jurisdiction of the Environment and Public Works Committee.

Mr. NUNN. Mr. President, I ask that the amendment now pending be withdrawn.

The amendment (No. 2594) was withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WARNER. I ask unanimous consent to withdraw amendment No. 2482.

Mr. NUNN. Is that unanimous consent agreed to?

The PRESIDING OFFICER. Will the Senator state his unanimous-consent request?

Mr. WARNER. I hereby withdraw amendment 2482.

Mr. NUNN. Those are the pending amendments.

The PRESIDING OFFICER. The amendment is withdrawn.

The amendment (No. 2482) was withdrawn.

Mr. NUNN. Mr. President, I urge third reading of the bill.

Mr. President, I ask for the yeas and nays on the final passage.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader.

SCHEDULE

Mr. MITCHELL. Mr. President, with the Republican leader present, I want to announce to the Members of the Senate the schedule for the remainder of the day.

Immediately following disposition of this bill, I intend to seek consent to move to the long-term debt limit. I am advised that objection will be made. Therefore, since that does require consent, we will be unable to proceed with the long-term debt limit.

Following that, we will proceed to the Transportation appropriations bill under the time limitation and amendment limitation previously obtained in a unanimous-consent agreement. That will not require any rollcall votes under the agreement.

If what I have stated is correct—and I am going to momentarily yield to the Republican leader for confirmation of that—then this will be the last rollcall vote.

I yield to the distinguished Republican leader.

Mr. DOLE. The majority leader is correct. That will be the sequence.

Mr. MITCHELL. Mr. President, I merely want to thank all Senators for their patience and cooperation in this past legislative period. This has been an extremely productive month in the Senate. I know it has been very difficult for everyone. It could not have occurred but for the cooperation, patience, and diligence of all Senators whom I thank and, particularly, my friend, the distinguished Republican leader.

I yield the floor.

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

ON THE STRATEGIC ENVIRONMENTAL RESTORATION RESEARCH PROGRAM

Mr. DOMENICI. A great deal of work has been done in developing the legislation to create the Strategic Environmental Restoration Research Program.

This program will utilize some of the resources of the existing defense establishment to address critical energy and environmental concerns. The defense complex has a unique and substantial technical capability that can, and should play an important role in improving the scientific knowledge associated with many environmental programs.

The National Laboratories can contribute significantly to our understanding of critical environmental issues including global change, environmental clean up and overall energy security.

Negotiations have been taking place over the past several months, however all interested parties are still not in agreement on several key elements surrounding the creation and operation of the program.

From my standpoint, it is very important that the legislation include the Waste Minimization Program. This research initiative holds tremendous promise. As we approach the 21st century we need to develop new technologies that will generate a smaller amount of waste or wastes that will be less hazardous. We need to rethink our nuclear and chemical processes in order to reduce the amount of waste produced as a byproduct. This program could be the ways and means toward that objective. I say could because although it has been proposed,

it has not yet been incorporated into the bill.

The Strategic Environmental Research Program could be an opportunity for technology transfer and for implementing innovative ways to get the laboratories, universities, and industry to work together. We need to open channels of communication. We need personnel exchanges between the National Laboratories, universities and industry. We know enough about technology transfer to recognize that it is a contact sport. People need to interact in order for it to work.

The Secretary of Energy and I have been working on technology transfer since he was sworn in. We both agree that the Strategic Environmental Research Program could be an opportunity to try some new techniques. It would be a missed opportunity if we didn't move forward and incorporate a bold technology transfer directive into the bill.

We need to expand the universities' involvement in this program.

The bill creates the strategic environmental research council, but there are some concerns about its role. We clearly need a blueprint for this new program and it would seem that the council should have a role in reviewing those blue print, 5-year plans.

Frankly, Mr. President, this is a major undertaking. Whenever a new program is created it is difficult to project how it is going to work. When Congress brings together two major agencies of the Federal Government the drafting problem is compounded.

For this reason I am pleased that the chairman of the Armed Services Committee has agreed to work with me, Senator JOHNSTON, the Secretary of Energy, and other interested parties so that some of these issues can be addressed. From the conversations I have had with the chairman, I am hopeful that several of these elements can be incorporated into the bill.

The problem we are tackling in this initiative took 45 years to create. We need spend the time necessary to put into law the best ideas we can come up with. Protecting our environment, restoring our environment and safe handling of nuclear and mixed wastes are issues of such importance that they demand our total commitment.

I know that the Secretary of Energy has a personal interest in this initiative and a commitment to making it a successful program.

I look forward to working with the chairman of the committee to address these concerns as the bill progresses through the legislative process.

STRATEGIC DEFENSE INITIATIVE

Mr. ADAMS. Mr. President, today I rise to express my support for efforts to reduce funding for the strategic defense initiative [SDI]. Given the current events in the Middle East, and the ongoing efforts by Iraq to develop nuclear weapons and delivery systems, I do not take this position lightly. While there is no doubt that Saddam Hussein is the emerging ogre of the world, his shadow should not cloud the fundamental issues surrounding this debate. Indeed, Mr. President, as with any weapons, we must answer basic questions before we continue work on this system: Will it work and can we afford it? This Senator is convinced that the answer to both questions is a resounding "No."

Mr. President, from a practical and theoretical standpoint any antimissile system that might be deployed in space would always be of questionable effectiveness. Our adversaries will act to defeat SDI by either destroying, overwhelming, avoiding, or deceiving it. These countermeasures are far less expensive than the hundreds of billions of dollars that we would spend to construct and deploy an SDI system, and would render a spacebased antimissile system virtually useless. Further, to pursue an SDI strategy would halt the progress we have made on arms control as the Soviets would find it in their interest to produce enough missiles to overwhelm an antimissile system. This would clearly not be in the best interest of American national security.

Instead of pursuing stability through questionable technical systems that our adversaries will work hard to thwart, I believe that we can achieve similar objectives through a much less expensive means—reinvigorated efforts to halt nuclear proliferation. Given our budgetary situation, it is my hope that we pursue new nonproliferation initiatives so we can redirect some of our scarce Federal resources from SDI to better defense programs and more pressing domestic needs.

Mr. President, I yield the floor.

Mr. DOMENICI. Mr. President, I would like to make some comments on this bill. First, I would like to congratulate the members of the Armed Services Committee for the job which they have done in many critical areas of defense policy. I would like to draw attention to several of these.

THE DEFENSE BILL AND THE BIG PICTURE

Mr. President, these are some of the most exciting times we have witnessed in the history of our Nation. Over the past 1½ years we have witnessed many events which, quite frankly, many believed would not occur for many years to come. Among these are the move toward democracy on the part of Poland, Czechoslavakia, Hungary, Romania, Nicaragua, and Panama. And is there any of us here who can say we predicted with certainty the day the wall would fall in Germany? And even the Soviet Union, who has been our adversary throughout the cold war, has envoked upon a course toward more openness and freedom.

Mr. President, it is the belief of the Senator from New Mexico that we are witnessing these great changes because the United States of America has had the will to maintain a magnificent defense establishment. I know there are some who attribute the end of the cold war to several different reasons. Frankly, I believe without the defense buildup of the last 10 years, it might have been decades before this "PAX America" arrived. America's commitment to defense, and to applying our best technology, is what brought us to where we are today.

Having said that, Mr. President, I would like to share with my colleagues in the Senate a thought that I hope will guide us as we move through this year's defense authorization bill. It seems to me that we have a rare opportunity in light of our changing world to have a very sensible defense builddown. It seems to me that this Nation deserves a planned peace builddown rather than a military meltdown.

We all know defense spending is expected to decline. How much, over what period, how fast, and where will the reductions be made? Those are national security and national economic issues that our country has been wrestling with since the Berlin Wall fell last autumn. The world has changed and this bill reflects that change. It also recognizes that none of us can be so omnipotent as to know the changes yet to come.

General Eisenhower near the close of the Second World War offered a good piece of advise when he counseled not to make mistakes too quickly.

Mr. President, if this bill were a nail, General Eisenhower's advice would hit it right on the head. We U.S. Senators have an opportunity to make some very important decisions about the future posture of our country's defense. These decisions, more than ever before, will require great thought and should not be acted upon in haste. I just want my colleagues to keep that thought in mind as we move through the consideration of this bill. We need to make sure we do not make mistakes too quickly.

I urge my colleagues to listen to the words of General Eisenhower.

That being stated, Mr. President, the Armed Services has attempted to look at the big picture in this bill. They looked at the big picture in terms of overall strategy, as the chairman and Senator WARNER have indicated here. After taking testimony from the Defense Department, they attempted to insure that we are supporting the weapons necessary to implement our defense doctrine. And they made some very difficult decisions regarding the balance between strategic and conventional systems.

The bill we will be considering throughout this week provides a budget authority of $288.5 billion and $296.6 in outlays for the national defense function for fiscal year 1991. This is $18.2 billion less than what President Bush requested in budget authority and $7.9 billion less than his request for outlays. If we take these figures Mr. President, and adjust them for inflation, the President's request would be cut by $25.3 billion in budget authority—using CBO baseline—and $9.9 in outlays from the fiscal year 1990 level. The fact is that this year will represent the sixth consecutive year for negative real growth in the defense budget.

This bill contains $261 million in direct spending—outlays—in 1991. Direct spending in this bill would rise to $972 million by 1995 for a total of $3.2 billion over the 1991 to 1995 period. A portion of this direct spending is due to expansion of entitlement programs. As a member of the Budget Committee, I simply note that a Budget Act 303 point of order would lie against this bill because it creates direct spending in a year in which there is no budget resolution.

Even with direct spending projected to rise, the thrust of this bill remains to reduce defense spending. In 1991, budget authority will be cut 8 percent, while outlays will fall 3 percent. By 1995, defense expenditures will fall from its current level of 5 percent of GNP to less than 4 percent.

About 96 percent of the national defense budget is in five accounts—Personnel, Operations and Maintenance, Procurement, Research and Development, and Department of Energy defense programs. Ranked in order of the real reduction in budget authority: Procurement falls 21.1 percent—to $67 billion; personnel falls 4.9 percent—to $78 billion; O&M falls 4.7 percent—to $86 billion; R&D falls 3.6 percent—to $37 billion; and DOE defense increases 9.8 percent—to $11 billion.

PROCUREMENT

The 21.2-percent reduction in budget authority for procurement provides the clearest indication that defense spending under this bill will not only decline in 1991, but will continue to fall in the years to come. Procurement spends out slowly—16 percent the first year, 26 percent the second year, 30 percent the third year. By the end of the fifth year, 92 percent of the authorization has been spent. The procurement savings in this bill—$18 billion below the CBO baseline—translate into real outlay savings for years to come.

PERSONNEL

The 4.9-percent reduction in budget authority for personnel provides another clear indication that significant defense savings would be realized under this legislation. The nearly $4 billion in savings—compared with the CBO baseline—results from reducing the active Armed Forces by 100,000 in 1991—62,000 more than the President's request. Far greater savings will occur in later years when additional personnel are reduced from the rolls of the Armed Forces and the full effects of previous year reductions are realized.

OPERATIONS AND MAINTENANCE

The 4.7 percent—$4 billion—reduction in budget authority for O&M is to be expected from fewer people in the active Armed Forces, and is commensurate with a smaller force structure. How the services implement the "flexible readiness" concept will also be a factor in determining the size of future savings.

Mr. President, I think the distinguished managers of the bill have done a remarkable job in seeing that some of our country's most vital interests are protected. This bill provides $11.1 billion in authorization for the Department of Energy defense activities. Mr. President, our national laboratories are on the cutting edge of some of the most sophisticated science and technology in the world. As a matter of fact, the three weapons laboratories, Lawrence Livermore and the two in my State of New Mexico—Los Alamos and Sandia—clearly house some of the most significant scientific talent and research equipment in all of the world.

Los Alamos and Sandia in particular have played a major role in many critical areas contributing to our country's welfare. From technology transfer, arms control verification measures, Los Alamos and Sandia have provided the leadership our country needed when they were called upon.

In the future as we look for ways to clean up the environment and solve the country's nuclear waste problem, I know that we will once again call on the magnificent capabilities of the national laboratories, and Mr. President, in my capacity as the senior Senator from New Mexico, I am here to tell my colleagues in the Senate that Los Alamos and Sandia National Laboratories stand ready to provide the leadership they have in the past.

Now, Mr. President, I would like to focus on some other ways that my State is helping to contribute to our country's national defense. We have three Air Force bases in New Mexico in Holloman, Kirtland, and Cannon. These three bases contain some of the best Air Force pilots in the United States.

Kirtland is extremely involved in high technology research and development, star wars research, nuclear and space technology. When they are not out on the cutting edge of technology, Mr. President, they are involved in special operations combat search and rescue training. Since it has been at Kirtland it has saved over 170 lives in New Mexico. That is what this country is all about, Mr. President, and we are proud of Kirtland in New Mexico.

Kirtland may be a hard act to follow, but Holloman ranks right up there with the best, Mr. President. Holloman is home of the 883rd Air Division, the 49th TFW, the 479 TTW, and the 4449th Mobility Support Squadron. The 883d Air Division has been extremely influential in training and producing some of the very finest pilots in the world. Many of the world's best pilots yearn to come to Hollomon because we have the best flying conditions overall annually anywhere else in the world. And the best pilots like to go very fast, Mr. President, and Holloman's incredible flying space allows them to do that with safety. The 49th TFW flies the F-15 Eagle, the world's leading air superiority fighter, and is capable of worldwide deployment on short notice. Two of the squadrons were recently in the Netherlands on excercises.

Speaking of worldwide deployment on short notice, the 4449th Mobility Support Squadron can go anywhere in the world at a moment's notice and set up two air bases for 4,500 men each. And the United States gets its use out of MOBSS, Mr. President. They were deployed during the *Challenger* disaster; they went to Kelly Air Force Base, TX, when the base was ravaged by tornados in 1988; and they responded with equipment and personnel during Hurricane Hugo. They also set up camp in Panama for 1,500 soldiers. Needless to say, Holloman carries its share of the load.

Cannon is home to the 27th Tactical Fighter Wing, comprised of 72 F-111's. The F-111 is highly capable in the area of deep interdiction. Cannon is growing from a single wing to an Air Division, and they will be able to provide our country with great air defense in Southeast Asia and around the world their continuing expansion.

Finally, Mr. President, we have a great National Guard in New Mexico. I agree with the chairman of the Armed Services Committee about the expanded role our National Guard should play in the new global environment.

The New Mexico National Guard is considered one of the leaders in the war on drugs because of their location to the southern border, and their commitment and will to win the war. They have just finished the first and only plan to reduce drug use from the demand side of the equation. The New Mexico National Guard is deeply involved in drug interdiction and has helped to support law enforcement agencies throughout the State, which have seized and destroyed virtually every type of drug and the laboratories the drug dealers use to manufacture them.

Mr. President, this bill helps to ensure that these vital missions in New Mexico that are helping to provide for our national defense can continue to do so. I commend the distinguished majority and minority leaders for their leadership.

Before closing, Mr. President, I want to add one last thought. Behind all the numbers I have talked about today there are young men and women. These fine young Americans chose voluntarily to serve their country and don the uniform. Many of them were looking to serve their country as a career, and through no fault of there own, but precisely because of the tremendous job they have done, there future is uncertain.

I commend the members of the committee who have taken this fact into consideration and have put together a worthwhile package of benefits. I simply urge the Senate to keep these young Americans in mind as we consider this bill. Let us not make mistakes too quickly. Let us follow the glidepath responsibly, and let's not create a meltdown.

V-22 OSPREY—AMENDMENT NO. 2560

Mr. SPECTER. Mr. President, I express my support for Senator GLENN's amendment to provide an additional $8 million in support of the development of the Air Force variant of the V-22 for use in special operations missions and to express my support for continued funding for research and development and procurement of the V-22 Osprey tilt-rotor aircraft.

During last year's debate on the V-22, the Department of Defense supported their decision to terminate the V-22 Osprey program due to the high cost of procuring this aircraft for the Marines, the Navy, and the special operations forces. At this time, the DOD decided to procure a mix of older helicopters which they envisioned would result in reduced costs over the V-22. In terminating the V-22 program in January as part of their fiscal year 1991 budget mission, DOD once again claimed that the V-22 was simply too expensive and that requirements could be met with a more cost effective fleet of conventional helicopters.

But, Mr. President, this is no longer the case. The results of a cost and operational effective analysis directed by this Congress to compare the cost effectivess of the V-22 with conventional helicopter alternatives conclusively proved that the V-22 Osprey was the most cost effective alternative to meeting Marine Corps amphibious landing, Navy search and rescue, and Air Force special operations requirements. This study, which took nearly 10 months to complete, required the Institute of Defense Analysis to make over 400 excursions from the original study assumptions, most at the request of the DOD steering committee. At its conclusion, the IDA determined that for the same $24 billion 20-year life cycle expenditure—the 20-year cost for the DOD proposed mix of CH-60 and CH-53 helicopters—and I quote: "The V-22's speed, range, and survivability advantages could enable even the 356 aircraft fleet to be more effective—sometimes significantly more and other times only slightly more—than all of the proposed helicopter alternatives in each of the four Marine missions examined." Further, they determined—and I again quote—"The V-22 is more cost effective than helicopter alternatives for the Navy combat search and rescue, Air Force special operations, and DOD or other Government Agency drug interdiction missions."

In response to the results of this study the Department of Defense has altered their position on the V-22. Since the cost effectiveness of the V-22 can no longer justify termination of the program, the Department now claims that the level of near-term funding required to initiate production of the V-22 is more than the Navy can afford. But this DOD claim, too, was found to be inaccurate by the Institute of Defense Analysis study. Dr. Dean Simmons, the institute's director for the V-22 study, stated at a special hearing before the Senate Appropriations. Subcommittee on Defense, that the $7.7 billion required to fund the V-22 program during the period fiscal year 1991-97, was actually less than the $8 billion required to procure the DOD alternative mix of Ch-60/CH-53 helicopters during the same period. Mr. President, while I am certain the Department of Defense has their reasons for maintaining their position to terminate the V-22 in the face of the results of the cost and operational effectiveness analysis I previously discussed, frankly they elude me at this time.

Mr. President, there is one further point I would like to discuss in connection with cost, that being the potential impact of foreign military and commercial sales of the V-22 on the cost to produce this aircraft. Unlike the conventional CH-60 and CH-53 helicopters which would generate little, if any, interest in the international market, the V-22 once tested and integrated into U.S. forces, has the potential to generate substantial foreign military and commercial sales. Foreign military and international commercial sales of the V-22, when added to U.S. military requirements, would measurably reduce the production cost of the V-22 and therefore reduce the cost to the Department of Defense to procure the proposed 365-plane fleet. This potential for future cost reductions should be weighed heavily when debating the merit to the V-22.

Mr. President, the V-22 Osprey is a unique aircraft offering both military and commercial applications, Some, including officials from the Department of Defense, have asseted that if the Osprey has so much commercial potential then the marketplace will ensure that it is developed. But this is a naive assumption. Historically, the U.S. military has developed and proven every major advancement in aircraft technology. Only after the military has proved the reliability and usefulness of a new aircraft technology has this technology found its way into the commercial market. If the U.S. Armed Forces decline to produce the V-22 for its superior military capabilities, it is doubtful that tilt-rotor aircraft will ever be produced in the role of a commercial airliners.

Mr. President, the V-22 represents the best of both worlds. It is extremely cost effective in its role as a military aircraft yet has tremendous potential as a spinoff technology which could benefit the citizens of this Nation for many years to come. With approximately two-thirds of the annual Government research and development funding being allotted to the Depatment of Defense, there should be an expectation, it not an obligation, for the Department of Defense to at least pursue such multirole technologies.

In conclusion, I welcome the continued support of the Senate Armed Services Committee with regards to its support of the V-22 and look forward to the day that it becomes an integral part of our military force. Thank you, Mr. President.

CV-22—AMENDMENT NO. 2560

Mr. HEINZ. Mr. President, I rise in support of the amendment from my good friend from Ohio.

Development of a vertical takeoff and landing aircraft is a matter of national interest in two important ways.

First, the Air Force's CV-22, like the V-22 aircraft under development for the Marine Corps, is a quantum leap in aviation technology—an airplane that can take off and land vertically, like a helicopter, and that can fly farther, faster, and with a bigger payload than any helicopter we have.

Indeed, the Institute for Defense Analysis, at the request of the Defense Department, compared the V-22 with the capabilities of individual helicopters and with combinations of helicopters. The institute's conclusion: The V-22 is not only more capable than any helicopter, its versatility makes it the most cost effective alternative, too.

The Air Force and Marines have made their positions clear: There is no alternative to the CV-22 and V-22. And our colleagues on the Armed Services recently acknowledged this fact by authorizing $238 million for research and development of the V-22.

This amendment supports development of the same unique capabilities and aviation technology for the Air

Force special forces. Helicopters will continue to be an essential part of meeting our national security needs, but the CV-22 and the V-22 not only leapfrog ahead technologically, they also respond to the changing shape of the world's geopolitics and to the changing threats to our Nation and its interests.

Special forces need to get in and out of hostile territory. They can't depend on landing strips. They need to be able to travel distances beyond the scope of helicopters. And they need to be able to carry everything they need with them; there are no supply depots in the middle of hostile territory.

The new vertical takeoff aircraft meets these needs. The V-22 can be the life-and-death difference for our marines and our special forces to go in and protect American lives and interests—and to get out safely.

Mr. President, we can only speculate about the outcome of our 1980 attempt to rescue American hostages from Iran had our forces been able to depend on an aircraft like the V-22.

Providing to our soldiers the best tools to do their jobs when they put their lives on the line is justification enough to proceed with development of the V-22 and CV-22. But there is another compelling national interest at stake, too.

Our Nation has been and is the world's leader in aviation because we have sought to stretch the envelope of technology, and because we have used technological advances for the benefit of both military and civilian aviation.

Vertical takeoff and landing aircraft have the potential to revolutionize civilian aviation. A civilian version of the V-22 could relieve congestion at our major airports, and bring commercial air service to scores of communities and millions of Americans.

The commercial applications of vertical takeoff aircraft are not lost on the Japanese or the West Germans, both of whom would dearly love to get a foothold in an industry America dominates. They are moving ahead aggressively with their own programs.

But we have the lead, thanks to the research and development of the V-22. We risk squandering that lead and losing a major part of the civilian aviation market, however, if we do not continue to move ahead aggressively with the development and production of the V-22 and its sister aircraft, the CV-22.

AMENDMENT NO. 2584

Mr. STEVENS. Mr. President, my amendment, cosponsored by Senators FORD, THURMOND, INOUYE, DECONCINI, BOND, JOHNSTON, KASTEN, LOTT, BUMPERS, and COCHRAN, makes important changes to restrictions included in the committee bill on full-time manning for the National Guard and the Reserve components. I would like to take a few minutes to provide some additional explanation of the amendment.

The National Defense Authorization Act for fiscal year 1991 as reported imposes a 30-percent reduction over the next 3 years full-time military personnel in the National Guard and the Reserves. This cut is one component of a package of changes included by the committee that aims to increase the level of active component integration into the National Guard and the Reserves.

Mr. President, I share the goal expressed by the Armed Services Committee in their bill that the quality and the readiness of the National Guard and the Reserves can be further enhanced by the addition of active component personnel. Improving the working relations and coordination between the active component and the National Guard and the Reserves is an important objective. I believe this goal can be achieved without the potentially devastating cuts and disruptions of the National Guard and the Reserves presented in this bill.

The compromise that I and my colleagues proposed in this amendment moderates the impact of the cuts proposed in the bill, and introduces several important safeguards to protect the vitality of the Active Guard and Reserve [AGR] personnel program. These provisions include:

First, the cuts proposed in the bill to occur over 3 years are now spread out over 6 years to mitigate the near-term impact on National Guard and Reserve manpower planning and assignments.

Second, there will be no involuntary separations to achieve the reductions as modified in this amendment; vacancies shall only occur through attrition, with no reductions in forces.

Third, the amendment retains the language in the bill that provides a 10-percent flexibility to the Secretary of Defense to modify the cuts to any one component of the National Guard and the Reserves.

Fourth, the amendment defines that 2 percent of the authorized end strength for AGR personnel shall be reserved for new AGR accessions, to maintain a steady flow of new personnel into the AGR program. Lacking this provision, the bill as originally drafted could have imposed a virtually permanent hiring freeze for AGR positions.

Mr. President, I understand the strong feelings of my colleagues on the Armed Services Committee concerning this issue. For that reason, I appreciate the willingness on the part of Senator GLENN, the chairman of the Manpower and Personnel Subcommittee, and Senator NUNN, chairman of the committee, to work with me and the cosponsors of this amendment. I know that they share our commitment to a strong and capable National Guard and Reserves.

With the adoption of this amendment, some of the concerns of this Senator as to the initiative of the Armed Services Committee to achieve more active component integration into the National Guard and the Reserves are addressed. I believe there remain several issues, related to other statutes, that could restrict the role of active component personnel assigned to National Guard units.

The National Guard plays an important role in this Nation's counternarcotics and drug interdiction efforts. The ability of title 10 active component personnel to participate in such missions is unclear. A significant traditional role of the National Guard is to respond to State emergencies at the direction of the Governor or the State adjutant general. The availability of active component personnel to respond to such emergency requirements without prior approval from the Pentagon also demands further clarification.

Achieving greater active component integration into the National Guard and the Reserves cannot come at the price of the ability of the National Guard to fulfill its stated missions and requirements. I hope that the managers of the bill will direct their attention to these issues as the bill proceeds to conference with the House, and that they may be resolved to protect these two missions in particular.

Mr. President, I again wish to thank both the cosponsors of this amendment and the managers of the bill for their hard work and good faith in reaching this compromise. I believe the result is fair, and will serve as a useful springboard for further consideration during conference with the House.

FISCAL YEAR 1991 DEPARTMENT OF DEFENSE AUTHORIZATION

Mr. KERREY. Mr. President, we are nearing completion of the debate on the fiscal year 1991 Defense authorization bill.

This, my second vote for a Defense authorization bill, is cast with considerably more doubt about the security gained from the programs it authorizes than I had last year. The foundation which provides the most comfort is the rationale given for these expenditures by the chairman of the Armed Services Committee, Senator SAM NUNN.

He has given a virtuoso performance this year. Rather than waiting for the administration to provide the promised new rationale which replaces the old policy of containment. Does anyone remember President Bush's declaration at Texas A&M that we were "beyond containment" and the promise to develop an alternative strategic rationale? He has filled in their

blanks with solid arguments for America's defenses.

In contrast, on Thursday each of us received a letter from President Bush's Assistant for Legislative Affairs, Mr. Fred McClure. Attached to the letter was a speech billed as the President's vision of defenses needed in a new and changed world. The speech was given later that day by the President to the Aspen Institute. Mr. McClure said:

It is the President's hope that these remarks will prove useful to you as you make the important decisions associated with this (defense authorization) bill.

With all due respect to Mr. McClure and the President, the speech was not useful at all. It was so simplistic and lacking in substance that, without the detail and persuasion of Senator NUNN and the senior Senator from Nebraska, Senator EXON, the defense budget would have been in free fall.

Americans are beginning to see a larger enemy at home than abroad; they are beginning to wonder when we are going to attack fiscal insolvency, sluggish productivity, growing poverty, increasing economic stress on working families, weakening infrastructure, and unresponsive educational system. They are looking for leadership in articulating the changes needed in our defense policies to meet these new conditions.

I genuinely do not wish to minimize the President's message. Perhaps some of my colleagues found more than I did. However, the specific points made by the President seemed to me either completely disconnected from the observations he was making or they were conclusions previously reached and explained by Senator NUNN.

In the category of disconnect the President does not once state his belief that the Soviet Union is an enemy. Instead, President Bush seems to regard them as an unpredictable friend, sort of like France in the 1960's. He doesn't mention the radical shift on the part of the Soviet Union from an expansionist threat to more reliably noninterventionist. He does not mention the rapid advances of democracy and disintegration of the Union of Soviet Socialist Republics.

The President doesn't mention the implications, let alone the embarrassment, of Germany spending billions to help the Soviet Union pay for their troops while we are spending billions to defend against those troops. he doesn't mention the crises of confidence which exist today as a consequence of our gross exaggeration of Soviet economic strength.

All of these omissions undercut the President's conclusions and make them less reliable. They reinforce the intuitive and dangerous observation that the United States no longer has the Soviet Union as an enemy in the world. It should not come as a surprise to him and others that many of us are skeptical about the need for SDI, the B-2, and duplicative nuclear modernization. The rationale for these programs was based upon a Soviet Union that no longer exists.

The best that can be said about the President's address is that he appears to have been listening—as many of us have—to the distinguished Senator from Georgia. The President proposed to reduce America's Armed Forces by 25 percent. He proposed to make these reductions over the next 5 years. This statement is little more than an endorsement of the Nunn doctrine. The President's vague declaration that we need to "reshape the forces that remain" is a pale imitation of the precise description of force structure given by Senator NUNN in a series of speeches this year.

I ask my colleagues if these words of the President sound familiar:

What matters now is how we reshape the forces that remain. * * * The United States would be ill-served by forces that represent nothing more than a scaled-back or shrunken-down version of the ones we possess at present. If we simply pro-rate our reductions—cut equally across the board—we could easily end up with more than we need for contingencies that are no longer likely—and less than we must have to meet emerging challenges. What we need are not merely reductions—but restructuring.

They should sound familiar, because this is what the Senator from Georgia has been saying all year long. It is the basis for the Armed Services Committee's recommendations. A more honest statement by the President would have been this: "What matters now is that we get behind Senator NUNN, who has prevented disastrous across-the-board reductions in spite of the fact that he did not have much help from the Executive Branch. While I was unable to reach a policy conclusion using the enormous resources of the Department of Defense, the Central Intelligence Agency and the National Security Council, Senator NUNN got the job done with a handful of Senate staffers."

The President said that General Powell and Secretary Cheney are "hard at work determining the precise composition of the forces we need." I must tell you, Mr. President, nothing confirms my suspicions that the Department of Defense is so top heavy that it cannot make decisions than the slow pace of presenting this precise composition.

So, I will vote for the Defense authorization bill because I believe the Senate Armed Services Committee under the leadership of Senators NUNN, WARNER, EXON, GLENN, and others has provided us with a clear rationale for the programs in the bill. I believe they have assessed the risk to the security of America and our interests and have presented programs and force structures sufficient to meet that risk.

Mr. President, I would like at the same time to offer to the Armed Services Committee some of my reservations about our defense policy:

First, the goals of our arms control negotiations are too modest and the pace too slow. The changes in the world present an unprecedented opportunity to reduce strategic and conventional forces even more than our current negotiating positions. Again, I have heard Senator NUNN speak to this on earlier occasions. My hope is that the committee will continue to press the Bush administration on this point.

Second, we need to advance our arguments about correct responses to situations like the one we are currently seeing in Iraq. It is obvious to me that unilateral action will not work; the United States cannot and should not become the world's policeman. We are going to need to deter such aggression with the promise of immediate and lethal use of international force. Men like Saddam Hussein will not be stopped with the threat of United Nations or Senate speeches.

Third, we need a domestic plan to deal with economic and morale problems caused by this sudden reduction in force. Base closings, pink slips to civilian and military personnel, and business failures will produce economic hardship on American communities and families. It is wrong and unfair for us to ignore the impact of our decisions. Worse, the failure to plan will be used as an argument against making necessary reductions and/or restructuring.

Fourth, we need to consider a major reorganization of the Department of Defense. Perhaps this top heavy bureaucracy was a necessary evil given the old rationale of massive containment of the Soviet Union. Today, I would feel a lot safer if it was cut down to size and in its place a leaner, decentralized organization where innovation and success was rewarded.

Mr. President, I again congratulate and—on behalf of all security conscious Americans—thank the Senator from Gerogia for an exemplary accomplishment.

ADVANCED MATERIALS

Mr. BIDEN. We are all aware of the tremendous changes that have occurred around the world since the Senate last debated Department of Defense authorizations. The chairman of the committee has been clear in describing the future as he sees it for the Defense Department.

To call the times tumultuous is to understate the basic changes that we are trying to deal with through this bill. The chairman and the Armed Services Committee have moved aggressively to adjust to these changes in the centerpiece provisions of this bill dealing with weapons systems. But

for the future of our Nation's defense, I would also like highlight other sections of the bill that reflect changed conditions.

In particular, I would like to commend the chairman and the committee for the initiative to support precompetitive technology development through a new program in the Defense Advanced Research Projects Agency [DARPA] and support for research into manufacturing processes for advanced materials through an expansion of the Defense Manufacturing Technologies Program.

Advanced materials represent one of the most promising areas for American industrial and economic growth. In fact, staying ahead of foreign competition on advanced materials is considered crucial to the U.S. ability to remain competitive internationally in the future on a range of products.

But there is concern that foreign competitors are starting to catch up with, or pass the United States in this crucial area. The National Research Council issued an extensive study of this industry in a report entitled "Materials Science and Engineering for the 1990's: Maintaining Competitiveness in the Age of Materials." The study is clear in its findings and conclusions. Among those are the following:

Materials science and engineering is crucial to the success of industries that are important to the strength of the U.S. economy and U.S. defense

The field of materials reseach is entering a period of unprecedented intellectual challenge and productivity.

An effective national materials science and engineering program requires healthy, balanced and interactive efforts spanning basic science and technology, all material classes, and the four elements of the field: properties, performance, structure and composition, and synthesis and processing.

A strengthened national program in materials science and engineering is necessary to preserve the economic well-being and security of the nation.

The governments of the major U.S. trading partners and competitors, including Japan and West Germany, have targetted materials science and engineering as a growth area and as a result have developed strong competence in selected materials science and engineering areas.

The conclusions of the report are just as clear in what our Nation needs to do in the years ahead. Among the recommendations are:

New Federal funds should be allocated for support of a national initiative in synthesis and processing. The initiative should provide support for facilities, education and the development of research personnel. The strengths of universities, industry and government should be brought into play, and the interaction of the three groups should be directed toward promoting the reduction of materials science and engineering results to commercial practice in the most effective possible manner.

The government should recognize the essential unity of materials science in its planning, funding and coordinating activities.

The government should assume a more active role in bringing together the various groups involved in materials science and engineering and in enhancing communication, interaction and coordination among the many sectors affected by materials science and engineering.

Those findings and recommendations address the broad range of advanced materials. The Department of Defense has studied these materials and earlier this year reported to the Committees on Armed Services on its plans to develop "the technologies considered by the Secretary of Defense and the Secretary of Energy to be the technologies most critical to ensuring the long-term qualitatives superiority of United States weapon systems."

The report cited 20 technologies that were determined by senior defense officials to be of greatest importance to the future defense needs of our Nation. For example, one of the technologies viewed as critical is composite materials. The report found that improvements in composite materials could be applied to weapon protection systems, advanced propulsion systems, submarine and missile technology and in aircraft and ship construction.

In short, composite materials offer lighter, stronger, better performing and more reliant materials for use in our national defense.

But the report also noted the potential benefits to the Nation's industrial base. The report found that "use of advanced structural composite materials is likely to have a dramatic effect on gross national product, balance of trade and employment."

The Defense Department report found that—

The United States is judged to have the world leadership in composite materials. The lead is being rapidly eroded, however, by a combination of industrial technology transfer, such as is now occurring in aircraft composite technology, and strong R&D efforts by many other nations.

That is just one of the technologies viewed as critical by the Department of Defense, but it is not in an unusual situation. The fact is that we need to increase our support for research and development of these technologies not only for the strength of our Nation's defense, but also for the strength of our Nation's economic future.

The Defense report I cited earlier noted that it is largely the military market which is driving research and development at this time. But that demand is expected to decline in the next few years. One result will be that the spinoffs of military research may well fall. In the case of advanced materials, this could hinder their development and commercial application, leaving the United States in an even weaker competitive position in the future.

The National Research Council described the importance of advanced materials to our economic strength. The Defense Department report demonstrated the importance of these technologies to our defense strength. The overlap of these interests cannot be ignored, but under current practices we too often try to segregate our research and development support programs. This bill recognizes that we cannot continue to work under those irrational conditions when the commercial and military payoffs are often intertwined.

That is why I was pleased to see the committee include the $100 million DARPA consortia initiative in the bill. The initiative will provide support at the earliest stages of development of new technologies with important implications for our Nation's defense. But it should be clear that the initiative will also have a crucial impact on a portion our Nation's industrial base.

DARPA PROGRAM

I would like to ask the distinguished chairman of the Defense Industry and Technology Subcommittee of the Armed Services Committee a few questions on how he foresees the shape of the consortia or cooperative agreements developed under the DARPA program.

The report accompanying the fiscal year 1991 Defense authorization bill urges DARPA to enter into "cooperative agreements" and "other transactions" to "promote development of critical dual-use technologies." Will universities and colleges be eligible for the consortia established by DARPA?

Mr. BINGAMAN. The Senator is correct. It is the intention of the committee that this provision should promote cooperation between local, State, and Federal Government organizations, segments of private industry, and universities and colleges. The committee intends to provide the Director of DARPA with the flexibility to determine which consortia or cooperative agreements are the best investment of the taxpayers dollar in terms of achieving real progress in developing these key generic, hopefully dual-use, technologies.

Mr. BIDEN. Will the program be able to support, for example, construction of a university laboratory that could also be used by industry for basic research?

Mr. BINGAMAN. It is not our intention that the Department of Defense contribution be used for brick and mortar construction. I would note, however, that I have had an experience in my own State of New Mexico where the involvement and financial contributions of the Defense Department in a center of excellence was adequate to trigger State funding for construction of a building for this cooperative undertaking.

Mr. BIDEN. Will the program be able to provide funds for capital costs of a laboratory's instrumentation and equipment?

Mr. BINGAMAN. Yes, if the Director of DARPA finds it to be a useful and productive investment of Defense Department funds, then procurement of instrumentation and equipment under these conditions could take place. I would like to note, however, that the committee intends that a high priority be placed on DARPA entering into cooperative agreements or consortia where each participant makes a tangible contribution. This might take the form, for example, of DARPA providing funds for equipment and instrumentation, an industrial partner providing operating costs, a university providing access to a campus computer center or paying the salaries of student research assistants, and the State or local government paying for construction of a building to be used by the group.

Mr. BIDEN. Could the facilities of the consortia be used by a number of different companies, even if some of those companies were not a part of the consortium or cooperative agreement?

Mr. BINGAMAN. That certainly is possible. The committee intends that the Director of DARPA should view the entire range of benefits that will accrue from the support DARPA provides to the consortium or cooperative agreement. For example, if the Director should be determined that by assisting in the formation of a consortium in advanced materials, and that consortium will have equipment that would be available for a number of individual companies to use to test or analyze materials, and that the companies involved may be developing technologies that are useful to the Defense Department, then the Director should take that indirect, but very real benefit, into account.

Mr. BIDEN. Does the Defense authorization bill have any other provisions that are supportive of developing advanced materials?

Mr. BINGAMAN. Yes, there are several other provisions in this year's bill that support development of advanced materials technologies. In particular I would like to note the Advanced Materials Processing Parnterships Program which uses the authority granted under the Stevenson-Wydler Technology Innovation Act of 1980, as amended by last year's Defense Authorization Act. Under these programs, partnerships, consortia or centers of excellence would be formed involving the Federal Government, other Government entities, private sector firms, nonprofit institutions, universities and colleges. It was our intention that these partnerships be specifically organized to conduct research towards developing high-quality, low-cost manufacturing and fabrication processes for advanced materials.

Mr. BIDEN. Does the Committee have any particular technologies that they wish the Director of DARPA to emphasize?

Mr. BINGAMAN. The committee is particularly interested in developing those technologies that are identified in either the Department of Defense's critical technology plan, or the Department of Commerce's Emerging Technologies Report, which are generic in nature, are critical to the national defense or economic competitiveness, and has potential application to both the defense and civilian sectors. Examples of these technologies include areas such as advanced materials and also other areas such as microelectronics, high performance computing, biotechnology, photonics, air breathing propulsion, software and several others.

Mr. BIDEN. I thank the Senator for his responses.

Mr. BIDEN. Mr. President, I raise these questions because there are a number of initiatives underway in the State of Delaware that will prove to be well-matched to the advanced materials programs established in this bill. The University of Delaware has been a national leader in combining basic research and engineering sciences on advanced materials, estabishing one of the Nation's first composite materials centers in 1974. The center, the largest of its kind in the nation, emphasizes eduction of engineers and basic research, but also rapid transfer of technology to the private sector. The Defense Department has recognized the stature of the university in this area by naming the composite center an Army Center of Excellence.

In addition, the State is actively moving to develop a center for advanced materials, capitalizing on the University's expertise and the State's strong industrial base.

The Department of Defense study of its future technological needs underscores the importance of the programs authored by my distinguished colleague from New Mexico. The economic future of our country is no less important. The DARPA Program included in the bill acknowledges the overlap of the two needs by citing the dual use characteristics of the technologies. The initiative put forth by the State of Delaware is consistent with these goals.

The advanced materials programs in the bill show that the most productive investment for our national defense my be to assist research at the most basic level, and allow the private sector to determine the applications—military as well as commercial—of these findings. The programs in the bill reflect the evolving nature of our defense needs and the changing conditions in which the Defense Department must meet those needs. I commend the chairman of the Defense Industry and Technology Subcommittee for his efforts in support of this initiative.

ANTIDRUG OPERATIONS

Mr. DECONCINI. Mr. President, during a February briefing in Arizona with representatives from the Tucson area drug task force, it was brought to my attention that military support to civilian law enforcement agencies for antidrug operations and equipment requests was seriously flawed. Upon my return to Washington, I wrote to Secretary Cheney seeking improvements. I received a reply a couple of months later indicating that DOD support was fine. The response made no mention of any problem with regard to lack of authority or jurisdiction.

After the discovery of a underground tunnel running from Mexico to the United States, and during a drug hearing I chaired in Phoenix, it was brought to my attention that law enforcement agencies were quickly becoming disenchanted with DOD action and response to requests for support. Additional letters were sent to the Secretary of Defense but still no proposed solutions were forthcoming. The Senate Armed Services Committee was made aware of problems in DOD antidrug support and, to its credit, was drafting changes to rectify this situation.

During the Armed Services Committee markup of its fiscal year 1991 budget, the committee approved significant changes in the language providing DOD its antidrug authority. However, after my staff reviewed those changes with law enforcement officials from the Southwest border and respresentatives of the military involved in antidrug programs, they found that additional jurisdiction was requested.

The technical amendment included in the bill to change DOD drug program authority may seem minimal; however, its effects should be significant. I want to commend the distinguished chairman of the Senate Armed Services Committee, Senator NUNN, the ranking minority member, Senator WARNER, and Rick DeBobes and Les Brownlee of the committee's staff, for their efforts in rewriting the guidelines for the Department of Defense's involvement in the war on drugs. The committee was willing to sit down with my staff and representatives from the military to address the jurisdictional and technical problems which have greatly hindered DOD support to civilian law enforcement agencies.

Mr. President I have been a strong supporter of the Department of Defense's involvement in the war on drugs. However, I have questioned, and will continue to question, DOD's

commitment to this mission until they prove to this Senator that they are enthusiastically involved in this Nation's fight against illicit drugs.

I believe the additional guidelines and jurisdiction provided in this DOD authorization bill will leave the military with no excuse when it comes to fully supporting civilian law enforcement agencies. If not, I will be back again next year to debate whether we might not be better off transferring DOD drug funds, $1.2 billion in fiscal year 1991, not only to Federal law enforcement agencies but also to civilian agencies that provide drug treatment and education services.

THE DECISION TO TERMINATE THE MILSTAR PROGRAM

Mr. WARNER. Mr. President, I rise on behalf of the Republican members of the Senate Armed Services Committee to express our strong disagreement and consternation with the committee's decision to terminate the Milstar communications satellite, the President's highest priority communication program. I am personally disappointed with the committee's decision on this vital program. In making this speech, Mr. President, I do so not with any desire to further polarize the debate over this program. I believe it is important, however, that we, the Republican members of this committee, elucidate the reasons for our disagreement on this program, as the chairman did for the majority on the Senate floor last week. It is my fervent desire and belief that we can work out some arrangement in conference to reestablish the long-time bipartisan support for this invaluable program.

Mr. President, a major argument put forth for terminating Milstar is that the program is unaffordable, particularly since "nuclear confrontation is less likely and tactical contingencies are more likely." Indeed, this program is expensive, as are all space programs. Space systems are complex and require much redundancy since it is impossible to pull a satellite down for repairs. We can and should look to lighter and less complex systems for certain missions, but this does not obviate the requirement for robust and survivable satellites. A balanced constellation of satellites is required. The above assertion is also inconsistent with the committee's bipartisan approach to space control requirements over the past 10 years. In just last year's committee report, for example, we expressed our concern:

* * *about the vulnerability of critical U.S. satellites and the general lack of flexibility, redundancy, and responsiveness of our space access systems which make up such critical components of our space control capability. These deficiencies appear largely to be the result of decades of incremental decisions favoring 'peacetime efficiency' over wartime needs. Ignoring the costs of providing survivability and redundancy effectively hides the true cost of performing a mission or function from space.

Furthermore, we find it somewhat confounding that the majority should, for the first time, attempt to evaluate the affordability of a satellite system based upon the majority's estimates of so-called "20-year life cycle costs." We are unaware of this costing approach being applied to any other satellite program in the defense budget. The majority's assertions concerning delays and cost increases are also somewhat misleading inasmuch as congressional actions were a major contributor to both delays and cost increases. Nearly 75 cents of every dollar of cost overrun and delays is attributable to Government changes directed by either Congress or the administration, not the contractor. There were approximately five major design changes to Milstar that, again, we, the Government, were at fault for creating.

Mr. President, with respect to the requirement for Milstar it is important to remember that this program was designed to provide survivable and redundant communications to all our forces, not just nuclear forces. Moreover, even if it were true, as asserted by the majority, that Milstar is improperly biased toward nuclear operations, the satellite can easily be altered for conventional purposes by changing loading requirements to support these uses. In other words, there is nothing inherent in the satellite which would preclude changes in user emphasis, while maintaining the ability to ensure survivable/jam-resistant capability to our forces.

Milstart is also the only U.S. satellite communication system capable of providing assured connectivity to our strategic and tactical military forces. In this regard, assured connectivity is the ability to provide 24-hour-a-day two-way communications to our strategic and theater nuclear forces as well as commanders in chiefs [CINC's], of all our conventional forces worldwide. This requirement is just as important today as it was when the program began in the early 1980's.

In fact, in a letter to the Deputy Secretary of Defense, Don Atwood, dated March 23, 1990, vice chairman of the JSC Admiral David Jeremiah revalidated the requirements for Milstar starting: "The JROC validates the requirement for Milstar and recommends that it be continued as the most important Command, Control, and Communications program for the Departent of Defense."

Republican members are also perplexed by the Milstar termination since the committee, while noting changes in the threat, agreed elsewhere in the report that:

* * * the Soviet Union has continued with a vigorous and broad-based strategic offensive and defensive modernization effort that is improving its overall capabilities * * * [this] is a matter of continued serious concern and remains the paramount threat to U.S. national security * * *.

Mr. President, this assessment led the committee as a whole to support the President's Strategic Offensive Modernization Program, at least for fiscal year 1991. We believe it is thoroughly inconsistent to support the offensive modernization program and, at the same time, deny the U.S. National Command Authority the ability to have assured communications to those forces. For example, the benefits of having a modernized bomber or submarine force are significantly decreased in the absence of effective communications with the force and constant positive control over their nuclear payload. We, the Republican Members, find such a situation intolerable since it undermines strategic and crisis stability. In short, if the United States believes that nuclear deterrence is still viable and continues to provide for its modernization, then Milstar continues to be the most vital communication program and stability measure.

Mr. President, the Milstar Program was designed to assure that the U.S. has the survivable means to recall forces immediately and terminate hostilities. Republicans also find an inconsistency in the committee's recommendation to explore the feasibility of including destruct mechanisms and permissive action links on our ballistic missile delivery systems, when the very satellite communications program that could be used at an affordable cost to transmit such instructions was terminated in the bill.

Mr. President, Republican Members are also confused by the majority assertion during debate on this program that " * * * over time, the tactical conventional user base for the system has atrophied, leaving Milstar as a satellite for nuclear CINC conferencing and SIOP execution." During markup, the committee received a letter from the Chief of Naval Operations, Adm. Frank Kelso, expressing his concern over the possibility that the Milstar program may be terminated after four satellites. In the letter, he states:

As you are aware, all the CINC's are strong supporters of both the Milstar satellite and terminal programs. I personally testified this year as CINCLANT that the Milstar communication system is critical for the National Command Authority and CINC control of our strategic and tactical forces. A reduced or limited Milstar constellation will not be able to provide the necessary worldwide and regional coverage required to execute maritime operations in time of conflict. I strongly support the full satellite constellation.

Mr. President, I ask unanimous consent that the full text of this letter from Admiral Kelso, as well as the full text of other letters sent to the Com-

mittee on the Milstar termination from other CINC's and DOD officials, be placed into the record.

Mr. President, the Navy has been one of the biggest supporters of the Milstar program. Milstar provides the Navy with over-the-horizon communications for dispersed forces worldwide, antijam capability, and secure, low probability of intercept and detection of communications with the submarine and surface forces. No other U.S. satellite system can offer these features without significant redesign and additional costs. Such support and capability can hardly be characterized as showing a "nuclear bias." The importance of these requirements is becoming increasingly evident with the turmoil and crisis being generated in the Persian Gulf by Iraq's invasion of Kuwait. We must understand that the world is still dangerous and the United States must be able to communicate effectively worldwide.

Mr. President, this committee is responsible for the Department of Defense reorganization which, among other things, ensured that CINC's were given a strong voice in the formulation of weapons requirements. It is ironic, then, that this committee terminated Milstar when it was endorsed strongly by the CINC's. Again, quoting Admiral Jeremiah's letter: "The CINC's have reconfirmed their requirements for Milstar, as stated in current requirements documents, and strongly support its deployment."

As U.S. overseas base rights continue to decrease, the importance of Milstar will increase. Milstar's onboard processing and crosslinks allow the United States to reduce its dependence on overseas bases for satellite tracking and relay requirements. Milstar satellite control can be conducted entirely from U.S. ground stations or mobile platforms. Again, no other U.S. satellite system has this capability. Milstar will also save approximately $500 million in annual operating costs by allowing us to deactivate Strategic Air Command alert and communication aircraft and other systems. Milstar provides cost avoidance savings by reducing the requirement for mobile command centers and obviating additional direct communications to our forces, which must be procured if the program is indeed terminated. These savings could be between $7 and $10 billion.

Again, Mr. President, we believe that the Milstar program cannot be fairly characterized as solely a "strategic nuclear warfighting" system as it provides an important link to both our strategic and tactical forces. However, even if that were not the case, we cannot agree with the approach apparently being taken by the majority that, because the possibility of strategic nuclear war has diminished, we should cease planning for a credible response to such a possibility. A credible response is the essence of deterrence.

Finally, the House Appropriations Committee similarly terminated the Milstar program in its fiscal year 1990 appropriations bill. After careful deliberation, the Appropriations Conference report reinstated the program, arguing that:

> If the mission of Milstar were less critical to the surviving and enduring communications architecture necessary to support the national security functions of this country, there would have been little support for continuation of the program. However, if Milstar were terminated at this point, the expense to begin development of a new system might well exceed the cost in both time and dollars to salvage the Milstar program itself.

Mr. President, Republican Members also believe that the Milstar program should be reinstated. This program over the years has suffered many perturbations in congressional funding. This has contributed to cost overruns and delays in the program. We fully support the program and will work on a bipartisan basis to secure funding during the legislative process this year. I sincerely hope we can achieve this objective. The House has fully funded Milstar, and I believe that we should reach a compromise in conference. Thank you, Mr. President.

MILSTAR

Mr. KERRY. Mr. President, during consideration of this bill by the Armed Services Committee, the committee voted along strict party lines to terminate the military strategic and tactical relay [Milstar] communications satellite program.

The administration had requested $1 billion for Milstar again this year, despite the program's history of delays, increasing costs, and numerous questions about its mission, following the changes in the Soviet Union under Gorbachev.

The committee, following a comprehensive review of the program led by Senator NUNN, determined that the Defense Department had not justified the great cost of the Milstar system. The committee therefore canceled the program. The committee judged that the United States current C-cubed capabilities are sufficient to permit the termination of Milstar, and recommended the examination of lower cost alternatives to carry out many of its missions.

There are a number of legitimate reasons for this program being in trouble. First, it had been heavily weighted toward use during nuclear conflict, and inadequately weighted toward peacetime uses. Second, there has been a series of cost overruns and delays. Third, despite the changed strategic environment, the Defense Department has not reexamined Milstar to reflect the fact that the risk of a strategic nuclear conflict with the Soviet Union is in fact extremely low, and to focus on a Milstar program which takes advantage of its capabilities in a tactical context.

There are important reasons for considering whether Milstar could continue to fill an important role in U.S. defense. Milstar has been designed to meet the minimum essential command and control requirements of all services well into the next century; to overcome lack of interoperability, inadequate capacity to prevent against jamming; lack of polar coverage. It also presents potentially significant capabilities to withstand electronic warfare. Moreover, the system is nearly ready for deployment, with the first satellite 95 percent complete.

The committee's recommendation—that lower cost alternatives to Milstar be examined—should be understood to mean an examination of whether a lower cost version of Milstar might be justified. The Defense Department needs to consider whether a reconfigured program for Milstar is appropriate to insure that in the long run, adequate global U.S. communications, command, control, and intelligence are maintained.

For example, a less expensive, reconfigured Milstar program could prove to provide the most cost-effective means of maintaining communications requirements of U.S. operational forces at sea. A less expensive, reconfigured Milstar program might also remain capable of providing Army ground mobile forces with its minimum essential command and control connectivity, and the Air Force Tactical Command with its requirements for contingency and other operations.

The Defense Department also needs to consider whether a redesigned plan for Milstar would enable it to provide the United States with a cost-effective means of maintaining the national control of forces in Third World conflicts.

Accordingly, I urge the Secretary of Defense to begin a comprehensive review of Milstar with a view to determining whether the program can be reorganized to reflect current strategic realities and future U.S. needs in light of declining military budgets.

MAJOR DEFENSE ACQUISITION PILOT PROGRAM

Mr. GRASSLEY. Mr. President, I would like to raise a concern I have with respect to section 818, the Major Defense Acquisition Pilot Program. This section authorizes the Secretary of Defense to select as many as six major acquisition programs on which procurement laws can be waived. The purpose of this program is to determine the potential for increasing the efficiency and effectiveness of the acquisition process when greater flexibility is allowed in the acquisition of major items.

The committee report indicates that a pilot program may be designated as such only by statutory authorization by Congress, and that the Defense Department must notify Congress of each program nominated as a pilot program. The notification would include a list of the statutes to be waived, why these statutes should be waived, and what mechanisms would be substituted for these statutes.

The report further states that:

(t)he committee will not authorize any program to be designated as a pilot program, and will not authorize the waiver of any statutory provision, without adequate justification.

Mr. President, implicit in the report language is that the pilot programs and the waivers of procurement statutes will be approved and authorized by Congress. Yet that language does not appear in section 818 of this bill. The concern I raise is, absent such language in the bill itself, what kind of assurances do we have that this would not lead to, in an extreme case, providing carte blanche to the Secretary to: First, not fully disclose in the notification all the statutes for which a waiver is being sought; and second, proceed with such waivers without specific authorization by the committee and by Congress as to which laws, if any, are subject to waiver.

The concern I would raise, Mr. President, is that although the report language ties the waiver to an adequate justification and to specific authorization, that linkage does not appear in section 818 of the bill.

There are two principles that I believe are important with respect to this section: First, that only those laws in the notification be waivable; and second, that the committee and the Congress specifically authorize which laws, if any, are subject to waiver. If I may, Mr. President, I would like to ask the chairman and ranking member of jurisdiction of this section why this linkage does not appear in the bill language?

Mr. NUNN. No laws may be waived unless Congress expressly designates the program as a pilot program in a bill authorizing appropriations for that program. This limitation appears in section 818(b)(2).

The statute does not require Congress to expressly designate which laws will be waived. Our report language signals the Pentagon that we reserve the right to limit our grant of pilot program waiver authority to specific laws, but the bill does not require us to do so. I believe we should make that decision after reviewing the regulations implementing the pilot program and the specific programs proposed to be tested.

Mr. GRASSLEY. Could I also ask, Mr. President, if these programs and the laws being waived will be reviewed by the committee and Congress each year, since procurement law changes each year? Is this intended as a blanket waiver for the duration, say, of a 10-year weapons program? And, even though the Secretary may waive requirements for auditing, does this mean that these programs cannot be audited?

Mr. NUNN. Section 818(h) provides that a statute may not be waived after September 30, 1992. If statute is waived before that date, the waiver authority may not be applied to a contract beyond September 30, 1994. Section 818(f) requires that before Congress grants waiver authority, the Secretary must report to Congress on the actions that will be taken to ensure that the waiver or limitation of a law will not reduce the efficiency, integrity, or effectiveness of the acquisition process used for that program. Accordingly, it is clear that these programs will be subject to audits.

Mr. GRASSLEY. Mr. President, I initially intended to offer an amendment to section 818 to include waiver language in the bill. I have since received assurances from the committee of its intent to proceed in a similar manner as my amendment would direct, and so I do not intend to offer my amendment at this time. However, I would urge the conferees on this section of the bill to consider in conference statutory language to accomplish the linkage I have described.

My proposal would be to amend section 818(b)(2) to read as follows:

The Secretary may designate for participation in the pilot program only those major defense acquisition programs and may waive only those laws specifically authorized to be so designated, or waived, in a law authorizing appropriations for such program enacted after the date of the enactment of this Act.

Mr. NUNN. We will give that proposal careful consideration in conference.

Mr. GRASSLEY. Mr. President, I wish to thank the managers for addressing my concerns on this section, and I urge the committee and the Congress to be very vigilant with respect to the conduct of DOD on the systems they select for this pilot program.

OPPOSITION TO DEFENSE AUTHORIZATION BILL

Mr. BRADLEY. Mr. President, I am voting against this bill. This authorization marks the first step on a long path that will eventually lead to the restructuring of our approach to national defense. But it continues to spend too much on defense and for many of the wrong things. I believe that the defense authorization bill that the House will be passing takes us farther along the path we should follow than does this bill. I hope the final conference report will be closer to the House bill.

My reasons for voting against this bill are grounded in the new and emerging strategic situation our Nation faces in the world. Within the last year, the United States has finally succeeded in the long postwar struggle to contain Soviet military power and encourage the flowering of democracy in Central Europe and even in the Soviet Union itself. This was more than a dramatic triumph of the human spirit over the remnants of repressive regimes. It also vindicated America's leadership, persistence, and sense of purpose during four long decades of alliance-based strategic containment.

The old dangers of East-West confrontation will recede still further in the next few months as a timetable is set for the complete withdrawal of Soviet troops from the eastern part of a reunified Germany. The Soviet Union will also undertake potentially radical changes in its political and economic system, and may face serious social strains and internal crises as well.

Under these circumstances, the Soviet military threat to the West is likely to decline further. At the same time that the single adversary around which we have planned much of our strategy has declined, a wide array of other, less predictable, military challenges have appeared in Northeast Asia, in the states around the Persian Gulf, in the Mediterranean littoral, and elsewhere. When I speak of restructuring our military forces, I don't mean simply cutting them, although cuts will be a part of it. Rather, I mean that we must reorient our Armed Forces to be sure that we can meet these diverse and scattered military threats, which are smaller than a superpower confrontation but could prove no less dangerous to American interests.

The bill proposed by the Armed Services Committee makes significant strides in the right direction. In particular, it recognizes that the new strategic realities demand hard decisions to cut deeply in some areas in order to achieve the best military capabilities in more essential areas. Each weapons system and each troop deployment must be reassessed, and if it no longer serves our strategic purposes, it should be cut completely, but if it does serve a purpose, it should be funded adequately. In taking this approach, the committee's bill is a vast improvement over the timid, incremental approach taken by the administration, which still clings to expensive and outmoded forces.

Although it takes the right approach, this bill stops short of what will be needed this year and next as the difficult process of restructuring begins. The bill not only authorizes a higher level of overall defense spending than the United States needs to protect our vital interests, it also keeps alive several exorbitantly expensive programs that can no longer contrib-

ute much to our strategic goals in a changed world. The American taxpayers should not have to bear the burden of continuing to pay for overpriced B-2 bombers, or for an oversized military presence in Europe, or for superfluous battleships, aircraft carriers, and support ships in the active U.S. Navy. Although the bill authorizes them all, these forces would do little to help us counter North Korean threats to our allies in the south or contain Iraqi aggression around the Persian Gulf.

Let me say a word here about Iraq, Mr. President, since that nation's ruthless aggression against Kuwait has riveted our attention in recent days. The administration has suggested that this alarming development demonstrates the need for B-2 bombers, aircraft carriers, and other high-priced systems that were designed to meet Soviet challenges, not to deter or roll back Iraqui expansion. Indeed, they are poorly suited for the most likely and demanding military missions of the the future. As I have said, the purpose of restructuring America's defenses is not just to save taxpayers' money, but to face our new military challenges as squarely as in past decades we confronted the Soviet threat. High-technology weapons and military power alone will not suffice. Iraq's invasion of Kuwait is not just a military challenge to its neighbors, but also an immediate threat to the economic welfare of Americans. To cushion the economy against the disruption of oil supplies, a billion barrels of oil in the Strategic Petroleum Reserve will be more valuable than a new armada of long-range bombers or an extra two or three aircraft carriers that cannot even be deployed safely inside the Persian Gulf.

My deepest misgivings about this bill stem from cuts that I supported in amendments that were defeated. But the new direction for the American Armed Forces will also require that we allocate more resources in certain critical areas. That is why I supported an unsuccessful amendment to raise the pay for the dedicated men and women who serve our Nation in uniform. That is also why I opposed an amendment that would have stopped United States funding for a major new NATO air base in a strategic location in southern Itally, which will repay United States investment many times over because we will not need additional aircraft carriers to project military strength in the Mediterranean.

These increases are as important as the cuts that must be made. At a time of mounting deficits, we no longer have the luxury of buying weapons or maintaining forces that we will not need. I believe that the Hosue bill recognizes this reality to a greater extent than this bill does, and I urge my colleagues from the Senate Armed Services Committee to meet their House counterparts more than halfway on these issues. With a solid, careful step toward restructuring in this first Defense authorization since the cold war ended, we can confidently move forward with the task of making America a better place in a safer world.

Mr. ROTH. Mr. President, I have resolved to vote against final passage of the fiscal year 1991 DOD authorization bill. My decision derives from an overall impression of this particular piece of legislation, namely, it does not adequately address the changed global security situation which springs from developments in the Soviet Union, Eastern Europe and the consequent easing of superpower tensions.

The bill does not seriously take advantage of these radical developments for our overall security policy or our procurement program. It makes economies in certain defense programs but fails to address the fact that many of those systems are fundamentally irrelevant in the current security scenario. It is not enough to trim here and cut there. That only leads to stretchouts which result in rapid cost growth and to purchases of the wrong systems, further deflating the value of taxpayer dollars spent for defense. The most expensive single example of such practices in this bill is the B-2 bomber production, which I voted against, and which is going to result in nearly doubling the cost of each plane. We need to reevaluate thoroughly our strategic situation and restructure our Armed Forces appropriately. Reducing the size of our Armed Forces and equipping a new, smaller military establishment with the equipment which it will need to meet emerging threats to our security.

It is simply not satisfactory to work on the margins of our defense problem—we need to press ahead with a thorough and complete reevaluation. This the bill fails to do. We have reduced our defense budget. However, what we do authorize are forces largely equipped to fight a conventional war against the Soviet Union on the European continent—a war which appears ever less likely to take place.

Examples of our failure abound in the bill. The bill contains funding for systems such as the M1-A tank and the multiple-launch-rocket system—weapons which have virtually no relevance outside the European theater. Additionally, the Senate will require the Armed Forces to buy more of these systems than the President requested.

Exciting developments, which promised to revolutionize our security posture, such as the strategic defense initiative, have been looted for the sake of pork-barrel interests, causing major harm to the project. In the meantime, other pork-barrel interests have effectively prevented the realization of some of the most obvious defense economies. No adequate attempt has been made to address the question of closing the excessive number of domestic military bases which this Nation maintains and which some Members of Congress appear determined to keep alive, despite the fact that they do not, in any way, assist our national security. They merely drain the National Treasury.

It is ironical to watch Members stand on the floor of the Senate and rail against the costs of SDI, aircraft carriers, and battleships, and moments later decry any attempt to realize $5 billion in saving through the closure of unneeded military bases, because those bases are located in their own States. How can so many Members of this body endorse increasing taxes, when we fail to construct a Defense authorization bill that lives within our budgetary targets; targets which could have easily been met through the eliminating of pork-barrel projects?

FINAL PASSAGE OF DEFENSE AUTHORIZATION BILL

Mr. KERRY. Mr. President, while I will vote in favor of this Defense authorization bill, as a means of continuing our Nation's ability to defend itself, I have numerous differences with the decisions reached by the Senate in considering this bill.

This bill is more than $1.5 billion over the amount agreed to for defense by the Senate Budget Committee. it fails to adequately take into account the changes that have taken place in the world over the past year, especially in Eastern and Central Europe. It also fails to take into account sufficiently our Federal deficit crisis and current deficit talks, which will surely result in cuts to levels for military spending far below what we have agreed to today.

This bill contains too much money for star wars, which needs to be returned to the research program it was before President Reagan began pushing the fantasy of a peace shield in 1983.

This bill contains too much money for antisatellite weapons, which we should be restraining.

It continues to fund the B-2 bomber, which we cannot afford and do not need for our national security.

These and other choices we have made are not the choices that should be made to meet the challenges our Nation faces. This defense bill still is based on strategies and approaches developed during the darker days of the cold war. The Senate has not yet found new approaches to dealing with national security, that properly reflect our greater threats—the threat to our economy from foreign competition in Europe and the Pacific Rim—the threat to our communities from

drugs—the threat to our future if we fail to provide the education and resources needed for coming generations.

In short, this bill does not reflect the priorities this Nation need to have. I vote for it with grave reservations, and hopes that we will be able to correct many of these choices in the months to come as the dimensions of our budgetary crisis, and the need to spend money elsewhere, becomes increasingly apparent.

Mr. KOHL. Mr. President, last year I voted against the final version of the Department of Defense authorization bill. This year I am pleased to support the Defense program recommended by the Committee on Armed Services. Because the Armed Services Committee recognized and reacted to the changing nature of the threats we face and the world we live in, the Defense authorization bill before us today makes significant cuts in the administration's budget request. That is a very positive development. But today we're really not debating how much money we should spend on defense. That debate is going on in the Budget Summit—and we all suspect it will result in even deeper cuts than those proposed here. Rather than debating budget numbers, we are discussing how to prioritize the programs within the Department of Defense. And in that context, Mr. President, I have to complement my colleagues on the Armed Services Committee for the work they have done. I have disagreements with some of the positions they have taken on specific programs which I will spell out. But I would like to begin by pointing to some of the encouraging signs I find in this bill.

First, I applaud the fact that it actually terminates a large number of programs and weapons systems. Too often in the past, the Congress has found it too easy to say "maybe" rather than "no" to programs which have no essential role to play in protecting our national security. We've all become all too familiar with the "snowball effect" as it applies to the weapons and technologies considered by the Congress: the snowflake of a bright idea wins congressional approval for research and development; money for the idea gets spread over a number of congressional districts, and contractors start packing the flakes of support into a snowball; after a few years of increasing investments for research, we are faced with an avalanche that can roll over almost anything in its path. Well I'm glad to say that common sense shattered some big snowballs this year. In this bill, we call for the termination of 25 programs that would have cost us $2.35 billion this year, and a minimum of $45 billion over their lifetimes. That's significant. And I think it signals a change in our way of doing business that must continue. If we're ever going to get our fiscal house in order, and if we're going to get better control over defense spending, we're going to have to make even tougher decisions to terminate programs.

Second, this bill represents a real attempt to develop a new strategy to sustain American interests in a changed world. No one would claim that the process is complete, but I am confident that we have at least recognized that the Warsaw Pact is unable to fight a war in Europe and that the Soviet Union is unwilling to fight a war with the United States. That fact has made it clear that we don't have to spend as much as we have in the past. Over the last few decades we have spent literally hundreds of billions of dollars on the defense of Europe. Much of that was justified, but much of it was spent so that wargame planners could devise unlikey scenarios and then develop multiple options to respond to them. Now there are only two scenarios—one, that a Soviet invasion in Europe will not happen; and two, if it did, we would have months of warning time—and ony one response—we can affort to spend less and deploy fewer troops in Europe. That is precisely what the Armed Services Committee has done. In my view, they could have done even more—I supported the Conrad amendment to withdraw an additional 30,000 troops from Europe—but at least they made a beginning.

Third, I applaud the shift in our defense structure toward greater reliance on our Reserve Forces, a move that will save substantial sums of money while preserving our defensive capabilities. This is an important principle which can help accomplish one of our most critical goals: Reducing defense spending which protecting our legitimate security needs.

Fourth, I am delighted by what I see as a shift in our attitude toward nuclear weapons and nuclear war. The cancellation of the Milstar system was, in part, justified by the acknowledgement that there is no way to win a nuclear war and no way to control it once the first missile flies. In a similar fashion, we cut funding for the rail mobile basing mode for the MX missile because we believe we can negotiate real reductions in these weapons of ultimate destruction while still deterring any attack. We haven't fully accepted the implications of that; we still funded the B-2 and other system that I'll mention in a moment. But this bill represents a major change in the way we think about need for and role of nuclear weapons. Combined with continued progress on arms control, I believe we are on the edge of a new dawn of hope.

With all the positive elements contained in this bill, there are still some areas where I believe we haven't gone far enough. Without in any war diminishing the importance of the committee's work, let me briefly discuss some of my concerns.

I voted in favor of an unsuccessful effort to stop the procurement of the B-2 Stealth bomber after its search and development phase and the 15 planes now under construction are completed. Even if the B-2 could successfully penetrate Soviet air defenses, even if it could successfully attack mobile targets—both dubious assumptions—I am not convinced that we need it and I am certain that we cannot afford it. While the B-2 would represent an improvement in our strategic capabilities, its benefits diminish in value as the Soviet threat recedes and its per unit cost increases as the size of the force declines. We need to ask how much additional deterrence we get for each $800 billion plane. Our current bomber capabilities, combined with the other legs of our strategic triad, provide a deterrent which, in this new environment, is sufficient to give us the margin of safety we require and deserve.

I am disturbed about the strategic implications of the large increase in the ASAT Program. I addressed that issue during the debate on the Kerry amendment and see no reason to repeat my remarks here. It is sufficient to say that I do not believe the increase in this program is either necessary or justified.

Finally, I was profoundly disappointed by the action taken by the committee and the Senate on the strategic defense initiative. It is hard for me to believe that we have spent so many billions of dollars on this program—and even harder to believe that we are going to continue to do so even though we have no reason to believe that SDI can accomplish the missions some have assigned to it. While we at least restrained spending on this program, we are still spending too much. And while adoption of the Bingaman amendment means that we will have more control over the priorities in the program, we never got to the core issue of whether or not the entire program makes sense given our other defense, domestic and economic needs.

Despite these problems, Mr. President, I believe that on balance this is a sound bill. It reflects serious work by serious people. It is symbolic of the sort of work the Senate is capable of doing. The "Explanation of the Committee's Recommendations" contained in the report, which are based largely on a series of speeches by Senator NUNN, are models of lucid argument and insightful commentary. They can serve as a guide to national defense policy for years to come. But we have to follow that guidance and, in that regard, the bill before us is just a downpayment. We will need to continue to modify our defense doctrines and

continue to reduce the amount of money we spend on the Pentagon. The dramatic changes in the world make that possible and our deficit makes it imperative. This bill begins that reduction in a responsible manner. I hope that by the time this bill returns from conference, and after the congressional leaders and the President bring us an agreement on the budget, we will be able to take a few more steps in this process.

Mr. DODD. Mr. President, I rise in support of this legislation, which has been appropriately described as the first post cold war defense budget.

This year I took two trips to central Europe. Visiting East Berlin in March, I walked across a barren field that had recently been littered with land mines, barbed wire and machineguns. On the day of my visit the land was a boulevard between East and West Germany. In late May and early June, I visited Poland, Hungary, and Czechoslovakia and witnessed the excitement, the fervor, and also the difficulties of the fundamental political, economic and social transformations there. I also visited Romania, which is an entirely different story.

The substance of what we have debated here through the past days has plenty to do with what I experienced in these central European countries. The dislocations we face in moving to the next stage of our defense posture is in some ways as profound as the wholesale revisions taking place in central Europe and the Soviet Union. The changes for the United States and central Europe are both promising, present great potential for economic growth and world peace, and both are fraught with dangers.

One danger is that we may overinterpret the nature and permanence of the changes in the Soviet Union and relax our defenses too soon. In spite of the breathtaking changes, the Soviets have not reduced their forces significantly—certainly not their most threatening strategic forces.

On the other hand, the elements that make up the military threat from a potential adversary go significantly beyond hardware. While the Soviets' hardware remains intact, their ongoing withdrawal from central Europe and the general disintegration of the previously existing political and social regimentation and military discipline has already seriously reduced the actual threat from the Soviet Union.

As usual in political situations, we can err here on two sides. One error would be to ignore the monumental changes in the east bloc and go on building weapons as if nothing has happened. The opposite error would be to see only the changes, and to ignore the possibility of a reversal or a lengthy period of uncertainty in the struggle between the old and the new in the Soviet Union. In other words, we would not want to disarm too fast too soon.

Remember, we made this mistake after both World Wars. After the first, we immediately disengaged from Europe, spurned the League of Nations, and thereby indirectly contributed to the rise of Nazism in Germany—or, at least, were not in a good position to prevent it.

We withdrew our forces prematurely after the Second World War as well. By doing that, we were not in the position to pressure Stalin to live up to the Yalta agreements, and central Europe fell prey to a 40-year-long Soviet colonialization.

Just as we started to debate this legislation, another powerful reminder jolted our collective conscious, the Iraqi dictator's brazen aggression against Kuwait. It starkly brought home the message that beyond any superpower detente this world remains a very dangerous place, the Middle East a particularly volatile part of it, and our strategic considerations will have to be reoriented instead of relaxed or abandoned.

So while some reduction in our defense spending and some rearrangement in our force posture is in order, we need to go about it prudently, pursuing our security interests in light of the hard realities of the actual world.

We need to go about it prudently for two reasons. A reduction in our defense spending has costs and benefits. The benefits are twofold: a lower Federal deficit from reduced spending and an opportunity to divert defense savings to fund nondefense capital investments with long-term benefits for our Nation.

The costs are most relevant to this discussion. Simply put, a reduction in defense spending will result in lost jobs and failing businesses. Members of Congress are elated about reduced East-West tensions, but we are deeply concerned about the potential loss of jobs for thousands of hardworking Americans employed in the defense sector.

The question that we must address today and for many months to come is—what will reductions in defense spending mean for regions where the defense industry is so important to the well-being of the local economy?

The unavoidable fact is that we are going to face some very painful dislocations in the near future—program terminations, sharp reductions in unit numbers ordered by the military, stretch-outs, local unemployment, plant closings.

Mr. President, in my State, Connecticut, where our skilled workers have contributed so much to the safety of this Nation, we are already feeling real pain. One example is provided by the UNC Naval Products plant in Uncasville, CT. This splendid facility has built nuclear propulsion systems for our submarines for 34 years. I wish all of my colleagues could visit this plant to see for themselves what amount of quality of training, tooling, technological expertise, organization and elaborate security goes into producing such a crucial piece of frontline technology. This is a zero-error environment. A submarine nuclear powerplant must never break down and none built at UNC ever have.

As a result of our reduced rate of submarine construction, the Navy announced that it is phasing out the contibution of the UNC plant. All that technology, craftsmanship, and discipline is threatened to be wasted, the workers laid off.

The point I want to make is that the causes of this dislocation lie in the development of world politics and the subsequent decisions of our national leadership. They are not due to the fault of our workers of managers. They are not due to bad business decisions, low productivity or inadequate workmanship. As a result, I strongly feel that the Federal Government has strong responsibilities to help to ease these dislocations and assist the veterans of the cold war—America's defense workers—to a smooth transition, to avoid undeserved hardships.

I strongly disagree with those who claim that this is just a normal turn in the ups and downs of doing business in a free market economy. Some facilities in my state, such as the Pratt & Whitney jet engine factory, have always operated in part on the free market, in part in government business. To state, however, that facilities such as UNC Naval Products, or the Electric Boat Submarine yard, ever operated on the free market is laughable. They have had only one customer, the Government of the United States, and their whole operation has been hogtied into government regulations and requirements. These facilities could not have diversified into alternative activities even if they wanted to; it is inconceivable that the Navy would have allowed that. Many of these defense workers for all practical purposes worked for the Federal Government. The demand for their skills, for their product had nothing to do with the free market; it was subject to the policy decisions of Government officials only.

Mr. President, I thought it important to lay out the case for the dislocated defense workers because their plight is sometimes too easily dismissed as a minor side effect of the coming of eternal world peace, and because I think we have a strong responsibility to these veterans. If we ever realize what is fashionably called the peace dividend, our defense workers, who produced it, should be at the head of the line. I really hope that my friends, the chairman and the ranking member of the Armed Services Com-

mittee, will take the initiative to address this question through the committee in more depth.

As for the bill before us, our debate over it was expeditious and remarkably free of partisan fervor. This is a tribute to the skills of the outstanding managers, Senators NUNN and WARNER. I have great admiration for their product, which is an excellent piece of thoughtful, balanced legislative work, and for the way they managed this bill through the Senate with maximum efficiency.

One strong disagreement I have had with this bill is its substitution of two SSN-688 attack submarines for the second ship of the new *Seawolf* class, a program that is very important for my constituents who work at the Electric Boat Shipyard. It is hard to argue against Chairman NUNN's dedication to the "fly before you buy" principle that so permeates this legislation. Let me call Senator NUNN's attention to the fact, however, that his principle ought to have some practical limits in the case of such a huge and complicated system as a nuclear submarine.

I can see the utility of this principle with the B-2, for example, where we apply revolutionary new technology and where an aircraft takes at most several months to construct from start to finish. The submarine whose keel is laid today will not be commissioned until 5 to 6 years from now. Under thse circumstances, to insist on full testing of every system before construction starts, on full reduction of concurrency, is simply self-defeating; it makes no sense.

Compared to the B-2 revolution, the phasing in of new submarines is more of an evolutionary process. We build aircraft in batches of at least a few dozen totally identical units. Due to the long construction time of submarines, we update their equipment and construction technology almost ship by ship. From the first *Trident* to the last, for example, a whole technological era elapses. This necessitates the gradual phasing in of new technologies even within the same class of submarines.

I am not arguing against rigorous testing before construction; I strongly support it. What I oppose is the rigid application of "fly before you buy" in the *Seawolf* program because a technology may become obsolete by the time we satisfy ourselves that it has been thoroughly tested. I will appeal to the conferees on this bill to recede to the House position on this issue and approve the one *Seawolf* instead of the two SSN-688's.

One of the more contentious issues before us was the continuation of the production of the B-2 bomber. I voted with the majority and the distinguished managers to allow this program to continue in its scaled down version and subject to all the funding fences that the Armed Services Committee mandated. I am just as awed about the price tag of this aircraft as anybody. I also know, however, that a great deal of this money has already been spent. The question is whether we deem all this investment wasted or spend some more in order to realize the full benefits of the technology. It is misleading to state that each aircraft costs $800 million or some other outrageous sum. First, the rising unit cost is due to a large extent to the very fact that we are scaling back the program. Second, elimination of further aircraft would not result in nearly as much in savings per unit. For instance, when Secretary Cheney scaled back the program from 132 to 75 units, the saving per aircraft was only $250 million, still a huge amount, but not nearly $800 million.

Mr. Chairman, I may be biased on submarines but I do not have any parochial interest in the B-2; my State's share in its production is minuscule. After carefully weighing the alternatives, together with the realization that our security lies and continues to lie in our technological superiority, I decided that the American people are much better served by the completion of the sharply reduced B-2 program than by its termination.

One worry I had with this year's budget request was the planned shutdown of the M-1 tank line after this year's allocation. Such a move would have paralyzed and scattered the production force of a whole crucial industry, that of the main battle tank. I thought it much more prudent to continue production on a reduced scale, by combining domestic requirements with foreign sales, and I worked with my colleagues and industry representatives for such a solution. I am pleased that the Armed Services Committee has realized the wisdom of our idea and in report language encouraged the Army to work out just such a schedule. I will continue to pursue this course, which we plan to realize without any additional cost to the taxpayers.

Mr. President, I compliment again the distinguished managers for a job expertly done both in the committee as well as in the whole Senate. We are at the dawn of a new world, but we have to enter it with caution and circumspection. Our leadres served us well in this endeavor.

This legislation, while not perfect, serves our Nation well in reducing some of our burdens, but also in maintaining our strengths. I vote for it with the conviction that we did our best to discharge our most important duty: to maintain the physical and moral integrity of the United States.

Mr. President, I rise today to support the fiscal year 1991 DOD authorization bill. I want to congratulate the Armed Services Committee for its excellent work on a very difficult and challenging task. There are many new elements in the world and security environment that must be considered, along with the enduring threats we continue to confront. And I believe the committee has produced a sound bill.

I share the views of the distinguished ranking member of the committee, Mr. WARNER, that the full Senate clearly shares the appreciation and respect for the committee's work. On almost every vote, the committee's position prevailed. That says a great deal about the quality of the work of our colleagues on the Armed Services Committee.

Overall, I am very satisfied with the outcome. I have supported cuts in the U.S. Defense budget. And I have stated previously that it is imperative that the reductions be based on a thorough and informed reassessment of U.S. security requirements in an extremely fluid and dynamic international environment. The United States must resist the temptation to slash defense spending too deeply and too quickly. I believe reductions are appropriate and necessary, but we must reduce prudently and deliberately, based on continuing and emerging security needs.

And I believe the committee has made a very important contribution to this end. There are a mumber of committee assumptions and judgements regarding the continuing threats, the overall security environment, and how to address these concerns that I do not necessarily fully support. And there are a number of specific programs the disposition of which in the final bill I do not support. I will not take the time now, after so many hours on this bill, to enumerate these individual issues, but I will note again that overall, I believe this is a sound bill.

Mr. President, I will also note that I have a number of strong objections to the House Armed Services bill. I do hope that the likely result of the passage of both the House and Senate bills will be a conference report that will strike a proper balance between national security and budgetary responsibility. On many of the disputed issues, I must say that I hope the Senate position will prevail.

Mr. GLENN. Mr. President, on July 24, the distinguished Senator from Georgia, Senator SAM NUNN, spoke on the floor of the Senate on the far-reaching Defense bill that the Committee on Armed Services just reported out to the Senate. I agree with the Senator that this is a watershed bill. It sets the military services on a prudent glide path to a smaller defense establishment based on changes in the military threat and a prudently revised military strategy to counter that threat, and I want to congratulate him

for his leadership as chairman of our Armed Services Committee.

Mr. President, adopting a budget in Congress gets harder every year, and this year is no exception. We have a serious problem with the Federal deficit, and we are struggling to figure out what we need to do to bring it down. I hope the budget summit will reach agreement on a sensible plan for avoiding a Gramm-Rudman sequester this year. Otherwise, we will march into a chaotic fiscal situation where the American people will come out the loser.

Mr. President, the question is continually asked as to why we cannot cut Defense funding levels to considerably less than the $289 billion level we marked to in our committee deliberations. The assumption underlying this question is that the cold war is over, we won, why keep on with an enormous defense expenditure when it is so obviously not necessary? Let me analyze that briefly.

To me, a military threat is comprised of two elements. One is the actual hardware and equipment, and the trained personnel to use that equipment. The second is the political will and political ability to use that military force for whatever purpose.

Mr. President, in the case of the Soviet Union, the hardware, equipment, and personnel, by and large, are still there. Large numbers of missiles are still pointed at the United States, submarines with ballistic missiles are still on patrol, long-range bombers are still sitting on the flight line, nuclear weapons systems are still in place, thousands of tanks are still lined up, the point being that the basic military strength of the Soviet Union is still largely intact. What is new and different is that the Soviets' political will and ability to use their hardware has become substantially less.

Clearly, the whole Warsaw Pact is in shambles, and the internal situation in the Soviet Union is equally in turmoil. The once monolithic Soviet political structure is in disarray. In all likelihood this has rendered the Soviets unable to use effectively the huge military forces they built up over several decades, at least for the present.

I certainly do not want to be such a cold warrior that I see threats where none exist. But I must admit I will rest more easily when our arms control talks with the Soviets have come to fruition, when more Soviet hardware and missiles are being destroyed, or at least placed in a monitored storage situation, and when verification of these reductions leaves no doubt that the real military threat, the hardware and personnel, are really being reduced to more acceptable levels to match any United States drawdown. Then, and only then, can we look ahead reasonably to a peaceful world for the indefinite future.

With that view in mind, I think it prudent that this Nation proceed cautiously in reducing our forces in response to changes in Soviet policy and make certain that we are able to verify everything agreed to in arms control agreements.

If we are to start our reduction of our military forces this year, as we are planning to do, then we should do it on a rational basis and not just rush pell-mell to cut with little regard for maintenance of effective combat forces.

As we "build down" to a reduced level, we need two vital pieces of information in order to come out with the needed combat capability in the New World in which we live. First, we need a clear definition of the changed threat. While we need to maintain a substantial capability within NATO, this commitment probably can be eventually handled with much fewer personnel stationed in Europe, but with equipment prepositioned there ready to be manned by United States military personnel stationed elsewhere and available to be brought in rapidly in the event of need.

While that may suffice to keep us involved with NATO and Europe, there also are many other areas of the world with which we have concern. Just a couple of examples are the Persian Gulf, which contains some 65 percent of the oil reserves of the world, and the Korean Peninsula. Both are potential trouble spots with which we must be able to cope. Be badly need a more detailed and updated threat analysis of these areas as well as other potential flashpoints around the world, including the transportation "choke points" of the world, if we are to have a rational basis for structuring our future combat forces.

As we build down we also must reevaluate the roles and missions assignments between our regular military forces and our Reserve Forces. The current assignments between regular and Reserves are outlined in general terms in our total force policy, which has been in effect since 1973. Unfortunately, this policy has had little if any formal reassessment since that time. Over these past 17 years, some functions assigned to the Guard and Reserves have worked out very well, while others have not provided the combat mobilization capability they were supposed to provide.

After informally requesting an updated analysis of the total force policy from DOD for several years, and getting no results, last year the Senate Armed Services Committee wrote into the Defense authorization bill a requirement for a year-long reanalysis of this total force policy; an interim report is due to the Congress by September 15, and a final report by December 31, of this year. We must have that reassessment of total force policy addressing potential changes in roles and missions if we are to design and fund the best combination of forces to cope with the threats of the future.

Mr. President, it was against this uncertain backdrop that the Committee on Armed Services did its work this year. I think the committee has reported out a very responsible authorization bill for defense despite great strategic and fiscal uncertainty. Some may argue that we marked too high a level of funding for defense. I am not one of those. Quite frankly, the committee had to make some very tough decisions at the $289 billion defense spending level it recommends for fiscal 1991. I hope our budget summit negotiators will take note of these decisions and what the consequences would be if the defense funding number is set substantially lower than the committee recommends in this bill.

I think all of us are heartened by the developments in Eastern Europe and the Soviet Union that have resulted in a decreased military threat there. There is no doubt in my mind that we can reduce our military forces somewhat as a result of that reduced threat, and that we can and should use some of the savings from a builddown of our military forces to correct our fiscal and domestic problems. The $64,000 question is how to do this in a responsible, phased way so that we do not rupture the military forces that we still need to maintain our national security.

In coming to grips with this problem, the Committee on Armed Services adopted a long-term strategy of reducing our military forces over the next 5 years so that the restructured forces in each of our military services will remain combat ready. The bill reported out by the committee provides a responsible blueprint for the military forces to follow in terms of equipment, force structure, and manpower. The blueprint outlines a builddown strategy that prudently guards against a reversibility in the threat, and provides a glide slope in manpower levels that minimizes the negative effects that the builddown may have on our men and women in uniform and their families.

As chairman of the Subcommittee on Manpower and Personnel of the Committee on Armed Services, I want to say that the subcommittee worked very hard to craft a responsible manpower plan. We were keenly aware that adoption of our recommendations would set the course for our military services for the next 5 years, and beyond.

At the outset of our deliberations the basic principle we adopted was to act to sustain, and to enhance where possible, the combat effectiveness of our military personnel as the military services builddown over the next 5

years. Consistent with this principle, the subcommittee proposed, and the full committee adopted and reported, a number of recommendations in this bill that sets out a responsible course for a manpower builddown in our military services.

I will summarize these recommendations:

First, the committee's recommendations establish fiscal year 1995 active duty strength levels for each of the military services based on the mission, force structure, and organizational realignments that each military service is expected to make in reaction to the changing threat over the next 5 years. In the aggregate, the active duty military strength recommended for fiscal year 1995 is 1,602,000, a reduction of 474,400 or 23 percent, from the current level of 2,076,400.

By service, the Army's proposed fiscal year 1995 end strength is 510,000, down by 234,170 over the next 5 years; the Navy's proposed fiscal year 1995 end strength is 500,000, down by 90,500 over the next 5 years; the Marine Corps' proposed fiscal year 1995 end strength is 177,000, down by 19,735 over the next 5 years; and the Air Force's proposed fiscal year 1995 end strength is 415,000, down by 130,000 over the next 5 years. These proposed reductions anticipate—but do not necessarily require—force structure reductions of at least 6 active divisions in the Army; a reduction of at least 111 Navy ships—including 2 aircraft carriers and all 4 battleships, and the standdown of 2 active Navy air wings; and the deactivation of at least 11 active air wings in the Air Force.

Second, the committee's recommendations establish fiscal year 1991 active duty strength levels for each of the military services to put them on a responsible glide path to achieve the fiscal year 1995 strength levels I have just described. The recommended end strengths by service for fiscal year 1991 are: 704,170 for the Army, down 40,000 from fiscal year 1990; 568,500 for the Navy, down 22,000 from fiscal year 1990; 193,735 for the Marine Corps, down 3,000 from fiscal year 1990; and 510,000 for the Air Force, down 25,000 from fiscal year 1990. In the aggregate, the recommended fiscal year 1991 service end strengths sum to a 100,000 reduction from fiscal year 1990. Based on information we received in our subcommittee hearings, the military services should be able to achieve these recommended fiscal year 1991 strength levels without resorting to involuntary separation of career personnel.

In order to balance the reduction in strength across the personnel inventory, the committee's recommendations also set ceilings on officer strength consistent with the current ratio of officers to enlisted personnel; set revised ceilings on the number of general and flag officers; and set ceilings on the number of senior civilian personnel in the Department of Defense. These ceilings put the DOD on a glide path to a 20-percent reduction in these areas by the end of fiscal year 1995.

Third, the committee's recommendations preserve and enhance the readiness of Reserve and National Guard manpower to meet an increasingly important role in the total force, and to act as a hedge against reversibility of the threat. Specifically, the committee's recommendations sustain Reserve force manpower strengths at the fiscal year 1990 level, as well as provide a number of enhancements to improve the readiness and benefits of personnel in the Reserve and National Guard components.

These enhancements include: First, providing for more effective utilization of full-time active duty reservists in the Reserve and National Guard components; second, providing for greater representation of regular active duty personnel in the Reserve and National Guard components; third, providing for a more viable individual ready reserve manpower tool as a hedge against a reversal in the threat; and fourth, providing for access to certain nonappropriated funds for morale, welfare and recreation activities for reservists in good standing. I believe this package of recommendations is consistent with the increased reliance we will be replacing on our Reserve and National Guard components as our Active Forces builddown.

Fourth, the committee's recommendations provide greater flexibility to the military services to restructure their senior grade personnel inventories to match requirements as they builddown their forces over the next 5 years. In implementing this plan, the military services will be able to selectively reduce retirement eligible personnel to avoid disproportionate reductions in other nonretirement-eligible segments of the inventory.

Fifth, the committee's recommendations include measures that provide a package of compensation and benefits to military personnel who are involuntarily separated from active duty due to reduction in strength levels over the next 5 years. This package provides a safety net to personnel who had planned on a career in the military but who now may be required to leave active duty before they become eligible to retire.

The recommended package is consistent with what Senator MCCAIN proposed in his bill S. 2663. It provides that involuntary separation pay for both officer and enlisted personnel; medical transition benefits; unemployment compensation equal to that provided in the civilian sector; vesting in education benefits under the GI bill; transition and job search services; and travel and transportation benefits for resettlement to any location within the United States.

Mr. President, with regard to the education and transition provisions in this package, I want to thank Senator CRANSTON and his staff on the Veterans' Affairs Committee for their cooperation and assistance. These programs fall under the oversight of that committee, and we relied on the expertise of that committee to help us work out these provisions.

Finally, the committee's recommendations provide a regulated, prudent process for the military services to follow as they reduce their personnel inventories over the next 5 years.

Specifically, the military services will be required, as a first step, to set new accession levels at ceilings established at the rate necessary to sustain the lower fiscal year 1995 strength levels recommended in this bill.

The military will be required, as a second step, to reduce the retirement eligible population consistent with senior grade requirements at the lower fiscal year 1995 strength levels.

The military services will be required, as a third step, to reduce the first-term, noncareer population consistent with junior grade requirements at the lower fiscal year 1995 strength levels.

Only after going through these first three steps may the services take the fourth step and reduce the mid-career personnel inventory in order to reach mandated strength levels for any given year.

This four-step process ensures that the most vulnerable segment of the personnel inventory is protected. It also ensures that the services do not hollow out the segment of the force most crucial to the sustainment of combat readiness as the military services builddown force structure.

Finally, the committee's recommendations provide for a 3.5-percent pay raise for military personnel. Quite frankly, I believe the 3.5-percent pay raise for military personnel proposed by the administration is inadequate. I attempted earlier to increase the raise to 4.1 percent to at least match projected inflation; however, I was unable to do so within the dollar constraints placed on manpower. I still believe that military personnel deserve a 4.1-percent pay raise, and so I will offer an amendment to the Defense bill to increase the military pay raise to 4.1 percent.

Mr. President, the issue here is one of fairness. The administration's request for a 3.5-percent military pay raise falls far short of the 4.8-percent wage growth projected for the private sector in fiscal year 1991 as measured by the employment cost index [ECI]. It also falls well short of the 4.1-percent growth projected for inflation as

measured by the Consumer Price Index [CPI].

Since 1981, the administration has proposed, and the Congress has approved, annual pay raises for military personnel short of private sector wage growth. As a result, military pay now lags private sector wages by 11.2 percent; the gap will grow to 12.6 percent in fiscal year 1991 if a 3.5-percent raise is all that military personnel receive. I think this erosion needs to be halted, and if possible reversed. That is why I will offer my amendment—to halt the erosion of the value of pay for the military services. I hope my colleagues will join me in supporting our men and women in uniform in these difficult and uncertain times by cosponsoring my amendment.

Mr. President, I want to conclude by saying that the recommendations I have just outlined will help the military services to transition prudently to a smaller, but combat effective force. In making our recommendations, we were very mindful of the contributions of our men and women in uniform have made in bringing about a more peaceful world situation. That is why we provided a safety net of compensation and benefits for those who may be involuntarily separated as a result of the drawdown of our forces.

Finally, I want to commend our men and women in uniform for continuing to make the sacrifices we call on them to make through these difficult times. I for one pledge my continued support for their welfare and quality of life.

Mr. PELL. Mr. President, I voted in favor of the Defense authorization bill because I believe it makes a good beginning at the difficult task of cutting back on defense spending to levels appropriate to the new order of world affairs. In many ways I wish it had gone further, but it is a very good beginning.

The bill reduces the administration budget by $18 billion in budget authority, an amount which would have been unthinkable even 1 year ago. It contemplates personnel cuts of 100,000 over the next year and nearly 500,000 over the next 5 years.

The bill limits the B-2 bomber to two additional planes and freezes the SDI Program at the 1990 level. I supported deeper cuts in both of these programs and will continue my efforts to reduce them in the future.

On the local level, I am pleased to note that the bill authorizes the construction of the 18th Trident submarine and that it authorizes two 688 attack submarines. I would have preferred that it make provision for two of the new *Seawolf* submarines in lieu of the 688's, and I do hope that whatever the outcome of compromise with the House, that the result will be jobs and security for Electric Boat.

I am particularly pleased that the bill includes the Riegle-Pell amendment on defense industry adjustment, based on the defense conversion bill I introduced last winter. The amendment provides a broad range of assistance to workers, communities and small businesses in their efforts to adjust to reduced defense budgets.

Finally, I am very pleased that the bill also includes my provisions for a new $13.7 million building at NUSC in Newport and that it curtails the GWEN Program and addresses the problem of uncompensated overtime, which is such a problem for many of our defense contract workers.

Mr. DOLE. Mr. President, I rise to commend the distinguished leaders of the Armed Services Committee, Senators NUNN and WARNER, for the outstanding job they have done in bringing the Defense Department authorization bill to final passage. The RECORD shows we completed this important legislation in a remarkably timely manner, with all the good will, cooperation, and skill we have come to expect of the leadership of the Armed Services Committee.

I would also like to recognize several staff members who worked tirelessly throughout the marathon sessions leading up to final passage—Pat Tucker, Brian Dailey, Les Brownlee, Ann Sauer, and Arnold Punaro of the Armed Services Committee, and Mira Baratta, Dan Stanley, and Bill Wisecarver of my own staff. I know my colleagues join me in thanking them for the significant role they have played in the resolution of this complex and vitally important legislation.

The PRESIDING OFFICER. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WARNER. Mr. President, as the Senate prepares to vote on the fiscal year 1991 national defense authorization bill, I know that all my colleagues feel, as I do, the historical importance and the critical responsibility of this task.

The debate which we just had represents the first opportunity and the first occasion for a debate at the national level on our national security policy in a postcold war environment.

We here in the U.S. Senate—the world's greatest deliberative body—have engaged in a debate over the shape, structure, and composition of our military forces and the policy governing the use of those forces, against a backdrop of dramatic change in the world in which we live.

I believe that the world has not undergone such monumental change since the end of World War II—when, together with our allies—and through the courageous efforts of our soldiers, sailors, and airmen, we vanquished our foes and set out to build a world where all men could live in peace and freedom.

But, as the Iron Curtain descended across Europe and the heavy yoke of communism enslaved millions, a bitter cold war set in. The United States of America, accepting its role as a global power and the leader of the free world, opposed the tyranny of communism and accepted the tough, costly challenges of the cold war.

The past year has, indeed, wrought remarkable and unforeseen change.

The major countries of Eastern Europe, mustering unprecedented courage, have rejected communist totalitarian regimes and are moving toward free market, democratic societies.

The Soviet Union, with an economic situation virtually that of a Third World country, is struggling to reform its system of government as well as its economy. Simultaneously, the Soviets are being rocked by internal strife, rebellious states, and ethnic unrest.

The Berlin Wall, the stark symbol of the Iron Curtain, is gone and the reunification of Germany is well underway.

But Soviet strategic offensive and defensive nuclear forces are still the largest and most modern in the world. And the Soviet Army, likewise, remains the largest, most modern conventional force in the world. Until they are reduced to where they no longer pose an unacceptable level of threat, we must not drop our guard.

It has become evident that only the Soviet's military strength sets them apart as a world superpower. But if they are unable in the next few years to shore up their economy and stabilize their Government, internal chaos could result, with unforeseen consequences for the rest of the world. Who in the Soviet Union, should insurrection become widespread, control these weapons?

The members of the Armed Services Committee voted unanimously to report this bill favorably to the Senate. Because it provides for the minimal capabilities needed to protect U.S. national security interests, at least for the near term, all Republican members of the committee were able to support it.

However, there are those of us in the minority of the Senate Armed Services Committee who have reservations about some of the assumptions used in formulating this bill. We are concerned with the majority's view of the nature and extent of the change in the threats worldwide.

We also are concerned about the priorities established in the bill, the outyear funding levels, and the substantial adverse effects of these funding levels on the ability of our defense industrial base to respond to defense needs in the future.

We hail the march of democracy in Eastern Europe and agree that de-

fense spending and force structure should reflect the lowering level of threat in that area of the world. I repeat, that area of the world. But U.S. defense posture must be based on threats that continue to exist elsewhere around the globe and cannot be based solely on the decreasing threat in Europe. This requires that our forces be structured and that defense spending be maintained at a level sufficient to deter and counter actual Soviet military capabilities, the existing and emerging capabilities of other nations who may act militarily against our interests, and terrorism which often has no nation of origin.

Because the funding level in this bill for fiscal year 1991 does ensure that we can deter and, if necessary, counter these threats, we can support it. But we have doubts about whether the 5-year glide path suggested by the majority will permit us to retain those capabilities in the out years. Therefore, we cannot at this time endorse the outyear defense funding levels asserted by many in the other party in reaching decisions on the bill. For the same reasons, we cannot endorse the funding levels proposed by either of the Congressional budget committees.

We are concerned about efforts to require even larger reductions in defense spending in fiscal year 1991. A large, so-called peace divided, simply cannot be realized in a single year without doing irreparable damage to our overall defense posture, particularly the All-Volunteer Force concept.

We are also concerned about the pace and manner of the defense restructuring initiated by this bill, including the 5-year funding levels. Any attempt at this time to adopt these 5-year levels may well lead, in the long term, to clear disagreement within the committee about the level of continued reductions and the priorities in the defense program.

Even if we could agree on funding levels and priorities over the next 5 years, as envisioned by the bill, it is by no means certain that such a program could be sustained in the Congress. This poses serious concerns to the Republicans on the committee. I want to describe for my colleagues in more detail some of those concerns.

STRATEGIC NUCLEAR DETERRENCE

We have major concern with the priorities accorded to some aspects of our defense programs, especially nuclear deterrence. We believe that a fundamental underpinning for U.S. national security is a credible and modern strategic and theater nuclear deterrent. Nuclear weapons have successfully maintained the peace among the major powers since World War II. We see no reason to discard or undermine our reliance on this deterrence strategy. Such a strategy must be based on a balance between arms control negotiations and a credible, albeit reduced, nuclear modernization program.

Given the continued robust Soviet strategic modenization program, many of us cannot agree, at this time, with the assertion contained in the committee report that the requirements for a credible deterrent can be maintained at "forces lower in level and more stable in structure than those currently proposed at the START negotiations." We do believe that our strategic forces should be "more stable in structure." But at this point, any reductions in our strategic deterrent forces below START levels should be negotiated in follow-on strategic arms reduction talks, not result from unilateral U.S. actions.

All Soviet nuclear systems are growing more capable due to technological improvements. These systems include two new mobile ICBM's, the much more capable SS-18 heavy ICBM, two submarine programs and improved SLBM's, and two bomber programs. The changes in Soviet operational behavior, as outlined in the committee report, are insignificant since these activities can be and, in some cases, have been reversed.

Moreover, according to Dennis Nagy, Acting Deputy Director of the Defense Intelligence Agency, in recent testimony before Congress,

> The Soviets * * * continue to invest about as heavily in active and passive strategic defenses as they do in offensive forces, and their capabilities are improving in all areas.

This defensive modernization will increasingly bring into doubt the credibility of our nuclear deterrent unless U.S. nuclear modernization programs receive at least sustained, if not increased, funding commitments.

But even the strategic programs in this bill cannot be deployed with the assumed 5-year spending levels underlying the bill. We fear there are insufficient funds for both ICBM modernization and the B-2 program as the bill is currently configured. If this is true, then the United States must immediately begin to seriously consider the benefits of ballistic missile defenses in enhancing strategic deterrence and stability.

CHANGES IN THE WARSAW PACT THREAT

Most of my Republican colleagues on the committee and I believe there are inconsistencies in the body of the committee report regarding how the dramatic events in Europe have changed the threat and, consequently, how those events have changed the requirements for strategic force modernization, future European stability, and other glboal commitments.

While the Warsaw Pact may be defunct as a fighting force, the Soviets still maintain the largest, most modern land army in the world. The Soviets spend 25 percent of their gross national product on defense—as recently admitted by Soviet Foreign Minister Shevardnadze at the 28th Communist Party Congress early in July. While their tank production may be declining, the Soviets will still produce 1,400 tanks in 1990, almost three times as many as we will build. They will also build 4,800 armored personnel carriers and 500 self-propelled artillery pieces, almost 10 times the number we will build.

A report in the July 10th Washington Post stated:

> The 28th Communist Party Congress * * * adopted a toughly worded resolution on military policy today, declaring that the Soviet Union is still under threat from the West and needs to strengthen its armed forces.

We must begin to consider how Europe will look as NATO's roles and missions evolve and historic ethnic and national differences begin to surface as potential causes of instability and war. What role will be played by the United States and its military in such disputes that may arise in Europe? In short, the bipolar conditions of the cold war were far more predictable and stable than the multipolar world that is emerging in Europe. We must begin to plan for these new possibilities and no longer view our military presence in Europe in purely East-West terms.

In considering significant reductions in the U.S. military presence in Europe based on lengthened warning times, we must not focus too heavily on the diminishing threat to NATO as it exists today, but on the security situation as it may emerge in the future. Until the future direction of the Soviet Union and Europe as a whole is more clear, we must be cautious in both the pace and size of United States reductions in Europe as well as in changes to our security commitments.

While the likelihood of strategic nuclear war arising out of a conflict in Europe has probably diminished due to the changes in the Warsaw Pact, other factors and scenarios are emerging that might depend on the deterrent effect of nuclear systems. For this reason, we believe the United States and our European allies must support and maintain a vigorous theater nuclear modernization program, in addition to a credible U.S. strategic nuclear modernization program.

So long as the United States remains committed to ensuring a free and democratic Europe, we must ensure that we never need return to the 1950's doctrine of massive retaliation. It is in the best interests of the United States and our European allies that we possess a full range of nuclear capability to control escalation of any conflict.

REGIONAL THREATS

The committee report asserts that "the tensions and open warfare that

threatened Western interests in some, but not all, other regions have also abated." An examination of regional threats to Western interests shows that the world has not become a safer place in areas outside of Europe. Unfortunately, the dramatic changes we have witnessed in Europe have yet to spread to other regions of the world. Therefore, we do not agree with the assessment that developments around the world—not just in Europe—justify fundamental changes to United States national security policy and military strategy.

MIDDLE EAST/PERSIAN GULF

The Middle East is a prime example of a region of the world that has not experienced a lessening of tension in the past year. Recent tensions between Iraq and Kuwait are indicative of the type of situations which could quickly result in open warfare and possibly involve United States forces.

Arab-Israeli tensions have reached an alarming level, compounded by the proliferation of ballistic missiles, chemical weapons, and possibly nuclear weapons. We support strongly the development of antitactical ballistic missile systems to protect not only U.S. forces in the region but also those of our friends and allies against these threats.

Given the United States commitment to the State of Israel and the Western need to guarantee access to the oil resources of the region, a conflict in that part of the world would inevitably involve United States—and more likely allied—forces.

PACIFIC REGION

The Pacific is another area of the world where threats to Western interests have not decreased in the past year. The main threat to regional security remains North Korea. We believe continued United States force presence at levels high enough to deter a North Korean attack is considered essential at the present time. While it is true that South Korea is in the process of developing a large, modern military force, North Korea still enjoys military superiority, both qualitatively and quantitatively, that will probably last for the next decade. North Korea's leadership has a record of unpredictable, violent behavior.

While we agree that South Korea should assume greater responsibility for its own defense, the United States should not withdraw precipitously from South Korea. A continued United States force presence is necessary to deter a North Korean attack and keep the peace that has existed for almost 40 years.

Other threats in the Pacific—from China to the Philippines—clearly indicate that tension in this region has not decreased to the extent it has in Europe.

LATIN AMERICA

We agree that Latin America remains an unstable region, despite the advances we witnessed with the success of "Operation Just Cause" and the election of a democratic government in Nicaragua. In both Panama and Nicaragua, fledgling democracies are struggling to take hold. Yet tensions and potential conflict remain in the hallmarks of the region.

Drug lords continue to terrorize Latin America. Our assistance is essential to those countries involved in the struggle against drug trafficking and to reduce the flow of drugs coming into the United States.

NAVAL FORCES

I believe the American people recognize that the United States is an island nation and that, despite the need to drawdown our Armed Forces, we must continue to maintain a strong Navy.

We believe the committee has not yet developed a record justifying that "the Navy can meet future requirements with between 10 to 12 carrier battle groups." The committee has asked the Defense Department to provide a report which addresses this question. That report will address deployment patterns, requirements for aircraft carriers in the Mediterranean Sea and the Indian Ocean, the personnel impact of reduced carrier force levels, and criteria for evaluating proposed reductions in overall naval force levels.

Thus, until this information has been properly considered, it is not reasonable to reach conclusions regarding reductions in aircraft carrier force levels. Furthermore, any decision on naval force levels must be made in the context of the committee's stated intention to emphasize mobile, flexible forces.

Moreover, I would draw attention to statements made this year by the Director of Naval Intelligence regarding the modernization of Soviet naval forces. The Director has said that the Soviets are continuing a vigorous naval modernization and ship construction program.

The Soviets continue to build an average of nine submarines annually. They currently have six classes of submarines in production; 1989 was the most productive year for Soviet submarine production in terms of tonnage accepted since 1980.

Surface combatant construction also continued at a brisk rate in 1989—nine major units were launched. Construction continues on two carrier classes, two cruiser classes, two guided missile destroyer classes, two frigate classes, and a corvette class.

The first large-deck Soviet aircraft carrier began sea trials during the past year, and two more are under construction. In November 1989, three types of Soviet aircraft conducted carrier landings and takeoffs from a Soviet carrier.

In restructuring our naval forces in general, and our carrier forces in particular, we must be mindful of our worldwide commitments and the capabilities of the Soviets. Given the regional threats at this time, there is not sufficient evidence of a decreased need for naval and carrier forces to make any irreversible decisions concerning that force structure.

STRATEGIC DEFENSE INITIATIVE

With respect to SDI, I am a strong supporter of the President's program. I am concerned about the funding reductions in the President's request and will work to ensure that SDI funding remains at a level that is adequate to fund continuing research so that the President can make an informed decision about the future of the program in 1993. Furthermore, I will oppose any efforts in the Congress to take over the management of SDI programs, or any efforts designed to divert funding from those portions of the program that provide opportunities for near-term technological breakthroughs.

Given the unpredictable situation and general domestic instability in the Soviet Union, concomitant with the proliferation of missile and nuclear technology to developing nations, the case for missile defenses is more compelling today than at any time since the advent of nuclear weapons and ballistic missile delivery systems.

I am going to work specifically for the development of an antitactical ballistic missile capability to protect our forces and those of our friends and allies. I believe this should be a top priority for the SDI Program.

MILSTAR

The Republican members of the committee also disagreed strongly with the decision to terminate the Milstar communications satellite, the President's highest priority communication program. I am especially disappointed with the way some individuals have characterized Milstar as a nuclear warfighting satellite system. This is simply not true. The need for survivable and assured communications with both our nuclear and conventional forces is a critical requirement that is as relevant today as when the program began in the early 1980's. Milstar fulfills both of these missions.

Moreover, even though Milstar is designed, in part, to provide assured connectivity to our nuclear forces, I question the implication that this is somehow inherently bad or destabilizing. For many years, there has been a bipartisan consensus that we must have positive control over our nuclear forces.

Termination of Milstar implies that we should continue to have the ability to initiate a retaliatory strike, but do

not need the ability to communicate with our forces to halt such an attack if the National Command Authority should reverse its decision. I cannot imagine a more destabilizing situation. Those officials of our Government assigned the responsibility to command our forces must always be provided the communications ability to do so.

I am also concerned about the effect of terminating the Milstar program on the communication capability and survivability of our naval forces. The Navy has been one of the biggest supporters of the Milstar program, because it provides the Navy with over-the-horizon communications for dispersed forces worldwide, antijam capability, and secure communications with submarine and surface forces.

No other U.S. satellite system can offer these features without undergoing significant redesign and substantial additional costs. Such broad-based support by the Navy can hardly be characterized as showing a Nuclear warfighting bias.

Finally, I believe that it is entirely inconsistent to support strategic offensive modernization and a strong conventional Navy, while at the same time denying our national leadership the ability to maintain communications with those forces.

I sincerely hope that we can reestablish the longstanding bipartisan support for this program. Command, control, and communications of our forces is not something that can be compromised it is vital to ensure deterrence, stability, and the survivability of our forces.

MILITARY PERSONNEL

I am extremely concerned about the impact on the All-Volunteer Force of drawing down our military forces too rapidly. The cuts in military personnel contained in this bill are approximately 100,000 below fiscal year 1990 levels. To protect as many career personnel as possible from involuntary separations, we adopted several measures requiring that new accessions and early retirements be utilized to the maximum extent possible before making any reductions in the career force.

Should involuntary separations become necessary, the committee approved a package of transition benefits including separation pay, medical benefits, and job assistance. I thank and commend Senator MCCAIN, the ranking member on the Manpower and Personnel Subcommittee, for his leading role in proposing and crafting this transition package.

In my view, we have gone as far as we can reasonably go in making cuts in military personnel in one fiscal year. I hope that we have not gone too far. But additional budget cuts, which some Senators have indicated they may want to impose, would force us to discharge too many of our military and DOD civilian personnel too quickly. Violation of the obligations we have now to our people in uniform could spell disaster for all All Volunteer Force. Such actions today could return to haunt us in the future.

I am also concerned about the 50,000 Department of Defense civilian employees we are cutting in this bill, and I warn my colleagues that we face future civilian cuts. I hope all my colleagues are mindful of the vast experience and skills we are losing as these loyal, hard-working people leave Government service.

DEFENSE INDUSTRIAL BASE

As our good friend and former colleague, Barry Goldwater, once said, "Thank heaven for the military-industrial complex. Its ultimate aim is peace in our time."

As we celebrate the end of the cold war, we should not forget the contributions made by all those people in our defense industrial base. As our defense, aerospace and electronics companies have been called upon to build more and more technologically advanced systems, those companies, their investors, and their employees have been asked to assume greater and greater risks.

Some of our oldest and most respected defense companies today are facing increasingly more difficult financial problems because of the risks they have assumed. Many of these companies employ thousands of workers, and thousands of other Americans have invested their savings in those companies. We must be constantly aware that our decisions about defense funding and defense programs impact not only our military posture, but also the economic well-being of the United States.

The American people must also understand that massive defense spending reductions will have a very real impact on hundreds of thousands of individuals. The American industrial base is, in reality, people. As defense spending goes down, many honest, hard-working, highly skilled Americans will lose their jobs.

Mr. President, as we begin this historic debate, I believe that we are, in fact, entering a new age—where, clearly, the threat which we have guarded against for 40 long years now appears to be less dangerous. But this does not mean that the world will be without threats or without danger.

I believe that, if we have learned anything from 40 years of cold war, it is that the capacity to fight a war provides the capacity to prevent it.

The vast majority of the people in the world look to the United States of America for leadership, assistance, and oftentimes protection. Despite the euphoria over the demise of the Warsaw Pact, there is still a need for the United Sates to remain strong.

To remain a global power and the true leader of the free world, I believe we must choose to do so.

Mr. President, I urge each of my colleagues to vote for this bill.

FINAL PASSAGE OF THE DOD AUTHORIZATION

Mr. MITCHELL. Mr. President, in passing this bill today, the Senate has taken a significant step toward the redirection of our national defense in the 1990's. I want to extend my congratulations to the managers of the bill and to the other members of the committee for the efficient and vigorous manner in which this bill has been managed over the past 3 days. Seldom has a defense authorization been treated in the Senate with greater dispatch.

Mr. President, it is important to take notice of the significant contributions which this bill makes toward reorienting our national security strategy for the next decade. At my request, the Armed Services Committee, along with the Foreign Relations Committee, conducted assessments of the significance of the changes in Eastern Europe and the Soviet Union for our own national security interests and strategy. The effort at assessing these changes began less than 1 month after the fall of the Berlin Wall, and continued into this session of Congress, when the Armed Services Committee held a series of important hearings. The committee and its distinguished chairman were among the first to recognize the deep significance of these changes in the world situation for our defense posture. That recognition is reflected in the bill we are passing today.

Taking the lead in assessing the need for a new strategy, the committee has reported a bill that begins to shape the post-cold war military posture of the United States. The bill we are about to pass slows our modernization programs, reduces force structure, and anticipates still further reductions in budget and forces in the future.

The bill accomplishes these changes in a manner consistent with maintaining the essential capability to protect U.S. interests around the world. This is not a meat axe approach to reducing defense spending.

Mr. President, this is only the beginning of the new thinking and restructuring that will be necessary as we adjust our forces to the smaller budgets and changed international environment of the future. The committee, and as a consequence the Senate as a whole, is now leading the shift in national thinking on these issues.

The President announced his approach to these matters only 2 days ago. While his approach is consistent in many ways with the strategy emphasized in this bill, the Senate has actually begun to shape the budget while the President has been able to deliver only one speech. Given the ab-

sence of leadership from the executive branch, the actions in the Senate today have filled a critical vacuum and will serve the Nation well.

The most important change in the international environment for U.S. national security is the rapid transformation of the military capability of the Warsaw Pact. In light of the changes in the Soviet Union and Eastern Europe, it has now become clear that the threat of conventional war in Europe is at its lowest level since the end of World War II. The significance of this change cannot be overemphasized.

In this bill some of the consequences of the changes in Europe are recognized. The American troop presence in Europe will be reduced, starting next year. The modernization of those weapons systems designed primarily for use in the European theater has been slowed. The reorientation of our force structure will begin.

It is my hope that the Conventional Forces in Europe [CFE] agreement will be concluded in Vienna later this year. This agreement is essential if the transition of Europe from a zone of potential nuclear conflict to a zone of stable peace is to be achieved soon and with minimum disruption. If those talks are successful, then the trends in our force posture initiated in this bill can be accelerated in the coming years, including further reductions in the U.S. troop presence in Europe and a lowering of the overall costs of our defense.

As we move from emphasis on heavy military forces deployed forward in the European theater to a more mobile, deployable force based largely in the United States, we will need to reemphasize naval forces, naval and air lift, multipurpose, flexible and rapidly deployable forces, and those technological capabilities that provide the United States with the key military edge against any conceivable adversary. Through a combination of strategic arms control and sensible force modernization, stable nuclear deterrence at lower levels of weapons and lower levels of expenditures can also be attained.

I want to emphasize that in my judgment stable deterrence cannot be achieved any time soon through the deployment of strategic defenses, and I am particularly pleased that the Bingaman-Shelby amendment to this bill was adopted.

In conclusion, Mr. President, it is clear that changes of far-reaching significance are now underway, and that the Senate has recognized and responded to these changes in a creative and forward-looking manner. This is only the beginning of the changes in our thinking and our military budgeting that must be made. But these are important changes, necessary changes, changes designed to preserve the national security interests of the United States while reducing the budgetary burden on the American taxpayer.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado [Mr. WIRTH] is necessarily absent.

Mr. DOLE. I announce that the Senator from New Mexico [Mr. DOMENICI], the Senator from Wyoming [Mr. SIMPSON], and the Senator from Mississippi [Mr. LOTT], are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska [Mr. MURKOWSKI], and the Senator from Wyoming [Mr. SIMPSON], would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 79, nays 16, as follows:

[Rollcall Vote No. 227 Leg.]

YEAS—79

Adams	Fowler	Lugar

So, the bill (S. 2884), as amended, was passed.

S. 2884

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE

This Act may be cited as the "National Defense Authorization Act for Fiscal Year 1991".

SEC. 2. ORGANIZATION OF ACT INTO DIVISIONS

This Act is organized into three divisions as follows:

(1) Division A—Department of Defense Authorizations.

(2) Division B—Military Construction Authorizations.

(3) Division C—Department of Energy National Security Authorizations and Other Authorizations.

(4) Division D—Natural Energy Security.

SEC. 3. CONGRESSIONAL DEFENSE COMMITTEES DEFINED

For purposes of this Act, the term "congressional defense committees" means the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives.

DIVISION A—DEPARTMENT OF DEFENSE AUTHORIZATIONS

TITLE I—PROCUREMENT

PART A—FUNDING AUTHORIZATIONS

SEC. 101. ARMY

Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement for the Army as follows:

(1) For aircraft, $857,609,000.

(2) For missiles, $1,917,962,000.

(3) For weapons and tracked combat vehicles, $2,331,200,000.

(4) For ammunition, $1,051,326,000.

(5) For other procurement, $2,126,346,000.

SEC. 102. NAVY AND MARINE CORPS

(a) NAVY.—Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement for the Navy as follows:

(1) For aircraft, $7,026,406,000.

(2) For weapons (including missiles and torpedoes), $4,424,383,000.

(3) For shipbuilding and conversion, $9,314,200,000.

(4) For other procurement, $6,055,242,000.

(b) MARINE CORPS.—Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement for the Marine Corps in the amount of $715,139,000.

SEC. 103. AIR FORCE

Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement for the Air Force as follows:

(1) For aircraft, $10,293,256,000.

(2) For missiles, $6,743,357,000.

(3) For other procurement, $7,526,513,000.

SEC. 104. DEFENSE AGENCIES

Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement for the Defense Agencies in the amount of $1,913,906,000.

SEC. 105. DEFENSE INSPECTOR GENERAL

Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement for the Inspector General of the Department of Defense the amount of $981,000.

SEC. 106. RESERVE COMPONENTS

Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement of aircraft, vehicles, communications equipment, and other equipment for the reserve components of the Armed Forces as follows:

(1) For the Army National Guard, $133,000,000.

(2) For the Air National Guard, $130,300,000.

(3) For the Army Reserve, $61,100,000.

(4) For the Navy Reserve, $60,400,000.

(5) For the Air Force Reserve, $45,600,000.

(6) For the Marine Corps Reserve, $25,000,000.

SEC. 107. CHEMICAL DEMILITARIZATION PROGRAM

Funds are hereby authorized to be appropriated for fiscal year 1991 for the destruction of lethal chemical weapons in accordance with section 1412 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 747) in the amount of $365,700,000.

SEC. 108. CHANGES IN PRIOR MILESTONE AUTHORIZATIONS

(a) PROCUREMENT PROGRAMS.—(1) Subsection (a)(2) of section 106 of the National Defense Authorization Act for Fiscal Years 1988 and 1989 (Public Law 100-180; 101 Stat. 1034) is amended by striking out "$68,596,000" in subparagraph (B) and inserting in lieu thereof "$29,257,000".

(2) Subsection (b)(2) of such section is amended by striking out "$199,858,000" in subparagraph (B) and inserting in lieu thereof "$187,178,000".

(3) Subsection (c)(2) of such section is amended by striking out "$1,535,225,000" in subparagraph (B) and inserting in lieu thereof "$1,536,345,000".

(4) Subsection (d)(2) of such section is amended by striking out "$431,565,000" in subparagraph (B) and inserting in lieu thereof "$327,739,000".

(b) RDT&E PROGRAMS.—(1) Subsection (b)(2) of section 216 of such Act is amended by striking out "$70,670,000" in subparagraph (B) and inserting in lieu thereof "$91,822,000".

(2) Subsection (c)(2) of such section is amended by striking out "$14,603,000" in subparagraph (B) and inserting in lieu thereof "$14,916,000".

SEC. 109. PROCUREMENT OF M1A1 MAIN BATTLE TANKS FOR THE MARINE CORPS

Of the funds appropriated for advanced procurement for the Marine Corps for fiscal year 1990, not more than $62,400,000 of any such funds that remain available for obligation shall be available for procurement of M1A1 main battle tanks.

SEC. 110. TRIDENT SUBMARINE ADVANCED PROCUREMENT

Funds appropriated or otherwise made available to the Department of Defense for fiscal year 1991, or for any fiscal year before fiscal year 1991, may not be obligated for the procurement for any Ohio-class ballistic missile submarines (SSBN-726) other than the 18 ballistic missile submarines of that class currently authorized by law.

SEC. 111. REPORT ON SUBMARINE INDUSTRIAL BASE

(a) IN GENERAL.—Not later than December 31, 1990, the Secretary of Defense shall submit to the congressional defense committees a report on the need to maintain competition in submarine construction.

(b) CONTENT OF STUDY.—The report shall examine the need for continuing competition in submarine construction in terms of the following:

(1) the effect on the submarine building industrial base, in both the short-term and long-term, of reducing competition in submarine construction, and

(2) the likely impact that directing all submarine construction to a single shipyard would have on the price and quality of submarines produced.

(c) LIMITATION.—The Secretary of Defense shall ensure that no action is taken before May 1, 1991, which would have the effect of limiting construction of any class of attack submarines to a single shipyard.

SEC. 112. EXTENSION OF DEADLINE FOR NATIONAL TEST CENTER INSTRUMENTATION

Section 166(b)(2) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1391) is amended by striking out "July 1, 1990" and inserting in lieu thereof "January 1, 1993".

SEC. 113. PROCUREMENT OF THE AIRBORNE SELF PROTECTION JAMMER

(a) PROHIBITION ON USE OF FUNDS.—Funds appropriated pursuant to this Act may not be obligated or expended for the procurement of the Airborne Self Protection Jammer or of any component or spare part for the Airborne Self Protection Jammer.

(b) BUDGET LINE ITEM REQUIRED.—If the budget submitted to Congress pursuant to section 1105(a) of title 31, United States Code, for fiscal year 1992 includes funds for the Airborne Self Protection Jammer program, the President shall specify in such budget the amount included for such program.

(c) LIMITATION RELATING TO MILESTONE III DECISIONS.—A decision to proceed with low-rate production of a second or subsequent lot of the Airborne Self Protection Jammer, or to proceed beyond low-rate production of the Airborne Self Protection Jammer, may not be made until the Director of Operational Test and Evaluation has certified to the Committees on Armed Services of the Senate and the House of Representatives that the Airborne Self Protection Jammer—

(1) has undergone thorough and effective operational testing; and

(2) has met or exceeded all operational test criteria.

PART B—B-2 BOMBER PROGRAM

SEC. 121. B-2 BOMBER PROGRAM

(a) LIMITATION ON OBLIGATIONS.—Of the amounts appropriated pursuant to section 103 for procurement of aircraft for the Air Force—

(1) not more than $1,989,000,000 may be obligated for procurement of B-2 aircraft; and

(2) not more than $767,100,000 may be obligated for advance procurement of B-2 aircraft.

(b) ADDITIONAL LIMITATIONS.—Funds appropriated or otherwise made available to the Air Force for the procurement of aircraft for fiscal year 1991 may not be obligated for the procurement of the two new production B-2 aircraft authorized by this Act until—

(1) the conditions provided for in section 111 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1371), limiting the obligation of fiscal year 1990 funds for the B-2 aircraft, have been met; and

(2) the Secretary of Defense has submitted to the congressional defense committees the certification required by section 112 of such Act.

(c) FINDINGS.—Congress makes the following findings:

(1) The United States has devoted substantial resources over the past several decades to the strategic bomber force, including substantial resources for—

(A) significant upgrades to B-52 aircraft;

(B) research, development, and procurement of B-1 aircraft; and

(C) research, development, and procurement of air-launched cruise missiles.

(2) The United States has currently invested a total of $26,700,000,000 in research and development and low-rate initial production in connection with the B-2 bomber aircraft program.

(3) Funds have been approved for the procurement of 15 production B-2 aircraft through fiscal year 1990, but Congress has made no determination as to the total number of such aircraft that should be produced.

(4) Congress has established, in accordance with the "fly before you buy" principle, a series of rigorous test and evaluation requirements, most of which have not yet been completed, to assess the efficiency, effectiveness, and cost of the B-2 aircraft.

(5) Serious questions have been raised about the ability of the B-2 program to meet cost, schedule, performance, and financial integrity requirements.

(6) Fiscal year 1991 will constitute the sixth consecutive fiscal year for which the amount appropriated for national defense functions of the Government declined (after adjusting for inflation) from the preceding fiscal year.

(7) Expected limitations on future defense budgets make it essential that the Nation's defense priorities be carefully analyzed so as to obtain the most efficient and effective funding of the Armed Forces, including the various elements of the Nation's strategic forces.

(d) SENSE OF CONGRESS.—In light of the findings in subsection (c), it is the sense of Congress that—

(1) it is not prudent or possible at this time to commit to production of B-2 aircraft beyond the number of aircraft authorized by this and prior Acts;

(2) before a commitment is made to proceed with procurement of B-2 aircraft beyond the number of aircraft authorized by this and prior Acts, the Secretary of Defense must resolve those issues associated with cost, schedule, performance and financial integrity of the program and submit to the congressional defense committees the certifications required by subsection (e)(3).

(e) ADDITIONAL RESTRICTIONS ON OBLIGATION OF FUNDS FOR NEW B-2 AIRCRAFT.—The funds described in subsection (b) may not be obligated for the procurement of the two new production B-2 aircraft authorized by this Act until each of the following conditions has been met:

(1) The panel of the Defense Science Board known as the Low-Observables Panel conducts an independent review of the test data resulting from the early Block 2 flight testing and submits to the Secretary of Defense a report on the results of that review, together with the panel's findings and conclusions.

(2) The Director of Operational Test and Evaluation submits to the Secretary of Defense the Director's evaluation of the results of the Block 2 flight testing to the date of the report of the Defense Science Board referred to in paragraph (1).

(3) The Secretary of Defense certifies to the congressional defense committees each of the following:

(A) The conditions described in subsection (b)(1) have been met.

(B) The conditions in subsections (e)(1) and (e)(2) have been met.

(C) The results of early Block 2 flight testing of the B-2 aircraft (including testing of low- observables and flying qualities and performance) are satisfactory.

(D) No significant technical or operational problems have been identified during early Block 2 flight testing.

(E) The performance milestones for the B-2 aircraft for the previous fiscal year for both developmental test and evaluation and operational test and evaluation (as con-

tained in the latest full performance matrix for the B-2 aircraft program established under section 232(a) of Public Law 100-456 and section 121 of Public Law 100-180) have been met.

(F) The B-2 aircraft has a high probability of being able to perform its intended missions.

(G) Any proposed modification to the performance matrix referred to in subparagraph (E) will be provided in writing in advance to the congressional defense committees.

(H) The cost reduction initiatives established for the B-2 program can be achieved (such certification to be submitted together with details for the savings to be realized).

(I) The quality assurance practices and fiscal management controls of the prime contractor and major subcontractors associated with the B-2 program meet or exceed accepted United States Government standards.

(4) A period of 30 calendar days expires after the date on which the certification required by paragraph (3) is received.

(f) FULL PERFORMANCE MATRIX REQUIREMENTS.—(1) Of the amounts made available for fiscal year 1991 for the procurement of two new production B-2 aircraft, not more than 15 percent may be expended until the Secretary of Defense certifies to Congress that—

(A) the coherent map mode operation of the B-2 aircraft is demonstrated successfully on the B-2 test aircraft as required in section 3(f)(2) of the Full Performance Matrix;

(B) a preliminary measure of vehicle-to-vehicle signature consistency has been accomplished successfully in the manner required by section 4(a)(2) of the Full Performance Matrix; and

(C) an initial infrared and visual signature evaluation has been completed successfully in the manner required by section 4(a)(2) of the Full Performance Matrix.

(2) As used in this section, the term "Full Performance Matrix" means the "Advanced Technology Bomber B-2 Systems Maturity Matrix (SMM)" dated January 31, 1990, transmitted to Congress by the Department of Defense on February 28, 1990.

PART C—PROGRAM TERMINATIONS

SEC. 131. PROGRAM TERMINATIONS

(a) 155 MILLIMETER NUCLEAR PROJECTILE PROGRAM.—Funds appropriated for the Department of Defense or the Department of Energy for fiscal year 1991 or for any fiscal year thereafter may not be obligated for the W-82 155 millimeter nuclear projectile program.

(b) AIR DEFENSE HEAVY MISSILE SYSTEM.—Funds appropriated for the Department of Defense for fiscal year 1991 or any fiscal year thereafter may be not be obligated for the Air Defense Heavy Missile System.

(c) FOLLOW-ON TO LANCE PROGRAM.—Funds appropriated for the Department of Defense or the Department of Energy for fiscal year 1991 or any fiscal year thereafter may not be obligated for the Follow-on to Lance Program.

(d) MILSTAR SATELLITE PROGRAM.—Funds appropriated for the Department of Defense for fiscal year 1991 or any fiscal year thereafter may not be obligated for the Milstar Satellite Program.

(e) STATUTORY CONSTRUCTION.—A provision of law enacted after the date of enactment of this Act may not be construed as modifying or superseding any provision of this section unless that provision specifically refers to this section and specifically states that such provision of law modifies or supersedes this section.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

PART A—FUNDING AUTHORIZATIONS

SEC. 201. AUTHORIZATION OF APPROPRIATIONS

Funds are hereby authorized to be appropriated for fiscal year 1991 for the use of the Armed Forces for research, development, test, and evaluation in amounts as follows:

(1) For the Army, $5,696,323,000.

(2) For the Navy, $9,194,790,000.

(3) For the Air Force, $12,271,578,000.

(4) For the Defense Agencies, $9,237,293,000, of which—

(A) $277,591,000 is authorized for the activities of the Deputy Director, Defense Research and Engineering (Test and Evaluation); and

(B) $17,000,000 is authorized for the Director of Operational Test and Evaluation.

SEC. 202. STRATEGIC RELOCATABLE TARGET ATTACK PROJECT AND EARTH PENETRATING WEAPONS PROJECT

Funds appropriated pursuant to section 201 for research, development, test, and evaluation for the Air Force shall be available, within the Advanced Strategic Missile Systems Program, for the Strategic Relocatable Target Attack Project and the Earth Penetrating Weapons Project.

PART B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

SEC. 211. ARMORED GUN SYSTEM

(a) ARMORED GUN ACQUISITION SYSTEM.—The Secretary of the Army shall prescribe an acquisition plan for the acquisition of an armored gun system for use on nondevelopmental item vehicles. The weight of such system shall not exceed 38,000 pounds loaded in its combat configuration.

(b) PROHIBITION ON USE OF FUNDS FOR CERTAIN RDT&E.—Funds appropriated or otherwise made available for the Army for fiscal year 1991 may not be obligated for research, development, test, or evaluation in connection with any vehicle for the armored gun system of the Army other than a vehicle that is a nondevelopmental item acquired in accordance with an acquisition plan described in subsection (a).

(c) RESTRICTIONS ON ARMORED SYSTEMS MODERNIZATION.—(1) The Secretary may not award a contract for development of a common chassis for the Armored Systems Modernization program of the Army until the Secretary has issued a request for proposal for an armored gun system.

(2) The Secretary may not initiate full scale development of the tank or infantry fighting vehicle elements of the Armored System Modernization program based on a common chassis until the Secretary has awarded a contract for procurement of the armored gun system.

SEC. 212. V-22 OSPREY AIRCRAFT PROGRAM

(a) TRANSFER OF UNOBLIGATED FY 1989 FUNDS.—The Secretary of the Navy shall transfer from any funds appropriated to the Navy for fiscal year 1989 for procurement of aircraft, and that remain available for obligation, $200,000,000 for research, development, test, and evaluation in connection with the V-22 Osprey aircraft program. Such funds shall be available for obligation until September 30, 1991, subject to the customary reprogramming procedures.

(b) LIMITATION ON USE OF FY 1991 FUNDS.—(1) Of the amounts appropriated pursuant to section 201 for the Navy, not more than $38,000,000 may be obligated for research, development, test, and evaluation in connection with the V-22 Osprey aircraft program.

(2) Of the amounts authorized to be appropriated pursuant to section 201(4) for the Defense Agencies, $8,000,000 shall be available for research, development, test, and evaluation in connection with the Special Operations variant of the V-22 Osprey aircraft.

(c) PROHIBITION ON USE OF FUNDS FOR PROCUREMENT.—(1) Funds appropriated or otherwise made available to or for the use of the Department of Defense pursuant to this or any other Act may not be obligated on or after the date of the enactment of this Act for procurement of V-22 Osprey aircraft.

(2) A provision of law enacted after the date of this Act may not be construed as modifying or superseding this subsection unless that provision specifically refers to this subsection and specifically states that such provision of law modifies or supersedes this subsection.

SEC. 213. ADVANCED TACTICAL FIGHTER

(a) IN GENERAL.—The Secretary of the Air Force shall complete the demonstration and validation phase and the design selection process for the Advanced Tactical Fighter for the Air Force.

(b) PROHIBITION ON FULL-SCALE DEVELOPMENT.—Funds appropriated or otherwise made available pursuant to this or any other Act for the Air Force for fiscal year 1991 may not be obligated for full-scale development activities in connection with the Advanced Tactical Fighter of the Air Force.

SEC. 214. LIGHT HELICOPTER

(a) IN GENERAL.—The Secretary of the Army shall complete the demonstration and validation phase and the design selection process for the Light Helicopter program of the Army.

(b) PROHIBITION ON FULL-SCALE DEVELOPMENT.—Funds appropriated or otherwise made available pursuant to this or any other Act for the Army for fiscal year 1991 may not be obligated for full-scale development activities in connection with the Light Helicopter program of the Army.

SEC. 215. ADVANCED TANK CANNON SYSTEM

Funds appropriated or otherwise made available pursuant to this or any other Act for the Army for fiscal year 1991 may not be obligated for full-scale development in connection with the Advanced Tank Cannon program of the Army.

SEC. 216. FLEET ELECTRONIC WARFARE SUPPORT GROUP

The Secretary of the Navy shall acquire aircraft for the Fleet Electronic Warfare Support Group to replace the ERA-3B aircraft assigned to such group on the date of the enactment of this Act. The Secretary shall acquire such aircraft by direct procurement or by lease entered into under section 328 of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 102 Stat. 1957).

SEC. 217. VANDENBERG AIR FORCE BASE TITAN IV LAUNCH FACILITY

Funds appropriated for the Air Force for fiscal year 1991 may be obligated for an additional Titan IV launch facility only if the funds are used to convert the existing Space Launch Complex Six facility at Vandenberg Air Force Base, California, for use as a Titan IV launch facility.

PART C—STRATEGIC DEFENSE INITIATIVE

SEC. 221. FUNDING FOR THE STRATEGIC DEFENSE INITIATIVE

Of the amounts appropriated pursuant to section 201 or otherwise made available to

the Department of Defense for research, development, test and evaluation, not more than $3,573,000,000 may be obligated for the Strategic Defense Initiative.

SEC. 222. LIMITATIONS ON THE STRATEGIC DEFENSE INITIATIVE

(a) FINDINGS.—Congress makes the following findings:

(1) The Strategic Defense Initiative (SDI) has become too focused on a projected 1993 Presidential decision on whether the United States will deploy a space-based kinetic energy weapon system, known as "brilliant pebbles".

(2) There has been tremendous instability in the Phase I architecture of the strategic defense system.

(3) A decision to deploy the phase I architecture of that system would have grave implications for offensive arms reduction negotiations with the Soviet Union and for continued United States compliance with the 1972 Anti-Ballistic Missile Treaty.

(4) Changes in the international political environment over the past year permit the United States to pursue the SDI program at a more measured pace, with increased emphasis on theater and anti-tactical ballistic missile contingencies.

(5) A broad-based research program on the feasibility of highly effective missile defenses remains in the national interest.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Strategic Defense Initiative should not be focused on the projected 1993 Presidential decision on deployment of a space-based kinetic energy weapon system;

(2) the Strategic Defense Initiative should continue a balanced, robust program of research on those technologies that offer the prospect of highly effective anti-ballistic missile defenses;

(3) priority under the Strategic Defense Initiative should be given, in the near term, to research on a defense system that (A) would protect against an accidental missile launch against the United States or a limited ballistic missile attack against the United States by a third-world country, and (B) if deployed, would not be in violation of the 1972 Anti-Ballistic Missile Treaty.

(4) the Strategic Defense Initiative should include a vigorous pursuit of a variety of theater and anti-tactical ballistic missile defenses which would be of value to allies of the United States and to the military forces of the United States temporarily or permanently deployed within range of tactical ballistic missiles of a potential enemy; and

(5) the Strategic Defense Initiative should continue support, as it has over the past six years, for those critical technology efforts that have both civil and military applications in areas other than ballistic missile defense systems.

(c) LIMITATIONS ON SPENDING.—Of the funds authorized to be appropriated pursuant to section 201 for the Strategic Defense Initiative—

(1) not more than $345,000,000 may be obligated for the ground-based radar, space-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $142,000,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $894,300,000 may be obligated for other phase I programs;

(5) not more than $944,400,000 may be obligated for follow-on technologies programs;

(6) not more than $320,000,000 may be obligated for key technologies activities;

(7) not more than $227,800,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

(d) BUDGET INFORMATION.—With respect to each program and activity specified in clauses (1) through (11) of subsection (c), the Secretary of Defense shall include in budget justification materials submitted to Congress after the date of the enactment of this Act for any fiscal year, and in each annual report submitted to Congress after such date pursuant to section 224 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (10 U.S.C. 2431 note), a description of the program or activity, any changes made in the program or activity since the last budget justification materials were submitted to Congress or the last annual report was submitted, as the case may be, and the amount budgeted for that program or activity for the fiscal year concerned.

(e) REPORT.—(1) The Secretary of Defense shall submit to the congressional defense committees a report on the allocation of funds appropriated for the Strategic Defense Initiative for fiscal year 1991. The report shall specify the amount of such funds allocated for each program, project, and activity of the Strategic Defense Initiative, including the amount allocated for each of the programs named in subsection (c).

(2) The report required by paragraph (1) shall be submitted not later than 90 days after the date of the enactment of legislation appropriating funds for the Strategic Defense Initiative for fiscal year 1991.

(f) CONSTRUCTION OF TERMS.—As used in this section:

(1) The terms "Phase I", "follow-on technologies", "key technologies", "operational support and management", "test and evaluation", "theater defense", "innovative science and technology", "small business innovative research", and "engineering analysis" shall be interpreted consistent with the use of those terms in the testimony of Lieutenant General George L. Monahan, and the materials presented by General Monahan, before the Committee on Armed Services of the Senate on June 20, 1990, except that the term "Phase I" does not include the boost surveillance and tracking system program.

(2) The terms "brilliant pebbles", "space-based surveillance and tracking system", "ground-based surveillance and tracking system", "ground-based radar", and "ground-based interceptor" shall be interpreted consistent with the use of those terms in Appendix F to the "1990 Report to the Congress on the Strategic Defense Initiative", dated May 1990.

(g) DEFINITION.—In this section, the term "1972 Anti-Ballistic Missile Treaty" means the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Limitations of Anti-Ballistic Missiles, signed at Moscow on May 26, 1972.

SEC. 223. LIMITATION ON DEVELOPMENT AND TESTING OF ANTIBALLISTIC MISSILE SYSTEMS OR COMPONENTS

(a) USE OF FUNDS.—(1) Funds appropriated or otherwise made available to the Department of Defense for fiscal year 1991, or for any fiscal year before 1991, shall be subject to the limitations prescribed in paragraph (2).

(2) Funds described in paragraph (1) may not be obligated or expended—

(A) for the development or testing of any antiballistic missile system or component, except for development and testing consistent with the development and testing described in the May 1990 SDIO Report; or

(B) for the acquisition of any material or equipment (including any long lead materials, components, piece parts, test equipment, or any modified space launch vehicle) required or to be used for the development or testing of antiballistic missile systems or components, except for material or equipment required for development or testing consistent with the development and testing described in the May 1990 SDIO Report.

(3) The limitations in paragraph (2) shall not apply to funds transferred to or for the use of the Strategic Defense Initiative for fiscal year 1991 if the transfer is made in accordance with section 1201 of this Act.

(b) DEFINITION.—As used in this section, the term "1990 SDIO Report" means the report entitled "1990 Report to Congress on the Strategic Defense Initiative," dated May 1990, prepared by the Strategic Defense Initiative Organization and submitted to certain committees of the Senate and House of Representatives by the Secretary of Defense on June 7, 1990, pursuant to section 224 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1398; 10 U.S.C. 2431 note).

SEC. 224. PROHIBITION ON TEST AND EVALUATION OF STRATEGIC DEFENSE SYSTEMS

Funds appropriated or otherwise made available to the Department of Defense for fiscal year 1991, or for any fiscal year before fiscal year 1991, may not be obligated for any operational test and evaluation activity in support of—

(1) a strategic defense system; or

(2) a program, project, or activity of the Strategic Defense Initiative.

TITLE III—OPERATION AND MAINTENANCE

PART A—AUTHORIZATION OF APPROPRIATIONS

SEC. 301. OPERATION AND MAINTENANCE FUNDING

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal year 1991 for the use of the Armed Forces and other activities and agencies of the Department of Defense, for expenses, not otherwise provided for, for operation and maintenance in amounts as follows:

For the Army, $22,008,345,000.

For the Navy, $23,283,784,000.

For the Marine Corps, $1,892,700,000.

For the Air Force, $20,785,714,000.

For the Defense Agencies, $8,372,263,000.

For the Army Reserve, $886,100,000.

For the Naval Reserve, $977,800,000.

For the Marine Corps Reserve, $84,800,000.

For the Air Force Reserve, $1,057,600,000.

For the Army National Guard, $1,970,400,000.

For the Air National Guard, $2,219,600,000.

For the National Board for the Promotion of Rifle Practice, $5,600,000.

For the Defense Inspector General, $98,519,000.

For Drug Interdiction and Counter-drug Activities, Defense, $1,207,900,000.

For the Court of Military Appeals, $5,500,000.

For Environmental Restoration Defense, $1,062,527,000.

For Humanitarian Assistance, $13,000,000.

(b) SPECIAL AUTHORIZATION FOR CONTINGENCIES.—There is authorized to be appropriated for fiscal year 1991, in addition to the amounts authorized to be appropriated in subsection (a), such sums as may be necessary—

(1) for unbudgeted increases in fuel costs; and

(2) for unbudgeted increases as the result of inflation in the cost of activities authorized by such subsection.

SEC. 302. WORKING CAPITAL FUNDS

Funds are hereby authorized to be appropriated for fiscal year 1991 for the use of the Armed Forces of the United States and other activities and agencies of the Department of Defense for providing capital for working capital funds, in amounts as follows:

For the Army Stock Fund, $302,500,000.

For the Air Force Stock Fund, $887,900,000.

For the Army Industrial Fund, $151,000,000.

For the Navy Industrial Fund, $238,700,000.

For the Defense Industrial Fund, $4,000,000.

SEC. 303. ALLOCATION OF FUNDS FOR FLEXIBLE READINESS

The Secretary of Defense shall allocate the funds authorized in this title for training and operations of the military services to insure that high priority military forces are maintained at appropriate readiness levels. The designation of "high priority" should be based on the anticipated threat; the amount of projected warning time of a major contingency; the likelihood that these forces would go into battle; and the ability of the military services to transport these forces to battle. Such high priority forces should include strategic forces, expeditionary forces, forward deployed forces, special operations forces, and certain intelligence forces.

SEC. 304. HUMANITARIAN ASSISTANCE

(a) PURPOSE.—(1) Funds appropriated pursuant to the authorizations in subsection (a) of section 301 for humanitarian assistance shall be used for the purpose of providing transportation for humanitarian relief for persons displaced or who are refugees because of the invasion of Afghanistan by the Soviet Union.

(2) Of the funds authorized to be appropriated for fiscal year 1991 pursuant to such subsection for such purpose, not more than $3,000,000 shall be available for distribution of humanitarian relief supplies to non-Communist, noncombatant, displaced persons or refugees at or near the border between Thailand and Cambodia.

(b) AUTHORITY TO TRANSFER FUNDS.—The Secretary of Defense may transfer to the Secretary of State not more than $3,000,000 of the funds appropriated pursuant to such subsection for fiscal year 1991 for humanitarian assistance, other than the funds described in subsection (a)(2), to provide for—

(1) the payment of administrative costs incurred in providing the transportation described in subsection (a); and

(2) the purchase or other acquisition of transportation assets for the distribution of humanitarian relief supplies in the country of destination.

(c) TRANSPORTATION UNDER DIRECTION OF THE SECRETARY OF STATE.—Transportation for humanitarian relief provided with funds appropriated pursuant to such subsections for humanitarian assistance shall be provided under the direction of the Secretary of State.

(d) MEANS OF TRANSPORTATION TO BE USED.—Transportation for humanitarian relief provided with funds appropriated pursuant to such subsections for humanitarian assistance shall be provided by the most economical commercial or military means available, unless the Secretary of State determines that it is in the national interest of the United States to provide transportation other than by the most economical means available. The means used to provide such transportation may include the use of aircraft and personnel of the reserve components of the Armed Forces.

(e) AVAILABILITY OF FUNDS.—Funds appropriated pursuant to such subsections for humanitarian assistance shall remain available until expended, to the extent provided in appropriation Acts.

(f) REPORTS TO CONGRESS.—(1) The Secretary of Defense shall submit (at the times specified in paragraph (2)) to the Committees on Armed Services and Foreign Relations of the Senate and the Committees on Armed Services and Foreign Affairs of the House of Representatives a report on the provision of humanitarian assistance under the humanitarian relief laws specified in paragraph (4).

(2) A report required by paragraph (1) shall be submitted—

(A) not later than 60 days after the date of the enactment of this Act;

(B) not later than June 1, 1991; and

(C) not later than June 1 of each year thereafter until all funds available for humanitarian assistance under the humanitarian relief laws specified in paragraph (4) have been obligated.

(3) A report required by paragraph (1) shall contain (as of the date on which the report is submitted) the following information:

(A) The total amount of funds obligated for humanitarian relief under the humanitarian relief laws specified in paragraph (4).

(B) The number of scheduled and completed flights for purposes of providing humanitarian relief under the humanitarian relief laws specified in paragraph (4).

(C) A description of any transfer (including to whom the transfer is made) of excess nonlethal supplies of the Department of Defense made available for humanitarian relief purposes under section 2547 of title 10, United States Code.

(4) The humanitarian relief laws referred to in paragraphs (1), (2), and (3) are the following:

(A) This section.

(B) Section 305 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 617).

(C) Section 331 of the National Defense Authorization Act for Fiscal Years 1988 and 1989 (Public Law 100-180; 101 Stat. 1078).

(D) Section 303 of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 102 Stat. 1948).

(E) Section 304 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1409).

SEC. 305. AUTHORIZATION OF APPROPRIATIONS FOR THE UNITED STATES SOLDIERS' AND AIRMEN'S HOME

There is authorized to be appropriated for fiscal year 1991 from the Soldiers' Home, Permanent Fund, $47,999,000 for the operation of the United States Soldiers' and Airmen's Home.

PART B—PROGRAM CHANGES AND MISCELLANEOUS PROVISIONS

SEC. 311. AUTHORITY GOVERNING OPERATION OF WORKING-CAPITAL FUNDED ACTIVITIES

Section 2208(i) of title 10, United States Code, is amended—

(1) in paragraph (1), by striking out "(1) Regulations" and all that follows down through subparagraph (A) and inserting in lieu thereof the following:

"(1) Regulations under subsection (h) may authorize an article manufactured by a working-capital-funded Department of the Army arsenal (or other Army industrial facility) that manufactures large caliber cannons, gun mounts, recoil mechanisms, ammunition, munitions, or components thereof, to be sold to a person outside the Department of Defense if—

"(A) the article is sold to a United States manufacturer, assembler, developer, or other concern—

"(i) for use in developing new products;

"(ii) for incorporation into items to be sold to, or to be used in a contract with, an agency of the United States;

"(iii) for incorporation into items to be sold to, or to be used in a contract with, or for purposes of soliciting a contract with a friendly foreign government; or

"(iv) for use in commercial expendable launch vehicles;"; and

(2) in paragraph (2), by inserting ", or authorized to be sold," after "article sold".

SEC. 312. REPEAL OF RESTRICTION ON CONTRACTING OUT CORE LOGISTICS FUNCTIONS

(a) REPEAL.—Chapter 146 of title 10, United States Code, is amended by striking out section 2464.

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by striking out the item relating to section 2464.

SEC. 313. REPEAL OF PROHIBITION ON CERTAIN DEPOT MAINTENANCE WORKLOAD COMPETITIONS

(a) REPEAL.—Chapter 146 of title 10, United States Code, is amended by striking out section 2466.

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by striking out the item relating to section 2466.

SEC. 314. AUTHORIZATION FOR NAVAL SHIPYARDS AND AVIATION DEPOTS TO ENGAGE IN DEFENSE RELATED PRODUCTION AND SERVICES DURING FY 1991

(a) AUTHORITY TO BID.—During fiscal year 1991, naval shipyards and naval aviation depots may compete for contracts for the production of defense related articles and contracts for the provision of services related to defense programs.

(b) REQUIRED ESTIMATES OF COST FACTORS.—The Secretary of the Navy shall ensure that all successful bids by a naval shipyard or naval aviation depot on contracts referred to in subsection (a) include estimates for all direct and indirect cost factors, including all direct and indirect cost factors included in bids submitted by private firms. Office of Management and Budget Circular A-76 shall not apply to competi-

tions conducted under the authority of this section.

SEC. 315. INVENTORY MANAGEMENT POLICIES

(a) GUIDANCE.—Not later than 180 days after the date of enactment of this Act, the Secretary of Defense shall issue a single, uniform policy on the management of inventory items of the Department of Defense. Such policy shall establish maximum levels for inventory items sufficient to achieve and maintain only those levels for inventory items necessary for the national defense. Such policy shall also provide guidance to item managers and other appropriate officials on how effectively to eliminate wasteful practices in the acquisition and management of inventory items.

(b) PERSONNEL EVALUATIONS.—The Secretary shall also establish procedures necessary to ensure that personnel appraisal systems for item managers and other personnel responsible for the acquisition and management of inventory items of the Department of Defense give appropriate consideration to efforts made by such personnel to eliminate wasteful practices and achieve cost savings in the acquisition and management of inventory items.

SEC. 316. VOYAGE REPAIRS ON NAVAL RESERVE FORCE VESSELS HOMEPORTED ON THE WEST COAST

Paragraph (3) of section 7299a(d) of title 10, United States Code, is amended to read as follows:

"(3) Paragraph (1) does not apply in the case of voyage repairs.".

SEC. 317. EXTENSION OF DATE FOR COMPLETION OF STUDY ON WASTE RECYCLING

Section 361(c) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1429) is amended by striking out "one year after the date of the enactment of this Act" and inserting in lieu thereof "March 1, 1991".

SEC. 318. HURRICANE RECONNAISSANCE

The Secretary of the Air Force shall continue to carry out the mission of hurricane reconnaissance during fiscal year 1991 unless another department or agency of the Federal Government assumes responsibility for that mission and has adequate funds available for obligation for that purpose.

SEC. 319. REIMBURSEMENT OF EPA OVERSIGHT EXPENSES

(a) To the extent provided for in interagency agreements entered into between the Department of Defense and the Environmental Protection Agency, the Secretary of Defense shall reimburse the Environmental Protection Agency for costs necessary to ensure oversight by that agency of environmental response actions at Department of Defense facilities conducted pursuant to section 120 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. 9620).

(b) In addition, notwithstanding other provisions of law, the Environmental Protection Agency shall be provided with the reimbursable authority and full time equivalent ceiling to carry out such oversight activities. The funded full-time work years shall only be used to carry out oversight activities at Department of Defense facilities where interagency agreements have been entered into between the Environmental Protection Agency and the Department of Defense.

SEC. 320. PROHIBITION ON PURCHASES OF PERFORMANCE BONDS AND SIMILAR GUARANTIES

Funds appropriated or otherwise made available to the Department of Defense for fiscal year 1991 may not be obligated or expended for the purchase of surety bonds or other guaranties of financial responsibility to guarantee the performance of any direct function by the Department of Defense.

SEC. 321. VALIDATION OF PAYMENTS UNDER CERTAIN CONTRACTS FOR THE PROVISION OF MUNICIPAL SERVICES

Notwithstanding section 2465 of title 10, United States Code, or any other provision of law, any payment made before the date of the enactment of this Act under a contract entered into before that date by a military department with a unit of local government for the provision by such unit of local government of police, fire, or other municipal service to the military department shall be held and considered to be a valid payment.

SEC. 322. ENVIRONMENTAL EDUCATION PROGRAM FOR DEPARTMENT OF DEFENSE PERSONNEL

(a) REQUIREMENT TO ESTABLISH PROGRAM.—The Secretary of Defense shall establish a program for the purpose of educating Department of Defense personnel in environmental management.

(b) PROGRAM REQUIREMENTS.—Under the program, the Secretary shall—

(1) in consultation with environmental education personnel of colleges and universities in the United States that offer undergraduate and graduate level courses in a wide range of environmental disciplines, develop a curriculum of environmental management courses offered by such colleges and universities;

(2) provide opportunities for Department of Defense personnel to attend such courses at such colleges and universities; and

(3) develop the criteria for the selection of Department of Defense personnel to attend such courses.

(c) FISCAL YEAR 1991 FUNDING MATTERS.—Of the funds authorized to be appropriated pursuant to section 301, not more than $100,000 shall be available for the program established pursuant to subsection (a).

(d) RECOMMENDATIONS REGARDING CONTINUATION OF PROGRAM AFTER FISCAL YEAR 1991.—Not later than the date on which the President submits the budget for fiscal year 1992 to Congress pursuant to section 1105(a) of title 31, United States Code, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives in writing his recommendations regarding whether the program established under subsection (a) should be continued after September 30, 1991.

SEC. 323. USE OF OZONE DEPLETING SUBSTANCES WITHIN THE DEPARTMENT OF DEFENSE

(a) DOD REQUIREMENTS FOR OZONE DEPLETING CHEMICALS OTHER THAN CFCs.—

(1) In addition to the functions of the Committee designated by section 356(c) of the National Defense Authorization Act for fiscal year 1990, it shall be the function of the Committee to study (A) the use of methyl chloroform, hydrochlorofluorocarbons (HCFCs) and carbon tetrachloride by the Department of Defense and by contractors in the performance of contracts for the Department of Defense, and (B) the costs and feasibility of using alternative compounds or technologies for methyl chloroform, HCFCs and carbon tetrachloride.

(2) Within 120 days after the date of the enactment of this Act, the Secretary shall provide the Committee with a list of all military specifications, standards, and other requirements that specify the use of methyl chloroform, HCFCs, or carbon tetrachloride.

(3) Within 150 days after the date of the enactment of this Act, the Secretary shall provide the Committee with a list of all military specifications, standards, and other requirements that do not specify use of methyl chloroform, HCFCs, or carbon tetrachloride.

(b) In preparing reports the Committee shall work closely with the Strategic Environmental Research Program Council, and shall provide to the Strategic Environmental Research Program Council its reports and recommendation with respect to section (a).

(c) EXTENSION OF REPORTING DEADLINE FOR CFCs.—The deadline for submitting a final report to the Congress concerning uses of CFCs, established in section 356(d) of the National Defense Authorization Act for fiscal year 1990, is hereby extended to June 30, 1991.

(d) REPORTING DEADLINE FOR METHYL CHLOROFORM, HCFCs, AND CARBON TETRACHLORIDE.—Not later than September 30, 1991, the Secretary shall submit to Congress a report containing the results of the study by the Committee authorized under subsection (a)(1) of this section.

SEC. 324. REDUCTION IN STOCK FUND OBLIGATIONS

The Secretary of Defense may not incur obligations against the Department of Defense stock funds during fiscal year 1991, except for obligations for fuel and subsistence items, in excess of 80 percent of the sales from such stock funds during that fiscal year, except for sales for fuel and subsistence items.

TITLE IV—PERSONNEL AUTHORIZATIONS FOR FISCAL YEAR 1991

PART A—ACTIVE FORCES

SEC. 401. END STRENGTHS FOR ACTIVE FORCES

(a) FISCAL YEAR 1991.—The Armed Forces are authorized strengths for active duty personnel as of September 30, 1991, as follows:

(1) The Army, 704,170, of which not more than 99,291 may be officers.

(2) The Navy, 568,500, of which not more than 69,992 may be officers.

(3) The Marine Corps, 193,735, of which not more than 19,757 may be officers.

(4) The Air Force, 510,000, of which not more than 95,027 may be officers.

(b) FISCAL YEAR 1995.—The Armed Forces are authorized strengths for active duty personnel as of September 30, 1995, as follows:

(1) The Army, 510,0000.

(2) The Navy, 500,000.

(3) The Marine Corps, 177,000.

(4) The Air Force, 415,000.

SEC. 402. UNIFORM STRENGTH REDUCTION PROCESS

(a) IN GENERAL.—(1) No member of the Army, Navy, Air Force, or Marine Corps to whom this section applies may be involuntarily separated unless the Secretary of the military department concerned has certified to the Committees on Armed Services of the Senate and the House of Representatives that the Secretary has implemented procedures—

(A) to limit the number of persons without previous military service that may be accessed for active duty service as officers in the Army, Navy, Air Force, or Marine Corps in each fiscal year for the period beginning October 1, 1990, and ending September 30, 1995, to a number that does not exceed the number determined by multiplying the projected end strength of active duty officers of that armed force for fiscal year 1995 (as determined by the Secretary concerned) by the accession ceiling percentage specified in

the table under paragraph (2) for that armed force for officers;

(B) to limit the number of persons without previous military service that may be accessed for active duty service as enlisted members of the Army, Navy, Air Force, or Marine Corps for each fiscal year during the period beginning October 1, 1990, and ending September 30, 1995, to a number that does not exceed the number determined by multiplying the projected end strength of active duty enlisted personnel of that armed force for fiscal year 1995 (as determined by the Secretary concerned) by the accession ceiling percentage specified in the table under paragraph (2) for that armed force for enlisted personnel;

(C) to reduce as of September 30 each year during the period beginning October 1, 1990, and ending September 30, 1995, the number of members of each armed force serving on active duty who, upon separation, would be immediately eligible for retired pay or retainer pay to a number not greater than the number necessary to meet the requirements of that armed force within the end strength specified in section 401(b) for that armed force; and

(D) to limit the number of members of each armed force serving on active duty who have completed two but less than five years of active service to a number not greater than the number necessary to meet the requirements of that armed force for members with two but less than five years of active service within the end strength specified in section 401(b) for that armed force.

(2) The table of accession ceiling percentages is as follows:

Armed Force	Accession Ceiling Percentages	
	Enlisted members	Officers
Army	19.4%	9.6%
Navy	16.6%	9.1%
Marine Corps	20.1%	8.4%
Air Force	12.6%	8.3%

(b) APPLICABILITY.—The limitation on involuntary separation referred to in subsection (a)(1) applies to a member of the Army, Navy, Air Force, or Marine Corps who—

(1) is serving on active duty or full-time National Guard duty;

(2) has five or more years of active service in the Armed Forces;

(3) if involuntarily separated, would not be immediately eligible for retired pay or retainer pay; and

(4) if involuntarily separated, would be eligible for transition assistance under section 1174 of title 10, United States Code (as amended by section 641 of this Act), section 1105 of such title (as added by section 642 of this Act), section 1420 of title 38, United States Code (as added by section 643 of this Act), or section 644 of this Act.

(c) DEFINITION.—For purposes of this section, the term "involuntarily separated" has the meaning given such term in section 644(h) of this Act.

(d) REGULATIONS.—The Secretary of Defense shall prescribe regulations necessary to carry out this section.

SEC. 403. AUTHORIZED STRENGTH FOR GENERAL AND FLAG OFFICERS ON ACTIVE DUTY

(a) FISCAL YEAR 1991.—The text of section 526 of title 10, United States Code, is amended to read as follows:

"The total number of general officers on active duty in the Army, Air Force, and Marine Corps and flag officers on active duty in the Navy may not exceed the number specified for the armed force concerned as follows:

"(1) For the Army, 386.

"(2) For the Navy, 250.

"(3) For the Air Force, 326.

"(4) For the Marine Corps, 68.".

(b) FISCAL YEAR 1995.—Effective October 1, 1995, paragraphs (1) through (4) of section 526 of title 10, United States Code, are amended to read as follows:

"(1) For the Army, 302.

"(2) For the Navy, 216.

"(3) For the Air Force, 279.

"(4) For the Marine Corps, 61.".

(c) CONFORMING AND TECHNICAL AMENDMENTS.—(1) Chapter 331 of title 10, United States Code, is amended—

(A) by striking out section 3202; and

(B) in the table of sections at the beginning of such chapter, by striking out the item relating to section 3202.

(2) Chapter 533 of such title is amended—

(A) by striking out sections 5442, 5443, 5444, and 5446; and

(B) in the table of sections at the beginning of such chapter, by striking out the items relating to sections 5442, 5443, 5444, and 5446.

(3) Chapter 831 of such title is amended—

(A) by striking out section 8202; and

(B) in the table of sections at the beginning of the chapter, by striking out the item relating to section 8202.

SEC. 404. REDUCTION IN NUMBER OF ACTIVE DUTY AIR FORCE COLONELS

Section 523(a)(1) of title 10, United States Code, is amended by striking out the figures under the heading "Colonel" relating to the Air Force and inserting in lieu thereof the following:

"3,392
"3,573
"3,754
"3,935
"4,115
"4,296
"4,477
"4,658
"4,838
"5,019
"5,200
"5,381".

SEC. 405. EXEMPTION FROM GRADE ACCOUNTABILITY FOR CERTAIN THREE-STAR GENERAL AND FLAG OFFICER POSITIONS

(a) IN GENERAL.—Section 525(b) of title 10, United States Code, is amended by adding at the end the following new paragraph:

"(4)(A) An officer while serving in a position designated under subparagraph (B), if serving in the grade of lieutenant general or vice admiral, is in addition to the number that would otherwise be permitted his armed force for that grade under paragraph (1) or (2).

"(B) The President, with the advice and assistance of the Secretary of Defense and the Chairman of the Joint Chiefs of Staff, may designate not more than six positions within the Joint Staff (provided for under section 155 of this title) as positions referred to in subparagraph (A).

"(C) The authority of the President under subparagraph (B) may not be delegated.".

(b) TECHNICAL AMENDMENT.—Paragraph (3) of such section is amended by striking out "authorized" and inserting in lieu thereof "that would otherwise be permitted".

PART B—RESERVE FORCES

SEC. 411. END STRENGTHS FOR SELECTED RESERVE

(a) IN GENERAL.—The Armed Forces are authorized strengths for Selected Reserve personnel of the reserve components as of September 30, 1991, as follows:

(1) The Army National Guard of the United States, 447,300.

(2) The Army Reserve, 309,200.

(3) The Naval Reserve, 153,400.

(4) The Marine Corps Reserve, 44,000.

(5) The Air National Guard of the United States, 116,300.

(6) The Air Force Reserve, 85,200.

(7) The Coast Guard Reserve, 12,700.

(b) WAIVER AUTHORITY.—The Secretary of Defense may vary the end strength authorized by subsection (a) by not more than 2 percent.

(c) ADJUSTMENTS.—The end strengths prescribed by subsection (a) for the Selected Reserve of any reserve component shall be proportionately reduced by—

(1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at the end of the fiscal year, and

(2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at the end of the fiscal year.

Whenever such units or such individual members are released from active duty during any fiscal year, the end strength prescribed for such fiscal year for the Selected Reserve of such reserve component shall be proportionately increased by the total authorized strengths of such units and by the total number of such individual members.

SEC. 412. END STRENGTHS FOR RESERVES ON ACTIVE DUTY IN SUPPORT OF THE RESERVES

(a) FISCAL YEAR 1991.—(1) Within the end strengths prescribed in section 411, the reserve components of the Armed Forces are authorized, as of September 30, 1991, the following number of Reserves to be serving on full-time active duty or, in the case of members of the National Guard, full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the reserve components:

(A) The Army National Guard of the United States, 24,820.

(B) The Army Reserve, 12,673.

(C) The Naval Reserve, 21,848.

(D) The Marine Corps Reserve, 2,781.

(E) The Air National Guard of the United States, 8,045.

(F) The Air Force Reserve, 623.

(2) In order to meet the national security requirements of the United States, the Secretary of Defense may reallocate the numbers authorized for the reserve component specified in paragraph (1) in such manner as the Secretary determines appropriate, except that the total numbers reallocated may not exceed the number equal to 10 percent of the total number authorized for the reserve components under such paragraph.

(b)(1) Within the end strengths authorized by legislation enacted after the date of enactment of this Act for each of the fiscal years listed in the table in paragraph (2), the reserve components of the Armed Forces are authorized the total number of members specified in such table for such fiscal year to be serving on full-time active

duty or, in the case of members of the National Guard, full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the reserve components.

(2) The table referred to in subsection (b) is as follows:

Fiscal year	Reserves on active duty in support of reserves
1992	66,664
1993	62,959
1994	59,255
1995	55,550
1996	51,845

(c)(1) IMPLEMENTATION OF REDUCTIONS.—In implementing the reduction in the end strengths for reserves on active duty in support of the reserves required in this section, no member of the Reserves serving on full-time active duty on the date of enactment of this Act, or in the case of members of the National Guard, full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing or training the Reserve components may be involuntarily separated.

(2) DEFINITION.—As used in this section, the term "involuntarily separated" shall have the same meaning as the meaning of that term under section 844 of this Act.

(3) AUTHORITY TO EXCEED PRESCRIBED END STRENGTHS.—The end strengths prescribed in subsections (a) and (b) may be exceeded to the extent necessary to comply with this subsection, as determined under regulations prescribed by the Secretary of Defense.

(4) ACTIVE DUTY IN SUPPORT OF THE RESERVES.—Accessions of members of the Reserves to be serving on full-time active duty or, in the case of members of the National Guard on full-time National Guard duty for the purpose of organizing, administering, recruiting, instructing, or training the reserve components for a fiscal year shall be two percent of the total authorized end strength provided in this section for such fiscal year.

(d) USE OF ACTIVE COMPONENT MEMBERS.—(1) The Secretary of Defense shall examine the validity of the information submitted in support of the budget submitted to Congress pursuant to section 1105 of title 31, United States Code, for fiscal year 1991 with respect to the number reserve members on active duty or full-time National Guard duty to support the reserve components and shall, to the extent that the information remains valid, assign active component members to reserve units to meet the requirement of the reserve components.

(2) The Secretary shall include in the detailed justification of estimates for military personnel for the Army, Navy, Marine Corps, and Air Force that accompanies the budget submitted to Congress for fiscal years 1992 and 1993 pursuant to section 1105 of title 31, United States Code, the number of such personnel that are programmed to be assigned in support of the reserve components to meet requirements for full-time support of the reserve components.

SEC. 413. REPEAL OF INCREASE IN NUMBER OF MEMBERS IN CERTAIN GRADES AUTHORIZED TO BE ON ACTIVE DUTY IN SUPPORT OF THE RESERVES

Subsections (a) and (b) of section 413 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1433) are each amended by striking out paragraph (2).

PART C—MILITARY TRAINING STUDENT LOADS

SEC. 421. AUTHORIZATION OF TRAINING STUDENT LOADS

(a) IN GENERAL.—For fiscal year 1991, the components of the Armed Forces are authorized average military training loads as follows:

(1) The Army, 66,525.
(2) The Navy, 59,675.
(3) The Marine Corps, 20,880.
(4) The Air Force, 26,880.
(5) The Army National Guard of the United States, 16,611.
(6) The Army Reserve, 15,337.
(7) The Naval Reserve, 3,112.
(8) The Marine Corps Reserve, 3,520.
(9) The Air National Guard of the United States, 2,765.
(10) The Air Force Reserve, 1,628.

(b) ADJUSTMENTS.—The average military student loads authorized in subsection (a) shall be adjusted consistent with the end strengths authorized in parts A and B. The Secretary of Defense shall prescribe the manner in which such adjustments shall be apportioned.

PART D—AUTHORIZATION OF APPROPRIATIONS

SEC. 431. AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PERSONNEL FOR FISCAL YEAR 1991

There is hereby authorized to be appropriated to the Department of Defense for military personnel for fiscal year 1991 a total of $77,553,700,000. The authorization in the preceding sentence supersedes any other authorization of appropriations (definite or indefinite) for such purpose for fiscal year 1991.

PART E—CIVILIAN PERSONNEL

SEC. 441. AUTHORIZATION OF END STRENGTHS

(a) IN GENERAL.—The Department of Defense is authorized strengths for civilian personnel as of September 30, 1991, as follows:

(1) Department of the Army, 369,641.
(2) Department of the Navy, 327,897.
(3) Department of the Air Force, 246,443.
(4) Defense Agencies and all other elements of the Department of Defense, 98,603.

(b) COUNTING OF PERSONNEL.—(1) In computing the strength for civilian personnel, there shall be included all direct-hire and indirect-hire civilian personnel employed to perform military functions administered by the Department of Defense (other than those performed by the National Security Agency) whether employed on a full-time, part-time, or intermittent basis, but excluding personnel in special employment categories for students and disadvantaged youth (such as the stay-in-school campaign, the temporary summer aid program, and the Federal junior fellowship program) and personnel participating in the worker-trainee opportunity program.

(2) Personnel employed under a part-time career employment program established by section 3402 of title 5, United States Code, shall be counted as prescribed by section 3404 of that title. Personnel employed in an overseas area on a part-time basis under a nonpermanent local-hire appointment who are dependents accompanying a Federal civilian employee or a member of a uniformed service an official assignment or tour of duty shall also be counted as prescribed by section 3404 of that title.

(3) Whenever a function, power or duty, or activity is transferred or assigned to a military department or an agency of the Department of Defense from a department or agency outside of the Department of Defense, or from another military department or agency within the Department of Defense, the civilian personnel end-strength authorized for each such military department or agency of the Department of Defense affected shall be adjusted to reflect any increases or decreases in civilian personnel required as a result of such transfer or assignment.

(c) ADJUSTMENT AUTHORITY.—When the Secretary of Defense determines that such action is necessary in the national interest, the Secretary of Defense may authorize the employment of civilian personnel in excess of the number authorized by subsection (a), but such additional number may not exceed 2 percent of the total number of civilian personnel authorized for the Department of Defense by subsection (a). The Secretary of Defense shall promptly notify the Congress of any authorization to increase civilian personnel strength under this subsection.

(d) FIVE-YEAR REDUCTION IN SENIOR LEVEL EMPLOYEES.—The Secretary of Defense shall take such action as may be necessary to reduce the number of senior level civilian employees employed in the Department of Defense by a number not less than 20 percent below the number of senior level civilian employees employed in the Department on September 30, 1990. The Secretary shall achieve the reduction over not more than a five year period beginning October 1, 1991. For purposes of this subsection, the term "senior level civilian employee" means an employee who holds a position in the grade of GS-16 or above under the General Schedule provided for in section 5104 of title 5, United States Code, or a Senior Executive Service position (as defined in section 3132(a)(2) of such title).

TITLE V—MILITARY PERSONNEL

PART A—PERSONNEL MANAGEMENT MATTERS

SEC. 501. OFFICER RETENTION FLEXIBILITY

(a) IN GENERAL.—Chapter 36 of title 10, United States Code, is amended by inserting after section 638 the following new section:

"§ 638a. Temporary enhancement of authority for selective early retirement

"(a) The Secretary of Defense may authorize the Secretary of a military department, during the five-year period beginning on October 1, 1990, to take any of the actions set forth in subsection (b) with respect to officers of an armed force under the jurisdiction of that Secretary.

"(b) Actions which the Secretary of a military department may take with respect to officers of an armed force when authorized to do so under subsection (a) are the following:

"(1) Provide that regular officers on the active-duty list may be considered for early retirement by a selection board convened under section 611(b) of this title in the case of officers described in any of subparagraphs (A) through (C) as follows:

"(A) Officers in the regular grade of lieutenant colonel or commander who would be subject to consideration for selection for early retirement under section 638(a)(1)(A) of this title except that they have failed the selection for promotion only one time (rather than two or more times).

"(B) Officers in the regular grade of colonel or, in the case of the Navy, captain who would be subject to consideration for selection for early retirement under section 638(a)(1)(B) of this title except that they have served on active duty in that grade less

than four years (but not less than two years).

"(C) Officers holding a regular grade below the grade of colonel or, in the case of the Navy, captain who are not eligible for retirement under section 3911, 6323, or 8911 of this title but who after the performance of not more than two additional years of active service as a commissioned officer would be eligible for retirement under one of those sections and whose names are not on a list of officers recommended for promotion.

"(2) Suspend the operation of section 638(c) of this title.

"(c) In the case of an action under subsection (b)(1), the Secretary of the military department concerned shall specify the number of officers described in that subsection which a selection board convened under section 611(b) of this title pursuant to the authority of that subsection may recommend for early retirement. Such number may not be more than 30 percent of the number of officers considered in each grade in each competitive category.

"(d) The retirement of an officer pursuant to this section shall be considered to be involuntary for purposes of any other provision of law.".

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of subchapter IV of such chapter is amended by inserting after the item relating to section 638 the following new item:

"638a. Temporary enhancement of authority for selective early retirement.".

SEC. 502. REDUCTION IN TIME-IN-GRADE REQUIREMENT FOR RETENTION OF GRADE UPON VOLUNTARY RETIREMENT

(a) IN GENERAL.—Section 1370(a)(2) of title 10, United States Code, is amended—

(1) by inserting "(A)" after "(2)";

(2) by inserting after "not less than three years" at the end of the first sentence the following: ", except that the Secretary of Defense may authorize the Secretary of a military department to reduce such period to a period not less than two years in the case of retirements effective during the five-year period beginning on October 1, 1990"; and

(3) by designating the second, and third sentences as subparagraph (B) and by striking out "the preceding sentence" in the first sentence of such subparagraph (as so designated) and inserting in lieu thereof "subparagraph (A)".

(b) CORRESPONDING REDUCTION IN ACTIVE DUTY STRENGTH LEVEL OF OFFICERS.—Whenever the Secretary of a military department reduces, in the case of any officer, the period of service-in-grade required under section 1370(a)(2)(A), as amended by subsection (a), to less than three years, the maximum number of officers permitted by section 523 or 526 of title 10, United States Code, to be on active duty in the grade in which that officer is retired shall be deemed to be reduced by one.

SEC. 503. REQUIRED LENGTH OF COMMISSIONED SERVICE FOR VOLUNTARY RETIREMENT

(a) ARMY.—Section 3911 of title 10, United States Code, is amended—

(1) by inserting "(a)" at the beginning of the text of the section; and

(2) by adding at the end the following:

"(b) The Secretary of Defense may authorize the Secretary of the Army, during the five-year period beginning on October 1, 1990, to reduce the requirement under subsection (a) for at least 10 years of active service as a commissioned officer to a period (determined by the Secretary of the Army) of not less than eight years.".

(b) NAVY AND MARINE CORPS.—Section 6323(a) of such title is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by adding at the end the following:

"(2) The Secretary of Defense may authorize the Secretary of the Navy, during the five-year period beginning on October 1, 1990, to reduce the requirement under paragraph (1) for at least 10 years of active service as a commissioned officer to a period (determined by the Secretary of the Navy) of not less than eight years.".

(c) AIR FORCE.—Section 8911 of such title is amended—

(1) by inserting "(a)" at the beginning of the text of the section; and

(2) by adding at the end the following:

"(b) The Secretary of Defense may authorize the Secretary of the Air Force, during the five-year period beginning on October 1, 1990, to reduce the requirement under subsection (a) for at least 10 years of active service as a commissioned officer to a period (determined by the Secretary of the Air Force) of not less than eight years.".

SEC. 504. REPORT ON INITIAL APPOINTMENT OF ALL OFFICERS AS RESERVE OFFICERS AND ON THE APPROPRIATE ACTIVE DUTY OBLIGATION OF GRADUATES OF THE SERVICE ACADEMIES

(a) REPORT REQUIRED.—The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on (1) the advantages, disadvantages, and desirability of initially appointing all persons commissioned as officers in the Army, Navy, Air Force, or Marine Corps as Reserve officers, and (2) what the appropriate active duty service obligation should be for graduates of the service academies.

(b) DEADLINE FOR REPORT.—(1) The Secretary shall submit the report required by subsection (a), together with such comments and recommendations as the Secretary considers appropriate, not later than 60 days after the date of the enactment of this Act.

(2) In the event the report is not submitted within 60 days after the date of the enactment of this Act, then—

(A) all persons initially appointed as commissioned officers in the Army, Navy, Air Force, and Marine Corps after the 60th day following the date of the enactment of this Act shall be appointed as commissioned officers in a Reserve component of the Armed Forces; and

(B) all persons entering the service academies after the 60th day following the date of the enactment of this Act shall incur an obligation to serve on active duty for a period of five years.

(c) DEFINITION.—As used in this section, the term "service academies" means the United States Military Academy, the United States Naval Academy, and the United States Air Force Academy.

PART B—OTHER MATTERS

SEC. 521. NAVY RATIONS

(a) IN GENERAL.—Section 6082 of title 10, United States Code, is amended to read as follows:

"§ 6082. Rations

"(a) The President may prescribe the components and quantities of the Navy ration. The President may direct the issuance of equivalent articles in place of the prescribed components if the President determines that economy and the health and comfort of the members of the Navy requires such action.

"(b) An enlisted member of the Navy on active duty is entitled to one ration daily. If an emergency ration is issued, it is in addition to the regular ration.

"(c) Fresh or preserved fruits, milk, butter, and eggs necessary for the proper diet of the sick and injured in hospitals shall be provided under regulations prescribed by the Secretary of the Navy.

"(d) The Secretary of the Navy may increase the quantity of daily rations for members of the Navy on a vessel or at a station that has an authorized complement of less than 150 members if the President determines that the vessel or station is operating under conditions that warrant an increase in rations.".

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by striking out the item relating to section 6082 and inserting in lieu thereof the following:

"6082 Rations.".

SEC. 522. REPEAL OF AUTHORITY OF ADMINISTRATOR OF PANAMA CANAL COMMISSION TO NOMINATE CADETS AND MIDSHIPMEN

(a) UNITED STATES MILITARY ACADEMY.—(1) Section 4342 of title 10, United States Code, is amended—

(A) in subsection (a)—

(i) by striking out clause (8); and

(ii) by redesignating clauses (9) and (10) as clauses (8) and (9), respectively;

(B) in subsection (d), by striking out "(2)-(7), (9), or (10)" and inserting in lieu thereof "(2) through (9)"; and

(C) in subsection (f), by striking out "(3)-(7), (9) and (10)" and inserting in lieu thereof "(3) through (9)".

(2) Section 4343 of such title is amended by striking out "(2)-(9)" and inserting in lieu thereof "(2) through (8)".

(b) UNITED STATES NAVAL ACADEMY.—(1) Section 6954 of such title is amended—

(A) in subsection (a)—

(i) by striking out clause (8); and

(ii) by redesignating clauses (9) and (10) as clauses (8) and (9), respectively; and

(B) in subsection (d), by striking out "(2)-(7), (9), or (10)" and inserting in lieu thereof "(2) through (9)".

(2) Section 6956(c) of such title is amended by striking out "(2)-(9)" and inserting in lieu thereof "(2) through (8)".

(3) Section 6958(b) of such title is amended by striking out "(3)-(7), (9) and (10)" and inserting in lieu thereof "(3) through (9)".

(c) UNITED STATES AIR FORCE ACADEMY.—(1) Section 9342 of such title is amended—

(A) in subsection (a)—

(i) by striking out clause (8); and

(ii) by redesignating clauses (9) and (10) as clauses (8) and (9), respectively;

(B) in subsection (d), by striking out "(2)-(7), (9), or (10)" and inserting in lieu thereof "(2) through (9)"; and

(C) in subsection (f), by striking out "(3)-(7), (9) and (10)" and inserting in lieu thereof "(3) through (9)".

(2) Section 9343 of such title is amended by striking out "(2)-(9)" and inserting in lieu thereof "(2) through (8)".

(d) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect on October 1, 1990.

SEC. 523. ADVANCED EDUCATIONAL ASSISTANCE

Section 2005 of title 10, United States Code, is amended—

(1) in subsection (a)(3), by inserting "or fails to fulfill any term or condition prescribed pursuant to clause (4)," after "agreement,"; and

(2) in subsection (f)(1), by inserting "or fails to fulfill any term or condition prescribed pursuant to clause (4) of such subsection," after "agreement,".

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

PART A—PAY AND ALLOWANCES

SEC. 601. MILITARY PAY RAISE FOR FISCAL YEAR 1991

(a) WAIVER OF SECTION 1009 ADJUSTMENT.—Any adjustment required by section 1009 of title 37, United States Code, in elements of compensation of members of the uniformed services to become effective during fiscal year 1991 shall not be made.

(b) INCREASE IN BASIC PAY, BAS, AND BAQ.—The rates of basic pay, basic allowance for subsistence, and basic allowance for quarters of members of the uniformed services are increased by 3.5 percent effective on January 1, 1991.

SEC. 602. AUTHORIZATION OF APPROPRIATIONS FOR PERMANENT CHANGE OF STATION MOVES

There is hereby authorized to be appropriated to the Department of Defense for funding of permanent change of station moves in fiscal year 1991 a total of $2,652,884,000. The authorization in the preceding sentence supersedes any other authorization of appropriations (definite or indefinite) for such purpose for fiscal year 1991.

PART B—BONUSES AND SPECIAL AND INCENTIVE PAY

SEC. 611. AUTHORITY TO TERMINATE SELECTIVE REENLISTMENT BONUS PAYMENTS

(a) TERMINATION AUTHORIZED.—Subsection (d) of section 308 of title 37, United States Code, is amended—

(1) by inserting (1) after "(d)"; and

(2) by adding at the end the following new paragraph:

"(2) Whenever refund is not required under paragraph (1) of this subsection, the Secretary of Defense, or the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy, may provide that bonus installments due to a member who does not complete the term of enlistment for which a bonus was paid under this section or who ceases to perform in the specialty for which a bonus was paid under this section will not be paid. The Secretary of Defense or the Secretary of Transportation, as appropriate, may prescribe the circumstances under which bonus installments may be terminated under this section.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to bonuses paid to persons who reenlist or extend their enlistment in the armed forces on or after the date of the enactment of this Act.

SEC. 612. INCREASE IN RATE OF SPECIAL PAY FOR OPTOMETRISTS

(a) IN GENERAL.—Section 302a of title 37, United States Code, is amended by striking "$100" and inserting in lieu thereof "$350".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect October 1, 1991, and shall apply to pay periods beginning on and after that date.

SEC. 613. INCENTIVE PAY FOR CERTIFIED NURSE-MIDWIVES AND INTENSIVE CARE NURSES

(a) IN GENERAL.—Section 302e(b) of title 37, United States Code, is amended—

(1) by striking out paragraph (2);

(2) by redesignating paragraph (3) as paragraph (4); and

(3) by inserting after paragraph (1) the following new paragraphs:

"(2) is a registered nurse;

"(3) is a qualified certified nurse anesthetist, a qualified intensive care nurse, or a qualified certified nurse-midwife; and".

(b) CLERICAL AMENDMENTS.—(1) The section heading for section 302e of such title is amended to read as follows:

"§ 302e. Special pay: nurse anesthetists, intensive care nurses, and nurse-midwives".

(2) The table of sections at the beginning of chapter 5 of such title is amended by striking out the item relating to section 302e and inserting in lieu thereof the following:

"Special pay: nurse anesthetists, intensive care nurses, and nurse-midwives.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect October 1, 1990, and shall apply to pay periods beginning on and after that date.

SEC. 614. SPECIAL PAY FOR PODIATRISTS

(a) IN GENERAL.—Chapter 5 of title 37, United States Code, is amended by adding after section 302e the following new section:

"§ 302f. Special pay: podiatrists

"(a) PUBLIC HEALTH SERVICE CORPS.—A member who is—

"(1) an officer in the Regular or Reserve Corps of the Public Health Service and is designated as a podiatrist; and

"(2) has been awarded a Certificate as a Diplomate in a special area of practice approved by the Council on Podiatric Medical Education of the American Podiatric Medical Association,

is entitled to special pay, as provided in subsection (b).

"(b) RATE OF SPECIAL PAY.—The rate of special pay to which an officer is entitled pursuant to subsection (a) shall be—

"(1) $2,000 per year, if the officer has less than 10 years of creditable service;

"(2) $2,500 per year, if the officer has at least 10 but less than 12 years of creditable service;

"(3) $3,000 per year, if the officer has at least 12 but less than 14 years of creditable service;

"(4) $4,000 per year, if the officer has at least 14 but less than 18 years of creditable service; or

"(5) $5,000 per year, if the officer has 18 or more years of creditable service.

"(c) ARMY, NAVY, AND AIR FORCE PODIATRISTS.—The Secretary of Defense may provide special pay at the rates specified in subsection (b) to an officer who—

"(1) is an officer in the Medical Services Corps of the Army or Navy or a biomedical sciences officer in the Air Force;

"(2) is designated as a podiatrist; and

"(3) has been awarded a Certificate as a Diplomate in a special area of practice approved by the Council on Podiatric Medical Education of the American Podiatric Medical Association.".

(b) CLERICAL AMENDMENTS.—The table of sections to chapter 5 of title 37, United States Code, is amended by adding after the item relating to section 302e of such title the following new item:

"302f. Special pay: podiatrists.".

PART C—TRAVEL AND TRANSPORTATION ALLOWANCES

SEC. 621. TRAVEL AND TRANSPORTATION ALLOWANCES FOR PERSONS DISCHARGED OR RELEASED FROM ACTIVE DUTY

(a) ALLOWANCES FOR MEMBERS.—Section 404(c) of title 37, United States Code, is amended to read as follows:

"(c)(1) Under uniform regulations prescribed by the Secretaries concerned and as provided in paragraph (2) of this subsection, a member who is entitled to travel and transportation allowances under subsection (a) of this section by reason of an event described in paragraph (3) of such subsection may select his home for the purposes of such paragraph (3). Any such selection shall be made by the member within one year after such event. The authority of a member to make a selection under this paragraph shall be subject to such exceptions as the Secretaries concerned may prescribe in regulations.

"(2) If a member is entitled to travel and transportation allowances under subsection (a) by reason of an event described in paragraph (3) of that subsection and such member selects as his home a place outside the United States, other than the place outside the United States from which the member was called or ordered to active duty to his first duty station, the travel and transportation allowances authorized by subsection (a) may not exceed the lesser of (A) the allowances payable for travel and transportation to the place outside the United States selected by the member as his home, or (B) the allowances payable for travel and transportation to the most distant place within the United States that the member may select as his home.".

(b) ALLOWANCES FOR DEPENDENTS AND BAGGAGE AND HOUSEHOLD EFFECTS.—Section 406 of such title is amended—

(1) in subsection (a)(2)(B)—

(A) by striking out "or" at the end of clause (iii);

(B) by redesignating clause (iv) as clause (v); and

(C) by inserting after clause (iii) the following new clause (iv):

"(iv) who, under conditions prescribed by the Secretaries concerned, is involuntarily discharged or released from active duty or is not accepted for an additional tour of active duty for which the member volunteered; or";

(2) in subsection (d), by striking out clause (2) of the fourth sentence and inserting in lieu thereof the following:

"(2) is retired with pay under any other law or, under conditions prescribed by the Secretaries concerned, is involuntarily discharged or released from active duty or is not accepted for an additional tour of active duty for which the member volunteered."; and

(3) in subsection (g)(1), by striking out clause (B) and inserting in lieu thereof the following:

"(B) is retired with pay under any other law or, under conditions prescribed by the Secretaries concerned, is involuntarily discharged or released from active duty, or is not accepted for an additional tour of active duty for which the member volunteered;".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall apply to travel and transportation commenced after September 30, 1990.

SEC. 622. REVIVAL OF AUTHORITY TO PAY MEMBERS FOR LABOR FURNISHED IN CONNECTION WITH THE TRANSPORTATION OF BAGGAGE AND HOUSEHOLD GOODS

(a) IN GENERAL.— Subsection (b) of section 614 of the Department of Defense Authorization Act, 1986 (37 U.S.C. 406 note) is repealed. The amendments made by subsection (a) of that section are hereby revived effective on the date of the enactment of this Act.

(b) PROHIBITION ON RETROACTIVE PAYMENTS.—No allowance may be paid to any member of a uniformed service by virtue of subsection (a) in connection with the transportation of any baggage or household effects of the member before the date of the enactment of this Act.

SEC. 623. AUTHORITY TO FURNISH TRANSPORTATION IN CERTAIN AREAS OUTSIDE THE UNITED STATES

(a) AUTHORITY TO FURNISH TRANSPORTATION.—Chapter 157 of title 10, United States Code, is amended by inserting after section 2636 the following new section:

"§ 2637. Transportation in certain areas outside the United States

"The Secretary of Defense may authorize the commander of a unified combatant command to use Government owned or leased vehicles to provide transportation in an area outside the United States for members of the uniformed services and Federal civilian employees under the jurisdiction of that commander, and to the dependents of such members and employees, when public or private transportation in such area is unsafe or not available. Transportation provided under this section shall be provided in accordance with regulations prescribed by the Secretary of Defense.".

(b) TECHNICAL AMENDMENTS.—The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2636 the following new item:

"2637. Transportation in certain areas outside the United States.".

(c) CONFORMING AMENDMENTS.—Section 1344(c) of title 31, United States Code, is amended—

(1) by striking out "or" after "1956" and inserting in lieu thereof a comma; and

(2) by striking out the period at the end and inserting in lieu thereof ", or section 2637 of title 10.".

SEC. 624. BAGGAGE AND HOUSEHOLD WEIGHT ALLOWANCE FOR CADETS AND MIDSHIPMEN

(a) IN GENERAL.—Section 406(b)(1) of title 37, United States Code, is amended by adding at the end the following new subparagraph:

"(E) Under regulations prescribed by the Secretary of Defense, cadets at the United States Military Academy and the United States Air Force Academy, and midshipmen at the United States Naval Academy shall be entitled, in connection with a change of temporary or permanent station, to transportation of baggage and household effects as provided in subparagraph (A) of this paragraph. The weight allowance for such cadets and midshipmen shall be 350 pounds.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be applicable to baggage and household effects transported after September 30, 1990.

PART D—OTHER BENEFITS

SEC. 631. PERMANENT EXTENSION OF PROGRAM TO REIMBURSE MEMBERS OF THE ARMED FORCES FOR ADOPTION EXPENSES

(a) CODIFICATION.—(1) Chapter 53 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 1056. Reimbursement for adoption expenses

"(a) AUTHORIZATION TO REIMBURSE.—The Secretary of Defense shall carry out a program under which a member of the armed forces under the jurisdiction of the Secretary may be reimbursed, as provided in this section, for qualifying adoption expenses incurred by the member in the adoption of a child under 18 years of age.

"(b) ADOPTIONS COVERED.—An adoption for which expenses may be reimbursed under this section includes an adoption by a single person, an infant adoption, an intercountry adoption, and an adoption of a child with special needs (as defined in section 473(c) of the Social Security Act (42 U.S.C. 673(c)).

"(c) BENEFITS PAID AFTER ADOPTION IS FINAL.—Benefits paid under this section in the case of an adoption may be paid only after the adoption is final.

"(d) TREATMENT OF OTHER BENEFITS.—A benefit may not be paid under this section for any expense paid to or for a member of the armed forces under any other adoption benefits program and administered by the Federal Government or under any such program administered by a State or local government.

"(e) LIMITATIONS.—(1) Not more than $2,000 may be paid to a member of the armed forces under this section for expenses incurred in the adoption of a child.

"(2) Not more than $5,000 may be paid to a member of the armed forces under this section for adoptions by such member in any calendar year.

"(f) REGULATIONS.—The Secretary of Defense shall prescribe regulations to carry out this section.

"(g) DEFINITIONS.—In this section:

"(1) The term 'qualifying adoption expenses' means reasonable and necessary expenses that are directly related to the legal adoption of a child under 18 years of age, but only if such adoption is arranged—

"(A) by a State or local government agency which has responsibility under State or local law for child placement through adoption;

"(B) by a nonprofit, voluntary adoption agency which is authorized by State or local law to place children for adoption; or

"(C) through a private placement.

"(2) The term 'qualifying adoption expenses' does not include any expense incurred—

"(A) for any travel performed outside the United States by an adopting parent, unless such travel—

"(i) is required by law as a condition of a legal adoption in the country of the child's origin, or is otherwise necessary for the purpose of qualifying for the adoption of a child;

"(ii) is necessary for the purpose of assessing the health and status of the child to be adopted; or

"(iii) is necessary for the purpose of escorting the child to be adopted to the United States or the place where the adopting member of the armed forces is stationed; or

"(B) in connection with an adoption arranged in violation of Federal, State, or local law.

"(3) The term 'reasonable and necessary expenses' includes—

"(A) public and private agency fees, including adoption fees charged by an agency in a foreign country;

"(B) placement fees, including fees charged adoptive parents for counseling;

"(C) legal fees, including court costs;

"(D) medical expenses, including hospital expenses of a newborn infant, for medical care furnished the adopted child before the adoption, and for physical examinations for the adopting parents;

"(E) expenses relating to pregnancy and childbirth for the biological mother, including counseling, transportation, and maternity home costs;

"(F) temporary foster care charges when payment of such charges is required to be made immediately before the child's placement; and

"(G) except as provided in paragraph (2)(A), transportation expenses relating to the adoption.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"1056. Reimbursement for adoption expenses.".

(b) CONFORMING AMENDMENTS FOR COAST GUARD.—(1) Chapter 13 of title 14, United States Code, is amended by adding at the end the following new section:

"§ 514. Reimbursement for adoption expenses

"(a) AUTHORIZATION TO REIMBURSE.—The Secretary shall carry out a program under which a member of the Coast Guard may be reimbursed, as provided in this section, for qualifying adoption expenses incurred by the member in the adoption of a child under 18 years of age.

"(b) ADOPTIONS COVERED.—An adoption for which expenses may be reimbursed under this section includes an adoption by a single person, an infant adoption, an intercountry adoption, and an adoption of a child with special needs (as defined in section 473(c) of the Social Security Act (42 U.S.C. 673(c)).

"(c) BENEFITS PAID AFTER ADOPTION IS FINAL.—Benefits paid under this section in the case of an adoption may be paid only after the adoption is final.

"(d) TREATMENT OF OTHER BENEFITS.—A benefit may not be paid under this section for any expense paid to or for a member of the armed forces under any other adoption benefits program and administered by the Federal Government or under any such program administered by a State or local government.

"(e) LIMITATIONS.—(1) Not more than $2,000 may be paid to a member of the armed forces under this section for expenses incurred in the adoption of a child.

"(2) Not more than $5,000 may be paid to a member of the armed forces under this section for adoptions by such member in any calendar year.

"(f) REGULATIONS.—The Secretary shall prescribe regulations to carry out this section.

"(g) DEFINITIONS.—In this section:

"(1) The term 'qualifying adoption expenses' means reasonable and necessary expenses that are directly related to the legal adoption of a child under 18 years of age, but only if such adoption is arranged—

"(A) by a State or local government agency which has responsibility under State or local law for child placement through adoption;

"(B) by a nonprofit, voluntary adoption agency which is authorized by State or local law to place children for adoption; or

"(C) through a private placement.

"(2) The term 'qualifying adoption expenses' does not include any expense incurred—

"(A) for any travel performed outside the United States by an adopting parent, unless such travel—

"(i) is required by law as a condition of a legal adoption in the country of the child's origin, or is otherwise necessary for the purpose of qualifying for the adoption of a child;

"(ii) is necessary for the purpose of assessing the health and status of the child to be adopted; or

"(iii) is necessary for the purpose of escorting the child to be adopted to the United States or the place where the adopting member of the armed forces is stationed; or

"(B) in connection with an adoption arranged in violation of Federal, State, or local law.

"(3) The term 'reasonable and necessary expenses' includes—

"(A) public and private agency fees, including adoption fees charged by an agency in a foreign country;

"(B) placement fees, including fees charged adoptive parents for counseling;

"(C) legal fees, including court costs;

"(D) medical expenses, including hospital expenses of a newborn infant, for medical care furnished the adopted child before the adoption, and for physical examinations for the adopting parents;

"(E) expenses relating to pregnancy and childbirth for the biological mother, including counseling, transportation, and maternity home costs;

"(F) temporary foster care charges when payment of such charges is required to be made immediately before the child's placement; and

"(G) except as provided in paragraph (2)(A), transportation expenses relating to the adoption.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"514. Reimbursement for adoption expenses.".

PART E—TRANSITION ASSISTANCE FOR PERSONS INVOLUNTARILY DISCHARGED OR RELEASED FROM ACTIVE DUTY

SEC. 641. SEPARATION PAY

(a) AUTHORITY FOR SEPARATION PAY FOR REGULAR ENLISTED MEMBERS.—Section 1174 of title 10, United States Code, is amended—

(1) by inserting "REGULAR OFFICERS.—(1)" in subsection (a) after "(a)";

(2) by redesignating subsection (b) as paragraph (2) of subsection (a); and

(3) by inserting after subsection (a) the following new subsection (b):

"(b) REGULAR ENLISTED MEMBERS.—(1) A regular enlisted member of an armed force who is discharged involuntarily or as the result of the denial of the reenlistment of the member and who has completed five or more, but less than 20 years of active service immediately before that discharge and who is serving on a second or subsequent enlistment in a regular component of an armed force is entitled to separation pay computed under subsection (d) unless the Secretary concerned determines that the conditions under which the member is discharged do not warrant payment of such pay.

"(2) Separation pay of an enlisted member shall be computed under clause (1) of subsection (d), except that such pay shall be computed under clause (2) of such subsection in the case of a member who is discharged under criteria prescribed by the Secretary of Defense.".

(b) REPEAL OF LIMITATION ON AMOUNT OF SEPARATION PAY.—(1) Subsection (d) of such section is amended—

(A) in clause (1), by striking out "or $30,000, whichever is less"; and

(B) in clause (2), by striking out ", but in no event more than $15,000".

(2) Subsection (g) of such section is amended—

(A) by striking out "(1)" after "(g)"; and

(B) by striking out paragraph (2).

(c) EFFECTIVE DATE.—Subsection (b) of section 1174 of title 10, United States Code, as added by subsection (a), and the amendments made by subsection (b), shall apply with respect to a member of the Armed Forces who is discharged, or released from active duty, after September 30, 1990.

(d) CONFORMING CROSS-REFERENCE AMENDMENTS.—(1) Section 1186(c) of title 10, United States Code, is amended by striking out "section 1174(b)" and inserting in lieu thereof "section 1174(a)(2)".

(2) Section 6383(h) of such title is amended by striking out "section 1174(a)" and inserting in lieu thereof "section 1174(a)(1)".

(e) TECHNICAL AMENDMENTS.—(1) Subsection (a)(1) of section 1174 of such title (as amended by subsection (a) of this section) is further amended—

(A) by striking out "or release"; and

(B) by striking out ", under section 564" and all that follows through "Management Act" and inserting in lieu thereof "or under section 564 or 6383 of this title".

(2) Subsection (c)(1) of such section is amended by striking out "after September 14, 1981,".

(f) STYLISTIC AMENDMENTS.—Section 1174 of such title is further amended—

(1) by inserting "OTHER MEMBERS.—" in subsection (c) after "(c)";

(2) by inserting "AMOUNT OF SEPARATION PAY.—" in subsection (d) after "(d)";

(3) by inserting "EXCEPTIONS TO ELIGIBILITY.—" in subsection (e) after "(e)";

(4) by inserting "COUNTING FRACTIONAL YEARS OF SERVICE.—" in subsection (f) after "(f)";

(5) by inserting "COORDINATION WITH OTHER SEPARATION OR SEVERANCE PAY BENEFITS.—" in subsection (g) after "(g)";

(6) by inserting "COORDINATION WITH RETIRED OR RETAINER PAY AND DISABILITY COMPENSATION.—" in subsection (h) after "(h)"; and

(7) by inserting "REGULATIONS; CREDITING OF OTHER COMMISSIONED SERVICE.—" in subsection (i) after "(i)".

SEC. 642. EXTENDED MEDICAL CARE

(a) AMENDMENT TO CHAPTER 55 OF TITLE 10.—Chapter 55 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 1105. Temporary health coverage for persons involuntarily discharged or released from active duty

"(a) IN GENERAL.—Subject to subsection (c), the Secretary concerned shall pay, in the case of any member who is involuntarily discharged or released from active duty and who has completed two or more years of continuous service, the health insurance premiums for health insurance provided on a voluntary basis to members of the uniformed services upon their discharge or release from active duty for the month in which such member is discharged or released and the first six months following the month in which such member is discharged or released.

"(b) COVERAGE.—The health insurance provided under this section shall cover the member involuntarily discharged or released and the dependents of such member. The Secretary of Defense shall develop a program to ensure that coverage for health conditions existing before the date of the discharge or release is provided for one year after the date of discharge or release if the coverage is not included in the health insurance coverage provided under subsection (a). The coverage provided under this subsection shall include coverage for pregnancy if the pregnancy existed before the involuntary discharge or release of the person concerned.

"(c) ELIGIBILITY EXCEPTIONS.—The Secretary concerned may withhold the benefits of this section in the case of any person involuntarily discharged or released from active duty if, under standards and procedures prescribed by the Secretary of Defense, the Secretary concerned determines that the conditions under which the person is discharged or released do not warrant such benefits.

"(d) EXPIRATION OF AUTHORITY.—The Secretary concerned may not pay the premiums for health insurance under this section in the case of any person involuntarily discharged or released from active duty after September 30, 1995.

"(e) DEFINITION.—In this section, the term 'member involuntarily discharged or released' includes a member not accepted for an additional tour of active duty for which the member volunteered. Such term does not include a member who (1) is discharged from active duty at the member's request, (2) is released from active duty for training, or (3) upon discharge or release from active duty, is immediately eligible for retired pay or retainer pay based on the member's active service.".

(b) TECHNICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"1105. Temporary health coverage for persons involuntarily discharged or released from active duty.".

SEC. 643. EDUCATIONAL BENEFITS FOR PERSONS INVOLUNTARILY DISCHARGED OR RELEASED FROM ACTIVE DUTY

(a) ELIGIBILITY FOR BENEFITS UNDER THE MONTGOMERY G.I. BILL AND THE POST-VIETNAM ERA VETERANS EDUCATIONAL ASSISTANCE PROGRAM.—Chapter 30 of title 38, United States Code, is amended by inserting after section 1419 the following new section:

"§ 1420. Eligibility of persons involuntarily discharged or released from active duty

"(a)(1) An individual described in paragraph (2) who is discharged or released from active duty under the conditions described in section 1411(a)(1)(A)(ii)(III) of this title, or is denied reenlistment by reason of a reduction in force described in such section, on or after the date of the enactment of this section shall be entitled, as provided in this section, to basic educational assistance benefits under this chapter.

"(2) An individual referred to in paragraph (1) is an individual who—

"(A) made an election under section 1411(c)(1) of this title not to receive educational assistance under this chapter or who has not completed the minimum period of service required for entitlement to 36

months of educational assistance benefits under this chapter; or

"(B) was eligible to participate in the educational benefits program under chapter 32 of this title.

"(b)(1) Subject to paragraph (2), an individual described in subsection (a) of this section shall be entitled to 36 months of basic educational assistance under this chapter (or the equivalent in part-time benefits).

"(2) To become entitled to the basic educational assistance provided for under this chapter an individual referred to in subsection (a) of this section must—

"(A) be discharged with an honorable discharge, or released from active duty after service characterized as honorable by the Secretary concerned;

"(B) before discharge or release, elect to receive assistance under this section pursuant to procedures which the Secretary of each military department shall establish in accordance with regulations prescribed by the Secretary of Defense; and

"(C) pay to the Secretary of Defense the amount determined under paragraph (3) of this subsection.

"(3)(A) An individual referred to in subsection (a)(2)(A) of this section shall be required to pay to the Secretary of Defense an amount equal to the difference, if any, between $1,200 and the amount by which the individual's basic pay was reduced under section 1411(b) of this title.

"(B) An individual referred to in subsection (a)(2)(B) of this section who did not elect to enroll in the educational benefits program under chapter 32 of this title shall be required to pay $1,200 to the Secretary of Defense.

"(C) An individual referred to in subsection (a)(2)(B) of this section who elected to enroll in the educational benefits program under chapter 32 of this title but contributed less than $1,200 under section 1622 of this title shall be required to pay to the Secretary of Defense an amount equal to the difference between $1,200 and the amount the individual contributed under section 1622 of this title.

"(D) If an individual referred to in subsection (a)(2)(B) of this section elects to receive benefits under this section and the amount the individual contributed under section 1622 of this title was in excess of $1,200, the Secretary shall refund to the individual an amount equal to the difference between $1,200 and the amount contributed by the individual under that section.

"(c) An individual who becomes eligible for benefits under this chapter by virtue of this section shall not be eligible for benefits under chapter 32 of this title except as provided in subsection (d) of this section.

"(d) Any contribution made by the Secretary of Defense to the Post-Vietnam Era Veterans Education Account pursuant to subsection (c) of section 1622 of this title on behalf of an individual who enrolled in the educational benefits program under chapter 32 of this title and who makes the election described in subsection (b)(2)(B) of this section shall remain in such account to make payments of benefits to such individual under section 1415(e) of this title.

"(e) The Secretary shall prescribe such regulations as may be necessary to carry out effectively this section and to administer the provisions under this section in the case of individuals described in subsection (a) of this section in the same manner, to the maximum extent practicable, as the provisions of this chapter are administered in the case of individuals otherwise eligible for basic educational assistance benefits under this chapter.".

(b) CONFORMING AMENDMENTS.—(1) Section 1415 of such title is amended—

(A) in subsection (b), by striking out "or 1418" and inserting in lieu thereof ", 1418, or 1420"; and

(B) by adding at the end the following new subsection:

"(e) In the case of an individual referred to in section 1420(d) of this title, the Secretary shall increase the rate of the basic educational assistance allowance applicable to such individual in excess of the rate provided under subsection (a) or (b) of this section in a manner consistent with, as determined by the Secretary of Defense, the agreement entered into with such individual under chapter 32 of this title pursuant to the rules and regulations issued by the Secretary of Defense under section 1622(c) of this title.".

(2) Section 1435(b) of such title is amended—

(A) in paragraph (1), by striking out "paragraph (2)" and inserting in lieu thereof "paragraphs (2) and (3)"; and

(B) by adding at the end the following:

"(3) Payment for entitlements established under section 1420 of this chapter shall be made from such Department of Defense Education Benefits Fund, from appropriations made to the Department of Transportation, or from the Post-Vietnam Era Veterans Education Account established pursuant to section 1622(a) of this title, as appropriate.".

(c) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 30 of such title is amended by inserting after the item relating to section 1419 the following new item:

"1420. Eligibility of persons involuntarily discharged or released from active duty.".

SEC. 644. PROGRAM TO FURNISH EMPLOYMENT AND TRAINING INFORMATION AND SERVICES TO MEMBERS OF THE ARMED FORCES BEING INVOLUNTARILY SEPARATED FROM THE ARMED FORCES

(a) PROGRAM ESTABLISHED.—The Secretary of Defense (hereafter in this section referred to as the "Secretary"), in consultation with the Secretary of Labor, the Secretary of Veterans Affairs, and the heads of other appropriate departments and agencies of the Federal Government, shall conduct a program to furnish employment, education, and other information and services to members of the Armed Forces during the 180 days before such members are involuntarily separated from the Armed Forces.

(b) PROGRAM SERVICES.—(1) The program referred to in this section shall assist members being involuntarily separated from the Armed Forces in assimilating to civilian life.

(2) In conducting the program referred to in this section, the Secretary shall—

(A) provide to members being involuntarily separated from active duty, and to spouses of such members, job-search, job-interview, and résumé-preparation training and job referral services;

(B) in cooperation with the Secretary of Labor, establish procedures to release the names of such members and spouses of such members, with the consent of such members and spouses, to civilian employers, organizations, and entities to assist such members and spouses in locating civilian employment opportunities;

(C) assist such members in obtaining verification and certification of job skills acquired during military service for use in seeking civilian employment;

(D) provide counseling and assistance to such members in the procurement of loans and grants from the Small Business Administration and other Federal, State, and local agencies;

(E) provide information relating to the area of relocation chosen by such members, including—

(i) the cost and availability of housing;

(ii) employment opportunities for such members and the spouses of such members;

(iii) opportunities for such members for service in reserve components of the Armed Forces or in the National Guard;

(iv) educational opportunities for such members and the families of such members;

(v) the cost and availability of child care;

(vi) the cost and availability of medical care; and

(vii) other living costs;

(F) cooperate with military and veterans service organizations and other appropriate organizations in promoting and publicizing job fairs for such members; and

(G) establish permanent employment assistance centers at appropriate military installations that would provide follow-up services to such members.

(c) BRIEFING FOR INVOLUNTARILY SEPARATED MEMBERS.—(1) Within 180 days before a member is involuntarily separated from the Armed Forces, the Secretary shall—

(A) notify the member of the date of the member's separation; and

(B) brief the member regarding the availability of retirement benefits, medical benefits, civilian employment, job preference for veterans, veterans' reemployment rights, benefits under the Montgomery G.I. Bill, and services under the program referred to in subsection (b).

(2) In providing the briefing referred to in paragraph (1)(B) to a member, the Secretary shall—

(A) give the briefing during the member's normal duty hours;

(B) permit the spouse of the member to attend the briefing; and

(C) provide child care services at a reasonable cost to allow the attendance of the member and the member's spouse.

(3) The briefings referred to in paragraph (1)(B) shall be conducted by persons who are well qualified by virtue of their education, training, and experience to conduct such briefings, and the Secretary shall take steps to ensure that, with respect to benefits and services administered by the Department of Veterans Affairs or the Department of Labor, the content of the briefing is approved by the Secretary of Veterans Affairs or the Secretary of Labor, as appropriate.

(4) The Secretary shall take reasonable actions to identify members of the Armed Forces who are to be involuntarily separated in order to furnish each such member the notification and briefing under paragraph (1) as early in the 180-day period referred to in such paragraph as is practicable.

(d) PROGRAM SUPPORT AND COORDINATION.—(1) To the extent otherwise authorized by law, the Secretary may utilize disabled veterans' outreach program specialists, local veterans' employment representatives, other employment service personnel, and representatives of veterans' service organizations to furnish the employment and training information and services under the program.

(2) The Secretary may enter into contracts with public or private entities, including other departments and agencies of the Federal Government, to furnish the infor-

mation and services referred to in subsection (b).

(3) In order to avoid duplication of services and to provide for the most effective utilization of Federal resources at military installations, when a program of employment and training information is being carried out under section 408 of the Veterans' Benefits Amendments of 1989 (38 U.S.C. 2000 note), the Secretary shall coordinate the provision of services and briefings under this section with activities carried out under such employment and training information program at each such installation and provide such services and briefings through that employment and training information, to the maximum extent feasible, in consultation and cooperation with the Secretary of Labor and the Secretary of Veterans Affairs.

(e) REPORT.—Not later than one year after the program provided for in this section is initiated, the Secretary shall transmit to the Committees on Armed Services and on Veterans Affairs of the Senate and the House of Representatives a report on the effectiveness of the program in furnishing employment and training information and services to members being involuntarily separated from the Armed Forces.

(f) INVOLUNTARY SEPARATION OF CERTAIN MEMBERS STATIONED OUTSIDE THE UNITED STATES.—In preparation for the discharge or release from active duty of members of the Armed Forces who are stationed outside the United States and whose dependents were permitted to accompany such members, the Secretary shall, to the maximum extent practicable, reassign the member and the member's accompanying dependents to the United States for the final three to six months of the member's tour of active duty.

(g) COMMITTEE ON COOPERATION BY CIVILIAN EMPLOYEES.—The Congress urges and requests the President to establish a special committee to report to the Congress, the President, and the Secretary regarding effective and practical means of encouraging civilian employers to cooperate with and assist the Federal Government in providing employment training and job placement services to members being involuntarily separated from the Armed Forces.

(h) DEFINITION.—A member of the Army, Navy, Air Force, or Marine Corps shall be considered to be involuntarily separated for purposes of this title if the member was on active duty or full-time National Guard duty on September 30, 1990, and—

(1) in the case of a regular officer (other than a retired officer), the officer is involuntarily discharged under other than adverse conditions, as characterized by the Secretary concerned;

(2) in the case of a reserve officer who is on the active-duty list or, if not on the active-duty list, is on active duty (or in the case of a member of the National Guard, full-time National Guard duty) for the purpose of organizing, administering, recruiting, instructing, or training the reserve components, the officer is involuntarily discharged or released from active duty or full-time National Guard duty under other than adverse conditions, as characterized by the Secretary concerned, or was not accepted for an additional tour of active duty or full-time National Guard duty for which the officer volunteered (other than a release from active duty or full-time National Guard duty incident to a transfer to retired status);

(3) in the case of a regular enlisted member serving on active duty, the member is (A) denied reenlistment, or (B) involuntarily discharged under other than adverse conditions, as characterized by the Secretary concerned; or

(4) in the case of a reserve enlisted member who is on full-time active duty (or in the case of a member of the National Guard, full-time National Guard duty) for the purpose of organizing, administering, recruiting, instructing, or training the reserve components, the member is (A) denied reenlistment, or (B) involuntarily discharged or released from active duty (or full-time National Guard) under other than adverse conditions, as characterized by the Secretary concerned.

SEC. 645. REPEAL OF LIMITATIONS ON PAYMENT OF UNEMPLOYMENT COMPENSATION FOR FEDERAL SERVICE

(a) REPEAL.—Subsection (c) of section 8521 of title 5, United States Code, is repealed.

(b) EFFECTIVE DATE.—The repeal made by subsection (a) shall apply to weeks of unemployment beginning after September 30, 1990.

TITLE VII—HEALTH CARE PROVISIONS

SEC. 701. LIMITATION ON REDUCTIONS IN MEDICAL PERSONNEL

(a) LIMITATION ON REDUCTION.—No reduction may be made in the number of medical personnel in any category of medical personnel serving on active duty in the Armed Forces or in the Selected Reserve of the reserve components of the Armed Forces below the number so serving on September 30, 1989, unless the Secretary of Defense—

(1) certifies to the Committees on Armed Services of the Senate and the House of Representatives that the number of such personnel being reduced is excess to the current and projected needs of the military departments, and

(2) includes in the certification the information specified in subsection (b).

(b) INFORMATION REQUIRED.—A certification made by the Secretary of Defense in compliance with subsection (a) shall include the following:

(1) The strength levels for the individual category of medical personnel involved in the reduction as of September 30, 1989.

(2) The requirements of the individual category of medical personnel involved in the reduction as of September 30, 1989.

(3) The projected requirements of the Department of Defense over the five fiscal years following the fiscal year in which the certification is submitted for medical personnel in the category of medical personnel involved in the reduction.

(4) The strength level recommended for each component of the Armed Forces for the most recent fiscal year for which the Secretary submitted recommendations pursuant to section 115(b)(1)(D) of title 10, United States Code, for personnel in the category of medical personnel involved in the reduction.

(c) DEFINITIONS.—As used in this section, the term "medical personnel" has the same meaning provided such term in section 115(b)(1)(D) of title 10, United States Code.

SEC. 702. AUTHORITY TO RECOVER FROM THIRD PARTY PAYERS THE REASONABLE COSTS FOR HEALTH CARE SERVICES INCURRED ON BEHALF OF RETIRED PERSONS AND DEPENDENTS

(a) IN GENERAL.—(1) Subsections (a)(1), (a)(2), (c), (f), and (g) of section 1095 of title 10, United States Code, are each amended by striking out "inpatient hospital care" and inserting in lieu thereof "health care services".

(2) Subsection (f) of such section is further amended—

(A) by striking out "or" at the end of clause (1);

(B) by redesignating clause (2) as clause (4); and

(C) by inserting after clause (1) the following new clauses:

"(2) diagnosis-related groups;

"(3) all-inclusive per visit rates; or".

(b) TECHNICAL AMENDMENTS.—(1) The section heading of such section 1095 of such title is amended to read as follows:

"§ 1095. Collection from third-party payers of reasonable costs for health care services incurred on behalf of retirees and dependents".

(2) The table of sections at the beginning of chapter 55 of such title is amended by striking out the item relating to section 1095 and inserting in lieu thereof the following:

"1095. Collection from third-party payers of reasonable costs for health care services incurred on behalf of retirees and dependents".

(c) TECHNICAL CORRECTION.—(1) Section 1622(e)(5) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1605) is amended by striking out "1095(g)" and inserting in lieu thereof "1095(h) (as redesignated by section 727(a)(1) of this Act).".

(2) The amendment made by paragraph (1) shall be executed as if included in such Act and shall take effect as of November 29, 1989.

(d) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to health care services provided beginning with the fiscal year following the fiscal year in which this Act is enacted, except that payment shall not be required in the case of any insurance, medical service, or health plan agreement that was not entered into, amended, or renewed on or after the date of the enactment of this Act and that clearly excludes payment for such services.

SEC. 703. REPEAL OF PROHIBITION ON PAYMENT FOR SERVICES OF PASTORAL COUNSELORS, FAMILY AND CHILD COUNSELORS, AND MARITAL COUNSELORS AS A MEDICAL EXPENSE

(a) REPEAL OF PROHIBITION.—Section 1079 of title 10, United States Code, is amended—

(1) in subsection (a)—

(A) by striking out clause (8); and

(B) by redesignating clauses (9) through (15) as clauses (8) through (14), respectively; and

(2) by adding at the end the following new subsection:

"(n) The administering Secretaries shall prescribe regulations, including certification and credentialing requirements, to govern the payment for services of pastoral counselors, family and child counselors, and marital counselors.".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a) shall take effect October 1, 1990.

(2) No payment may be made under section 1079(a) of title 10, United States Code, for the services of pastoral counselors, family and child counselors, and marital counselors for any period before October 1, 1990.

SEC. 704. EXTENSION OF TERMINATION DATE FOR FORMER PUBLIC HEALTH SERVICE HOSPITALS

Section 1252(e) of the Department of Defense Authorization Act, 1984 (42 U.S.C. 248d(e)), is amended by striking out "1990" and inserting in lieu thereof "1994".

SEC. 705. PROVISION OF PAP SMEARS AND MAMMOGRAMS UNDER CHAMPUS

(a) CARE AUTHORIZED.—Section 1079(a)(2) of title 10, United States Code, is amended by inserting before the semicolon the following: ", except that pap smears and mammograms may be provided on a diagnostic or preventive basis".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on October 1, 1990, and shall apply to the provision of pap smears and mammograms under section 1079 or 1086 of title 10, United States Code, on or after that date.

TITLE VIII—ACQUISITION POLICY AND MANAGEMENT

PART A—DEFENSE INDUSTRIAL AND TECHNOLOGY BASE

SEC. 801. ANNUAL DEFENSE CRITICAL TECHNOLOGIES PLAN

(a) INCREASED INFORMATION RELATING TO FUNDING.—Section 2508(b) of title 10, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof a semicolon; and

(3) by inserting at the end the following new paragraphs:

"(3) identify each program element (contained in the budget information submitted to Congress by the Department of Defense in support of the budget submitted by the President pursuant to section 1105(a) of title 31 for the first fiscal year covered by the plan) for which funds are budgeted for the support of the development of any critical technology identified in the plan; and

"(4) for each such program element—

"(A) specify the amount included for each critical technology covered by the program element; and

"(B) include a comparison of that amount with the amount, if any, available to the Department of Defense for development of such critical technology for the fiscal year preceding the first fiscal year covered by the plan.".

(b) APPLICABILITY.—The amendments made by subsection (a) shall apply to annual defense critical technologies plans submitted after March 1, 1991.

SEC. 802. CRITICAL TECHNOLOGIES INSTITUTE

(a) ESTABLISHMENT.—There shall be established a federally funded research and development center to be known as the "Critical Technologies Institute" (hereafter referred to in this section as the "Institute").

(b) INCORPORATION.—The Institute shall be incorporated as a nonprofit membership corporation.

(c) BOARD OF TRUSTEES.—(1) The Institute shall have a Board of Trustees (hereafter referred to in this section as the "Board") composed of 21 members as follows:

(A) The Director of the Office of Science and Technology Policy, who shall be Chairman of the Board.

(B) The Secretary of Defense, or the Secretary's designee.

(C) The Secretary of Energy, or the Secretary's designee.

(D) The Secretary of Health and Human Services, or the Secretary's designee.

(E) The Secretary of Commerce, or the Secretary's designee.

(F) The Administrator of the National Aeronautics and Space Administration, or the Administrator's designee.

(G) The Director of the National Science Foundation, or the Director's designee.

(H) Four members appointed by the Director of the Office of Science and Technology Policy from among the members of the Federal Coordinating Council on Science, Engineering, and Technology (other than members of such council named in subparagraphs (B) through (G)).

(I) Ten members appointed by the members of the Board referred to in subparagraphs (A) through (H) from among representatives of industry and colleges and universities in the United States.

(2)(A) The term of service of members of the Board appointed under paragraph (1)(H) shall be four years, except that of the four members first appointed, one shall be appointed for a term of one year, one shall be appointed for a term of two years, one shall be appointed for a term of three years, and one shall be appointed for a term of four years, as specified by the Director of the Office of Science and Technology Policy at the time of the appointments.

(B) The term of office for each of the members of the Board appointed under paragraph (1)(I) shall be specified by the appointing members of the Board at the time of appointment.

(C) Members of the Board may be reappointed.

(D) A vacancy in a membership of the Board appointed pursuant to subparagraph (H) or (I) of paragraph (1) shall be filled in the same manner as the original appointment. A member appointed under this subparagraph shall serve for the remainder of the unexpired term of his predecessor.

(3) The Board shall meet at least twice each year.

(4)(A) The Board shall have an executive committee composed of the members referred to in subparagraphs (A) through (G) of paragraph (1) and six of the members appointed pursuant to subparagraph (I) of such paragraph.

(B) The executive committee shall meet at least six times each year.

(5) A member of the Board who is an officer or employee of the United States may not receive pay for service as a member, other than the pay provided for the member's position as an officer or employee of the United States.

(d) DUTIES OF THE INSTITUTE.—The Institute shall—

(1) survey the views of United States industry, colleges, and universities, and Federal and State agencies, involved in research, development, or utilization of critical technologies on—

(A) each critical technology identified in the most recent biennial report of the National Critical Technologies Panel established pursuant to section 601 of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6681); and

(B) each technology that the Institute considers critical on the basis of its analysis of national and worldwide trends in basic and applied research and development;

(2) on the basis of such views and analysis by Institute personnel—

(A) identify suitable near-term, mid-term, and long-term national objectives for the research, development, and production capability of the United States with respect to such technologies; and

(B) prepare possible strategies for achieving the identified objectives, including a discussion of the appropriate roles of industry, colleges and universities, and Federal and State agencies; and

(3) publish reports, as appropriate, discussing—

(A) such national objectives and strategies; and

(B) progress in implementing such strategies and achieving such objectives.

(e) SPONSORSHIP.—(1) The Director of the Office of Science and Technology shall be the sponsor of the Institute.

(2) The Director and the Board shall enter into a sponsor agreement consistent with the requirements prescribed by the Administrator for Federal Procurement Policy that are generally applicable to sponsor agreements.

(3) The sponsor agreement shall—

(A) require the Institute to perform such functions for the Office of Science and Technology as the Director of that office may specify consistent with the requirements of subsection (d); and

(B) permit the Institute to perform functions for the member agencies of the Federal Coordinating Council on Science, Engineering, and Technology Policy that are not inconsistent with the effective performance of the functions specified by the Director.

(f) DEADLINE FOR CERTAIN ACTIONS.—The Director of the Office of Science and Technology Policy shall take such actions as may be necessary to ensure that, not later than 90 days after the date of the enactment of this Act—

(1) the articles of incorporation for the Institute have been appropriately filed;

(2) the corporate bylaws have been adopted;

(3) the Board members have been identified or appointed, as appropriate;

(4) the initial officers of the Institute have been elected;

(5) the first regular business meeting of the Board has been conducted; and

(6) the sponsor agreement referred to in subsection (e) has been entered into.

(g) FUNDING.—(1) Subject to such limitations as may be provided in appropriation Acts, the Secretary of Defense shall make available to the Institute, out of funds available for the Department of Defense, $5,000,000 for the first fiscal year in which the Institute begins operations.

(2) There is authorized to be appropriated for the Institute for each fiscal year after the fiscal year referred to in paragraph (1) such sums as may be necessary for operation of the Institute.

SEC. 803. MANUFACTURING TECHNOLOGY

(a) IN GENERAL.—Title 10, United States Code, is amended—

(1) by redesignating chapter 149 as chapter 150;

(2) by redesignating section 2511 as section 2521; and

(3) by inserting after chapter 148 the following new chapter:

"CHAPTER 149—MANUFACTURING TECHNOLOGY

"Sec.
"2511. Definitions.
"2512. Management and planning.
"2513. National Defense Manufacturing Technology Plan.
"2514. Joint Manufacturing Technology Project.
"2515. Research and implementation.
"2516. Computer integrated manufacturing technology.
"2517. Concurrent engineering.
"2518. Manufacturing extension programs.

"§ 2511. Definitions

"In this chapter:

"(1) The term 'manufacturing technology' means techniques and processes designed to improve manufacturing quality, productivity, and practices, including quality control,

shop floor management, inventory management and worker training, as well as manufacturing equipment and software.

"(2) The term 'manufacturing extension programs' means publicly-chartered organizations and services to help modernize small manufacturers through research, education and training, and outreach activities.

"§ 2512. Management and planning

"The Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, shall—

"(1) provide centralized Department of Defense policy guidance and direction to the military departments and the Defense Agencies on all matters relating to manufacturing technology; and

"(2) direct the development and implementation of Department of Defense plans, programs, projects, and policies that promote the development and application of advanced technologies to manufacturing processes, tools, and equipment.

"§ 2513. National Defense Manufacturing Technology Plan

"(a) The Secretary of Defense, in coordination with the Secretary of Commerce and the Secretary of Energy, shall develop and implement a National Defense Manufacturing Technology Plan (hereafter in this section referred to as the 'Plan').

"(b) The Plan shall—

"(1) provide guidance to the military departments and Defense Agencies, the Department of Energy, the Department of Commerce, and other relevant public and private organizations on the goals, priorities, and approaches to be taken in the defense manufacturing technology program;

"(2) provide a link between the defense manufacturing technology program and similar and related activities undertaken by government or the private sector;

"(3) analyze the role of manufacturing extension services in—

"(A) improving the manufacturing quality, productivity, technology, and practices of defense industry subtier suppliers; and

"(B) disseminating to such suppliers such Department of Defense manufacturing concepts as best manufacturing practices, product data exchange specifications, computer-aided acquisition and logistics support, and rapid acquisition of manufactured parts;

"(4) set forth the role of each Federal agency and department in implementing the Plan; and

"(5) consider and use, as appropriate, reports and studies conducted by Federal agencies and departments, the Office of Technology Assessment, the National Research Council, the Defense Science Board, industrial associations and organizations, and other entities.

"§ 2514. Joint Manufacturing Technology Project

"(a) The Secretary of Defense shall establish, within the Department of Defense, a consolidated Joint Manufacturing Technology Project established under a lead military department and managed through a program office jointly staffed with personnel from the military departments and the Defense Agencies.

"(b) The Director of the Joint Manufacturing Technology Project shall be responsible for the planning and execution of all Department of Defense activities relating to manufacturing technology except those activities specifically delegated to a military department, Defense Agency, or the Strategic Defense Initiative Office.

"§ 2515. Research and implementation

"The Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, and in coordination with the Secretary of Commerce, the Secretary of Energy, and other relevant Federal departments and agencies, shall enhance basic research in scientific disciplines relating to manufacturing technology—

"(1) by promoting research on those technologies applicable to improving manufacturing processes in colleges and universities in the United States, and in associated centers of excellence; and

"(2) by creating technology transfer and education and training mechanisms to ensure that the results of this research are readily available to United States industry.

"§ 2516. Computer integrated manufacturing technology

"The Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, and in coordination with the Secretary of Commerce and the Secretary of Energy, shall promote the use of computer-integrated manufacturing in order to improve manufacturing quality, reduce manufacturing costs, and reduce production lead times.

"§ 2517. Concurrent engineering

"The Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, shall enhance Department of Defense use of concurrent engineering practices in the design and development of weapon systems.

"§ 2518. Manufacturing extension programs

"The Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, and in coordination with the Secretary of Commerce and the Secretary of Energy, shall promote the improvement of the subtier defense industry through use of manufacturing extension programs and other existing organizations chartered to help small manufacturers for the purpose of disseminating such Department of Defense manufacturing concepts as best manufacturing practices, product data exchange specification, computer-aided acquisition and logistics support, and rapid acquisition of manufactured parts.".

(b) TECHNICAL AMENDMENTS.—(1) The table of chapters at the beginning of subtitle A of title 10, United States Code, and the beginning of part IV of such subtitle are each amended by striking out the item relating to chapter 149 and inserting in lieu thereof the following new items:

"149. Manufacturing Technology..... 2511
"150. Issue to Armed Forces..... 2521".

(2) The table of sections at the beginning of chapter 150 of such title, as redesignated by subsection (a) of this section, is amended by striking out the item relating to section 2511 and inserting in lieu thereof the following new item:

"2521. Reserve components: supplies, services, and facilities.".

SEC. 804. NATIONAL DEFENSE LABORATORY AND SMALL BUSINESS TECHNOLOGY PARTNERSHIPS

(a) ASSISTANCE FOR MODEL PROGRAMS.—If in the administration of the Clearinghouse for State and Local Initiatives on Productivity, Technology, and Innovation established under section 6 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3704a), the Secretary of Commerce undertakes to develop model programs for national defense laboratories as provided in this section, the Secretary of Defense and the Secretary of Energy shall assist the Secretary of Commerce in the development and conduct of such programs.

(b) COVERED MODEL PROGRAMS.—Model programs referred to in subsection (a) shall provide for the cooperation of national defense laboratories with small business firms and partnership intermediaries to demonstrate the following:

(1) The commercial application of technology resulting from federally funded research.

(2) The effective promotion of the use of advanced manufacturing technologies in the manufacture of products that have commercial and defense-related markets.

(3) Cooperative relationships between the Federal Government and State and local government agencies for the encouragement of economic growth through the promotion of commercial applications of technological advances.

(c) MODEL PROGRAM PARTICIPANTS.—(1) Each model program shall involve one or more entities from each of the following:

(A) National defense laboratories.

(B) Small business firms.

(C) Partnership intermediaries.

(2) A model program may also involve colleges and universities in the United States and business entities engaged in research and development in the United States.

(d) COOPERATIVE AND JOINT ACTIVITIES.—Each model program carried out under this section shall provide for one or more national defense laboratories and one or more small business firms, pursuant to a cooperative agreement entered into by the directors of such laboratories and the heads of such small business firms, to engage in cooperative or joint activities designed to demonstrate the commercial application of technology referred to in paragraph (1) of subsection (b), the use of advanced manufacturing technologies referred to in paragraph (2) of such subsection, or both such commercial application of technology and such use of advanced manufacturing technologies.

(e) USE OF PARTNERSHIP INTERMEDIARIES.—Under a model program, the director of a national defense laboratory may—

(1) enter into a contract or memorandum of understanding with a partnership intermediary that provides for the partnership intermediary to perform services for the laboratory that increase the likelihood of success in the conduct of cooperative or joint activities of such laboratory and one or more small business firms; and

(2) pay the cost of such contract or memorandum of understanding out of funds available for the support of the technology transfer function of the Department of Defense (in the case of a laboratory of such department) or the Department of Energy (in the case of a laboratory of such department) pursuant to section 11(b) of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3710(b)).

(f) REIMBURSEMENT OF SECRETARY OF COMMERCE.—The Secretary of Defense or the Secretary of Energy, or both, shall, upon the request of the Secretary of Commerce, reimburse the Secretary of Commerce for the reasonable expenses incurred by the Department of Commerce in carrying out the responsibilities of the Secretary of Commerce regarding model programs under this section. The total amount of reimbursements paid by the Secretary of Defense and the Secretary of Energy under this subsec-

tion in any fiscal year may not exceed $50,000.

(g) PARTNERSHIP PROGRESS REPORTS.—The Secretary of Commerce shall include in each triennial report required by section 6(d) of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3704a(d)) a discussion and evaluation of the model programs carried out pursuant to this section during the period covered by the report.

(h) REGULATIONS.—The Secretary of Commerce, the Secretary of Defense, and the Secretary of Energy shall jointly prescribe regulations for the implementation of this section.

(i) DEFINITIONS.—In this section:

(1) The term "national defense laboratory" means any laboratory, federally funded research and development center (FFRDC), or other center established under section 6 or 8 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3705, 3707) that is owned by the Federal Government, whether operated by the Federal Government or by a contractor, and—

(A) is under the jurisdiction of the Secretary of Defense; or

(B) is under the jurisdiction of the Secretary of Energy, but only if the primary function of the laboratory, FFRDC, or other center under the Secretary's jurisdiction is to support the national defense activities of the Department of Defense or the Department of Energy.

(2) The term "partnership intermediary" means an agency of a State or local government or a nonprofit entity owned in whole or in part by, chartered by, funded in whole or in part by, or operated in whole or in part by or on behalf of a State or local government that assists, counsels, advises, evaluates, or otherwise cooperates with small business firms that need or can make demonstrably productive use of technology-related assistance from a national defense laboratory.

(3) The term "small business firm" has the meaning given such term in section 4(11) of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3703(11)).

SEC. 804A. OTHER TECHNOLOGY TRANSFER MATTERS

Section 3133(d)(4) of Public Law 101-189 is hereby amended by adding a sentence at the conclusion thereof which shall read as follows:

"Such contract provisions or separate writing shall: (i) include only such provisions as are specifically required by paragraphs (1) and (2) of this subsection 3133(d), and such additional provisions as are deemed necessary by the head of the agency for the purpose of the implementation of this Act but which cannot be effected by the promulgation of regulations, the issuance of agency orders, or other similar administrative processes; (ii) not condition the entering into of cooperative research and development agreements upon the issuance of agency waivers to rights to inventions and intellectual property where such issuance is not required by section 12 of the Stevenson-Wydler Act of 1980; and (iii) not operate to discourage the exercise of rights pursuant to other statutes intended to foster technology transfer, such as the provisions of section 202 of title 35, United States Code.

SEC. 805. INDEPENDENT RESEARCH AND DEVELOPMENT ENHANCEMENT

(a) REVISION AND CODIFICATION OF PROVISION RELATING TO PAYMENT OF INDEPENDENT RESEARCH AND DEVELOPMENT COSTS.—(1) Chapter 139 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 2372. Independent research and development

"(a) The Secretary of Defense shall prescribe regulations governing the payment, by the Department of Defense, of independent research and development costs or bid and proposal costs.

"(b) Payment may be made for independent research and development costs or bid and proposal costs when work for which payment is made is of potential interest to the Department of Defense.

"(c) The regulations shall encourage contractors to engage in research and development activities that—

"(1) strengthen the defense industrial and technology base of the United States;

"(2) enhance the industrial competitiveness of the United States;

"(3) promote the development of technologies identified as critical under section 2508 of this title;

"(4) increase the development of technologies useful for both the private commercial sector and the public sector; and

"(5) develop efficient and effective technologies for achieving such environmental benefits as improved environmental data gathering, environmental cleanup and restoration, pollution-reduction in manufacturing, environmental conservation, and environmentally safe management of facilities.

"(d)(1) Subject to paragraph (3), for each fiscal year following a fiscal year in which independent research and development costs or bid and proposal costs incurred by a person were paid by the Department of Defense in a total amount exceeding $7,000,000, the Secretary of Defense shall enter into an advance agreement with such person regarding the manner and extent to which the Department of Defense may pay independent research and development costs or bid and proposal costs incurred by such person. If such person is a business entity that has a product division that received payments for such costs from the Department of Defense in a total amount exceeding $700,000 during such preceding fiscal year, the Secretary may enter into an advance agreement, regarding payment of the independent research and development costs and bid and proposal costs incurred by such product division, directly with the head of such product division.

"(2) The agreement shall include the following provisions:

"(A) The maximum amount of the costs incurred by such person in that fiscal year that the Department may pay.

"(B) The costs that are payable under the agreement, which may be only those costs that are incurred in connection with work referred to in subsection (b) or the attainment of benefits described in subsection (c).

"(3) If a person referred to in paragraph (1) does not enter into an advance agreement with the Secretary under paragraph (1) for a fiscal year, the payment of the independent research and development costs and bid and proposal costs incurred by such person during such fiscal year shall be subject to such limitations as the Secretary of Defense may prescribe in the regulations under subsection (a).

"(4) On October 1, 1994, and October 1 of each third year thereafter, the Secretary may adjust the amounts in paragraph (1) to reflect changes in one or more economic indices that the Secretary considers appropriate for use in making adjustments under this paragraph.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"2372. Independent research and development.".

(b) REPEAL OF SUPERSEDED PROVISION.—Section 203 of Public Law 91-441 (10 U.S.C. 2358 note) is repealed.

SEC. 806. ANNUAL REPORT ON ACTIVITIES RELATING TO DEFENSE INDUSTRIAL BASE

(a) DEFENSE INDUSTRIAL BASE ANNUAL REPORT.—Chapter 148 of title 10, United States Code, is amended by inserting after section 2508 the following new section:

"§ 2509. Defense industrial base annual report

"(a) ANNUAL REPORT REQUIREMENT.—The Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, shall submit to the Committees on Armed Services of the Senate and House of Representatives an annual report on—

"(1) the actions taken pursuant to this chapter for the improvement of the defense industrial base of the United States; and

"(2) the effects of defense budgets and plans on the ability of the United States defense industrial base to meet the national security needs of the United States.

"(b) FINANCIAL ABILITY ANALYSIS.—The report required by this section shall include the Under Secretary's analysis of the condition of the defense industrial base of the United States, particularly with respect to the financial ability of United States businesses—

"(1) to conduct research and development activities relating to critical defense technologies, including the critical technologies identified in the annual defense critical technologies plan submitted pursuant to section 2508 of this title in the year in which the annual report is submitted;

"(2) to apply those technologies to the production of goods and the furnishing of services;

"(3) to maintain a viable production base in critical areas of defense production and technology at the procurement levels for which funds are available to the Department of Defense and at planned Department of Defense procurement levels;

"(4) to expand the defense production base to respond to rapid increases in the demand for defense production and critical defense technologies;

"(5) to maintain a viable defense production base in each critical area of defense production and technology in which terminations of major Department of Defense procurement programs or reductions in planned Department of Defense procurement—

"(A) have taken place in the year before the year in which the report is submitted; or

"(B) are provided for—

"(i) in the budget submitted pursuant to section 1105(a) of title 31 in the year in which the annual report is submitted; and

"(ii) in the five-year defense program submitted with such budget pursuant to section 114a of this title; and

"(6) to engage in any other activities determined by the Secretary to be critical to the national security.

"(c) ANALYSIS CONSIDERATIONS.—In preparing the analysis required in subsection (b) for the annual report, the Secretary, acting through the Under Secretary of Defense for Acquisition, shall consider—

"(1) trends in the profitability, levels of capital investment, spending on research

and development, and debt burden of businesses involved in research on, development of, and application of critical defense technologies;

"(2) the consequences of mergers, acquisitions, and takeovers of such businesses;

"(3) the consequences of terminations of major programs and reductions in levels of military procurement in the fiscal year in which the report is submitted and planned military procurement;

"(4) the effects of levels of concurrency in acquisition program strategies, levels of facilitization required by the Secretary of defense contractors, competition requirements, and efforts of the Department of Defense to expand the use of commercial technology and equipment;

"(5) the effects of dependence on foreign or foreign-owned suppliers;

"(6) the results of Department of Defense spending for critical defense technologies for the fiscal year in which the report is submitted; and

"(7) the likely future level of Department of Defense spending for such technologies during the four fiscal years following the fiscal year in which the report is submitted and the likely results of that level of spending.

"(d) ANNUAL REPORT DATE.—The report under this section shall be submitted not later than March 15 of each year.".

(b) TABLE OF SECTIONS.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"2509. Defense industrial base annual report.".

PART B—ACQUISITION STREAMLINING INITIATIVES

SEC. 811. MULTIYEAR CONTRACTING ENHANCEMENT

Subsection (h) of section 2306 of title 10, United States Code, is amended—

(1) in paragraph (1), by striking out "(other than contracts described in paragraph (6))";

(2) in subparagraph (A) of paragraph (1), by striking out "reduced total costs under the contract" and inserting in lieu thereof "substantial savings of the total anticipated costs of carrying out the program through annual contracts";

(3) in paragraph (6), by inserting before the period ", unless the Secretary of Defense finds with respect to any particular contract that application of this subsection is in the national interest"; and

(4) by striking out subparagraph (C) of paragraph (9).

SEC. 812. ACQUISITION OF COMMERCIAL PRODUCTS

(a) STREAMLINED PROCEDURES FOR ACQUISITION OF COMMERCIAL ITEMS.—Section 2325 of title 10, United States Code, is amended—

(1) in subsection (a)—

(A) by redesignating subparagraphs (A), (B), and (C) of paragraph (1) as clauses (i), (ii), and (iii), respectively;

(B) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively;

(C) by striking out "PREFERENCE.—" and inserting in lieu thereof "PREFERENCE FOR NONDEVELOPMENTAL ITEMS.—(1)";

(D) in subparagraph (B) of paragraph (1), as so redesignated, by striking out "and";

(E) in subparagraph (C) of paragraph (1), as so redesignated, by striking out the period and inserting in lieu thereof a semicolon and "and"; and

(F) by adding at the end of paragraph (1), as so redesignated, the following new subparagraph:

"(D) prior to developing new specifications, the Department of Defense conducts market research to determine whether nondevelopmental items are available or could be modified to meet the needs of the procuring military department or Defense Agency.";

(2) in subsection (b), by striking out "IMPLEMENTATION.—";

(3) in subsection (c), by striking out "REGULATIONS.—";

(4) by redesignating subsections (b) and (c) as paragraphs (2) and (3), respectively;

(5) in subsection (d)—

(A) by striking out "DEFINITION.—";

(B) in paragraph (3), by striking out "paragraph (1) or (2)" and inserting in lieu thereof "subparagraph (A) or (B)";

(C) in paragraph (4)—

(i) by striking out "paragraph (1), (2), or (3)" and inserting in lieu thereof "subparagraph (A), (B), or (C)"; and

(ii) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii);

(D) by redesignating paragraphs (1), (2), (3), and (4) as subparagraphs (A), (B), (C), and (D); and

(E) in subparagraph (A) (as designated in subparagraph (D) of this paragraph) by inserting "or has been" before "available in the commercial marketplace".

(6) by redesignating subsection (d) as paragraph (4);

(7) by adding at the end thereof the following new subsection:

"(b) COMMERCIAL STYLE ACQUISITION PROCEDURES.—(1) The Secretary of Defense shall prescribe streamlined procedures for the acquisition of commercial items to enhance the ability of the Department of Defense to take advantage of the vigorous competition, large economies of scale, short delivery times, market driven efficiency and innovation, and high-value products that are available in the commercial market.";

(8) by transferring to the end of subsection (b), as added by paragraph (7) of this subsection, paragraphs (2) through (6) of section 824(b) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1504);

(9) in subsection (b)(6), as transferred by paragraph (8) of this subsection—

(A) by striking out "revise" and inserting in lieu thereof "prescribe";

(B) by striking out "title 10, United States Code," and inserting in lieu thereof "this title";

(C) by striking out "revising" and inserting in lieu thereof "prescribing";

(D) by striking out "and (B)" and inserting in lieu thereof "(B)";

(E) by striking out "as revised" and inserting in lieu thereof "as prescribed"; and

(F) by striking out the period at the end thereof and inserting in lieu thereof a comma and "and (C) may not, in the case of an item for which the Administrator of General Services has accepted a certificate of established catalog price, require a contractor to demonstrate that such an item meets the requirements of section 2306a(b)(1)(B) of this title during the period in which a contract to which the certification relates is in effect.";

(10) by adding at the end of subsection (b), as added by paragraph (7) and amended by paragraphs (8) and (9) of this subsection, the following new paragraphs:

"(7) For the purposes of this subsection, a contract for commercial items may include those incidental services that are normally provided with sales of such items in the commercial market.

"(8) In this subsection, the term 'commercial item' means—

"(A) any item of supply, including computer software, regularly used for other than Government purposes which, in the course of normal business operations—

"(i) has been sold or traded to the general public;

"(ii) has been offered for sale to the general public at established prices but not yet sold; or

"(iii) although intended for sale or trade to the general public, has not yet been offered for sale but will be available for commercial delivery in a reasonable period of time; and

"(B) any item described in subparagraph (A) which requires only modifications of a type customarily provided in the commercial marketplace, or other minor modifications, in order to meet the requirements of the procuring agency."; and

(11) by striking out the section heading and inserting in lieu thereof the following:

"§ 2325. Acquisition of commercial and nondevelopmental items".

(b) TEST PROGRAM.—(1) The Secretary of Defense shall conduct a test program to determine the feasibility and desirability of using the two sets of procedures prescribed pursuant to paragraphs (3) and (4) for procurement of commercial products (including incidental services) by the Department of Defense.

(2) The Secretary shall designate one component of the Department of Defense for participation in the test program. A component may not be selected for such designation if the total dollar value of all procurement actions taken during the fiscal year ending September 30, 1989, by that component exceeded 15 percent of the dollar value of all procurement actions of the Department of Defense in the fiscal year ending September 30, 1989.

(3) The Secretary shall prescribe in regulations implementing the test program procedures for the participating component to award contracts for commercial products without discussions on the basis of factors specified in the solicitation. Notwithstanding section 2305(b)(4)(A)(ii) of title 10, United States Code, the factors that may be specified in the solicitation include cost, product quality, and product performance (including the past performance of products and sources) if the solicitation also—

(A) contains a market acceptability demonstration requirement described in section 303H(e) of the Federal Property and Administrative Services Act of 1949 (as amended by subsection (f)); and

(B) is expected to result in the purchase of commercial products that do not require modification for use by the component.

(4)(A) The Secretary shall prescribe in regulations implementing the test program procedures for the participating component—

(i) to prescribe a list of commercial products for procurement using such procedures;

(ii) to establish a list of sources of one or more of such commercial products; and

(iii) to issue a series of solicitations for the acquisition of such commercial products to sources on the established source lists over a specified period when the head of the participating component reasonably anticipates that all such sources will have an opportunity to respond to at least one solicitation for

such a product (involving approximately the same total quantity as is provided for in every other solicitation for such product) within a two-year period.

(B) The regulations shall require the participating component to publish each list of commercial products that may be procured under the procedures prescribed pursuant to this paragraph. A product may be on the list only if—

(i) no modification of the product by the offeror is necessary for the product to be usable by the component;

(ii) the product is frequently procured by the United States in large quantities;

(iii) award of a contract for such product to a source after the use of such procedures will not bias the participating component in favor of awarding future contracts for the procurement of the same product to that source;

(iv) the head of the component reasonably anticipates that the product will be procured several times in relatively equal quantities as a result of a series of solicitations over a two-year period;

(v) the head of the participating component reasonably anticipates that a contract for such product could be awarded on the basis of an initial proposal that would result in the lowest overall cost to the government;

(vi) based upon past experience, the Secretary of Defense reasonably anticipates that a large number of qualified offerors would respond to a solicitation for a contract for such product and a significant savings in personnel and administrative costs could be achieved using such procedures; and

(vii) a notice of a proposal to place the product on the list of products, including a product description conforming to section 18(b) of the Office of Federal Procurement Policy Act (41 U.S.C. 416(b)) and section 8(f) of the Small Business Act (15 U.S.C. 637(f)), has been published in the Federal Register and the Commerce Business Daily for a period of not less than 60 days.

(C) The regulations prescribed under subparagraph (A) shall authorize the participating component to solicit participation by interested persons in a list of sources to be prescribed under the test program. Participation in the list shall be solicited by publication of one or more public notices in the Commerce Business Daily. The notice shall include—

(i) a product description conforming to section 18(b) of the Office of Federal Procurement Policy Act (41 U.S.C. 416(b)) and section 8(f) of the Small Business Act (15 U.S.C. 637(f));

(ii) the scope of the requirement to be covered by the solicitations, including the number of solicitations expected, anticipated quantities, and the time period during which such solicitations will be issued; and

(iii) a requirement that each interested source submit appropriate product information with the request of the source to be placed on the source list.

(D) A list of sources for a series of solicitations established under the procedures prescribed pursuant to this paragraph shall include—

(i) each person who requests to be placed on the list and submits the required information specified in the public notice within the time period specified in that notice; and

(ii) any additional person who submits the required information sufficiently in advance of a solicitation to ensure that the submission can be adequately evaluated before the solicitation is issued.

(E) The Secretary shall prescribe in the regulations procedures for a source to protest a decision not to place such source on a source list under the test program. The availability of such procedures may not be construed to preclude a source from seeking relief under existing bid protest procedures.

(F) The Secretary shall prescribe in the regulations the minimum number of qualified sources that must be included on a source list established under the procedures prescribed pursuant to this paragraph. The minimum number of sources may not be less than 100 source during the one-year period beginning on the effective date of such regulations. After the expiration of such one-year period, the Secretary may modify the regulations to specify a number of sources less than 100 sources, but not less than 25 sources, if the Secretary determines that the modification is necessary in order to ensure that the procedures prescribed under this paragraph are tested effectively.

(G) A component may issue solicitations for procurement of a product to sources on a source list established under this paragraph in such a manner that—

(i) each source on the list is invited to respond to at least one solicitation for such product before any source is invited to respond to a second solicitation;

(ii) all sources on the list, or as many sources as practicable, have an opportunity to respond to at least one such solicitation; and

(iii) each solicitation is open to not fewer than 20 percent of the sources on the source list and the sources are selected to receive the solicitation under procedures prescribed by the Secretary to ensure equitable opportunity for participation by all of the selected sources.

(H) A solicitation for a product may not be issued pursuant to the regulations prescribed under this paragraph if the estimated price of the procurement exceeds a maximum amount which the Secretary shall prescribe for such a solicitation in such regulations.

(5) A participating component may not use both sets of procedures prescribed pursuant to paragraphs (3) and (4) for the procurement of one product.

(6) No solicitation may be issued pursuant to the regulations prescribed to implement the test program more than three years after the date on which such regulations take effect.

(7)(A) Within 180 days after the termination of the test program, the Comptroller General of the United States shall evaluate the test program and submit a report to the congressional defense committees, the Committee on Governmental Affairs of the Senate, and the Committee on Government Operations of the House of Representatives. The report shall contain the Comptroller General's evaluation of the effects of the test program on—

(i) the price and quality of products procured by the participating component;

(ii) paperwork requirements and procurement lead times for the procurement of products by such component;

(iii) competition and the bid protest system; and

(iv) levels of participation of small businesses and small, disadvantaged businesses in the test program.

(B) The head of the participating component shall collect and make available to the Comptroller General appropriate data on contracts awarded under the test program in order to enable the Comptroller General to complete the evaluation required by this paragraph. The Administrator for Federal Procurement Policy, in consultation with the Comptroller General, shall provide guidance to the head of the participating component regarding the data to be collected for review by the Comptroller General.

(c) REGULATIONS.—(1) Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall publish for public comment—

(A) proposed new regulations to carry out the requirements in the amendments made by subsection (a) (including any proposed regulation that rescinds, waive, or limits any regulation inconsistent with the requirements of such amendments); and

(B) proposed regulations to implement the test program required by subsection (b).

(2) Not later than 270 days after the date of the enactment of this Act, the Secretary shall promulgate (A) final regulations to carry out such amendments and to rescind, waive, or limit any regulation inconsistent with the requirements of such amendments, and (B) final regulations to implement the test program.

(d) PROPOSALS TO ELIMINATE UNNECESSARY RESTRICTIONS ON ACQUISITION OF COMMERCIAL PRODUCTS.—(1) The Secretary of Defense may submit to Congress proposed legislation regarding any provision of law that the Secretary considers an unnecessary restriction on the acquisition of commercial items. Any such proposed legislation shall include—

(A) a description of the existing law and its effect on the acquisition of commercial items, including specific examples;

(B) draft legislation;

(C) a description of the manner in which the proposal will alter existing acquisition practices to facilitate the acquisition of commercial items;

(D) a description of the manner in which the proposal will preserve the integrity of the acquisition process; and

(E) any costs or savings associated with the proposal.

(2) In this subsection, the term "commercial item" has the meaning given such term in section 2325(b)(8) of title 10, United States Code, as amended by subsection (a).

(e) TECHNICAL AMENDMENT.—The item relating to section 2325 in the table of sections for chapter 137 of title 10, United States Code, is amended to read as follows:

"2325. Acquisition of commercial and nondevelopmental items.".

(f) COMMERCIAL AND NONDEVELOPMENTAL ITEMS.—(1) Title III of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 251 et seq.) is amended by inserting after section 303G the following new section:

"PROCUREMENT OF COMMERCIAL AND NONDEVELOPMENTAL ITEMS

"SEC. 303H. (a)(1) The Federal Acquisition Regulation issued under section 25(c) of the Office of Federal Procurement Policy Act (41 U.S.C. 421(c)) shall ensure that, to the maximum extent practicable—

"(A) requirements of executive agencies with respect to a procurement of supplies are stated in terms of—

"(i) functions to be performed;

"(ii) performance required; or

"(iii) essential physical characteristics;

"(B) such requirements are defined so that nondevelopmental items may be procured to fulfill such requirements;

"(C) such requirements are fulfilled through the procurement of nondevelopmental items; and

"(D) prior to developing new specifications, executive agencies conduct market research to determine whether nondevelopmental items are available or could be modified to meet agency needs.

"(2) As used in this section, the term 'nondevelopmental item' means—

"(A) any item of supply that is or has been available in the commercial marketplace;

"(B) any previously developed item of supply that is in use by a department or agency of the United States, a State or local government, or a foreign government with which the United States has a mutual defense cooperation agreement;

"(C) any item of supply described in subparagraph (A) or (B) that requires only minor modification in order to meet the requirements of the procuring agency; or

"(D) any item of supply that is being produced that does not meet the requirements of subparagraph (A), (B), or (C) solely because the item—

"(i) is not yet in use; or

"(ii) is not yet available in the commercial marketplace.

"(b)(1)(A) The Federal Acquisition Regulation issued under section 25(c) of the Office of Federal Procurement Policy Act (41 U.S.C. 421(c)) shall include a simplified uniform contract for the acquisition of commercial items by Federal agencies and shall require that such simplified uniform contract be used for the acquisition of commercial items to the maximum extent practicable. The uniform contract shall include only—

"(i) those contract clauses that are required to implement provisions of law applicable to such an acquisition;

"(ii) those contract clauses that are essential for the protection of the Federal Government's interest in such an acquisition; and

"(iii) those contract clauses that are determined to be consistent with standard commercial practice and appropriate for inclusion in such contracts.

"(B) In addition to the clauses described under subparagraph (A) (i) and (ii), a contract for the acquisition of commercial items may include only such clauses as are essential for the protection of the Federal Government's interest in the particular contract, as determined in writing by the contracting officer for such contract, or in a class of contracts, as determined by the agency head with the approval of the Administrator of the Office of Federal Procurement Policy.

"(2)(A) The Federal Acquisition Regulation shall require that a prime contractor under a Federal agency contract for the acquisition of commercial items be required to include in subcontracts under such contract only—

"(i) those contract clauses that are required to implement provisions of law applicable to such subcontracts; and

"(ii) those contract clauses that are essential for the protection of the Federal Government's interest in such subcontracts.

"(B) In addition to the clauses described under subparagraph (A) (i) and (ii), a contractor under a Federal agency contract for the acquisition of commercial items may be required to include in a subcontract under such contract only such clauses as are essential for the protection of the Federal Government's interest in the particular subcontract, as determined in writing by the contracting officer for such contract, or in a class of subcontracts, as determined by the agency head with the approval of the Administrator of the Federal Procurement Policy.

"(3) Notwithstanding paragraphs (1) and (2) of this subsection, the Department of Defense may use uniform contract and subcontract clauses developed under section 2325(b) of title 10, United States Code, in lieu of the uniform contract and subcontract clauses developed under this subsection.

"(c) The Federal Acquisition Regulation shall ensure, to the maximum extent practicable, that—

"(1) the inspection clause included in each agency contract for the acquisition of commercial items takes into account the contractor's past performance and any warranties the contractor may offer to the Government; and

"(2) Federal agencies take advantage of warranties offered by commercial contractors and use such warranties for the repair and replacement of commercial items.

"(d)(1) The Federal Acquisition Regulation shall ensure that, to the maximum extent practicable, contractors and subcontractors offering commercial items are required to submit certified cost or pricing data regarding agency contracts and subcontracts only when such data are necessary for the evaluation of the reasonableness of the price of the contract or subcontract, as the case may be.

"(2) The revised regulations shall particularly address—

"(A) the application of the adequate price competition exemption in the case of a contract or subcontract for the acquisition of a commercial item;

"(B) the standards for applying the catalog or market price exemption to contracts and subcontracts for items which are modified commercial items, components of commercial items, spare parts for commercial products, new commercial items, or commercial items which are no longer sold to the public; and

"(C) clarification that an agency may not, in the case of any item for which the Administrator of General Services has accepted a certificate of established catalog price, require a contractor to demonstrate that such an item meets the requirements of section 304(d)(5)(A)(ii) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 254(d)(5)(A)(ii)) during the period in which a contract to which the certification relates is in effect.

"(e) The Federal Acquisition Regulation shall direct agencies to require, where appropriate and in accordance with criteria prescribed in the regulations, offerors to demonstrate in their offers that products being offered have—

"(1)(A) achieved a level of commercial market acceptance necessary to indicate that the products are suitable for the agency's use or that the processes used to manufacture the products meet established commercial or other specified standards; or

"(B) been satisfactorily supplied under current or recent contracts for the same requirements; and

"(2) otherwise meet the product description, specifications, or other criteria prescribed by the public notice and solicitation.

"(f) The Federal Acquisition Regulation shall provide guidance to agencies on the use of past performance of products and sources as a factor in award decisions.

"(g) For the purposes of this subsection, a contract for commercial items may include those incidental services that are normally provided with sales of such items in the commercial market.

"(h) In this section, the term 'commercial item' means—

"(1) any item of supply, including computer software, regularly used for other than Government purposes which, in the course of normal business operations—

"(A) has been sold or traded to the general public;

"(B) has been offered for sale to the general public at established prices but not yet sold; or

"(C) although intended for sale or trade to the general public, has not yet been offered for sale but will be available for commercial delivery in a reasonable period of time; and

"(2) any item described in paragraph (1) which requires only modifications of a type customarily provided in the commercial marketplace, or other minor modifications, in order to meet the requirements of the procuring agency.".

(2) The table of contents for the Federal Property and Administrative Services Act of 1949 is amended by inserting after the item relating to section 303G the following:

"Sec. 303H. Procurement of commercial and nondevelopmental items.".

(3) The Administrator of the Office of Federal Procurement Policy shall issue guidelines for the training by executive agencies of contracting officers, program managers, and other appropriate acquisition personnel in the acquisition of nondevelopmental items. The guidelines shall provide, at a minimum, for training in the requirements of this section and the implementing regulations. In addition, the program shall provide for training of—

(A) contracting officers in the fundamental principles of price analysis and other means of determining price reasonableness which do not require access to commercial cost data; and

(B) appropriate personnel in market research techniques and the drafting of functional and performance specifications.

(4) Section 20(c) of the Office of Federal Procurement Policy Act (41 U.S.C. 418(c)) is amended to read as follows:

"(c) The advocate for competition for each procuring activity shall be responsible for promoting the acquisition of nondevelopmental items and for challenging barriers to such acquisition, including unnecessarily detailed specifications, unnecessarily restrictive statements of need, and unnecessarily burdensome contract clauses.".

(5) Within 270 days after the date of the enactment of this Act, Government-wide regulations to carry out the requirements in this section and rescind any regulations that are inconsistent with such requirements shall be published for public comment. Within one year after the date of enactment of this Act, final regulations shall be promulgated in the Federal Acquisition Regulation, and as necessary in the Federal Information Resources Management Regulation.

(6) Within 1 year after the date of the enactment of this Act, the Comptroller General of the United States shall submit to the congressional defense committees and the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House of Representatives a report and recommendations on the use of market research in support of procurement of nondevelopmental items. Such report shall include—

(A) a review of existing Government market research efforts to gather data concerning nondevelopmental items;

(B) a review of the feasibility of creating a Government-wide database for storing, retrieving, and analyzing market data, including a review of existing Government resources; and

(C) such recommendations for changes in law or regulation as the Comptroller General of the United States may consider appropriate.

SEC. 813. UNIFORM SMALL PURCHASE THRESHOLD FOR VARIOUS REQUIREMENTS APPLICABLE TO FEDERAL GOVERNMENT CONTRACTORS

(a) SMALL PURCHASE THRESHOLD DEFINED.—(1) Section 4 of the Office of Federal Procurement Policy Act (41 U.S.C. 403) is amended—

(A) by striking out "and" at the end of paragraph (9);

(B) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(C) by adding at the end the following new paragraph:

"(11) the term 'small purchase threshold' means $25,000, adjusted on October 1 of each year divisible by 5 to the amount equal to $25,000 in constant fiscal year 1990 dollars (rounded to the nearest $1,000).".

(2) The first adjustment under section 4(11) of such Act, as amended by paragraph (1), shall be made on October 1, 1995.

(b) AMENDMENTS TO TITLE 10.—Section 2304(g) of title 10, United States Code, is amended—

(1) in paragraph (2), by striking out "$25,000" and inserting in lieu thereof "the small purchase threshold";

(2) in paragraph (3), by striking out "$25,000" and inserting in lieu thereof "the small purchase threshold"; and

(3) by adding at the end the following new paragraph:

"(5) In this subsection, the term 'small purchase threshold' has the meaning given such term in section 4(11) of the Office of Federal Procurement Procedure Act (41 U.S.C. 403(11)).".

(c) AMENDMENTS TO THE FEDERAL PROPERTY AND ADMINISTRATIVE SERVICES ACT OF 1949.—Section 303(g) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253) is amended—

(1) in paragraph (2), by striking out "$25,000" and inserting in lieu thereof "the small purchase threshold";

(2) in paragraph (3), by striking out "$25,000" and inserting in lieu thereof "the small purchase threshold"; and

(3) by adding at the end the following new paragraph:

"(5) In this subsection, the term 'small purchase threshold' has the meaning given such term in section 4(11) of the Office of Federal Procurement Procedure Act (41 U.S.C. 403(11)).".

(d) ADDITIONAL AMENDMENTS TO THE OFFICE OF FEDERAL PROCUREMENT POLICY ACT.—Section 18(a)(1) of the Office of Federal Procurement Policy Act (41 U.S.C. 416(a)(1)) is amended—

(1) by striking out "$25,000" each place it appears and inserting in lieu thereof "the small purchase threshold"; and

(2) in clause (A)—

(A) by inserting "or" at the end of subclause (i);

(B) by striking out "; or" at the end of subclause (ii) and inserting in lieu thereof a comma; and

(C) by striking out subclause (iii).

(e) AMENDMENTS TO SMALL BUSINESS ACT.—The Small Business Act (15 U.S.C. 631 et seq.) is amended—

(1) in section 3, by adding at the end the following new subsection:

"(m) For purposes of this Act, the term 'small purchase threshold' has the meaning given such term in section 4(11) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(11)).";

(2) in section 8—

(A) in subsection (b)(7), by adding at the end the following new subparagraph:

"(D) Subparagraph (C) and the last sentence of subparagraph (A) shall not apply to a matter that does not exceed the small purchase threshold.";

(B) in subsection (d)(2)(A), by striking out "$10,000" and inserting in lieu thereof "the small purchase threshold"; and

(C) in subsection (e)(1)—

(i) by striking out "$25,000" each place it appears and inserting in lieu thereof "the small purchase threshold";

(ii) by inserting "or" at the end of subclause (i) of clause (A);

(iii) by striking out "; or" at the end of subclause (ii) of clause (A) and inserting in lieu thereof a comma; and

(iv) by striking out subclause (iii) of clause (A); and

(3) in section 15(j), by striking out "of less than $25,000" and inserting in lieu thereof "not in excess of the small purchase threshold".

(f) AMENDMENTS TO SOLID WASTE DISPOSAL ACT.—Section 6002(a) of the Solid Waste Disposal Act (42 U.S.C. 6962(a)) is amended—

(1) by inserting "(1)" after "(a)";

(2) by striking out "$10,000" the first place it appears and inserting in lieu thereof "the small purchase threshold";

(3) by striking out "$10,000 or more" and inserting in lieu thereof "more than the small purchase threshold"; and

(4) by adding at the end the following new paragraph:

"(2) As used in this subsection, the term 'small purchase threshold' has the meaning given such term in section 4(11) of the Office of Federal Procurement Policy Act (41 U.S.C. 403(11)).".

SEC. 814. FEDERAL ACQUISITION REGULATORY COUNCIL MEMBERSHIP

Section 133(c) of title 10, United States Code, is amended

(1) in paragraph (2), by striking out "and" at the end;

(2) in paragraph (3), by striking out the period at the end and inserting in lieu thereof "; and"; and

(3) by inserting at the end the following new paragraph:

"(4) may designate an Assistant Secretary of Defense performing acquisition responsibilities to serve on and attend meetings of the Federal Acquisition Regulatory Council (established under section 25 of the Office of Federal Procurement Policy Act (41 U.S.C. 421)) in place of the Under Secretary.".

SEC. 815. COMPETITIVE ALTERNATIVE SOURCE REQUIREMENT

Section 2438 of title 10, United States Code, is amended—

(1) by striking out subsections (a), (b), and (c) and inserting in lieu thereof the following:

"(a)(1) The Secretary of Defense shall prescribe regulations to ensure that, before full-scale development of a major program is initiated, there is an acquisition strategy for such program that includes a plan for use of competitive alternative sources for the major program and for each major subsystem under the major program if the establishment and maintenance of two or more sources—

"(A) would likely result in reduced costs for such program;

"(B) would not result in unacceptable delays in fulfilling the needs of the Department of Defense; and

"(C) is otherwise in the national security interests of the United States.

"(2) The requirement to plan for use of competitive alternative sources for a major program or a subsystem under a major program (provided in the acquisition strategy for such program) is satisfied if the Secretary finds that alternative production sources offer systems or subsystems that, for purposes of the major program, serve similar functions and compete effectively with each other even though such systems or subsystems are not identical."; and

(2) by redesignating subsection (d) as subsection (b).

SEC. 816. CONTRACT AWARDS WITHOUT DISCUSSIONS

The Secretary of Defense shall revise the regulations implementing clause (ii) of subparagraph (A) of section 2305(b)(4) of title 10, United States Code, to authorize the head of an agency referred to in such subparagraph to consider life-cycle costs as a factor in determining the lowest overall cost for the purpose of such clause.

SEC. 817. CERTIFIED COST OR PRICING DATA THRESHOLD

(a) INCREASED THRESHOLD.—(1) Section 2306a of title 10, United States Code, is amended—

(A) in subsection (a)(1), by striking out "$100,000" each place it appears and by inserting in lieu thereof "$500,000";

(B) by redesignating subsection (g) as subsection (h); and

(C) by inserting after subsection (f) the following new subsection (g):

"(g)(1) The Secretary of Defense shall prescribe regulations requiring a review, before the award of a contract or subcontract or approval of a price adjustment, to ensure that the price of the contract, subcontract, or pricing adjustment to the United States is reasonable when cost or pricing date is not required to be submitted under this section solely because the expected price of the contract, subcontract, or pricing adjustment to the United States is not expected to exceed $500,000.

"(2) The regulations prescribed under this subsection shall specify the types of information that offerors must submit as part of the review described in paragraph (1). Such information, at a minimum, shall include appropriate information on the prices at which such offeror has previously sold the same or similar products.".

(2) Section 2323 of title 10, United States Code, is repealed.

(b) REGULATIONS.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall publish proposed regulations under subsection (g) of section 2306a of title 10, United States Code (as added by subsection (a)(1)), and an invitation for public comment on such proposed regulations. The Secretary shall promulgate final regulations under such subsection not later than 270 days after the date of the enactment of this Act.

(c) EFFECTIVE DATE.—The amendments made by subsection (a)(1) and (a)(2) shall take effect on the date on which final regu-

lations are promulgated under subsection (b).

SEC. 818. MAJOR DEFENSE ACQUISITION PILOT PROGRAM

(a) AUTHORITY TO CONDUCT PILOT PROGRAM.—The Secretary of Defense may conduct a pilot program for the purpose of determining the potential for increasing the efficiency and effectiveness of the acquisition process in major defense acquisition programs.

(b) DESIGNATION OF PARTICIPATING PROGRAMS.—(1) Subject to paragraph (2), the Secretary may designate not more than six major defense acquisition programs for participation in the pilot program.

(2) The Secretary may designate for participation in the pilot program only those major defense acquisition programs specifically authorized to be so designated in a law authorizing appropriations for such program enacted after the date of the enactment of this Act.

(c) CONDUCT OF PILOT PROGRAM.—(1) In the case of each major defense acquisition program designated for participation in the pilot program, the Secretary—

(A) shall conduct the acquisition program in accordance with standard commercial, industrial practices; and

(B) may waive or limit the applicability of any provision of law that, except for this section, the Secretary is not otherwise authorized to waive and that prescribes—

(i) procedures for the procurement of supplies or services;

(ii) a preference or requirement for acquisition from any source or class of sources;

(iii) any requirement related to contractor performance;

(iv) any cost allowability, cost accounting, or auditing requirements; or

(v) any requirement for the management of, testing to be performed under, evaluation of, or reporting on an acquisition program.

(2) The waiver authority provided in paragraph (1)(B) does not apply to a provision of law if, as determined by the Secretary—

(A) a purpose of the provision is to ensure the financial integrity of the conduct of a Federal Government program; or

(B) the provision relates to the authority of the Inspector General of the Department of Defense.

(d) DESIGNATION AS DEFENSE ENTERPRISE PROGRAM.—The Secretary shall designate each participating major defense acquisition program as a defense enterprise program under section 2436 of title 10, United States Code. The Secretary may waive the applicability of the requirement of this subsection or any provision of such section 2436 to any such acquisition program if he determines that such a waiver is necessary for the purpose of the pilot program.

(e) REGULATIONS.—(1) Not later than 270 days after the date of the enactment of this Act, the Secretary shall publish proposed regulations to implement this section and an invitation for public comment on the proposed regulations. Not later than one year after such date, the Secretary shall promulgate final regulations to implement this section.

(2)(A) The Secretary may not waive or limit the applicability of a law to a major defense acquisition program under subsection (c)(1)(B) unless the Secretary first prescribes regulations specifying the waiver or limitation.

(B) In the case of a waiver or limitation of the applicability of a requirement imposed by a statute, including a regulation prescribed to implement such statutory requirement, the following procedures shall apply:

(i) The Secretary shall publish the proposed waiver or limiting regulations and provide an opportunity for public comment on the proposed regulations for a period of not less that 60 days.

(ii) If a Federal Government official outside the Department of Defense has the responsibility for implementation of the statute, the Secretary shall consult with such official regarding the proposed waiver or limitation before publishing the proposed waiver or limiting regulations under clause (i).

(3) The Secretary may prescribe separate regulations for one or more major defense acquisition programs designated by the Secretary for participation in the pilot program.

(f) NOTIFICATION AND IMPLEMENTATION.—(1) The Secretary shall transmit to the congressional defense committees a written notification of each major defense acquisition program proposed to be designated by the Secretary for participation in the pilot program.

(2) If the Secretary proposes to waive or limit the applicability of any provision of law to a major defense acquisition program under the pilot program in accordance with this section, the Secretary shall include in the notification regarding that acquisition program—

(A) the provision of law proposed to be waived or limited;

(B) the effects of such provision of law on the acquisition system, including specific examples;

(C) the actions taken to ensure that the waiver or limitation will not reduce the efficiency, integrity, and effectiveness of the acquisition process used for the major defense acquisition program; and

(D) specific budgetary and personnel savings, if any, that will result from the waiver or limitation.

(g) LIMITATION ON WAIVER AUTHORITY.—The applicability of the following requirements of law may not be waived or limited under subsection (c)(1)(B) with respect to a major defense acquisition program:

(1) The requirements of this section.

(2) The requirements contained in any law enacted on or after the date of the enactment of this Act if that law designates such major defense acquisition program as a participant in the pilot program, except to the extent that a waiver of such requirement is specifically authorized for such major defense acquisition program in a law enacted on or after such date.

(h) TERMINATION OF AUTHORITY.—(1) The authority to waive or limit the applicability of any law under this section may not be exercised after September 30, 1992.

(2) No waiver or limitation of the applicability of a law to a major defense acquisition program under the pilot program shall be effective with respect to any contract under such acquisition program after September 30, 1994.

(3)(A) Except as provided in subparagraph (B), any contract entered into in accordance with laws and regulations applicable to such contract under the pilot program on or before the date specified in paragraph (1) shall continue to be valid.

(B) After the date specified in paragraph (2), the United States shall not be subject to any obligation, limitation, or prohibition under a contract referred to in subparagraph (A) that is inconsistent with a law waived or limited under the pilot program.

(i) DEFINITION.—In this section the term "major defense acquisition program" shall have the meaning given such term in section 2430 of title 10, United States Code.

SEC. 819. ADVISORY PANEL ON STREAMLINING AND CODIFYING ACQUISITION LAWS

(a) ESTABLISHMENT.—There is established in the legislative branch of the Government an advisory panel to be known as the "Advisory Panel on Streamlining and Codifying Acquisition Laws" (hereafter in this section referred to as the "Panel").

(b) COMPOSITION.—(1) The Panel shall be composed of 18 members as follows:

(A) Eight members appointed by the President pro tempore of the Senate, upon the recommendation of the majority and minority leaders of the Senate, from among individuals who are recognized experts in acquisition law and procurement policy. In making recommendations under this subparagraph, the majority and minority leaders shall attempt to ensure that the members of the Panel reflect diverse experiences in the public and private sectors.

(B) Eight members appointed jointly by the Speaker of the House of Representatives and the minority leader of the House of Representatives from among individuals who are recognized experts in acquisition law and policy. In making appointments under this subparagraph, the Speaker, in consultation with the minority leader, shall attempt to ensure that the members of the Panel reflect diverse experiences in the public and private sectors.

(C) The Secretary of Defense, or his designee.

(D) The Administrator for Federal Procurement Policy, or his designee.

(2) The appointments of the members referred to in subparagraphs (A) and (B) of paragraph (1) shall be made not later than 45 days after the date of the enactment of this Act.

(c) CHAIRMAN AND VICE CHAIRMAN.—The Panel shall select a Chairman and Vice Chairman from among its members.

(d) PERIOD OF APPOINTMENT; VACANCIES.—Members shall be appointed for the life of the Panel. Any vacancy in the Panel shall not affect its powers, but shall be filled in the same manner as the original appointment.

(e) DUTIES.—The Panel shall—

(1) review the acquisition laws of the United States with a view toward streamlining the Federal acquisition process;

(2) make any recommendations for the repeal or amendment of such laws that the Panel considers necessary, as a result of such review, to—

(A) eliminate any such laws that are unnecessary for the establishment and administration of buyer and seller relationships in Federal Government procurement;

(B) ensure the continuing financial and ethical integrity of Federal procurement programs; and

(C) protect the best interests of the Federal Government; and

(3) prepare a proposed code of Federal acquisition laws.

(f) REPORT.—(1) The Panel may transmit to the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives, and the President such interim reports on the actions of the Panel as the Panel considers appropriate and, not later than December 15, 1992, shall transmit a final report on the actions of the Panel to such committees and the President.

(2) The final report shall contain a detailed statement of the findings and conclusions of the Panel, the proposed codification of Federal Procurement laws prepared pursuant to subsection (e), and such additional recommendations for such legislation as the Panel considers appropriate.

(g) INFORMATION.—The Panel may secure directly from the Department of Defense and any other Federal department or agency such information as the Panel considers necessary to enable the Panel to carry out its responsibilities under this section. Upon request of the Chairman of the Panel, the head of such department or agency shall furnish such information to the Panel.

(h) MEETINGS; QUORUM.—(1) The Panel shall meet at the call of the Chairman.

(2) Nine members of the Panel shall constitute a quorum, but a lesser number of members may hold hearings.

(i) COMPENSATION OF MEMBERS.—Each member of the Panel who is not an officer or employee of the Federal Government shall be paid the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day (including travel time) during which such member is engaged in the performance of the duties of the Panel. All members of the Panel who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

(j) TRAVEL EXPENSES.—The members of the Panel shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Panel.

(k) STAFF.—(1) The Chairman of the Panel may, without regard to the civil service laws and regulations, appoint and terminate the employment of a staff director and such other additional personnel as may be necessary to enable the Panel to perform its duties. The employment of a staff director shall be subject to confirmation by the Panel.

(2) The Chairman of the Panel may fix the compensation of the executive director and other personnel without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification of positions and General Schedule pay rates, except that the rate of pay for the executive director and other personnel may not exceed the rate payable for GS-18 of the General Schedule under section 5332 of such title.

(l) DETAIL OF GOVERNMENT EMPLOYEES.—Any Federal Government employee may be detailed to the Panel without payment of reimbursement to the detailing department or agency, and such detail shall be without interruption or loss of civil service status or privilege.

(m) PROCUREMENT OF TEMPORARY AND INTERMITTENT SERVICES.—The Chairman of the Panel may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, at rates for individuals which do not exceed the daily equivalent of the annual rate of basic pay prescribed for GS-18 of the General Schedule under section 5332 of such title.

(n) APPLICABILITY OF OTHER FEDERAL LAWS.—A member of the Panel appointed under subsection (b) who is not otherwise employed by the Federal Government shall not be considered to be a Federal employee, except for the purposes of—

(1) chapter 81 of title 5, United States Code, relating to compensation for work-related injuries; and

(2) chapter 171 of title 28, United States Code, relating to torts claims.

(o) POSTAL AND PRINTING SERVICES.—The Panel may use the United States mails and obtain printing and binding services in the same manner and under the same conditions as other departments and agencies of the Federal Government.

(p) MISCELLANEOUS ADMINISTRATIVE AND SUPPORT SERVICES.—The Administrator of General Services shall furnish the Panel, on a reimbursable basis, any administrative and support services requested by the Panel.

(q) GIFTS.—The Panel may accept, use, and dispose of gifts or donations of services or property.

(r) PROCUREMENT AUTHORITY.—The Panel may procure supplies, services, and property and make contracts, in any fiscal year, in order to carry out its duties, but (except in the case of temporary or intermittent services procured under subsection (m)) only to such extent or in such amounts as are provided in appropriation Acts or are donated pursuant to subsection (q). Contracts and other procurement arrangements may be entered into without regard to section 3709 of the Revised Statutes (41 U.S.C. 5) or any similar provision of Federal law.

(s) TRAVEL.—To the maximum extent practicable, the members and employees of the Panel shall travel on military aircraft, military ships, military vehicles, or other military conveyances when travel is necessary in the performance of a responsibility of the Panel, except that no such aircraft, ship, vehicle, or other conveyance may be scheduled primarily for the transportation of any such member or employee when the cost of commercial transportation is less expensive.

(t) TERMINATION.—The Panel shall terminate 90 days after the date on which Panel submits its final report under subsection (f)(2).

(u) AMOUNTS AVAILABLE.—Of the funds authorized to be appropriated for the Defense Agencies for fiscal year 1991 pursuant to this Act, $1,000,000 shall be available to carry out this section. Amounts made available pursuant to this subsection shall remain available for obligation until December 15, 1993.

SEC. 820. OVERSEAS SEVERANCE PAY

(a) SEVERANCE PAY COSTS ALLOWABLE.—Section 2324(e)(1)(M) of title 10, United States Code, is amended by adding before the period at the end the following: ", except that such costs may be allowed to the extent that the head of an agency that awarded such contract determines, under regulations prescribed by the Secretary, that payment of such severance pay—

"(i) is necessary to comply with laws in effect on the date of the contract award that are generally applicable to a significant number of businesses in the country in which the foreign nationals receiving the severance pay performed the contract; and

"(ii) is in the national interests of the United States.".

(b) PROSPECTIVE APPLICABILITY.—The amendment made by subsection (a) does not apply with respect to any cost incurred by contractors before the date of the enactment of this Act.

SEC. 821. EVALUATION OF CONTRACTS FOR PROFESSIONAL AND TECHNICAL SERVICES

(a) IN GENERAL.—(1) Chapter 137 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 2331. Contracts for professional and technical services

"(a) IN GENERAL.—The Secretary of Defense shall prescribe regulations to ensure, to the maximum extent practicable, that professional and technical services are acquired on the basis of the task to be performed rather than on the basis of the number of hours of services provided.

"(b) CONTENT OF REGULATIONS—With respect to contracts to acquire services on the basis of the number of hours of services provided, the regulations described in subsection (a) shall—

"(1) include standards and approval procedures to minimize the use of such contracts;

"(2) establish criteria to ensure that proposals for contracts for technical and professional services are evaluated on a basis which does not encourage contractors to propose uncompensated overtime;

"(3) ensure appropriate emphasis on technical and quality factors in the source selection process;

"(4) require identification of any hours in excess of 40-hour weeks included in a proposal;

"(5) ensure that offerors are notified that proposals which include unrealistically low labor rates or which do not otherwise demonstrate cost realism will be considered in a risk assessment and evaluated appropriately; and

"(6) provide guidance to contracting officers to ensure that any use of uncompensated overtime will not degrade the level of technical expertise required to perform the contract.

"(c) WAIVER OF TASK ORDER LIMITATION.—(1) The Secretary of Defense may waive the limitation in section 2304(j)(4) of this title on the total value of task orders on a case-by-case basis for specific contracting activities to the extent the Secretary considers necessary the use of master agreements in order to further the policy set forth in subsection (a) of this section.

"(2) During any fiscal year, such a waiver may not increase the total value of task orders under master agreements of a contracting activity by more than 20 percent of the value of all contracts for advisory and assistance services awarded by that contracting activity during fiscal year 1989.

"(3) Such a waiver shall not become effective until 60 days after the Secretary of Defense has published notice thereof in the Federal Register.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2330 the following new item:

"2331. Contracts for professional and technical services.".

(b) REGULATIONS.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall publish for public comment new regulations to carry out the requirements in this section. The Secretary shall promulgate final regulations to carry out such requirements not later than 270 days after the date of the enactment of this Act.

PART C—ACQUISITION WORKFORCE

SEC. 831. MANAGEMENT OF THE ACQUISITION WORKFORCE

Not later than 270 days after the date of the enactment of this Act, the Secretary of Defense shall prescribe regulations for management of the acquisition workforce of the Department of Defense. The regulations shall include the following:

(1) Assignment of responsibility within the Office of the Secretary of Defense for issuance of acquisition workforce policies.

(2) Criteria for determining whether acquisition positions should be filled by military or civilian personnel.

(3) Standards and procedures for the recruitment, training, education, advancement, and compensation of military and civilian personnel in the acquisition workforce.

SEC. 832. ACQUISITION WORKFORCE ENHANCEMENTS

(a) RELOCATION EXPENSES.—Section 5724a(a)(2) of title 5, United States Code, is amended by striking out "continental" in the second sentence.

(b) WAIVER OF PENALTY FOR CONTINUED GOVERNMENT SERVICE.—(1) Section 5532 of title 5, United States Code, is amended by adding at the end thereof the following new subsecton:

"(g)(1) Upon a finding by the head of an Executive agency that it is difficult to recruit qualified persons for appointment to a particular scientific, engineering, professional, or managerial position in such Executive agency, the head of such Executive agency may request, and the Director of the Office of Personnel Management may grant, a waiver of the applicability of the other provisions of this section and sections 8344 and 8468 of this title (relating to annuities and pay on reemployment) to any person appointed to such position. There may not be in effect at any time waivers under this paragraph for more than 1,500 employees of the Executive Branch.".

(c) EXPENSES RELATED TO DEATH OF EMPLOYEES IN SPECIFIED CIRCUMSTANCES.—Section 5742 of title 5, United States Code, is amended—

(1) in subsection (b), by inserting "continental" after "outside the" each place it appears in paragraphs (1) and (2); and

(2) by adding at the end the following new subsection:

"(e) Employees covered by this section include an employee who has been reassigned away from the employee's home of record pursuant to a mandatory mobility agreement executed as a condition of employment.".

(d) DEGREE TRAINING.—(1) Chapter 41 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 4119. Degree training

"(a) In order to facilitate the recruitment and retention of employees for Executive Branch positions for which there is a current or anticipated shortage of qualified personnel, especially positions requiring critical skills, the Director of the Office of Personnel Management may establish a program for the heads of Executive agencies to furnish financial assistance for an agency employee to obtain—

"(1) an academic degree necessary to qualify the employee educationally for appointment to a particular position; or

"(2) an academic degree which would enhance the employee's ability to serve the Federal Government.

"(b) Financial assistance for an employee under this section may be in the form of direct payment of educational or training costs or reimbursement of the employee for payment of such costs.

"(c) Subsection (a) applies to education and training by, in, or through Federal Government or non-Federal Government institutions.

"(d) The authority under this section may not be exercised on behalf of any employee in or seeking to qualify for an appointment to any position which is excepted from the competitive service because of its confidential, policy-determining, policymaking, or policy-advocating character unless the primary qualification required for appointment to such position is technical or professional proficiency, as determined by the Director of the Office of Personnel Management.

"(e) The Director of the Office of Personnel Management, shall prescribe regulations to carry out this section. The regulations shall incorporate the employee agreement requirements of section 4108 of this title.

"(f) No employee agreement may be entered into for the purposes of this section after September 30, 1993.".

(2) The table of sections at the beginning of chapter 341 of such title is amended by adding at the end thereof the following new item:

"4119. Degree training.".

(e) OPTIONAL EXCLUSION OF PERFORMANCE RATINGS FOR CERTAIN TEMPORARY EMPLOYEES.—Section 4301(2) of title 5, United States Code, is amended—

(1) by striking out "or" at the end of subparagraph (F);

(2) by striking out "and" at the end of subparagraph (G) and inserting in lieu thereof "or"; and

(3) by inserting after subparagraph (G) the following new subparagraph:

"(H) an individual who (i) is serving in a position within the Department of Defense under a temporary appointment for less than one year, (ii) agrees to serve without a performance evaluation, and (iii) will not be considered for a reappointment or for an increase in pay based in whole or in part on performance; and ".

(f) REPEAL OF RESTRICTIONS ON APPOINTMENT OF RETIRED MEMBERS OF THE ARMED FORCES TO POSITIONS IN THE DEPARTMENT OF DEFENSE.—Section 3326 of title 5, United States Code, is repealed.

(g) ADJUSTMENT OF AMOUNT PAYABLE ON THE BASIS OF DUTY AT REMOTE WORKSITE.—Section 5942 of title 5, United States Code, is amended—

(1) by inserting "(a)" before "Notwithstanding"; and

(2) by adding at the end the following new subsection:

"(b) Under procedures prescribed by the President, the maximum allowance specified in subsection (a) may be adjusted from time to time in the interest of recruiting and retaining employees for performance of duty at remote worksites.".

(h) STUDENT LOAN REPAYMENTS.—(1) Chapter 41 of title 5, United States Code, as amended by subsection (d)(1), is further amended by adding at the end thereof the following new section:

"§ 4120. Student loan repayments

"(a)(1) In order to recruit or retain highly qualified persons for scientific, engineering, and professional positions in the Executive branch, the Director of the Office of Personnel Management may establish a program under which the head of an executive agency repays a student loan of an employee of that executive agency who enters into an agreement referred to in subsection (c).

"(2) Payments under this section may not, in the case of any employee, exceed—

"(A) $6,000 in any calendar year; or

"(B) a total of $40,000.

"(3) The head of an executive agency may not reimburse an employee under this section for any student loan payments made by the employee before the employee enters into an agreement under subsection (c).

"(b)(1) The head of an executive agency may not repay a student loan of an employee under this section unless the employee first enters into a written agreement with the head of the executive agency in which the employee agrees—

"(A) to remain employed in the Executive branch for a period specified in the agreement (which may not be less than 3 years) unless involuntarily separated (other than for misconduct); and

"(B) if involuntarily separated for misconduct, or voluntarily separated, before the end of the period specified in the agreement, to reimburse the United States the amount of the loan payments made for the employee under this section.

"(2) The agreement may include any additional terms, limitations, and conditions relating to repayment of a student loan that are agreed to by the head of the executive agency and the employee.

"(c)(1) An obligation to reimburse the United States imposed pursuant to an agreement entered into under subsection (c) is, for all purposes, a debt owed to the United States.

"(2) Upon a failure of any person to repay an amount required under the agreement, the sum equal to the amount owed by such person may be recovered by the Federal Government from such person (or such person's estate) by—

"(A) setoff against accrued pay, compensation, retirement annuity or retired or retainer pay, or other amount otherwise payable to such person by the Federal Government; and

"(B) any other method provided by law for the recovery of amounts owed the United States.

"(3) The head of an executive agency that entered into an agreement with an employee under subsection (a) may waive, in whole or in part, a right of recovery under this subsection in connection with such agreement if the recovery would be against equity and good conscience or against the public interest.

"(4) The amount of any loan repayment recovered from any person (or estate) under this subsection shall be credited to the account from which the loan repayment was originally made.

"(5) A discharge of any person in bankruptcy under title 11 that is entered less than 5 years after the termination of such person's employment in the Executive branch does not discharge such person from a debt of such person under paragraph (1).

"(d) Repayment of an employee's student loan under this section shall be terminated if the employee—

"(1) ceases to be employed in the Executive branch; or

"(2) does not maintain an acceptable level of performance, as determined under standards and procedures prescribed by the Director of the Office of Personnel Management.

"(e) In selecting employees to receive benefits under this section, the head of an executive agency shall attempt, consistent with the merit system principles set out in paragraphs (1) and (2) of section 2301(b) of this title, to achieve and maintain a balanced workforce in which women and members of racial and ethnic minority groups are appropriately represented in Federal Government service.

"(f) Payment of a student loan of an employee under this section is in addition to basic pay and any other form of compensation otherwise payable to the employee.

"(g) The total number of loan repayment agreements entered into under subsection (c) in any fiscal year may not exceed 500.

"(h) The Director of the Office of Personnel Management shall prescribe regulations to carry out this section.

"(i) In this section, the term 'student loan' means—

"(1) a loan made, insured, or guaranteed under part B of title IV of the Higher Education Act of 1965 (20 U.S.C. 1071 et seq.);

"(2) a loan made under part E of such title (20 U.S.C. 1087aa et seq.); and

"(3) a health education assistance loan made or insured under part C of title VII of the Public Health Service Act (42 U.S.C. 294 et seq.) or under part B of title VIII of such Act (42 U.S.C. 297 et seq.).

"(j) No loan repayment agreement may be entered into under this section after September 30, 1993.".

(2) The table of sections at the beginning of chapter 41 of such title, as amended by subsection (d)(2), is further amended by adding at the end thereof the following:

"4120. Student loan repayments.".

(i) SEPARATE MAINTENANCE ALLOWANCE FOR EMPLOYEES IN PANAMA.—Section 5924(3) of title 5, United States Code, is amended by adding at the end the following: "Notwithstanding section 1217(d) of the Panama Canal Act of 1979 (22 U.S.C. 3657(d)), for the purposes of this paragraph, the term 'foreign area' includes the Republic of Panama.".

(j) REPORT REQUIREMENT.—Not later than May 15, 1993, the Comptroller General of the United States shall submit a report to Congress regarding the exercise, if any, of the authority provided in sections 4119 and 4120 of title 5, United States Code, as added by subsections (d) and (h). The report shall contain the Comptroller General's assessment of the extent to which the exercise of such authority has been effective in improving the quality of the civilian workforce in the Executive branch.

(k) CRITICAL-POSITION PAY AUTHORITY.—(1) Subchapter I of chapter 53 of title 5, United States Code, is amended by adding at the end the following new section:

"§ 5309. Critical-position pay authority

"(a) The Director of the Office of Personnel Management, in consultation with the Director of the Office of Management and Budget, may, from time to time, allocate and reallocate among the departments and agencies of the executive branch, critical-position pay authority for not to exceed a Government-wide total of 800 positions.

"(b) The head of an agency that receives an allocation of critical-position pay authority may exercise such authority for not to exceed the number of positions for which authority is received from the Director of the Office of Personnel Management under subsection (a).

"(c) For purposes of this section, 'critical-position pay authority' means the authority for the head of an agency, notwithstanding any other law, including any provision of this chapter, to fix the rate of basic pay for any position which such agency head determines to be a critical position at an annual rate that does not exceed the rate in effect for level I of the Executive Schedule, except that the aggregate annual amount paid (including any allowance, bonus, award, or other direct compensation) to an employee under this section during any fiscal year may not exceed the annual rate payable for positions at level I of the Executive Schedule in effect at the end of such fiscal year.

"(d) Critical-position pay authority for a position may be reexercised when a position becomes vacant and is refilled only upon a redetermination by the agency head that the position remains a critical position within the meaning of this section. Such authority may be reexercised only if the allocation made by the Director of the Office of Personnel Management required for such exercise under subsection (a) is reconfirmed by the Director of the Office of Personnel Management at the time of such reexercise.

"(e) In determining whether a position is a critical position to which this section shall apply, the head of the agency shall consider—

"(1) the extent to which the position requires expertise of an extremely high level in a scientific, technical, professional, or administrative field;

"(2) the extent to which additional compensation is necessary to recruit or retain exceptionally qualified individuals; and

"(3) the extent to which the position is critical to the agency's successful accomplishment of an important mission.

"(f)(1) The Office of Personnel Management shall establish a Critical Position Advisory Panel to make recommendations on—

"(A) the criteria that should be used to determine which positions should be critical positions; and

"(B) the qualifications that should be expected of individuals assigned to critical positions.

"(2) The panel shall be composed of members with exceptional expertise and experience in management, administration, and personnel matters.

"(h) On October 1 of each year, the Office of Personnel Management shall submit a report to the Congress listing all critical-pay positions in the Government.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 5308 the following new item:

"5309. Critical-position pay authority.".

SEC. 833. POST-EMPLOYMENT RESTRICTIONS

(a) EXTENSION OF PERIOD OF SUSPENSION OF CERTAIN PROVISIONS OF LAW.—Section 507 of the Ethics Reform Act of 1989 (Public Law 101-194; 103 Stat. 1759) is amended by striking out "one year after such day" and inserting in lieu thereof "May 31, 1991".

(b) TECHNICAL AMENDMENT.—Section 814(d) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1498) is amended by inserting at the end the following new paragraph:

"(3) The amendment made by paragraph (2) shall remain in effect on and after January 1, 1991.".

SEC. 834. ALTERNATIVE PERSONNEL MANAGEMENT DEMONSTRATION PROGRAMS FOR CERTAIN FEDERAL GOVERNMENT LABORATORIES

(a) PURPOSE.—The purpose of this section is to provide a basis for evaluating one or more alternative personnel management systems for scientific positions, engineering positions, technical support positions (including positions requiring proficiency in advanced mathematics) and managerial positions in Federal Government laboratories in order to enhance the recruitment, retention, and motivation of well-qualified civilian personnel for such positions and to provide appropriate compensation for such personnel.

(b) DEMONSTRATION PROGRAM.—(1) Not later than one year after the date of the enactment of this Act—

(A) the Director of the Office of Personnel and Management—

(i) shall designate one or more agencies to conduct one or more demonstration programs for the purpose of this section; and

(ii) with the head of each agency so designated, shall jointly develop each such demonstration program for such agency; and

(B) the head of each agency so designated shall implement the demonstration program or programs jointly developed with the Director.

(2)(A) The head of an agency designated to conduct a demonstration program shall designate—

(i) the agency laboratory or laboratories that are to be involved in the demonstration program; and

(ii) the scientific positions, engineering positions, technical support, or managerial positions at each such laboratory that are to be covered by the alternative personnel management system implemented pursuant to the demonstration program.

(B) The head of an agency may designate for coverage by an alternative personnel management system pursuant to subparagraph (A) only those positions the rates of basic pay for which would be established, except for this section, under—

(i) section 3104 of title 5, United States Code, relating to specially qualified personnel;

(ii) subchapter III of chapter 53 of such title, relating to the General Schedule; or

(iii) chapter 54 of such title, relating to the performance management and recognition system.

(3) Each alternative personnel management system implemented pursuant to the demonstration program shall cover a sufficient number of employees to provide an adequate basis on which to evaluate the feasibility and desirability of implementing such a system on a broader scale in Federal Government laboratories.

(4) The demonstration programs conducted pursuant to this section shall not be considered as demonstration programs for the purposes of section 4703 of title 5, United States Code.

(c) CLASSIFICATION.—Each alternative personnel management system implemented pursuant to a demonstration program under this section shall provide for the classification of employee positions in occupational groups. An occupational group shall include positions that are similar in the following respects:

(1) The responsibilities and complexities of the positions.

(2) Qualifications necessary for performance of such responsibilities.

(d) PAY RANGES.—(1) A range of rates of basic pay shall be established for the positions in each occupational group.

(2) The minimum rate of basic pay in a pay range shall be equal to the lowest minimum rate of basic pay provided for any position in such occupational group under the classification and pay system that, except for this section, would be applicable to that position.

(3)(A) Subject to subparagraph (B), the maximum rate of basic pay in a pay range shall be equal to the highest maximum rate of basic pay provided for any position in such occupational group under the classification and pay system that, except for this section, would be applicable to that position.

(B) The maximum rate of basic pay of a pay range applicable under an alternative personnel management system to positions in an agency laboratory may exceed the maximum rate permitted under subparagraph (A) if the head of the agency determines that, because of adverse working conditions at the laboratory or the undesirability of the geographical location of the laboratory, the increased maximum rate of basic pay is necessary to ensure the recruitment and retention of a sufficient staff of qualified employees.

(C) The maximum rate of basic pay established under subparagraph (B) for a pay range applicable to positions in an agency laboratory may not exceed the lesser of—

(i) the rate necessary to ensure the recruitment and retention of a sufficient staff of qualified employees, as determined by the head of such agency;

(ii) the amount equal to 160 percent of the maximum rate of basic pay that, except for such subparagraph, would be permitted under subparagraph (A); or

(iii) the rate of basic pay for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(4) The minimum and maximum rates of basic pay in a pay range shall be adjusted at the same times and to the same extent as the rates of basic pay under the statutory pay systems pursuant to section 5305 of title 5, United States Code.

(e) SPECIFIC RATES OF BASIC PAY.—(1) For each alternative personnel management system implemented at an agency laboratory under a demonstration program conducted at such laboratory, the head of such agency shall prescribe the criteria for establishing, within the applicable pay range, the initial rate of basic pay of an employee appointed to a position covered by the system and for increasing the employee's rate of basic pay within such pay range.

(2) Subject to paragraph (3), the head of an agency laboratory shall establish the initial rate of basic pay for an employee within a pay range, and from time to time increase the rate of basic pay of the employee referred to in paragraph (1) within the pay range, on the basis of the criteria prescribed under paragraph (1).

(3) In the case of an employee employed in a position at an agency laboratory immediately before that position becomes covered by an alternative personnel management system under this section, the rate of basic pay established for such employee under the alternative personnel management system may not be less than the rate of basic pay payable to such employee immediately before the position becomes covered by such system.

(f) OTHER PAY.—(1) Each alternative personnel management system shall provide for payment of managerial differential pay for managerial personnel and supervisory differential pay for supervisory personnel. The payment of differential pay to an employee in a managerial or supervisory position shall be in addition to the payment of the basic pay provided for such employee.

(2) Each alternative personnel management system applicable to an agency laboratory shall provide for payment of cash awards for meritorious performance subject to budgetary considerations of such laboratory.

(3) Each alternative personnel management system shall provide for payment of recruitment bonuses and retention bonuses when necessary to meet employee recruitment and retention needs.

(4) Differential pay, cash awards, recruitment bonuses, and retention bonuses may not be considered as basic pay for any purpose.

(g) TRAVEL ALLOWANCES.—Each alternative personnel management system shall provide for payment of reasonable travel expenses of—

(1) a new appointee for a position covered by such system to the same extent as is provided for a new appointee to the Senior Executive Service under section 5723(a)(1)(B) of title 5, United States Code; and

(2) a candidate for appointment to a position covered by such system, and the candidate's spouse (if any), in connection with an employment interview.

(h) APPLICATION AND APPOINTMENT PROCEDURES.—Each alternative personnel management system implemented at an agency laboratory shall include procedures—

(1) for a candidate for appointment to a position covered by such system to submit an application directly to the head of the laboratory; and

(2) consistent with sections 2301 and 3309 of title 5, United States Code, for appointment and assignment of a person directly to such a position at such laboratory.

(i) PERFORMANCE EVALUATIONS.—Each alternative personnel management system shall provide procedures for evaluating the job performance of employees covered by the system.

(j) LIMITATIONS ON PROGRAM COSTS.—(1) The total amount of the personnel costs incurred by the Federal Government for employees in positions covered by an alternative personnel management system under a demonstration program conducted under this section may not exceed the total amount of the personnel costs that, except for the implementation of such alternative personnel management system, would have been incurred by the Federal Government for such employees.

(2) The total amount paid an employee as basic pay, differential pay, recruitment bonuses, retention bonuses, and performance awards under an alternative personnel management system under this section in any fiscal year may not exceed the rate of basic pay for level I of the Executive Schedule under section 5312 of title 5, United States Code, as in effect on the last day of such fiscal year.

(k) PROGRAM PLAN; PROJECT REVIEW.—(1) Before implementing a demonstration under this section, the head of the agency in which the program is conducted shall develop a plan for such program.

(2) The plan for a program shall—

(A) provide criteria for the evaluation of such program; and

(B) specify the total number of employee positions to be covered by the program when the program is fully implemented.

(3) The head of the agency shall submit the program plan to the Comptroller General of the United States at least 60 days before the program is implemented.

(4) Not later than one year after the implementation of a demonstration program, and on an annual basis thereafter during the period in which demonstration programs are conducted under this section, the Comptroller General shall review each demonstration program to determine whether the program meets the criteria specified in the program plan.

(5) The Comptroller General shall submit an annual report containing the results of the review to—

(A) the Committees on Armed Services and Governmental Affairs of the Senate;

(B) the Committees on Armed Services and Post Office and Civil Service of the House of Representatives; and

(C) the Secretary or agency head.

(l) DEFINITIONS.—In this section:

(1) The term "agency" has the meaning given the term "Executive agency" in section 105 of title 5, United States Code.

(2) The term "agency laboratory" means a Federal Government laboratory of an agency.

(3) The term "Federal Government laboratory" means a government-owned, government-operated laboratory within an agency.

(4) The term "employee" has the meaning given such term in section 2105 of title 5, United States Code.

(m) TERMINATION DATE.—Each demonstration program conducted pursuant to this section shall terminate not later than 10 years after the date on which such program begins.

PART D—NATIONAL DEFENSE STOCKPILE

SEC. 841. NATIONAL DEFENSE STOCKPILE ACQUISITION AND DISPOSAL AUTHORITY FOR FISCAL YEAR 1991 AND TRANSFER OF FUNDS

(a) ACQUISITION AND DISPOSAL AUTHORITY.—(1) Section 3303 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1686) is amended—

(A) in subsection (a)—

(i) by striking out "During each of fiscal years 1990 and 1991, the" and inserting "The" in lieu thereof; and

(ii) by inserting "during fiscal year 1990, and $120,000,000 during fiscal year 1991," after "$180,000,000"; and

(B) in subsection (b), by striking out "amount" and inserting in lieu thereof "amounts".

(2) Section 3302(d) of such Act is amended—

(A) by striking out "FISCAL YEARS 1990 AND 1991.—" and inserting in lieu thereof "FISCAL YEAR 1990.—";

(B) by striking out "each of the fiscal years 1990 and 1991" and inserting in lieu thereof "fiscal year 1990"; and

(C) by striking out "each such fiscal year" and inserting in lieu thereof "such fiscal year".

(b) TRANSFER OF FUNDS.—The Secretary of Defense shall, subject to such limitations as may be provided in appropriations Acts, transfer $100,000,000 from the unobligated balance of the National Defense Stockpile Transaction Fund to the account established under section 2371(e) of title 10, United States Code.

SEC. 842. NATIONAL DEFENSE STOCKPILE TRANSACTION FUND

Paragraph (2) of section 9(b) of the Strategic and Critical Materials Stock Piling Act

(50 U.S.C. 98h) is amended by adding at the end the following new subparagraph:

"(G) Managing and maintaining the stockpile materials.".

PART E—MISCELLANEOUS

SEC. 851. EXPANSION OF SCOPE OF REQUIREMENTS RELATING TO DEFENSE MEMORANDA OF UNDERSTANDING AND RELATED AGREEMENTS

Section 2504(a) of title 10, United States Code, is amended by inserting "or to the reciprocal procurement of defense items," after "defense equipment," in the matter above clause (1).

SEC. 852. COOPERATION WITH JAPAN ON TECHNOLOGICAL RESEARCH AND DEVELOPMENT

(a) FINDINGS.—Congress makes the following findings:

(1) Japan has developed highly sophisticated research and manufacturing capabilities.

(2) Those capabilities have produced technologies that can be usefully applied to the development and manufacture of both commercial products and defense equipment.

(3) The availability of those technologies to the United States would greatly enhance the development and manufacture of defense equipment for the Armed Forces of the United States.

(4) Since the exchange of notes between the United States and Japan on the transfer of Japanese military technologies in 1983, the level and quality of technological cooperation between the two countries have been unsatisfactory.

(5) Effective cooperation in technology research and development between the United States and Japan would enhance the security of both countries.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States and Japan should strengthen their cooperation with regard to technology that would contribute to the security of both countries;

(2) technological cooperation between the two countries should be based upon an equitable and mutual sharing of the costs and benefits of that cooperation; and

(3) the Secretary of Defense should improve the staffing, funding, and organization of those activities within the Department of Defense responsible for implementing and overseeing technological cooperation with Japan.

(c) COOPERATION ON RESEARCH AND DEVELOPMENT.—In light of the expressions in subsections (a) and (b), Congress urges and requests the President and directs the Secretary of Defense to pursue vigorously opportunities for the United States and Japan to cooperate in the development of technologies that benefit the security of both countries, particularly those technologies that have both commercial and military applications, commonly referred to as "dual-use" technologies.

(d) COOPERATIVE RESEARCH AND DEVELOPMENT PROJECTS.—(1) Subject to paragraphs (2) and (3), of the funds authorized to be appropriated pursuant to section 201 for basic research, exploratory development, and advanced technology, $10,000,000 shall be available for research and development projects conducted jointly by the United States and Japan, pursuant to a memorandum of understanding or other formal agreement, for the purpose of—

(A) developing new conventional defense equipment; or

(B) modifying existing defense equipment to meet United States defense requirements.

(2)(A) Funds made available for research and development projects under paragraph (1) may be obligated and expended for a particular research project only if the Secretary of Defense determines that—

(i) the particular project will improve, through the application of emerging technology, the conventional defense capabilities of the United States and Japan; and

(ii) the applicable memorandum of understanding or other formal agreement provides for the sharing of costs on an equitable basis.

(B) The Secretary may delegate the performance of the responsibility to make determinations under subparagraph (A) only to the Deputy Secretary of Defense or the Under Secretary of Defense for Acquisition.

(3) None of the funds made available for research and development projects under paragraph (1) may be used for research and development under the Strategic Defense Initiative.

(e) STAFFING.—The Secretary of Defense is urged to increase the number of personnel assigned to the Office of the Deputy Under Secretary of Defense (International Programs) for the specific purpose of providing oversight of the joint research and development projects of the United States and Japan for which funds are made available under subsection (d).

SEC. 853. ADVISORY COMMISSION ON CONSOLIDATION AND CONVERSION OF DEFENSE RESEARCH AND DEVELOPMENT LABORATORIES

(a) ESTABLISHMENT.—There is established a commission to be known as the "Commission on the Consolidation and Conversion of Defense Research and Development Laboratories" (hereafter in this section referred to as the "Commission").

(b) DUTIES.—(1) The Commission shall conduct a study to determine the feasibility and desirability of various means to improve the operation of laboratories of the Department of Defense.

(2) In conducting the study described in this subsection, the Commission shall—

(A) consider such means as—

(i) conversion of some or all such laboratories to Government-owned, contractor-operated laboratories;

(ii) modification of the missions and functions of some or all such laboratories; and

(iii) consolidation or closure of some or all such laboratories; and

(B) determine—

(i) the short-term costs and long-term cost savings that are likely to result from such consolidation, closure, or conversion; and

(ii) a proposed schedule for each consolidation, closure, or conversion of a laboratory considered appropriate by the Commission.

(c) COMPOSITION.—(1) The Commission shall be composed of 13 members, as follows:

(A) The Director of Defense Research and Engineering who shall be the chairman of the Commission.

(B) Six members appointed by the Secretary of Defense from among officers and employees of the Federal Government, including at least one director of a research and development laboratory of each military department.

(C) Six members appointed by the Secretary from among persons in the private sector.

(2) The Secretary of Defense shall make all appointments under subparagraphs (B) and (C) of paragraph (1) within 60 days after the date of the enactment of this Act.

(3) Members shall be appointed for the life of the Commission. Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner as the original appointment.

(d) MEETINGS; QUORUM.—(1) The Commission shall convene its first meeting within 15 days after the first date on which all members of the Commission have been appointed. Thereafter, the Commission shall meet at the discretion of its Chairman or at the call of a majority of its members.

(2) Seven members of the Commission shall constitute a quorum, but a lesser number may hold hearings.

(e) COMPENSATION OF MEMBERS; TRAVEL EXPENSES.—(1) Each member of the Commission who is not an officer or employee of the Federal Government shall be compensated at a rate equal to the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day (including travel time) during which such member is engaged in the performance of the duties of the Commission. All members of the Commission who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

(2) The members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in the performance of services for the Commission.

(3) Any Federal Government employee may be detailed to the Commission without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

(f) REPORT TO SECRETARY.—Not later than September 30, 1991, the Commission shall submit to the Secretary a report containing the Commission's recommendations regarding the matters considered and determined by the Commission pursuant to subsection (b).

(g) REPORT BY SECRETARY.—Not later than 30 days after the date of the submission of the report pursuant to subsection (f), the Secretary shall transmit such report to each House of the Congress, together with any comments that the Secretary considers appropriate.

(h) TERMINATION.—The Commission shall terminate 90 days after the date on which the Commission submits its report to the Secretary pursuant to subsection (g).

SEC. 854. NATIONAL DEFENSE SCIENCE AND ENGINEERING EDUCATION

(a) IN GENERAL.—(1) Chapter 111 of title 10, United States Code, is amended by adding at the end the following:

"§ 2192. Science, mathematics, and engineering education

"(a) The Secretary of Defense shall, on a continuing basis—

"(1) identify actions which the Department of Defense can take to increase the capabilities of educational institutions in the United States to improve education in the scientific, mathematics, and engineering skills necessary to meet the long-term national defense needs of the United States for personnel proficient in such skills; and

"(2) establish and conduct programs to carry out such actions.

"(b) The Secretary shall designate an individual within the Office of the Secretary of Defense to advise the Secretary regarding matters relating to science, mathematics, and engineering education and training and to assist the Secretary in carrying out the responsibilities of the Secretary under subsection (a), including the following:

"(1) Administering science or engineering grant programs established in the Department of Defense.

"(2) Collecting and disseminating information on Department of Defense programs which encourage the study of science, mathematics, and engineering and on Department of Defense programs which enhance the scientific, mathematics, and engineering skills of personnel in the scientific and engineering workforce.

"(3) Coordinating and overseeing all Department of Defense activities associated with science, mathematics, and engineering education and training.

"(4) Establishing programs for the encouragement of science, mathematics, and engineering education and training at all levels of education.

"§ 2193. Science and mathematics education improvement programs

"(a) The Secretary of Defense shall establish not less than two programs for awarding grants to public colleges or universities in the United States for the purpose of improving undergraduate or graduate education in scientific disciplines critical to the national security functions of the Department of Defense. In awarding grants under this subsection, the Secretary shall give priority to educational programs and projects intended to stimulate the interest of women and members of minority groups in pursuing scientific and engineering careers.

"(b) The Secretary of Defense shall establish not less than two programs for the purpose of improving the mathematics and scientific knowledge and skills of elementary and secondary school teachers and students.

"§ 2194. Education partnerships

"(a) Each defense laboratory director shall, to the extent practicable, enter into one or more education partnership agreements with public school systems, colleges, and universities in the United States for the purpose of encouraging and enhancing study in scientific disciplines at all levels of education.

"(b) Under a partnership agreement entered into with an educational institution under this section, a defense laboratory director may provide assistance to the educational institution by—

"(1) loaning equipment to the institution;

"(2) transferring to the institution equipment determined by the director to be obsolete;

"(3) making laboratory personnel available to teach science courses or to assist in the development of science courses and materials for the institution;

"(4) involving faculty and students of the institution in defense laboratory research projects;

"(5) cooperating with the institution in developing a program under which students are given academic credit for work on defense laboratory research projects; and

"(6) providing academic and career advice and assistance to students of the institution.

"(c) Each director of a defense laboratory shall give a priority under this section to entering into an education partnership agreement with one or more historically Black colleges and universities and other minority institutions referred to in paragraphs (3), (4), and (5) of section 312(b) of the Higher Education Act of 1965 (20 U.S.C. 1058(b)).

"(d) In entering into education partnership agreements with public school systems under this section, each director of a defense laboratory shall give a priority to providing assistance to educational institutions serving women, members of minority groups, and other groups of individuals who traditionally are involved in the engineering and science professions in disproportionately low numbers.

"§ 2195. Department of Defense cooperative education programs

"(a) The director of each defense laboratory may establish, in association with one or more public or private colleges or universities in the United States, cooperative work-education programs for undergraduate and graduate students.

"(b) Under a cooperative work-education program established under subsection (a), a director referred to in that subsection may, without regard to any applicable non-statutory limitation on the number of authorized personnel or on the aggregate amount of any personnel cost—

"(1) make an offer for participation in the cooperative work-education program directly to a student and appoint such student to an entry-level position of employment in the laboratory of such director;

"(2) pay such person a rate of basic pay, not to exceed the maximum rate of pay provided for grade GS-9 under the General Schedule under section 5332 of title 5, that is competitive with compensation levels provided for entry-level positions in similar industry-sponsored cooperative work-education programs; and

"(3) pay all travel expenses between the college or university in which the student is enrolled and the laboratory concerned for not more than six round trips per year.

"§ 2196. Definition

"In this chapter, 'defense laboratory' means a laboratory operated by the Department of Defense, a contractor-operated laboratory of the Department of Energy engaged in national defense programs of such department, and any other federally funded research and development center engaged in research and development in support of national defense programs.".

(2) The heading of such chapter is amended to read as follows:

"CHAPTER 111—SUPPORT OF SCIENCE, MATHEMATICS, AND ENGINEERING EDUCATION".

(3)(A) The tables of chapters at the beginning of subtitle A of title 10, United States Code, and at the beginning of part III of such subtitle are each amended by striking out the item relating to chapter 111 and inserting in lieu thereof the following:

"111. Support of Science, Mathematics, and Engineering Education..... 2191".

(B) The table of sections at the beginning of such chapter is amended by adding at the end the following:

"2192. Science, mathematics, and engineering education.
"2193. Science and mathematics education improvement programs.
"2194. Education partnerships.
"2195. Department of Defense cooperative education programs.
"2196. Definition.".

(b) ESTABLISHMENT OF GRANT PROGRAMS.—The Secretary may satisfy the requirement to establish a grant program under section 2193(a) of title 10, United States Code, as added by subsection (a), by designating as a grant program under that section any existing grant program of the Department of Defense established for making grants to public colleges or universities in the United States for the purpose set out in that section.

(c) DEPARTMENT OF ENERGY PROGRAMS.—The Secretary of Energy may establish programs and award grants for the purpose of enhancing the mathematics, science, and engineering education of students in elementary and secondary schools and institutions of higher education.

SEC. 855. SUSPENSION OF PAYMENTS

(a) IN GENERAL.—Section 2307 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(f) In any case in which the head of an agency determines that there is substantial evidence that the request of a contractor for advance, partial, progress, or other payment under a contract awarded by that agency head is fraudulent, the agency head may suspend further payments under the contract unless the suspension would unduly interfere with or jeopardize a law enforcement investigation.".

(b) INFORMATION FROM CONTRACTOR.—Subsection (e)(1) of such section is amended by adding at the end the following new sentence: "The contractor shall provide such information and evidence as the Secretary of Defense determines sufficient to permit the Secretary to carry out the preceding sentence.".

(c) EFFECTIVE DATE.—Section 2307(f) of title 10, United States Code, and the second sentence of section 2307(e)(1) of such title, as added by subsections (a) and (b), respectively, shall apply with respect to contracts in effect on the date of the enactment of this Act and contracts entered into on and after that date.

SEC. 856. ESTABLISHMENT OF DARPA OFFICE IN JAPAN

(a) IN GENERAL.—The Secretary of Defense shall establish a branch office of the Defense Advance Research Projects Agency (DARPA) of the Department of Defense in Japan.

(b) FUNCTION OF BRANCH OFFICE.—It shall be the function of the branch office established pursuant to subsection (a)—

(1) to investigate and evaluate opportunities for cooperation between the United States and Japan for the development of technologies of interest to the Defense Advanced Research Projects Agency (DARPA); and

(2) to make such recommendations to the Director of the Defense Advanced Research Projects Agency as the branch office considers appropriate regarding the desirability of DARPA entering into a cooperative arrangement with Japan with respect to the development of particular technologies.

SEC. 857. PAYMENT OF MASS TRANSIT COSTS OF EMPLOYEES UNDER CERTAIN GOVERNMENT CONTRACTS

(a) IN GENERAL.—No later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall issue a regulation to provide that mass transit costs incurred by contractor employees in commuting to a place of performance of a contract for the Department of Defense may be treated in the same manner as parking costs of contractor employees are treated under such contract, to the extent that the Secre-

tary deems appropriate, and consistent with otherwise applicable cost principles.

(b) MASS TRANSIT COSTS.—The mass transit costs referred to under subsection (a) may include the cost of transit tokens, farecards, or other access devices for an employee commuting on mass transit.

(c) LIMITATION.—The mass transit costs payable to or for an employee under any contract described under subsection (a) may not exceed the parking costs which would be payable to or for an employee under such contract.

SEC. 858. MENTOR-PROTEGE PILOT PROGRAM

(a) ESTABLISHMENT OF PILOT PROGRAM.—The Secretary of Defense shall establish a pilot program to be known as the "Mentor-Protege Pilot Program".

(b) PURPOSE.—The purpose of the pilot program is to provide incentives for major Department of Defense contractors to furnish disadvantaged small business concerns with assistance designed to enhance the capabilities of disadvantaged small business concerns to perform as subcontractors and suppliers under Department of Defense contracts in order to increase the participation of such business concerns as subcontractors and suppliers in Department of Defense contract business.

(c) PROGRAM PARTICIPANTS.—(1) A business concern meeting the eligibility requirements set out in subsection (d) may enter into agreements under subsection (e) and furnish assistance to disadvantaged small business concerns under the pilot program pursuant to such agreement upon making application to the Secretary of Defense and being approved for participation in the pilot program by the Secretary. A business concern approved for participation pursuant to this paragraph shall be known, for the purposes of the pilot program, as a "mentor firm".

(2) A disadvantaged small business concern may obtain assistance from a mentor firm under the program upon entering into an agreement with the mentor firm as provided in subsection (e). A disadvantaged small business concern receiving such assistance shall be known, for the purposes of the program, as a "protege firm".

(3) In entering into an agreement pursuant to subsection (e), a mentor firm may rely in good faith on a written representation of a business concern that such business concern is a disadvantaged small business concern. The Small Business Administration shall determine the status of such business concern as a disadvantaged small business concern in the event of a protest regarding the status of such business concern. If the business concern is determined by the Small Business Administration not to be a disadvantaged small business concern, assistance furnished such business concern by the mentor firm after the date of the determination may not be considered assistance furnished under the pilot program.

(4) It is not necessary for a disadvantaged small business concern to obtain the approval of the Secretary of Defense before receiving assistance as a protege firm under the pilot program. However, the Secretary may disapprove the participation of a disadvantaged small business concern in the program on the basis of criteria which the Secretary shall specify in the regulations prescribed pursuant to subsection (k). If the Secretary disapproves the participation of a disadvantaged small business concern in the program, he shall transmit a written notification of such disapproval to the disadvantaged small business concern and the mentor firm furnishing the assistance. Assistance furnished that disadvantaged small business concern by the mentor firm after the mentor firm receives such notification may not be considered as assistance furnished under the pilot program.

(d) MENTOR FIRM ELIGIBILITY.—A business concern generally eligible for award of contracts by the Department of Defense is eligible to enter into an agreement with a protege firm under subsection (e) and to furnish assistance under the pilot program pursuant to that agreement if, during the fiscal year preceding the fiscal year in which the business concern enters into the agreement, the total amount of the Department of Defense contracts awarded such business concern and the subcontracts awarded such business concern under Department of Defense contracts was equal to or greater than—

(1) $100,000,000; or

(2) such lesser amount as the Secretary specifies in the regulations prescribed pursuant to subsection (k) for application to any business concern which is a disadvantaged small business concern or, except for the size of that business concern, would be a disadvantaged small business concern.

(e) MENTOR-PROTEGE AGREEMENT.—(1) Before furnishing assistance to a protege firm under the pilot program, a mentor firm shall enter into a mentor-protege agreement with the protege firm regarding the assistance to be furnished by the mentor firm to the protege firm. The agreement shall include the following:

(A) A program of assistance that is designed to develop the capabilities of the protege firm to perform as a subcontractor or supplier under Department of Defense contracts.

(B) The period, not to exceed four years, during which the mentor firm is to furnish assistance to the protege firm under the agreement.

(C) Procedures for the mentor firm or protege firm to terminate the agreement voluntarily and for the mentor firm to terminate the agreement for cause.

(2) A mentor-protege agreement under this subsection may cover more than one protege firm.

(f) FORMS OF ASSISTANCE.—A mentor firm may furnish the following assistance to a protege firm:

(1) Assistance, by using mentor firm personnel or other means, in—

(A) general business management, including organizational management, financial management, and personnel management, marketing, and overall business planning;

(B) engineering and technical matters such as production, inventory control, and quality assurance; and

(C) any other assistance designed to develop the capabilities referred to in subsection (e)(1)(A).

(2) Noncompetitive award of subcontracts under Department of Defense contracts to the protege firm.

(3) Payment of progress payments for performance of the protege firm under such a subcontract in amounts as provided for in the subcontract, but in no event may any such progress payment exceed 100 percent of the costs incurred by the protege firm for the performance.

(4) Advance payments under such a subcontract.

(5) Loans.

(6) Cash in exchange for an ownership interest in the protege firm, not to exceed 10 percent of the total ownership interest.

(7) Assistance obtained by the mentor firm for the protege firm from one or more of the small business development centers established pursuant to section 21 of the Small Business Act (15 U.S.C. 648), acting to the maximum extent practicable in cooperation with a historically Black college or university or a minority institution of higher education.

(g) INCENTIVES FOR MENTOR FIRMS.—(1) The Secretary of Defense shall provide for the reimbursement of, a mentor firm for the total amount of any progress payment or advance payment made under the pilot program by the mentor firm to a protege firm in connection with a Department of Defense contract awarded the mentor firm.

(2) The Secretary of Defense shall provide for the reimbursement of, a mentor firm for the costs of furnishing assistance referred to in paragraphs (1) and (7) of subsection (f) to a protege firm. The Secretary shall ensure that payment of reimbursements under this paragraph is provided for in a Department of Defense contract awarded to the mentor firm or in another agreement entered into by the Secretary and the mentor firm. The contract or other agreement shall specify the maximum amount of the reimbursement that may be made. The Secretary and the mentor firm may provide in the contract or other agreement for allocation of the costs to Department of Defense cost-reimbursement contracts awarded the mentor firm.

(3)(A) Any costs incurred by a mentor firm in furnishing assistance to a protege firm that are not reimbursed pursuant to paragraph (2) shall be counted in the amount for which the mentor firm receives credit for purposes of determining whether the mentor firm attains a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract.

(B) The amount of the credit given a mentor firm for any such unreimbursed costs shall be equal to—

(i) four times the total amount of such costs attributable to assistance described in subsection (f)(7);

(ii) three times the total amount of such costs attributable to assistance furnished by the mentor firm's employees; and

(iii) two times the total amount of any other such costs.

(C) The amount of the credit given for any such unreimbursed costs may not exceed a maximum amount which shall be specified in the contract provision or agreement referred to in paragraph (2).

(4) The Secretary of Defense shall ensure that each Department of Defense contract awarded a mentor firm includes a provision for payment of an incentive or award fee to the mentor firm if the mentor firm exceeds the subcontracting participation goal, if any, applicable to such mentor firm under the contract.

(5) A mentor firm shall receive credit toward the attainment of a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract for each subcontract for a product or service awarded under such contract by a mentor firm to a business concern that, except for its size, would be a small business concern owned and controlled by socially and economically disadvantaged individuals, but only if—

(A) the size of such business concern is not more than two times the maximum size specified by the Administrator of the Small Business Administration for purposes of determining whether a business concern fur-

nishing such product or service is a small business concern; and

(B) the business concern formerly had a mentor-protege agreement with such mentor firm that was not terminated for cause.

(6) Notwithstanding subsection (j), a mentor firm shall receive credit toward the attainment of a subcontracting participation goal applicable to such mentor firm under a Department of Defense contract for any subcontract that the mentor firm awards under that contract to a business concern referred to in paragraph (5) within 9 years after the date on which the mentor firm and such business concern entered into the mentor-protege agreement referred to in clause (B) of such paragraph.

(h) NONAFFILIATION TREATMENT.—For purposes of the Small Business Act, a protege firm may not be considered an affiliate of a mentor firm solely on the basis that the protege firm is receiving assistance referred to in subsection (f) from such mentor firm under the pilot program.

(i) PARTICIPATION IN PILOT PROGRAM NOT TO BE A CONDITION FOR AWARD OF A CONTRACT OR SUBCONTRACT.—A mentor firm may not require a business concern to enter into an agreement with the mentor firm pursuant to subsection (e) as a condition for being awarded a contract by the mentor firm, including a subcontract under a contract awarded to the mentor firm.

(j) DURATION OF PILOT PROGRAM.—The Secretary of Defense shall conduct the Mentor-Protege Pilot Program during the period beginning on October 1, 1991, and ending on September 30, 1995.

(k) REGULATIONS.—The Secretary of Defense shall prescribe regulations to carry out the pilot program. The Secretary shall publish the proposed regulations not later than the earlier of April 1, 1991, or the date 180 days after the date of the enactment of this Act. The Secretary shall promulgate the final regulations not later than June 1, 1991, or the date 270 days after the date of the enactment of this Act.

(l) DEFINITIONS.—In this section:

(1) The term "small business concern" means a business concern that meets the requirements of section 3(a) of the Small Business Act (15 U.S.C. 632(a)) and the regulations promulgated pursuant thereto.

(2) The term "disadvantaged small business concern" means a small business concern owned and controlled by socially and economically disadvantaged individuals.

(3) The term "small business concern owned and controlled by socially and economically disadvantaged individuals" has the meaning given such term in section 8(d)(3)(C) of the Small Business Act (15 U.S.C. 637(d)(3)(C)).

(4) The term "historically Black college and university" means any of the historically Black colleges and universities referred to in section 1207(a)(2) of the Department of Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note).

(5) The term "minority institution of higher education" means an institution of higher education with a student body that reflects the composition specified in section 312(b) (3), (4), and (5) of the Higher Education Act of 1965 (20 U.S.C. 1058(b) (3), (4), and (5)).

(6) The term "subcontracting participation goal", with respect to a Department of Defense contract, means a goal for the extent of the participation by disadvantaged small business concerns in the subcontracts awarded under such contract, as established pursuant to section 1207 of the Department of Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note) and section 8(d) of the Small Business Act (15 U.S.C. 637(d)).

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT MATTER

PART A—FORCE STRUCTURE

SEC. 901. REDUCTION IN END STRENGTH FOR MILITARY PERSONNEL ASSIGNED TO DUTY IN EUROPE

(a) IN GENERAL.—Section 911(a) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (22 U.S.C. 1928 note) is amended by striking out "311,855" and inserting in lieu thereof "261,855.".

(b) WAIVER AUTHORITY.—(1) Subject to paragraph (2), the President may waive the ceiling imposed as a result of the amendment made by subsection (a) if the President (1) determines that the national security interests of the United States require such action, and (2) notifies Congress of that determination and of the necessity for exercising the waiver authority.

(2) Except as provided in section 1002(f) of the Department of Defense Authorization Act, 1985 (22 U.S.C. 1928 note), the end strength level of members of the Armed Forces of the United States assigned to permanent duty ashore in European member nations of the North Atlantic Treaty Organization after September 30, 1991, may not, by virtue of a waiver exercised under paragraph (1), exceed 311,855.

SEC. 902. TWENTY PERCENT REDUCTION IN DEFENSE ACQUISITION WORKFORCE

(a) REDUCTION REQUIRED.—The Secretary of Defense shall take such action as is necessary to reduce the number of employees in the Department of Defense acquisition workforce on the last day of each of fiscal years 1991 through 1995 below the number of employees in such workforce on the last day of the preceding fiscal year by not less than the number equal to 4 percent of the number of the employees in such workforce on September 30, 1990.

(b) DEFINITION.—In this section, the term "Department of Defense acquisition workforce" means all positions included in the description of the acquisition workforce in Appendix A of "Defense Management", a report of the Secretary of Defense to the President, dated July 1989.

SEC. 903. REDUCTION IN PERSONNEL ASSIGNED TO MANAGEMENT HEADQUARTERS ACTIVITIES AND HEADQUARTERS SUPPORT ACTIVITIES

(a) REDUCTION REQUIRED.—The Secretary of Defense shall take such action as is necessary to reduce the number of members of the Armed Forces and civilian employees who are assigned or detailed to duty in the management headquarters activities and headquarters support activities of the Department of Defense on the last day of each of the fiscal years 1991 through 1995 below the number of such personnel assigned or detailed to such duty on the last day of the preceding fiscal year by not less than the number equal to 4 percent of the number of such personnel assigned or detailed to such duty on September 30, 1990.

(b) DEFINITION.—For purposes of this section, the terms "management headquarters activities" and "headquarters support activities" have the meaning given those terms in Department of Defense Directive 5100.73, entitled "Department of Defense Management Headquarters and Headquarters Support Activities" dated November 25, 1988.

SEC. 904. INTELLIGENCE PRIORITIES AND REORGANIZATION

(a) REVISION OF PRIORITIES AND CONSOLIDATION OF FUNCTIONS.—The Secretary of Defense, together with the Director of Central Intelligence, shall conduct a joint review of all intelligence and intelligence-related activities in the Tactical Intelligence and Related Activities (TIARA) programs and the National Foreign Intelligence Program (NFIP) and take the following actions with respect to such programs:

(1) Where redundancy or fragmentation exists, consolidate functions, programs, organizations, and operations to improve the efficiency and effectiveness of the conduct of such intelligence activities or programs.

(2) Revise intelligence collection and analysis priorities and resource allocations to reflect changes in the international security environment.

(3) Strengthen joint intelligence functions, operations, and organizations.

(4) Improve the quality and independence of intelligence support to the weapons acquisition process.

(5) Improve the responsiveness and utility of national intelligence systems and organizations to the needs of the combatant commanders.

(b) PERSONNEL REDUCTIONS.—(1) The number of personnel assigned or detailed to the NFIP programs and related TIARA programs shall be reduced by not less than 5 percent of the number of such personnel described in paragraph (2) during each of fiscal years 1992 through 1996.

(2) The number of personnel referred to in paragraph (1) is the number of personnel assigned to such programs on September 30, 1990.

SEC. 905. ADDITIONAL FUNDING FOR UNIFIED AND SPECIFIED COMBATANT COMMANDS FOR FISCAL YEAR 1991

(a) IN GENERAL.—(1) There is established for fiscal year 1991 a special account to be managed by the Chairman of the Joint Chiefs of Staff. The Chairman may use the special account to provide funds, upon request, to commanders of the unified combatant commands, the specified combatant commands, and the Commander, United States Element, North American Aerospace Defense Command for any of the following activities:

(A) Joint exercises (including foreign country participation).

(B) Force training.

(C) Contingencies.

(D) Selected operations.

(E) Command and control.

(F) Military education and training to military and related civilian personnel of foreign countries.

(G) Personnel expenses of defense personnel for bilateral or regional cooperation programs.

(H) Defense articles and services.

(2) Any amount provided by the Chairman out of the special account for an activity referred to in paragraph (1) shall be in addition to any amounts otherwise authorized for such activity for fiscal year 1991.

(b) AMOUNT AND SOURCE OF FUNDS.—Of the amount authorized to be appropriated pursuant to section 301(a) for the Defense Agencies, $20,000,000 shall be credited to the special account referred to in subsection (a).

(c) LIMITATIONS.—(1) Not more than $3,000,000 of the amount provided in the special account may be used for procurement purposes and not more than $500,000 may be used in carrying out any single activ-

ity for which funds are requested by a commander and provided under this section.

(2) Funds may not be provided under this section for any activity that has been denied authorization by Congress.

PART B—GENERAL MANAGEMENT MATTERS

SEC. 911. STUDY AND PLAN REGARDING MOBILITY REQUIREMENTS

(a) STUDY AND PLAN REQUIRED.—The Secretary of Defense shall conduct a study to determine mobility requirements for the Armed Forces and develop an integrated plan to meet those requirements.

(b) REPORT REQUIRED.—Not later than March 31, 1991, the Secretary shall submit to the congressional defense committees a report containing the results of the study and a copy of the plan. The report shall be in the same format and cover the same matters as the report submitted to Congress under section 203(b) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1080).

(c) CONTENT OF REPORT.—(1) The report shall include an analysis of the total mix of airlift, sealift, amphibious lift, and prepositioned war materials necessary for the United States to respond to contingent threats against the national security interests of the United States during the remainder of the current decade and beyond. The analysis may not be limited to consideration of a single requirement for lift and materials based upon the most demanding case, but shall include an assessment of a range of requirements for lift and materials based upon various military contingencies. The analysis shall also include—

(A) an assessment of both intratheater and intertheater lift requirements; and

(B) an assessment of the total requirements for mobility, including support equipment and the equipment necessary for strategic mobility at unimproved ports, airfields, and other facilities.

(2) The report shall also include the following:

(A) An assessment of how requirements for airlift, sealift, amphibious lift, and prepositioned war materials have been affected by changing circumstances in Europe and elsewhere, including—

(i) an increase in the opportunities to detect any planned attack by the Soviet Union;

(ii) an increase in the time likely to be available to prepare for such an attack after detection;

(iii) a reduced level of Soviet threat to the national security interests of the United States;

(iv) the decreasing level of Armed Forces personnel deployed overseas;

(v) the changing threat in Northeast Asia; and

(vi) the changing threat in Southwest Asia.

(B) An assessment of how such requirements are being affected by the changing need for global power projection in low-intensity and medium-intensity conflicts.

(C) An assessment of how such requirements would be affected by the loss of United States military bases, and the loss of access to other military bases, in such overseas locations as the Philippines.

(D) An assessment of how the reduced reliance expected to be placed by the Armed Forces on NATO and other allied shipping and military bases for employment of the Armed Forces unilaterally in contingent actions affects the requirements for airlift, sealift, amphibious lift, and prepositioned war materials.

(E) An assessment of whether increased dependence should be placed upon sealift capabilities in view of the factors assessed pursuant to subparagraphs (A) through (D) and the potential benefits of sealift vessels which might be developed that would be faster than the sealift vessels currently available from commercial sources.

(F) A discussion of initiatives that can be undertaken to reduce the time required to move forces and material from home bases to combat areas, including measures that can be undertaken to reduce (i) the time necessary for loading and unloading personnel and equipment at airports and seaports, (ii) the time necessary for moving ground forces to airports and seaports, and (iii) the delivery times from points of debarkation to final destinations.

SEC. 912. ELIMINATION OF STATUTORY POSITION OF CHIEF OF NAVAL RESEARCH

Chapter 503 of title 10, United States Code, is amended—

(1) by striking out section 5021;

(2) in section 5022—

(A) by redesignating subsections (a), (b) and (c) as subsections (b), (c) and (d), respectively; and

(B) by inserting immediately after the section heading the following new subsection (a):

"(a) There is in the Office of the Secretary of the Navy an Office of Naval Research."; and

(3) in the table of sections at the beginning of such chapter, by striking out the item relating to section 5021.

TITLE X—STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

SEC. 1001. STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

(a) PROGRAM REQUIRED.—(1) Title 10, United States Code, is amended by inserting after chapter 171 the following new chapter:

"CHAPTER 172—STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

"Sec.
"2901. Strategic Environmental Research Program.
"2902. Joint Strategic Environmental Research Program Council.
"2903. Executive Director.
"2904. Strategic Environmental Research Program Scientific Advisory Board.

"§ 2901. Strategic Environmental Research Program

"(a) The Secretary of Defense shall establish a program to be known as the 'Strategic Environmental Research Program'.

"(b) The purposes of the program are as follows:

"(1) To address environmental matters of concern to the Department of Defense and the Department of Energy through support for basic and applied research and development of technologies that can enhance the capabilities of those departments to meet their environmental obligations.

"(2) To identify research, technologies, and other information developed by the Department of Defense and the Department of Energy for national defense purposes that would be useful to governmental and private organizations involved in the development of energy technologies and of technologies to address environmental restoration, waste minimization, hazardous waste substitution, and other environmental concerns, and to share such research, technologies, and other information with such governmental and private organizations.

"(3) To furnish other governmental organizations and private organizations with data, enhanced data collection capabilities, and enhanced analytical capabilities for use by such organizations in the conduct of environmental research, including research concerning global environmental change.

"(4) To identify technologies developed by the private sector that are useful for Department of Defense and Department of Energy defense activities concerning energy conservation, environmental restoration, hazardous waste substitution, and waste minimization and to provide for the use of such technologies in the conduct of such activities.

"§ 2902. Joint Strategic Environmental Research Program Council

"(a) There is a Joint Strategic Environmental Research Program Council (hereafter in this chapter referred to as the 'Council').

"(b) The Council is composed of eight members as follows:

"(1) The Assistant Secretary of Defense responsible for matters relating to production and logistics.

"(2) The Director of Defense Research and Engineering.

"(3) The Vice Chairman of the Joint Chiefs of Staff.

"(4) The Assistant Secretary of the Air Force responsible for matters relating to space.

"(5) The Assistant Secretary of Energy responsible for matters relating to defense programs.

"(6) The Assistant Secretary of Energy responsible for matters relating to environmental restoration and waste management.

"(7) The Administrator of the Environmental Protection Agency, who shall be a non-voting member of the Council.

"(8) The Executive Director of the Council, who shall be a non-voting member.

"(c) The Secretary of Defense shall designate a member of the Council as chairman for each odd numbered fiscal year. The Secretary of Energy shall designate a member of the Council as chairman for each even numbered fiscal year.

"(d) The Council shall have the following responsibilities:

"(1) To prescribe policies and procedures to implement the Strategic Environmental Research Program.

"(2) To enter into contracts, grants, and other financial arrangements, in accordance with other applicable law, to carry out the purposes of the Strategic Environmental Research Program.

"(3) To prepare an annual five-year strategic environmental research plan that shall cover the fiscal year in which the plan is prepared and the four fiscal years following such fiscal year.

"(4) To promote the maximum exchange of information, and to minimize duplication, regarding environmentally related research and development activities through close coordination with the military departments and Defense Agencies, agencies within the Department of Energy, other departments and agencies of the Federal Government, State and local governments, and other organizations engaged in such activities.

"(5) To ensure that research and development activities under the Strategic Environmental Research Program do not duplicate other ongoing activities sponsored by the Department of Defense, the Department of Energy, or any other department or agency of the Federal Government.

"(e) In carrying out subsection (d)(1), the Council shall prescribe policies and procedures—

"(1) to provide access by Federal Government personnel, State and local government personnel, college and university personnel, industry personnel, and the general public to data under the control of or otherwise available to the Department of Defense or Department of Energy that is relevant to environmental matters by—

"(A) identifying the sources of such data;

"(B) publicizing the availability and sources of such data by appropriately targeted dissemination of publicity to such personnel and the general public and by other means; and

"(C) providing for review of classified data relevant to environmental matters with a view to declassifying or preparing unclassified summaries of such data;

"(2) to provide governmental and nongovernmental entities with analytic assistance, consistent with national defense missions, including access to military platforms for sensor deployment and access to computer capabilities, in order to facilitate environmental research;

"(3) to identify energy technologies developed for national defense purposes (including electricity generation systems, energy storage systems, alternative fuels, bio-mass energy technology, and applied materials technology) that might have environmentally sound, energy efficient applications for other programs of the Department of Defense and the national security programs of the Department of Energy, particularly technologies that have the potential for industrial, commercial, and other governmental applications, and to support programs of research in and development of such applications;

"(4) to identify and support programs of basic and applied research and development in technologies useful—

"(A) to facilitate environmental compliance, remediation, and restoration activities of the Department of Defense and the Department of Energy;

"(B) to minimize waste generation by such departments; or

"(C) to substitute use of nonhazardous, nontoxic, nonpolluting, and other environmentally sound materials and substances for use of hazardous, toxic, and polluting materials and substances by such departments;

"(5) to identify and support research, development, and application of other technologies developed for national defense purposes which, not only are directly useful for programs, projects, and activities of such departments, but also have useful applications for solutions to such national and international environmental problems as climate change and ozone depletion;

"(6) to encourage transfer of technologies referred to in clauses (2) through (5) to the private sector under the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) and other applicable laws;

"(7) to identify and plan for the demonstration and use of existing environmentally sound, energy efficient technologies developed by the private sector that could be used by the Department of Defense and the Department of Energy;

"(8) to identify military specifications that prevent or limit the use of environmentally beneficial technologies, materials, and substances in the performance of Department of Defense or Department of Energy contracts and recommend changes; and

"(9) to ensure that the research and development programs identified for support pursuant to the policies and procedures prescribed by the Council are closely coordinated with, and do not duplicate, ongoing activities sponsored by the Department of Defense, the Department of Energy, and other Federal agencies.

"(f) The Council shall be subject to the authority, direction, and control of—

"(1) the Secretary of Defense in prescribing policies and procedures under subsection (d)(1); and

"(2) the Secretary of Energy in prescribing the applicability of any such policies and procedures to the national security programs of the Department of Energy.

"(g)(1) Not later than February 1 of each year, the Council shall submit to the Secretary of Defense and the Secretary of Energy an annual report on the annual five-year strategic environmental research plan prepared pursuant to subsection (d)(3).

"(2) The report shall contain the following:

"(A) Actions to be taken during the five-year period covered by the plan to prevent duplication of research and development activities referred to in the policies and procedures prescribed pursuant to subsection (d)(1).

"(B) A description of each project selected or recommended by the Council for support and funding, including the duration of and total estimated or, if known, actual cost of—

"(i) each such project supported during the fiscal year in which the plan is submitted and the preceding fiscal year; and

"(ii) each such project proposed for funding during the fiscal year in which the annual report is submitted and the following four fiscal years.

"(C) The amounts requested, in the budget submitted to Congress pursuant to section 1105(a) of title 31 for the fiscal year following the fiscal year in which the annual report is submitted, for the programs, projects, and activities of the Strategic Environmental Research Program and the estimated expenditures under such programs, projects, and activities during such following fiscal year.

"(D) The amount made available, for the fiscal year in which the annual report is submitted, to each Department of Defense laboratory and Department of Energy laboratory.

"(E) The amount requested in the budget referred to in subparagraph (C) for each Department of Defense laboratory and Department of Energy laboratory.

"(F) Any changes in military specifications recommended by the Council, actions to be taken to effectuate any such recommended changes on an expedited basis, and the projected date for each such change.

"(G) A description of all contracts, agreements, or other documents for cooperative research and development activities entered into pursuant to the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) during the fiscal year preceding the fiscal year in which the annual report is submitted.

"(H) Plans for transferring technology and information to other governmental agencies and to nongovernmental organizations involved in environmental research and related matters.

"(I) Plans to increase access to data described in subsection (e)(1).

"(J) Such additional recommendations or proposals, including proposals for legislation, relating to the Strategic Environmental Research Program as the Council considers appropriate.

"(3) The Council shall make a draft of the five-year strategic environmental research plan covered by the report available for public comment for a period of at least 30 days.

"(4) Not later than March 15 of each year the Secretary of Defense shall transmit the annual report to the Committees on Armed Services and Appropriations of the Senate and House of Representatives. The Secretaries of Defense and Energy may submit such comments on the annual report as each Secretary considers appropriate.

"§ 2903. Executive Director

"(a)(1) There shall be an Executive Director of the Council appointed by the Secretary of Defense after consultation with the Secretary of Energy.

"(2) The position of Executive Director shall be a Senior Executive Service position.

"(b) Subject to the authority, direction, and control of the Secretary of Defense, the Executive Director is responsible for the management of the Strategic Environmental Research Program in accordance with the policies established by the Council.

"(c) The Executive Director may enter into contracts or other agreements in accordance with applicable law, except that the Executive Director shall first obtain the approval of the Council for any contract or agreement in an amount equal to or in excess of $500,000 or such lesser amount as the Council may prescribe.

"(d)(1) The Executive Director, with the concurrence of the Council and without regard to the provisions of title 5 governing appointments in the competitive service, may appoint such professional and clerical staff as may be necessary to carry out the responsibilities and policies of the Council.

"(2) The Executive Director, with the concurrence of the Council and without regard to the provisions of chapter 51 of title 5 and subchapter III of chapter 53 of such title, may establish the rates of basic pay for professional employees appointed pursuant to paragraph (1). No such rate of basic pay may exceed the rate of basic pay payable for GS-18 of the General Schedule under section 5332 of such title.

"§ 2904. Strategic Environmental Research Program Scientific Advisory Board

"(a) The Secretary of Defense and the Secretary of Energy shall jointly appoint a Strategic Environmental Research Program Scientific Advisory Board (hereafter in this section referred to as the 'Advisory Board') consisting of not less than 5 and not more than 12 members.

"(b)(1) Members of the Advisory Board shall be appointed from among persons eminent in the fields of basic sciences, engineering, ocean and environmental sciences, education, research management, international and security affairs, health physics, health sciences, or social sciences, with due regard given to the equitable representation of scientists and engineers who are women or who represent minority groups. At least one member of the Advisory Board shall be a representative of environmental public interest groups and one member shall be a representative of the interests of State governments.

"(2) The Secretary of Defense and the Secretary of Energy shall request—

"(A) the head of the National Academy of Sciences, in consultation with the head of the National Academy of Engineering and the head of the Institutes of Medicine of

the National Academy of Sciences, to nominate persons for appointment to the Advisory Board;

"(B) the Council on Environmental Quality to nominate for appointment to the Advisory Board at least one person who is representative of environmental public interest groups; and

"(C) the National Association of Governors to nominate for appointment to the Advisory Board at least one person who is representative of the interests of State governments.

"(3) Members of the Advisory Board shall be appointed for terms of three years.

"(c) A member of the Advisory Board who is not otherwise employed by the Federal Government shall not be considered to be a Federal employee, except for the purposes of chapter 81 of title 5 (relating to compensation for work-related injuries) and chapter 171 of title 28 (relating to tort claims).

"(d) The Advisory Board shall prescribe procedures for carrying out its responsibilities. Such procedures shall define a quorum as a majority of the members, provide for annual election of the Chairman by the members of the Advisory Board, and require at least three meetings of the Advisory Board each year.

"(e) Each member of the Advisory Board who is not an officer or employee of the Federal Government shall be paid the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 5 for each day (including travel time) during which such member is engaged in the performance of the duties of the Advisory Board. All members of the Advisory Board who are officers or employees of the United States shall serve without compensation in addition to that received for their services as officers or employees of the United States.

"(f) The members of the Advisory Board shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under subchapter I of chapter 57 of title 5 while away from their homes or regular places of business in the performance of services for the Advisory Board.

"(g) The Secretaries of Defense and Energy shall furnish the Advisory Board such personnel, equipment, office space, and other assistance as the Advisory Board determines necessary, in consultation with the Council, to carry out the Advisory Board's responsibilities.

"(h) The Council shall refer to the Advisory Board, and the Advisory Board shall review, each proposed project and each budget proposal for research in and development of technologies related to environmental activities in excess of $1,000,000. The Advisory Board shall make any recommendations to the Council that the Advisory Board considers appropriate regarding such project or proposal.

"(i) The Advisory Board may make recommendations to the Council regarding technologies, research, projects, programs, activities, and, if appropriate, funding within the scope of the Strategic Environmental Research Program.

"(j) The Advisory Board shall assist and advise the Council in identifying the environmental data and analytical assistance activities that should be covered by the policies and procedures prescribed pursuant to section 2902(d)(1) of this title.

"(k)(1) Each meeting of the Advisory Board shall be open to the public unless the Chairman determines that the meeting should be closed in the interest of national security. Reasonable advance notice of the meeting time, date, and place shall be published in the Federal Register and, if the meeting is to be closed, the notice shall so specify.

"(2) Interested persons shall be permitted to attend, appear before, or file statements with the Advisory Board, subject to such reasonable rules as the Advisory Board shall prescribe.

"(3) Transcripts or minutes of each meeting of the Advisory Board, except meetings closed for national security reasons, and recommendations made by the Advisory Board shall be made available for public inspection at a location determined by the Chairman.

"(l) Not later than March 15 of each year, the Advisory Board shall submit to the Committees on Armed Services and Appropriations of the Senate and House of Representatives an annual report setting forth its actions during the year preceding the year in which the report is submitted and any recommendations, including recommendations on projects, programs, and information exchange and recommendations for legislation, that the Advisory Board considers appropriate regarding the Strategic Environmental Research Program.

"(m) Each member of the Advisory Board shall be required to file a financial disclosure report under title I of the Ethics in Government Act of 1978 (5 U.S.C. App.).

"(n) The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Advisory Board.".

(2) The tables of chapters at the beginning of subtitle A of title 10, United States Code, and the beginning of part IV of such subtitle are each amended by inserting after the item relating to chapter 171 the following:

"172. Strategic Environmental Research Program ..... 2901".

(b) TERMS OF MEMBERS INITIALLY APPOINTED TO ADVISORY BOARD.—Up to one-half of the members originally appointed to the Strategic Environmental Research Program Scientific Advisory Board established under section 2904 of title 10, United States Code, as added by subsection (a), may be appointed for terms of not more than 6 and not less than 2 years in order to provide for staggered expiration of the terms of members. The Secretary of Defense and the Secretary of Energy shall jointly designate the members appointed for terms authorized under this paragraph and shall jointly specify the terms for which such members are appointed.

(c) FIRST ANNUAL REPORT OF THE JOINT STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM COUNCIL.—(1) The first annual report required by section 2902(g) of title 10, United States Code, as added by subsection (a), shall be submitted to the Secretary of Defense not later than February 1, 1992.

(2) The Secretary of Defense shall submit to the congressional defense committees, with the annual report referred to in paragraph (1), any recommendations for changes in the personnel management structure of the Department of Defense that the Secretary considers necessary to carry out the environmental activities of the Department of Defense more effectively.

(d) FIRST ANNUAL REPORT OF THE STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM SCIENTIFIC ADVISORY BOARD.—The first annual report of the Strategic Environmental Research Program Scientific Advisory Board shall be submitted not later than March 15, 1992.

SEC. 1002. AVAILABILITY OF FUNDS

Of the amounts authorized to be appropriated pursuant to section 201, $200,000,000 shall be available for the Strategic Environmental Research Program established under chapter 172 of title 10, United States Code, as added by section 1001. To the extent provided in appropriation Acts, the amount made available by this section shall remain available until expended.

SEC. 1003. DEADLINE FOR COMPLETION AND EXECUTION OF AGREEMENTS WITH THE ENVIRONMENTAL PROTECTION AGENCY

(a) Whenever a Department of Defense facility is proposed to be listed on the National Priorities List pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as amended, including those facilities proposed for listing as of the date of enactment of this Act, the Secretary of Defense shall, not later than one year after the date of such proposal or the date of enactment of this Act, whichever is later, enter into an interagency agreement with the Administrator of the United States Environmental Protection Agency, which shall be subject to and comply with the Comprehensive Environmental Response, Compensation, and Liability Act, as amended, and shall include, but not be limited to, a procedural framework and schedule for developing, implementing, and monitoring appropriate response actions for any such facility in accordance with the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

(b) This section shall be construed consistently with any existing Federal laws, and nothing in this section shall be construed as limiting any rights, authorities, requirements, or obligations of or provided by any existing Federal laws. Nothing in this section shall be construed as preempting, affecting, or modifying any State laws, including, but not limited to, any laws concerning removal or remedial action, enforcement, discharge control, solid waste disposal, or the application of such laws to facilities owned or operated by a department, agency, or instrumentality of the United States.

TITLE XI—DRUG INTERDICTION

SEC. 1101. DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES FUNDING FOR FISCAL YEAR 1991

Funds authorized to be appropriated for drug interdiction and counter-drug activities pursuant to section 301(a) shall be available for the purposes specified in paragraphs (1) through (5), in connection with the drug interdiction and counter-drug activities of the components named in such paragraphs, in the amounts specified as follows:

(1) For operations and maintenance:

(A) For the Army, $118,700,000.

(B) For the Navy, $275,900,000.

(C) For the Marine Corps, $3,200,000.

(D) For the Air Force, $88,500,000.

(E) For the Defense Agencies, $47,400,000.

(F) For the Army Reserve, $3,800,000.

(G) For the Naval Reserve, $1,500,000.

(H) For the Army National Guard, $19,342,000.

(I) For the Air National Guard, $4,700,000.

(J) For support to Federal, State, local, and foreign government agencies having counter-drug functions, $60,000,000.

(K) For the Civil Air Patrol, $1,000,000.

(2) For procurement:

(A) For the Army, $74,300,000.

(B) For the Navy, $91,058,000.

(C) For the Air Force, $112,500,000.
(D) For the National Guard, $15,000,000.
(E) For the Defense Agencies, $145,200,000.
(3) For National Guard Bureau pay and allowances:
(A) For the Army National Guard, $90,500,000.
(B) For the Air National Guard, $15,000,000.
(4) For research, development, test, and evaluation:
(A) For the Army, $3,300,000.
(B) For the Navy, $10,000,000.
(C) For the Air Force, $2,600,000.
(D) For the Defense Agencies, $14,400,000.
(5) For minor construction:
For the Navy, $10,000,000.

SEC. 1102. ADDITIONAL SUPPORT FOR COUNTER-DRUG ACTIVITIES

(a) SUPPORT TO OTHER AGENCIES.—(1) During fiscal year 1991, the Secretary of Defense may provide support for the counter-drug activities of any other department or agency of the Federal Government or for the counter-drug activities of a State or local civilian law enforcement agency for any of the purposes set forth in paragraph (2) if—

(A) such support is requested by the official who has responsibility for the counter-drug activities of that department or agency of the Federal Government or by the appropriate official of the State or local government, as the case may be; and

(B) funds are available for such purposes under section 1101(1)(J).

(2) The purposes referred to in paragraph (1) for which the Secretary may provide support are the following:

(A) The maintenance and repair of equipment that has been made available to any department or agency of the Federal Government or to any State or local government by the Department of Defense for the purposes of—

(i) preserving the potential future utility of such equipment for the Department of Defense; and

(ii) upgrading such equipment to ensure compatibility of that equipment with other equipment used by the Department of Defense.

(B) The maintenance and repair of equipment other than equipment referred to in subparagraph (A) for the purpose of—

(i) ensuring that the equipment being maintained or repaired is compatible with equipment used by the Department of Defense; and

(ii) upgrading such equipment to ensure the compatibility of that equipment with equipment used by the Department of Defense.

(C) The transportation of personnel of the United States and foreign countries (including per diem expenses associated with such transportation), and the transportation of supplies and equipment, for the purpose of facilitating counter-drug activities within or outside of the United States.

(D) The establishment, including unspecified minor construction, and operation of bases of operations or training facilities for the purpose of facilitating counter-drug activities within or outside the United States.

(E) Counter-drug related training of law enforcement personnel of the Federal Government and of State and local governments, including associated support expenses for trainees and the provision of materials necessary to carry out such training.

(F) Aerial and ground reconnaissance outside, at, or near the borders of the United States.

(b) CONTRACT AUTHORITY.— In carrying out subsection (a), the Secretary of Defense may acquire services or equipment by contract for support provided under subsection (a) if the Department of Defense would normally acquire such services or equipment by contract for the purpose of conducting a similar activity for the Department of Defense.

(c) LIMITED WAIVER OF PROHIBITION.—Notwithstanding section 376 of title 10, United States Code, the Secretary of Defense may provide support pursuant to subsection (a) in any case in which the provision of such support would adversely affect in the short term the military preparedness of the United States if the Secretary determines that the importance of providing such support outweighs any short-term adverse effect that the provision of such support might have on military preparedness.

(d) CONDUCT OF TRAINING OR OPERATION TO AID CIVILIAN AGENCIES.—In providing support pursuant to subsection (a), the Secretary of Defense may plan and execute otherwise valid military training or operations for the purpose of aiding civilian agencies.

(e) RELATIONSHIP TO OTHER LAWS.—(1) The authority provided in this section for the support of counter-drug activities by the Department of Defense is in addition to the authority provided for such purpose under chapter 18 of title 10, United States Code.

(2) Nothing in this section shall be construed to modify or supersede the provisions of section 375 of title 10, United States Code, or the provisions of section 376 of such title, except to the extent provided in subsection (c) of this section.

SEC. 1103. TRANSFER OF EXCESS DEFENSE ARTICLES

Pursuant to Public Law 100-456, section 1208 and section 372 of title 10, United States Code, the Secretary of Defense shall review the availability of equipment resulting from the withdrawal of United States forces from Europe and Asia for the purpose of identifying excess equipment that may be suitable for drug enforcement activities for transfer to appropriate State or local civilian law enforcement authorities.

SEC. 1104. SENSE OF THE CONGRESS REGARDING THE EFFECTIVE UTILIZATION OF COUNTERNARCOTICS FUNDS AND REPORT REQUIREMENT.

(a) FINDINGS.—The Congress finds that—

(1) Secretary Cheney has declared that combating illegal drugs is a high priority national security mission for the Department of Defense;

(2) All funds authorized and appropriated for Operations and Maintenance and Military Personnel in the Department of Defense's counternarcotics budget for Fiscal Year 1990 have not been obligated;

(3) If such funds are not obligated during Fiscal Year 1990 such funds will no longer be available for counternarcotics efforts; and

(4) Such funds should not be allowed to lapse.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that the Secretary of Defense and the Chairman of the Joint Chiefs of Staff must continue to emphasize the Department of Defense's commitment to this extremely important mission so that the entire chain of command ensures that funds are fully and effectively utilized so as to maximize the military's contribution to the national counter-drug efforts.

(c) REPORT.—Not later than January 15, 1991, the General Accounting Office shall report to the Armed Services Committees of the Senate and the House of Representatives, the Senate Appropriations Subcommittee on Defense, the House Appropriations Subcommittee on Defense, and the Senate Caucus on International Narcotics Control on the Department of Defense's counternarcotics budget, providing the following:

(1) An analysis of the funds authorized and appropriated in Fiscal Year 1989; how these funds were obligated and expended, including a month-by-month breakdown of obligations and expenditures; if there were delays in obligating and expending these funds; why such delays occurred; and the amount of funds which had lapsed at the end of the fiscal year.

(2) An analysis of the funds authorized and appropriated in Fiscal Year 1990; how these funds were obligated and expended, including a month-by-month breakdown of obligations and expenditures; if there were delays in obligating and expending these funds; why such delays occurred; and the amount of funds which had lapsed at the end of the fiscal year.

(3) An analysis of whether there is any information available with respect to the obligations and expenditures from the Fiscal Year 1989 and Fiscal Year 1990 counternarcotics budget that suggest a systemic problem in reference to the timely obligation and expenditure of counternarcotics funds.

(4) An analysis of the effectiveness of the role of the Department of Defense Coordinator for Drug Enforcement Policy and Support; whether his dual responsibility as Assistant Secretary of Defense for Reserve Affairs and as Drug Coordinator complicates his ability to coordinate all entities within the Department of Defense in the counternarcotics mission; and the adequacy of personnel levels in his Office to meet his responsibility for coordinating these funds and ensuring that the funds are obligated and expended in a timely manner.

(5) Recommendations for correcting any problems found in the course of this review.

SEC. 1105. STUDY OF UTILITY OF OH-58D HELICOPTER IN DETECTION OF CROSS-BORDER INTRUSIONS BY DRUG SMUGGLERS

(a) STUDY REQUIRED.—The Secretary of Defense shall conduct a study on the feasibility and effectiveness of utilizing OH-58D Scout helicopters for detecting, monitoring, and conducting surveillance of the ground movements of drug smugglers along the southwest border of the United States. In carrying out such study, the Secretary shall consider in particular the following matters:

(1) The suitability of the OH-58D helicopter for performing the missions described in the first sentence.

(2) The feasibility of having personnel of the Army National Guard operate and maintain OH-58D helicopters when such personnel are not in Federal service.

(3) The desirability of having the Army pay for operation and maintenance expenses in connection with the OH-58D helicopters pursuant to a plan developed by the United States Customs Service or having the Secretary of Defense pay such expenses out of funds appropriated for National Guard counterdrug activities pursuant to a plan developed by the Governors of Southwestern States.

(4) The feasibility of coordinating National Guard activities and civilian law enforcement activities though the command, control and intelligence center of the United

States Customs Service at Riverside, California.

(b) INTERAGENCY COORDINATION.—The Secretary shall carry out the study required by subsection (a) in consultation with the Commissioner of the United States Customs Service.

(c) SUBMISSION OF REPORT.—The Secretary shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report containing the results of the study required by subsection (a) not more than 180 days after the date of the enactment of this Act. The Secretary shall include in the report the conclusions of the Secretary based on the study together with such comments and recommendation as the Secretary considers appropriate.

SEC. 1106. ANDEAN ANTI-DRUG EFFORTS

(a) The Congress finds that—

(1) support for democratic process and civilian governance in Andean countries of Peru, Bolivia, and Colombia, the first two of which have only recently emerged from periods of military rule, is a necessary precondition for the successful fight against narcotics production and traffic and long-term stability in that region;

(2) separation of military and civilian law enforcement functions has historically been a critical element in democracies around the world, including the United States;

(3) there is a need to determine whether existing United States policies unduly emphasize assistance to military entities rather than civilian law enforcement entities in the Andean anti-drug effort and whether such policies might tend to undermine the dual long-term policy goals of the United States of stopping the traffic of drugs at their sources and the preservation of civilian control over the newly established democracies of this region; and

(4) there is a need to assess the impact that United States assistance in the Andean anti-drug effort will have on reducing drug activity and supporting democratic processes in this region.

(b)(1) Not later than 90 days after the date of enactment of this Act, the Secretary of State and the Secretary of Defense shall, in consultation with the Director of the Office of National Drug Control Policy, jointly submit a report to the Senate and the House of Representatives detailing current United States policies, anti-narcotics enforcement activities and associated training programs in the Andean region.

(2) Such report shall also include an analysis of the impact of the Andean countries' militaries' role in counter-narcotics enforcement on democratic institutions in the region and how civilian institutions might be strengthened in order to assure the successful pursuit of anti-narcotics strategy.

(3) Such report shall contain specific legislative recommendations as may be necessary to clarify and streamline United States assistance activities in order to avoid unnecessary duplications and contradictions in meeting United States policy goals in the Andean region.

SEC. 1107. CREATION OF A MULTILATERAL COUNTER NARCOTICS STRIKE FORCE

It is the sense of the Congress that the President should call for international negotiations for the purpose of agreeing on the establishment of an international strike force to counter major international drug traffickers.

(a) FINDINGS.—The Congress finds that—

(1) the United States Congress has in the past sought approval for a multilateral strike force dedicated to the war on drugs;

(2) the proposal to create a multilateral, international counternarcotics force as proposed by Prime Minister Michael Manley of Jamaica, is a plan worthy of consideration; and

(3) the Manley plan is the first operative proposal for the use of a multilateral force against the drug cartels in Latin America made by a government leader in the Western Hemisphere.

(b) SENSE OF THE CONGRESS.—It is therefore the sense of the Congress that—

(1) Prime Minister Manley of Jamaica is to be commended for his proposal; and

(2) the United States should work through the United Nations and other multilateral organizations to determine the feasibility of such a force and to assist in the establishment of this force, if it is found to be feasible.

TITLE XII—GENERAL PROVISIONS

PART A—FINANCIAL AND BUDGET MATTERS

SEC. 1201. TRANSFER AUTHORITY

(a) AUTHORITY TO TRANSFER AUTHORIZATIONS.—(1) Upon determination by the Secretary of Defense that such action is necessary in the national interest, the Secretary may transfer amounts of authorizations made available to the Department of Defense in this division for fiscal year 1991 between any such authorizations (or any subdivisions thereof). Amounts of authorizations so transferred shall be merged with and be available for the same purposes as the authorization to which transferred.

(2) The total amount of authorizations for any fiscal year that the Secretary of Defense may transfer under the authority of this section may not exceed $3,000,000,000.

(b) LIMITATIONS.—The authority provided by this section to transfer authorizations—

(1) may only be used to provide authority for items that have a higher priority than the items from which authority is transferred; and

(2) may not be used to provide authority for an item that has been denied authorization by Congress.

(c) EFFECT ON OBLIGATION LIMITATIONS.—An amount transferred from one account to another account pursuant to the authority of this section shall be deemed to increase the amount authorized for the account to which the amount is transferred by an amount equal to the amount transferred.

(d) NOTICE TO CONGRESS.—The Secretary of Defense shall promptly notify Congress of transfers made under the authority of this section.

SEC. 1202. REDUCTIONS TO REFLECT CONSOLIDATION SAVINGS

The total amount authorized to be appropriated for the Department of Defense for fiscal year 1991 for military personnel and operations and maintenance may not exceed $163,389,825,000.

SEC. 1203. FIVE-YEAR DEFENSE PROGRAM

(a) Section 114a of title 10, United States Code, is amended by adding at the end the following new subsection:

"(d) Notwithstanding the references in subsections (a), (b), and (c) to a five-year defense program, if in any year the Secretary prepares a six-year defense program in lieu of a five-year defense program, the Secretary may submit that program to Congress in lieu of a five-year defense program.".

SEC. 1204. FIVE-YEAR NATIONAL FOREIGN INTELLIGENCE PROGRAM

(a) REQUIREMENT TO SUBMIT FIVE-YEAR NATIONAL FOREIGN INTELLIGENCE PROGRAM.—The Director of Central Intelligence shall submit to the Committees on Armed Services and Appropriations of the Senate and the House of Representatives and the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives each year the current five-year national foreign intelligence program reflecting the estimated expenditures and proposed appropriations required to support that program.

(b) TIME OF SUBMISSION.—The Director shall submit the report required by subsection (a) each year at or about the same time that the budget is submitted to Congress pursuant to section 1105(a) of title 31, United States Code.

(c) CONSISTENCY.—The Director of Central Intelligence and the Secretary of Defense shall ensure that the estimates referred to in subsection (a) are consistent with the budget estimates submitted to Congress pursuant to section 1105(a) of title 31, United States Code, for the fiscal year concerned and with the estimated expenditures and proposed appropriations for the five-year or six-year defense program submitted pursuant to section 114a of title 31, United States Code.

(d) SIX-YEAR NATIONAL FOREIGN INTELLIGENCE PROGRAM.—Notwithstanding the reference in subsection (a) to a five-year national foreign intelligence program, if in any year the Director of Central Intelligence prepares a six-year national foreign intelligence program, the Director may submit that program to the committees referred to in subsection (a) in lieu of a five-year national foreign intelligence program.

SEC. 1205. FORMATS FOR PRESENTATION OF DOD MATTERS IN THE BUDGET

(a) IN GENERAL.—Section 1105(a) of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(28) for budget matters pertaining to the Department of Defense (functional category 050)—

"(A) a format that organizes such matters on the same basis as the format contained in the budget submitted for fiscal year 1991; and

"(B) a format that organizes such matters on the basis of major roles and missions of the Department of Defense.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to budgets submitted after the date of the enactment of this Act.

SEC. 1206. ADDITIONAL AUTHORIZATION OF APPROPRIATIONS

(a) ARMY.—In addition to the amount authorized to be appropriated by section 101(5), there is hereby authorized to be appropriated for fiscal year 1991 for the Army for procurement of the Nuclear Biological, Chemical Reconnaissance System $36,914,000.

(b) NAVY.—In addition to the amount authorized to be appropriated by section 102(a)(1), there is hereby authorized to be appropriated for fiscal year 1991 for the Navy for procurement of the Battle Group Passive Horizon Extension System $5,163,000.

(c) AIR FORCE.—(1) Notwithstanding section 103(2), not more than $6,728,957,000 is authorized to be appropriated for fiscal year 1991 for the procurement of missiles.

(2)(A) In addition to the amount authorized to be appropriated by section 201(3), there is hereby authorized to be appropriated for fiscal year 1991 for the Air Force for research, development, test, and evaluation $4,000,000.

(B) Of the amount authorized to be appropriated pursuant to subparagraph (A) of this paragraph and section 201(3), not more than $15,000,000 shall be available for the Advanced Electro-Optical System.

(d) DEFENSE AGENCIES.—In addition to the amount authorized to be appropriated by section 201(4), there is hereby authorized to be appropriated for fiscal year 1991 for the Defense Agencies for research, development, test, and evaluation for single-pulse excimer laser technology $30,000,000.

SEC. 1207. CONTROLS ON THE AVAILABILITY OF APPROPRIATION ACCOUNTS

(a) AMENDMENTS TO TITLE 31.—

(1) IN GENERAL.—Subchapter IV of chapter 15 of subtitle 2 of title 31, United States Code, is amended by striking sections 1552 through 1556 and inserting the following:

"§ 1552. Procedure for appropriation accounts available for definite periods

"(a) On September 30th of the 5th fiscal year after the period of availability of an appropriation account available for obligation for a definite period ends, the account is closed and any remaining obligated and unobligated balance is canceled and thereafter shall not be available for obligation or expenditure for any purpose.

"(b) Collections authorized to be credited to an appropriation, but not received before closing of the account under subsection (a) or section 1555 of this title shall be deposited in the Treasury as miscellaneous receipts.

"§ 1553. Availability of appropriation accounts to pay obligations

"(a) After the end of the period of availability of an appropriation account available for a definite period and prior to closing of that account under section 1552(a) of this title, the account shall remain available for recording, adjusting, and liquidating obligations properly chargeable to that account. Any charge made pursuant to this subsection shall be limited to the unobligated expired balances of the original appropriation available for the same purpose.

"(b)(1) Subject to the provisions of paragraph (2), after closing of an account under section 1552(a) or section 1555 of this title, obligations and adjustments to obligations that would have been chargeable to that account prior to closing and that are not otherwise chargeable to current appropriations of the agency may be charged to current appropriations of the agency available for the same purpose.

"(2) The total of charges to any current account under paragraph (1) shall not exceed—

"(A) an amount equal to one percent of the total appropriations for that current account; or

"(B) the amount of the original appropriation,

whichever amount is less.

"(c)(1) Obligations under this section may be paid without prior action of the Comptroller General.

"(2) This subchapter does not—

"(A) relieve the Comptroller General of the duty to make decisions requested under law; or

"(B) affect the authority of the Comptroller General to settle claims and accounts.

"(d)(1) If an obligation of funds from an account the period of availability of which has ended to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount of such obligations during a fiscal year for contract changes for that program, project, or activity to exceed $4,000,000, the obligation may only be made if the obligation is approved by the head of the agency (or an officer of the agency within the Office of the head of the agency to whom the head of the agency has delegated the authority to approve such an obligation).

"(2) In a case in which an obligation of funds from an account the period of availability of which has ended to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount so obligated during a fiscal year for that program, project, or activity to exceed $25,000,000, the obligation may not be made until—

"(A) the head of the agency submits to the appropriate authorizing committees of Congress and the Committees on Appropriations of the Senate and the House of Representatives a notice in writing of the intent to obligate such funds, together with a description of the legal basis for the proposed obligation and the policy reasons for the proposed obligation; and

"(B) a period of 30 days has elapsed after the notice is submitted.

"(3) As used in this subsection, the term 'contract change' means a change to a contract under which the contractor is required to perform additional work. Such term does not include adjustments to pay claims or increases under an escalation clause.

"§ 1554. Audit, control, and reporting

"(a) Any audit requirement, limitation on obligations, or reporting requirement that is applicable to an appropriation account shall remain applicable to that account after the end of the period of availability of that account.

"(b)(1) The head of each Federal agency shall provide an annual report to the President and the Department of the Treasury regarding the unliquidated obligations, unobligated balances, and adjustments made to such accounts during the completed fiscal year. The report shall be provided no later than 15 days after the President's budget submission.

"(2) The report required by this subsection shall—

"(A) provide a description, with reference to the fiscal year of appropriations, of the amount in each account, its source, and an itemization of the appropriations accounts;

"(B) describe all current and expired appropriations accounts;

"(C) describe any payments made under section 1553 of this title;

"(D) describe any adjustment of obligations during that fiscal year pursuant to section 1553 of this title;

"(E) contain a certification by the head of the agency that the obligated balances in each appropriation account of the agency reflect proper existing obligations and that expenditures from the account since the preceding review were supported by a proper obligation of funds and otherwise were proper;

"(F) describe all balances canceled under sections 1552 and 1555 of this title; and

"(G) be provided to the Appropriations Committees of the Senate and the House of Representatives, to the House of Representatives Committee on Government Operations and the Senate Committee on Governmental Affairs, and other appropriate oversight and authorizing committees of the House and Senate.

"(c) The Congressional Budget Office shall—

"(1) annually estimate the outlay impact on the Federal deficit on an agency-by-agency basis, of payments and adjustments with respect to sections 1552 and 1553 of this title; and

"(2) include estimates required by paragraph (1) in the annual report of the Congressional Budget Office to Congress entitled 'The Economic and Budget Outlook', and its report entitled 'The Economic Budget Outlook: An Update'.

"(d) Each agency head shall establish internal controls to assure that an adequate review of obligated balances has been performed to support the certification required by section 1108(c) of this title.

"§ 1555. Closing of appropriation accounts available for indefinite periods

"An appropriation account available for an indefinite period shall be closed and any remaining obligated or unobligated balance shall be canceled and thereafter shall not be available for obligation of expenditure for any purpose—

"(1) when the head of the agency concerned or the President decides that the purposes for which the appropriation was made have been carried out; and

"(2) when no disbursement is made against the appropriation for 2 consecutive fiscal years.

"§ 1556. Comptroller General reports on appropriation accounts

"(a) In carrying out audit responsibilities, the Comptroller General shall report on operations under this subchapter to—

"(1) the head of the agency concerned;

"(2) the Secretary of the Treasury; and

"(3) the President.

"(b) A report under this section shall include an appraisal of unpaid obligations under appropriation accounts the period of availability of which has ended.".

(2) EXTENTION OF AVAILABILITY.—Section 1551 of title 31, United States Code, is amended by adding at the end the following new subsection:

"(c) The limitations on availability for expenditure prescribed in this subchapter shall apply to all other appropriations unless otherwise authorized by subsequent law that specifically—

"(1) identifies the appropriate account to be extended;

"(2) provide that such account shall be available for recording, adjusting, and liquidating obligations properly chargeable to that account; and

"(3) extends the availability for expenditure of the obligated balances.".

(b) EFFECTIVE DATE.—

(1) APPLICATION OF AMENDMENTS.—The amendments made by subsection (a) shall apply to any appropriation account the obligated balance of which, on the date of enactment of this section, has not been transferred under section 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section.

(2) RESTORATION OF CERTAIN UNOBLIGATED AMOUNTS.—On the date of enactment of this section, the balance of any unobligated amount withdrawn under section 1552(a)(2) of title 31, United States Code, in effect prior to enactment of this section, from an account the obligated balance of which has not been transferred under section 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section, is hereby restored to that account.

(3) CANCELLATION OF UNOBLIGATED BALANCES.—Thirty days after enactment of this section, all balances of unobligated funds

withdrawn from any account under subsection 1552(a)(2) of title 31, United States Code, in effect prior to enactment of this section (other than funds restored under paragraph (2)) are canceled.

(4) CANCELLATION OF OBLIGATED BALANCES.—On September 30th after enactment of this section, all obligated balances transferred under subsection 1552(a)(1) of title 31, United States Code, in effect prior to enactment of this section, are canceled.

(5) OBLIGATIONS AND ADJUSTMENT OF OBLIGATIONS.—(A) After cancellation of unobligated balances under paragraph (3) or cancellation of obligated balances under paragraph (4) and subject to the provisions of subparagraph (B), obligations and adjustments to obligations that would have been chargeable to those balances prior to such cancellations and that are not otherwise chargeable to current appropriations of the agency may be charged to current appropriations of the agency available for the same purpose. Any charge made pursuant to this subsection shall be limited to the unobligated expired balances of the original appropriation available for the same purpose.

(B) Any charge made pursuant to subparagraph (A) shall be subject to the maximum amount chargeable subsection (b) under section 1553 of title 31, United States Code, as amended by this section, and shall be included in the calculation of the total amount charged to any account under that section.

(c) ANTI-DEFICIENCY ACT.—Section 1341(a)(1)(A) of title 31, United States Code, is amended by inserting before the semicolon the following: ", including an obligation exceeding the original obligation and the use of such obligation for new obligations".

PART B—MISCELLANEOUS MATTERS

SEC. 1211. REPORT ON UNITED STATES SECURITY ARRANGEMENTS AND COMMITMENTS WORLDWIDE

Not later than February 1, 1991, the President shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on all United States security arrangements with, and commitments to, other nations throughout the world. The President shall include in the report—

(1) a description of all security arrangements and commitments, whether based upon a formal document or an expressed policy, and a recitation of the historical origins of those arrangements and commitments;

(2) an assessment of the need to continue, or discontinue, each of the arrangements and commitments in view of the changing threat situation;

(3) an evaluation of the ability of the United States to meet those commitments based on the projected reductions in the defense structure of the United States; and

(4) a plan for meeting each of those commitments with the force structure projected for the future.

SEC. 1212. CONGRESSIONAL OVERSIGHT OF SPECIAL ACCESS PROGRAMS

(a) IN GENERAL.—Subsection (c) of section 119 of title 10, United States Code, is amended to read as follows:

"(c)(1) Whenever a change in the classification of a special access program of the Department of Defense is planned to be made or whenever classified information concerning a special access program of the Department of Defense is to be declassified and made public, the Secretary of Defense shall submit to the defense committees a report containing a description of the proposed change, the reasons for the proposed change, and notice of any public announcement planned to be made with respect to the proposed change.

"(2) Except as provided in paragraph (3), any report referred to in paragraph (1) shall be submitted not less than 14 days before the date on which the proposed change or public announcement is to occur.

"(3) If the Secretary determines that because of exceptional circumstances the requirement of paragraph (2) cannot be met with respect to a proposed change or public announcement concerning a special access program of the Department of Defense, the Secretary may submit the report required by paragraph (1) regarding the proposed change or public announcement at any time before the proposed change or public announcement is made and shall include in the report an explanation of the exceptional circumstances.".

(b) AMENDMENT TO DEFINITION.—Subsection (f) of such section is amended by inserting "and Appropriations" after "Armed Services" in clause (1).

SEC. 1213. SENSE OF CONGRESS ON ADDITIONAL NUCLEAR RISK REDUCTION MEASURES

(a) FINDINGS.—Congress makes the following findings:

(1) On June 1, 1990, the President of the United States and the President of the Soviet Union signed a document entitled "Joint Statement on Future Negotiations on Nuclear and Space Arms and Further Enhancing Strategic Stability".

(2) In that document, the two nations pledged to pursue additional confidence-building and predictability measures "that would reduce the possibility of an outbreak of nuclear war as a result of accident, miscalculation, terrorism, or unexpected technological breakthrough, and would prevent possible incidents between them".

(3) As a result of the recent increase in ethnic, national, economic, and political tensions within the Soviet Union, concern has heightened regarding the possible unauthorized or accidental use of Soviet nuclear weapons.

(4) It has been four years since the Department of Defense conducted a comprehensive review of its nuclear control procedures and failsafe mechanisms.

(5) The Joint Chiefs of Staff, in its 1990 Joint Military Net Assessment, concluded that with the recent changes in the global security environment, "the risk of nuclear deterrence failing is assessed to be low and at this moment to be decreasing".

(6) While Congress is concerned about continued Soviet strategic offensive and defensive modernization and the unpredictable status of the Soviet domestic situation, at this stage the lessened prospects that nuclear weapons of the United States might have to be employed may afford an opportunity to reconsider past reluctance to utilize certain positive control measures, such as the installation of permissive action links (PALs) on nuclear weapons deployed at sea by the United States and the installation of post-launch destruct mechanisms on intercontinental ballistic missiles (ICBMs) and submarine launched ballistic missiles (SLBMs) deployed by the United States, as long as appropriate security measures can be developed to protect the integrity of such destruct mechanisms.

(7) On September 15, 1987, the United States and the Soviet Union agreed to establish Nuclear Risk Reduction Centers (NRRCs) in Washington and Moscow.

(8) The NRRCs have made a useful contribution to lowering the risks of accidental or inadvertent nuclear war and are capable of taking on expanded roles.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the President of the United States and the President of the Union of Soviet Socialist Republics are to be commended for their June 1, 1990, joint statement to pursue additional nuclear confidence-building measures; and

(2) in keeping with that joint statement, the President should—

(A) invite the Soviet Union to join with the United States in conducting separate but parallel, comprehensive reviews of each nation's own nuclear control procedures and failsafe mechanisms; and

(B) propose to the Soviet Union that the two nations initiate discussions with the objective of agreeing on additional roles and functions that could be assigned to the Nuclear Risk Reduction Centers to further lessen the risks of the outbreak of nuclear war as the result of misinterpretation, miscalculation, or accident.

(c) REPORT ON ADDITIONAL MEASURES.—Not later than March 1, 1991, the President shall submit to Congress a report (in classified and unclassified form) assessing additional nuclear risk reduction measures which could be implemented pursuant to the joint statement of June 1, 1990, referred to in subsection (b), including the following:

(1) Assigning the Nuclear Risk Reduction Centers (NRRCs) such expanded roles as the following:

(A) Serving as the locus for discussions between the two nations on responding to possible nuclear terrorism.

(B) Transmitting notifications that may be required under future arms control treaties.

(C) Transmitting notifications and information requests required under Article 5 of the 1971 Agreement on Measures to Reduce the Risk of Outbreak of Nuclear War Between the United States and the Union of Soviet Socialist Republics.

(D) Providing a forum for discussions between the United States and the Soviet Union on restricting nuclear, chemical, and missile proliferation.

(E) Serving as a meeting place for high-level military discussions on nuclear doctrines, forces and activities, and regional security concerns.

(2) Installation of post-launch destruct mechanisms on all intercontinental ballistic missiles (ICBMs) and submarine launched ballistic missiles (SLBMs) deployed by the United States.

(3) Installation by the United States of permissive action links (PALs) on all nuclear weapons at sea.

SEC. 1214. CROSS-SERVICING AGREEMENTS

Subsection (a) of section 2342 of title 10, United States Code, is amended to read as follows:

"(a)(1) Subject to section 2343 of this title and to the availability of appropriations, and after consultation with the Secretary of State, the Secretary of Defense may enter into an agreement described in paragraph (2) with—

"(A) the government of a North Atlantic Treaty Organization country;

"(B) a subsidiary body of the North Atlantic Treaty Organization; or

"(C) the government of a country not a member of the North Atlantic Treaty Organization but which is designated by the Sec-

retary of Defense, subject to the limitations prescribed in subsection (b), as a government with which the Secretary may enter into agreements under this section.

"(2) An agreement referred to in paragraph (1) is an agreement under which the United States agrees to provide logistic support, supplies, and services to military forces of a country or subsidiary body referred to in paragraph (1) in return for the reciprocal provisions of logistic support, supplies, and services by such government or subsidiary body to elements of the armed forces.".

SEC. 1215. GRANT FOR STUDY AND ANALYSIS OF THE SOVIET UNION AND CERTAIN OTHER COUNTRIES

Of the amounts authorized to be appropriated pursuant to section 201, $600,000 shall be available for making a grant to a nonprofit organization for the support of research and analyses by emigrants from the Soviet Union, the countries of Eastern Europe (including Albania), and Cuba regarding political, economic, social, and other developments in those countries.

SEC. 1216. NATIONAL DEFENSE ECONOMIC ADJUSTMENT

(a) FINDINGS.—Congress makes the following findings:

(1) There are likely to be significant reductions in the programs, projects, and activities of the Department of Defense during the first several fiscal years following fiscal year 1990.

(2) Such reductions will adversely affect the economies of many communities in the United States and small businesses and civilian workers throughout the United States.

(b) POLICY.—In view of the findings expressed in subsection (a), it is the policy of the United States that—

(1) assistance be provided under existing planning assistance programs and economic adjustment assistance programs of the Federal Government to communities, small businesses, and workers referred to in subsection (a)(2) to the extent necessary to facilitate an orderly transition for such communities, small businesses, and workers from economic reliance on Department of Defense spending to economic reliance on other sources of business, employment, and revenue; and

(2) funding for such programs be increased by amounts necessary to meet the needs of such communities, small businesses, and workers without reducing the funding that would otherwise be available under those programs by reason of causes unrelated to the reductions referred to in subsection (a)(1).

(c) ACTIONS OF THE SECRETARY OF DEFENSE.—(1) The Secretary of Defense, through the Office of Economic Adjustment of the Department of Defense, shall—

(A) identify each community in the United States likely to experience significant economic dislocation as a result of the reductions referred to in subsection (a)(1), including a loss of at least 2,500 civilian jobs (in the case of an urban community), 1,000 civilian jobs (in the case of a rural community), or a number of civilian jobs equal to at least one percent of the total number of civilian jobs in the community;

(B) transmit to the governments of each such community (and to the Governor of the State in which such community is located) advance notification of the planned reductions referred to in subsection (a)(1) that are likely to affect such community adversely, including an estimate of the number of jobs that will be lost in the community as the result of the planned reductions;

(C) transmit to the President a list of all such communities; and

(D) make community planning assistance grants to such communities in order to assist such communities in planning for economic diversification likely to minimize the adverse economic effects referred to in subsection (a)(2) and to facilitate economic recovery from any such adverse effects.

(2) For fiscal year 1992 and each fiscal year thereafter, the Secretary of Defense—

(A) shall—

(i) in the budget proposals of the Department of Defense prepared for submission to the President for such fiscal year, identify those communities that are likely to experience significant economic dislocation described in paragraph (1)(A) in the event that such budget proposals are enacted into law; and

(ii) upon the submission of the budget for such fiscal year to Congress pursuant to section 1105(c) of title 31, United States Code, provide the notifications required by paragraph (1)(B); and

(B) upon the enactment of an appropriations Act providing funds for programs, projects, and activities of the Department of Defense for such fiscal year, shall identify the communities likely to experience significant economic dislocation described in clause (A) of paragraph (1) as a result of the funding levels contained in such Act and take the actions required by clauses (B) and (C) of such paragraph.

(d) ACTIONS OF THE SECRETARY OF COMMERCE.—The Secretary of Commerce shall furnish community adjustment assistance under title IX of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3241 et seq.), and such other assistance as may be provided under programs administered by the Economic Development Administration of the Department of Commerce, to communities receiving a notification pursuant to subsection (c)(1)(B) in order to carry out the policy set out in subsection (b)(1).

(e) ACTIONS OF THE ADMINISTRATOR OF THE SMALL BUSINESS ADMINISTRATION.—(1) The Administrator of the Small Business Administration shall furnish assistance to small businesses described in paragraph (2) for the purpose of facilitating the development of business plans for diversifying into commercial activities other than the furnishing of products or services for the Department of Defense.

(2) A small business referred to in paragraph (1) is a small business that derives a significant portion of its gross receipts from the direct and indirect furnishing of goods or services for the Department of Defense.

(3) To be eligible for the assistance referred to in paragraph (1), a small business shall be required to submit to the Administrator an application for assistance containing a preliminary business diversification proposal applicable to such small business.

(f) ACTIONS OF THE SECRETARY OF LABOR.—The Secretary of Labor shall furnish retraining, job placement, and relocation assistance pursuant to the Job Training Partnership Act (29 U.S.C. 1501 et seq.) and other employment services to workers referred to in subsection (a)(2) in order to carry out the policy set out in subsection (b)(1).

(g) ACTIONS OF THE PRESIDENT.—(1) In the preparation of the budget for a fiscal year for submission to Congress pursuant to section 1105(a) of title 31, United States Code, the President shall—

(A) take into consideration the needs of the communities identified by the Secretary of Defense pursuant to subsection (c)(1) and the small businesses and workers referred to in subsection (a)(2) and include in such budget proposed funding levels for the assistance and services referred to in subsections (c) through (f) sufficient to carry out the policy set out in subsection (b)(2); and

(B) include in the justifications and supporting information transmitted to Congress in connection with such budget—

(i) a discussion of the extent to which the proposed funding for such programs is sufficient to carry out such policy; and

(ii) a list of the communities that are to receive a notification from the Secretary of Defense pursuant to subsection (c)(1) in connection with such budget.

(2) It is the sense of Congress that, in order to ensure that paragraph (1) and subsections (c) through (f) are carried out effectively—

(A) the President should direct the interagency committee known as the President's Economic Adjustment Committee to carry out coordinating and oversight activities with respect to the development of budget requests for and the furnishing of assistance under the programs referred to in such paragraph and subsections and to keep the President currently informed regarding the effectiveness of the programs; and

(B) the President should implement a systematic, continuous procedure to collect and analyze information necessary to evaluate the adequacy and identify the sources of industrial capacity and capability in items and technologies essential to the execution of the national security strategy of the United States, including the industrial capacity and capabilities of Department of Defense prime contractors and at least the first two tiers of subcontractors.

(h) AUTHORIZATIONS OF APPROPRIATIONS.—(1) There is authorized to be appropriated for the fiscal year beginning October 1, 1990 such sums as may be necessary for carrying out subsections (c)(1)(D), (d), (e) and (f).

(2) Amounts authorized to be appropriated under paragraph (1) are in addition to any amounts authorized to be appropriated for activities and programs referred to in such subsections for such fiscal year under any other provision of law.

SEC. 1217. DEVELOPMENT AND PRODUCTION OF WEAPONS AND WEAPON SYSTEMS HAVING STANDOFF ATTACK CAPABILITIES AND EMPLOYING SENSOR-FUSED DEVICES

(a) FINDINGS.—

(1) The world-wide proliferation of sophisticated and highly lethal, advanced technology weapons systems continues at rapid pace.

(2) These increasingly lethal weapons place United States and allied forces at greater risk.

(3) The development of standoff weapons to attack highly defended targets while minimizing risk to United States forces is a high priority.

(4) The results of research and testing conducted by or for the Department of Defense on weapons and weapon systems having standoff capabilities and employing sensor-fused devices demonstrates that such weapons satisfy such needs.

(b) The Air Force should complete development of weapons and weapon systems having standoff attack capabilities and employing sensor-fused devices and, upon completion of such development, should proceed with the production of such weapons and weapon systems, and that such production should take place at facilities so selected

during the development phase of these weapons.

SEC. 1218. REPEAL RELATING TO CONTRACTOR LIABILITY FOR INJURY OR LOSS OF PROPERTY ARISING OUT OF ATOMIC WEAPONS TESTING PROGRAMS

(a)(1) REPEAL.—Section 1631 of the Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2646; 42 U.S.C. 2212) is repealed.

(2) RELATIONSHIP TO STATUTES OF LIMITATIONS.—(A) The period during which section 1631 of the Department of Defense Authorization Act, 1985, was in effect shall not be taken into account in computing the period provided in any Federal or State statute of limitations applicable to any civil action for an injury, loss of property, personal injury, or death described in subsection (a)(1) of such section.

(B) In the case of any civil action referred to in paragraph (1) which was filed before October 19, 1984, and was subsequently dismissed pursuant to the provisions of section 1631 of the National Defense Authorization Act, 1985, the period beginning on the date of the initial filing of such action and ending on the date of the enactment of this Act shall not be taken into account in computing the period provided in any Federal of State statute of limitations applicable to such civil actions.

(C) If the period provided in any Federal or State statute of limitations applicable to a civil action referred to in paragraph (1) expires within the one-year period beginning on the date of the enactment of this Act, the action shall not be barred by such statute, but shall be forever barred if not commenced within one year after such date: *Provided, however,* That in no event shall an award of attorney fees for actions brought under this title exceed 10 percent of the award of actual damages: *Provided further,* That nothing in this section shall act to preclude a contract for legal representation for a lesser amount.

(b)(1) With respect to actions filed under this section, the United States shall forever indemnify, hold harmless, and guarantee payment of any judgments entered for any claimant.

(2) In the event that any private contractor to the United States is successful in defending a claim brought under this Act, the United States shall likewise indemnify and reimburse said contractor for all costs, attorney fees, and litigation related expenses incurred in defending said action.

(3) *Provided further,* That in the event an action is settled prior to litigation or a consent decree is entered pursuant to a settlement agreement, the United States shall reimburse said contractors for all reasonable costs associated with the settlement.

SEC. 1219. DEDICATED NATO TRAINING FACILITY

As part of the request for authorizations of appropriations for fiscal year 1992, the Secretary of Defense shall transmit to the Committees on Armed Services of the Senate and the House of Representatives a report containing an analysis of the merits of utilizing as a dedicated NATO training facility a military installation within the United States which would otherwise be subject for closure or realignment.

SEC. 1220. AUTHORITY TO REPLACE OR RESTORE LOST OR DAMAGED PROPERTY

(a) AUTHORITY.—In order to assist the entities described in this section to continue to provide services to the United States, The Secretary of the Army may replace or restore property of a contractor of the United States which was lost or damaged during operation Just Cause begun on December 22, 1989, to the extent—

(1) such property was located on a military installation in Panama pursuant to the requirements of the contract and such military installation was used or occupied by United States Armed Forces prior to December 22, 1989;

(2) such damage was caused by United States Armed Forces; and

(3) such loss or damage was not caused in whole or in part by the negligent or wrongful act of such contractor or an agent or employee thereof.

(b) LIMITATION.—The Secretary of the Army may replace or restore property under this section only if—

(1) a request for such action is presented to the Secretary in writing within two years after such property was lost or damaged;

(2) the Secretary determines that such request is substantiated; and

(3) the Secretary determines that the contractor has made every reasonable effort to obtain compensation, replacement, or restoral of such property through other means.

SEC. 1221. ENHANCING PARTICIPATION OF HISTORICALLY BLACK COLLEGES AND UNIVERSITIES AND MINORITY INSTITUTIONS IN DEFENSE RESEARCH

Section 1207 of the National Defense Authorization Act for Fiscal Year 1987 (10 U.S.C. 2301 note) is amended—

(1) in subsection (a)—

(A) by inserting "(1)" before "Except";

(B) by redesignating clauses (1), (2), and (3) as clauses (A), (B), and (C), respectively; and

(2) by adding at the end the following new paragraph:

"(2) The Secretary of Defense shall establish a specific goal for the award of prime contracts and subcontracts to historically Black colleges and universities and minority institutions in order to increase the participation of such colleges and universities in the program provided for by this section."; and

(3) by striking out subsection (c) and inserting in lieu thereof the following new subsection (c):

"(c) TYPES OF ASSISTANCE.—(1) To attain the goal specified in subsection (a)(1), the Secretary of Defense shall provide technical assistance to the entities referred to in that subsection and, in the case of historically black colleges and universities and minority institutions, shall also provide infrastructure assistance.

"(2) Technical assistance provided under this section shall include information about the program, advice in preparation of proposals, and other such assistance as the Secretary considers appropriate. If the resources of the Department of Defense are inadequate to provide such assistance, the Secretary may enter into contracts with minority private sector entities with experience and expertise in the design, development, and delivery of technical assistance services to eligible individuals, business firms and institutions, defense acquisitions agencies, and defense prime contractors. Department of Defense contracts with the entities referred to in subsection (a)(1) shall be awarded annually, based upon, among other things, the number of minority small business concerns, historically Black colleges and universities, and minority institutions that each such entity brings into the program.

"(3) Infrastructure assistance provided under this section may include programs to:

"(A) establish and enhance undergraduate, graduate, and doctoral programs in scientific disciplines critical to the national security functions of the Department of Defense;

"(B) make Department of Defense personnel available to advise and assist faculty at the school in the performance of defense research and in scientific disciplines critical to the national security functions of the Department of Defense;

"(C) establish partnerships between defense laboratories and historically Black colleges and universities and minority institutions for the purpose of training students in scientific disciplines critical to the national security functions of the Department of Defense;

"(D) award scholarships, fellowships, and the establishment of cooperative work-education programs in scientific disciplines critical to the national security functions of the Department of Defense;

"(E) attract and retain faculty involved in scientific disciplines critical to the national security functions of the Department of Defense;

"(F) equip and renovate laboratories for the performance of defense research;

"(G) expand and equip Reserve Officer Training Corps activities devoted to scientific disciplines critical to the national security functions of the Department of Defense; and

"(H) provide other assistance as the Secretary determines appropriate to strengthen scientific disciplines critical to the national security functions of the Department of Defense or the college infrastructure to support the performance of defense research.

"(4) The Secretary shall, to the maximum extent practical, carry out programs under this section at institutions that agree to bear a substantial portion of the cost associated with the programs.".

SEC. 1222. RESPONSIBILITIES OF THE SECRETARY OF THE DEPARTMENT OF ENERGY FOR MEDICAL AND ENVIRONMENTAL PROGRAMS IN THE REPUBLIC OF THE MARSHALL ISLANDS

Effective on the date of enactment of this Act, all responsibilities of the Secretary of Energy for, and all activities currently underway at the Department of Energy with respect to, medical and environmental programs applicable in the Republic of the Marshall Islands shall be managed, controlled, and conducted through the Office of Environment, Safety and Health of the Department of Energy.

SEC. 1223. ECONOMIC SANCTIONS AGAINST REPUBLIC OF IRAQ

Notwithstanding any other provision of law, the President shall have the authority to restrict the importation of goods and services to the United States from any nation which continues to maintain economic relations with the Republic of Iraq in violation of economic sanctions against the Republic of Iraq imposed by the international community as a whole, or by the United States.

SEC. 1224. PRESIDENTIAL ADVISORY COMMITTEE FOR POLICY TOWARD CUBA

(a)(1) PRESIDENTIAL ADVISORY COMMITTEE FOR POLICY TOWARD CUBA.—There is hereby established a presidential advisory committee to be known as the Presidential Advisory Committee for Policy Toward Cuba (hereafter in this section referred to as the "Advisory Committee"). The purpose of the Advisory Committee shall be to provide advice and recommendations relating to all aspects of United States policy toward Cuba.

(2) The Advisory Committee shall consist of seven members each of whom shall be

citizens of the United States. The President shall appoint such members of the Advisory Committee not later than 60 days after the date of the enactment of this Act. Not more than four of such members may be from the same political party. Each member of the Advisory Committee shall serve for the life of the Advisory Committee.

(3) The President shall appoint one of the members of the Advisory Committee to serve as Chairman. The Advisory Committee shall meet as may be necessary, at the call of the Chairman, or at the call of two-thirds of the members of the Committee.

(4) The Secretary of State shall make available to the Advisory Committee such staff, information, personnel, and administrative services and assistance as it may reasonably require to carry out its activities.

(b) PURPOSE.—(1) It shall be the purpose of the Advisory Committee to advise and make policy recommendations to the President and the Secretary of State on sound policies toward Cuba.

(2) In carrying out the purposes referred to in paragraph (1), the Advisory Committee shall—

(A) make recommendations relating to policy options to encourage freedom for the people of Cuba;

(B) propose a plan for providing appropriate assistance to the people of Cuba in the event the present government is changed; and

(C) make recommendations on immigration and trade between the United States and Cuba.

(c) REPORTS.—(1) The Advisory Committee shall submit annual reports detailing the advice and recommendations referred to in subsection (b).

(2) The Advisory Committee shall submit a final report detailing such advice and recommendations 30 days before its termination date.

(3) The Advisory Committee shall submit a copy of the reports referred to in paragraphs (1) and (2) to the President, the Secretary of State, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives.

(d) APPLICATION OF FEDERAL ADVISORY COMMITTEE ACT.—The provisions of the Federal Advisory Committee Act shall apply to the Advisory Committee, except that—

(1) the meetings of the Advisory Committee shall be exempt from the requirements of subsections (a) and (b) of sections 10 and 11 of the Federal Advisory Committee Act (5 U.S.C. App.) (relating to open meetings, public notice, public participation, and public availability of documents), whenever and to the extent it is determined by the President or his designee that such meetings will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of policy toward Cuba; and

(2) meetings may be called of special task forces or other such groups made up of members of the Advisory Committee.

(e) OTHER ACTIVITIES BY MEMBERS OF ADVISORY COMMITTEE.—Nothing contained in this section may be construed to authorize or require any member of the Advisory Committee or any other individual to participate directly in any other official Government meeting on any matter referred to in subsection (b). To the maximum extent practicable, the members of the Advisory Committee shall be informed and consulted before and during any such meetings. Advisory Committee members may be designated as advisors to a United States delegation to such meeting and may be permitted to participate in other international meetings to the extent the President deems appropriate, except that they may not speak or negotiate for the United States at such meetings.

(f) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.

(g) TERMINATION.—The Advisory Committee shall terminate 3 years after the date of enactment of this Act.

SEC. 1225. LITHUANIAN EMERGENCY RELIEF

Chapter 9 of part I of the Foreign Assistance Act of 1961 (relating to international disaster assistance) is amended by adding at the end thereof the following new section:

"SEC. 495L. LITHUANIAN EMERGENCY RELIEF.—(a)(1) The Congress recognizes that prompt United States assistance is necessary to alleviate the emergency existing in the Republic of Lithuania caused by the economic blockade imposed by the Union of Soviet Socialist Republics which has caused great suffering among the Lithuanian people, especially with regard to a severe shortage of medical supplies and the basic necessities of life.

"(b)(1) The Administrator of the Agency for International Development shall—

"(i) furnish, in accordance with the authorities of this chapter, humanitarian assistance for the relief of the Lithuanian people during the existing emergency;

"(ii) solicit private sector donations of humanitarian assistance for Lithuania; and

"(iii) cooperate with private relief agencies attempting to provide humanitarian aid to Lithuania;

"(2) The Commander-in-Chief of United States Transportation Command is authorized to provide all airlift and sealift necessary, throughout the course of the Lithuanian blockade, to transport United States public and private donations of medical supplies to Lithuania on a regular basis and should begin such transport as soon as the agreement described in subsection (e) has been concluded.

"(c) For purposes of this paragraph, the term 'humanitarian assistance' includes—

"(i) oil, gas and fuel for emergency vehicles and medical facilities;

"(ii) water purification supplies, materials for immunization, and other materials needed to prevent the outbreak of contagious diseases and to safeguard public health;

"(iii) medical supplies; and

"(iv) food and clothing.

"(d)(1) In addition to funds authorized to be appropriated to carry out this chapter, there are authorized to be appropriated to the President $10,000,000 to carry out subsections (b)(1) and (b)(2).

"(2) Funds appropriated pursuant to paragraph (1) are authorized to remain available until expended.

"(3) The authority contained in the Foreign Assistance Act of 1961 to transfer funds between accounts shall not apply with respect to funds appropriated pursuant to paragraph (1).

"(e) The Congress urges the President to begin negotiations immediately with the nations surrounding Lithuania, including Latvia, Estonia, the Union of Soviet Socialist Republics and Poland regarding the importation of critical humanitarian assistance. Pending conclusion of these negotiations, the Administrator of the United States Agency for International Development shall furnish the necessary humanitarian assistance through the International Red Cross, the Lithuanian Red Cross, CARITAS, and other relief agencies, to ensure the Lithuanians begin to receive critical humanitarian assistance immediately.

"(f) Assistance may be provided under this section notwithstanding any other provision of law, other than that included in Public Law 101-179, section 503, known as the Support for East European Democracy (SEED) Bill of 1989.".

SEC. 1226. CONTINGENCY FEES IN LOBBYING

(a) That chapter 11 of title 18, United States Code, is amended by—

(1) inserting between sections 219 and 223, the following new section:

"§ 220. Contingency fees in lobbying

"(a)(1) It shall be unlawful for any person to make, with intent to influence, any oral or written communication on behalf of any other person other than the United States, to any department, agency, court, House of Congress, or Commission of the United States, for compensation if such compensation has knowingly been made dependent—

"(A) upon any action of Congress, including but not limited to actions of either the House of Representatives or the Senate, or any committee or member thereof, or the passage or defeat of any proposed legislation;

"(B) upon the securing of an award, or upon the denial of an award, of a contract or grant by establishment of the Federal Government; or

"(C) upon the securing, or upon the denial, of any Federal financial assistance or any other Federal contract or grant.

"(2) The provisions of paragraph (1) shall not apply in any case involving the collection of any amount owed on a debt or on a contract claim owed to a person by the Federal Government.

"(b) Any person who violates the provisions of this section shall be fined not more than $50,000 or imprisoned not more than two years, or both.

"(c) The Attorney General may bring a civil action in any United States district court, on behalf of the United States, against any person who engages in conduct prohibited by this section in lieu of or in addition to an action taken pursuant to subsection (b), and, upon proof of such conduct by a preponderance of the evidence, may recover twice the amount of any proceeds obtained by that person due to such conduct. Such civil action shall be barred unless the action is commenced within six years after the later of (1) the date on which the prohibited conduct occurred, or (2) the date on which the United States became or reasonably should have become aware that the prohibited conduct had occurred."; and

(2) amending the table of sections by striking out the item between the item relating to section 219 and the item relating to section 224 and inserting in lieu thereof the following:

"220. Contingency fees in lobbying.".

(b) This section and the amendments made by this section shall become effective on the date of enactment of this Act and shall apply to any contract entered into on or after such date of enactment.

PART C—MISCELLANEOUS STUDIES AND REPORTS

SEC. 1231. STUDY AND REPORT BY THE SECRETARY OF DEFENSE

(a) IN GENERAL.—The Secretary of Defense shall conduct a study to determine the feasibility and desirability of permitting the North Atlantic Treaty Organization (NATO) to utilize, for training and exercise purposes, military installations in the United States being closed by the Department of Defense. In carrying out such a study, the Secretary shall consider—

(1) the exact purposes for which such installations could be appropriately and effectively used by NATO; and

(2) the manner in which NATO would pay for the use of such installations.

(b) REPORT.—The Secretary shall submit to Congress a report containing the results of the study required by subsection (a) together with such comments and recommendations the Secretary considers appropriate.

(c) DEADLINE FOR REPORT.—The Secretary shall submit the report required by subsection (c) not later than January 1, 1991.

SEC. 1232. ACCESS TO CERTAIN RESTRICTED SPECIAL USE AIRSPACE

(a) STUDY REQUIRED.—The Secretary of Defense shall conduct a study to determine the feasibility of permitting civilian commercial aircraft to have access to restricted special use airspace over the coastal waters of the mid-Atlantic region of the Eastern United States for the purpose of enhancing commercial aviation safety, improving air traffic control efficiency, and reducing the impact of aviation noise on populated areas.

(b) REPORT.—(1) The Secretary shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report containing the results of the study required by subsection (a) not later than 90 days after the date of the enactment of this Act together with such comments and recommendations as the Secretary considers appropriate. The report may be submitted in both classified and unclassified form.

(2) The Secretary shall include in the report, at a minimum, the following:

(A) A discussion of the current policy of the Department of Defense regarding civilian access to restricted special use airspace.

(B) An accounting of civilian aircraft access to such special use airspace in each of the two years immediately preceding the year in which this Act is enacted.

(C) A summary of requests received by the Department of Defense from the Federal Aviation Administration for increased access to the special use airspace referred to in subsection (a) and the disposition of those requests by the Department of Defense.

(D) Proposals for permitting increased access to such special use airspace, particularly during daylight hours, by civil aviation aircraft.

(E) An analysis of the feasibility of providing such access.

(c) DEVELOPMENT OF PROCEDURES.—If the Secretary determines on the basis of the study referred to in subsection (a) that additional access to the special use airspace described in that subsection can be permitted, consistent with the national security interests of the United States, the Secretary shall develop, in coordination with the Secretary of Transportation, procedures for providing access to civilian commercial aircraft to such airspace.

SEC. 1233. CONSULTATION AND REPORT REQUIREMENTS RELATING TO RANCH HAND STUDY OF DEPARTMENT OF THE AIR FORCE

(a) CONSULTATION WITH ADVISORY COMMITTEE.—The Ranch Hand Advisory Committee may consult directly with and provide information and recommendations directly to the Department of the Air Force scientists conducting the Ranch Hand Study, and such scientists may consult directly with and provide information and recommendations directly to the Ranch Hand Advisory Committee. No officer or employee of the Federal Government may intervene in or impair direct communication between the Ranch Hand Advisory Committee and such scientists under this section except as may be necessary to prevent an inappropriate disclosure of classified information.

(b) ANNUAL REPORTS.—(1) Not later than February 1 of each year, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the activities of the Air Force scientists referred to in subsection (a) during the calendar year preceding the year in which a report is submitted. The first such report shall be submitted not later than February 1, 1991.

(2) Each report referred to in paragraph (1) shall include the following:

(A) A discussion of the progress made in the Ranch Hand Study during the period covered by the report.

(B) A summary of the scientific activities conducted during that period and the findings resulting from those activities, to be prepared by the scientists conducting those activities.

(3) Such a report need not contain (A) a discussion of progress discussed in any other report prepared by the Department of Defense (under this section or otherwise) regarding the Ranch Hand Study, or (B) a scientific summary included in any other such report, unless modification of such discussion or summary is appropriate for completeness, accuracy, and currency.

(c) DEFINITIONS.—In this section:

(1) The term "Ranch Hand Advisory Committee" means the committee known as the "Advisory Committee on Special Studies Relating to the Possible Long-term Health Effects of Phenoxy Herbicides and Contaminants" established by the Secretary of Health and Human Services to monitor the conduct of the Ranch Hand Study.

(2) The term "Ranch Hand Study" means the special study conducted by the Secretary of the Air Force relating to the possible long-term effects of phenoxy herbicides and contaminants on Air Force personnel who participated in Operation Ranch Hand in the Republic of Vietnam during the Vietnam era.

PART D—CONGRESSIONAL FINDINGS; POLICIES; AND COMMENDATIONS

SEC. 1241. OVERVIEW PRESENTATION OF MILITARY STRATEGY

It is the sense of the Congress that the President should provide for the Speaker of the House, the President pro tempore of the Senate, the minority leaders of the House and Senate, and the chairmen and ranking minority members of the Armed Services and Appropriations Committees of the House and Senate to be given annually an overview presentation on the United States top-level military strategy and its implementation by strategic forces, including the impact on targeting requirements, resources, and force structure.

SEC. 1242. START AND STRATEGIC MODERNIZATION

(a) FINDINGS.—The Senate makes the following findings:

(1) The United States and the Soviet Union are engaged in the Strategic Arms Reduction Talks (START).

(2) In the Joint Statement on the Treaty on Strategic Offensive Arms signed in June 1990, the two sides reaffirmed their determination to have the treaty completed and ready for signature by the end of this year.

(3) Under the provisions of a START Treaty, both sides will carry out significant reductions in strategic offensive arms.

(4) In the Joint Statement on Future Negotiations on Nuclear and Space Arms and Further Enhancing Strategic Stability, the United States and the Soviet Union agreed to pursue new talks on strategic offensive arms, and on the relationship between strategic offensive and defensive arms.

(5) The objectives of these negotiations will be to reduce further the risk of outbreak of war, particularly nuclear war, and to ensure strategic stability, transparency and predictability through further stabilizing reductions in the strategic arsenals of both countries.

(6) The President's effort to negotiate such agreements is dependent upon the maintenance of a vigorous research and development and modernization program as required for a prudent defense posture.

(7) The Soviet Union has maintained a robust strategic modernization program throughout the course of the START negotiations which continues today.

(b) It is the sense of the Senate that—

(1) the Senate fully supports United States efforts to enhance strategic stability; and

(2) the United States should pursue stabilizing strategic arms reduction agreements while maintaining a vigorous research and development and modernization program for United States strategic forces.

SEC. 1243. STRATEGIC ARMS REDUCTION TREATY

It is the sense of the Senate that, pursuant to its constitutional responsibilities of advice and consent in respect to treaties, the Senate requests that before concluding a proposed Strategic Arms Reduction Treaty, the President provide—

(1) a special classified and unclassified report to the Senate on whether the SS-23 INF missiles of Soviet manufacture, which the Soviets have confirmed have existed in the territories of East Germany, Czechoslovakia, and Bulgaria, constitute a violation of the INF Treaty or constitute deception in the INF negotiations, and whether the United States has reliable assurances that the missiles will be destroyed; and

(2) a special classified and unclassified report to the Senate on whether the Soviet Krasnoyarsk radar, which Soviet Foreign Minister Shevardnadze admitted is a clear violation of the ABM Treaty, has been verifiably dismantled in accordance with United States criteria.

SEC. 1244. THEATER DEFENSE PROGRAM

(a) FINDINGS.—Congress makes the following findings:

(1) The Director of Central Intelligence, William Webster, has testified before Congress that between 15 and 20 developing nations will possess ballistic missile capabilities by the end of the century.

(2) The Director has also testified that by the year 2000, at least six third-world countries will have ballistic missiles with ranges of up to 1,800 miles, and three of them may

develop ballistic missiles with a range of 3,400 miles.

(3) The Director has also testified ". . . that as many as 20 countries may be developing chemical weapons; and we expect this trend to continue despite ongoing multilateral efforts to stop their proliferation . . . At least 10 countries are working to produce both previously known and futuristic biological weapons.".

(4) During the war between Iraq-Iran each used ballistic missiles and chemical payloads.

(5) The Defense Intelligence Agency (DIA) has also informed Congress that, in addition to the five nuclear weapons countries—United States, Soviet Union, England, France, and China—"about half of a dozen additional countries have either acquired a capability to explode a nuclear device or are pursuing such a capability".

(6) DIA has also informed Congress that the proliferation of ballistic missiles is occurring at an ever-increasing pace. In just the last 2 years:

(A) Over 1,000 ballistic missiles have been fired in combat in Iran, Iraq, and Afghanistan.

(B) Flight tests of ballistic missiles have occurred in India, Pakistan, and South Africa.

(C) Iraq has conducted an initial flight test of a space launch vehicle, which will enhance greatly their already extensive ballistic missile capability.

(D) The longest range (1800+ mile) ballistic missiles in the Middle East have been supplied to Saudi Arabia by China.

(7) The proliferation of ballastic missile, chemical weapons and nuclear technology poses a direct threat to many of our friends and allies. Moreover, U.S. contingency and projection forces are also threatened by these technologies, and this threat will increase in the future.

(b) Therefore, it is the sense of the Congress that:

(1) The proliferation to developing countries of ballistic missiles and chemical and nuclear weapons technology applicable to missile warhead development are potentially destabilizing, a threat to U.S. security commitments, and also pose a significant threat to the national security of our friends and allies around the the world.

(2) Of the funds authorized for the Strategic Defense Initiative, up to $300,000,000 should be made available for the development of anti-tactical ballistic missile (ATBM) systems to counter such threats to U.S. forward deployed and projected forces. In this regard, the Congress recommends that the development of systems such as the Extended Range Interceptor and the Theater High Altitute Air Defense should be accelerated.

(3) The SDI Organization should ensure that the Navy and Marine Corps are involved in developmental programs for future ATBM systems suitable for deployment with their projection and expeditionary forces.

(4) Since the ARROW ATBM has been sucessful joint development program and, when deployed, will become an important asset for the defense of Israel against the threat of short range ballistic missiles in the region, the Secretary of Defense should negotiate, on an equitable basis, a memorandum of agreement to continue the program. Therefore, of the funds available for the Theater Defense program element in SDI program, not more than $50,000,000 should be made available for the ARROW program.

(5) Of the funds authorized to the Army for Research, Development, Testing, and Evaluation, not more than $50,000,000 should be made available to conduct additional tests of the PATRIOT II system against existing types of ballistic missile threats.

(6) The Army should establish a vigorous program to develop and test a rapidly deployable ATBM capability for U.S. units. For the near-term, the focus should be on the PATRIOT II system. From within these funds made available for PATRIOT II testing, the Army should also develop support systems, such as tracking and attack assessment radars, for existing and future ATBM systems.

SEC. 1245. SENSE OF CONGRESS REGARDING THE CLOSURE OF UNITED STATES MILITARY INSTALLATIONS OUTSIDE THE UNITED STATES

(a) FINDINGS.—Congress makes the following findings:

(1) It was reported in the July 28, 1990, European edition of the Stars and Stripes publication that General John R. Galvin, Commander-in-Chief of the United States European Command, has submitted to the Secretary of Defense a list of United States military installations located outside the United States that the General recommends be closed.

(2) During consideration of legislative proposals authorizing appropriations for the Department of Defense for fiscal year 1991 by the Committee on Armed Services of the Senate, General Galvin indicated he would announce a list of 100 United States military installations outside the United States he recommends for closure.

(3) Many Members of Congress strongly believe that United States military installations outside the United States should be closed in lieu of closing military installations located in the United States.

(b) SENSE OF CONGRESS.—In light of the findings expressed in subsection (a), it is the sense of Congress that—

(1) the Secretary of Defense should make public any recommendations made to the Secretary of Defense by General John R. Galvin regarding the closure of United States military installations outside the United States and any other recommendations submitted to the Secretary by other commanders of combatant commands regarding the closure of United States military installations outside the United States; and

(2) the closure of such installations located outside the United States should be accomplished at the discretion of the Secretary of Defense at the earliest opportunity.

SEC. 1246. UNITED STATES FACILITIES IN GERMANY

(a)(1) The Government of the United States has publicly committed itself to the reduction of the military forces which it deploys in Western Europe in general, and in the Federal Republic of Germany in particular.

(2) The United States Army already is drawing up plans for the closure and realignment of United States military facilities in the Federal Republic of Germany.

(3) Many United States military facilities in the Federal Republic of Germany are located on municipal property of high value.

(4) The continuance of cordial relations between the peoples of the United States and Federal Republic of Germany is a matter of major concern, both for the health of United States-German relations and the strength of the North Atlantic Treaty Organization.

(b) It is the sense of the Senate that the Department of Defense should, whenever possible, consult closely with the central, state, and municipal authorities in the Federal Republic of Germany with a view to closing those United States facilities located in municipal areas with high property values, particularly when those facilities could be developed for commercial or residential purposes.

SEC. 1247. PHILIPPINE EARTHQUAKE RELIEF EFFORT

(a) FINDINGS.—The Senate makes the following findings:

(1) The men and women in the United States Air Force, Marine Corps, and Navy serving in the Pacific region have given substantial and significant assistance to the Government and people of the Philippines following the July 16 earthquake, which resulted in the deaths of over one thousand six hundred people, as well as severe dislocation and devastation.

(2) United States military personnel stationed in the Philippines have traditionally exhibited a strong respect and admiration for the people of the Philippines.

(3) A Marine Corps pilot was killed in a helicopter crash during an earthquake relief mission on July 20.

(4) The United States Air Force has flown over two hundred and twenty sorties, including medical evacuations to assist in earthquake relief.

(5) The Marine Corps has flown over two hundred and fifty aircraft missions, and has transported via helicopter over one thousand Philippine nationals and more than five hundred thousand pounds of cargo.

(6) Navy medical personnel from Subic Bay have provided critical medical assistance to those injured in the earthquake.

(7) More than one thousand one hundred and forty tons of supplies and equipment have been airlifted to the Philippines or transported over land to Baguio City and Cabanatuan City, areas devastated by the earthquake.

(8) Military civil engineering teams have restored more than half the damaged water systems and all of the electrical systems, and have provided heavy equipment to aid in rescue operations.

(9) Six hundred and fifty units of blood were donated by members of Clark Air Force Base and other Pacific Air Force bases, and one hundred and twenty units of blood were donated by members of Subic Bay Naval Facility.

(b) It is the sense of the Senate, that—

(1) the earthquake relief assistance provided by United States military forces has played an essential role in the Philippine recovery from the July 16 earthquake; and

(2) those United States Armed Forces and their dependents who have assisted in Philippine earthquake relief should be commended by the United States Senate for their considerable efforts on behalf of the Philippine people in their recovery efforts.

SEC. 1248. COMMEMORATION OF THE EFFORTS OF THE BATTLE OF THE BULGE HISTORICAL FOUNDATION

(a) FINDINGS.—Congress makes the following findings:

(1) The Battle of the Ardennes-Alsace Campaign of World War II, commonly known as the Battle of the Bulge, was fought in the Ardennes region of eastern Belgium and northern Luxembourg, from December 16, 1944, to January 25, 1945, in the deepest snow and during the coldest

temperatures in the memory of the inhabitants of the region.

(2) Six hundred thousand members of the Armed Forces of the United States fought in the Battle of the Bulge, making the battle the largest land battle ever fought by United States military forces.

(3) The battle claimed 81,000 United States casualties, including 19,000 killed.

(4) In 1988, many of the veterans of the battle, including the 7,000 member organization known as the Veterans of the Battle of the Bulge, organized the Battle of the Bulge Historical Foundation to commemorate the heroic sacrifices made by the men and women who saw action during the Battle of the Bulge, to pay homage to the servicemen killed in that battle, and to inform the present and future youth of this Nation regarding the costs of war and the price of liberty.

(5) The efforts of the foundation are directed toward expanding the existing United States Army Museum, located at Fort George G. Meade, Maryland, to include a gallery dedicated to the battle, the participants of the battle, and World War II.

(6) The Museum and the foundation have agreed to act jointly to achieve goals relating to the commemoration of that battle.

(7) Installation of a gallery at the museum will result in the museum having the only gallery in the United States devoted exclusively to commemorating that battle.

(8) The Battle of the Bulge Historical Foundation has set as a goal to raise $1,500,000 by December 16, 1994, the 50th anniversary of the battle, to accomplish the objective of appropriately preserving the memory of the battle.

(b) RECOGNITION AND COMMENDATION.—In light of the findings in subsection (a), Congress recognizes and commends the efforts of the Battle of the Bulge Historical Foundation to provide for the installation of a special gallery at the United States Army Museum at Fort George G. Meade, Maryland, devoted to the collection, preservation, and exhibition of military artifacts relating to the Battle of the Bulge and to commemorate that historic battle.

SEC. 1249. HONORING GENERAL MATTHEW B. RIDGWAY

(a) FINDINGS.—The Congress finds that—

(1) General Matthew Bunker Ridgway, United States Army (Retired) served his country with great honor and distinction for more than forty years;

(2) during World War II, General Ridgway commanded the 82nd Airborne Division and later the XVIII Airborne Corps, leading his soldiers in some of the toughest fighting of the European theater to achieve Allied victories in North Africa, Sicily, Italy, the Normandy invasion, the Battle of the Bulge, and the crossing of the Rhine and Elbe Rivers.

(3) in Korea, during the depths of the bitter winter of 1950, General Ridgway took command of the seriously demoralized Eighth Army, motivated and inspired it to "Stand and Fight," and led it on the offensive again;

(4) under his leadership, the military forces of the United Nations Command in Korea recaptured territory that had been lost earlier to overwhelming enemy forces and forced the onset of armistice negotiations; and

(5) after his commands in the Korean war, General Ridgway continued his outstanding service to his country by serving in the positions of Supreme Commander of Allied Powers in Europe and Chief of Staff of the United States Army.

(b) SENSE OF CONGRESS.—In light of the findings expressed in subsection (a), it is the sense of Congress that—

(1) General Ridgway deserves the highest honor and utmost respect of the United States and its citizens for his extraordinary service and dedication to their security; and

(2) a Congressional Gold Medal should be struck in honor of his lifetime of superior achievements.

PART E—82ND AIRBORNE DIVISION ASSOCIATION INCORPORATED

SEC. 1251. CHARTER

The 82nd Airborne Division Association, Incorporated, a nonprofit corporation organized under the laws of the State of Illinois, is recognized as such and is granted a Federal charter.

SEC. 1252. POWERS

The 82nd Airborne Division Association, Incorporated (hereinafter in this part referred to as the "corporation"), shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

SEC. 1253. OBJECTS AND PURPOSES OF CORPORATION

The objects and purposes of the corporation are those provided in its articles of incorporation and shall include—

(1) perpetuating the memory of members of the 82nd Airborne Division who fought and died for our Nation,

(2) furthering the common bond between retired and active members of the 82nd Airborne Division,

(3) providing educational assistance in the form of college scholarships and grants to the qualified children of current and former members,

(4) promoting civic and patriotic activities, and

(5) promoting the indispensable role of airborne defense in our national security.

SEC. 1254. SERVICE OF PROCESS

With respect to service of process, the corporation shall comply with the laws of the State or States in which it is incorporated and the State or States in which it carries on its activities in furtherance of its corporate purposes.

SEC. 1255. MEMBERSHIP

(a) Subject to subsection (b), eligibility for membership in the corporation and the rights and privileges of members of the corporation shall be as provided in the constitution and bylaws of the corporation.

(b) Terms of membership and requirements for holding office within the corporation shall not discriminate on the basis of race, color, national origin, sex, religion, or handicapped status.

SEC. 1256. BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

The composition of the board of directors of the corporation and the responsibilities of such board shall be as provided in the articles of incorporation of the corporation and shall be in conformity with the laws of the State or States in which it is incorporated.

SEC. 1257. OFFICERS OF CORPORATION

The positions of officers of the corporation and the election of members to such positions shall be as provided in the articles of incorporation of the corporation and shall be in conformity with the laws of the State or States in which it is incorporated.

SEC. 1258. RESTRICTIONS

No part of the income or assets of the corporation may inure to the benefit of any member, officer, or director of the corporation or be distributed to any such individual during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual and necessary expenses in amounts approved by the board of directors.

(b) The corporation may not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

SEC. 1259. LIABILITY

The corporation shall be liable for the acts of its officers and agents whenever such officer and agents have acted within the scope of their authority.

SEC. 1260. BOOKS AND RECORDS; INSPECTION

The corporation shall keep correct and complete books and records of account and minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep, at its principal office, a record of the names and addresses of all members having the right to vote in any proceeding of the corporation. All books and records of such corporation may be inspected by any member having the right to vote in any corporation proceeding, or by any agent or attorney of such member, for any proper purpose at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

SEC. 1261. AUDIT OF FINANCIAL TRANSACTIONS

The first session of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(74) 82nd Airborne Division Association, Incorporated.".

SEC. 1262. ANNUAL REPORT

The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the time as the report of the audit of the corporation required by section 2 of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101). The report shall not be printed as a public document.

SEC. 1263. RESERVATION OF RIGHT TO AMEND, ALTER, OR REPEAL CHARTER

The right to amend, alter, or repeal this part is expressly reserved to the Congress.

SEC. 1264. DEFINITION OF STATE

For purposes of this part, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States.

SEC. 1265. TAX-EXEMPT STATUS

The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code of 1986.

SEC. 1266. TERMINATION

If the corporation fails to comply with any of the restrictions or provisions of this part, the charter granted by this part shall expire.

PART F—MISSILE TECHNOLOGY

SEC. 1271. SHORT TITLE

This Part may be cited as the "Missile Technology Control Act of 1990".

SEC. 1272. FINDINGS

The Congress finds that—

(1) the global spread of weapons of mass destruction, accompanied by the proliferation of sophisticated missile delivery systems and missile technology, poses a serious threat to stability and peace in many regions;

(2) the Missile Technology Control Regime (MTCR) was established in 1987 to restrict such proliferation;

(3) notwithstanding the existence of the MTCR, companies situated in countries which are adherents to the MTCR have transferred, in violation of the principles of that agreement, missile equipment and technology to nonadherents;

(4) the MTCR is further weakened as it does not include the Soviet Union, China, Argentina, North Korea, Brazil, and other countries, which have transferred missiles and missile technology to countries without this capability;

(5) missile proliferation could be better controlled if MTCR adherents shared a common interpretation of the MTCR principles and strictly enforced its provisions;

(6) the spread of missiles can be effectively restricted only if all countries involved in the transfer of such missiles and technology agree to restrict such transfers;

(7) coordination and cooperation between the agencies charged with responsibility for carrying out United States policy on missile control is essential; and

(8) greater consultation between the President and the Congress is needed to ensure that Congress is being kept fully informed about missile proliferation and development, and ongoing measures to halt missile proliferation.

SEC. 1273. PURPOSE

It is the purpose of this part—

(1) to restrict the proliferation of missiles and missile equipment and technology;

(2) to encourage greater international adherence to the Missile Technology Control Regime (MTCR) of 1987;

(3) to strengthen the MTCR through increased cooperation among adherents to strengthen coordination of export controls;

(4) to seek further bilateral and multilateral agreements which complement the MTCR;

(5) to encourage countries without missiles to forego the development or acquisition of these weapons; and

(6) to require stricter enforcement procedures and improved cooperation among the United States agencies responsible for controlling missile and missile technology exports.

SEC. 1274. AMENDMENT TO THE ARMS EXPORT CONTROL ACT

The Arms Export Control Act is amended by inserting after chapter 6 (22 U.S.C. 2795b. et seq.) the following new chapter:

"CHAPTER 7—CONTROL OF MISSILES AND MISSILE EQUIPMENT AND TECHNOLOGY

"SEC. 71. POLICY

"It is the policy of the United States to improve the control of and reduce the proliferation of missiles and missile equipment and technology by taking all appropriate measures—

"(1) to improve enforcement and seek a common and broader interpretation among Missile Technology Control Regime (MTCR) members of MTCR principles;

"(2) to increase the number of countries that adhere to the MTCR;

"(3) to explore with nations that do not adhere to the MTCR and which export missiles and missile equipment and technology the negotiation of bilateral and multilateral agreements consistent with the principles of the MTCR or which, at a minimum, do not undercut the MTCR;

"(4) to promote the international review of measures and development of common standards to reduce the proliferation of missiles and missile equipment and technology; and

"(5) to seek binding multilateral agreements prohibiting the global spread of missiles that are subject to MTCR guidelines.

"SEC. 72. DENIAL OF THE TRANSFER OF MISSILE EQUIPMENT AND TECHNOLOGY BY UNITED STATES PERSONS

"(a) SANCTION.—If the President determines that a United States person has transferred, or conspired to transfer or facilitated the transfer in violation of the provisions of section 38 of the Arms Export Control Act (22 U.S.C. 2778), section 5 or 6 of the Export Administration Act of 1979 (50 U.S.C. App. 2404, 2405), or any regulations issued under any such provisions of—

"(1) MTCR category II missile equipment and technology then the President shall deny to such United States person for a period of two years—

"(A) United States Government contracts relating to missile equipment and technology; and

"(B) licenses for the transfer of missile equipment and technology controlled pursuant to this Act;

"(2) MTCR category I missile equipment and technology, then the President shall deny to such United States person for a minimum of two years—

"(A) all United States Government contracts, and

"(B) all export licenses and agreements for items on the United States Munitions List.

"(b) DISCRETIONARY SANCTIONS.—In the case of any determination made pursuant to subsection (a), the President may pursue any sanctions listed in section 38(c) of this Act.

"(c) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

"(1) the product or service is essential to the national security of the United States; or

"(2) such person is a sole source supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments.

"SEC. 73. TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY BY FOREIGN PERSONS

"(a) SANCTION.—If the President determines that a foreign person has transferred, after the date of enactment, MTCR missile equipment or technology that would be, if it were United States-origin equipment or technology, subject to the jurisdiction of the United States under this Act—

"(1) within category II of the MTCR annex or the President has made a determination under section 11B(b)(1) of the Export Administration Act of 1979, as amended, then the President shall deny, for a period of two years—

"(A) United States Government contracts relating to missile equipment or technology, and

"(B) licenses for the transfer to such foreign person of missile equipment and technology controlled pursuant to this Act;

"(2) within category I of the MTCR annex, then the President shall deny for a period of not less than two years—

"(A) all United States Government contracts with such foreign person, and

"(B) licenses for the transfer to such foreign person of all items on the United States Munitions List.

"(b) DISCRETIONARY SANCTIONS.—If the President determines that a foreign person has transferred missile equipment or technology he may impose any sanction described in section 11A(b) of the Export Administration Act of 1979, as amended.

"(c) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions under subsection (a) if the President certifies to the Congress that—

"(1) in the case of an item the transfer of which has been authorized by an MTCR adherent, after consultation with the licensing government, the transfer did not violate the principles of the MTCR guidelines;

"(2) the product or service is essential to the national security of the United States;

"(3) such person is a sole source supplier of the product or service, the product or service is not available from any alternative reliable supplier, and the need for the product or service cannot be met in a timely manner by improved manufacturing processes or technological developments; or

"(4) the foreign person has been appropriately sanctioned by its national government.

"SEC. 74. PROHIBITION ON SATELLITE LICENSING

"The United States Government shall not, through the issuance of licenses under this Act, assist any missile program of the People's Republic of China, directly or indirectly, and shall not, through the issuance of licenses under this Act, permit the export or the shipment of United States satellites for launch on Chinese space launch vehicles and shall revoke any previously issued licenses granted for the export of such satellites unless the President certifies to the Congress that, in the one year prior to the certification, China has not supplied missiles, missile equipment and technology, or chemical or biological weapons, including precursors intended for use in such weapons, to Iran, Iraq, Syria, Libya, or any non-MTCR adherent, and has provided reasonable assurances that no future sales of missiles, missile equipment and technology or chemical or biological weapons to such countries are planned.

"SEC. 75. REPORT ON MISSILE PROLIFERATION

"(a) CONTENTS OF REPORT.—Not later than ninety days after the date of enactment of

this Act, and every one hundred and eighty days thereafter, the Secretary of State shall submit to the Congress a report on international transfers of aircraft which the Secretary has reason to believe may be intended to be used for the delivery of nuclear, biological, or chemical weapons (hereafter referred to as 'NBC capable aircraft') and international transfers of missiles and missile equipment and technology to Syria, Iraq, Libya, and Iran, and any other nation seeking to acquire such equipment or technology in violation of MTCR principles, other than those listed in subsection (d) that shall include—

"(1) the status of missile and aircraft development programs in such nations, including efforts by those nations to acquire missiles or missile equipment and technology and NBC capable aircraft and an assessment of the present and future capability of those countries to produce and utilize such weapons;

"(2) a description of particular significant assistance provided, after the date of enactment, to such nations, in the development of missile systems, as defined in the MTCR, and NBC capable aircraft and its source;

"(3) a list of companies which continue to provide missile equipment and technology to such nations, as of the date of the report;

"(4) a description of diplomatic measures that the United States has taken or that other MTCR members have made to the United States with respect to activities of private firms and countries suspected of violating the MTCR;

"(5) an analysis of the effectiveness of the regulatory and enforcement regimes of the United States and its MTCR partners to control the export of missiles and missile technology; and

"(6) a determination as to whether transfers of missile equipment and technology by any country pose a significant threat to the national security interests of the United States.

"(b) CLASSIFICATION.—The President shall make every effort to submit all of the information required by subsection (a) in unclassified form. Whenever the President submits any such information in classified form, he shall submit such classified information in an addendum and shall also submit simultaneously a detailed summary, in unclassified form, of such classified information.

"(c) CONSTRUCTION.—Nothing in this section—

"(1) requires the disclosure of information in violation of Senate Resolution 400 of the Ninety-fourth Congress or otherwise alters, modifies, or supersedes any of the authorities contained therein; or

"(2) shall be construed as requiring the President to disclose any information which, in his judgment, would seriously—

"(A) jeopardize the national security of the United States;

"(B) undermine existing and effective efforts to meet the policy objectives outlined in section 71 of this Act; or

"(C) compromise sensitive intelligence operations, with resulting grave damage to the national security interests of the United States.

"(d) EXCLUSIONS.—Australia, Belgium, Canada, Denmark, Federal Republic of Germany, France, Greece, Iceland, Israel, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey and the United Kingdom.

"SEC. 77. DEFINITIONS

For purposes of this chapter—

"(1) the term 'Missile Technology Control Regime' or 'MTCR' means the policy statement, between the United States, the United Kingdom, the Federal Republic of Germany, France, Italy, Canada, and Japan, announced on April 16, 1987, to restrict sensitive missile-relevant transfers based on annex of missile equipment and technology, and any subsequent amendments;

"(2) the terms 'missile' and 'missile equipment and technology' mean those items listed in the MTCR Equipment and Technology Annex, as amended;

"(3) the term 'person' includes the singular and plural and any individual, partnership, corporation, or other form of association; and

"(4) the term 'foreign person' means any non-United States person.".

SEC. 1275. TRANSFERS OF MISSILE EQUIPMENT AND TECHNOLOGY TO COUNTRIES THAT TRANSFER OR RECEIVE MISSILE EQUIPMENT AND TECHNOLOGY

(a) SANCTIONS.—If the President determines that as of the date of enactment of this Act, or at any time thereafter, a MTCR nonadherent, authorizes the transfer of, receives, or attempts to acquire missiles or missile equipment and technology that contributes materially to the development of missile systems capable of delivering at least a 500-kg payload to a range of at least 300 km, then the President shall deny all export licenses for the transfer of—

(1) all items on the United States Munitions List, and

(2) missile equipment and missile technology controlled pursuant to the Export Administration Act of 1979, as amended.

(b) WAIVER.—The President may waive, to the extent required to meet the national security needs of the United States, the imposition of sanctions pursuant to subsection (a) if the President certifies to Congress that—

(1) to do so would be in the national security interests of the United States;

(2) the transfer in question was licensed by a government adhering to the MTCR; or

(3) the transfer in question is for an item for which the President has received reliable assurances that that item is intended for civilian end use.

(c) REMOVAL OF SANCTIONS.—The President may remove the sanctions imposed pursuant to subsection (a) if the President determines that the country under sanction has suspended attempts to acquire, transfer or receive missile equipment and missile technology for a period of at least one year.

TITLE XIII—ELIMINATION AND MODIFICATION OF REPORTS REQUIRED BY LAW

PART A—REPEAL OF EXISTING REPORT REQUIREMENTS

SEC. 1301. REPORTS REQUIRED BY TITLE 10, UNITED STATES CODE

Title 10, United States Code, is amended as follows:

(1) Chapter 2 is amended by striking out section 117.

(2) Section 673(b) is amended by striking out the last sentence.

(3) Section 836(b) is amended by striking out "and shall be reported to Congress".

(4) Section 1051 is amended—

(A) by striking out subsections (e) and (f); and

(B) by redesignating subsection (g) as subsection (e).

(5) Section 2208 is amended by striking out subsection (k).

(6) Chapter 131 is amended by striking out section 2216.

(7) Section 2313(c) is amended by striking out the last sentence.

(8) Section 2324(e)(2) is amended—

(A) in subparagraph (A), by striking out "(A)"; and

(B) by striking out subparagraphs (B) and (C).

(9) Chapter 138 is amended by striking out section 2349.

(10) Chapter 139 is amended by striking out section 2357.

(11) Section 2362 is amended—

(A) by striking out subsection (c); and

(B) by redesignating subsections (d) and (e) as subsections (c) and (d), respectively.

(12) Subsection (c) of section 2365 is amended to read as follows:

"(c) EXCEPTION.—Subsection (a) shall not apply to the development of a major weapons system (or subsystems of such system) if the Secretary determines that use of a competitive prototype program strategy is not practicable with respect to such system or subsystems.".

(13) Section 2394(b) is amended by striking out "only—" and all that follows down through the end and inserting in lieu thereof "only after the approval of the proposed contract by the Secretary of Defense.".

(14) Section 2431 is amended—

(A) by striking out subsection (b);

(B) by striking out "or (b)" in subsection (c); and

(C) by redesignating subsections (c) and (d) as subsections (b) and (c), respectively.

(15) Section 2463 is amended—

(A) by striking out subsection (b); and

(B) by redesignating subsection (c) as subsection (b).

(16) Section 2779(b) is amended by striking out paragraph (4).

(17) Section 2805(b) is amended by striking out paragraph (3).

(18) Paragraph (4) of section 2822(b) is amended to read as follows:

"(4) Housing units acquired without consideration.".

(19) Section 2823 is amended—

(A) by striking out subsection (b); and

(B) by redesignating subsections (c) and (d) as subsections (b) and (c), respectively.

(20) Section 2834 is amended—

(A) by striking out subsection (b); and

(B) by redesignating subsection (c) as subsection (b).

(21) Section 2854 is amended—

(A) in subsection (a), by striking out "(a) Subject to subsection (b), the" and inserting in lieu thereof "The"; and

(B) by striking out subsection (b).

(22) Section 2856 is amended—

(A) in subsection (a), by striking out the subsection designation "(a)"; and

(B) by striking out subsection (b).

(23) Section 2864(b) is amended by striking out "after the 21-day period" and all that follows and inserting in lieu thereof a period.

(24) Section 7308 is amended by striking out subsection (c).

(25) Section 7309(b) is amended by striking out the last sentence.

SEC. 1302. REPORT REQUIRED BY TITLE 37, UNITED STATES CODE

Title 37, United States Code, is amended as follows: Section 1008(a) is amended by striking out the last sentence.

SEC. 1303. REPORTS AND NOTIFICATIONS REQUIRED BY ANNUAL AUTHORIZATION ACTS

(a) PUBLIC LAW 101-189.—Section 852 of the National Defense Authorization Act for

Fiscal Years 1990 and 1991 (Public Law 101-189; 103 Stat. 1517) is amended—

(1) in subsection (a), by striking out the subsection designation "(a)"; and

(2) by striking out subsection (b).

(b) PUBLIC LAW 100-456.—Section 317 of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 102 Stat. 1918), is amended by striking out subsection (c).

(c) PUBLIC LAW 100-180.—The National Defense Authorization Act for Fiscal Years 1988 and 1989 (Public Law 100-180; 101 Stat. 1037) is amended—

(1) in section 112, by striking out subsection (c); and

(2) in section 1201, by striking out subsection (e).

(d) PUBLIC LAW 99-661.—Section 1207(g)(4) of the National Defense Authorization Act for Fiscal Year 1987 (Public Law 99-661; 100 Stat. 3816) is amended—

(1) by striking out subparagraph (B); and

(2) by redesignating subparagraph (C) as subparagraph (B).

(e) PUBLIC LAW 99-145.—Section 106(a)(2) of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 583) is amended by striking out "may be obligated—" and all that follows down through "(B) for acquisition" and inserting in lieu thereof "may be obligated for acquisition".

(f) PUBLIC LAW 98-115.—Subsection (b) of section 803 of the Military Construction Authorization Act, 1984 (10 U.S.C. 2821 note), is amended by striking out "if—" and all that follows down through the end of the subsection and inserting in lieu thereof "if the Secretary determines that with respect to such units compliance with the requirement in such subsection is infeasible.".

SEC. 1304. REPORTS REQUIRED BY OTHER LAWS

(a) PUBLIC LAW 85-804.—The first section of Public Law 85-804 (50 U.S.C. 1431) is amended by striking out the last two sentences.

(b) MILITARY SELECTIVE SERVICE ACT.—Section 18 of the Military Selective Service Act (50 U.S.C. App. 468) is amended—

(1) in subsection (a), by striking out ", except that no order" in the first sentence and all that follows through the second sentence and inserting in lieu thereof a period; and

(2) in subsection (h)—

(A) by striking out "(1)" after "(h)"; and

(B) by striking out paragraph (2).

(c) DEFENSE INDUSTRIAL RESERVE ACT.—The Defense Industrial Reserve Act (50 U.S.C. 451 et seq.) is amended by striking out section 5.

(d) FOREIGN ASSISTANCE ACT OF 1961.—Section 514 of the Foreign Assistance Act of 1961 (22 U.S.C. 2321h) is amended by striking out subsection (e).

PART B—MODIFICATIONS TO EXISTING REPORT REQUIREMENTS

SEC. 1311. REPORTS REQUIRED BY TITLE 10, UNITED STATES CODE

Title 10, United States Code, is amended as follows:

(1) Section 128(d) is amended by striking out "a quarterly basis" in the first sentence and inserting in lieu thereof "an annual basis".

(2) Section 402(d) is amended by striking out "At the end of each six-month period" and inserting in lieu thereof "Not later than July 31 each year".

(3) Section 662(b) is amended by striking out "the Secretary shall immediately notify Congress of" in the second sentence and inserting in lieu thereof "the Secretary shall include in the periodic report required by this subsection information on".

(4) Section 2215 is amended—

(A) in subsection (a) by striking out "reports (at the times specified under subsection (d))" and inserting in lieu thereof "an annual report (at the time specified in subsection (d))"; and

(B) by striking out subsection (d) and inserting in lieu thereof the following:

"(d) TIMING OF REPORT.—An annual report shall be submitted to Congress under this section concurrent with the President's budget.".

(5)(A) Subsection (b) of section 2401 is amended to read as follows:

"(b) The Secretary may make a contract described in subsection (a)(1) if—

"(1) the Secretary has been specifically authorized by law to make the contract; and

"(2) the Secretary determines that such a lease is warranted based on analysis of the cost to the United States (including lost tax revenue) of any such lease or charter arrangement compared with the cost to the United States of direct procurement of the aircraft or naval vessels by the United States.".

(B) Such section is further amended by striking out subsection (e) and redesignating subsection (f) as subsection (e).

(6) Section 2457(d) is amended by striking out "Before February 1 of each year," and inserting in lieu thereof "Before February 1, 1989, and biennially thereafter,".

(7) Section 2662(b) is amended by striking out "$5,000" and inserting in lieu thereof "$25,000".

(8) Section 2853(d)(3) is amended by inserting ", whichever occurs earlier" after "increased cost".

(9) Section 7434 is amended—

(A) by striking out "Within thirty days after the close of each quarter" and inserting in lieu thereof "Not later than March 1 each year"; and

(B) by striking out "preceding quarter" and inserting in lieu thereof "preceding calendar year".

SEC. 1312. REPORTS REQUIRED BY DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1985

The Department of Defense Authorization Act, 1985 (Public Law 98-525; 98 Stat. 2492) is amended—

(1) in subparagraph (A) of section 1002(d)(2), by adding at the end the following new clause:

"(xi) Other selected indicators of NATO capability."; and

(2) in section 1003(c), by striking out "March 1" and inserting in lieu thereof "April 1".

PART C—REPORT PROVISIONS PREVIOUSLY TERMINATED BY GOLDWATER-NICHOLS ACT

SEC. 1321. PURPOSE OF PART

It is the purpose of this part to repeal certain provisions of law containing report requirements terminated by section 602 of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 94-433; 100 Stat. 1066).

SEC. 1322. REPEAL OF STATUTORY PROVISIONS TERMINATED BY GOLDWATER-NICHOLS ACT

(a) TITLE 10, UNITED STATES CODE.—Title 10, United States Code, is amended as follows:

(1) Section 113 is amended—

(A) by striking out subsection (i); and

(B) by redesignating subsections (j) through (l) as (i) through (k), respectively.

(2) Paragraph (4) of section 115(b) is amended by striking out the last sentence.

(3) Section 2006(e) is amended by striking out "and report periodically" down through "of the Fund".

(4) Section 2113(j) is amended—

(A) by striking out "subject to paragraph subparagraph (2)," in subparagraphs (B), (C), and (E) of paragraph (1);

(B) by striking out paragraph (2); and

(C) by redesignating paragraphs (3), (4), and (5) as paragraphs (2), (3), and (4), respectively.

(5) Section 2307 is amended—

(A) by striking out subsection (d); and

(B) by redesignating subsection (e) as subsection (d).

(6) Chapter 139 is amended by striking out section 2359.

(7) Section 2388 is amended by striking out subsection (d).

(8) Section 2394a(b) is amended—

(A) by striking out "(1)" after "(b)"; and

(B) by striking out paragraph (2).

(9) Section 2404 is amended—

(A) by striking out subsection (d); and

(B) by redesignating subsection (e) as subsection (d).

(10) Chapter 145 is amended by striking out section 2455.

(11) Section 2547 is amended—

(A) by striking out subsection (d); and

(B) by redesignating subsection (e) as subsection (d).

(12) Section 2672a(b) is amended by striking out the last sentence.

(13) Section 2721 is amended—

(A) in subsection (a), by striking out "(a)"; and

(B) by striking out subsection (b).

(14) Section 4314 is amended by striking out the last sentence.

(15) Section 6956 is amended—

(A) by striking out subsection (a); and

(B) by redesignating subsections (b), (c), and (d) as subsections (a), (b), and (c), respectively.

(16) Chapter 631 is amended by striking out section 7217.

(b) TITLE 32, UNITED STATES CODE.—Section 314(d) of title 32, United States Code, is amended by striking out the last sentence.

(c) TITLE 37, UNITED STATES CODE.—(1) Sections 301a and 301c are amended by striking out subsection (e).

(2) Section 303a(c) is amended by striking out the last sentence.

(3) Section 306 is amended by striking out subsection (f).

(4) Section 308b is amended—

(A) by striking out subsection (e); and

(B) by redesignating subsections (f) and (g) as subsections (e) and (f), respectively.

(5) Section 308c is amended—

(A) by striking out subsection (e); and

(B) by redesignating subsection (f) as subsection (e).

(6) Section 310 is amended by striking out subsection (d).

(7) Section 312b is amended—

(A) by striking out subsection (c); and

(B) by redesignating subsection (d) as subsection (c).

(8) Section 312c is amended—

(A) by striking out subsection (d); and

(B) by redesignating subsection (e) as subsection (d).

(d) PUBLIC LAW 99-145.—(1) Section 913 of such Act (10 U.S.C. 2301 note) is amended—

(A) by striking out subsection (b); and

(B) by redesignating subsection (c) as subsection (b).

(2) Section 915 of such Act (10 U.S.C. 2431 note) is repealed.

(e) PUBLIC LAW 98-94.—Section 1260 of the Department of Defense Authorization Act,

1984 (Public Law 98-94; 97 Stat. 703), is amended—

(1) by striking out subsection (a); and

(2) in subsection (b), by striking out "(b)" and the second sentence.

(f) PUBLIC LAW 96-418.—Section 802 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 10 U.S.C. 2431 note), is amended by striking out subsection (e).

(g) PUBLIC LAW 94-106.—Section 808 of the Department of Defense Appropriation Authorization Act, 1976 (Public Law 94-106; 10 U.S.C. 7291 note), is repealed.

SEC. 1323. RESTORATION OF REPORTING REQUIREMENT TERMINATED BY GOLDWATER-NICHOLS ACT

The effectiveness of the reporting requirement of section 127(c) of title 10, United States Code, previously terminated by section 602(c) of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433; 10 U.S.C. 111 note), is hereby restored.

SEC. 1324. REPEAL OF GOLDWATER-NICHOLS REPORTS TERMINATION SECTION

Section 602(c) of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433; 10 U.S.C. 111 note) is repealed.

PART D—TECHNICAL AND CLERICAL AMENDMENTS

SEC. 1331. TECHNICAL AND CLERICAL AMENDMENTS

Title 10, United States Code, is amended as follows:

(1) The table of sections at the beginning of chapter 2 is amended by striking out the item relating to section 117.

(2) The table of sections at the beginning of chapter 131 is amended by striking out the item relating to section 2216.

(3) The table of sections at the beginning of chapter 138 is amended by striking out the item relating to section 2349.

(4) Section 2350a(g) is amended by striking out that portion of paragraph (4) preceding clause (A) and inserting in lieu thereof the following:

"(4) The Secretary of Defense shall submit to Congress each year, not later than March 1, a report containing information on—".

(5) The table of sections at the beginning of chapter 139 is amended by striking out the items relating to sections 2357 and 2359.

(6) The table of sections at the beginning of chapter 145 is amended by striking out the item relating to section 2455.

(7) The table of sections at the beginning of chapter 161 is amended by striking out the item relating to section 2721 and inserting in lieu thereof the following:

"2721. Basis.".

(8) The table of sections at the beginning of chapter 631 is amended by striking out the item relating to section 7217.

(9) The table of sections at the beginning of chapter 641 is amended by striking out the item relating to section 7434.

TITLE XIV—GUARD AND RESERVE INITIATIVE

PART A—UTILIZATION OF RESERVE COMPONENTS

SEC. 1401. SENSE OF THE CONGRESS ON GREATER UTILIZATION OF THE RESERVE COMPONENTS OF THE ARMED FORCES

(a) FINDINGS.—Congress makes the following findings:

(1) The reserve components of the Armed Forces are an essential element of the national security establishment of the United States.

(2) The overall reduction in the threat and the likelihood of continued fiscal constraints require the United States to increase utilization of the reserve components of the Armed Forces.

(3) The Department of Defense has not adequately implemented the Total Force Policy since its inception in 1973.

(4) The Department of Defense should shift a greater share of force structure and budgetary resources to the reserve components of the Armed Forces.

(5) Expanding the reserve components is the most effective way to retain quality personnel as the force structure of the active components is reduced over the next five years.

(6) The United States should recommit itself to the concept of the citizen soldier as a cornerstone of national defense policy for the future.

(7) The President and the Secretary of Defense should take note of and be willing to exercise existing reserve call-up authority for the purpose of using reserve component forces to perform operational missions without the necessity for declaring a national emergency.

(b) CONGRESSIONAL DECLARATION.—In view of the findings expressed in subsection (a), Congress declares that—

(1) the structure and strength of the current reserve components should be preserved;

(2) the equipment levels in existing reserve component units should be increased to match their active duty counterparts;

(3) selected missions of the active components of the Armed Forces should be increasingly transferred to the reserve components;

(4) the equipment available to the units of the reserve components should be modernized; and

(5) the integration of active component and reserve component units should be promoted as a means of achieving the Total Force Policy of the Department of Defense.

PART B—FORCE STRUCTURE

SEC. 1411. PRESERVATION OF FORCE STRUCTURE IN THE RESERVE COMPONENTS

(a) IN GENERAL.—The Secretary of Defense shall ensure that the force structure of the Selected Reserve of the reserve components of the Armed Forces during fiscal year 1991 is equivalent to the force structure of those components on January 1, 1990.

(b) AUTHORITY TO CHANGE FORCE STRUCTURE.—The Secretary may make changes in the force structure of the Selected Reserve of the reserve components only to the extent that the Secretary determines that such changes enhance the capability of reserve units in the interests of national security.

SEC. 1412. AIR NATIONAL GUARD AND AIR FORCE RESERVE AIRCRAFT

(a) TRANSFER OF AIRCRAFT TO RESERVE COMPONENT.—The Secretary of the Air Force, by the transfer of aircraft from regular component squadrons to reserve component squadrons, shall ensure that on September 30, 1994—

(1) the average number of aircraft assigned to a tanker aircraft squadron in the Air National Guard of the United States or the Air Force Reserve is equal to the average number of aircraft assigned to a tanker aircraft squadron in the regular component of the Air Force;

(2) the average number of aircraft assigned to a fighter aircraft squadron in the Air National Guard of the United States or the Air Force Reserve is equal to the average number of aircraft assigned to a fighter aircraft squadron in the regular component of the Air Force; and

(3) the average number of aircraft assigned to an airlift aircraft squadron in the Air National Guard of the United States or the Air Force Reserve is equal to the average number of aircraft assigned to an airlift aircraft squadron in the regular component of the Air Force.

(b) WAIVER AUTHORITY.—(1) The Secretary of Defense may temporarily waive the requirement in subsection (a) with respect to a specific reserve component squadron if the Secretary determines that the squadron cannot operate the aircraft required to be transferred and that the transfer would be prejudicial to the national security of the United States.

(2) Temporary waivers under paragraph (1) shall be made on a case-by-case basis. Such a waiver shall be for a period not to exceed one year, but may be renewed for an additional period of one year under the conditions specified in paragraph (1).

SEC. 1413. P-3 AIRCRAFT

(a) TRANSFER OF AIRCRAFT TO RESERVE COMPONENTS.—(1) The Secretary of the Navy, by the transfer of aircraft from regular component squadrons to reserve component squadrons, shall ensure that on September 30, 1996, the average number of aircraft assigned to a P-3 aircraft squadron in the Naval Reserve is equal to the average number of aircraft assigned to a P-3 aircraft squadron in the regular Navy.

(2) The Secretary shall transfer no fewer than 80 P-3C aircraft pursuant to subsection (a).

(b) WAIVER AUTHORITY.—(1) The Secretary of Defense, may temporarily waive the requirements in subsection (a) with respect to a specific reserve component squadron if the Secretary determines that—

(A) the submarine threat presented by the Soviet Union has increased; and

(B) the P-3B aircraft would be able to track and attack effectively the submarines that comprise the increase in the threat.

(2) Temporary waivers under paragraph (1) shall be made on a case-by-case basis. Such a waiver shall be for a period not to exceed one year, but may be renewed for an additional period of one year under the conditions specified in paragraph (1).

(c) PROHIBITION ON USE OF FUNDS.—Funds appropriated or otherwise made available for operation and maintenance for the Navy for any fiscal year beginning on or after September 30, 1996, may not be used to operate or maintain P-3B aircraft.

SEC. 1414. TACTICAL AIRLIFT MISSION

(a) IN GENERAL.—Not later than September 30, 1992, the Secretary of Defense shall assign the tactical airlift mission of the Department of Defense to the Air Force Reserve and the Air National Guard of the United States.

(b) REQUIREMENT FOR TRANSFER PLAN.—The Secretary of the Air Force shall develop a plan for the transfer of all tactical airlift transport aircraft to the Air Force Reserve and the Air National Guard of the United States at the earliest practical date and shall complete the transfer in accordance with such plan not later than September 30, 1992.

(c) DEADLINE FOR SUBMISSION OF PLAN.—The Secretary of the Air Force shall submit

to the congressional defense committees a copy of the plan referred to in subsection (b) not later than June 1, 1991.

SEC. 1415. REPLACEMENT OF OV-1 AND OV-10 AIRCRAFT WITH A-10 AIRCRAFT

(a) PROHIBITION ON USE OF FUNDS.—(1) Funds appropriated or otherwise made available to the Army for any fiscal year beginning after September 30, 1996, may not be used to operate or maintain OV-1 aircraft.

(2) Funds appropriated or otherwise made available to the Marine Corps after September 30, 1996, may not be used to operate or maintain OV-10 aircraft.

(b) RETIREMENT OF OV-1 AND OV-10 AIRCRAFT.—(1) Not later than September 30, 1991, the Secretary of the Army shall retire not less than 20 percent of the OV-1 aircraft in the inventory of the Army on October 1, 1990.

(2) The Secretary of the Army and the Secretary of the Navy shall take such action as necessary to retire, by not later than September 30, 1996, all OV-1 and OV-10 aircraft in the inventory of the Army and Marine Corps, respectively. The Secretary of the military department concerned shall notify the Secretary of the Air Force at the time each such aircraft is retired, and the Secretary of the Air Force shall, upon such notification, transfer one A-10 aircraft and all required support equipment to such military department.

(c) TRAINING AND SUPPORT.—Chapter 901 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 9316. Training and support for A-10 aircraft

"The Secretary of the Air Force shall provide each military department with flight training, fleet support, and depot maintenance with respect to all A-10 aircraft assigned to each such department.".

(d) TECHNICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"9316. Training and support for A-10 aircraft.".

PART C—MILITARY PERSONNEL

SEC. 1421. FINDINGS AND SENSE OF CONGRESS REGARDING THE IMPORTANCE OF THE READY RESERVE

(a) FINDINGS.—The Congress finds that—

(1) as a result of the recent dramatic changes in Eastern Europe and the Soviet Union, the active military forces of the United States will be significantly reduced; and

(2) as a consequence of that reduction it will be necessary to rely increasingly, in the event of a threat to the national security, on the immediate availability of trained personnel of the Ready Reserve of the reserve components of the Armed Forces.

(b) SENSE OF CONGRESS.—In light of the finding in subsection (a), it is the sense of Congress that—

(1) the Secretary of Defense should take appropriate action to ensure that members of the Ready Reserve are made fully aware of their continuing obligation for immediate service in the active military forces in the event of a war or national emergency;

(2) the Secretary should utilize the annual muster provided for under section 687 of title 10, United States Code, as a means of alerting such personnel to that obligation; and

(3) the Secretary should insure that adequate funds are made available, out of funds appropriated for the reserve components, to carry out the annual muster of such personnel.

SEC. 1422. READY RESERVE OBLIGATION OF PERSONS WHO RECEIVE TRANSITION ASSISTANCE

(a) IN GENERAL.—As a condition of eligibility to receiving benefits under section 1174 of title 10, United States Code (as amended by section 641 of this Act), section 1105 of such title (as added by section 642 of this Act), section 1420 of title 38, United States Code (as added by section 643 of this Act), or section 644 of this Act, a person otherwise eligible for those benefits shall be required to enter into a written agreement with the Secretary concerned to serve in the Ready Reserve of a reserve component of the Armed Forces for a period of three years following the person's discharge or release from active duty. If the person has a service obligation under section 651 of title 10, United States Code, or under any other provision of law that is not completed at the time the person is discharged or released from active duty, the three-year obligation under this section shall begin on the day after the date on which the person completes the person's obligation under such section or other provision of law.

(b) TRANSFER TO A RESERVE COMPONENT.—Each person who enters into an agreement referred to in subsection (a), who is not already a Reserve of an armed force, and who is qualified shall, upon such person's discharge or release from active duty, be enlisted or appointed, as appropriate, as a Reserve and be transferred to a reserve component of an armed force.

(c) REGULATIONS.—The Secretary concerned shall prescribe regulations to carry out this section.

(d) DEFINITION.—As used in this section, the term "Secretary concerned" means—

(1) the Secretary of the Army, with respect to matters concerning the Army;

(2) the Secretary of the Navy, with respect to matters concerning the Navy and the Marine Corps; and

(3) the Secretary of the Air Force, with respect to matters concerning the Air Force.

SEC. 1423. REPORT REGARDING REQUIREMENT FOR DUTY IN SUPPORT OF NATIONAL GUARD AND RESERVES

Not later than April 15, 1991, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the desirability of requiring active-duty list officers to serve a minimum of two years in support of a National Guard or Reserve unit as a condition of eligibility for consideration for promotion to the grade of colonel or, in the case of the Navy, captain.

SEC. 1424. PROHIBITION ON CERTAIN RESERVE SERVICE

On and after September 30, 1991, no member of a reserve component serving on full-time active duty for the purpose of organizing, administering, recruiting, instructing, or training the reserve components of the Armed Forces may be assigned to duty with any unit of the Reserve Officer Training Corps program.

SEC. 1425. EXTENSION OF SPECIAL PAY FOR CRITICALLY SHORT WARTIME HEALTH SPECIALISTS IN THE SELECTED RESERVE

Section 613(d) of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 37 U.S.C. 302 note), is amended by striking out "1990" and inserting in lieu thereof "1993".

SEC. 1426. SPECIAL PAY FOR RESERVE MEDICAL OFFICERS

(a) IN GENERAL.—Section 302(h) of title 37, United States Code, is amended—

(1) in paragraph (1), by striking out "paragraph (2)" and inserting in lieu thereof "paragraph (3)";

(2) in paragraph (2), by striking out "paragraph (1)" and inserting in lieu thereof "paragraphs (1) and (2)";

(3) by redesignating paragraph (2) (as so amended) as paragraph (3); and

(4) by inserting after paragraph (1) the following new paragraph (2):

"(2) Under regulations prescribed by the President and to the extent provided for by appropriations, when a member of a reserve component of a uniformed service, or of the National Guard, who is entitled to compensation under section 206 of this title and is a reserve medical officer, the member is entitled to an increase in compensation equal to 1/30 of the monthly special pay authorized in paragraph (1) for the performance of that duty. Such member is entitled to the increase for as long as he is qualified for it, for each regular period of instruction, or period of appropriate duty, at which he is engaged for at least two hours, including that performed on a Sunday or holiday, or for the performance of such other equivalent training, instruction, duty or appropriate duties, as the Secretary may prescribe under section 206(a) of this title. This paragraph does not apply to a member who is entitled to basic pay under section 204 of this title.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect on the first day of the fourth calendar month which begins after the month in which this Act is enacted and shall apply only with respect to duty performed on or after that day.

SEC. 1427. COMMISSARY PRIVILEGES FOR CERTAIN RETIRED RESERVES

(a) IN GENERAL.—(1) Chapter 54 of title 10, United States Code, is amended by adding at the end the following new sections:

"§ 1064. Use of commissary stores by certain Reserves

"Under regulations prescribed by the Secretary of Defense, a member of an armed force who would be eligible for retired pay under chapter 67 of this title but for the fact that the member is under 60 years of age shall be authorized to use commissary stores of the Department of Defense for 12 days each calendar year.

"§ 1065. Use of certain morale, welfare, and recreation facilities by members of reserve components

"(a) UNRESTRICTED USE.—Members of the Selected Reserve in good standing (as determined by the Secretary concerned) and members of an armed force who would be eligible for retired pay under chapter 67 of this title but for the fact that the person is under 60 years of age, and the dependents of such members and persons, shall be permitted to use, on the same basis as members on active duty, the exchange stores and other revenue generating facilities operated by nonappropriated fund activities of the Department of Defense for the morale, welfare, and recreation of members of the Armed Forces.

"(b) CONDITIONAL USE.—Subject to such regulations as the Secretary of Defense determines necessary and appropriate, members of the Ready Reserve other than members of the Selected Reserve may be permitted to use the facilities referred to in subsec-

tion (a) on the same basis as members serving on active duty.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new items:

"1064. Use of commissary stores by certain Reserves.
"1065. Use of certain morale, welfare, and recreation facilities by member of reserve components.".

(b) EFFECTIVE DATE AND DEADLINE FOR REGULATIONS.—(1) The amendments made by subsection (a) shall take effect 180 days after the date of the enactment of this Act.

(2) The Secretary of Defense shall prescribe such regulations as may be necessary for the proper administration of sections 1064 and 1065 of title 10, United States Code, as added by subsection (a), not later than 120 days after the date of the enactment of this Act.

PART D—PROCUREMENT

SEC. 1431. PROCUREMENT FOR THE RESERVE COMPONENTS

(a) AUTHORIZATION OF APPROPRIATIONS.—Funds are hereby authorized to be appropriated for fiscal year 1991 for procurement of aircraft, vehicles, communications equipment, and other equipment for the reserve components of the Armed Forces as follows:

(1) For the Army National Guard, $879,961,000.

(2) For the Air National Guard, $537,700,000.

(3) For the Army Reserve, $153,800,000.

(4) For the Navy Reserve, $400,900,000.

(5) For the Air Force Reserve, $105,600,000.

(6) For the Marine Corps Reserve, $114,000,000.

(b) CLARIFICATION OF AUTHORIZATION.—Funds authorized to be appropriated pursuant to subsection (a) are in addition to the funds authorized to be appropriated pursuant to section 106.

SEC. 1432. PROVISION OF CH-47 AIRCRAFT FOR THE ARMY NATIONAL GUARD

(a) TRANSFER OF AIRCRAFT TO AIR NATIONAL GUARD.—Of the modified CH-47 aircraft procured with funds appropriated or otherwise made available in fiscal year 1991, the Secretary of the Army shall distribute not less than 24 such aircraft to the Army National Guard of the United States, as provided in subsection (b).

(b) PLAN REQUIRED.—(1) The Secretary of the Army shall develop a plan to retire—

(A) not less than 24 CH-54 aircraft assigned to the Army National Guard of the United States not later than September 30, 1992; and

(B) all remaining CH-54 aircraft assigned to the Army National Guard of the United States not later than September 30, 1993.

(2) For each CH-54 aircraft assigned to the Army National Guard of the United States that is retired by the Secretary of the Army on or after the date of enactment of this Act, the Secretary shall transfer one of the CH-47 aircraft referred to in subsection (a) to the Army National Guard of the United States.

SEC. 1433. MH-53 MINESWEEPER HELICOPTER

Of the amounts authorized to be appropriated pursuant to section 1431(a)(4) for aircraft for the Navy Reserve, $281,900,000 shall be available for procurement of MH-53 minesweeper helicopters for the Navy Reserve.

SEC. 1434. AH-1W HELICOPTERS

(a) FISCAL YEAR 1990 FUNDS.—Of the amounts appropriated for National Guard and Reserve equipment for fiscal year 1990, $58,600,000 is available for procurement of six AH-1W helicopters for the Marine Corps Reserve.

(b) FISCAL YEAR 1991 FUNDS.—Of the amounts authorized to be appropriated pursuant to section 1431(a)(6) for the Marine Corps Reserve, $79,000,000 shall be available for procurement of eight AH-1W helicopters for the Marine Corps Reserve.

PART E—MISCELLANEOUS

SEC. 1441. EXPRESSING THE SENSE OF THE SENATE CONCERNING UNITED STATES ARMORED FORCES

(a)(1) Since dramatic changes have occurred in the military situation in Europe;

(2) Since the Warsaw Pact is no longer a credible military threat to NATO;

(3) Since it appears that the heavy armored armies of both NATO and the Warsaw Pact will be substantially reduced by arms control agreements or unilateral actions;

(4) Since the need for armor forces has not disappeared and many countries in the world possess large inventories of modern tanks;

(5) Since the Soviet Union will still produce fourteen hundred new tanks in 1990;

(6) Since with significantly increased warning times of enemy attack, greater reliance will be placed on United States Reserve Component Forces for armored heavy force reinforcement missions;

(7) Since there is a need to enhance the capabilities of Reserve Component Armored Forces to assume increased responsibilities for armored heavy force reinforcement missions;

(b) It is the sense of the Senate that—

(1) the United States Army should take timely and necessary steps to enhance the capabilities of Reserve Component Armored Forces;

(2) the United States Army Armor Center will remain the center for training, education, doctrine and combat development for United States Armored Forces—for both active and reserve components; and

(3) the United States Army Armor Center should ensure that reserve component armored forces are adequately prepared for the increased reliance that will be placed on their greater role in armored heavy force reinforcement missions.

SEC. 1442. COMMENDATION OF THE WORK OF THE NATIONAL GUARD AND RESERVES

(a) The Senate finds that—

(1) the birth of this Nation, the citizen-soldier of the United States has protected their fellow citizens from tyranny, invasion, violence, and natural disasters;

(2) the revolution that threw off our yoke of colonialism, to assisting the Panamanians in their struggle over tyranny, the citizen-soldiers of the national guard and reserves, have fought in the defense of freedom;

(3) as the resolve and sacrifice of our national guard and reserves over the last forty-five years gave them a lead role in our Nation's winning the cold war;

(4) as we enter the final decade of this century with our Nation facing new and varied threats to peace, it is imperative that our guard and reserve be prepared to respond in a changing world;

(5) as the national guard and reserves make up a large part of our Nation's combat and support units, their mobilization and training will remain vital to our national security;

(6) as the outstanding Americans who serve in the national guard and reserves have maintained their level of excellence through their hard work and dedication to duty, our citizen soldiers have proved our Nation can continue to rely on them in any national emergency; and

(7) the qualities that have given the national guard and reserves its venerable history, are still present today.

(b) Therefore, the United States Senate acknowledge the valuable contribution that the men and women of our national guard and reserves have made to our Nation's security, and to continue to support their role as the foundation of our national defense in a changing world.

TITLE XV—COUNTER-NARCOTICS TECHNOLOGY CENTER

SEC. 1501. SHORT TITLE

This title may be cited as the "Counter-Narcotics Technology Act of 1990".

SEC. 1502. COUNTER-NARCOTICS TECHNOLOGY ASSESSMENT CENTER

(a) ESTABLISHMENT.—Title I of the Anti-Drug Abuse Act of 1988 (21 U.S.C. 1501 et seq.) is amended by inserting after section 1003 the following new section:

"SEC. 1003a. COUNTER-NARCOTICS TECHNOLOGY ASSESSMENT CENTER

"(a) ESTABLISHMENT.—There is established within the Office of National Drug Control Policy, the Counter-Narcotics Technology Assessment Center (hereafter in this section referred to as the 'Center'). The Center shall operate under the authority of the Director of National Drug Control Policy, and shall serve as the central counter-narcotics enforcement research and development organization of the United States Government.

"(b) DIRECTOR.—There shall be at the head of the Center, the Chief Scientist of Counter-Narcotics Technology who shall be appointed by the Director of National Drug Control Policy from individuals qualified and distinguished in areas of science, engineering or technology. The Chief Scientist shall be paid at the highest rate of basic pay set under the provisions of section 5382(b) of title 5, United States Code.

"(c) ADDITIONAL RESPONSIBILITIES OF THE DIRECTOR.—(1) The Director, acting through the Chief Scientist, shall—

"(A) identify and define the short, medium, and long-term scientific and technological needs of Federal, State, and local drug enforcement agencies, including—

"(i) advanced surveillance, tracking, and radar imaging;

"(ii) electronic support measures;

"(iii) communications;

"(iv) data fusion, advanced computer systems and artificial intelligence; and

"(v) chemical, biological, radiological (including neutron, electron and gravitron) and other means of detection;

"(B) make a priority ranking of such needs according to fiscal and technological feasibility, as part of a National Counter-Narcotics Enforcement Research and Development Strategy;

"(C) oversee and coordinate counter-narcotics technology initiatives with related activities of other Federal civilian and military departments; and

"(D) under the general authority of the Director of National Drug Control Policy, submit reprogramming or transfer requests of funds appropriated for counter-narcotics enforcement research and development to Congress.

"(2) The authority granted to the Director under this section shall not extend to the

award of contracts, management of individual projects, or other operational activities.

"(d) COUNTER-NARCOTICS BUDGET SUBMISSION.—Beginning with the fiscal year 1992 budget, the Director of National Drug Control Policy in his budget shall submit a separate and detailed request relating to all Federal agencies for counter-narcotics enforcement research and development programs.

"(e) PERSONNEL.—Subject to subsections (d) and (e) of section 1003 of this Act, the Chief Scientist shall select and appoint a staff of not more than 10 employees with specialized experience in scientific, engineering and technical affairs. The Chief Scientist may appoint and fix the compensation of such personnel without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and such personnel may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at a rate not to exceed the maximum rate authorized by the General Schedule.".

SEC. 1503. EFFORTS BY PRIVATE INDUSTRY

It is the sense of Congress that providers of electronic communications services and manufacturers of electronic communications equipment should cooperate with law enforcement agencies to ensure that communications systems permit law enforcement agencies to obtain the plain text contents of voice, data, and other communications when appropriately authorized by law.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

TITLE XXI—ARMY

SEC. 2101. AUTHORIZED ARMY CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—The Secretary of the Army may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

ALABAMA

Anniston Army Depot, $93,100,000.
Redstone Arsenal, $14,400,000.
Fort Rucker, $3,400,000.

ALASKA

Fort Wainwright, $13,900,000.

ARIZONA

Fort Huachuca, $1,050,000.

ARKANSAS

Pine Bluff Arsenal, $1,600,000.

CALIFORNIA

Fort Irwin, $4,200,000.

COLORADO

Fort Carson, $23,500,000.
Falcon Air Force Base, $1,450,000.

GEORGIA

Fort Benning, $10,880,000.
Fort Gordon, $10,600,000.
Fort Stewart, $1,650,000.

HAWAII

Schofield Barracks, $9,700,000.

INDIANA

Fort Benjamin Harrison, $6,170,000.

KANSAS

Fort Leavenworth, $34,000,000.
Fort Riley, $14,900,000.

KENTUCKY

Fort Campbell, $2,300,000.
Fort Knox, $25,400,000.

LOUISIANA

Fort Polk, $22,000,000.

MARYLAND

Aberdeen Proving Ground, $45,100,000.
Fort Detrick, $530,000.

MISSOURI

Fort Leonard Wood, $9,700,000.

NEW YORK

Fort Drum, $9,408,000.

NORTH CAROLINA

Fort Bragg, $54,400,000.

OKLAHOMA

Fort Sill, $25,150,000.

PENNSYLVANIA

Carlisle Barracks, $26,200,000.
Fort Indiantown Gap, $6,350,000.
Tobyhanna Army Depot, $6,800,000.

SOUTH CAROLINA

Fort Jackson, $1,600,000.

TEXAS

Fort Hood, $43,269,000.
Fort Sam Houston, $33,700,000.

UTAH

Dugway Proving Ground, $450,000.
Tooele Army Depot, $11,800,000.

VIRGINIA

Fort A. P. Hill, $3,200,000.
Fort Belvoir, $2,500,000.
Fort Eustis, $530,000.
Fort Lee, $520,000.
Fort Myer, $2,150,000.
Fort Story, $1,600,000.

WASHINGTON

Fort Lewis, $18,000,000.

WISCONSIN

Fort McCoy, $24,400,000.

CONUS CLASSIFIED

Classified Location, $3,000,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of the Army may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

GERMANY

Grafenwoehr, $1,630,000.
Kaiserslautern, $5,000,000.
Various, $6,553,000.

KOREA

K-16 Airfield, $1,500,000.

SEC. 2102. FAMILY HOUSING

(a) CONSTRUCTION AND ACQUISITION.—The Secretary of the Army may construct or acquire family housing units (including land acquisition), using amounts appropriated pursuant to section 2104(a)(7)(A), at the following installation, in the number of units shown, and in the amount shown:

Hawaii, Oahu Various, one hundred thirty-eight units, $15,000,000.

(b) PLANNING AND DESIGN.—The Secretary of the Army may, using amounts appropriated pursuant to section 2104(a)(7)(A), carry out architectural and engineering services and construction design activities with respect to the construction or improvement of family housing units in an amount not to exceed $2,700,000.

SEC. 2103. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of title 10, United States Code, the Secretary of the Army may, using amounts appropriated pursuant to section 2104(a)(7)(A), improve existing military family housing in an amount not to exceed $44,100,000.

SEC. 2104. AUTHORIZATION OF APPROPRIATIONS, ARMY

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1990, for military construction, land acquisition, and military family housing functions of the Department of the Army in the total amount of $2,280,270,000 as follows:

(1) For military construction projects inside the United States authorized by section 2101(a), $555,557,000: *Provided*, That the expenditure of the construction funds for a school at Fort Wainwright, Alaska are hereby restricted contingent upon agreement from the local education agency to accept ownership for said facility constructed with said funds.

(2) For military construction projects outside the United States authorized by section 2101(b), $14,683,000.

(3) For the construction of the Ammunition Demilitarization Facility, Phase II, Tooele Army Depot, Utah, as authorized by section 2101(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2088), $40,400,000.

(4) For unspecified minor construction projects authorized under section 2805 of title 10, United States Code, $7,603,000.

(5) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $89,577,000.

(6) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $10,400,000.

(7) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities, $74,300,000.

(B) for support of military family housing (including the functions described in section 2833 of title 10, United States Code), $1,482,650,000, of which not more than $434,316,000 may be obligated or expended for the leasing of military family housing worldwide.

(8) For the Homeowners Assistance Program as authorized by section 2832 of title 10, United States Code, $5,100,000, to remain in effect until expended.

(b) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 2101 of this Act may not exceed—

(1) the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a); and

(2) $69,000,000 (the balance of the amount authorized under section 2101(a) for the construction of the Ammunition Demilitarization Facility, Anniston Army Depot, Alabama).

SEC. 2105. AMMUNITION DEMILITARIZATION FACILITY, TOOELE ARMY DEPOT, UTAH

(a) PROJECT AMOUNT.—Section 2101(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2088), is amended in the items listed under the heading "Utah", by striking out "Tooele Army Depot, $92,300,000." and inserting in lieu thereof "Tooele Army Depot, $132,700,000.".

(b) TITLE TOTAL.—Section 2105(b) of such Act (Public Law 100-456; 102 Stat. 2091) is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(3) by inserting after paragraph (2) the following new paragraph:

"(3) $40,400,000 (the balance of the amount authorized under section 2101(a) for the construction of the Ammunition Demilitarization Facility, Tooele Army Depot, Utah).".

SEC. 2106. EXTENSION OF CERTAIN PRIOR YEAR AUTHORIZATIONS

(a) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1986 PROJECT.—Notwithstanding the provisions of section 606(a) of the Military Construction Authorization Act, 1986 (Public Law 99-167, 99 Stat. 981), authorizations for the following project authorized in section 102 of that Act, as extended by section 2105(b) of the Military Construction Authorization Act, 1988 and 1989 (division B of Public Law 100-180; 101 Stat. 1185), section 2106(b) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 101 Stat. 2092), and section 2105(b) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-189; 103 Stat. 1619), shall remain in effect until October 1, 1991, or the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

Family housing, new construction, six units, in the amount of $596,000 at Fort Myer, Virginia.

(b) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1988 PROJECT.—Notwithstanding the provisions of section 2171(a) of the Military Construction Authorization Act, 1988 and 1989 (division B of Public Law 100-180, 101 Stat. 1206), authorizations for the following project authorized in section 2102 of that Act, as extended by section 2105(d) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-189; 103 Stat. 1619) shall remain in effect until October 1, 1991, or the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

Family housing, new construction, twenty-five units, in the amount of $2,200,000 at Fort A.P. Hill, Virginia.

(c) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1989 PROJECTS.—Notwithstanding the provisions of section 2701(a) of the Military Construction Authorization Act, 1989 (Public Law 100-456, 102 Stat. 2115), authorizations for the following projects authorized in sections 2101 and 2102 of that Act shall remain in effect until October 1, 1991, or the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

(1) Land acquisition in the amount of $410,000 at Fort Rucker, Alabama.

(2) Battalion Headquarters in the amount of $2,300,000 at Fort Wainwright, Alaska.

(3) Test and Evaluation Center in the amount of $5,400,000 at Fort Huachuca, Arizona.

(4) Chemical area security upgrade in the amount of $3,050,000 at Pine Bluff Arsenal, Arkansas.

(5) Chemical area security upgrade in the amount of $3,200,000 at Pueblo Depot Activity, Colorado.

(6) Chemical area security upgrade in the amount of $770,000 at Lexington-Blue Grass Depot Activity, Kentucky.

(7) Regional sewage system connection in the amount of $2,500,000 at United States Military Academy, New York.

(8) Chemical area security upgrade in the amount of $3,600,000 at Umatilla Depot Activity, Oregon.

(9) Industrial waste treatment plant in the amount of $1,900,000 at Letterkenny Army Depot, Pennsylvania.

(10) Chemical area security upgrade in the amount of $5,700,000 at Tooele Army Depot, Utah.

(11) Central wash facility in the amount of $4,000,000 at Fort Pickett, Virginia.

(12) Petroleum Field Training Center in the amount of $4,800,000 at Fort Lee, Virginia.

(13) Operations facility in the amount of $5,300,000 at Location 276 (Turkey).

(14) Intermediate staging facility in the amount of $11,300,000 at unspecified foreign location.

(15) Pre-positioned war material facilities in the amount of $4,450,000 at unspecified foreign locations.

(16) Family housing, new construction, one hundred and eight units, in the amount of $9,100,000 at Fort Bliss, Texas.

TITLE XXII—NAVY

SEC. 2201. AUTHORIZED NAVY CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—The Secretary of the Navy may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

ALASKA

Adak, Naval Air Station, $4,250,000.

Adak, Naval Security Group Activity, $3,000,000.

Amchitka, Fleet Surveillance Support Command, $31,000,000.

ARIZONA

Yuma, Marine Corps Air Station, $3,720,000.

CALIFORNIA

Bridgeport, Mountain Warfare Training Center, $11,300,000.

Camp Pendleton, Amphibious Task Force, $8,470,000.

Camp Pendleton, Marine Corps Air Station, $4,110,000.

Camp Pendleton, Marine Corps Base, $19,910,000.

China Lake, Naval Weapons Center, $17,585,000.

Concord, Naval Weapons Station, $9,850,000.

Corona, Naval Weapons Station, Seal Beach Annex, $8,870,000.

El Toro, Marine Corps Air Station, $6,980,000.

Lemoore, Naval Air Station, $900,000.

Long Beach, Naval Station, $3,520,000.

Miramar, Naval Air Station, $5,460,000.

Monterey, Naval Postgraduate School, $8,810,000.

North Island, Naval Air Station, $1,510,000.

Point Mugu, Pacific Missile Test Center, $2,070,000.

Port Hueneme, Naval Construction Battalion Center, $2,010,000.

Port Hueneme, Naval Ship Weapon Systems Engineering Station, $10,150,000.

San Diego, Fleet Anti-Submarine Warfare Training Center, Pacific, $8,950,000.

San Diego, Naval Ocean Systems Center, $11,760,000.

San Diego, Naval Submarine Base, $540,000.

San Diego, Naval Supply Center, $8,800,000.

San Diego, Naval Training Center, $15,229,000.

San Diego, Navy Public Works Center, $3,320,000.

Skaggs Island, Naval Security Group Activity, $1,472,000.

Twentynine Palms, Marine Corps Air-Ground Combat Center, $10,820,000.

CONNECTICUT

New London, Naval Submarine Base, $22,500,000.

New London, Naval Submarine School, $18,990,000.

DISTRICT OF COLUMBIA

Washington, Naval Research Laboratory, $9,850,000.

FLORIDA

Jacksonville, Naval Air Station, $9,140,000.

Jacksonville, Naval Aviation Depot, $14,670,000.

Key West, Naval Air Station, $7,030,000.

Mayport, Fleet Training Center, $4,300,000.

Mayport, Naval Station, $4,950,000.

Orlando, Naval Training Center, $10,960,000.

Panama City, Naval Coastal Systems Center, $4,330,000.

Pensacola, Navy Public Works Center, $3,460,000.

GEORGIA

Albany, Marine Corps Logistics Base, $1,360,000.

Kings Bay, Naval Submarine Base, $76,953,000.

HAWAII

Kaneohe Bay, Marine Corps Air Station, $1,650,000.

Lualualei, Naval Magazine, $1,660,000.

Pearl Harbor, Commander Oceanographic System Pacific, $12,780,000.

Pearl Harbor, Naval Submarine Base, $2,010,000.

Pearl Harbor, Navy Public Works Center, $6,940,000.

ILLINOIS

Great Lakes, Naval Training Center, $2,170,000.

Great Lakes, Navy Public Works Center, $2,460,000.

INDIANA

Crane, Naval Weapons Support Center, $13,520,000.

MAINE

Kittery, Portsmouth Naval Shipyard, $38,182,000.

MARYLAND

Bethesda, National Naval Medical Center, $9,040,000.

Indian Head, Naval Ordnance Station, $6,430,000.

Patuxent River, Naval Air Test Center, $9,040,000.

Patuxent River, Naval Hospital, $2,510,000.

St. Inigoes, Naval Electronic Systems Engineering Activity, $4,020,000.

MISSISSIPPI

Gulfport, Naval Construction Training Center, $8,710,000.

NEW JERSEY

Earle, Naval Weapons Station, $85,400,000.

NORTH CAROLINA

Camp Lejeune, Marine Corps Base, $29,170,000.

Cherry Point, Marine Corps Air Station, $13,950,000.

PENNSYLVANIA

Warminster, Naval Air Development Center, $10,770,000.

RHODE ISLAND

Newport, Naval Education and Training Center, $6,230,000.

Newport, Naval Underwater Systems Center, $13,700,000.

SOUTH CAROLINA

Beaufort, Marine Corps Air Station, $6,700,000.

Charleston, Naval Station, $720,000.

Charleston, Naval Weapons Station, $27,030,000.

Parris Island, Marine Corps Recruit Depot, $3,410,000.

TEXAS

Lackland Air Force Base, Naval Technical Training Center Detachment, $11,850,000.

VIRGINIA

Arlington, Headquarters Marine Corps, $2,810,000.

Dahlgren, Naval Space Surveillance System, $9,850,000.

Dam Neck, Fleet Combat Direction Systems Support Activity, $6,500,000.

Little Creek, Naval Amphibious Base, $20,470,000.

Little Creek, Naval Amphibious School, $2,600,000.

Norfolk, Fleet Training Center, $16,080,000.

Norfolk, Naval Station, $10,950,000.

Norfolk, Navy Public Works Center, $4,020,000.

Oceana, Naval Air Station, $3,670,000.

Quantico, Marine Corps Combat Development Command, $34,114,000.

Quantico, Naval Research Laboratory Annex, $2,600,000.

Wallops Island, AEGIS Combat Systems Center, $5,490,000.

WASHINGTON

Bangor, Trident Refit Facility, $3,020,000.

Bangor, Trident Training Facility, $3,610,000.

Bremerton, Puget Sound Naval Shipyard, $22,000,000.

Everett, Naval Station, $22,267,000.

Keyport, Naval Undersea Warfare Engineering Station, $18,590,000.

Oak Harbor, Naval Hospital, $2,180,000.

Silverdale, Strategic Weapons Facility Pacific, $56,480,000.

Whidbey Island, Naval Facility, $1,750,000.

VARIOUS LOCATIONS

Land Acquisition, $4,660,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of the Navy may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

GUAM

Naval Magazine, $9,319,000.

Navy Public Works Center, $7,500,000.

ITALY

Sicily, Naval Communication Station, $1,513,000.

SPAIN

Rota, Naval Communication Station, $1,105,000.

UNITED KINGDOM

Brawdy Wales, Fleet Surveillance Support Command, $1,740,000.

VARIOUS LOCATIONS

Host Nation Infrastructure Support, $1,000,000.

SEC. 2202. FAMILY HOUSING

(a) CONSTRUCTION AND ACQUISITION.—The Secretary of the Navy may, using amounts appropriated pursuant to section 2204(a)(7)(A), construct or acquire family housing units (including land acquisition), at the following installations in the number of units shown, and in the amount shown, for each installation:

Long Beach, Naval Station, California, three hundred units, $25,018,000.

Point Mugu, Pacific Missile Test Center, California, Family Housing Office, $513,000.

San Diego, Navy Public Works Center, California, three hundred units, $31,880,000.

Fallon Naval Air Station, Nevada, eighty units, $10,500,000.

Little Creek, Naval Amphibious Base, Virginia, Family Housing Office, $372,000.

Norfolk, Navy Public Works Center, Virginia, two Community Centers, $834,000.

Guantanamo Bay, Naval Station, Cuba, one hundred and thirty-four units, $18,409,000.

Keflavik, Naval Air Station, Iceland, one hundred and twelve units, $27,479,000.

(b) PLANNING AND DESIGN.—The Secretary of the Navy may, using amounts appropriated pursuant to section 2204(a)(7)(A), carry out architectural and engineering services and construction design activities with respect to the construction or improvement of military family housing units in an amount not to exceed $6,200,000.

SEC. 2203. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of title 10, United States Code, the Secretary of the Navy may, using amounts appropriated pursuant to section 2204(a)(7)(A), improve existing military family housing units in the amount of $42,420,000.

SEC. 2204. AUTHORIZATION OF APPROPRIATIONS, NAVY

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1990, for military construction, land acquisition, and military family housing functions of the Department of the Navy in the total amount of $1,972,251,000 as follows:

(1) For military construction projects inside the United States authorized by section 2201(a), $917,622,000.

(2) For military construction projects outside the United States authorized by section 2201(b), $22,177,000.

(3) For the construction of the Headquarters Building, Naval Intelligence Command Headquarters, Suitland, Maryland, as authorized by section 2201(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2093), $55,048,000.

(4) For unspecified minor construction projects under section 2805 of title 10, United States Code, $13,311,000.

(5) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $76,951,000.

(6) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $4,017,000.

(7) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities, $163,625,000; and

(B) for support of military housing (including functions described in section 2833 of title 10, United States Code), $719,500,000, of which not more than $53,775,000 may be obligated or expended for the leasing of military family housing units worldwide.

(b) LIMITATION OF TOTAL COST OF CONSTRUCTION PROJECTS.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 2201 of this Act may not exceed the sum of:

(1) the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a); and

(2) $65,300,000 (the balance of the amount authorized under section 2201(a) for the construction of trestles replacement at Naval Weapons Station, Earle, New Jersey).

SEC. 2205. EXTENSION OF CERTAIN PRIOR YEAR AUTHORIZATIONS

(a) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1988 PROJECTS.—Notwithstanding the provisions of section 2171 of the Military Construction Authorization Act, 1988 and 1989 (division B of Public Law 100-180; 101 Stat. 1206), authorizations for the following projects authorized in section 2121 of that Act, as extended by section 2205 of the Military Construction Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-189; 103 Stat. 1628), shall remain in effect until October 1, 1991, or the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

(1) Physical security improvements in the amount of $2,460,000 at the Naval Air Station, Sigonella, Italy.

(2) Cold-iron utilities support in the amount of $7,480,000 at Naval Support Office, La Maddelena, Italy.

(b) EXTENSION OF CERTAIN PREVIOUS AUTHORIZATION OF CERTAIN FISCAL YEAR 1989 PROJECTS.—Notwithstanding the provisions of section 2701(a) of the Military Construction Act, 1989 (division B of Public Law 100-456; 102 Stat. 2115), authorizations for the following projects authorized in sections 2201 and 2202 of that Act shall remain in effect until October 1, 1991, or the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

(1) Space Surveillance Facility in the amount of $3,760,000 at Naval Space Surveillance Field Station, San Diego, California.

(2) Fire Station in the amount of $2,500,000 at Mare Island Naval Shipyard, Vallejo, California.

(3) Controlled Industrial Facility in the amount of $11,250,000 at Naval Submarine Base, Pearl Harbor, Hawaii.

(4) Forward Training Area in the amount of $8,280,000 at Marine Corps Air Station, Cherry Point, North Carolina.

(5) Aircraft maintenance facility in the amount of $8,370,000 at Naval Air Station, Whidbey Island, Washington.

(6) Support facility upgrade in the amount of $6,470,000 at Naval Support Facility, Antigua.

(7) Fire safety system in the amount of $1,950,000 at Naval Supply Depot, Guam.

(8) Electronic installation in the amount of $20,972,000 at Fleet Surveillance Support Group, Guam.

(9) Power plant in the amount of $27,770,000 at Navy Public Works Center, Subic Bay, Philippines.

(10) Seal Team Operations Facility in the amount of $4,990,000 at an overseas classified location.

(11) Family housing, new construction, three hundred units, in the amount of $26,110,000 at Naval Station, Long Beach, California.

TITLE XXIII—AIR FORCE

SEC. 2301. AUTHORIZED AIR FORCE CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—The Secretary of the Air Force may acquire real property and may carry out military construction projects in the amount shown for each of the installations and locations inside the United States:

ALABAMA

Gunter Air Force Base, $20,100,000.
Maxwell Air Force Base, $22,500,000.

ALASKA

Clear Air Force Station, $5,000,000.
Eielson Air Force Base, $12,400,000.
Elmendorf Air Force Base, $8,900,000.
Galena Airport, $8,700,000.
King Salmon Airport, $2,500,000.
Shemya Air Force Base, $47,400,000.
Various Locations, $11,000,000.

ARIZONA

Williams Air Force Base, $3,650,000.

ARKANSAS

Little Rock Air Force Base, $5,300,000.

CALIFORNIA

Beale Air Force Base, $6,300,000.
Castle Air Force Base, $3,000,000.
Edwards Air Force Base, $17,100,000.
March Air Force Base, $1,050,000.
McClellan Air Force Base, $11,200,000.
Sierra Army Depot, $3,650,000.
Travis Air Force Base, $10,800,000.
Vandenberg Air Force Base, $115,000,000.

COLORADO

Peterson Air Force Base, $2,700,000.

FLORIDA

Avon Park Range, $700,000.
Cape Canaveral Air Force Station, $5,353,000.
Eglin Air Force Base, $4,700,000.
Homestead Air Force Base, $7,900,000.
MacDill Air Force Base, $12,250,000.

GEORGIA

Moody Air Force Base, $4,400,000.
Robins Air Force Base, $21,200,000.

HAWAII

Hickam Air Force Base, $11,420,000.
Wheeler Air Force Base, $3,500,000.

IDAHO

Mountain Home Air Force Base, $1,350,000.

ILLINOIS

Scott Air Force Base, $10,060,000.

INDIANA

Grissom Air Force Base, $2,000,000.

KANSAS

McConnell Air Force Base, $9,100,000.

LOUISIANA

Barksdale Air Force Base, $8,530,000.

MAINE

Bangor Air National Guard Base, $970,000.

MARYLAND

Andrews Air Force Base, $3,050,000.
Fort George G. Meade, $1,800,000.

MASSACHUSETTS

Hanscom Air Force Base, $3,800,000.

MICHIGAN

K.I. Sawyer Air Force Base, $2,700,000.
Wurtsmith Air Force Base, $960,000.

MISSISSIPPI

Columbus Air Force Base, $3,100,000.

MISSOURI

Whiteman Air Force Base, $62,650,000.

NEBRASKA

Offutt Air Force Base, $2,600,000.

NEVADA

Indian Springs Auxiliary Field, $2,550,000.
Nellis Air Force Base, $12,520,000.

NEW JERSEY

McGuire Air Force Base, $7,850,000.

NEW MEXICO

Holloman Air Force Base, $14,010,000.
Kirtland Air Force Base, $4,200,000.

NORTH CAROLINA

Seymour Johnson Air Force Base, $2,502,000.

NORTH DAKOTA

Grand Forks Air Force Base, $8,850,000.
Minot Air Force Base, $3,600,000.

OHIO

Newark Air Force Base, $5,100,000.
Wright-Patterson Air Force Base, $10,150,000.

OKLAHOMA

Altus Air Force Base, $21,700,000.
Tinker Air Force Base, $55,100,000.
Vance Air Force Base, $400,000.

SOUTH CAROLINA

Charleston Air Force Base, $14,090,000.
Shaw Air Force Base, $3,000,000.

SOUTH DAKOTA

Ellsworth Air Force Base, $13,150,000.

TEXAS

Brooks Air Force Base, $4,100,000.
Carswell Air Force Base, $12,616,000.
Dyess Air Force Base, $7,550,000.
Goodfellow Air Force Base, $980,000.
Kelly Air Force Base, $10,300,000.
Lackland Air Force Base, $22,500,000.
Laughlin Air Force Base, $1,820,000.
Randolph Air Force Base, $1,750,000.
Reese Air Force Base, $5,090,000.
Sheppard Air Force Base, $8,400,000.

UTAH

Hill Air Force Base, $22,500,000.

VIRGINIA

Langley Air Force Base, $600,000.

WASHINGTON

Fairchild Air Force Base, $11,200,000.
McChord Air Force Base, $5,200,000.

WYOMING

F.E. Warren Air Force Base, $4,400,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of the Air Force may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

ANTIGUA

Antigua Air Station, $8,200,000.

CANADA

Various Locations, $6,300,000.

GREENLAND

Thule Air Base, $6,300,000.

JAPAN

Kadena Air Base, $2,950,000.

KOREA

Osan Air Base, $3,500,000.

SEYCHELLES ISLANDS

Mahe Missile Tracking Site, $4,600,000.

TURKEY

Pirinclik Air Station, $1,250,000.

UNITED KINGDOM

RAF Chicksands, $12,200,000.

VARIOUS LOCATIONS

Classified Location, $4,800,000.

WORLDWIDE CLASSIFIED

Classified Location, $3,800,000.
Classified Location, $4,000,000.
Classified Location, $4,000,000.
Classified Location, $2,600,000.

SEC. 2302. FAMILY HOUSING

(a) CONSTRUCTION AND ACQUISITION.—The Secretary of the Air Force may construct or acquire family housing units (including land, acquisition) using amounts appropriated pursuant to section 2304(a)(7)(A), at the following installations in the number of units shown, and in the amount shown, for each installation: Nellis Air Force Base, Nevada, housing office, $235,000.

Holloman Air Force Base, New Mexico, housing maintenance facility, $219,000.

Charleston Air Force Base, South Carolina, housing office and maintenance facility, $592,000.

Myrtle Beach Air Force Base, South Carolina, housing office, $258,000.

Ellsworth Air Force Base, South Dakota, housing office, $313,000.

Andersen Air Force Base, Guam, housing supply and storage facility, $1,371,000.

(b) PLANNING AND DESIGN.—The Secretary of the Air Force may, using amounts appropriated pursuant to section 2304(a)(7)(A), carry out architectural and engineering services and construction design activities with respect to the construction or improvement of military family housing units in an amount not to exceed $6,000,000.

SEC. 2303. IMPROVEMENT TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of title 10, United States Code, the Secretary of the Air Force may, using amounts appropriated pursuant to section 2304(a)(7)(A), improve existing military family housing units in an amount not to exceed $173,612,000.

SEC. 2304. AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1990, for military construction, land acquisition, and military family housing functions of the Department of the Air Force in the total amount of $1,977,034,000.

(1) For military construction projects inside the United States authorized by section 2301(a), $714,321,000.

(2) For military construction projects outside the United States authorized by section 2301(b), $64,500,000.

(3) For the construction of the Large Rocket Test Facility, Arnold Engineering Development Center, Tennessee, as authorized by section 2301(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2087), and as amended by section 2307 of the Military Construction Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-189; 103 Stat. 1630), $109,300,000.

(4) For unspecified minor construction projects under section 2805 of title 10, United States Code, $10,272,000.

(5) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $107,741,000.

(6) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $9,000,000.

(7) For military family housing functions—

(A) For construction and acquisition of military family housing and facilities, $182,600,000; and

(B) For support of military housing (including functions described in section 2833 of title 10, United States Code), $779,300,000 of which not more than $110,911,000 may be obligated or expended for leasing of military family housing units worldwide.

(b) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 2301 of this Act may not exceed—

(1) the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a); and

(2) $85,800,000 (The balance of the amount authorized for the construction of the Titan IV Launch Complex, Vandenberg Air Force Base, California.)

SEC. 2305. EXTENSION OF CERTAIN PRIOR YEAR AUTHORIZATIONS

(a) EXTENSION OF AUTHORIZATION OF A CERTAIN FISCAL YEAR 1987 PROJECT.—Notwithstanding the provisions of section 2701(a) of the Military Construction Authorization Act, 1987 (division B of Public Law 99-661; 100 Stat. 4040), authorization for the following project authorized in section 2301 of that Act as amended by section 2305 of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2115) shall remain in effect until October 1, 1991, or the date of the enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

KC-135 CPT Simulator Facility in the amount of $890,000 at Beale Air Force Base, California.

(b) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1989 PROJECTS.—Notwithstanding the provisions of section 2701(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2108), authorizations for the following projects authorized in sections 2301 and 2303 of that Act shall remain in effect until October 1, 1991, or the date of the enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

(1) F-111 Avionics Facility in the amount of $1,300,000 at Cannon Air Force Base, New Mexico.

(2) Aircraft Operational Apron-Phase I in the amount of $4,950,000; Intelligence Facility-Phase II in the amount of $2,250,000; Special Operations Forces Helicopter Maintenance Facility in the amount of $4,100,000; Special Operations Forces Hangar/Nose Dock in the amount of $2,100,000; and Special Operations Forces Hydrant Fueling System in the amount of $800,000 at Clark Air Base, Philippines.

(3) Defense Language Institute Language Training Laboratory in the amount of $12,000,000 at Lackland Air Force Base, Texas.

(4) Land Acquisition in the amount of $2,300,000 at Altus Air Force Base, Oklahoma.

(5) Alter Technical Training Management Facility in the amount of $1,750,000 at Randolph Air Force Base, Texas.

(6) Alter and Expand Headquarters Data Center, in the amount of $576,000 at Patrick Air Force Base, Florida.

(7) Security Police Complex, in the amount of $2,300,000 at McGuire Air Force Base, New Jersey.

(8) Over the Horizon-Backscatter (OTH-B) Operations Building in the amount of $17,500,000 at Elmendorf Air Force Base, Alaska.

(9) Fire Training Area in the amount of $2,200,000 at Peterson Air Force Base, Colorado.

(10) Alter Combat Intelligence Operations Center in the amount of $1,000,000 at Ramstein Air Base, Germany (authorized as part of Classified Locations in the amount of $16,473,000).

(11) Solid State Uninterrupted Power Supply in the amount of $1,300,000 at Ramstein Air Base, Germany.

(12) Add to and Alter Aircraft Support Equipment Shop in the amount of $2,850,000 at Shemya Air Force Base, Alaska.

(13) Post Office in the amount of $550,000 at Incirlik, Turkey.

(14) F-16 Aircraft Maintenance Unit Facility in the amount of $2,800,000 at Osan Air Base, Korea.

(15) Improve Military Family Housing, Phase II, in the amount of $4,018,000 at Bolling Air Force Base, District of Columbia.

(16) Improve On-Base Housing in the amount of $3,207,000 at McClellan Air Force Base, California.

(17) Off-Street Parking, Site Improvements in the amount of $1,919,000 at Scott Air Force Base, Illinois.

(18) Improve Family Housing, Phase I, in the amount of $7,869,000 at Carswell Air Force Base, Texas.

(19) Improve 16 Family Housing Units in the amount of $600,000 at Carswell Air Force Base, Texas.

(20) Modernize Capehart Housing, Phase IV, in the amount of $4,373,000 at K.I. Sawyer Air Force Base, Michigan.

(21) Improve Capehart Housing, Phase I, in the amount of $10,600,000 at Plattsburgh Air Force Base, New York.

(22) Improve General Officers Quarters in the amount of $74,000 at Peterson Air Force Base, Colorado.

(23) Upgrade Capehart Military Family Housing, Phase II, in the amount of $6,006,000 at Holloman Air Force Base, New Mexico.

(24) Improve Family Housing in the amount of $2,278,000 at Keesler Air Force Base, Mississippi.

(25) Addition to Physical Fitness Center in the amount of $3,800,000 at Peterson Air Force Base, Colorado.

SEC. 2306. AUTHORIZATION FOR A FACILITY

The Secretary of the Air Force may acquire at no cost an existing building constructed on Eglin Air Force Base, Florida, in 1986 as part of a three year incrementally funded Research, Development, Test and Evaluation contract.

TITLE XXIV—DEFENSE AGENCIES

SEC. 2401. AUTHORIZED DEFENSE AGENCIES CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—The Secretary of Defense may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

DEFENSE COMMUNICATIONS AGENCY

Wheeler Air Force Base, Hawaii, $1,491,000.

Arlington Service Center, Virginia, $2,664,000.

DEFENSE LOGISTICS AGENCY

Defense Reutilization and Marketing Office, Anniston Army Depot, Alabama, $2,370,000.

Defense Depot, Tracy, California, $1,700,000.

Defense Reutilization and Marketing Office, Fort Meade, Maryland, $9,500,000.

Defense Depot, Mechanicsburg, Pennsylvania, $18,100,000.

Defense Reutilization and Marketing Office, Fort Jackson, South Carolina, $500,000.

Defense Depot, Memphis, Tennessee, $14,900,000.

Defense General Supply Center, Richmond, Virginia, $7,000,000.

Defense Reutilization and Marketing Office, F.E. Warren Air Force Base, Wyoming, $1,700,000.

DEFENSE MEDICAL FACILITIES OFFICE

Marine Corps Base, Camp Pendleton, California, $1,750,000.

Walter Reed Army Medical Center, District of Columbia, $4,000,000.

MacDill Air Force Base, Florida, $2,900,000.

Fort Benning, Georgia, $2,000,000.

Tripler Army Medical Center, Hawaii, $2,200,000.

Fort Riley, Kansas, $1,050,000.

Marine Corps Base, Camp Lejeune, North Carolina, $3,200,000.

Altus Air Force Base, Oklahoma, $500,000.

Philadelphia Naval Shipyard, Pennsylvania, $11,600,000.

Lackland Air Force Base, Texas, $2,250,000.

Cheatham Annex, Virginia, $6,500,000.

Dam Neck Flight Center, Virginia, $4,050,000.

Fort Lee, Virginia, $2,650,000.

Marine Corps Base, Quantico, Virginia, $2,450,000.

DEFENSE NUCLEAR AGENCY

White Sands Missile Range, New Mexico, $64,800,000.

NATIONAL SECURITY AGENCY

Fort George C. Meade, Maryland, $19,471,000.

OFFICE OF THE SECRETARY OF DEFENSE

Defense Language Institute, Monterey, California, $4,182,000.

Uniformed Services University of the Health Sciences, Bethesda, Maryland, $800,000.

Classified Locations, $26,600,000.

SECTION SIX SCHOOLS

Fort Benning, Georgia, $9,400,000.

Dahlgren Naval Surface Warfare Center, Virginia, $1,360,000.

SPECIAL OPERATIONS COMMAND

Coronado Naval Amphibious Base, California, $21,020,000.

Eglin Air Force Base, Florida, $11,750,000.

Fort Stewart/Hunter Army Air Field, Georgia, $4,900,000.

Norristown, Army Reserve Center, Pennsylvania, $2,598,000.

Dam Neck Marine Environmental Facility, Virginia, $9,160,000.

Classified Location, $2,747,000.

STRATEGIC DEFENSE INITIATIVE ORGANIZATION

Barking Sands Pacific Missile Range, Hawaii, $3,870,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of Defense may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

DEFENSE MEDICAL FACILITIES OFFICE

Rhein-Main Air Base, Germany, $870,000.
Camp Casey, Korea, $1,000,000.
Sinop, Turkey, $1,750,000.

DEFENSE NUCLEAR AGENCY

Johnston Island, $8,595,000.

NATIONAL SECURITY AGENCY

Classified Location, $2,375,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Location, $7,800,000.

SEC. 2402. FAMILY HOUSING

The Secretary of Defense may construct or acquire three family housing units (including land acquisition), using amounts appropriated pursuant to section 2405(a)(15)(A), at classified locations in the total amount not to exceed $400,000.

SEC. 2403. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of title 10, United States Code, the Secretary of Defense may, using amounts appropriated pursuant to section 2405(a)(15)(A), improve existing military family housing units in an amount not to exceed $100,000.

SEC. 2404. CONFORMING STORAGE FACILITIES

Section 2404(a) of the Military Construction Authorization Act, 1987 (division B of Public Law 99-661; 100 Stat. 4034) is amended to read as follows:

"(a) AUTHORITY TO CONSTRUCT.—The Secretary of Defense may, using not more than $10,000,000 appropriated for Fiscal Year 1987, using not more than $5,000,000 appropriated for Fiscal Year 1988, using not more than $9,300,000 appropriated for Fiscal Year 1989, using not more than $11,000,000 appropriated for Fiscal Year 1990, and using not more than $13,580,000 appropriated for Fiscal Year 1991, carry out military construction projects not otherwise authorized by law for conforming storage facilities."

SEC. 2405. AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for Fiscal Years beginning after September 30, 1990, for military construction, land acquisition, and military family housing functions of the Department of Defense (other than the military departments), in the total amount of $1,646,913,000 as follows:

(1) For military construction projects inside the United States authorized by section 2401(a), $289,683,000.

(2) For military construction projects outside the United States authorized by section 2401(b), $22,390,000.

(3) For military construction projects at Nellis Air Force Base, Nevada, authorized by section 2401(a) of the Military Construction Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-180; 103 Stat. 1639), $56,000,000.

(4) For military construction projects at Fort Sill, Oklahoma, authorized by section 2401(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2109), as amended, $10,400,000.

(5) For military construction projects at Defense Reutilization and Marketing Office, Eglin Air Force Base, Florida, authorized by section 2401(a) of the Military Construction Authorization Act for Fiscal Years 1990 and 1991, $2,850,000.

(6) For military construction projects at Defense Construction Supply Center, Columbus, Ohio, authorized by section 2401(a) of the Military Construction Authorization Act for Fiscal Years 1990 and 1991, $13,530,000.

(7) For military construction projects at Defense Personnel Support Center, Philadelphia, Pennsylvania, authorized by section 2401(a) of the Military Construction Authorization Act for Fiscal Years 1990 and 1991, $3,940,000.

(8) For military construction projects at Fort Sam Houston, Texas, authorized by section 2401(a) of the Military Construction Authorization Act, 1987 (division B of Public Law 99-661; 100 Stat. 4034), as amended, $77,000,000.

(9) For military construction projects at Portsmouth Naval Hospital, Virginia, authorized by section 2401(a) of the Military Construction Authorization Act for Fiscal Years 1990 and 1991, $40,000,000.

(10) For unspecified minor construction projects under section 2805 of title 10, United States Code, $12,955,000.

(11) For contingency construction projects of the Secretary of Defense under section 2804 of title 10, United States Code, $12,700,000.

(12) For architectural and engineering services and for construction design under section 2807 of title 10, United States Code, $104,285,000.

(13) For base closure and realignment activities as authorized by the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law 100-526; 102 Stat. 2623), $966,500,000.

(14) For conforming storage facilities constructed under the authority of section 2404 of the Military Construction Authorization Act, 1987 (100 Stat. 4037), as amended, $13,580,000.

(15) For military family housing functions—

(A) for construction and acquisition of military family housing facilities, $500,000; and

(B) for support of military housing (including functions described in section 2833 of title 10, United States Code), $20,600,000, of which not more than $17,897,000 may be obligated or expended for the leasing of military family housing units worldwide.

(b) LIMITATION OF TOTAL COST OF CONSTRUCTION PROJECTS.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost of all projects carried out under section 2401 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a).

SEC. 2406. MEDICAL FACILITY, NELLIS AIR FORCE BASE, NEVADA

(a) PROJECT AMOUNT.—The item listed under the heading "Defense Medical Facilities Office" in section 2401 of the Military Construction Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-180; 103 Stat. 1639) is amended by striking "Nellis Air Force Base, Nevada, $62,000,000." and inserting in lieu thereof "Nellis Air Force Base, Nevada, $66,000,000.".

(b) TITLE TOTAL.—Section 2405(b)(3) of such Act is amended by striking $52,000,000." and inserting in lieu thereof "$56,000,000.".

SEC. 2407. EXTENSION OF CERTAIN PRIOR YEAR AUTHORIZATIONS

(a) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1987 PROJECTS.—Notwithstanding the provisions of section 2701(a) of the Military Construction Authorization Act, 1987 (division B of Public Law 99-661; 100 Stat. 4040), the authorization for the following projects in section 2401(a) of that Act, shall remain in effect until October 1, 1991, or the date of the enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

(1) Road Improvements, in the amount of $4,370,000 at National Security Headquarters, Fort Meade, Maryland.

(2) Fuel Tankage, in the amount of $5,130,000 at Defense Fuel Support Point, Charleston, South Carolina.

(b) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1988 PROJECTS.—Notwithstanding the provisions of section 2171(a) of the Military Construction Authorization Act, 1988 and 1989 (division B of Public Law 100-180; 101 Stat. 1206), authorizations for the following projects authorized in section 2141 of that Act, as extended by section 2406(b) of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (division B of Public Law 101-189; 103 Stat. 1643), shall remain in effect until October 1, 1991, or until the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

Fuel Tankage, in the amount of $9,400,000 at Defense Fuel Supply Point, Key West, Florida.

(c) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1989 PROJECTS.—Notwithstanding the provisions of section 2701(a) of the Military Construction Authorization Act, 1989 (division B of Public Law 100-456; 102 Stat. 2115), authorizations for the following projects authorized in section 2401 of that Act shall remain in effect until October 1, 1991, or until the date of enactment of an Act authorizing funds for military construction for fiscal year 1992, whichever is later:

(1) Laboratory/Pharmacy Addition, Fort Leonard Wood, Missouri, $1,450,000.

(2) Hospital Life Safety Upgrade, Corpus Christi Naval Air Station, Texas, $6,100,000.

(3) Hospital Life Safety Upgrade, Dyess Air Force Base, Texas, $950,000.

TITLE XXV—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

SEC. 2501. AUTHORIZED NATO CONSTRUCTION AND LAND ACQUISITION PROJECTS

The Secretary of Defense may make contributions for the North Atlantic Treaty Organization Infrastructure Program as provided in section 2806 of title 10, United States Code, in an amount not to exceed the sum of the amount authorized to be appropriated for this purpose in section 2502 and the amount collected from the North Atlantic Treaty Organization as a result of construction previously financed by the United States.

SEC. 2502. AUTHORIZATION OF APPROPRIATIONS, NATO

Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1990 for contributions by the Secretary of Defense under section 2806 of title 10, United States Code, for the share of the United States of the cost of projects for the North Atlantic Treaty Organization Infrastructure Program as authorized by section 2501, in the amount of $210,400,000.

TITLE XXVI—GUARD AND RESERVE FORCES FACILITIES

SEC. 2601. AUTHORIZED GUARD AND RESERVE CONSTRUCTION AND LAND ACQUISITION PROJECTS

There are authorized to be appropriated for fiscal years beginning after September 30, 1990, for the costs of acquisition, architectural and engineering services, and construction of facilities for the Guard and Reserve Forces, and for contributions therefor, under chapter 133 of title 10, United States Code (including the cost of acquisition of land for those facilities), the following amounts:

(1) for the Department of the Army—

(A) for the Army National Guard of the United States, $198,040,000, and

(B) for the Army Reserve, $68,826,000.

(2) for the Department of the Navy, for the Naval and Marine Corps Reserve, $67,207,000.

(3) for the Department of the Air Force—

(A) for the Air National Guard of the United States, $134,310,000, and

(B) for the Air Force Reserve, $37,700,000.

TITLE XXVII—EXPIRATION OF AUTHORIZATIONS

SEC. 2701. EXPIRATION OF AUTHORIZATIONS AND AMOUNTS REQUIRED TO BE SPECIFIED BY LAW

(a) EXPIRATION OF AUTHORIZATIONS AFTER 2 YEARS.—Except as provided in subsection (b), all authorizations contained in titles XXI, XXII, XXIII, XXIV, and XXV for military construction projects, land acquisition, family housing projects and facilities, and contributions to the NATO Infrastructure Program (and authorizations of appropriations therefor) shall expire on October 1, 1992, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1993, whichever is later.

(b) EXCEPTION.—The provisions of subsection (a) do not apply to authorizations for military construction projects, land acquisition, family housing projects and facilities, and contributions to the NATO Infrastructure Program (and authorizations of appropriations therefor), for which appropriated funds have been obligated before October 1, 1992, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1993, whichever is later, for construction contracts, land acquisition, family housing projects and facilities, or contributions to the NATO Infrastructure Program.

SEC. 2702. EFFECTIVE DATES

Titles XXI, XXII, XXIII, XXIV, XXV, and XXVI shall be in effect as of October 1, 1990 or the date of the enactment of a Military Construction Authorization Act for fiscal year 1991, whichever is later.

TITLE XXVIII—GENERAL PROVISIONS

PART A—MILITARY CONSTRUCTION PROGRAM CHANGES

SEC. 2801. ONE-YEAR EXTENSION OF MILITARY HOUSING RENTAL GUARANTEE PROGRAM

Section 802(h) of the Military Construction Authorization Act, 1984 (10 U.S.C. 2821 note), is amended by striking out "1990" and inserting in lieu thereof "1991".

SEC. 2802. OPTIONS TO LEASE REAL PROPERTY

(a) AUTHORITY TO ACQUIRE LEASE OPTION.—Section 2677 of title 10, United States Code, is amended to read as follows:

"§ 2677. Options on real property

"(a) The Secretary of a military department may acquire an option to acquire or lease a parcel of real property before or after its acquisition or lease (as the case may be) is authorized by law, if he considers the parcel suitable and likely to be needed by his department.

"(b)(1) As consideration for an option acquired under subsection (a), the Secretary may pay—

"(A) in the case of an option to acquire, an amount that is not more than 12 percent of the appraised market value of the property; or

"(B) in the case of an option to lease, an amount that is not more than 12 percent of the appraised annual fair market rental value of the property.

"(2) The Secretary may make payments under paragraph (1) from funds available to his department for real property activities.".

(b) TABLE OF SECTIONS.—The item relating to section 2677 in the table of sections at the beginning of chapter 159 of title 10, United States Code, is amended to read as follows:

"2677. Options on real property.".

SEC. 2803. FAMILY HOUSING IMPROVEMENT THRESHOLD

Section 2825(b)(1) of title 10, United States Code, is amended by adding at the end the following sentence: "The Secretary concerned may waive the limitation contained in the preceding sentence in any case if the Secretary notifies the Committees on Armed Services of the Senate and the House of Representatives of the proposed waiver and a period of 21 days elapse after the date on which the committees receives the notice.".

SEC. 2804. OPERATION AND CONTROL OF THE PENTAGON RESERVATION

(a) IN GENERAL.—(1) Chapter 159 of title 10, United States Code, is amended by inserting after section 2673 the following new section:

"§ 2674. Operation and control of the Pentagon Reservation

"(a) Jurisdiction, custody, and control over, and responsibility for the operation, maintenance, and management of the Pentagon Reservation is transferred to the Secretary of Defense.

"(b) The Secretary may appoint military or civilian personnel or contract personnel to perform law enforcement and security functions for property occupied, or under the jurisdiction, custody, and control of the Department of Defense located in the National Capitol Region. Such individuals—

"(1) may be armed with appropriate firearms required for personal safety and for the proper execution of their duties, whether on Department of Defense property or in travel status; and

"(2) shall have the same powers as sheriffs and constables to enforce the laws, rules, or regulations enacted for the protection of persons and property.

"(c) The Secretary may prescribe such rules and regulations as the Secretary considers appropriate to ensure the safe, efficient, and secure operation of the Pentagon Reservation, including rules and regulations necessary to govern the operation and parking of motor vehicles on the Pentagon Reservation. Whoever shall violate any rule or regulation prescribed pursuant to this subsection shall be fined not more than $50 or imprisoned not more than 30 days, or both.

"(d) The Secretary of Defense may establish rates and collect charges for space, services, protection, maintenance, construction, repairs, alterations, or facilities provided at the Pentagon Reservation.

"(e)(1) There is established in the Treasury of the United States a revolving fund to be known as the Pentagon Reservation Maintenance Revolving Fund (hereafter in this section referred to as the 'Fund'). There shall be deposited into the Fund the following:

"(A) Funds collected by the Secretary for space and services and other items provided an organization or entity using any facility or land on the Pentagon Reservation pursuant to subsection (d).

"(B) All unobligated balances in the Fund established under section 210(f) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(f)) that would otherwise have remained available without fiscal year limitation to the Department of Defense under existing inter-agency agreements.

"(2) Monies deposited into the fund shall be available, without fiscal year limitation, for expenditure for real property management, operation, protection, construction, repair, alteration and related activities for the Pentagon Reservation.

"(f) The Secretary of Defense shall ensure that Members of Congress who serve on committees of the Senate or the House of Representatives having legislative oversight jurisdiction over the Department of Defense, and the professional staff members of such committees, have appropriate access to the facilities of the Pentagon Reservation.

"(g) In this section:

"(1) The term 'Pentagon Reservation' means that area of land (consisting of approximately 280 acres) and improvements thereon, located in Arlington, Virginia, on which the Pentagon Office Building, Federal Building Number 2, the Pentagon heating and sewage treatment plants, and other related facilities are located, including various areas designated for the parking of vehicles.

"(2) The term 'National Capitol Region' has the meaning provided the term 'National Capitol region' in section 1(b) of the Act of June 6, 1924 (43 Stat. 463; 40 U.S.C. 71(b)).

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 2673 the following new item:

"2674. Operation and control of the Pentagon Reservation.".

(b) TRANSFER OF FUNDS FOR FISCAL YEAR 1991.—For fiscal year 1991, the Secretary of Defense may transfer into the Pentagon Reservation Maintenance Revolving Fund (established by section 2674(e) of title 10, United States Code), from funds appropriated to the military departments and the Defense Agencies, amounts equal to the amounts that would otherwise be paid by the military departments and the Defense Agencies to the General Services Administration for the use of the Pentagon Reservation.

(c) EFFECTIVE DATE.—Section 2674 of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1990, or the date of the enactment of this Act, whichever is later.

SEC. 2805. BASE CLOSURE AND REALIGNMENT

(a) BASE CLOSURE AND REALIGNMENT.—Section 2687 of title 10, United States Code, is amended—

(1) by striking out subsection (d);

(2) by redesignating subsection (e) as subsection (i); and

(3) by inserting after subsection (c) the following new subsections:

"(d) IMPLEMENTATION.—(1) The Secretary of Defense may, subject to the provisions of this section—

"(A) take such actions as may be necessary to close or realign any military installation, including the acquisition of such land, the construction of such replacement facilities, the performance of such activities, and the conduct of such advance planning and design as may be required to transfer functions from a military installation being closed or realigned to another military installation, and may use for such purpose funds in the Account or funds appropriated to the Department of Defense for use in planning and design, minor construction, or operation and maintenance;

"(B) provide—

"(i) economic adjustment assistance to any community located near a military installation being closed or realigned, and

"(ii) community planning assistance to any community located near a military installation to which functions will be transferred as a result of the closure or realignment of a military installation,

if the Secretary of Defense determines that the financial resources available to the community (by grant or otherwise) for such purposes are inadequate, and may use for such purposes funds in the Account or funds appropriated to the Department of Defense for economic adjustment assistance or community planning assistance;

"(C) carry out activities for the purposes of environmental restoration and mitigation, and may use for such purpoes funds in the Account or funds appropriated to the Department of Defense for environmental restoration and mitigation; and

"(D) provide outplacement assistance to civilian employees employed by the Department of Defense at military installations being closed or realigned, and may use for such purpose funds in the Account or funds appropriated to the Department of Defense for outplacement assistance to employees.

"(2) Nothing in this section restricts the authority of the Secretary of Defense or the Secretary of the military department concerned to obtain architectural and engineering services under section 2807 of this title.

"(e) MANAGEMENT AND DISPOSAL OF PROPERTY.—(1) The Administrator of General Services shall delegate to the Secretary of Defense, with respect to excess and surplus real property and facilities located at a military installation closed or realigned under the procedures established by this section—

"(A) the authority of the Administrator to utilize excess property under section 202 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483);

"(B) the authority of the Administrator to dispose of surplus property under section 203 of that Act (40 U.S.C. 484); and

"(C) the authority of the Administrator to grant approvals and make determinations under section 13(g) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(g)).

"(2)(A) Subject to subparagraph (B), the Secretary of Defense shall exercise the authority delegated to the Secretary pursuant to paragraph (1) in accordance with—

"(i) all regulations in effect on the date of the enactment of the National Defense Authorization Act for Fiscal Year 1991 governing the utilization of excess property and the disposal of surplus property under the Federal Property and Administrative Services Act of 1949; and

"(ii) all regulations in effect on the date of the enactment of the National Defense Authorization Act for Fiscal Year 1991 governing the conveyance and disposal of property under section 13(g) of the Surplus Property Act of 1944 (50 U.S.C. App. 1622(g)).

"(B) The Secretary of Defense, after consulting with the Administrator of General Services, may issue regulations that are necessary to carry out the delegation of authority required by paragraph (1).

"(C) The authority required to be delegated by paragraph (1) to the Secretary of Defense by the Administrator of General Services shall not include the authority to prescribe general policies and methods for utilizing excess property and disposing of surplus property.

"(D) The Secretary of Defense may transfer real property or facilities located at a military installation to be closed or realigned under this section, with or without reimbursement, to a military department or other entity (including a nonappropriated fund instrumentality) within the Department of Defense or the Coast Guard.

"(E) Before any action may be taken with respect to the disposal of any surplus real property or facility located at any military installation to be closed or realigned under this section, the Secretary of Defense shall consult with the Governor of the State and the heads of the local governments concerned for the purpose of considering any plan for the use of such property by the local community concerned.

"(3)(A) Except as provided in subparagraph (B), there shall be deposited into the Account all proceeds—

"(i) from any transfer under paragraph (2)(D); and

"(ii) from the disposal of any property or facility made as a result of a closure or realignment under this section.

"(B) In any case in which the Secretary of Defense requests assistance from the General Services Administration in the management or disposal of property or facilities under this section, the Secretary of Defense shall reimburse the Administrator of General Services in accordance with section 1535 of title 31 for any expenses incurred in such activities.

"(f) APPLICABILITY OF NATIONAL ENVIRONMENTAL POLICY ACT OF 1969.—(1) The provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall not apply to—

"(A) the actions of the Secretary of Defense in selecting a military installation for closure or realignment;

"(B) in selecting a military installation to receive functions from an installation to be closed or realigned; or

"(C) in the preparation of the notification and evaluation required by subsection (b).

"(2)(A) The provisions of the National Environmental Policy Act of 1969 shall apply to actions of the Department of Defense under this section (i) during the process of property disposal, and (ii) during the process of relocating functions from a military installation being closed or realigned to another military installation after the receiving installation has been selected, but before the functions are relocated.

"(B) In applying the provisions of the National Environmental Policy Act of 1969 to actions referred to in subparagraph (A), the Secretary of Defense and the Secretary of the military departments concerned shall not have to consider—

"(i) the need for closing or realigning the military installation which has been selected for closure or realignment by the Secretary of Defense or the Secretary of the military department concerned;

"(ii) the need for transferring functions to the military installation which has been selected as the receiving installation; or

"(iii) military installations alternative to those selected.

"(3) A civil action for judicial review, with respect to any requirement of the National Environmental Policy Act of 1969 to the extent such Act is applicable, of any act or failure to act by the Department of Defense or the military department concerned during the closing, realigning, or relocating of functions referred to in clauses (i) and (ii) of paragraph (2)(A), or of any act or failure to act by the Department of Defense or the military department concerned under this section, may not be brought more than 60 days after the date of such act or failure to act.

"(g) INAPPLICABILITY OF OTHER LAW.—The Secretary of Defense may close or realign military installations pursuant to the procedures set forth in this section without regard to—

"(1) any provision of law restricting the use of funds for closing or realigning military installations included in any appropriations or authorization Act enacted before the date of the enactment of the National Defense Authorization Act for Fiscal Year 1991; and

"(2) section 2662 of this title.

"(h) BASE CLOSURE AND REALIGNMENT ACCOUNT.—(1) There is established on the books of the United States Treasury an account to be known as the 'Department of Defense Base Closure and Realignment Account' which shall be administered by the Secretary of the Treasury as a single account.

"(2) The Account shall be composed of—

"(A) funds appropriated to the Account;

"(B) any funds transferred to the Account by the Secretary of Defense from funds appropriated to or for the use of the Department of Defense, other than funds appropriated to the Account, after the Secretary of Defense transmits to the appropriate committees of Congress written notice of, and justification for, such transfer; and

"(C) proceeds described in subsection (e)(3)(A);

"(3) The Secretary of Defense may use the funds in the Account only for the purposes described in subsection (d).

"(4) When funds in the Account are used to carry out a construction project under subsection (d)(1), and the cost of the project will exceed the maximum amount authorized by law for a minor construction project, the Secretary of Defense shall notify, in writing, the appropriate committees of Congress of the nature of, the justification for, and the amount of the expenditures for the project. Any such construction project may be carried out without regard to section 2805 of this title.".

(b) CONFORMING AMENDMENT.—Subsection (i) of such section, as redesignated by subsection (a), is amended by adding at the end the following new paragraphs:

"(5) The term 'Account' means the Department of Defense Base Closure and Realignment Account established by subsection (h).

"(6) The term 'appropriate committees of Congress' means the Committees on Armed Services and the Committees on Appropriations of the Senate and the House of Representatives.".

SEC. 2806. HOMEOWNERS ASSISTANCE PROGRAM

Section 2832 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(c) Notwithstanding subsection (i) of the Act referred to in subsection (a), the Secretary may transfer such sums as are determined to be necessary to provide assistance under that Act to the fund established by subsection (d) of that Act from any funds available for obligation by the Department of Defense. The Secretary shall report the facts concerning any transfer made pursuant to this section to the appropriate committees of Congress.".

SEC. 2807. ASSISTANCE PROGRAM FOR EMPLOYEES OF A NONAPPROPRIATED FUND INSTRUMENTALITY ADVERSELY AFFECTED BY BASE CLOSURES

Section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3374) is amended—

(1) in subsection (c), by striking out "above" in the first sentence and inserting in lieu thereof "in subsection (b) or (o)";

(2) in subsection (k), by striking "and (n) of this section" and inserting "(n), and (o)"; and

(3) by adding at the end the following new subsections:

"(o)(1) Notwithstanding subsection (b), a Federal employee who is serving overseas and is entitled to reemployment by the Federal Government (including a nonappropriated fund instrumentality of the United States) at or in connection with a military base or installation undergoing a base closure, wholly or in part, shall be entitled to the benefits of this section to the same extent that the employee would have been if the employee were employed at or in connection with such base or installation.

"(2) All payments to an employee of a nonappropriated fund instrumentality of the United States that are made under this section from the fund available to the Secretary of Defense under subsection (d) shall be reimbursed from the nonappropriated funds of such instrumentality.

"(3) Paragraph (1) applies with respect to the closure of a base or installation ordered to be closed, in whole or in part, after December 31, 1988.

"(p) In this section:

"(1) The term 'Federal employee' includes a person referred to in section 2105(c) of title 5 who is a citizen or national of the United States.

"(2) The term 'nonappropriated fund instrumentality of the United States' means an instrumentality referred to in section 2105(c) of title 5.".

SEC. 2808. COMMUNITY PLANNING ASSISTANCE

Section 2391(b) of title 10, United States Code, is amended—

(1) by striking out paragraphs (3), (4), and (6);

(2) by redesignating paragraph (5) as paragraph (4); and

(3) by inserting after paragraph (2) the following new paragraph (3):

"(3) In the case of a publicly-announced planned reduction in Department of Defense spending, the cancellation or termination of a Department of Defense contract, or the failure to proceed with a previously approved major defense acquisition program, assistance may be made under paragraph (1) only if the reduction cancellation, termination, or failure will have a direct and significant impact on a community and will result in the loss of—

"(A) not less than 2,500 jobs, in the case of an urban area;

"(B) not less than 1,000 jobs, in the case of a rural area; or

"(C) a number of jobs equal to or greater than 1 percent of the employed labor force in either such area.".

SEC. 2809. REVENUE FROM DISPOSAL OF EXCESS DEPARTMENT OF DEFENSE LAND

Section 204 of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 485) is amended—

(1) in subsection (a), by striking "subsections (b), (c), (d), and (e)" and inserting in lieu thereof "subsections (b), (c), (d), (e), and (h)";

(2) in subsection (b), by striking "All the proceeds" in the first sentence and inserting in lieu thereof "Except as provided in subsection (h), all the proceeds"; and

(3) by adding at the end thereof the following new subsection (h):

"(h)(1) If the Secretary of Defense determines that land under the control of the Department of Defense (other than land at a military installation designated for closure or realignment) is excess property, the Secretary shall request the Administrator to dispose of such land in accordance with the provisions of this Act. The Administrator shall deposit any proceeds (less the costs of disposing of the land) in a special account in the Treasury of the United States. The amount deposited in such account with respect to the disposal of any such land shall be available to the extent provided in appropriation Acts as follows:

"(A) 50 percent of such amount shall be available for facility maintenance and repair or environmental restoration at the military installation where the land is located.

"(B) 50 percent of such amount shall be available for facility maintenance and repair and for environmental restoration, to the military department that had jurisdiction over the land before the disposal of such land.

"(2) For the purposes of this subsection the term 'military installation' shall have the meaning given that term in section 2687(i)(1) of title 10, United States Code.".

SEC. 2810. REVENUE FROM LEASING OUT DEPARTMENT OF DEFENSE ASSETS

Section 2667(d) of title 10, United States Code, is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1)(A) All money rentals received pursuant to leases entered into by the Secretary of a military department under this section shall be deposited in a special account in the Treasury established for such military department, except—

"(i) amounts paid for utilities and services furnished lessees by the Secretary; and

"(ii) money rentals referred to in paragraph (3).

"(B) Sums deposited in a military department's special account pursuant to subparagraph (A) shall be available to such military department, as provided in appropriation Acts, for facility maintenance and repair or environmental restoration. Of the sums made available for such purpose in any fiscal year, an amount equal to 50 percent of the money rentals deposited in such account from money rentals received under a lease of property at a military installation or facility shall be made available for maintenance and repair or environmental restoration expenses at such installation or facility.

"(2) Payments for utilities and services furnished lessees pursuant to leases entered into under this section shall be credited to the appropriation account from which the cost of furnishing the utilities and services was paid.".

SEC. 2811. SENSE OF THE SENATE ON CLOSURE OF OVERSEAS BASES

(a) FINDINGS.—Congress makes the following findings:

(1) The United States has provided substantial resources over more than four decades to the construction, improvement, and operation of military facilities outside the United States.

(2) The United States has also provided substantial resources over the years to the economic and military development of friendly foreign countries.

(3) The provision of resources described in subparagraphs (1) and (2) was carried out pursuant to several collective security arrangements.

(4) Efforts by the United States have enhanced the economic and military capabilities of a significant number of the friends and allies of the United States.

(5) The recent changes in Eastern Europe and the Soviet Union, and the disintegration of the Warsaw Pact as a military alliance, have created an environment that will permit the withdrawal of military personnel of the United States from several military facilities in Europe and other areas of the world.

(6) The United States is entitled to recoup the residual value of the facilities constructed or improved by it unilaterally or in conjunction with other governments.

(b) SENSE OF CONGRESS.—In light of the findings in subsection (a), it is the sense of the Congress that—

(1) in the case of any military facility outside the United States released in whole or in part to a host country, the Secretary of Defense, acting through the military component commands or the sub-unified commands to the combatant commands, should be the lead official in negotiations relating to the residual value of such facility;

(2) although environmental cleanup is a factor that should be considered in connection with the determination of residual value of a released facility, the cost to the United States, if any, of the environmental cleanup of a facility should not exceed the residual value of the facility;

(3) determination of the residual value of military facilities released to host countries in whole or in part by the United States should be handled on a facility by facility basis; and

(4) the Secretary of Defense should seek recompense based on the highest possible residual value of a facility released to a host nation.

SEC. 2812. OVERSEAS MILITARY FACILITY INVESTMENT RECOVERY ACCOUNT

(a) ESTABLISHMENT OF SPECIAL ACCOUNT.—There is established on the books of the Treasury a special account to be known as the "Department of Defense Overseas Military Facility Investment Recovery Account". Any amounts paid to the United States, pursuant to any treaty, status of forces agreement, or other international agreement to which the United States is a party, for the residual value of real property or improvements to real property used by civilian or military personnel of the Department of Defense shall be deposited into such account.

(b) USE OF FUNDS.—Money deposited in the Department of Defense Overseas Military Facility Investment Recovery Account

shall be available to the Secretary of Defense to help meet costs incurred by the Department of Defense in connection with facility maintenance and repair and environmental restoration at military installations in the United States. Funds in the account shall remain available until expended, as provided in appropriations Acts.

SEC. 2813. MODIFICATION OF THE CONTENT OF BIANNUAL REPORT OF THE COMMISSION ON ALTERNATIVE UTILIZATION OF MILITARY FACILITIES

(a) USES OF FACILITIES.—Section 2819(b) of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 102 Stat. 2119; 10 U.S.C. 2391 note) is amended—

(1) in paragraph (2), by striking out "minimum security facilities for nonviolent prisoners" and inserting in lieu thereof "Federal confinement or correctional facilities including shock incarceration facilities";

(2) by striking out "and" at the end of paragraph (3);

(3) by redesignating paragraph (4) as paragraph (5); and

(4) by inserting after paragraph (3) the following new paragraph (4):

"(4) identify those facilities, or parts of facilities, that could be effectively utilized or renovated to meet the needs of States and local jurisdictions for confinement or correctional facilities; and".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect with respect to the first report required to be submitted under section 2819 the National Defense Authorization Act, Fiscal Year 1989, after September 30, 1990.

SEC. 2814. STUDY TO EVALUATE JOINT MILITARY-CIVILIAN USE OF MILITARY AIRFIELDS

(a) IN GENERAL.—The Secretary of Defense and the Secretary of Transportation shall conduct a joint study to evaluate the desirability and feasibility of converting airfields under the jurisdiction of each military department—

(1) to civilian use; or

(2) in the case of any such airfield which will continue to be used by the military department, to joint civilian and military use.

(b) SPECIFIC MATTERS TO BE CONSIDERED.—In conducting the study referred to in subsection (a), the Secretary of Defense and the Secretary of Transportation shall—

(1) prepare an inventory of airfields under the control of each military department;

(2) evaluate the present and future need of airfields for civilian use and for military use;

(3) evaluate the extent to which civilian or joint civilian-military use of such airfields would meet national aviation policy objectives;

(4) identify obstacles to and incentives for encouraging civilian or joint civilian-military use of such airfields;

(5) identify and assess means of reducing the cost to the Department of Defense of civilian or joint civilian-military use of such airfields, including—

(A) cost sharing agreements with civilian users of such airfields,

(B) use of funds from the Airport and Airway Trust Fund established under section 9502 of the Internal Revenue Code of 1986,

(C) the imposition of civilian aviation user fees, and

(D) civil aviation user lease agreements; and

(6) assess the advisability of a joint-use agreement between the military department that controls the airfield and a commercial fixed-base operator.

(c) REPORT.—Not later than one year after the date of the enactment of this section, the Secretary of Defense and the Secretary of Transportation shall submit to the Committees on Armed Services of the Senate and the House of Representatives a joint report on the results of the study referred to in subsection (a) together with such comments and recommendations for legislation as the Secretaries consider appropriate.

(d) FUNDING FOR STUDY.—The study referred to in this section shall be funded jointly by the Department of Defense and the Department of Transportation.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such funds as may be necessary to carry out the purposes of this section.

PART B—LAND TRANSACTIONS

SEC. 2821. RELEASE AND CONVEYANCE, RESERVE CENTER AT LITTLE ROCK, ARKANSAS

(a) IN GENERAL.—Subject to subsections (b) and (c), the Secretary of the Army (hereafter in this section referred to as the "Secretary") shall—

(1) release to the University of Arkansas, without consideration, all right, title, and interest of the United States in and to approximately 2.66 acres of land in Palaski County, Arkansas, leased by the United States from the University of Arkansas pursuant to Department of Army lease No. DA-34-066, dated March 31, 1950; and

(2) convey to the University of Arkansas, without consideration, all right, title, and interest of the United States in and to all improvements constructed on the land referred to in paragraph (1).

(b) CONDITIONS OF RELEASE AND CONVEYANCE.—The release and conveyance referred to in subsection (a) shall be subject to the condition that—

(1) the University of Arkansas accept responsibility for all costs related to removing or abating the hazard posed by asbestos contained in any of the improvements conveyed pursuant to subsection (a)(2); and

(2) the University of Arkansas agree to indemnify the United States against any liability for the presence of any asbestos or asbestos-containing material in any of the improvements referred to in subsection (a)(2).

(c) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the release and conveyance under this section as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2822. LAND CONVEYANCE AT REDSTONE ARSENAL, ALABAMA

(a) IN GENERAL.—Subject to subsections (b) through (f), the Secretary of the Army may convey, without consideration, to the Solid Waste Disposal Authority of the City of Huntsville, Alabama, all right, title, and interest of the United States in and to a parcel of land, consisting of approximately 20 acres, at the Redstone Arsenal, Alabama, that, on the date of the enactment of this section, is leased to such Solid Waste Disposal Authority pursuant to Department of the Army lease DACA 01-1-87-225.

(b) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the property to be conveyed pursuant to this section shall be determined by a survey satisfactory to the Secretary. The cost of the survey shall be borne by the Solid Waste Disposal Authority referred to in subsection (a).

(c) RESERVATIONS.—The deed of conveyance for the parcel of land referred to in subsection (a) shall—

(1) reserve to the United States all mineral rights in the land conveyed;

(2) reserve to the United States an easement for the maintenance and operation of ground water monitoring equipment located in the southeast corner of the parcel of land and an easement for ingress and egress to the equipment; and

(3) incorporate the easement granted by the Secretary of the Army to the City of Huntsville, Alabama, contained in the Road or Street Easement Numbered DACA 01-2-68-4, dated November 7, 1967, and recorded in Deed Book 458, pages 356-358, Probate Records, Madison County, Alabama.

(d) EXISTING MINERAL LEASES.—The conveyance provided for in subsection (a) shall be made subject to any mineral leases to which the land described in subsection (a) is subject at the time of the conveyance.

(e) TERMINATION OF EXISTING LEASE.—Department of the Army Lease DACA 01-1-87-225 between the Department of the Army and the Solid Waste Disposal Authority of the City of Huntsville, Alabama, is terminated effective on the date of the conveyance referred to in subsection (a).

(f) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance under this section as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2823. TRANSFER OF LANDS TO SECRETARY OF AGRICULTURE

(a) TRANSFER.—Notwithstanding any other provision of law and subject to subsections (b) through (d), the Secretary of the Army shall transfer administrative jurisdiction of approximately 16,707 acres of land at the Pinon Canyon Maneuver Site, Colorado, consisting of all parcels of land identified by the Secretary of the Army as uneconomic remnant lands, to the Secretary of Agriculture for inclusion in the Comanche National Grassland. The Secretary of Agriculture shall administer the transferred lands in accordance with laws applicable to the National Forest system.

(b) DESCRIPTION OF THE PROPERTY.—(1) The exact acreage and legal description of the property to be transferred under this section shall be determined by surveys satisfactory to the Secretary of the Army and the Secretary of Agriculture.

(2) The Secretary of Agriculture, with the concurrence of the Secretary of the Army, shall prepare a map of the lands to be conveyed. These lands shall be known as the Picket Wire Canyonlands (hereafter in this section referred to as the "PWC").

(3) The legal description and map referred to in paragraphs (1) and (2) shall be kept on file and available for public inspection in the office of the Chief of the Forest Service, Department of Agriculture.

(c) ADMINISTRATION OF LANDS.—(1) The Secretary of Agriculture shall administer the transferred lands so as to conserve and protect the paleontological, archeological, wildlife, vegetative, aquatic, and other natural resources of the area.

(2) The management provisions of this section shall apply only to those parcels of the transferred lands comprising approximately 11,507 acres in the Purgatoire River Canyon.

(3) The Secretary of Agriculture may permit access to the PWC for the purpose of permitting scholarly research, interpreta-

tion to the public, and recreational activities to the extent that such access does not—

(A) impair (as determined by the Secretary of the Army) the use of the Pinon Canyon Maneuver Site for the purposes for which the area is intended to be used by the Army; or

(B) impair the conservation and protection of paleontological, archeological, or natural resources of the area.

(4) The Secretary of Agriculture may permit livestock grazing in the PWC only to the extent that the Secretary determines necessary to benefit the natural resources of the area.

(5) Lands of the PWC are withdrawn from operation of the mining, mineral leasing, and other mineral entry laws of the United States.

(6) No activity shall be permitted in the PWC that would impair (as determined by the Secretary of the Army) the use of the Pinon Canyon Maneuver Site for the purposes for which the site is intended to be used by the Army or the conservation and protection of the paleontological, archeological, and natural resources of the area, including production of or exploration for oil, gas, or minerals of any kind.

(7) Lands to be transferred may not be used for the storage or processing of nuclear waste, other hazardous waste, or any other waste.

(8) The Secretary of Agriculture, in consultation with the Director of the National Park Service, the Director of United States Fish and Wildlife Service, the Secretary of the Army, the head of the Colorado Department of Natural Resources, and the head of the Colorado State Historic Preservation Office, shall, after notice and opportunity for public comment, develop a management plan for the PWC that includes—

(A) a complete survey and an inventory of the paleontological and archeological resources of the area; and

(B) a strategy for protecting and conserving the dinosaur track way in the Purgatoire River Canyon and other paleontological and archeological resources in the PWC.

(d) INTERAGENCY AGREEMENT.—(1) When the lands referred to in subsection (a) are transferred, the Secretary of the Army and the Secretary of Agriculture shall enter into an interagency agreement providing for—

(A) access to the PWC through the Pinon Canyon Maneuver Site for the Secretary of Agriculture (for the purpose of taking action to conserve and protect the area's resources) and the public (for educational purposes) in such manner, at such times, and to such an extent as will not interfere (as determined by the Secretary of the Army) with the Army's use of the site; and

(B) cooperation between the Army and the Forest Service in the protection and conservation of the paleontological, archeological, and natural resources in the PWC.

(2) In determining whether the manner, time, and extent of access through the Pinon Canyon Maneuver Site for a particular purpose will constitute interference with the Army's use of the site for the purpose of paragraph (1)(B), the Secretary of the Army shall—

(A) with respect to access by the Secretary of Agriculture for management purposes, take into consideration that the high importance of protecting and conserving the resources of the PWC may justify the imposition of some inconvenience to the Army, so long as the inconvenience does not prevent the Army from accomplishing its purposes on the Pinon Canyon Maneuver Site; and

(B) with respect to access by the public, take into consideration comments solicited from the public by the Secretary of Agriculture concerning the need for and the kind of access that should be provided.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Department of Agriculture such sums as are necessary to carry out this section, including such sums as are necessary to pay for—

(1) a study of the paleontological resources of the PWC and action to prevent erosion of the dinosaur track way;

(2) a complete cadastral survey of the PWC; and

(3) an archaeological, paleontological, and historical survey of the PWC.

SEC. 2824. LAND CONVEYANCE, CAPE HENLOPEN, DELAWARE

(a) IN GENERAL.—Notwithstanding any other provision of law, and subject to subsections (b) through (f), the Secretary of the Army (hereafter in this section referred to as the "Secretary") shall convey to the State of Delaware all right, title, and interest of the United States in and to a parcel of real property located at Cape Henlopen, in Sussex County, Delaware, consisting of approximately 96 acres and known as the Fort Meade Recreation Area. The conveyance made pursuant to this section shall be without consideration except that required by subsection (b).

(b) CONDITIONS OF CONVEYANCE.—The conveyance authorized by this section shall be subject to the following conditions:

(1) The State of Delaware shall indemnify the United States against all liability in connection with any hazardous materials, substances, or conditions which may be found on the property to be conveyed pursuant to this section.

(2) The State of Delaware shall permit members of the Armed Forces of the United States serving on active duty, their spouses, and their dependents to purchase each year, for a price not greater than the price charged residents of the State of Delaware, an annual pass to all Delaware State parks.

(3) The State of Delaware shall pay to the Secretary for credit to the Army Morale, Welfare, and Recreation Fund, the sum of $14,369, to reimburse the fund for sums expended to improve the property.

(c) USE OF PROPERTY; REVERSION.—(1) The real property conveyed pursuant to this section may be used by the State of Delaware only for public park or recreational purposes.

(2) If the Secretary of the Interior determines at any time that the real property conveyed pursuant to this section is not being used for a purpose specified in paragraph (1), all right, title and interest in and to such real property shall revert to the United States and the United States shall have the right of immediate entry thereon.

(d) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the real property to be conveyed pursuant to this section shall be determined by a survey satisfactory to the Secretary. The cost of such survey shall be borne by the State of Delaware.

(e) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance pursuant to this section as the Secretary determines appropriate to protect the interests of the United States.

(f) TRANSFER DATE.—The transfer referred to in subsection (a) shall be made not later than one year after the date of the enactment of this section.

SEC. 2825. RELOCATION OF THE FLORIDA SOLAR ENERGY CENTER

(a) IN GENERAL.—The Secretary of the Air Force may pay $2,953,000 to the State of Florida for the sole purpose of assisting that State to relocate the Florida Solar Energy Center from Cape Canaveral Air Force Station, Florida, to a new site provided by the State of Florida on other than federally owned land. The payment of such sum shall include all Federal Government contributions to the relocation project, including relocation costs.

(b) CONSIDERATION.—In consideration for payment of the amount provided for in (a), the State of Florida shall—

(1) surrender all leases, easements, and other land interests connected with the Florida Solar Energy Center on Cape Canaveral Air Force Station;

(2) convey to the United States title to all buildings, fixtures, and other real property located on such lands;

(3) waive any claims against the United States arising out of the operation of the Florida Solar Energy Center from its inception until the final departure of all personnel and property connected with the Center from Cape Canaveral Air Force Station;

(4) accept sole responsibility for the disposal, removal, or remediation of all solid or hazardous wastes on the property and release the United States from any obligation with respect to such wastes without regard to who may have been responsible for placing the solid or hazardous waste on the property; and

(5) indemnify the United States against all claims, losses, damages, and costs arising out of or connected with any solid or hazardous wastes on the premises, to the extent permitted by the laws of the State of Florida.

(c) AGREEMENT.—No payment may be made to the State of Florida under this section until the Secretary and the State of Florida have entered into an agreement embodying the terms of this section, including a waiver by the State of all claims for the payment of any amount for relocation costs in addition to the amount specified in subsection (a).

(d) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions with respect to the payment by the Secretary pursuant to subsection (a) as the Secretary considers appropriate to protect the interests of the United States.

SEC. 2826. LAND EXCHANGE AT FORT BENNING, GEORGIA

(a) AUTHORITY TO CONVEY.—Subject to subsections (b), (c), and (d), the Secretary of the Army may convey to the City of Columbus, Georgia, all right, title, and interest of the United States in and to a tract of land consisting of approximately 3,000 acres comprising a portion of Fort Benning, Georgia.

(b) CONSIDERATION.—(1) In consideration for the conveyance by the Secretary under subsection (a), the City of Columbus shall convey to the United States approximately 4,000 acres of land located adjacent to the southern boundary of the lands comprising Fort Benning.

(2) If the fair market value of the land conveyed by the Secretary under subsection (a) exceeds the fair market value of the land conveyed to the United States, as determined by the Secretary, the City of Columbus shall pay an amount equal to the differ-

ence to the United States. The Secretary shall deposit any such amount into the Treasury as miscellaneous receipts.

(c) LEGAL DESCRIPTION OF LANDS.—The exact acreages and legal descriptions of the lands to be conveyed under this section shall be determined by surveys satisfactory to the Secretary. The cost of the surveys shall be borne by the City of Columbus.

(d) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the transactions authorized by this section as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2827. NEGOTIATIONS FOR JOINT CIVILIAN AND MILITARY USE OF THE AIRFIELD AT BARBERS POINT NAVAL AIR STATION, HAWAII

(a) IN GENERAL.—The Secretary shall enter into negotiations with the State of Hawaii with a view to entering into an agreement with the State of Hawaii under which the airfield facilities at Barbers Point Naval Air Station, Hawaii, would be jointly used for general civilian aviation purposes and military purposes.

(b) AGREEMENT AUTHORITY.— In the event that the negotiations referred to in subsection (a) are successful, the Secretary may enter into an agreement with the State of Hawaii providing for the joint civilian and military use of the airfield. Any such agreement shall provide for an equitable allocation between the State and the Navy of the costs of maintaining and operating the airfield.

SEC. 2828. LAND CONVEYANCE, DILLINGHAM MILITARY RESERVATION, HAWAII

(a) IN GENERAL.—Subject to subsections (b), (c), and (d), the Secretary of the Army shall convey to the State of Hawaii, without consideration, all right, title, and interest of the United States in and to a parcel of land, together with improvements thereon, consisting of approximately 87 acres, that comprises a portion of Dillingham Military Reservation at Mokuleia, Hawaii, and which was previously ceded, without consideration, to the United States by the State of Hawaii for use by the Armed Forces of the United States.

(b) CONDITION.—The conveyance authorized by subsection (a) shall be made on condition that the State of Hawaii enter into an agreement with the Secretary of the Army (and acceptable to the Secretary) providing for joint civilian and military use of the property as an airfield by the State of Hawaii and the Army.

(c) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the property referred to in subsection (a) shall be determined by a survey satisfactory to the Secretary. The cost of the survey shall be borne by the State of Hawaii.

(d) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance under this section as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2829. LAND CONVEYANCE, SOUTH BEND, INDIANA

(a) IN GENERAL.—Subject to subsections (b) through (e), the Secretary of the Army may convey to the Civic Foundation, Incorporated, a nonprofit corporation organized and operating under the laws of the State of Indiana, all right, title and interest of the United States in and to approximately 4.15 acres of land, together with improvements thereon, situated at 1733 East Northside Boulevard, South Bend, Indiana, and known as the Northside Army Reserve Training Center.

(b) CONSIDERATION.—(1) In consideration for the conveyance authorized by subsection (a), the Civic Foundation, Incorporated, or the City of South Bend shall—

(A) convey to the United States a parcel of land consisting of approximately eight acres, together with improvements thereon, located at 2402 Rose Street, South Bend, Indiana, known as the Maple Lane School;

(B) in accordance with plans and specifications approved by the Secretary—

(i) repair and rehabilitate the Maple Lane School building; and

(ii) design and construct, to Department of the Army specifications, additional improvements on the Maple Lane School property necessary to meet the requirements of the Army (as determined by the Secretary); and

(C) construct an access driveway to the Maple Lane School property from Ironwood Drive.

(2) The cost of the construction, repair, rehabilitation, and additional improvements referred to in subparagraphs (B) and (C) of paragraph (1) (including the cost of all architectural, engineering design, environmental assessment and remediation, construction financing, and all legal and inspection fees for the additional improvements) shall be paid as follows:

(A) The Civic Foundation, Incorporated, or the City of South Bend shall pay $500,000 of the amount necessary to carry out subparagraphs (B) and (C) of paragraph (1).

(B) The United States shall pay any remaining costs for such work and additional improvements out of funds appropriated pursuant to the authorization contained in this division for such purposes and out of funds appropriated for the reserve components of the Armed Forces by the Military Construction Appropriations Act, 1987 (as contained in section 101(k) of the Joint Resolution making appropriations for the fiscal year 1987, and for other purposes, approved October 30, 1986 (Public Law 99-591; 100 Stat. 3341-287)), and made available for such purpose.

(c) VACATION OF PREMISES.—The Army shall vacate the Northside Army Reserve Training Center facilities referred to in subsection (a) upon occupancy of the Maple Lane School property referred to in subsection (b)(1).

(d) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the properties to be conveyed pursuant to this section shall be determined by surveys satisfactory to the Secretary. The cost of the survey shall be borne by the Civic Foundation, Incorporated, or the City of South Bend.

(e) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the transaction under this section as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2830. LAND EXCHANGE AT MARINE CORPS FINANCE CENTER, KANSAS, CITY, MISSOURI

(a) AUTHORITY TO CONVEY.—Subject to subsections (b) through (e), the Secretary of the Navy may convey to the City of Kansas City, Missouri, all right, title, and interest of the United States in and to a parcel of land consisting of approximately 12 acres located near the family housing area of the Marine Corps Finance Center, Kansas City, Missouri, together with the improvements on such land.

(b) CONSIDERATION.—In consideration for the conveyance by the Secretary under subsection (a), the City of Kansas City shall convey to the United States approximately 10 acres of land adjacent to the family housing area of the Marine Corps Finance Center, Kansas City, Missouri.

(c) PAYMENT OF EXCESS INTO TREASURY.—If the fair market value of the land and improvements conveyed by the Secretary under subsection (a) exceeds the fair market value of the land conveyed to the United States by the City of Kansas City, the City shall pay an amount equal to the difference to the United States, and the Secretary shall deposit such amount into the Treasury as miscellaneous receipts.

(d) LEGAL DESCRIPTION OF LANDS.—The exact acreages and legal descriptions of the lands to be conveyed under this section shall be determined by surveys satisfactory to the Secretary. The cost of the surveys shall be borne by the City of Kansas City.

(e) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the transactions authorized by this section as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2831. EXCHANGE OF INTERESTS IN MILITARY PROPERTY IN THE STATE OF OREGON

(a) RELEASE OF REVERSIONARY INTEREST.—Subject to subsections (b), (c), and (d), the Secretary of the Army may release, on behalf of the United States, to the State of Oregon the reversionary interest of the United States in two parcels of land (including improvements thereon) at Camp Withycombe, Clackamas County, Oregon. One such parcel contains approximately 157 acres and the other such parcel contains approximately 3 acres. Both parcels are part of a larger tract of land that comprises Camp Withycombe and that was conveyed by the United States to the State of Oregon by a quitclaim deed dated November 9, 1956.

(b) CONSIDERATION.—(1) The release referred to in subsection (a) may be made only if the State of Oregon conveys to the United States, without consideration, a contingent interest (described in paragraph (2)) in approximately 166 acres of land (including improvements thereon) comprising Camp Rilea, Clatsop County, Oregon.

(2) The contingent interest referred to in paragraph (1) is an interest that provides that—

(A) in the event that Camp Rilea ceases to be used by the State of Oregon for military purposes, title to such property, including improvements thereon, shall immediately vest in the United States without payment of consideration and the United States shall have the immediate right to enter thereon; and

(B) in the event of a war declared by Congress or a national emergency declared by Congress or the President, and upon a determination by the Secretary of Defense that any of such property is needed for military purposes, the United States shall have the right, without payment of consideration, to enter the property and use the property or any part thereof, including any improvements thereon, for such period as the Secretary determines necessary, but in no event for any period that extends beyond 180 days after the end of such war or national emergency.

(c) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the parcels of land from which the reversionary interest referred to in subsection (a) is to be re-

leased, and the exact acreage and legal description of the property in which the contingent interest is to be conveyed to the United States under subsection (b), shall be determined by surveys satisfactory to the Secretary of the Army. The cost of such surveys shall be borne by the State of Oregon.

(d) ADDITIONAL TERMS AND CONDITIONS.—The Secretary of the Army may require such additional terms and conditions in connection with the release of the reversionary interest under subsection (a) and the conveyance of the contingent interest under subsection (b) as the Secretary determines appropriate to protect the interests of the United States.

SEC. 2832. CONVEYANCE OF FORT DOUGLAS, UTAH, TO THE UNIVERSITY OF UTAH

(a) CONVEYANCE.—(1) Except as provided in paragraphs (2), (3), and (4), and subject to subsections (c) and (g), the Secretary of the Army shall convey to the University of Utah all right, title, and interest of the United States in and to the land comprising Fort Douglas, Utah, together with improvements thereon.

(2) The Secretary shall except from the land conveyed under paragraph (1) such land, not in excess of 64 acres, and improvements thereon as may be necessary for the Army to continue conducting Army Reserve activities at the Fort Douglas location.

(3) The Secretary shall also except from the land conveyed under paragraph (1) the land at Fort Douglas constituting the Fort Douglas Post Cemetery, consisting of approximately four acres.

(4) In connection with the land retained for Army Reserve activities and the land constituting the Army Post Cemetery, the Secretary shall reserve to the United States in the land conveyed such rights-of-way and other easements as may be necessary for ingress to and egress from the land retained.

(b) CONSIDERATION.—(1) The conveyance under subsection (a) shall be made only on the condition that the State of Utah and the University of Utah waive any entitlements that have not been exercised on behalf of the University of Utah before the date of the enactment of this section and that may be due to the State of Utah or the University of Utah on behalf of the University of Utah under—

(A) section 3 of the Act entitled "An Act to establish the office of Surveyor-General of Utah, and to grant Land for School and University Purposes", approved February 21, 1855 (10 Stat. 611); and

(B) sections 8 and 12 of the Act entitled "An Act to enable the people of Utah to form a constitution and State government, and to be admitted into the Union on equal footing with the original States", approved July 16, 1894 (28 Stat. 110).

(2) The waiver referred to in paragraph (1) shall be executed in such manner as the Secretary of the Army, after consultation with the Attorney General of the United States, determines necessary to effectively waive any unexercised entitlements under those laws.

(c) CONDITION.—(1) The conveyance provided for in subsection (a) may be made only on condition that—

(A) the State of Utah agree to maintain and operate, as provided in paragraph (2), the Army museum located on the land conveyed to the University of Utah pursuant to this section; and

(B) the University of Utah agree—

(i) to maintain and operate, as provided in paragraph (2), the Army chapel and other historical buildings located on the land referred to in subparagraph (A); and

(ii) to preserve and maintain, as provided in paragraph (2), the parade grounds that are a part of the land referred to in subparagraph (A).

(2) The Army museum, Army chapel, and other historical buildings referred to in paragraph (1) shall be maintained and operated, and the parade grounds referred to in that paragraph shall be preserved and maintained, in a manner consistent with Federal laws and regulations pertaining to the preservation of historical sites, buildings, and monuments, as specified by the Secretary of the Interior.

(d) REVERSIONARY RIGHT.—If the University of Utah uses the land conveyed pursuant to subsection (a) for other than educational or research purposes, all right, title, and interest in and to such land shall automatically revert to the United States and the United States shall have the right of immediate entry thereon.

(e) DEADLINE FOR CONVEYANCE.—The conveyance under subsection (a) shall be made not later than one year after the date of the enactment of this section.

(f) JOINT USE OF UTILITY SYSTEMS.—The Secretary may enter into an agreement with the University of Utah under which the Army and the University would—

(1) jointly use the existing utility systems located at Fort Douglas at the time of the conveyance provided for under subsection (a);

(2) equitably share the cost of maintaining, operating, and replacing (as necessary) the systems; and

(3) pay on a pro rata basis for the utilities consumed by each of the parties.

(g) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance provided for under subsection (a) as the Secretary considers necessary to protect the interests of the United States.

(h) ADDITIONAL EXCESS LAND.—In the event that any lands constituting Fort Douglas, Utah, that are not conveyed pursuant to subsection (a) are declared excess to the needs of the Army after the date of the conveyance provided for in that subsection, the Secretary shall convey such lands to the University of Utah. Any lands conveyed pursuant to this subsection shall be conveyed subject to a reversionary clause in favor of the United States as provided in subsection (d).

SEC. 2833. LAND CONVEYANCE, NAVAL RESERVE CENTER, BURLINGTON, VERMONT

(a) IN GENERAL.—Subject to subsection (b) through (e), the Secretary of the Navy may convey to the City of Burlington, Vermont, all right, title and interest of the United States in and to a parcel of real property consisting of approximately 1.49 acres, including improvements thereon, comprising the Naval Reserve Center, Burlington, Vermont.

(b) USE OF PROCEEDS.—The Secretary may use the proceeds of the transaction authorized by this section to pay all or part of the cost of acquiring a new site in the Burlington, Vermont, area for a naval reserve center and for the construction on such site of a replacement naval reserve center facility.

(c) CONDITIONS OF SALE.—(1) The conveyance authorized by subsection (a) shall be subject to the condition that the City of Burlington—

(A) pay to the United States the sum of $1,500,000; and

(B) permit the Navy to continue to occupy, without consideration, the property referred to in such subsection until a replacement facility has been acquired by the Secretary.

(2) In the event that the conveyance authorized by subsection (a) is not made before January 1, 1992, because the City is unable to pay the consideration required by subsection (b)(1), the authority to convey is terminated.

(d) DESCRIPTION OF PROPERTY.—The exact acreage and legal description of the property to be conveyed under this section shall be determined by a survey satisfactory to the Secretary. The cost of such survey shall be borne by the City.

(e) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance under this section as the Secretary considers appropriate to protect the interests of the United States.

SEC. 2834. LAND CONVEYANCE, FORT A.P. HILL MILITARY RESERVATION, VIRGINIA

(a) CONVEYANCE AUTHORIZED.—Subject to subsections (b) through (e), the Secretary of the Army shall convey, without consideration, to the Commonwealth of Virginia all right, title, and interest of the United States in and to a parcel of land located at Fort A.P. Hill, Virginia, consisting of approximately 150 acres.

(b) USE OF PROPERTY; REVERSION.—(1) The land conveyed pursuant to this section shall be conveyed subject to the conditions that—

(A) the construction of a regional correctional facility on the land be completed not later than five years after the date of the enactment of this section;

(B) the land be used only for the purpose of operating a regional correctional facility; and

(C) the Commonwealth of Virginia offer to Arlington County, Fairfax County, the City of Alexandria, Loudoun County, Fauquier County, Prince William County, Stafford County and Caroline County, Virginia, and any other Virginia county that the Commonwealth of Virginia may choose, the opportunity to participate in the governmental entity created under the law of the Commonwealth of Virginia to construct and operate the regional correctional facility.

(2) If a regional correctional facility is not constructed on the land conveyed pursuant to this section in accordance with paragraph (1)(A), such land is used for any purpose other than the purpose specified in paragraph (1)(B), or the counties referred to in paragraph (1)(C) are not offered the opportunity to participate in the entity referred to in such paragraph (as determined by the Secretary), all right, title and interest in and to such land (together with the improvements thereon) shall revert to the United States and the United States shall have the right of immediate entry thereon.

(c) DESCRIPTION OF PROPERTY.—(1) The tract of land conveyed pursuant to this section shall be a tract of land that—

(A) has soil and topographical conditions suitable for the construction of a low- to mid-rise institutional correctional facility, including recreation, parking, and other necessary support facilities; and

(B) is situated within reasonably close proximity to an existing sewer system.

(2) The exact acreage and legal description of the land to be conveyed pursuant to this section shall be determined by a survey satisfactory to the Secretary.

(d) PROHIBITION ON HOUSING CERTAIN PRISONERS.—The regional correctional facility constructed pursuant to this section may not be used to house Federal prisoners or prisoners convicted and sentenced in the courts of the District of Columbia without the written consent of the government of the county in which such facility is located.

(e) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the conveyance pursuant to this section as the Secretary determines appropriate to protect the interests of the United States.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

PART A—NATIONAL SECURITY PROGRAMS AUTHORIZATIONS

SEC. 3101. OPERATING EXPENSES

Funds are authorized to be appropriated to the Department of Energy for fiscal year 1991 for operating expenses incurred in carrying out national security programs (including scientific research and development in support of the Armed Forces, strategic and critical materials necessary for the common defense, and military applications of nuclear energy and related management and support activities) as follows:

(1) For weapons activities, $3,750,512,000, to be allocated as follows:

(A) For research and development, $1,042,775,000.

(B) For weapons testing, $481,711,000.

(C) For production and surveillance, $2,131,311,000.

(D) For program direction, $104,715,000.

(2) For defense nuclear materials production, $1,897,770,000, to be allocated as follows:

(A) For production reactor operations, $811,457,000.

(B) For processing of defense nuclear materials, including naval reactors fuel, $628,969,000, of which $66,500,000 shall be used for special isotope separation.

(C) For supporting services, $292,043,000.

(D) For uranium enrichment for naval reactors, $112,801,000.

(E) For program direction, $42,500,000.

(3) For environmental restoration and management of defense waste and transportation, $2,421,181,000, to be allocated as follows:

(A) For environmental restoration, $811,215,000.

(B) For corrective activities, $23,346,000. Such funds may also be used for plant and capital equipment.

(C) For waste management, $1,301,599,000. Such funds may also be used for plant and capital equipment.

(D) For technology development, and transportation management, $238,140,000. Such funds may also be used for plant and capital equipment.

(E) For program direction, $25,495,000.

(F) For landlord program direction, $21,386,000. Such funds may also be used for plant and capital equipment.

(4) For verification and control technology, $194,684,000.

(5) For nuclear materials safeguards and security technology development program, $83,434,000.

(6) For security investigations, $65,000,000.

(7) For new production reactors, $134,900,000.

(8) For naval reactors development, $569,200,000.

SEC. 3102. PLANT AND CAPITAL EQUIPMENT

Funds are authorized to be appropriated to the Department of Energy for fiscal year 1991 for plant and capital equipment (including maintenance, restoration, planning, construction, acquisition, modification of facilities, and the continuation of projects authorized in prior years, land acquisition related thereto, and acquisition and fabrication of capital equipment not related to construction) necessary for national security programs as follows:

(1) For weapons activities:

Project GPD-101, general plant projects, various locations, $27,100,000.

Project GPD-121, general plant projects, various locations, $36,350,000.

Project 91-D-122, Short Range Attack Missile Tactical (SRAM-T) production facilities, various locations, $15,000,000.

Project 91-D-123, production assurance, transformer replacement, Kansas City Plant, Kansas City, Missouri, $2,600,000.

Project 91-D-124, safeguards and security upgrades, Phase III, Mound Facility, Miamisburg, Ohio, $1,100,000.

Project 91-D-126, Health Physics Calibration Facility (HPCF), Mound Plant, Miamisburg, Ohio, $1,000,000.

Project 91-D-127, criticality alarm and production annunciation utility replacement, Rocky Flats Plant, Golden, Colorado, $6,600,000.

Project 90-D-102, Nuclear Weapons research, development, and testing facilities revitalization, Phase III, various locations, $9,600,000.

Project 90-D-126, environmental, safety, and health enhancements, various locations, $8,500,000.

Project 89-D-126, environmental, safety, and health upgrade, Phase II, Mound Plant, Miamisburg, Ohio, $488,000.

Project 88-D-104, safeguards and security upgrade, Phase II, Los Alamos National Laboratory, Los Alamos, New Mexico, $1,000,000.

Project 88-D-105, special nuclear materials research and development laboratory replacement, Los Alamos National Laboratory, Los Alamos, New Mexico, $20,600,000.

Project 88-D-106, nuclear weapons research, development, and testing facilities revitalization, Phase II, various locations, $72,547,000.

Project 88-D-122, facilities capability assurance program, various locations, $106,806,000.

Project 88-D-123, security enhancements, Pantex Plant, Amarillo, Texas, $18,244,000.

Project 88-D-124, fire protection upgrade, various locations, $1,481,000.

Project 88-D-125, high explosive machining facility, Pantex Plant, Amarillo, Texas, $8,840,000.

Project 88-D-126, personnel radiological monitoring laboratories, various locations, $1,600,000.

Project 87-D-122, short-range attack missile II (SRAM II) warhead production facilities, various locations, $8,634,000.

Project 86-D-130, tritium loading facility replacement, Savannah River Plant, Aiken, South Carolina, $2,360,000.

Project 85-D-105, combined device assembly facility, Nevada Test Site, Nevada, $4,242,000.

(2) For materials production:

Project GPD-146, general plant projects, various locations, $36,944,000.

Project 91-D-143, increase 751-A electrical substation capacity, Phase I, Savannah River Site, South Carolina, $6,000,000.

Project 91-D-145, new whole body counter facility, Savannah River Site, South Carolina, $4,350,000.

Project 90-D-141, Idaho chemical processing plant fire protection, Idaho National Engineering Laboratory, Idaho, $6,000,000.

Project 90-D-143, plutonium finishing plant fire safety and loss limitation, Richland, Washington, $2,500,000.

Project 90-D-149, plantwide fire protection, Phase I, Savannah River, South Carolina, $49,100,000.

Project 90-D-150, reactor safety assurance, Phase I, Savannah River, South Carolina, $32,600,000.

Project 90-D-151, engineering center, Savannah River, South Carolina, $4,000,000.

Project 89-D-140, additional separations safeguards, Savannah River, South Carolina, $16,300,000.

Project 89-D-148, improved reactor confinement system, Savannah River, South Carolina, $12,800,000.

Project 88-D-153, additional reactor safeguards, Savannah River, South Carolina, $1,000,000.

Project 87-D-159, environmental, health, and safety improvements, Phases I, II, and III, Feed Materials Production Center, Fernald, Ohio, $14,133,000.

Project 86-D-149, productivity retention program, Phases I, II, III, and IV, various locations, $61,750,000.

Project 85-D-139, fuel processing restoration, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, $87,500,000.

Project 85-D-145, Fuel Production Facility, Savannah River Site, South Carolina, $8,481,000.

(3) For defense waste and environmental restoration:

Project 91-GPD-171, general plant projects, various locations, $50,133,000.

Project 91-D-173, hazardous low level waste processing tanks, Savannah River Site, South Carolina, $5,800,000.

Project 91-D-172, high level waste tank farm upgrade, Idaho Chemical Processing Plant INEL, Idaho, $13,000,000.

Project 91-D-171, waste receiving and processing facility, Module 1, Richland, Washington, $2,700,000.

Project 91-D-125, environmental, safety, and health upgrades, Phase III, Mound Facility, Miamisburg, Ohio, $284,000.

Project 90-D-103, environmental, safety, and health improvements, various locations, $4,200,000.

Project 90-D-125, steam plant ash disposal facilities, V-12 Plant, Oak Ridge, Tennessee, $6,000,000.

Project 90-D-171, laboratory ventilation and electrical system upgrade, Richland, Washington, $4,100,000.

Project 90-D-172, aging waste transfer line, Richland, Washington, $4,000,000.

Project 90-D-173, B-plant canyon crane replacement, Richland, Washington, $4,300,000.

Project 90-D-174, decontamination laundry facility, Richland, Washington, $9,900,000.

Project 90-D-176, Transuranic (TRU) waste facility, Savannah River, South Carolina, $15,300,000.

Project 90-D-177, RWMC Transgranic (TRG) waste treatment and storage facility, Idaho, $26,000,000.

Project 90-D-178, TSA retrieval containment building, Idaho, $11,100,000.

Project 89-D-172, Hanford environmental compliance, $42,460,000.

Project 89-D-126, environment, safety, and health upgrade, Phase II, Mound Plant, Miamisburg, Ohio, $1,723,000.

Project 89-D-142, reactor effluent cooling water thermal mitigation, Savannah River, South Carolina, $44,600,000.

Project 89-D-173, tank farm ventilation upgrade, Richland, Washington, $3,400,000.

Project 89-D-174, replacement high level waste evaporator, Savannah River, South Carolina, $11,330,000.

Project 89-D-175, hazardous waste/mixed waste disposal facility, Savannah River, South Carolina, $7,600,000.

Project 89-D-122, production waste storage facility, safety, and loss limitation, Richland, Washington, $5,500,000.

Project 89-D-141, M-area waste disposal, Savannah River, South Carolina, $7,500,000.

Project 88-D-102, sanitary waste waters systems consolidated, Los Alamos National Laboratory, New Mexico, $3,500,000.

Project 88-D-173, Hanford Waste Vitrification Plant (HWVP), Richland, Washington, $75,500,000.

Project 87-D-159, environmental, health, and safety improvements, Phases I, II, III, and IV, Feed Materials Production Center, Fernald, Ohio, $27,586,000.

Project 83-D-148, nonradioactive hazardous waste management, Savannah River, $5,000,000.

(4) For verification and control technology:

Project 91-D-192, foreign technology assessment center, Lawrence Livermore National Laboratory, Livermore, California, $2,592,000.

Project 90-D-186, center for national security and arms control, Sandia National Laboratories, Albuquerque, New Mexico, $10,000,000.

(5) For new production reactor:

Project 88-D-154, new production reactor capacity for facility engineering and design, various locations, $231,300,000.

(6) For naval reactors development:

Project GPN-101, general plant projects, various locations, $8,600,000.

Project 90-N-102, expended core facility dry cell project, Naval Reactors Facility, Idaho, $4,000,000.

Project 90-N-103, advanced test reactor off-gas treatment system, Idaho National Engineering Laboratory, Idaho, $1,800,000.

Project 90-N-104, facilities renovation, Knolls Atomic Power Laboratory, Niskayuna, New York, $7,900,000.

Project 89-N-102, heat transfer test facility, Knolls Atomic Power Laboratory, Niskayuna, New York, $3,600,000.

Project 88-N-102, expended core facility receiving station, Naval Reactors Facility, Idaho, $1,500,000.

(7) For safeguards and security construction:

Project GPD-186, general plant project, Central Training Academy, Albuquerque, New Mexico, $2,000,000.

(8) For site management construction:

Project 91-GPD-171, general plant projects, various locations, $13,556,000.

Project 91-D-170, INEL transportation complex, Idaho National Engineering Laboratory, Idaho, $870,000.

Project 91-D-175, 300 area electrical distribution conversion and safety improvements, Phase I, Richland, Washington, $900,000.

Project 90-D-175, landlord program safety compliance, Phase I, Richland, Washington, $10,870,000.

Project 89-D-171, INEL road renovation, Idaho National Engineering Laboratory, Idaho, $7,300,000.

(9) For capital equipment not related to construction:

(A) For weapons activities, $275,281,000, including $8,900,000 for the defense inertial confinement fusion program.

(B) For materials production, $105,622,000.

(C) For defense waste and environmental restoration, $119,917,000.

(D) For verification and control technology, $9,924,000.

(E) For nuclear safeguards and security, $5,066,000.

(F) For naval reactors development, $55,400,000.

(G) For new production reactors, $8,801,000.

SEC. 3103. FUNDING LIMITATIONS

(a) FERNALD LITIGATION SETTLEMENT.—Of the funds authorized to be appropriated to the Department of Energy for fiscal year 1991 for operating expenses, not more than $20,500,000 may be used to pay the second installment of the settlement entered into by the Department of Energy in the case of In re: Fernald Litigation No. C-1-85-149, United States District Court, for the Southern District of Ohio.

(b) INERTIAL CONFINEMENT FUSION.—Funds appropriated to the Department of Energy for fiscal year 1991 for atomic energy defense activities may not be reprogrammed during fiscal year 1991 under section 3121 if the reprogramming would reduce the amount made available for the Department of Energy for the defense inertial confinement fusion program for fiscal year 1991.

(c) SPECIAL ISOTOPE SEPARATION PROJECT.—The funds authorized for Special Isotope Separation shall be used for program phaseout only.

PART B—GENERAL PROVISIONS

SEC. 3121. REPROGRAMMING

(a) NOTICE TO CONGRESS.—(1) Except as otherwise provided in this title—

(A) no amount appropriated pursuant to this title may be used for any program in excess of the lesser of—

(i) 105 percent of the amount authorized for that program by this title; or

(ii) $10,000,000 more than the amount authorized for that program by this title; and

(B) no amount appropriated pursuant to this title may be used for any program which has not been presented to, or requested of, the Congress.

(2) An action described in paragraph (1) may be taken after a period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives of notice from the Secretary of Energy (hereafter in this title referred to as the "Secretary") containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

(b) LIMITATION ON AMOUNT OBLIGATED.—In no event may the total amount of funds obligated pursuant to this title exceed the total amount authorized to be appropriated by this title.

SEC. 3122. LIMITS ON GENERAL PLANT PROJECTS

(a) IN GENERAL.—The Secretary may carry out any construction project under the general plant projects provisions authorized by this title if the total estimated cost of the construction project does not exceed $1,200,000.

(b) REPORT TO CONGRESS.—If at any time during the construction of any general plant project authorized by this title, the estimated cost of the project is revised because of unforeseen cost variations and the revised cost of the project exceeds $1,200,000, the Secretary shall immediately furnish a complete report to the Committees on Armed Services and on the Committees on Appropriations of the Senate and House of Representatives explaining the reasons for the cost variation.

SEC. 3123. LIMITS ON CONSTRUCTION PROJECTS

(a) IN GENERAL.—(1) Except as provided in paragraph (2), construction on a construction project may not be started or additional obligations incurred in connection with the project above the total estimated cost, whenever the current estimated cost of the construction project, which is authorized by section 3102 of this title, or which is in support of national security programs of the Department of Energy and was authorized by any previous Act, exceeds by more than 25 percent the higher of—

(A) the amount authorized for the project; or

(B) the amount of the total estimated cost for the project as shown in the most recent budget justification data submitted to Congress.

(2) An action described in paragraph (1) may be taken after a period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives of notice from the Secretary of Energy containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

(b) EXCEPTION.—Subsection (a) shall not apply to any construction project which has a current estimated cost of less than $5,000,000.

SEC. 3124. FUND TRANSFER AUTHORITY

(a) IN GENERAL.—Funds appropriated pursuant to this title may be transferred to other agencies of the Government for the performance of the work for which the funds were appropriated, and funds so transferred may be merged with the appropriations of the agency to which the funds are transferred.

(b) INERTIAL CONFINEMENT FUSION PROGRAMS.—The Secretary of Defense may transfer to the Secretary of Energy, out of any funds appropriated to the Department of Defense pursuant to section 3201, not more than $12,000,000 for the inertial confinement fusion program. Funds so transferred shall be merged with funds appropriated to the Department of Energy national security programs for research and development.

SEC. 3125. AUTHORITY FOR CONSTRUCTION DESIGN

(a) IN GENERAL.—(1) Within the amounts authorized by this title for plant engineering and design, the Secretary may carry out advance planning and construction designs (including architectural and engineering services) in connection with any proposed construction project if the total estimated cost for such planning and design does not exceed $2,000,000.

(2) In any case in which the total estimated cost for such planning and design ex-

ceeds $300,000, the Secretary shall notify the Committees on Armed Services and the Committees on Appropriations of the Senate and House of Representatives in writing of the details of such project at least 30 days before any funds are obligated for design services for such project.

(b) SPECIFIC AUTHORITY REQUIRED.—In any case in which the total estimated cost for advance planning and construction design in connection with any construction project exceeds $2,000,000, funds for such design must be specifically authorized by law.

SEC. 3126. AUTHORITY FOR EMERGENCY CONSTRUCTION DESIGN

In addition to the advance planning and construction design authorized by section 3102, the Secretary may perform planning and design utilizing available funds for any Department of Energy defense activity construction project whenever the Secretary determines that the design must proceed expeditiously in order to meet the needs of national defense or to protect property or human life.

SEC. 3127. FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY

Subject to the provisions of appropriation Acts and section 3121, amounts appropriated pursuant to this title for management and support activities and for general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

SEC. 3128. AVAILABILITY OF FUNDS

When so specified in an appropriation Act, amounts appropriated for operating expenses or for plant and capital equipment may remain available until expended.

SEC. 3129. REMANUFACTURE OF NUCLEAR STOCKPILE WEAPONS

(a) REPORT ON REMANUFACTURE OF NUCLEAR STOCKPILE WEAPONS.—The Secretary of Energy, in consultation with the Secretary of Defense, shall prepare a report on remanufacture of nuclear stockpile weapons as specifically directed by Senate Report No. 101-81 of the One Hundred and First Congress at pages 263 and 264.

(b) SUBMISSION OF REPORT.—The Secretary of Energy shall submit the report in classified and unclassified versions not later than February 1, 1991.

SEC. 3130. LABORATORY-DIRECTED RESEARCH AND DEVELOPMENT PROGRAMS

(a) AUTHORITY FOR GOCO LABORATORIES TO ENGAGE IN PROGRAMS.—The Secretary of Energy shall prescribe regulations authorizing the government-owned contractor operated laboratories that are funded by the Department of Energy national security programs to engage in independent laboratory-directed research and development programs.

(b) FUNDING.—Of the funds provided by the Department of Energy to such laboratories for national security activities, the Secretary shall provide a specific amount, not to exceed 6 percent of such funds, to be used by such laboratories for such research and development programs.

SEC. 3130A. INERTIAL CONFINEMENT FUSION PROGRAM

Of the funds authorized to be appropriated pursuant to section 3101(1)(A) $167,900,000 shall be made available for the purpose of Inertial Confinement Fusion.

SEC. 3130B. DEPARTMENT OF ENERGY SCIENCE AND EDUCATION PROGRAMS

(a) SHORT TITLE.—This section may be cited as the "Department of Energy Science and Education Enhancement Act".

(b) FINDINGS.—The Congress finds that—

(1) scientific, technical, and engineering competence is essential to the Nation's future well-being;

(2) the scientific, technical, and engineering capability at the Federal laboratories is unmatched throughout the world;

(3) superb research, development, testing, and evaluation occurs in Department laboratories;

(4) Department laboratories will play an increasing role in assuring that America remains competitive in world markets;

(5) improvements in mathematics, science, and engineering education are needed desperately to provide the trained and educated citizenry essential to the future competitiveness of the United States;

(6) greater effort and funding must be devoted to technology transfer from Department laboratories;

(7) the ability of the Nation to fight disease and overcome human suffering can be greatly enhanced by fully utilizing the health research resources of the Department; and

(8) Department laboratories are in a unique position to take on increased responsibilities in the interest of improving our Nation's competitiveness and our quality of life.

(c) DEFINITIONS.—For the purposes of this section—

(1) the term "Secretary" means the Secretary of Energy; and

(2) the term "Department" means the Department of Energy.

(d) MISSION.—Section 91(a) of the Atomic Energy Act of 1954 (42 U.S.C. 2121(a)) is amended by adding at the end the following new paragraph:

"(6) use the facilities, equipment, personnel, and other resources of the Department of Energy to the fullest extent possible to enhance educational opportunities in science, mathematics, and engineering for American students and educators so as to improve the scientific literacy and competitiveness of the Nation.".

(e) SCIENCE AND EDUCATION PROGRAMS.—

(1) IN GENERAL.—(A) To the extent appropriate, the Secretary may establish programs, to be operated at or through the support of each Department facility, that will use fully the unique scientific resources of the Department to promote—

(i) transfers of federally owned or originated technology to State and local governments, private industry, and universities or other nonprofit organizations so that the prospects for commercialization of such technology are enhanced;

(ii) activities enhancing the quality of mathematics, science, and engineering education throughout the Nation, so as to improve the scientific and technical capability and literacy of the Nation and improve the Nation's overall educational capability; and

(iii) research, development, and other activities intended to enhance the health and quality of life of the Nation, particularly in areas that pertain to environmental improvement and biomedical research.

(B) The programs described in paragraph (1) shall supplement and be coordinated with current activities of the Department, but shall not supplant them.

(2)(A) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise made available to the Department of Energy for fiscal year 1991, an amount up to the amount described in subparagraph (B) may be made available to a Department of Energy laboratory for the purposes of paragraph (1).

(B) The amount referred to in subparagraph (A) is 10 percent of the amount made available to such laboratory by the Department of Energy in fiscal year 1990.

(f) TECHNOLOGY DEVELOPMENT PROGRAM.—

(1) ESTABLISHMENT OF PROGRAM.—(A) The Secretary shall establish a program to develop Department-originated technologies, directed at the stage of technology development beyond the basic research stage.

(B) The program established pursuant to paragraph (A) shall develop technologies, determined by the Secretary to have significant promise for commercial and public benefit to the Nation, to a point where private industry will undertake further scientific and commercial development.

(C)(i) The program established pursuant to paragraph (1) may be conducted at any Department facility and shall enhance the commercial development and transfer to private industry of Department-originated technologies, consistent with the technology transfer mission of the Department.

(ii) As a condition for supporting specific projects, the Secretary may require a private sector commitment to future, wholly non-Federal funding of commercial development of particular technologies.

(iii) Establishment of the program described in paragraph (1) shall not preclude the Department or its facilities from continuing operation or support of other programs to advance technology development, but all of the technology development programs of the Department shall be coordinated.

(2) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

(g) LABORATORY COOPERATIVE SCIENCE CENTERS.—

(1) IN GENERAL.—The Secretary of Energy may establish Laboratory Cooperative Science Centers (referred to as the "Centers") at national laboratories operating under the authority of the Department of Energy.

(2) FUNCTION.—The Centers shall coordinate both laboratory based and offsite programs designed to advance the purposes of this section.

(3) ACTIVITIES.—The activities of the Centers shall include—

(A) supporting semester-length research appointments for college and university science and engineering students, and faculty/student teams, at the Centers;

(B) supporting research appointments for high school science teachers at the Centers;

(C) supporting research apprenticeship appointments at the Centers for students underrepresented in science and technology careers;

(D) supporting research experience programs at the Centers for nationally selected high school honor students;

(E) supporting cost-shared projects to encourage more students to pursue careers in precollege science and mathematics teaching;

(F) participating in collaborative projects with other Federal agencies and the private sector to further the objectives of this section;

(G) operating precollege mathematics and science education programs at the national laboratories;

(H) establishing a museum-based science education program;

(I) establishing collaborative inner-city and rural partnership programs designed to meet the special mathematics and science

education needs of students in inner-city and rural areas; and

(J) engaging in other activities to advance the purposes of this section.

(2) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

(h) UNIVERSITY-BASED PROGRAMS.—

(1) IN GENERAL.—The Secretary may coordinate and sponsor university-based programs directed at encouraging more students to pursue energy-related scientific and technical careers, with a particular focus on the recruitment of women and minority students.

(2) PREFRESHMAN ENGINEERING PROGRAM.—The programs referred to in paragraph (1) shall include a prefreshman engineering program in which middle-school students attend summer workshops on mathematics, science, and engineering conducted by universities on their campuses.

(3) AVAILABILITY OF FUNDS.—Of the funds appropriated or otherwise available to the Department of Energy for fiscal year 1991, not more than $20,000,000 may be obligated for the purposes of the program established pursuant to paragraph (1).

PART C—ENVIRONMENT, SAFETY, AND MANAGEMENT

SEC. 3131. AUTHORITY TO LOAN PERSONNEL AND FACILITIES TO COMMUNITY DEVELOPMENT ORGANIZATIONS NEAR HANFORD RESERVATION

Section 1434(c) of the National Defense Authorization Act, Fiscal Year 1989 (Public Law 100-456; 102 Stat. 2074), is amended by striking out "1990" and inserting in lieu thereof "1992".

SEC. 3132. NATIONAL ENVIRONMENTAL POLICY ACT COMPLIANCE REPORT REQUIREMENT

(a) ENVIRONMENTAL REPORT.—Not later than 30 days after the end of each quarter of fiscal years 1991 and 1992, the Secretary of Energy shall submit to the Committees on Armed Services of the Senate and the House of Representatives a brief report on the actions of the Department of Energy with respect to compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.). The report shall contain a brief description of the proposed actions to be taken by the Department of Energy, the environmental impact of which is not clearly insignificant, and a description of the actions taken or proposed to be taken by the Department of Energy to assess the environmental impact of the proposed action. If the Secretary finds that the proposed action of the Department of Energy will have no significant impact, the Secretary shall include the rationale for that determination.

(b) SUBMISSION OF INITIAL REPORT.—The Secretary shall submit the first report not later than February 1, 1991, for the quarter ending December 31, 1990.

SEC. 3133. SITE MANAGEMENT

The Secretary of Energy may not transfer to any other department or agency of the Federal Government the authority of the Secretary with respect to site management, control, or oversight of environmental remediation and restoration activities at any Department of Energy facility. The preceding sentence does not prohibit or limit the authority of the Secretary to contract for management and operation services in connection with environmental remediation and restoration activities of the Department of Energy.

SEC. 3134. REIMBURSEMENT OF EPA OVERSIGHT EXPENSES

(a) To the extent provided for in interagency agreements entered into between the Department of Energy and the Environmental Protection Agency, the Secretary of Energy shall reimburse the Environmental Protection Agency for costs necessary to ensure oversight by that agency of environmental response actions at Department of Energy facilities conducted pursuant to section 120 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. 9620).

(b) In addition, notwithstanding other provisions of law, the Environmental Protection Agency shall be provided with the reimbursable authority and full time equivalent ceiling to carry out such oversight activities. The funded full-time work years shall only be used to carry out oversight activities at Department of Energy facilities where interagency agreements have been entered into between the Environmental Protection Agency and the Department of Energy.

SEC. 3135. FUNDING FOR REGISTERING, MONITORING, AND NOTIFYING PERSONS EXPOSED TO RADIONUCLIDES RELEASED FROM THE DEPARTMENT OF ENERGY HANFORD NUCLEAR RESERVATION, HANFORD, WASHINGTON

Of the funds authorized to be appropriated to the Department of Energy pursuant to this title, the Secretary of Energy shall make available to the State of Washington $3,000,000, and to the State of Oregon and the State of Idaho $1,000,000, each for the following purposes:

(1) To implement one or more programs to register and monitor those persons who may have been exposed to radionuclides released from the Department of Energy Hanford Nuclear Reservation, Hanford, Washington, between the years of 1944 and 1972.

(2) To develop procedures for notifying each such person of the potential adverse health effects of such exposure and of any recommended course of medical action regarding such adverse health effects.

PART D—INTERNATIONAL FISSILE MATERIAL AND WARHEAD CONTROL

SEC. 3141. PRODUCTION OF PLUTONIUM AND HIGHLY ENRICHED URANIUM FOR NUCLEAR WEAPONS AND DISPOSAL OF NUCLEAR STOCKPILES

(a) PRODUCTION BY THE SOVIET UNION.—Congress urges the President and the Supreme Soviet of the Soviet Union—

(1) to cease production by the Soviet Union of plutonium;

(2) to maintain the cessation in production by the Soviet Union of highly-enriched uranium for weapons that was announced on April 7, 1989.

(b) TECHNICAL ASPECTS OF FISSILE MATERIAL MONITORING AND NUCLEAR WARHEAD DISMANTLEMENT.—Should the President determine that future international agreements should provide for dismantlement of nuclear warheads and a ban on further production of fissile materials for weapons, then the Congress urges the President to seek to establish with the Soviet Union a joint technical working group to examine and demonstrate cooperative technical monitoring and inspection arrangements that could be applied to the design and verification of these potential provisions.

(c) REPORT ON VERIFICATION TECHNIQUES.—(1) The Secretary of Energy in consultation with the Secretary of Defense, and in coordination with the Director of Central Intelligence, shall prepare a comprehensive technical report on the verification matters described in paragraph (2) of this subsection.

(2) The report shall describe the on-site monitoring techniques, inspection arrangements, and national technical means that could be used by the United States to verify the actions of other nations with respect to the following:

(A) dismantlement of nuclear warheads in the event that a future agreement between the United States and the Soviet Union should provide for such dismantlement to be carried out in a mutually verifiable manner;

(B) a mutual United States-Soviet ban, leading to a multilateral, global ban on the production of additional quantities of plutonium and highly-enriched uranium for nuclear weapons;

(C) the end use or ultimate disposal of any plutonium and highly enriched uranium recovered from the dismantlement of nuclear warheads.

(3) In order to prepare the report required by paragraph (1) of this subsection, the Secretary of Energy, in coordination with the Director of Central Intelligence, shall establish a Technical Advisory Committee on Verification of Fissile Material and Nuclear Warhead Controls, composed of preeminent government and nongovernment experts in the fields of radiation detection, nondestructive examination, nuclear safeguards, nuclear materials production, and nuclear warhead dismantlement. This committee, which shall be established not later than December 31, 1990, shall advise the Secretaries of Energy and Defense and Director of Central Intelligence on the availability, utilization, and further development of techniques which could be applied to the verification of the prospective actions described in paragraph (2) of this subsection.

(4) The report required by paragraph (1) shall be submitted to Congress not later than April 30, 1991. The report shall be submitted in unclassified form, with such classified appendices as may be necessary.

SEC. 3142. DEVELOPMENT AND DEMONSTRATION OF MEANS FOR WARHEAD DISMANTLEMENT VERIFICATION

The Secretary of Energy may use funds available to the Secretary for national security programs of the Department of Energy for fiscal year 1991 to carry out a program to develop and demonstrate a means for verifiable dismantlement of nuclear warheads.

TITLE XXXII—DEFENSE NUCLEAR FACILITIES SAFETY BOARD AUTHORIZATION

SEC. 3201. AUTHORIZATION

There are authorized to be appropriated $12,500,000 for fiscal year 1991 for the operation of the Defense Nuclear Facilities Safety Board, established under chapter 21 of the Atomic Energy Act of 1954 (42 U.S.C. 2286 et seq.).

SEC. 3202. AUTHORITY TO HIRE

Clause (1) of section 313(b) of the Atomic Energy Act of 1954 (42 U.S.C. 2286b(b)(1)), is amended by inserting ", subject to the provisions of section 161(d)" before the semicolon.

TITLE XXXIII—CIVIL DEFENSE

SEC. 3301. AUTHORIZATION OF APPROPRIATIONS

There is hereby authorized to be appropriated $144,117,000 for fiscal year 1991 for the purpose of carrying out the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2251 et seq.).

TITLE XXXIV—PANAMA CANAL COMMISSION

SEC. 3401. SHORT TITLE

This title may be referred to as the "Panama Canal Commission Authorization Act for Fiscal Year 1991".

SEC. 3402. AUTHORIZATION OF EXPENDITURES

(a) IN GENERAL.—The Panama Canal Commission is authorized to make such expenditures within the limits of funds and borrowing authority available to it in accordance with law, and to make such contracts and commitments, without regard to fiscal year limitations, as may be necessary under the Panama Canal Act of 1979 (22 U.S.C. 3601 et seq.), for the operation, maintenance, and improvement of the Panama Canal for fiscal year 1991, except that not more than $52,000 for such fiscal year may be made available for official reception and representation expenses, of which—

(1) not more than $12,000 may be made available for such expenses of the supervisory board of the Commission;

(2) not more than $6,000 may be made available for such expenses of the Secretary of the Commission; and

(3) not more than $34,000 may be made available for such expenses of the Administrator of the Commission.

(b) PURCHASE OF PASSENGER MOTOR VEHICLES.—Funds available to the Panama Canal Commission for fiscal year 1991 shall be available for the purchase of passenger motor vehicles (including large heavy-duty vehicles) used to transport personnel of the Commission across the Isthmus of Panama. Such vehicles may be purchased without regard to price limitations prescribed by law or regulation.

SEC. 3403. GENERAL PROVISIONS

(a) PAY INCREASES.—Funds for the Panama Canal Commission may be obligated for fiscal year 1991, notwithstanding section 1341 of title 31, United States Code, to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law which are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the United States in comparable positions.

(b) EXPENSES IN ACCORDANCE WITH LAW.—Expenditures authorized under this title may be made only in accordance with the Panama Canal Treaties of 1977 and any law of the United States implementing those treaties.

SEC. 3404. COMPENSATION FOR BOARD MEMBERS

Section 1102(b) of the Panama Canal Act of 1979 (22 U.S.C. 3612(b)) is amended by striking out "grade GS-18 of the General Schedule under section 5332" in the last sentence and inserting in lieu thereof "level V of the Executive Schedule under section 5316".

SEC. 3405. COMPENSATION FOR DEPUTY ADMINISTRATOR AND CHIEF ENGINEERS

Section 1104(b) of the Panama Canal Act of 1979 (22 U.S.C. 3614(b)) is amended by inserting before the period ", and, if eligible, the overseas recruitment or retention differential provided for in section 1217 of this Act".

SEC. 3406. RETIREMENT

(a) ELIGIBILITY.—Section 8336(i) of title 5, United States Code, is amended—

(1) by redesignating paragraph (3) as paragraph (4);

(2) by inserting after paragraph (2) the following new paragraph:

"(3) An employee of the Panama Canal Commission employed by that body after September 30, 1979 who is separated from the Panama Canal Commission before January 1, 2000, and who at the time of separation has a minimum of 11 years of continuous employment with the Commission (disregarding any break in service of 3 days or less) is entitled to an annuity if the employee is separated—

"(A) involuntarily, after completing 20 years of service or after becoming 48 years of age and completing 18 years of service if the separation is the result of the implementation of any provision of the Panama Canal Treaty of 1977 and related agreements; or

"(B) voluntarily, after completing 23 years of service or after becoming 48 years of age and completing 18 years of service."; and

(3) in paragraph (2)—

(A) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;

(B) by inserting "(A)" after "(2)"; and

(C) by adding at the end the following new subparagraph:

"(B) The annuity of an employee retiring under paragraph (3) of this subsection with respect to the period of Panama Canal service is 2½ percent of the employee's average pay multiplied by the years of that service.".

SEC. 3407. AMENDMENTS TO PANAMA CANAL COMPENSATION FUND ACT OF 1988

Section 5 of the Panama Canal Commission Compensation Fund Act of 1988 (22 U.S.C. 3715c) is amended—

(1) by striking out "Upon the termination of the Panama Canal Commission:";

(2) in subsection (a)—

(A) by striking out "The Secretary of Labor" and inserting in lieu thereof "Upon the termination of the Panama Canal Commission, the Secretary of Labor"; and

(B) by striking out the last sentence;

(3) in subsection (b)—

(A) by inserting "under subsection (a)" after "Secretary of Labor"; and

(B) by striking out "Employees Compensation"; and

(4) by adding at the end the following new subsection:

"(c) CONTINUITY OF THE FUND.—(1) Amounts in the fund (including amounts transferred as a result of the final determination made under subsection (a)) shall be maintained by the Secretary of the Treasury, shall be made available for transfer to the Employees' Compensation Fund in such amounts as are requested by the Secretary of Labor pursuant to section 4, and may be discontinued only in accordance with paragraph (2).

"(2) At such time as the Secretary of Labor certifies that no further liability exists for workers compensation benefits or other payments described in section 3(a), the Secretary of the Treasury may discontinue the Fund in the manner provided by law.".

DIVISION D—NATIONAL ENERGY SECURITY

TITLE XLI—NATIONAL ENERGY SECURITY

SEC. 4101. SHORT TITLE

This title may be cited as the "National Energy Security Act of 1990".

SEC. 4102. FINDINGS AND PURPOSES

(a) FINDINGS.—The Congress finds that—

(1) the United States is the leader of the free world and has world wide responsibilities to promote economic and political security;

(2) the exercise of traditional responsibilities here and abroad in foreign policy requires that the United States be free of the risk of energy blackmail in times of shortages;

(3) the level of the United States oil security is directly related to the level of domestic production of oil, natural gas liquids, and natural gas;

(4) the ability of the United States to exercise its free will and to carry out its responsibilities as leader of the free world could be jeopardized by an excessive dependence on foreign oil imports;

(5) increasing dependence on foreign oil imports has and continues to impose severe risks to the lives of United States service men and women and unacceptable costs to the national defense; and

(6) an emergency national energy security plan should be developed and implemented to ensure that adequate supplies of energy shall be available at all times free of the threat of embargo or other foreign hostile acts.

(b) PURPOSE.—The purpose of this title is to establish an emergency national energy security plan designed to reduce United States dependence on foreign oil supplies to a level which does not pose an unacceptable threat to the national security.

SEC. 4103. DUTIES OF THE PRESIDENT

(a) ESTABLISHMENT OF CEILING.—There is established a national oil import ceiling (referred to in this title as the "ceiling level") of foreign crude and oil product imports at 50 percent of United States consumption.

(b) REPORT.—(1) The President shall prepare and submit an annual report to Congress containing a national oil security projection which shall contain a forecast of domestic oil and natural gas liquid demand and production, and imports of crude and oil product for the subsequent year. The report shall indicate the likelihood of foreign crude and oil product imports exceeding the ceiling level during the next year and the actions which the President will take to maintain crude and oil product imports below the ceiling level.

(2) At the time of the budget transmitted under section 1105(a) of title 31, United States Code, by the President to the Congress, the projection prepared pursuant to paragraph (1) shall be presented to Congress with a description of the actions which the President would take under section 4104.

SEC. 4104. NATIONAL ENERGY PRODUCTION AND SECURITY ACTION PLAN

(a) ESTABLISHMENT OF ACTION PLAN.—The President shall at all times monitor the level of foreign crude and oil product imports as a share of United States oil consumption. Upon a finding that the ceiling level has been exceeded for any six months within any continuous twelve month period, the President shall within 30 days submit an Energy Production and Security Action Plan (referred to in this title as the "Action Plan") to the Speaker of the House of Representatives and the President of the Senate. The Action Plan shall indicate specific actions to be taken to reduce crude and product imports below the ceiling level. Notwithstanding any other provision of law, the Action Plan shall be immediately implemented by the President upon enactment of a joint resolution by the Congress approving the Action Plan.

(b) ACTION PLAN.—The Energy Production and Security Action Plan shall include but not be limited to—

(1) a certification by the President that the ceiling level has been exceeded;

(2) a list of Federal land tracts, offshore and onshore, in order of their potential for oil and gas discovery, including any Federal land outside units of the National Park System, currently off-limits to oil and gas leasing;

(3) a schedule for leasing the tracts identified in subparagraph (B) in order of their potential for oil and gas discovery, including number of tracts to be leased and the timing for individual lease sales;

(4) energy conservation actions including improved fuel efficiency for automobiles and the development and utilization of alternative transportation fuels; and

(5) production incentives for domestic oil and gas including recommendations on the imposition of oil import fees, royalty reductions, tax and other incentives for stripper well production and the production of offshore, frontier, and other oil produced with tertiary recovery techniques.

Passed the Senate August 4, 1990.

Mr. NUNN. Mr. President, I move to reconsider the vote.

Mr. WARNER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NUNN. Mr. President, I send to the desk an amendment to the title, which is a technical amendment, and ask for its immediate consideration.

The title was amended so as to read:

Amend the title so as to read: "To authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes."

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The text of the National Defense Authorization Act for Fiscal Year 1991, as passed by the Senate on August 4, 1990, is contained in the following Senate bills:

S. 2884, The National Defense Authorization Act for Fiscal Year 1991 (the complete bill).

S. 2905, The National Defense Authorization Act for Fiscal Year 1991 (the complete bill).

S. 2906, The National Defense Authorization Act, Fiscal Year 1991 (the complete bill).

S. 2907, The National Guard and Reserve Initiative Act of 1990 (title XIV, Guard and Reserve Initiative).

S. 2908, The Military Personnel Transition Assistance Act of 1990 (sec. 621 and part E of title VI).

S. 2909, The Nuclear Risk Reduction Act of 1990 (sec. 1213).

S. 2910, The Department of Defense Drug Interdiction and Counter-Drug Authorization Act for Fiscal Year 1991 (title XI).

S. 2911, The Department of Defense and Related National Security Programs Authorization Act for Fiscal Year 1991 (the complete bill).

S. 2912, The Department of Defense Authorization Act for Fiscal Year 1991 (Division A [DoD Authorizations]).

S. 2913, The Military Construction Authorization Act for Fiscal Year 1991 (Division B [Military construction]).

S. 2914, The National Defense Programs Authorization Act for Fiscal Year 1991 (Division C [DoE, Safety Board, Civil Defense, Panama]).

S. 2915, The Strategic Environmental Research Program Act of 1990 (Title X).

S. 2916, The Defense Acquisition Improvement Act of 1990 (title VIII).

ORDER TO PRINT S. 2884 AS PASSED

Mr. NUNN. Mr. President, I ask unanimous consent S. 2884, as amended, be printed as passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I ask unanimous consent that the Senate proceed immediately to the consideration en bloc of the following bills:

S. 2905, Calendar Order No. 721.
S. 2906, Calendar Order No. 722.
S. 2907, Calendar Order No. 723.
S. 2908, Calendar Order No. 724.
S. 2909, Calendar Order No. 725.
S. 2910, Calendar Order No. 726.
S. 2911, Calendar Order No. 727.
S. 2912, Calendar Order No. 728.
S. 2913, Calendar Order No. 729.
S. 2914, Calendar Order No. 730.
S. 2915, Calendar Order No. 731.
S. 2916, Calendar Order No. 732.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. I ask unanimous consent that those bills be passed en bloc; that if there are amendments thereto, they be agreed to; and if there are amendments to the preamble, they be agreed to; and the motion to reconsider en bloc be laid on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I ask unanimous consent that all after the enacting clause of each of these bills be stricken and that the appropriate portion S. 2884, as amended, be inserted in lieu thereof, according to the following schedule:

S. 2905, The National Defense Authorization Act for Fiscal Year 1991 (the complete bill).

S. 2906, The National Defense Authorization Act, Fiscal Year 1991 (the complete bill).

S. 2907, The National Guard and Reserve Initiative Act of 1990 (title XIV, Guard and Reserve Initiative).

S. 2908, The Military Personnel Transition Assistance Act of 1990 (sec. 621 and part E of title VI).

S. 2909, The Nuclear Risk Reduction Act of 1990 (sec. 1213).

S. 2910, The Department of Defense Drug Interdiction and Counter-Drug Authorization Act of Fiscal Year 1991 (title XI).

S. 2911, The Department of Defense and Related National Security Programs Authorization Act of Fiscal Year 1991 (the complete bill).

S. 2912, The Department of Defense Authorization Act for Fiscal Year 1991 (Division A [DoD Authorizations]).

S. 2913, The Military Construction Authorization Act for Fiscal Year 1991 (Division B [Military construction]).

S. 2914, The National Defense Programs Authorization Act for Fiscal Year 1991 (Division C [DoE, Safety Board, Civil Defense, Panama]).

S. 2915, The Strategic Environmental Research Program Act of 1990 (Title X).

S. 2916, The Defense Acquisition Improvement Act of 1990 (Title VIII).

The PRESIDING OFFICER. Without objection, it is so ordered.

OMNIBUS NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The bill (S. 2905) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2905 as passed by the Senate today will be published in a future edition of the RECORD.)

NATIONAL DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1991

The bill (S. 2906) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2906 as passed by the Senate today will be published in a future edition of the RECORD.)

NATIONAL GUARD AND RESERVE INITIATIVE ACT

The bill (S. 2907) to provide for the utilization, force structure, and preservation of personnel of the Reserve components, for procurement for such components, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2907 as passed by the Senate today will be published in a future edition of the RECORD.)

MILITARY PERSONNEL TRANSITION ASSISTANCE ACT OF 1990

The bill (S. 2908) to provide transition assistance for military personnel involuntarily discharged or released from active duty, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2908 as passed by the Senate today will be published in a future edition of the RECORD.)

DEPARTMENT OF DEFENSE DRUG INTERDICTION AND COUNTER-DRUG AUTHORIZATION ACT FOR FISCAL YEAR 1991

The bill (S. 2910) to authorize appropriations for fiscal year 1991 drug interdiction and counterdrug activities of the Department of Defense, to allow the Department of Defense to provide additional support to State and local agencies for such activities, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2910 as passed by the Senate today will be published in a future edition of the RECORD.)

DEPARTMENT OF DEFENSE AND RELATED NATIONAL SECURITY PROGRAMS AUTHORIZATION ACT FOR FISCAL YEAR 1991

The bill (S. 2911) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense related activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2911 as passed by the Senate today will be published in a future edition of the RECORD.)

NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1991

The bill (S. 2912) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2912 as passed by the Senate today will be published in a future edition of the RECORD.)

MILITARY CONSTRUCTION AUTHORIZATION ACT FOR FISCAL YEAR 1991

The bill (S. 2913) to authorize certain construction at military installations for fiscal year 1991, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2913 as passed by the Senate today will be published in a future edition of the RECORD.)

NATIONAL DEFENSE PROGRAMS AUTHORIZATION ACT FOR FISCAL YEAR 1991

The bill (S. 2914) to authorize funds for the Department of Energy national security programs, the Defense Nuclear Facilities Safety Board, civil defense; to authorize expenditures by the Panama Canal Commission, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2914 as passed by the Senate today will be published in a future edition of the RECORD.)

STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM ACT OF 1990

The bill (S. 2915) to amend title 10, United States Code, to require the Secretary of Defense to establish a strategic environmental research program, was considered, ordered to be engrossed for the third reading, read the third time, and passed; as follows:

(The text of S. 2915 as passed by the Senate today will be published in a future edition of the RECORD.)

DEFENSE ACQUISITION IMPROVEMENT ACT OF 1990

The bill (S. 2916) to amend title 10, United States Code, to encourage the development and transfer of critical technologies and to improve acquisition activities of the Department of Defense, to authorize acquisitions and dispositions for the National Defense Stockpile for fiscal year 1991, and for other purposes, was ordered to be engrossed for a third reading, read the third time, and passed; as follows:

(The text of S. 2915 as passed by the Senate today will be published in a future edition of the RECORD.)

Mr. NUNN. Mr. President, I ask unanimous consent when the Senate receives from the House of Representatives the companion National Defense Authorization Act for fiscal year 1991, that all after the enacting clause of the House bill be stricken and the text of S. 2884, as amended, be substituted in lieu thereof, that the bill be advanced to third reading and passed, that the motion to reconsider the vote be laid on the table, and that the Senate insist on its amendment and request a conference with the House on the disagreeing votes of the two Houses and the Chair be authorized to appoint conferees.

The PRESIDING OFFICER (Mr. PRYOR). Without objection, it is so ordered.

Mr. NUNN. I ask unanimous consent the foregoing occur without any intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The majority leader is recognized.

Mr. WARNER. Will the majority leader yield for 1 minute?

Mr. President, the distinguished Republican leader has provided the Senate with these statistics: S. 2884, the authorization bill just adopted, the Senate considered on the 1st, 2d, 3d, and 4th of August; total time consumed, 34 hours and 9 minutes; 20 rollcall votes and approximately 100 amendments. A pretty good job.

I thank the Chair.

Mr. MITCHELL. Mr. President, in accordance with my prior statement, I will seek unanimous consent momentarily to proceed to the long-term debt limit, to which I understand objection will be made. Since I cannot move to that measure without consent, I will then proceed to the Department of Transportation appropriations bill.

PERMANENT INCREASE IN PUBLIC DEBT LIMIT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 555, a bill to permanently increase the statutory limit on the public debt.

The PRESIDING OFFICER. Is there objection?

Mr. KASTEN. Reserving the right to object, I ask the majority leader: It is my understanding, if he were to move to this legislation we also could immediately take up the Hollings-Heinz-Moynihan Social Security bill, but we would be unable to take up the Kasten-Mack-Shelby capital gains bill. Is that correct?

I would like to move to the debt ceiling. I would like to deal with the legislation from the distinguished Senator from Pennsylvania. But I also believe it is important we deal with the Kasten-Mack-Shelby bill on capital gains. I think we truly are in the midst of an economic slowdown. Real GNP has dropped to 1.2 percent, job creation is essentially flat, 6 out of 10 people are pessimistic about the future of the economy, unemployment shot up 5.5 percent yesterday. I am concerned that this current weakness—particularly in the New England States, but it is coming across the country now—could trigger a nationwide recession, and I think that in part the blame rests with the U.S. Senate because we failed to pass a capital gains tax cut last year and now we are prevented from doing one this year.

I hope we can bring up the debt ceiling bill. I would like to move forward on it. But unless we can move forward

with both of these amendments, I would be constrained to object.

Mr. HEINZ. Will the Senator yield? The Senator reserved the right to object, and he had the floor.

Mr. KASTEN. I will be pleased to yield to the Senator from Pennsylvania. I think the majority leader has the floor.

Mr. HEINZ. I apologize.

Mr. FORD. Mr. President, they should ask through the Chair if they want to speak.

The PRESIDING OFFICER. The Chair agrees.

The majority leader.

Mr. MITCHELL. Permit me to respond, and then I will be pleased to yield to the Senator from Pennsylvania for his comments.

Mr. President, the Senator from Wisconsin is correct. It was my intention, if we proceed to the long-term debt limit, to consider only the amendment by Senators HOLLINGS, HEINZ, and MOYNIHAN dealing with Social Security off-budget and none of the other approximately 14 amendments which several Members of the Senate have indicated an intention to offer.

Mr. KASTEN. Mr. President, I therefore object.

The PRESIDING OFFICER. Objection is heard.

The majority leader still retains the floor.

Mr. HEINZ. Will the majority leader yield?

Mr. MITCHELL. I will be pleased to yield to the Senator from Pennsylvania.

Mr. HEINZ. I will not detain the Senate. I was hoping to get a word in before the Senator from Wisconsin, as he had his right to do, interposed his objection. I simply wanted to say that the alternatives that we faced were: We could bring up the debt ceiling, hopefully dispose of the Social Security issue that he has supported, and then go on about our business on this bill on the long-term debt ceiling in September.

The only effect I see that his objection has is to postpone action on both until September, and I do not see how that advances either the work of the Senate or the measure that he says he supports.

Mr. MITCHELL. Mr. President, I will be pleased now to yield to the distinguished Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. I thank the distinguished majority leader. I just take a minute to say I regret feeling it necessary to vote against this bill. I think it is only the second time since I have been in the Senate that I voted against a Defense authorization bill. I did it, Mr. President, because I know this institution, and I know the numbers the summiteers are working with in trying to reduce the deficit. I know everybody is agreed we have to trim at least $50 billion from the budget to even begin to make a dent in the deficit for 1991, the real figure on which is about $335 billion.

Mr. President, in order to reduce the deficit by $50 billion, we have to come up with $25 billion in spending cuts. Out of a $1.2 trillion-plus budget, that does not sound like much, but I can tell my colleagues, when we start trying to look at the numbers and figure out where we are going to cut $25 billion, we have to have more than a $10 billion cut in defense.

If we go to the budget figures which the Budget Committee has recommended that the Defense budget be cut, by $13 billion, and it probably ought to be $2 billion more than that unless there is going to be an unbelieve amount of blood on the floor here in trying to find the other $10 billion out of entitlements and so-called social spending—call it whatever you want. But if this bill comes back from conference in this position, I will vote against it again. I believe I will probably be able to vote for the bill when it comes back from conference because I think the House version is infinitely superior to ours.

But my point is, and I want to reemphasize this point, if $10 billion is all we cut out of this bill from $306 billion to roughly $296 billion, that means the Appropriations Committees and the summiteers and the Finance Committee are going to have to come up with $15 billion more in spending cuts.

Do my colleagues know where the talk of getting it is now? Freezing COLA's, cutting back on Medicare providers when the hospitals in my State are hanging on by their thumbs. We are going to be getting into the quick very quickly. Things like student loans; maternal child health care; women, infants and children program; AIDS research.

We are going to have to cut unbelievably in programs that neither the Republicans nor the Democrats want to or are willing to cut.

Mr. President, I felt there were golden opportunities in this bill to cut some more spending and not jeopardize our defense at all. Everybody here believes in a strong defense. We are all agitated and upset about Saddam in Kuwait, and a possibility of an invasion of Saudi Arabia.

But, the real fat in this bill is not in the conventional forces that we are going to have to have to go into Saudi Arabia; the fat is in the strategic defense initiative; the fat is in the B-2 bomber; the fat is in unneeded battleships.

So, Mr. President, I just made that statement. Anybody, any thoughtful person in this body, would find it difficult to vote against the defense authorization bill, but I did so in the knowledge that we are not going to be willing to cut $15 billion in some of these other programs that are so critical to the survival of our Nation.

There are some things that are just as important to our national security as tanks, planes, and guns. It is how we treat our elderly, how we educate our children, what kind of health care we provide. That other $15 billion is going to have to come out of their hides. Mr. President, I thank the majority leader.

ORDER OF PROCEDURE—H.R. 5400

Mr. MITCHELL. Mr. President, if I might have the attention of the distinguished Republican leader, when we return on September 10, it is my intention to ask and seek consent to proceed to the consideration of H.R. 5400, the campaign reform bill.

I will then ask that all after the enacting clause be stricken, and the text of S. 137 as passed by the Senate, be inserted in lieu thereof; that the Senate insist on its amendment, request a conference with the House and that the Chair be authorized to appoint conferees on the part of the Senate.

I merely wanted to inform the distinguished Republican leader in advance of my intention in that regard, and invite his comment.

Mr. DOLE. I do not see any problem with that. I was just notified about it earlier by the distinguished Senator from Oklahoma. I really have not had an opportunity to check with Senator STEVENS or Senator NICKLES. I did check with Senator MCCONNELL. We agreed we would not gain much by doing it today and will not hinder anything by doing it on September 12.

MEASURE HELD AT THE DESK—H.R. 5400

Mr. MITCHELL. Mr. President, I now am going to seek unanimous consent that it be held at the desk until close of business on the 12th. I ask unanimous consent that H.R. 5400 be held at the desk until close of business on September 12.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, FISCAL YEAR 1991

Mr. MITCHELL. Mr. President, I ask the Chair to lay before the Senate, Calendar No. 741, H.R. 5229, the Department of Transportation appropriations bill.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5229) making appropriations for the Department of Transportation and

related agencies for the fiscal year ending September 30, 1991, and for other purposes, which had been reported from the Committee on Appropriations, with amendments; as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

H.R. 5229

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of Transportation and related agencies the fiscal year ending September 30, 1991, and for other purposes, namely:

TITLE I—DEPARTMENT OF TRANSPORTATION

OFFICE OF THE SECRETARY

IMMEDIATE OFFICE OF THE SECRETARY

For necessary expenses of the Immediate Office of the Secretary, $1,215,000.

IMMEDIATE OFFICE OF THE DEPUTY SECRETARY

For necessary expenses of the Immediate Office of the Deputy Secretary, $412,000.

OFFICE OF THE GENERAL COUNSEL

For necessary expenses of the Office of the General Counsel, $6,420,000.

OFFICE OF THE ASSISTANT SECRETARY FOR POLICY AND INTERNATIONAL AFFAIRS

For necessary expenses of the Office of the Assistant Secretary for Policy and International Affairs, [$8,810,000] *$8,500,000.*

OFFICE OF THE ASSISTANT SECRETARY FOR BUDGET AND PROGRAMS

For necessary expenses of the Office of the Assistant Secretary for Budget and Programs, [$2,390,000] *$2,400,000,* including not to exceed [$40,000] *$50,000* for allocation within the Department of official reception and representation expenses as the Secretary may determine.

OFFICE OF THE ASSISTANT SECRETARY FOR GOVERNMENTAL AFFAIRS

For necessary expenses of the Office of the Assistant Secretary for Governmental Affairs, $2,255,000.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

For necessary expenses of the Office of the Assistant Secretary for Administration, [$21,745,000] *$22,750,000.*

OFFICE OF THE ASSISTANT SECRETARY FOR PUBLIC AFFAIRS

For necessary expenses of the Office of the Assistant Secretary for Public Affairs, $1,389,000.

EXECUTIVE SECRETARIAT

For necessary expenses of the Executive Secretariat, $918,000.

CONTRACT APPEALS BOARD

For necessary expenses of the Contract Appeals Board, $508,000.

OFFICE OF CIVIL RIGHTS

For necessary expenses of the Office of Civil Rights, $1,353,000.

[OFFICE OF COMMERCIAL SPACE TRANSPORTATION

[For necessary expenses of the Office of Commercial Space Transportation, $725,000.]

OFFICE OF ESSENTIAL AIR SERVICE

For necessary expenses of the Office of Essential Air Service, [$1,251,000] *$1,610,000.*

OFFICE OF SMALL AND DISADVANTAGED BUSINESS UTILIZATION

For necessary expenses of the Office of Small and Disadvantaged Business Utilization, $3,465,000, of which $2,600,000 shall remain available until expended and shall be available for the purposes of the Minority Business Resource Center as authorized by 49 U.S.C. 332: *Provided,* That, notwithstanding any other provision of law, funds available for the purposes of the Minority Business Resource Center in this or any other Act may be used for business opportunities related to any mode of transportation.

OFFICE OF INTELLIGENCE AND SECURITY

For necessary expenses of the Office of Intelligence and Security, $1,360,000.

TRANSPORTATION PLANNING, RESEARCH, AND DEVELOPMENT

For necessary expenses for conducting transportation planning, research, and development activities, including the collection of national transportation statistics, and university research and internships, to remain available until expended, [$4,777,000] *$2,947,000*[: *Provided,* That notwithstanding any other provision of law, there may be credited to this account funds received from user fees established for regulatory services of the Office of Commercial Space Transportation].

OFFICE OF COMMERCIAL SPACE TRANSPORTATION OPERATIONS AND RESEARCH

For necessary expenses for operations and research activities related to commercial space transportation, to remain available until expended $4,217,000: Provided, That the unexpended balances of the appropriation "Transportation Planning, Research, and Development" associated with commercial space activities shall be transferred to and merged with this appropriation: Provided further, that notwithstanding any other provision of law, there may be credited up to $200,000 to this account funds received from user fees established for regulatory services.

WORKING CAPITAL FUND

Necessary expenses for operating costs and capital outlays of the Department of Transportation Working Capital Fund not to exceed $86,264,000 shall be paid, in accordance with law, from appropriations made available by this Act and prior appropriations Acts to the Department of Transportation, together with advances and reimbursements received by the Department of Transportation.

PAYMENTS TO AIR CARRIERS

For payments to air carriers of so much of the compensation fixed and determined under section 419 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1389), as is payable by the Department of Transportation, [$23,600,000] *$26,600,000,* to remain available until expended: *Provided,* That none of the funds in this or any other Act shall be available for the implementation or execution of programs in excess of [$23,600,000] *$26,600,000* for the Payments to Air Carriers program in fiscal year 1991: *Provided further,* That this limitation shall only be in effect if contract authority is enacted for the Payments to Air Carriers program for fiscal year 1991.

RENTAL PAYMENTS

For necessary expenses for rental of headquarters and field space and related services assessed by the General Services Administration, $107,668,000: *Provided,* That of this amount, $15,108,000 shall be derived from the Highway Trust Fund, $28,508,000 shall be derived from the Airport and Airway Trust Fund, and $419,000 shall be derived from the Pipeline Safety Fund.

COAST GUARD

OPERATING EXPENSES

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase of not to exceed eight passenger motor vehicles for replacement only; payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and section 229(b) of the Social Security Act (42 U.S.C. 429(b)); and recreation and welfare; [$2,352,000,000] *$2,351,103,000* is authorized to be appropriated, derived by transfer, or otherwise provided in "in kind" commodities and services for Coast Guard operating expenses in fiscal year 1991; of which [$2,192,000,000] *$2,051,103,000* is hereby appropriated, of which $35,000,000 shall be expended from the Boat Safety Account, notwithstanding any other provision of law: *Provided,* That of the funds provided for operating expenses for fiscal year 1991, in this or any other Act, not less than $602,600,000 shall be available for drug enforcement activities *and not less than $197,000,000 shall be for marine environmental protection activities*: *Provided further,* That the number of aircraft on hand at any one time shall not exceed two hundred and twenty-two, exclusive of planes and parts stored to meet future attrition: *Provided further,* That none of the funds appropriated in this or any other Act shall be available for pay or administrative expenses in connection with shipping commissioners in the United States: *Provided further,* That none of the funds provided in this Act shall be available for expenses incurred for yacht documentation under 46 U.S.C. 12109, except to the extent fees are collected from yacht owners and credited to this appropriation.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, [$391,994,000] *$432,396,000,* to remain available until September 30, 1995, of which [$155,750,000] *$168,385,000* shall be available to acquire, repair, renovate or improve vessels, small boats and related equipment; [$101,700,000] *$93,500,000* shall be available to acquire new aircraft and increase aviation capability; [$20,500,000] *$15,500,000* shall be available for other equipment; [$81,385,000] *$112,675,000* shall be available for shore facilities and aids to navigation facilities; and [$32,659,000] *$42,336,000* shall be available for personnel, survey and design, and related costs: *Provided,* That the Secretary of Transportation shall issue regulations requiring that written warranties shall be included in all contracts with prime contractors for major systems acquisitions of the Coast Guard: *Provided further,* That any such written warranty shall not apply in the case of any system or component thereof that has been furnished by the Government to a contractor: *Provided further,* That the Secretary of Transportation may provide for a waiver of the requirements for a warranty where: (1) the waiver is necessary in the interest of the national defense or the warranty would not

be cost effective; and (2) the Committees on Appropriations of the Senate and the House of Representatives, the Committee on Commerce, Science, and Transportation of the Senate, and the Committee on Merchant Marine and Fisheries of the House of Representatives are notified in writing of the Secretary's intention to waive and reasons for waiving such requirements: *Provided further,* That the requirements for such written warranties shall not cover combat damage[: *Provided further,* That none of the funds provided herein for Acquisition, Construction and Improvements shall be made available for personnel compensation and benefits in excess of five hundred eighty-six full time equivalent staff years].

ENVIRONMENTAL COMPLIANCE AND RESTORATION

For necessary expenses to carry out the Coast Guard's environmental compliance and restoration functions under chapter 19 of title 14, United States Code, [$21,500,000] *$22,000,000.*

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, $3,747,000, to remain available until expended.

RETIRED PAY

For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefits Plans, and for payments for medical care of retired personnel and their dependents under the Dependents Medical Care Act (10 U.S.C. ch. 55), $437,300,000.

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law; maintenance and operation of facilities; and supplies, equipment, and services; $74,306,000.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

For necessary expenses, not otherwise provided for, for applied scientific research, development, test, and evaluation; maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law, [$24,800,000] *$25,741,000,* to remain available until expended: *Provided,* That there may be credited to this appropriation funds received from State and local governments, other public authorities, private sources, and foreign countries, for expenses incurred for research, development, testing, and evaluation.

[OFFSHORE OIL POLLUTION COMPENSATION FUND

[The Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes or other obligations in such amounts and at such times as may be necessary to the extent that appropriations are not adequate to meet the obligations of the Fund: *Provided,* That none of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of $60,000,000 in fiscal year 1991 for the "Offshore Oil Pollution Compensation Fund".

[DEEPWATER PORT LIABILITY FUND

[The Secretary of Transportation is authorized to issue, and the Secretary of the Treasury is authorized to purchase, without fiscal year limitation, notes or other obligations in such amounts and at such times as may be necessary to the extent that available appropriations are not adequate to meet the obligations of the Fund: *Provided,* That none of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of $50,000,000 in fiscal year 1991 for the "Deepwater Port Liability Fund".]

BOAT SAFETY

(AQUATIC RESOURCES TRUST FUND)

For payment of necessary expenses incurred for recreational boating safety assistance under Public Law 92-75, as amended, $35,000,000, to be derived from the Boat Safety Account and to remain available until expended.

FEDERAL AVIATION ADMINISTRATION

OPERATIONS

For necessary expenses of the Federal Aviation Administration, not otherwise provided for, including administrative expenses for research and development, establishment of air navigation facilities and the operation and maintenance of aircraft, and carrying out the provisions of the Airport and Airway Development Act, as amended, or other provisions of law authorizing the obligation of funds for similar programs of airport and airway development or improvement, purchase of four passenger motor vehicles for replacement only, [$4,037,000,000] *$4,038,551,000,* of which [$1,994,346,000] *$1,994,640,000* shall be derived from the Airport and Airway Trust Fund: *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the maintenance and operation of air navigation facilities and for issuance of airmen and aircraft certificates, including processing of major repair and alteration forms: *Provided further,* That none of these funds shall be available for new applicants for the second career training program or for a pilot test of contractor maintenance: *Provided further,* That the immediately preceding proviso shall not prohibit the augmentation of the existing field maintenance work force if it is determined to be essential for the safe operation of the air traffic control system[: *Provided further,* That, of the funds available under this head, $4,000,000 shall be made available for the Federal Aviation Administration to enter into contractual agreement with the Mid-American Aviation Resource Consortium in Minnesota to operate an air traffic controller training program].

FACILITIES AND EQUIPMENT

(AIRPORT AND AIRWAY TRUST FUND)

For necessary expenses, not otherwise provided for, for acquisition, establishment, and improvement by contract or purchase, and hire of air navigation and experimental facilities as authorized by the Federal Aviation Act of 1958, as amended (49 U.S.C. App. 1301 et seq.), including initial acquisition of necessary sites by lease or grant; engineering and service testing including construction of test facilities and acquisition of necessary sites by lease or grant; *lease or purchase of aircraft from funds available under this head;* and construction and furnishing of quarters and related accommodations of officers and employees of the Federal Aviation Administration stationed at remote localities where such accommodations are not available; to be derived from the Airport and Airway Trust Fund and to remain available until September 30, 1995, [$2,138,615,000] *$2,240,018,000: Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the establishment and modernization of air navigation facilities: *Provided further,* [That none of the funds under this head shall be available for the Secretary of Transportation to enter into grant agreements with universities or colleges for any capital project the Federal share of which is in excess of 50 per centum of the total cost of such project] *That appropriations made for the Airway Science Program, as authorized below in this section, the Federal Aviation Administration may hereafter enter into competitive grant agreements with institutions of higher education having airway science curricula, for the Federal share of the allowable direct costs of the following categories of items, to the extent that such items are in support of airway science curricula: (a) the construction, purchase, or lease with option to purchase, of buildings and associated facilities, (b) instructional materials and equipment, and (c) salaries and employment benefits for instructional faculty. Such grant agreements shall constitute obligations of funds appropriated for that purpose in this and subsequent appropriation Acts. Such funds are hereby authorized to be appropriated and may remain available until expended, as provided in such Acts. The Federal Aviation Administration shall establish guidelines for determining the direct costs allowable under grants to be made pursuant to this section. The maximum Federal share of the allowable cost of any project assisted by such grants shall be 60 percent, except that the maximum Federal share of the allowable annual cost of salaries and employment benefits for instructional faculty at a grantee institution shall be 50 per centum. Allowable costs for such salaries and employment benefits shall reflect the proportional allocation of responsibility of such faculty to airway science curriculum activities. The total amount of grants awarded in any fiscal year for the payment of the Federal share of such salaries and employment benefits at all grantee institutions shall not exceed 25 per centum of the total amount newly appropriated for the purposes of this section for that fiscal year.*

RESEARCH, ENGINEERING, AND DEVELOPMENT

(AIRPORT AND AIRWAY TRUST FUND)

For necessary expenses, not otherwise provided for, for research, engineering, and development, in accordance with the provisions of the Federal Aviation Act of 1958, as amended (49 U.S.C. App. 1301 et seq.), including construction of experimental facilities and acquisition of necessary sites by lease or grant, [$195,000,000] *$206,600,000,* to be derived from the Airport and Airway Trust Fund and to remain available until expended: *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred for research, engineering, and development.

GRANTS-IN-AID FOR AIRPORTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(AIRPORT AND AIRWAY TRUST FUND)

For liquidation of obligations incurred for airport planning and development under section 14 of Public Law 91-258, as amended, and under other law authorizing such obligations, and obligations for noise compatibility planning and programs, $1,400,000,000, to be derived from the Air-

port and Airway Trust Fund and to remain available until expended: *Provided,* That none of the funds in this Act shall be available for the planning or execution of programs the commitments for which are in excess of [$1,800,000,000] *$1,650,000,000* in fiscal year 1991 for grants-in-aid for airport planning and development, and noise compatibility planning and programs, notwithstanding section 506(e)(4) of the Airport and Airway Improvement Act of 1982, as amended, of which not to exceed [$117,509,900] *$122,509,900* shall be available for letters of intent issued prior to July [1] *30,* 1990: *Provided further,* That, for each percentage point the amount made available for fiscal year 1991 from the Airport and Airway Trust Fund under sections 505, 506(a), 506(b), and 506(c) of the Airport and Airway Improvement Act of 1982 is less than 75 percent of the aggregate of the amount of funds made available for fiscal year 1991 under sections 505, 506(a), and 506(b) of such Act and the amount of funds made available for fiscal year 1991 for operations of the Federal Aviation Administration, the limitation on commitments shall be reduced by such percentage point but not to an amount less than [$1,650,000,000] *$1,500,000,000.*

AVIATION INSURANCE REVOLVING FUND

The Secretary of Transportation is hereby authorized to make such expenditures and investments, within the limits of funds available pursuant to section 1306 of the Act of August 23, 1958, as amended (49 U.S.C. 1536), and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for the current fiscal year for aviation insurance activities under said Act.

AIRCRAFT PURCHASE LOAN GUARANTEE PROGRAM

The Secretary of Transportation may hereafter issue notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such obligations may be issued to pay any necessary expenses required pursuant to any guarantee issued under the Act of September 7, 1957, Public Law 85-307, as amended (49 U.S.C. 1324 note). None of the funds in this Act shall be available for the implementation or execution of programs under this head the obligations for which are in excess of $9,970,000 during fiscal year 1991. Such obligations shall be redeemed by the Secretary from appropriations authorized by this section. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under the subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchases, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States.

FEDERAL HIGHWAY ADMINISTRATION

LIMITATION ON GENERAL OPERATING EXPENSES

Necessary expenses for administration, operation, and research of the Federal Highway Administration, not to exceed [$245,400,000] *$263,751,000* shall be paid in accordance with law, from appropriations made available by this Act to the Federal Highway Administration together with advances and reimbursements received by the Federal Highway Administration: *Provided,* That not to exceed [$56,286,000] *$73,411,000* of the amount provided herein shall remain available until expended: *Provided further,* That, notwithstanding any other provision of law, there may be credited to this account funds received from States, counties, municipalities, other public authorities, and private sources, for training expenses incurred for non-Federal employees.

UNIVERSITY TRANSPORTATION CENTERS

(HIGHWAY TRUST FUND)

For necessary expenses for university transportation centers, as authorized by section 21(i)(2) of the Urban Mass Transportation Act of 1964, as amended, $5,000,000 to be derived from the Highway Trust Fund (other than the Mass Transit Account).

[HIGHWAY SAFETY RESEARCH AND DEVELOPMENT

(HIGHWAY TRUST FUND)

[For necessary expenses in carrying out the provisions of sections 307(a) and 403 of title 23, United States Code, to be derived from the Highway Trust Fund and to remain available until expended, $5,450,000.]

HIGHWAY-RELATED SAFETY GRANTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

For payment of obligations incurred in carrying out the provisions of title 23, United States Code, section 402, administered by the Federal Highway Administration, to remain available until expended, $10,000,000, to be derived from the Highway Trust Fund: *Provided,* That not to exceed $100,000 of the amount appropriated herein shall be available for "Limitation on general operating expenses": *Provided further,* That none of the funds in this Act shall be available for the planning or execution of programs the obligations for which are in excess of $10,000,000 in fiscal year 1991 for "Highway-Related Safety Grants".

RAILROAD-HIGHWAY CROSSINGS DEMONSTRATION PROJECTS

For necessary expenses of certain railroad-highway crossings demonstration projects as authorized by section 163 of the Federal-Aid Highway Act of 1973, as amended, to remain available until expended, [$15,000,000] *$2,000,000,* of which [$10,000,000] *$1,333,334* shall be derived from the Highway Trust Fund.

FEDERAL-AID HIGHWAYS

(LIMITATION ON OBLIGATIONS)

(HIGHWAY TRUST FUND)

None of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of [$14,500,000,000] *$13,850,000,000* for Federal-aid highways and highway safety construction programs for fiscal year 1991*: Provided, That, within the funds provided for interstate construction, and in accordance with authorized cost-sharing requirements, there shall be available the amounts necessary to provide the Federal share of construction costs of a bridge, designed as required for compliance with the coastal zone plan of the State of New Jersey, on Interstate 295 in the vicinity of Crosswicks Creek near Trenton, New Jersey.*

FEDERAL-AID HIGHWAYS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

For carrying out the provisions of title 23, United States Code, that are attributable to Federal-aid highways, including the National Scenic and Recreational Highway as authorized by 23 U.S.C. 148, not otherwise provided, including reimbursements for sums expended pursuant to the provisions of 23 U.S.C. 308, $14,300,000,000, or so much thereof as may be available in and derived from the Highway Trust Fund, to remain available until expended.

RIGHT-OF-WAY REVOLVING FUND

(LIMITATION ON DIRECT LOANS)

(HIGHWAY TRUST FUND)

During fiscal year 1991 and with the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed [$42,500,000] *$47,850,000.*

MOTOR CARRIER SAFETY

For necessary expenses to carry out the motor carrier safety functions of the Secretary as authorized by the Department of Transportation Act (80 Stat. 939-940), $40,000,000, of which $1,782,000 shall remain available until expended.

MOTOR CARRIER SAFETY GRANTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

For payment of obligations incurred in carrying out the provisions of section 402 of Public Law 97-424 $63,000,000, to be derived from the Highway Trust Fund and to remain available until expended: *Provided,* That none of the funds in this Act shall be available for the implementation or execution of programs the obligations for which are in excess of [$61,500,000] *$60,000,000* for "Motor Carrier Safety Grants".

[BALTIMORE-WASHINGTON PARKWAY

[(HIGHWAY TRUST FUND)

[For necessary expenses, not otherwise provided, to carry out the provisions of the Federal-Aid Highway Act of 1970 for the Baltimore-Washington Parkway, to remain available until expended, $9,900,000, to be derived from the Highway Trust Fund and to be withdrawn therefrom at such times and in such amounts as may be necessary.

[INTERMODAL URBAN DEMONSTRATION PROJECT

[(HIGHWAY TRUST FUND)

[For necessary expenses to carry out the provisions of section 124 of the Federal-Aid Highway Amendments of 1974, $10,000,000, to be derived from the Highway Trust Fund.

[HIGHWAY SAFETY AND ECONOMIC DEVELOPMENT DEMONSTRATION PROJECTS

[(HIGHWAY TRUST FUND)

[For necessary expenses to carry out construction projects as authorized by Public Law 99-500 and Public Law 99-591, $20,000,000, to be derived from the Highway Trust Fund and to remain available until expended.

[HIGHWAY SAFETY IMPROVEMENT DEMONSTRATION PROJECT

[(HIGHWAY TRUST FUND)

[For the purpose of carrying out a coordinated project of highway improvements in the vicinity of Pontiac and East Lansing, Michigan, that demonstrates methods of enhancing safety and promoting economic development through widening and resurfacing of highways on the Federal-aid primary system and on roads on the Federal-aid urban system, as authorized by Public Law 99-500 and Public Law 99-591, $9,000,000, to be derived from the Highway Trust Fund and to remain available until expended.

[HIGHWAY-RAILROAD GRADE CROSSING SAFETY DEMONSTRATION PROJECT

[(HIGHWAY TRUST FUND)

[For the purpose of carrying out a coordinated project of highway-railroad grade crossing separations in Mineola, New York, that demonstrates methods of enhancing highway-railroad crossing safety while minimizing surrounding environmental effects, as authorized by Public Law 99-500 and Public Law 99-591, $8,000,000, to be derived from the Highway Trust Fund and to remain available until expended.

[HIGHWAY WIDENING DEMONSTRATION PROJECT

[For necessary expenses to carry out a demonstration project to improve U.S. Route 202 in the vicinity of King of Prussia, Pennsylvania, as authorized by Public Law 100-202, $2,000,000, to remain available until expended.

[BRIDGE IMPROVEMENT DEMONSTRATION PROJECT

[Of the amount appropriated to carry out a highway demonstration project in the vicinity of Jacksonville, Florida, by the Department of Transportation and Related Agencies Appropriations Act, 1990 (103 Stat. 1079), and not expended, $2,000,000 shall be available for 80 percent of expenses necessary to carry out construction of new roadways on Blount Island, Florida, without regard to whether or not such expenses are incurred in accordance with section 1.9 of title 23 of the Code of Federal Regulations.

[HIGHWAY WIDENING AND IMPROVEMENT DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to carry out a highway project between Paintsville and Prestonsburg, Kentucky, that demonstrates the safety and economic benefits of widening and improving highways in mountainous areas, $4,000,000, to remain available until expended.

[INTERSECTION SAFETY DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to complete Douglas Street in the vicinity of El Segundo, California, for the purpose of demonstrating methods of improved highway and highway safety construction, $3,600,000, to remain available until expended.

[CLIMBING LANE AND HIGHWAY SAFETY DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to carry out a highway project on U.S. Route 15 in the vicinity of Tioga County, Pennsylvania, for the purpose of demonstrating methods of improved highway and highway safety construction, $12,000,000, to remain available until expended.

[INDIANA INDUSTRIAL CORRIDOR SAFETY DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary for an improved route between Logansport and Peru, Indiana, for the purpose of demonstrating the safety and economic benefits of widening and improving rural highways, $3,000,000, to remain available until expended.

[HIGHWAY CAPACITY IMPROVEMENT DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to improve U.S. Route 231 between U.S. Route 90 and the City of Campbellton in Jackson County, Florida, for the purpose of demonstrating methods of expanding a two-lane segment of a U.S. highway to four lanes, $2,000,000, to remain available until expended.

[ALABAMA HIGHWAY BYPASS DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary for the construction of a highway bypass project in the vicinity of Jasper, Alabama, for the purpose of demonstrating methods of improved highway and highway safety construction, $10,000,000, to remain available until expended.

[KENTUCKY BRIDGE DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to replace the Glover Cary Bridge in Owensboro, Kentucky, for the purpose of demonstrating methods of improved highway and highway safety construction, $4,000,000, to remain available until expended.

[VIRGINIA HOV SAFETY DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to construct High Occupancy Vehicle lanes on Interstate Route 66 between Interstate Route 495 and U.S. Route 50 for the purpose of demonstrating methods of increasing highway capacity and safety by the use of highway shoulders to construct HOV lanes, $8,500,000, to remain available until expended.

[URBAN HIGHWAY CORRIDOR AND BICYCLE TRANSPORTATION DEMONSTRATION PROJECTS

[For 80 percent of the expenses necessary to improve and upgrade the M-59 urban highway corridor in southeast Michigan for the purpose of demonstrating methods of improving congested urban corridors that have been neglected during construction of the Interstate system, $10,000,000, to remain available until expended, together with $1,000,000, to remain available until expended, to provide for 80 percent of the expenses necessary for a bicycle transportation demonstration project in Macomb County, Michigan.

[URBAN AIRPORT ACCESS SAFETY DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to improve and upgrade access to Detroit Metropolitan Airport in southeast Michigan, $11,000,000, to remain available until expended, for the purpose of demonstrating methods of improving access to major urban airports.

[PENNSYLVANIA RECONSTRUCTION DEMONSTRATION PROJECT

[For 80 percent of the expenses necessary to upgrade, widen, and reconstruct the sections of Pennsylvania Route 56 known as Haws Pike and the Windber By-Pass, for the purpose of demonstrating methods of promoting economic development and highway safety, $20,000,000, to remain available until expended.

[PENNSYLVANIA TOLL ROAD DEMONSTRATION PROJECT

[For necessary expenses for the Monongahela Valley Expressway, $6,000,000, to remain available until expended: *Provided*, That these funds together with funds made available from the Highway Trust Fund, for Federal participation in the toll highway project being carried out under section 129(j) of title 23, United States Code, in the State of Pennsylvania shall be subject to section 129(j) of such title, relating to Federal share limitation.]

HIGHWAY DEMONSTRATION PROJECTS

For up to 80 percent of the expenses necessary for certain highway projects that demonstrate methods of improving safety, reducing congestion, or promoting economic development, [$23,800,000] *$58,070,000*, to remain available until expended.

HIGHWAY DEMONSTRATION PROJECTS—PRELIMINARY ENGINEERING

For up to 80 percent of the expenses necessary to carry out feasibility studies, preliminary engineering, environmental studies, and right-of-way acquisition for certain highway and bicycle transportation projects that demonstrate methods of improving safety, reducing congestion, or promoting economic development, [$46,050,000] *$14,000,000*, to remain available until expended.

CORRIDOR H IMPROVEMENT PROJECT

For the purpose of carrying out a demonstration of methods of eliminating traffic congestion, and to promote economic benefits for the area affected by the construction of the Corridor H segment of the Appalachian Highway System, there is hereby appropriated $51,500,000, to remain available until expended: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

CORRIDOR G IMPROVEMENT PROGRAM

For the purpose of carrying out a demonstration of methods of eliminating traffic congestion, and to promote economic benefits for the area affected by the construction of the Corridor G segment of the Appalachian Highway System, there is hereby appropriated $50,000,000 to remain available until expended: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs: Provided further, That of the funds made available under this head, $50,000,000 shall not become available for obligation until September 30, 1991 and pursuant to section 202 of Public Law 100-119, this action is a necessary (but secondary) result of a significant policy change.

CORRIDOR D IMPROVEMENT PROJECT

For the purpose of carrying out a demonstration of methods of eliminating traffic congestion, and to promote economic benefits for the area affected by the construction of the Corridor D segment of the Appalachian Highway System, there is hereby appropriated $10,000,000, to remain available until expended: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

BYPASS CONSTRUCTION PROJECT

For the purpose of carrying out a demonstration of methods of eliminating traffic congestion, improving highway safety and to promote economic benefits for the area affected by the construction of road improvements including a bypass near Weirton, West Virginia, there is hereby appropri-

ated $50,000,000, to remain available until expended: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

CORNING BYPASS SAFETY DEMONSTRATION PROJECT

For the purpose of continuing a demonstration of traffic safety and flow improvement, there is hereby appropriated $20,000,000, to remain available until expended: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

TURQUOISE TRAIL PROJECT

For necessary expenses to carry out a demonstration project known as the Turquoise Trail Project, that demonstrates methods of enhancing safety and promoting economic development through converting a dirt roadway into an all weather, two lane highway, there is hereby appropriated $5,510,000, to remain available until expended: Provided, That such sums appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

TRADE ENHANCEMENT DEMONSTRATION PROJECT

For the purpose of implementing a demonstration of United States-Mexico trade enhancement benefits on approximately 2.6 miles of Federal-aid primary highway on State Route 189 connecting Interstate 19 to the United States-Mexico border, there is hereby appropriated $12,500,000 for engineering, design, construction and other costs incurred in the reconstruction of Mariposa Road, State Route 189 in Nogales, Arizona.

OTTUMWA ROAD EXTENSION PROJECT

For the purpose of carrying out a demonstration of economic growth and development benefits of a four lane highway in areas with industry producing heavy truck traffic, there is hereby appropriated $10,000,000 to remain available until expended, for the acquisition of rights-of-way, and other costs incurred in the upgrading and construction of a portion of a four lane facility between Oskaloosa and Ottumwa along existing State highways and new highway alignments: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

IOWA CONNECTOR PROJECT

For the purpose of carrying out a demonstration of improved access through a connector road, there is hereby appropriated $1,750,000 to remain available until expended, for the acquisition of rights-of-way, and other costs incurred in the construction of a highway facility connecting North 16th Street and North 25th Street in Council Bluffs, Iowa: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

HIGHWAY 20 REALIGNMENT PROJECT

For the purpose of carrying out a demonstration of the effect of improved highway and highway realignment, there is hereby appropriated $3,000,000 to remain available until expended, for the acquisition of right-of-way, and other costs incurred in the construction of an improved Highway 20 between Early, Iowa and Fort Dodge, Iowa: Provided, That all funds appropriated under this head shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs.

BRIDGE TRAFFIC SAFETY DEMONSTRATION PROJECT

For the purposes of carrying out a demonstration of the joint use of the Hoan Bridge, Milwaukee, Wisconsin, for both vehicular and bicycle/pedestrian traffic, that demonstrates the enhancement of various forms of urban transportation for both recreation and commuting, $2,000,000, to remain available until expended: Provided, That notwithstanding any other provisions of law, funds appropriated for this project shall not be included in any calculations made under section 157 of title 28, United States Code, for fiscal year 1991 and each fiscal year thereafter.

RAMP RELOCATION AND RECONSTRUCTION DEMONSTRATION PROJECT

For the purposes of carrying out a coordinated program of rehabilitation, relocation and reconstruction of those portions of I-94 and connecting roads impacted by the construction of a new stadium in Milwaukee, Wisconsin, $10,000,000, to demonstrate methods of reducing traffic congestion in urban areas and particularly around sports facilities, to remain available until expended: Provided, That notwithstanding any other provision of law, funds appropriated for this project shall not be included in any calculations made under section 157 of title 28, United States Code, for fiscal year 1991 and each fiscal year thereafter.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

OPERATIONS AND RESEARCH

For expenses necessary to discharge the functions of the Secretary with respect to traffic and highway safety under the Motor Vehicle Information and Cost Savings Act (Public Law 92-513, as amended) and the National Traffic and Motor Vehicle Safety Act, [$70,075,500] *$76,664,000; of which $8,000,000 shall be for carrying out 23 U.S.C. 410 and,* of which [$30,197,000] *$40,851,000* shall remain available until expended.

OPERATIONS AND RESEARCH

(HIGHWAY TRUST FUND)

For expenses necessary to discharge the functions of the Secretary with respect to traffic and highway safety under chapter 4, title 23, United States Code, to be derived from the Highway Trust Fund, [$38,960,500] *$40,394,000,* to remain available until expended.

HIGHWAY TRAFFIC SAFETY GRANTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

For payment of obligations incurred carrying out the provisions of 23 U.S.C. 402, 406, and 408, and section 209 of Public Law 95-599, as amended, to remain available until expended, [$104,825,000] *$107,358,000,* to be derived from the Highway Trust Fund: *Provided,* That none of the funds in this Act shall be available for the planning or execution of programs the total obligations for which are in excess of $114,655,000 in fiscal year 1991 for "State and community highway safety grants" authorized under 23 U.S.C. 402: *Provided further,* That none of these funds shall be used for construction, rehabilitation or remodeling costs, or for office furnishings and fixtures for State, local, or private buildings or structures: *Provided further,* That none of the funds in this Act shall be available for the planning or execution of programs the total obligations for which are in excess of [$10,967,000] *$17,000,000* for "Alcohol safety incentive grants" authorized under 23 U.S.C. 408: *Provided further,* That not to exceed $5,078,000 shall be available for administering the provisions of 23 U.S.C. 402: *Provided further,* That notwithstanding any other provision of law, none of the funds in this Act shall be available for the planning or execution of programs authorized under section 209 of Public Law 95-599, as amended, the total obligations for which are in excess of $4,750,000 in fiscal years 1982 through 1991.

FEDERAL RAILROAD ADMINISTRATION

OFFICE OF THE ADMINISTRATOR

For necessary expenses of the Federal Railroad Administration, not otherwise provided for, [$13,404,000] *$14,547,000,* of which [$1,669,000] *$1,744,000* shall remain available until expended: *Provided,* That none of the funds in this Act shall be available for the planning or execution of a program making commitments to guarantee new loans under the Emergency Rail Services Act of 1970, as amended, and that no new commitments to guarantee loans under section 211(a) or 211(h) of the Regional Rail Reorganization Act of 1973, as amended, shall be made: *Provided further,* That, as part of the Washington Union Station transaction in which the Secretary assumed the first deed of trust on the property and, where the Union Station Redevelopment Corporation or any successor is obligated to make payments on such deed of trust on the Secretary's behalf, including payments on and after September 30, 1988, the Secretary is authorized to receive such payments directly from the Union Station Redevelopment Corporation, credit them to the appropriation charged for the first deed of trust, and make payments on the first deed of trust with those funds: *Provided further,* That such additional sums as may be necessary, for payment on the first deed of trust, may be advanced by the Administrator from unobligated balances available to the Federal Railroad Administration, to be reimbursed from payments received from the Union Station Redevelopment Corporation.

LOCAL RAIL [SERVICE] *FREIGHT* ASSISTANCE

For necessary expenses for rail assistance under section 5(q) of the Department of Transportation Act, as amended, [$7,000,000] *$12,000,000,* to remain available until expended[: *Provided,* That notwithstanding any provision of sections 5(f) through 5(p) of said Act, from such funds $36,000 shall be reserved for each eligible State for the purposes of either section 5(i) or section 5(h) of said Act, provided that timely application is made in accordance with procedures employed by the Secretary, and the balance of such funds is reserved for use only under sections 5(h)(3)(B)(ii) and 5(h)(3)(C) of said Act: *Provided further,* That no State may apply for fiscal year 1991 funds under section 5 of said Act until such State has obligated all funds granted to it under said section 5 in previous fiscal years].

RAILROAD SAFETY

For necessary expenses in connection with railroad safety, not otherwise provided for, [$34,110,000] *$34,616,000,* of which $1,203,000 shall remain available until expended: *Provided,* That there may be credited to this appropriation funds received

from non-Federal sources for expenses incurred in training safety employees of private industry, State and local authorities, or other public authorities *other than State rail safety inspectors participating in training pursuant to section 206 of the Federal Railroad Safety Act of 1970.*

RAILROAD RESEARCH AND DEVELOPMENT

For necessary expenses for railroad research and development, [$25,212,000] *$17,747,000,* to remain available until expended: *Provided,* That of this amount [$250,000] *$1,000,000* is available until expended for a grant to the Long Island Rail Road *to expand and extend an intermodal project including acquisition of intermodal equipment and related equipment, improvement of terminal facilities, and* for a study on the potential impact of the Long Island Rail Road Intermodal Project, including the potential relief of bridge and highway congestion in the New York Metropolitan Area: *Provided further,* That any such grant shall be matched on a dollar for dollar basis by the State of New York and/or the State of New Jersey: *Provided further,* That up to $400,000 of the funds made available in fiscal year 1990 shall be made available for a grant to the National Railroad Passenger Corporation to undertake research to improve access to rail passenger cars from station platforms for individuals with disabilities and elderly persons*: Provided further, That of this amount $500,000 is available until expended for a grant to the State of Washington for a study on preliminary corridor design and feasibility studies on magnetically levitated rail or other high speed rail options: Provided further, That any such grant shall be matched on a dollar for dollar basis by the State of Washington.*

SETTLEMENTS OF RAILROAD LITIGATION

For the payment of promissory notes issued pursuant to section 210(f) of the Regional Rail Reorganization Act of 1973 (Public Law 93-236), as amended, $3,097,000, to remain available until expended, together with such sums as may be necessary for the payment of interest due to the Secretary of the Treasury under the terms and conditions of such notes.

NORTHEAST CORRIDOR IMPROVEMENT PROGRAM

For necessary expenses related to Northeast Corridor improvements authorized by title VII of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended (45 U.S.C. 851 et seq.) and the Rail Safety Improvement Act of 1988, [$16,000,000] *$165,000,000,* to remain available until expended*: Provided, That of the funds made available under this heading, $125,000,000, which amount shall not become available for obligation until September 30, 1991 and pursuant to section 202(b) of Public Law 100-219, this action is a necessary (but secondary) result of a significant policy change.*

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

To enable the Secretary of Transportation to make grants to the National Railroad Passenger Corporation for operating losses incurred by the Corporation, capital improvements, and labor protection costs authorized by 45 U.S.C. 565, to remain available until expended, [$482,000,000] *$470,000,000,* of which [$343,080,000] *$340,000,000* shall be available for operating losses incurred by the Corporation and for labor protection costs, and of which [$138,920,000] *$130,000,000* shall be available for capital improvements. Funds made available for operating losses and for labor protection costs which remain unobligated as of September 30, 1991, may be available for capital improvements: *Provided,* That none of the funds herein appropriated shall be used for lease or purchase of passenger motor vehicles or for the hire of vehicle operators for any officer or employee, other than the president of the Corporation, excluding the lease of passenger motor vehicles for those officers or employees while in official travel status: *Provided further,* That the Secretary shall make no commitments to guarantee new loans or loans for new purposes under 45 U.S.C. 602 in fiscal year 1991[: *Provided further,* That no funds are required to be expended or reserved for expenditure pursuant to 45 U.S.C. 601(e): *Provided further,* That none of the funds in this or any other Act shall be made available to finance the rehabilitation and other improvements (including upgrading track and the signal system, ensuring safety at public and private highway and pedestrian crossings by improving signals or eliminating such crossings, and the improvement of operational portions of stations related to intercity rail passenger service) on the main line track between Atlantic City, New Jersey, and the main line of the Northeast Corridor, unless the Secretary of Transportation certifies that not less than 40 per centum of the costs of such improvements shall be derived from non-Federal sources: *Provided further,* That, notwithstanding any other provision of law, the National Railroad Passenger Corporation shall not operate rail passenger service between Atlantic City, New Jersey, and the Northeast Corridor main line unless the Corporation's Board of Directors determines that revenues from such service have covered or exceeded 80 per centum of the short-term avoidable costs of operating such service in the second year of operation and 100 per centum of the short-term avoidable operating costs for each year thereafter: *Provided further,* That none of the funds provided in this or any other Act shall be made available to finance the acquisition and rehabilitation of a line, and construction necessary to facilitate improved rail passenger service, between Spuyten Duyvil, New York, and the main line of the Northeast Corridor unless the Secretary of Transportation certifies that not less than 40 per centum of the costs of such improvements shall be derived from non-Amtrak sources.

[PAYMENTS ON BEHALF OF THE NATIONAL RAILROAD PASSENGER CORPORATION]

MANDATORY PASSENGER RAIL SERVICE PAYMENTS

To enable the Secretary of Transportation to pay obligations and liabilities of the National Railroad Passenger Corporation, $150,000,000: *Provided,* That of this amount $133,000,000 is available only for the payment of excise tax liabilities under section 3221 of the Internal Revenue Code of 1986 due in fiscal year 1991 in excess of amounts needed to fund benefits for individuals who retired from the National Railroad Passenger Corporation and to beneficiaries of its employees: *Provided further,* That the remaining amount of $17,000,000 is available only for the payment of obligations of the National Railroad Passenger Corporation under section 358(a) of title 45 of the United States Code due in fiscal year 1991 in excess of its obligations calculated on an experience-rated basis.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING FUNDS

The Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes or other obligations pursuant to section 512 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, in such amounts and at such times as may be necessary to pay any amounts required pursuant to the guarantee of the principal amount of obligations under sections 511 through 513 of such Act, such authority to exist as long as any such guaranteed obligation is outstanding: *Provided,* That [no new loan guarantee commitments shall be made during fiscal year 1991] *in fiscal year 1991, new loan guarantee commitments shall equal $100,000,000: Provided further, That for purposes of this section, no obligation shall be guaranteed and no commitment shall be made to guarantee any obligation issued or purchased by the Federal Financing Bank, or any other Federal entity. Provided further,* That, notwithstanding any other provision of law, the Secretary of Transportation shall sell securities or promissory notes with a principal value of at least $32,000,000 that are held by the Department of Transportation under authority of sections 502, 505-507, 509, and 511-513 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, by no later than September 30, 1991: *Provided further,* That such securities or promissory notes authorized to be sold in the immediately preceding proviso shall be sold only for amounts greater than or equal to the net present value to the Government of each loan as determined by the Secretary of Transportation in consultation with the Secretary of the Treasury: *Provided further,* That the Secretary of Transportation shall transmit a written certification to the Committees on Appropriations of the Senate and House of Representatives before the consummation of each sale certifying that the amount to be realized is equal to or greater than the net present value to the Government of each loan: *Provided further,* That, notwithstanding any other provision of law, for fiscal year 1989 and each fiscal year thereafter all amounts realized from the sale of notes or securities sold under authority of this section shall be considered as current year domestic discretionary outlay offsets and not as "asset sales" or "loan prepayments" as defined by section 257(12) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: *Provided further,* That any underwriting fees and related expenses shall be derived solely from the proceeds of the sales.

REGIONAL RAIL REORGANIZATION PROGRAM

For the settlement of promissory notes pursuant to section 210 of the Regional Rail Reorganization Act of 1973 (Public Law 93-236), as amended, $284,979, to remain available until expended, together with such sums as may be necessary for the payment of interest due to the Secretary of the Treasury under the terms and conditions of such notes.

[CONRAIL COMMUTER TRANSITION ASSISTANCE

[For necessary capital expenses of Conrail commuter transition assistance, not otherwise provided for, $5,000,000, to remain available until expended.

[AMTRAK CORRIDOR IMPROVEMENT LOANS

[For loans to the Chicago, Missouri and Western Railroad, or its successors, to replace existing jointed rail with continuous welded rail between Joliet and Granite City, Illinois, $3,500,000: *Provided,* That any loan authorized under this section shall be structured with a maximum 20-year payment at an annual interest rate of 4 per centum: *Provided further,* That the Federal Government shall hold a first and prior purchase money security interest with respect to any materials to be acquired with Federal funds: *Provided further,* That any such loan shall be matched on a dollar for dollar basis by the State of Illinois: *Provided further,* That any such loan shall be made available no later than thirty days after enactment of this Act.]

URBAN MASS TRANSPORTATION ADMINISTRATION

ADMINISTRATIVE EXPENSES

For necessary administrative expenses of the urban mass transportation program authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), and 23 U.S.C. chapter 1, in connection with these activities, including hire of passenger motor vehicles and services as authorized by 5 U.S.C. 3109, [$32,770,000] *$32,396,000*: *Provided,* That none of the funds provided in this Act shall be used to implement or enforce the April 25, 1989, Notice of Proposed Rulemaking, "Major Capital Investment Projects".

RESEARCH, TRAINING, AND HUMAN RESOURCES

For necessary expenses for research, training, and human resources as authorized by the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), to remain available until expended, $8,000,000: *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred for training.

FORMULA GRANTS

For necessary expenses to carry out the provisions of sections 9 and 18 of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), [$1,690,000,000] *$1,600,000,000,* together with $5,000,000 to carry out the provisions of section 18(h) of the Urban Mass Transportation Act of 1964, as amended, to remain available until expended: *Provided,* That notwithstanding any other provision of law, of the funds provided under this head for formula grants, no more than $802,278,000 may be used for operating assistance under section 9(k)(2) of the Urban Mass Transportation Act of 1964, as amended: *Provided further, That notwithstanding any other provision of law, before apportionment of these funds, $15,000,000 shall be made available for the purposes of section 18 of the Urban Mass Transportation Act of 1964, as amended.*

DISCRETIONARY GRANTS

(LIMITATION ON OBLIGATIONS)

(HIGHWAY TRUST FUND)

None of the funds in this Act shall be available for the implementation or execution of programs in excess of [$1,200,000,000] *$1,400,000,000* in fiscal year 1991 for grants under the contract authority authorized in section 21 (a)(2) and (b) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.).

MASS TRANSIT CAPITAL FUND

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

For payment of obligations incurred in carrying out section 21 (a)(2) and (b) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1601 et seq.), administered by the Urban Mass Transportation Administration, [$815,000,000] *$900,000,000,* to be derived from the Highway Trust Fund and to remain available until expended.

INTERSTATE TRANSFER GRANTS—TRANSIT

For necessary expenses to carry out the provisions of 23 U.S.C. 103(e)(4) related to transit projects, [$160,000,000] *$180,000,000,* to remain available until expended.

WASHINGTON METRO

For necessary expenses to carry out the provisions of section 14 of Public Law 96-184, [$108,000,000] *$64,100,000,* to remain available until expended[, of which $43,900,000 shall be available only upon enactment of authorizing legislation].

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION

The Saint Lawrence Seaway Development Corporation is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to the Corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the Corporation's budget for the current fiscal year.

OPERATIONS AND MAINTENANCE

(HARBOR MAINTENANCE TRUST FUND)

For necessary expenses for operation and maintenance of those portions of the Saint Lawrence Seaway operated and maintained by the Saint Lawrence Seaway Development Corporation, [$10,500,000] *$10,250,000, of which $174,000 shall remain available until expended* to be derived from the Harbor Maintenance Trust Fund, pursuant to Public Law 99-662.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

RESEARCH AND SPECIAL PROGRAMS

For expenses necessary to discharge the functions of the Research and Special Programs Administration, and for expenses for conducting research and development, [$16,300,000] *$15,916,000,* of which [$1,555,000] *$1,535,000* shall remain available until expended: *Provided,* That there may be credited to this appropriation funds received from States, counties, municipalities, other public authorities, and private sources for expenses incurred for training and for aviation information management.

PIPELINE SAFETY

(PIPELINE SAFETY FUND)

For expenses necessary to conduct the functions of the pipeline safety program and for grants-in-aid to carry out a pipeline safety program, as authorized by section 5 of the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, [$10,367,000] *$11,067,000,* to be derived from the Pipeline Safety Fund, of which [$5,725,000] *$5,925,000* shall remain available until expended.

OFFICE OF THE INSPECTOR GENERAL

SALARIES AND EXPENSES

For necessary expenses of the Office of the Inspector General to carry out the provisions of the Inspector General Act of 1978, as amended, [$30,970,000] *$31,875,000.*

TITLE II—RELATED AGENCIES

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

SALARIES AND EXPENSES

For expenses necessary for the Architectural and Transportation Barriers Compliance Board, as authorized by section 502 of the Rehabilitation Act of 1973, as amended, $2,700,000.

NATIONAL TRANSPORTATION SAFETY BOARD

SALARIES AND EXPENSES

For necessary expenses of the National Transportation Safety Board, including hire of passenger motor vehicles and aircraft; services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18; uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902), [$30,940,000] *$32,000,000,* of which not to exceed [$500] *$2,500* may be used for official reception and representation expenses.

INTERSTATE COMMERCE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Interstate Commerce Commission, including services as authorized by 5 U.S.C. 3109, and not to exceed $1,500 for official reception and representation expenses, [$45,369,000] *$43,777,000*: *Provided,* That joint board members and cooperating State commissioners may use Government transportation requests when traveling in connection with their official duties as such.

PAYMENTS FOR DIRECTED RAIL SERVICE

(LIMITATION ON OBLIGATIONS)

None of the funds provided in this Act shall be available for the execution of programs the obligations for which can reasonably be expected to exceed $475,000 for directed rail service authorized under 49 U.S.C. 11125 or any other Act.

PANAMA CANAL COMMISSION

PANAMA CANAL REVOLVING FUND

For administrative expenses of the Panama Canal Commission, including not to exceed $10,000 for official reception and representation expenses of the Board; not to exceed $4,000 for official reception and representation expenses of the Secretary; and not to exceed $25,000 for official reception and representation expenses of the Administrator, [$48,928,000] *$48,941,000,* to be derived from the Panama Canal Revolving Fund: *Provided,* That none of these funds may be used for the planning or execution of non-administrative and capital programs the obligations for which are in excess of [$448,497,000] *$459,000,000* in fiscal year 1991: *Provided further,* That funds available to the Panama Canal Commission shall be available for the purchase of not to exceed forty-four passenger motor vehicles for replacement only (including large heavy-duty vehicles used to transport Commission personnel across the Isthmus of Panama, the purchase price of which shall not exceed $15,000 per vehicle).

DEPARTMENT OF THE TREASURY

REBATE OF SAINT LAWRENCE SEAWAY TOLLS

(HARBOR MAINTENANCE TRUST FUND)

For rebate of the United States portion of tolls paid for use of the Saint Lawrence Seaway, pursuant to Public Law 99-662, $10,500,000, to remain available until expended and to be derived from the Harbor Maintenance Trust Fund, of which not to exceed $200,000 shall be available for expenses of administering the rebates.

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

INTEREST PAYMENTS

For necessary expenses for interest payments, to remain available until expended, $51,663,569: *Provided*, That these funds shall be disbursed pursuant to terms and conditions established by Public Law 96-184 and the Initial Bond Repayment Participation Agreement.

TITLE III—GENERAL PROVISIONS

SEC. 301. During the current fiscal year applicable appropriations to the Department of Transportation shall be available for maintenance and operation of aircraft; hire of passenger motor vehicles and aircraft; purchase of liability insurance for motor vehicles operating in foreign countries on official department business; and uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 302. Funds for the Panama Canal Commission may be apportioned notwithstanding 31 U.S.C. 1341 to the extent necessary to permit payment of such pay increases for officers or employees as may be authorized by administrative action pursuant to law that are not in excess of statutory increases granted for the same period in corresponding rates of compensation for other employees of the Government in comparable positions.

SEC. 303. Funds appropriated under this Act for expenditures by the Federal Aviation Administration shall be available (1) except as otherwise authorized by the Act of September 30, 1950 (20 U.S.C. 236-244), for expenses of primary and secondary schooling for dependents of Federal Aviation Administration personnel stationed outside the continental United States at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents, and (2) for transportation of said dependents between schools serving the area that they attend and their places of residence when the Secretary, under such regulations as may be prescribed, determines that such schools are not accessible by public means of transportation on a regular basis.

SEC. 304. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for a GS-18.

SEC. 305. None of the funds for the Panama Canal Commission may be expended unless in conformance with the Panama Canal Treaties of 1977 and any law implementing those treaties.

SEC. 306. None of the funds in this Act shall be used for the planning or execution of any program to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 307. None of the funds appropriated in this Act shall remain available for obligation beyond the current fiscal year nor may any be transferred to other appropriations unless expressly so provided herein.

SEC. 308. None of the funds in this or any previous or subsequent Act shall be available for the planning or implementation of any change in the current Federal status of the Transportation Systems Center, and none of the funds in this Act shall be available for the implementation of any change in the current Federal status of the Turner-Fairbank Highway Research Center: *Provided*, That the Secretary may plan for further development of the Transportation Systems Center and for other compatible uses of the Center's real property, provided that any such planning does not alter the Federal status of the Center's research and development operation.

SEC. 309. The expenditure of any appropriation under this Act for any consulting service through procurement contract pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing executive order issued pursuant to existing law.

SEC. 310. (a) For fiscal year 1991 the Secretary of Transportation shall distribute the obligation limitation for Federal-aid highways by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction that are apportioned or allocated to each State for such fiscal year bear to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction that are apportioned or allocated to all the States for such fiscal year.

(b) During the period October 1 through December 31, 1990, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (a), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection: *Provided*, That this subsection shall not apply to funds obligated for the Kennedy Expressway rehabilitation project in Chicago, Illinois.

(c) Notwithstanding subsections (a) and (b), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction that have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1991, revise a distribution of the funds made available under subsection (a) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year giving priority to those States having large unobligated balances of funds apportioned under section 104 of title 23, United States Code, and giving priority to those States which, because of statutory changes made by the Surface Transportation Assistance Act of 1982 and the Federal-Aid Highway Act of 1981, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses, the Federal lands highway program, the strategic highway research program and amounts made available under sections 149(d), 158, 159, 164, 165, and 167 of Public Law 100-17.

(d) The limitation on obligations for Federal-aid highways and highway safety construction programs for fiscal year 1991 shall not apply to obligations for emergency relief under section 125 of title 23, United States Code; obligations under section 157 of title 23, United States Code; projects covered under section 147 of the Surface Transportation Assistance Act of 1978, section 9 of the Federal-Aid Highway Act of 1981, subsections 131 (b) and (j) of Public Law 97-424, section 118 of the National Visitors Center Facilities Act of 1968, section 320 of title 23, United States Code; projects authorized by Public Law 99-500, Public Law 99-591 and Public Law 100-202; or projects covered under subsections 149 (b) and (c) of Public Law 100-17.

(e) Subject to paragraph (c)(2) of this General Provision, a State which after August 1 and on or before September 30 of fiscal year 1991 obligates the amount distributed to such State in that fiscal year under paragraphs (a) and (c) of this General Provision may obligate for Federal-aid highways and highway safety construction on or before September 30, 1991, an additional amount not to exceed 5 percent of the aggregate amount of funds apportioned or allocated to such State—

(1) under sections 104, 130, 144, and 152 of title 23, United States Code, and

(2) for highway assistance projects under section 103(e)(4) of such title,

which are not obligated on the date such State completes obligation of the amount so distributed.

(f) During the period August 2 through September 30, 1991, the aggregate amount which may be obligated by all States pursuant to paragraph (e) shall not exceed 2.5 percent of the aggregate amount of funds apportioned or allocated to all States—

(1) under sections 104, 130, 144, and 152 of title 23, United States Code, and

(2) for highway assistance projects under section 103(e)(4) of such title,

which would not be obligated in fiscal year 1991 if the total amount of the obligation limitation provided for such fiscal year in this Act were utilized.

(g) Paragraph (e) shall not apply to any State which on or after August 1, 1991, has the amount distributed to such State under paragraph (a) for fiscal year 1991 reduced under paragraph (c)(2).

SEC. 311. None of the funds in this Act shall be available for salaries and expenses of more than one hundred and twenty political and Presidential appointees in the Department of Transportation.

SEC. 312. Not to exceed [$350,000] *$1,400,000* of the funds provided in this Act for the Department of Transportation shall be available for the necessary expenses of advisory committees.

SEC. 313. The limitation on obligations for the Discretionary Grants program of the Urban Mass Transportation Administration shall not apply to any authority under section 21(a)(2) of the Urban Mass Transportation Act of 1964, as amended, previously made available for obligation.

SEC. 314. Notwithstanding any other provision of law, none of the funds in this Act shall be available for the construction of, or any other costs related to, the Central Automated Transit System (Downtown People Mover) in Detroit, Michigan.

SEC. 315. None of the funds in this Act shall be used to implement section 404 of title 23, United States Code.

SEC. 316. Every 30 days, the Urban Mass Transportation Administration shall publish in the Federal Register an announcement of each grant obligated pursuant to sections 3 and 9 of the Urban Mass Transportation Act of 1964, as amended, including the grant number, the grant amount, and the transit property receiving each grant.

SEC. 317. Notwithstanding any other provision of law, funds appropriated in this or any other Act intended for studies, reports, training, salaries, or research, and related costs thereof including necessary capital expenses, including site acquisition, construction and equipment, are available for such purposes to be conducted through contracts, grants, or financial assistance agreements with the educational institutions that are specified in such Acts or in any report accompanying such Acts.

SEC. 318. The Secretary of Transportation shall permit the obligation of not to exceed $4,000,000, apportioned under title 23, United States Code, section 104(b)(5)(B) for the State of Florida for operating expenses of the Tri-County Commuter Rail Project in the area of Dade, Broward, and Palm Beach Counties, Florida, during each year that Interstate 95 is under reconstruction in such area.

SEC. 319. ESSENTIAL AIR SERVICE COMPENSATION.—Notwithstanding any other provision of law, the Secretary of Transportation shall make payment of compensation under subsection 419 of the Federal Aviation Act of 1958, as amended, only to the extent and in the manner provided in appropriations Acts, at times and in a manner determined by the Secretary to be appropriate, and claims for such compensation shall not arise except in accordance with this provision.

SEC. 320. The authority conferred by section 513(d) of the Airport and Airway Improvement Act of 1982, as amended, to issue letters of intent shall remain in effect subsequent to September 30, 1992. Letters of intent may be issued under such subsection to applicants determined to be qualified under such Act: *Provided,* That, notwithstanding any other provision of law, all such letters of intent in excess of $10,000,000 shall be submitted for approval to the Committees on Appropriations of the Senate and the House of Representatives; the Committee on Commerce, Science, and Transportation of the Senate; and the Committee on Public Works and Transportation of the House of Representatives.

SEC. 321. The Secretary of Transportation is authorized to transfer funds appropriated for any office of the Office of the Secretary to any other office of the Office of the Secretary: *Provided,* That no appropriation shall be increased or decreased by more than 5 per centum by all such transfers: *Provided further,* That any such transfer shall be submitted for approval to the House and Senate Committees on Appropriations.

SEC. 322. Such sums as may be necessary for fiscal year 1991 pay raises for programs funded in this Act shall be absorbed within the levels appropriated in this Act.

SEC. 323. VESSEL TRAFFIC SAFETY FAIRWAY.—None of the funds in this Act shall be available to plan, finalize, or implement regulations that would establish a vessel traffic safety fairway less than five miles wide between the Santa Barbara Traffic Separation Scheme and the San Francisco Traffic Separation Scheme.

SEC. 324. Notwithstanding any other provision of law, airports may transfer, without consideration, to the Federal Aviation Administration instrument landing systems (along with associated approach lighting equipment and runway visual range equipment), the purchase of which was assisted by a Federal airport aid program, airport development aid program or airport improvement program grant. The Federal Aviation Administration shall accept such equipment and it shall thereafter be operated and maintained by the Federal Aviation Administration in accordance with agency criteria.

[SEC. 325. INTERMODAL URBAN DEMONSTRATION PROJECT.—Funds appropriated in this Act for "Intermodal Urban Demonstration Project" shall remain available until expended.]

SEC. 325. Notwithstanding any other provisions of law, of the discretionary funds available to New York State under the Interstate Transfer Grants—Transit Account of this Act, $11,000,000 shall be transferred to the Federal Railroad Administration, which shall make such funds available to Amtrak for the Westside Connector Rail Line Project in New York City.

SEC. 326. Notwithstanding any other provision of law, funds available to the Coast Guard under the head "Operating Expenses" in this Act shall be available for expenses incurred in fiscal year 1991 by the Coast Guard in responding to any oil spill.

[SEC. 327. MAXI-CUBE VEHICLES.—Section 411(d) of the Surface Transportation Assistance Act of 1982 (49 U.S.C. App. 2311(d)), relating to length limitations on federally assisted highways, is amended by inserting after "boat transporters" the following: "and maxi-cube vehicles".]

SEC. 327. (a) Notwithstanding any other provision of law, and subject to the provisions of section 2 below, title to a certain 102 acres of property located at West Sayville, town of Islip, Suffolk County, New York, as described in a deed dated November 4, 1918, from the Atlantic Communication Company, recorded in the office of the County Clerk of Suffolk County, New York on February 2, 1921, in Deed Liber 1016, page 433; a quit claim deed dated January 20, 1920, from Mary E. Shell; Executrix of the Estate of Edward Shell, recorded in the office of the County Clerk of Suffolk County, New York in Deed Liber 1016, page 438; and a deed dated September 2, 1920, from Atlantic Communication Company, recorded in the office of the County Clerk of Suffolk County, New York in Deed Liber 1016, page 443, and known as the Federal Aviation Administration's International Flight Service Transmitting Facility, shall be conveyed to the Fish and Wildlife Service of the United States Department of the Interior in order to ensure the continued protection of the sandplain gerardia (Agalinis acuta) a federally listed endangered plant species.

(b) The conveyance of the property identified in section 1 shall become effective upon certification by the Administrator of the Federal Aviation Administration that the International Flight Service Transmitting Facility currently located on such property has been completely relocated to an alternate site in Barnegat, New Jersey, and that the relocated International Flight Service Transmitting Facility is fully functional.

(c) Pursuant to the provisions of 40 U.S.C. 484(e)(3)(H), a certain 19.2 acres of property located on the west side of Cherry Avenue in West Sayville, town of Islip, County of Suffolk, New York, as described in a Declaration of Taking, Civil Number 60-CD-853, filed in United States District Court for the Eastern District of New York, dated September 9, 1960, shall be transferred, as a public benefit transfer and without cost, to said town of Islip for recreational purposes.

SEC. 328. WESTSIDE LIGHT RAIL.—Notwithstanding any other provision of law, the Secretary shall, with regard to the Discretionary Grants program of the Urban Mass Transportation Administration, by September 30, 1991, issue a letter of intent and enter into a full funding agreement for the Westside Light Rail extension, including systems related costs, between downtown Portland, Oregon, and S.W. 185th Avenue. That full funding agreement shall provide for a future amendment under the same terms and conditions set forth above, for the extension known as the Hillsboro project which extends from S.W. 185th Avenue to the Transit Center in the City of Hillsboro, Oregon. Subject to a regional decision documented in the Hillsboro project's preferred alternatives report, the Secretary shall enter into an agreement with the Tri-County Metropolitan Transportation District in Portland, Oregon, to initiate preliminary engineering on the Hillsboro project, which shall proceed independent of and concurrent with the project between downtown Portland, Oregon, and S.W. 185th Avenue.

SEC. 329. (a) Notwithstanding any other provision of law, the Secretary of Transportation shall reduce the aggregate amount which a State may obligate for Federal-aid highways and highway safety construction programs for fiscal year 1991 by 25 percent if such State has a public authority which provides mass transportation for an urbanized area of such State with a population of 3,000,000 or more as determined under the 1980 decennial census of the United States, and if by October 1, 1990—

(1) laws of such State do not authorize a general tax-based source of revenues to take effect on or before January 1, 1992, dedicated to paying the non-Federal share of projects for mass transportation eligible for assistance under the Urban Mass Transportation Act of 1964; or

(2) the laws of such State do not authorize the establishment of regional or local tax-based sources of revenues dedicated to pay such non-Federal share or for paying operating expenses of mass transit service so as to satisfy financial capacity standards as may be required by the Secretary of Transportation.

(b) The Secretary of Transportation may restore any reductions in obligation authority made under paragraph (a) in fiscal year 1991 for any such State which meets by July 1, 1991, subparagraph (1) or (2) of paragraph (a).

(c) For purposes of this section, the terms "mass transportation", "State", and "urbanized areas" have the meaning such terms have under section 12 of the Urban Mass Transportation Act of 1964.

[SEC. 330. NATIONAL WEATHER GRAPHICS SYSTEM.—None of the funds made available in this Act may be used by the Federal Aviation Administration for a new National Weather Graphics System.]

SEC. 330. Within 90 days of the effective date of this Act, the Secretary of Transportation shall publish a proposed rule to amend the Federal Motor Carrier Safety regulations to prohibit the use of radar detectors by drivers operating commercial motor vehicles. Unless the Secretary determines that this prohibition would not improve highway safety, the Secretary shall promulgate a

final rule hereinafter prohibiting such use within 270 days of the effective date of this Act.

SEC. 331. NATIONAL 55 MPH SPEED LIMIT ENFORCEMENT PENALTIES.—Notwithstanding sections 141(a) and 154 of title 23, United States Code, none of the funds in this or any previous or subsequent Act shall be used for the purpose of reducing or reserving any portion of a State's apportionment of Federal-aid highway funds as required by section 154(f) of title 23, United States Code, for reason of noncompliance with the criteria of that subsection during fiscal year 1989. The Secretary shall promptly restore any apportionments which, prior to enactment of this Act, were reduced or reserved from obligation for reason of noncompliance under section 154(f) during said fiscal year.

SEC. 332. Unless specifically provided in this Act, none of the funds in this Act shall be available to initiate multiyear contracts for a program which meets the criteria of a Level I or Level II major system acquisition as defined by Department of Transportation Order 4200.14 if the total value of procurement end items in the contract, including options, exceeds $100,000,000: *Provided,* That for the purposes of this section, a multiyear contract is defined as one which provides for more than one year's requirements of systems, subsystems, or components within a single contract: *Provided further,* That none of the funds in this Act shall be available to initiate contracts for major systems acquisition which include procurement options where funding for those options is scheduled to be provided prior to delivery to the Federal Government of at least fifty per centum of all units previously ordered under that contract.

SEC. 333. For each fiscal year [beginning after fiscal year 1992,] the Secretary of Transportation shall withhold [two percent of the amount required to be apportioned to a State (under sections 104(b)(1), 104(b)(2), 104(b)(5), and 104(b)(6) of title 23, United States Code) for that fiscal year if that State does not have in effect on the first day of that fiscal year a law which requires the suspension or revocation for a period of not less than 180 days of the driver's license of each person convicted of a violation of the Controlled Substances Act or convicted for any drug or narcotic offense chargeable under the laws of the State or any other State] *5 per centum of the amount required to be apportioned to any State under each of paragraphs (1), (2), (5), and (6) of section 104(b) on the first day of each fiscal year which begins after the second full calendar year following the date of enactment of this section if the State does not meet the requirements of paragraph (3) on such date.*

"(2) The Secretary shall withhold 10 per centum (including any amounts withheld under paragraph (1)) of the amount required to be apportioned to any State under each of paragraphs (1), (2), (5), and (6) of section 104(b) on the first day of each fiscal year which begins after the fourth full calendar year following the date of enactment of this section if the State does not meet the requirements of paragraph (3) on the first day of such fiscal year.

"(3) A State meets the requirements of this paragraph if—

"(A) the State has enacted and is enforcing a law that requires in all circumstances, or requires in the absence of compelling circumstances warranting an exception—

"(i) the revocation, or suspension for at least 6 months, of the driver's license of any individual who is convicted, after the enactment of such law, of—

"(I) any violation of the Controlled Substance Act, or

"(II) any drug offense, and

"(ii) a delay in the issuance or reinstatement of a driver's license to such an individual for at least 6 months after the individual applies for the issuance or reinstatement of a driver's license if the individual does not have a driver's license, or the driver's license of the individual is suspended, at the time the individual is so convicted, or

"(B) The Governor of the State—

"(i) submits to the Secretary no earlier than the adjournment sine die of the first regularly scheduled session of the State's legislature which begins after the date of enactment of this section a written certification stating that he is opposed to the enactment or enforcement in his State of a law described in subparagraph (A) relating to the revocation, suspension, issuance, or reinstatement of driver's licenses to convicted drug offenders; and

"(ii) submits to the Secretary a written certification that the legislature (including both Houses where applicable) has adopted a resolution expressing its opposition to a law described in clause (i).

"(b)(1)(A) Any funds withheld under subsection (a) from apportionment to any State on or before September 30, 1995, shall remain available for apportionment to such State as follows:

"(i) If such funds would have been apportioned under section 104(b)(5)(A) but for this section, such funds shall remain available until the end of the fiscal year for which such funds are authorized to be appropriated.

"(ii) If such funds would have been apportioned under section 104(b)(5)(B) but for this section, such funds shall remain available until the end of the second fiscal year following the fiscal year for which such funds are authorized to be appropriated.

"(iii) If such funds would have been apportioned under paragraph (1), (2), or (6) of section 104(b) but for this section, such funds shall remain available until the end of the third fiscal year following the fiscal year for which such funds are authorized to be appropriated.

"(B) No funds withheld under this section from apportionment to any State after September 30, 1995, shall be available for apportionment to such State.

"(2) If, before the last day of the period for which funds withheld under subsection (a) from apportionment are to remain available for apportionment to a State under paragraph (1), the State meets the requirements of subsection (a)(3), the Secretary shall, on the first day on which the State meets the requirements of subsection (a)(3), apportion to the State the funds withheld under subsection (a) that remain available for apportionment to the State.

"(3) Any funds apportioned pursuant to paragraph (2) shall remain available for expenditure as follows:

"(A) Funds originally apportioned under section 104(b)(5)(A) shall remain available until the end of the fiscal year succeeding the fiscal year in which such funds are apportioned under paragraph (2).

"(B) Funds originally apportioned under paragraph (1), (2), (5)(B), or (6) of section 104(b) shall remain available until the end of the third fiscal year succeeding the fiscal year in which such funds are so apportioned.

Sums not obligated at the end of such period shall lapse or, in the case of funds apportioned under section 104(b)(5), shall lapse and be made available by the Secretary for projects in accordance with section 118(b).

"(4) If, at the end of the period for which funds withheld under subsection (a) from apportionment are available for apportionment to a State under paragraph (1), the State does not meet the requirements of subsection (a)(3), such funds shall lapse or, in the case of funds withheld from apportionment under section 104(b)(5), such funds shall lapse and be made available by the Secretary for projects in accordance with section 118(b).

"(c) For purposes of this section—

"(1) The term 'driver's license' means a license issued by a State to any individual that authorizes the individual to operate a motor vehicle on highways.

"(2) The term 'drug offense' means any criminal offense which proscribes—

"(A) the possession, distribution, manufacture, cultivation, sale, transfer, or the attempt or conspiracy to possess, distribute, manufacture, cultivate, sell, or transfer any substance the possession of which is prohibited under the Controlled Substances Act, or

"(B) the operation of a motor vehicle under the influence of such a substance.

"(3) The term 'convicted' includes adjudicated under juvenile proceedings.".

(b) The table of contents for chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following new item:

"159. Revocation or suspension of the driver's license of individuals convicted of drug offenses.".

SEC. 334. Unobligated funds authorized to be appropriated by section 131(d)(2) of the Highway Improvement Act of 1982, Public Law 97-424, shall be available for obligation for the project described in section 149(a)(88) of the Federal-Aid Highway Act of 1987, Public Law 100-17, in the same manner and to the same extent provided in section 131(d)(3) of the Highway Improvement Act of 1982.

SEC. 335. Notwithstanding section 127 of title 23, United States Code, the State of Wyoming may permit the use of the National System of Interstate and Defense Highways located in Wyoming by vehicles in excess of 80,000 pounds gross weight, but meeting axle and bridge formula specifications in section 127 of title 23, United States Code.

SEC. 336. 23 U.S.C. 410(e)(1)(C) is hereby amended by striking the words "within the time period specified in subparagraph (F)"; 23 U.S.C. 410(e)(2) is hereby amended by adding the words "a significant portion of" after the word "which", the first time it appears, and by striking the words "convicted of" and inserting in lieu thereof the words "apprehended and fined for".

SEC. 337. Notwithstanding any other provision of law, the air traffic control facilities known as the John F. Kennedy International, LaGuardia, and Newark International Airport air traffic control towers, shall be included in the pay demonstration project as approved and published by the Office of Personnel Management in the Federal Register on March 10, 1989. Further, that these facilities shall be administratively determined by the Administrator of the Federal Aviation Administration to be level V terminals and the grades of the air traffic control specialists in the GS-2152 classification series, assigned to such facilities, shall be adjusted accordingly.

SEC. 338. None of the funds in this Act shall be used to withhold funds for any section 3 and section 9 operating and capital assistance grants for the City of Phoenix, Arizona, based, on the inclusion of a "preference in hiring" provision in the employee protective arrangements developed pursuant to 49 U.S.C. 1609(c), and such grant funds shall be awarded to the City of Phoenix within 30 days of the enactment of this bill.

SEC. 339. Notwithstanding subsection (d) of section 402 of the Surface Transportation Assistance Act of 1982 (Public Law 97-424, 96 Stat. 2155, 2156) for States which have received only development grants under such section 402 and which have participated in the Commercial Motor Carrier Safety Inspection and Weighing Demonstration Program, the Secretary shall only approve a plan under such section 402 for fiscal year 1991 which provides that the aggregate expenditure of funds of the State and political subdivisions thereof, exclusive of Federal funds, for commercial motor vehicle safety programs will be maintained at a level which does not fall below the average level of such expenditure for the last two full fiscal years preceding the date the plan is approved.

SEC. 340. (a) That notwithstanding any other provision of law (including the Administrative Procedure Act and the Urban Mass Transportation Act) the Secretary of Transportation is authorized to issue the final rule entitled "Control of Drug Use in Mass Transportation Operations", which was originally issued on November 21, 1988 (53 Fed. Reg. 47,156; 47,174; 49 C.F.R. part 653), and to make appropriate adjustments to the implementation dates. Such rule shall become effective upon its issuance without any further administrative proceedings. In accordance with the Administrative Procedure Act, the Secretary is authorized to amend the rule to further the goal of controlling drug use in mass transportation. The Secretary also is authorized to undertake a rule making with respect to alcohol testing in the transmit industry.

(b) In furtherance of this provision, no State or local government shall adopt or have in effect any law, rule, regulation, ordinance, standard, or order that is inconsistent with the regulations issued under this provision, except that the regulations issued under this provision shall not be construed to preempt provisions of State criminal law which impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to mass transportation employees, or to the general public.

(c) Nothing in this provision shall be construed to restrict the discretion of the Secretary to continue to force, amend, or further supplement any regulations governing the use of alcohol or controlled substances by mass transportation employees issued before the date of enactment of the Act.

(d) In issuing regulations under this provision, the Secretary shall only establish requirements that are consistent with the international obligations of the United States, and the Secretary shall take into consideration any applicable laws and regulations of foreign countries.

This Act may be cited as the "Department of Transportation and Related Agencies Appropriations Act, 1991".

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the bill.

The Senate proceeded to consider the bill.

Mr. BYRD. Mr. President, was consent given to proceed to consideration of H.R. 5229?

The PRESIDING OFFICER. That is correct.

Mr. LAUTENBERG. Mr. President, I am happy to note that the time has arisen to present to the Senate H.R. 5229, the appropriations bill for the Department of Transportation and related agencies for fiscal year 1991.

I am proud of this bill, Mr. President, the bill is the result of careful and diligent examination of the budget request proposed by the President and the requests of many Senators and concerned citizens. The bill was inspired by testimony received during numerous hearings over a 3-month period on 11 separate agencies within the Department of Transportation.

Mr. President, the mission of the Transportation appropriations bill is to protect and enhance our Nation's basic transportation infrastructure. Our challenge in meeting this mission gets tougher and tougher with each passing year. As a Nation, Mr. President, we have let our attention to infrastructure slip. Since the early 1980's, the Federal share of infrastructure investment has declined and State and local infrastructure investments have not picked up the slack. Since 1960, overall capital spending on public works has declined from 2.3 percent of GNP in 1960 to less than 1.1 percent of GNP in 1985. Despite dramatic growth in the volume of air traffic, we have not added one new airport to our national aviation system in 16 years.

Mr. President, we are now paying the price for our lax attention to these infrastructure needs. Our Nation's roads and skies are experiencing unprecedented levels of congestion. Almost 70 percent of urban rush hour traffic now occurs under congested conditions. Long waits on the highway are now complemented by long waits on the runway. The administration's recent national transportation policy noted that between now and the end of this decade, our Nation's need for airport capacity will increase by almost 60 percent.

Mr. President, I believe that we have finally reached the point where the general public has come to recognize the critical need to invest in our transportation infrastructure. Inadequacies in our transportation system are not merely a matter of personal inconvenience. These inadequacies threaten the economic viability of our Nation. They hamper our ability to move merchandise, to produce jobs, and to compete in the international marketplace. There can be no prosperity without mobility, Mr. President, and that statement is as true today as it was when Dwight Eisenhower called for the establishment of a National Interstate Highway System more than 30 years ago.

The bill before us takes some critical steps to address our infrastructure needs, not only by investing in our traditional highway, aviation, rail, and water programs but in investing in important research on new technologies that will be critical to the transportation needs of the future—technologies such as magnetically levitated rail systems and intelligent vehicles/intelligent highway systems.

Earlier this year, Mr. President, the Senator labored long and hard over amendments to the Clean Air Act. Much mention was made at that time of the public cost of dirty air, the cost of congestion and the need for alternatives. I am pleased to say that this bill makes the necessary investment in mass transit to address our requirements for clean air. This investment in our mass transit system will also address the mandates of the Americans and Disabilities Act just signed by the President.

Mr. President, while I am pleased with the package before us, I must admit that the subcommittee on transportation faced some tough choices. I believe every appropriations subcommittee received an allocation providing less than what it could wisely spend, and this bill is no exception. I want to thank every member of the committee for their support.

In particular, I want to thank my distinguished colleague from New York, Senator D'AMATO, for his help and cooperation in the development of this bill.

This bill was passed unanimously by the subcommittee just 2 weeks following House passage of the bill and was passed unanimously by the full committee without amendment a day later. We believe this bill represents a responsible and balanced package and given the constraints of the budget resolution and our allocation, and considering the large number of requests we received from our colleagues.

In total, we received 497 Senate requests from 85 Senators, representing almost $4 billion in individual earmarked programs and priority listings for specific projects. The great majority of these projects were not included in the administration's budget. Obviously, we were not able to provide for every request—we have, however, done the best we could to accommodate Members' priorities.

I wish to take a moment to present this bill in the context of the President's budget for transportation. The President proposed to reduce the total budget authority and limitations on obligations in the transportation bill from the 1990 bill by $1.3 billion, from $28 to $26.7 billion, with a reduction in corresponding outlays of approximately $1 billion.

These cuts were achieved largely by reducing obligation limitations on highway construction programs by $200 million; eliminating funding for Amtrak, the Nation's intercity passenger railroad corporation, for a savings of $605 million in budget authority; and cutting mass transit operating subsidies by $800 million in budget authority.

These cuts were offset by increases of $180 million for Coast Guard operations and $1.16 billion for the Federal Aviation Administration.

In other words, Mr. President, the administration's budget proposed to pay for needed increases for the Coast Guard and the FAA by virtually eliminating financial assistance for mass transit and Amtrak, and by reducing highway expenditures as well.

Now, Mr. President, I would like to present a few highlights of the bill before us.

COAST GUARD

Mr. President, we have continued to expand the Coast Guard's portfolio to include new and critical missions. The subcommittee has fought hard to see to it that the Coast Guard have the necessary resources to execute these missions. The Senate has just passed the conference report on the omnibus oilspill bill. I am pleased to say that after all adjustments are made to the Coast Guard operating account for rent charges and other contributions, the bill before us includes $6 million more for operations than the level requested by the President. Funding for Coast Guard acquisitions is more than 10 percent above the President's request to accommodate the requirements of the new oilspill bill. In total the bill includes $52.2 million for enhanced oilspill readiness, more than twice the amount provided in the House bill and almost five times the amount requested in the President's budget.

HIGHWAYS

In the Federal Highway Administration, I would note that the bill before you has an obligation ceiling of $13.85 billion, an increase of $1.64 billion over last year and of $1.85 billion over the President's request.

AMTRAK

For Amtrak, the bill contains $340 million for operations, $150 million in mandatory payments, and $130 million for capital grants. The bill also includes $140 million for improvements to the Northeast corridor, which includes a down payment of $125 million for electrification of the final segment from New Haven to Boston.

FEDERAL AVIATION ADMINISTRATION

For the FAA, the bill provides an increase of $215 million for operations, an increase of 5.6 percent over the 1990 enacted level. This includes funding for an additional 495 air traffic controllers; 406 additional safety inspectors; 35 additional aircraft certification personnel; and 164 additional civil aviation security staff.

In the facilities and equipment area, the bill provides $2.24 billion, or $519 million more than the enacted 1990 level. Most of this will go to the modernization and expansion of our national airspace system by upgrading our air route traffic control centers, airport towers, and flight service facilities.

In the research area, there is $31.4 million to support continued development of automated explosive and sabotage detection systems, which is $5 million more than the administration's request. For the grants program, the bill contains $1.65 billion, which is $150 million over the administration's request.

URBAN MASS TRANSPORTATION ADMINISTRATION

In the transit area, the bill freezes at the 1990 level the amount available for operating assistance at $802 million. In addition, the amount for the section 3, trust-funded capital programs is at the fully authorized level of $1.4 billion, in recognition of the newly enacted requirements of the Americans With Disabilities Act and the clean air legislation.

Mr. President, I think it is quite obvious that nothing could have happened to move this transportation appropriations bill without the cooperation and support and counsel of our distinguished chairman of the Appropriations Committee, Senator ROBERT C. BYRD, and for all of his assistance, especially his recognition that we have to make continued investments in our Nation's infrastructure.

There is not a more diligent proponent of investments in our infrastructure, of getting our Nation going, of making it easier for people to get back and forth to work, to move commerce, to move goods, than our distinguished chairman of the Appropriations Committee. I thank him.

I also thank Senator HATFIELD for this cooperation, the ranking minority member of the Senate Appropriations Committee. And in particular, as I mentioned earlier, Senator D'AMATO, the ranking minority member of the Transportation Subcommittee, for all of his input and help in moving this legislation.

I again note, Mr. President, that the bill is scored by CBO and the Budget Committee as being right on its 302(b) allocation. So any amendment effecting budget authority or outlays will have to be accompanied by an offset.

At this time, I would like to yield to my friend and distinguished ranking minority member, Senator D'AMATO, for any comments he would like to make.

Mr. D'AMATO. Mr. President, I rise to join my distinguished colleague, the Senator from New Jersey, Senator LAUTENBERG, chairman of the Subcommittee on Appropriations for the Department of Transportation and Related Agencies. I am pleased to support H.R. 5229.

Let me say that the chairman deserves every bit of credit for crafting a bill that funds our Nation's current transportation programs. While recognizing the incredible fiscal limitations that we have. He has done it in the manner which I believe best represents our interests as it relates to safety and infrastructure needs, whether they be rail, air, or highway.

I want to commend our staff. They are second to none for their professionalism, Pat McCann, Pete Rogoff, Anne Miano, Joyce Rose, and Dorothy Pastis. I also want to thank Bruce Russell.

Mr. President, I rise to join my distinguished colleague, Senator LAUTENBERG, chairman of the Subcommittee on Appropriations for the Department of Transportation and Related Agencies, in support of H.R. 5229. The Appropriations Committee reported out this bill on Friday, July 27.

Chairman LAUTENBERG deserves credit for crafting a bill that funds our Nation's current transportation programs, as well as new initiatives, without sacrificing one mode to another. We have worked together to stretch our limited resources to the maximum. Moreover, the Congressional Budget Office assures us that we have not exceeded our 302(b) allocation of $12.7 billion in Budget Authority and $29 billion in Outlays.

Again, I would like to thank the subcommittee staff for their hard work on this bill: Patrick McCann, Peter Rogoff, Anne Miano, Joyce Rose, and Dorothy Pastis. I also thank Bruce Russell for his able assistance. The staff had a very short time to prepare for committee and floor action on this measure, and have done a very good job.

H.R. 5229 funds needed safety and security programs in the FAA, Amtrak, mass transit operating and capital needs, Coast Guard environmental responsibilities, and our expanding highway needs. I am especially appreciative of the chairman's work with me to enhance air traffic control in the busy New York-New Jersey metropolitan area. Our work to increase financial incentives to attract and retain qualified controllers in these hard-to-staff jobs will improve safety in the skies for millions of air passengers.

Mr. President, I urge my Senate colleagues to support this bill. Since there are no controversial issues that we know of concerning this bill, I believe that we rapidly can complete action on it. This will advance the Senate's efforts to move appropriations bills toward conference with the House.

Again I thank Senator LAUTENBERG for his work in attempting to balance the needs, the legitimate transportation concerns of all of our Members, and those of our different communities across the Nation. It was a tough job. But he has done an excellent job. I am delighted to support this bill and urge its passage.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, the bill as recommended by the Committee on Appropriations includes budget authority of $13,180,579,569. This results in an increase of $1,310,308,000 over the President's request, and $100,487,000 over the bill as passed by the House.
